From Apeldoorn the road went along Het Loo, the summer palace of Queen Wilhelmina and the prince consort, to Harderwyk, a lovely fisherplace at the famous "Zuyderzee." Whereas, before the war Harderwyk was a very quiet little village, it has become a place of some importance now, because not less than 40,000 to 50,000 Belgian soldiers are interned there. As a consequence there are always lots of relatives and friends, who come to visit them at the camp. Between Het Loo and Harderwyk is a good brick road, which is so well paved that Klaassens, on his Scott, lost several points for riding faster than 25 miles average, and thus risking his chance for winning the cup.

Kramat, on a Douglas motorcycle, got a blow-out and had a hard time to be on time at Harderwyk. About two miles before we reached this town, we passed the Belgian military camp, and never have I seen such a mixture of uniforms as here. There were infanterist hussars, royal engineers, in short, almost every branch of the Belgian army was represented here. Although they are prisoners, the soldiers have much liberty and seem to bear their fate in patience. When we passed we were cheered with loud "Hurrah" and "Vive la Hollande," which means "Long live Holland."

**Crossing the River Yser**

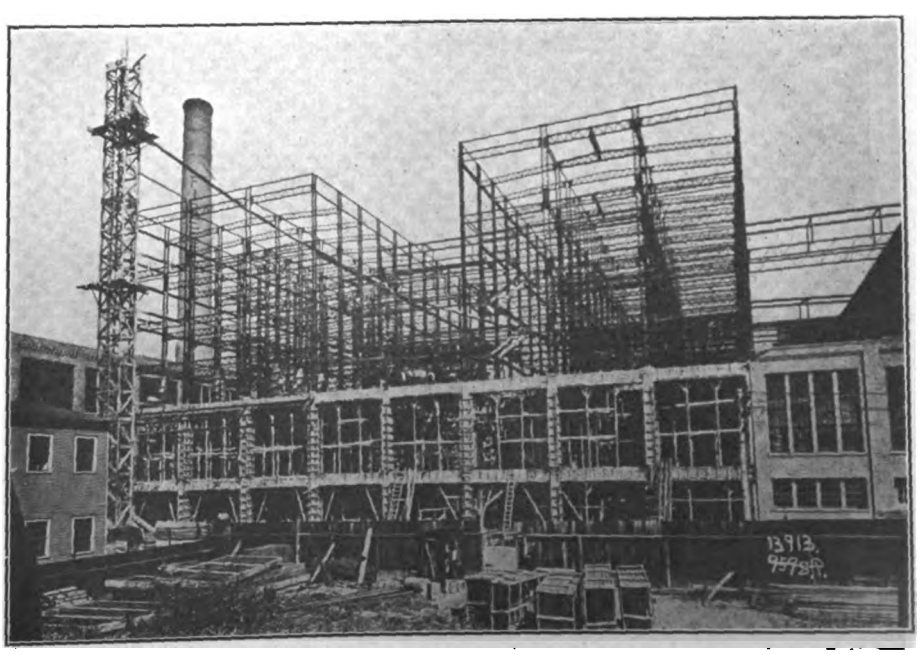
At Harderwyk there was a stop of ten minutes to have a drink and a bite, and on again it went to Zwolle, the capital of Overysel. Here the cyclists had to be careful to catch the ferry in time, which would bring them across the river Ysel, a stream of about one mile breadth. The ferry was soon crowded with red Indians, grey Harley-Davidsons, Eysincks and other machines. From the other side of the river to Zwolle was only half an hour's ride. Here the landscape is again quite different. An Arab of the desert, a negro from South Carolina or an Indian from Arizona would exclaim when coming there for the first time: "This must be Holland." For indeed it is a typical Dutch landscape—fine green meadows, crossed by scores of little canals and many windmills all around. The roads are built on dikes and rank among the best roads in the country. Several of the cyclists, who live in the Western part of Holland, which is of the same nature, smiled pleasantly when seeing the kind of roads back again to which they are so accustomed. It certainly is a pleasure to ride on these dike-roads.

As the course of the riders was announced beforehand, a large crowd had gathered on the Central Place at Zwolle and loud hurrahs were heard when the six military riders, closely followed by thirty-seven of the civilians (five had fallen out in the meantime), appeared on the scene. An obligatory pause of ten minutes for a quick luncheon had to be taken here. From Zwolle the way went back to Utrecht, the point of departure, but a different road was taken now, via Arnhem and Veenendaal, making together the 260 miles. Except Vermeer, who skidded between Brummen and Dieren and fell with his motorcycle in a gutter alongside the road, but who fortunately did not hurt himself badly, no serious accidents were noted and at five-twenty sharp corporal despatch-rider Scholte stopped before the International Garage at Utrecht, from where the riders started in the morning. He had not lost a single point, and thus became winner of the trophy. Verschure, on his F. N., received the reward for having used less gasoline than any of the others. The beautiful weather contributed considerably to the success of the ride, and all of the competitors unanimously agreed that although only one man could win the cup, they had all enjoyed the ride mighty well, on account of its pure sportive character.

## SWISS UNION HOLDS SUCCESSFUL RALLY AT INTERLAKEN

Interlaken, Switzerland.—That the Union Motorcycliste Sussie is very much alive was proven in this city August 23, by the presence of 80 members of clubs affiliated with this body at a rally, mounted on solo machines or in sidecar combinations. The number included the Motosacoche — Club of Geneva, the Motorfahrer-Klub of Zurich, and a company of military riders of the General Staff under Captain Bachman. The Berne organization, the Motor Sport Club de Berne, which headed the movement, was of course well represented.

## HOW THE FIRESTONE ADDITION IS GOING UP



**Work Is Being Rushed On This Extension to the Company's Big Plant in Akron Which Will Greatly Increase the Firestone Tire Output**

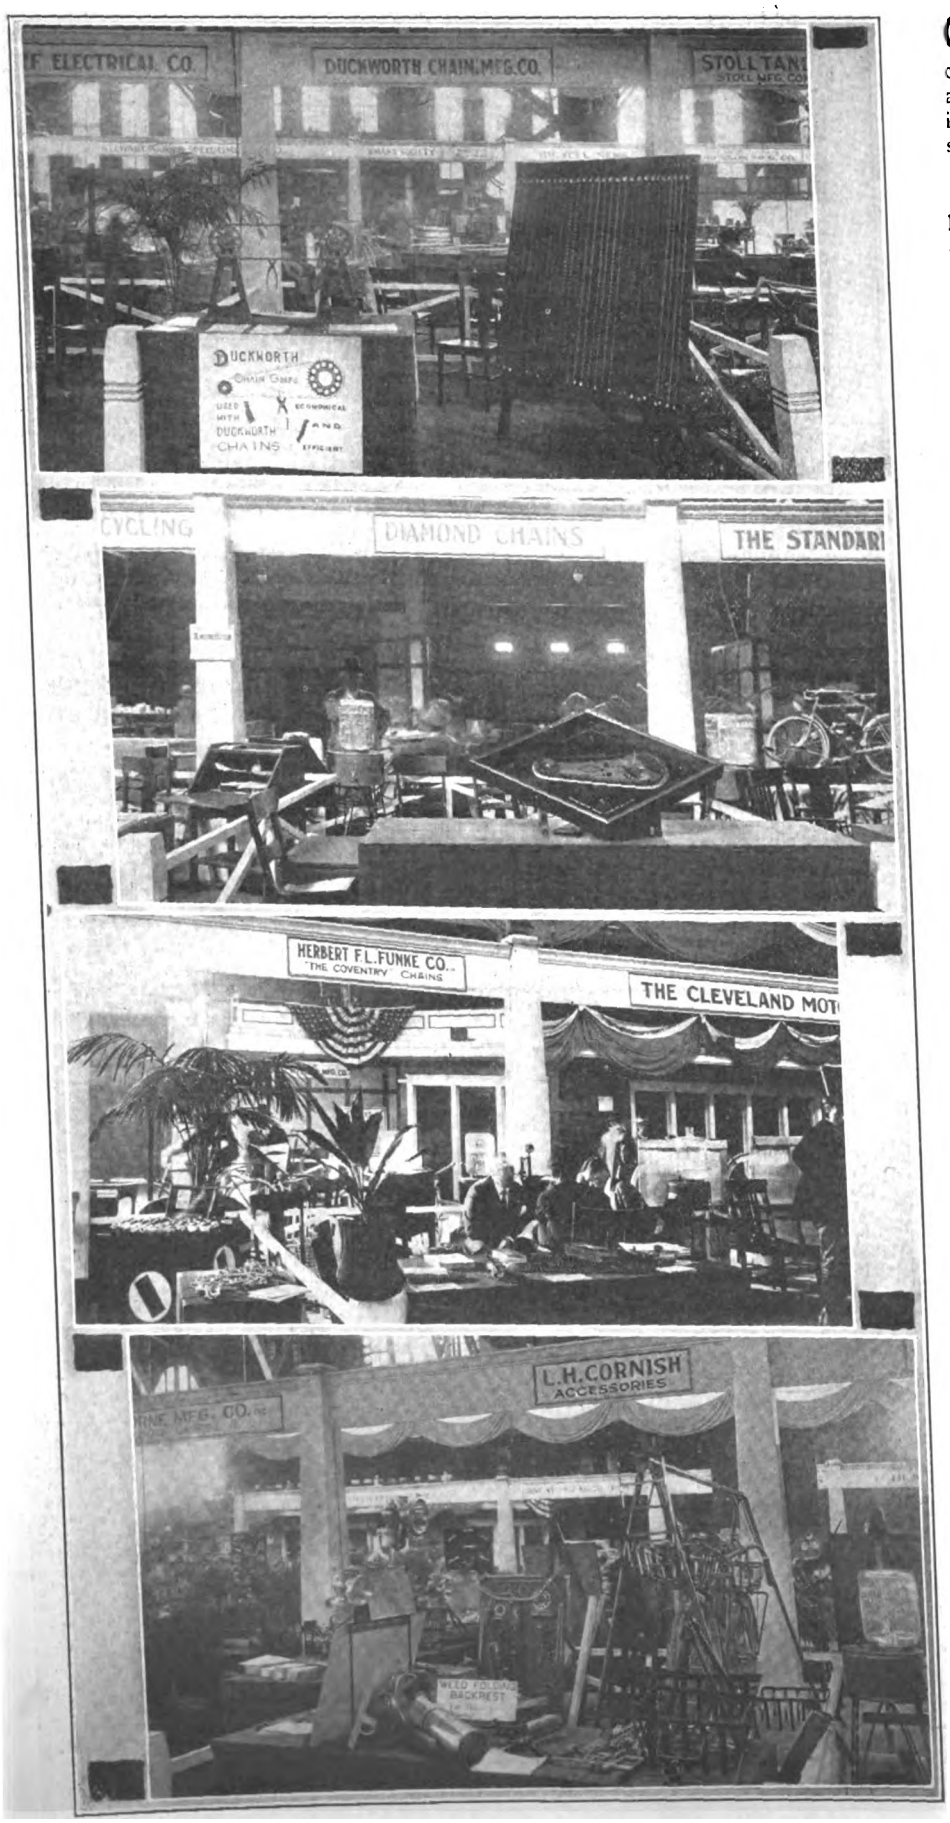
# ANOTHER QUARTET OF ACCESSORY DISPLAYS AT THE CHICAGO SHOW; SOME OF THE DEALERS WHO WHOOPED THINGS UP



Top, Duckworth Chain & Manufacturing Company; Next Below, Diamond Chain & Mfg. Co.; Third Picture, Herbert F. L. Funke, Inc.; Bottom, L. H. Cornish

C. R. McCLANAHAN came up from Houston, Tex., where he is associated with G. W. Beardsley, Excelsior agent. The motorcycle has a strong hold in his section, said McClanahan, and a good season is expected for 1916.

The Dayton Motor Bicycle will be handled in Davenport, Iowa, by the Nicholas & Weingart Company, of that city. The contract was signed at the Show.

Max Sladkin, the Excelsior man, of Philadelphia, Buffalo, Newark and Detroit, was an early and interested visitor at the Coliseum. He stated that from the various branches of the Haverford Cycle Co. he expected to sell many of the light models in 1916, but was sure that they would never replace the big twins, as the latter were a necessity commercially.

C. C. Cline, of Grand Rapids, Mich., accompanied by J. Foster, visited the Coliseum and made the Dayton booth his headquarters. Cline signed up to represent the Dayton Motor Bicycle for Kent County, Mich., for the 1916 season early in the week.

C. M. Anderson, of Batavia, Ill., was on hand to look over the whole show, but, of course, concentrated his energies on the Thor, which he represents when at home. He handles the Crown bicycle in addition to this machine.

W. C. Davis, who represents the Harley-Davidson in Janesville, Wis., spent a lot of time looking over the Silent Gray Fellows. He did not say much, but his orders are on the books at the Milwaukee factory.

Constandin Kuzaroff, of St. Paul, Minn., came on to renew his contract for the Dayton line for the new season. "This will include the Motor Bicycle," said Kuzaroff. "1916 is my seventh year in the motorcycle game."

"Indian Man" Bladstrom, of Bladstrom & Swanson, came to the Coliseum with a bunch of his riders from Rockford, Ill. Those who know "Bladdy" are betting that this bunch will be on 1916 Indians before another month is up.

One of the sidecar combinations that arrived at the Coliseum on the opening day carried W. Coles Lawrence, Harley-Davidson agent at Red Bank, N. J., and Art. Herrington, the endurance run rider of Madison, N. J. They carried 140 pounds of baggage between them. Lawrence has sold 22 of the Silent Gray Fellows to date, but in the two years he has had the agency he has never had a call for a repair part. Lawrence signed up for 1916 at the show.

Excelsior dealers who traveled to Chicago from the West and Northwest were Ira Enmark, Minneapolis, Minn.; George Mentor, Sioux City, Ia.; Elmer Saufley, Kansas City, Mo.; Orin Santer, Lyons,

Digitized by Google

# STILL THEY COME; IF YOU DON'T BELIEVE THE TRADE MEN WERE REAL BUSY AT CHICAGO, LOOK OVER THE NEWSY ITEMS BELOW

Kan.; E. F. Case, Coffeyville, Kan.; Eugene Miller, Grand Rapids, Mich.; G. R. Brundage, Oshkosh, Wis.; H. E. Townsend and G. E. Bowen, Lincoln, Neb.; O. Caverly, Fargo, N. D.; Art. Rostine, McPherson, Kan.; M. E. Harding, Topeka, Kan.

Peter Thom, of the Chicago Excelsior agency, reported the sale of the first 1916 machine to a rider. The deal was put through at the R. C. Crist store on Tuesday, morning, September 21. Thom's stable mate, Koppe, reported selling the first lightweight Excelsior at retail at the same time. The delivery on the latter mount will not be made until next March.

J. F. Ptackek, of St. Paul, Minn., came on to make a personal examination of the Indian models, to see which should be his leader for 1916. "They're all great," he said, after a thorough survey, "and I haven't decided yet on the leader."

Both Pecks, who constitute the firm of Peck Brothers, at Elgin, Ill., arrived early in the week. They handle the Indian in Elgin, and, of course, made their headquarters at the Wigwam's exhibit.

A. G. Maguire, Indian and Henderson dealer of Youngstown, Ohio, has taken on three additional counties for the machines for next year. The mills at Youngstown are working day and night now, so Maguire looks for a greatly increased business during 1916.

E. C. Van Loon, Indian dealer of Streator, Ill., was accompanied to the show by R. J. Bailey.

W. Hynes, of Hynes & Case, Rock Island, Ill., came over to place a contract for the Pope motorcycle agency and the Great Western line of bicycles.

W. Cunningham, of the Cunningham Motor Company, Wichita, Kan., Harley-Davidson dealer, while at the show, reported good commercial motorcycle and bicycle sales.

Walter Whiting, of Denver, renewed his contract with the Harley-Davidson. He will continue to sell motorcycles exclusively. When asked regarding the new lightweights, he gave it as his opinion that the only practical machine for his state is the sturdy heavy model.

M. D. Lantz, Jersey City, N. J., sold 50 machines the first year in business, 1915, and likes running an agency far better than carrying mail, his former occupation. He handles the Harley-Davidson.

Harry Immel, of Pittsburgh, Pa., sold 31 Hendersons and 6 Yales last year, and this year has added a line of bicycles. He has already taken 10 orders for 1916 models.

W. Cutter, Peoria, Ill., former Pope agent at that city, has sold out to M. J. Klene, and will now travel Illinois and Indiana for the Pope.

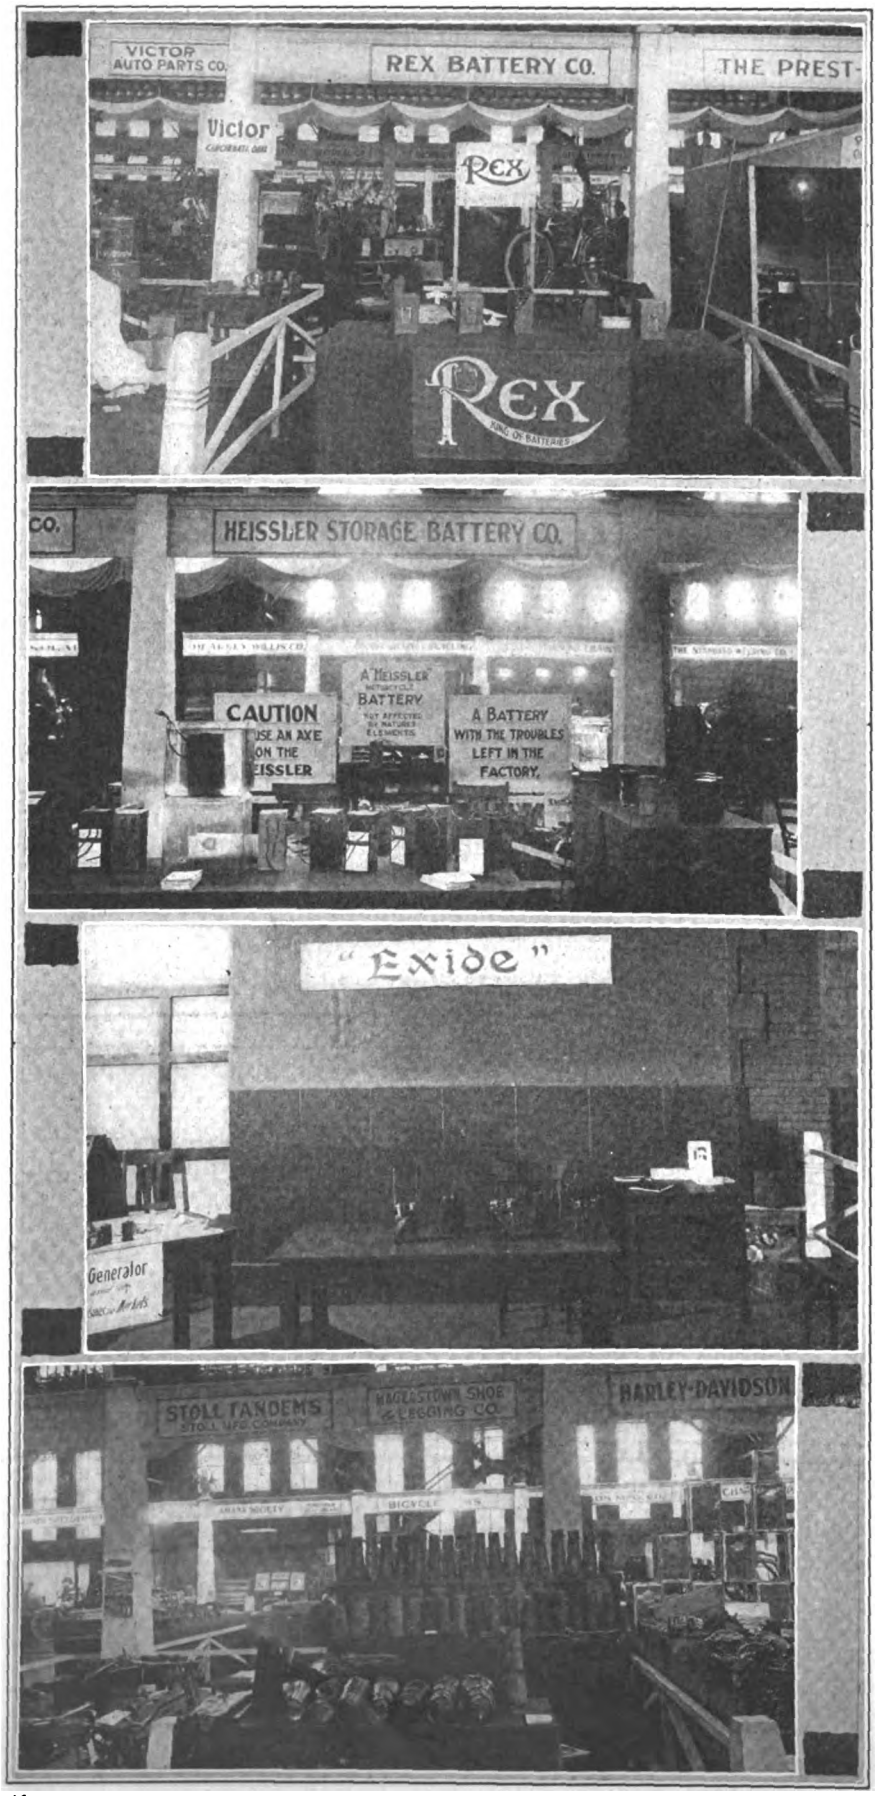
## SOME OF THE CHICAGO BOOTHS WERE WORKS OF ART, OTHERS EXTREMELY SIMPLE, ALL WERE ATTRACTIVE



Top, Rex Battery Company; Next Below, Heissler Storage Battery Company; Third Picture, Electric Storage Battery Company, "Exide" Accumulators; Bottom, Hagerstown Shoe & Legging Company

G. T. Brummitt, Thor dealer for eastern Kansas, with headquarters at Topeka, will put in the greater part of the winter traveling his state preaching the gospel of motorcycle riding, and especially so if on a Thor.

J. W. Magee, Tulsa, Okla., Indian dealer, has added the Pope and Ever Johnson lines of bicycles.

O. S. Rodberg and P. Myhre came from Hanlontown, Ia., on Indians, for which machines they are agents at that town.

C. L. and O. K. Newby, Merkel, Thor and Henderson dealers of Kansas City, Mo., were at the show, and reported in favor of the early exhibitions. Just before leaving home the boys delivered nine Merkels for commercial purposes.

Jess Campbell, F. A. M. commissioner and branch manager at Boston, Mass., for the Harley-Davidson, is optimistic over the 1916 outlook. The riders, he says, are all working overtime, and as a result have plenty of money. Besides pushing the sale of motorcycles next year, Mr. Campbell will do all he can to strengthen the F. A. M. in his territory.

Joe Bick, the popular Thor dealer of Rockford, Ill., came in to take on Velox bicycles for next year. He also reports opening a new store in the Swedish city. His former Swedish partner, Fred Sullivan, also found time to drop in at the show, though engaged in another line of business at this time.

Merryman & Robinson, represented by Jack Robinson at the Show, have secured a contract as Maryland distributors for the entire Dayton line for the new season. Robinson rode in from his place at Baltimore, Md., on a Dayton motorcycle, and spent several days at the Davis Sewing Machine Company's plant before returning home.

Bert Heinz, of the Heinz Motor Company, Baltimore, Md., has sold 21 Harley-Davidsons to the city for commercial use. His shop is exclusively motorcycle and he will continue to operate it on that basis.

H. Stephens, Wichita, Kan., Indian dealer, says that the prospects for next year look good, but he will add the Indian line of bicycles.

J. Zucker, Cleveland, Ohio, Thor dealer, has renewed his contract, and during 1916 will dispose of a thousand machines. His assistant, E. Hawkins, was also at the show, and reported many commercial sales already made for the new models.

W. A. Scott, of the Harley-Davidson Cycle Company, San Antonio, Tex., came all the way to Chicago to renew his contract, and reported that for 1916 he will cut out the bicycle department and devote his time exclusively to motorcycles.

Higginbotham & Douglas, Indian dealers at Waukegan, Ill., were represented at the

Digitized by Google

show by D. A. Douglas, who intends to add a line of bicycles for next season.

The Dayton Motor Bicycle will be represented in Evanston, Ill., by the S. & S. Motorcycle Company for 1916. At least 25 machines are figured on by the Evanston firm, as a preliminary.

From Wellsford, Kan., came R. E. Combs, head of the motorcycle department of C. E. Anderson & Company, Dayton representatives. Combs announced that his firm will establish State headquarters at Wichita. He secured new models of all Dayton machines before going back to Wellsford.

Among the Michigan dealers who came early in the week were Richard Ueck, of Benton Harbor, and Kern & McUmber, of Jackson. Ueck signed up for the Dayton Motor Bicycle, while the Jackson dealers added this model to their line of Dayton bicycles for the coming season. Kern stated that he was confident of selling 50 of the front-wheel drive machines.

Carl C. Hahn, of Kansas City, Mo., came on to renew his contract with the Davis Sewing Machine Company for 1916. His line will include the Dayton Motor Bicycle as well as the Dayton motorcycle. Hahn has been in the motorcycle line for the past seven years and is a firm believer in the lightweight machine.

Bob Sayre, of the Appeal Manufacturing Company, Los Angeles, Cal., while at the show, arranged to represent the Pennsylvania Rubber Company in his state. He expects a big year with the popular tires in both bicycle and motorcycle lines.

E. S. Clark, of C. A. Clark & Son, Indian dealers at Hamilton, Ohio, came in to give the big double O to the Indian models. Roy Clark handles the same machine at Middletown, Ohio, and accompanied E. S. to the show.

Johnnie Ellis, of St. Louis, Mo., was at the show. He is handling the Cyclone machine.

W. A. Moore, Henderson dealer of Muncie, Ind., came to the show with Charles Kirk, Excelsior dealer, and R. C. Kirk, Harley-Davidson dealer. Sarber & Rex, Indian dealers of Muncie, were also represented.

Dayton Motor Bicycles will be distributed throughout Minnesota, North and South Dakota and Montana by G. Sommers & Company, of St. Paul, Minn. Immediately following the Show, the firm called in all salesmen and conducted a school at which C. W. Waughop, Dayton traveler, was a prominent lecturer. Manager Ware, of the Sommers firm, is very enthusiastic over business prospects for 1916.

A. G. Aldrich, Madison, Wis., has taken on the Henderson motorcycle and expects big things of the popular machine in his university city.

## MUSSER ON BUCKEYE SALES STAFF

A. B. Musser, whose photograph is reproduced herewith, has recently severed his connection with the Iver Johnson's Arms and Cycle Works, of Fitchburg, Mass., and has joined the staff of the Buckeye Motor and Cycle Co., of Akron,

**A. B. Musser**

O. Mr. Musser was with the Iver Johnson folks for three years, during which time he traveled Indiana, Illinois, Kentucky, Ohio and New York, exclusive of the lower Hudson district and New York City. His position with the Buckeye Company is in the Sales Department.

## MICHIGAN TITLE RACES

Grand Rapids, Mich., October 5.—Five F. A. M. State championship races will be held at the Comstock Park Track under the auspices of the Grand Rapids Motorcycle Club on October 10. Among the riders who will compete in the 10-mile professional and the 50-mile free-for-all are: Carl F. Goudy, Morty Graves, Bob Perry and Don Klark. For the local speedsters there will be a 5 and 10-mile event. The Comstock track, a mile dirt oval, is one of the fastest in the West and boasts a new cement grandstand with a seating capacity of 5,000.

## FORM COMPANY FOR RACE TRACK

San Angelo, Texas, October 2.—A stock company is being organized by Tom Avery, of San Angelo, for the purpose of construction of a race track for automobiles and motorcycles. Two or three successful meets a year, Avery said, will make the investment a paying proposition beside boosting the local trade.

## PLAN MOTORCYCLE SPEEDWAY

Fort Worth, Texas, October 2.—John M. Scott, an attorney of Fort Worth, has asked the city commission to consider a lease on 350 acres of land near Lake Worth for an amusement park, one of the chief features of which is to be the finest motorcycle speedway in Texas.

## "SCHOOL DAYS" FOR FACTORY VISITORS

MILWAUKEE, Wis., October 4.—The week preceding and that following show week were two of the busiest of the entire season at the plant of the Harley-Davidson Motor Company. The entire week before the show was set aside for the annual salesmen's "school," when sessions were held every morning and afternoon. Digesting the "new stuff" took up several days, and then each department head was given an opportunity to "take a crack at" the company's representatives on the road.

W. J. Ruhle has renewed his affiliation with the Harley-Davidson sales force. He will travel in Indiana and Illinois, occupying the territory formerly covered by H. L. "Delicate" Schwind, who is on the sales staff of the A. O. Smith Company now.

E. J. Mueller, former office manager at the Harley-Davidson factory, has been made assistant sales manager, and it was "E. J." who this year supervised the annual cramming of the travelers with knowledge calculated to stir up things in their respective territory. Mueller made his sales debut at the Chicago show and expects to follow up with a trip through the East, visiting the Atlanta and Boston branches and taking in the New York show.

"Hi" Hascall, head of the accessory department, is getting a taste of the old life on the road, temporarily covering the state of Kansas. Hascall was one of the first travelers in the early days when the entire sales force on the territory consisted of Arthur Davidson and "Hi."

The dealers' "school" again went into session this year. Many improvements in the methods of training the agents were made since last year when the factory instituted this system of giving practical knowledge to the many agents that visited the gray fellow's home before and after show time. Each day a new class of dealers "went to school" and "studied" under the direction of J. McKilipps, of the service department.

The excellent riding conditions that prevailed during the week following the show, tempted many of the dealers to ride their demonstrators home. C. D. Chamberlin, of Denison, Ia., disdained the cushions of the railroad coach and straddled a 1916 Harley-Davidson instead. P. Wilmer Stevens, of Carl W. Bush's agency in Newark, N. J., and "Art" Herrington, the noted endurance rider, returned to the New Jersey metropolis in a sidecar outfit, and their example was followed by John D. Newhart, head of the Allentown Motor Cycle Company, of Allentown, Pa., and R. W. Kutz, of the same place.

### INDIAN CATALOG FOR 1916

Unusually attractive illustrations vie with "meaty" descriptions of the new Indian models in the 1916 catalog which has just been distributed by the Hendee Mfg. Co. Of extraordinary interest are the photographs showing cutaway motors and parts. Complete specifications of the Indian motorcycle and sidecar products are included in the catalog.

The cover, which is printed in colors, presents something new in the way of a sales "punch." It shows the employees of a factory leaving the place on Saturday afternoon, and an Indian-mounted rider in the foreground is waving farewell to his less fortunate fellow-workers who are walking.

### INTERESTING FIRESTONE BOOK

Firestone motorcycle tires and everything pertaining to them are described in the latest catalog issued by the Firestone Tire & Rubber Company, of Akron, Ohio. Apart from the instructive value of the book, best exemplified by a description of the building of one of the tires and a life-size section of a 3-inch casing on the center pages, the catalog is very artistic. It is gotten up in orange and black, with a title page consisting of a night view of the factories. A list of Firestone branches, agencies and service stations on the inside back cover is another feature of the work.

### THROUGH FLOOD AND OVER TIES

Philadelphia, Pa., October 4.—The accompanying illustration shows Jas. Snodgrass and George Downey on their recent trip from this city to Chicago and return on the

**Snodgrass and Downey on the Ties**

Miller triplex seat. These boys created a stir wherever they went by their fearless riding, and among their adventures was a ride through the flooded streets of Erie.

### FIRESTONE EMPLOYEES WILL HAVE COMPLETE CLUB HOUSE

Akron, Ohio, October 4.—Firestone employees are to have one of the best equipped club houses and auditoriums in Akron. A four-story building is being erected on Main street, across from the factory by the company. The first and second floors will house the company's restaurant. In the basement will be a swiming pool, bowling alleys and shower baths.

In the rear of the third floor will be the auditorium, and in the front several club rooms fitted up in modern style. The rear of the fourth floor will be the gallery of the auditorium and the front will contain more club rooms. The new building will be 125 feet wide and 150 feet long. The contract calls for its completion March 15. It will be used by both men and women employees and a tunnel under Main street will connect it with the factory.

### USED DIXIE MAGNETO IN DETROIT CHAMPIONSHIP RACE

Newark, N. J.—Officials of the Splitdorf Electrical Company, of this city, are naturally elated over the performance of Marty Graves, who won the 100-Mile F. A. M. Championship race at Detroit on September 19. Graves, whose Indian was fitted with a Dixie magneto, covered the century in 84:41 3/5 and set new figures for 5, 60 and 75 miles in addition. His time for the 100 miles constitutes a new record in itself. Graves reported that the Dixie magneto went through the whole distance without a falter and further that he had not made his machine stop for fuel, oil or tires.

### BIG INCREASE IN CHAMPION SPARK PLUG OUTPUT

Toledo, O.—An increase in production from 35,000 to 50,000 spark plugs per day is reported by the Champion Spark Plug Company, of this city. The company has had to enlarge its factory facilities recently, by the addition of 40 new automatics, and there has been a proportionate increase in other equipment throughout the factory.

Officials of the Champion firm state that this growth is the result of new contracts in all lines of internal combustion endeavor. Champion spark plugs are stock equipment on some of the best-known motorcycles and automobiles in America.

### HOLLAND REPRESENTATIVE ORDERS 75 HENDERSONS

Detroit, Mich.—After a few days at the Show in Chicago, C. A. Geerkens, of H. Engelbert & Company, Henderson representatives in The Hague, Holland, stopped

Digitized by Google

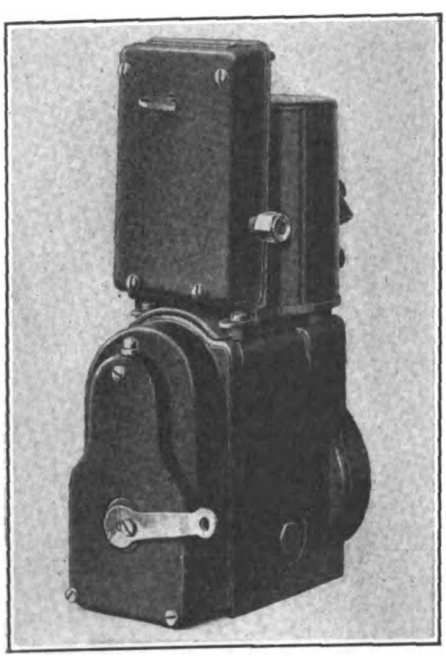
at the Henderson factory to make arrangements for a shipment of new models. Heer Geerkens is spending a few weeks in this country in the interests of his firm and reports excellent prospects for big motorcycle sales in his own country.

The Engelbert firm's order was for 75 machines, of which 25 are to be shipped immediately and the remainder in two lots of 25 each within a short time. "Of course, the war is having some effect in increasing sales of American machines in our country," said Heer Geerkens, "but the demand for Hendersons is increasing rapidly aside from this, as none of the European machines which were available in time of peace filled the needs. Therefore, our order in lots of 25 each."

# MIDCO GENERATOR HAS NOVEL FEATURES

WITH a generator which carries in one unit all the ignition apparatus except the spark plugs and cable, the MIDCO electric system is a "motorcycle edition" of the standard practice of the greatest number of present-day automobile electric lighting and ignition equipments, being constructed on the same proven principles. It is manufactured by the Motor Ignition & Devices Company, of Boydell Building, Detroit, Mich.

The 6-volt generator, in connection with a storage battery, head and tail lamp and electric horn makes up the full equipment. In addition to carrying the ignition apparatus in a self-contained unit, the MIDCO



**MIDCO Generator**

generator has also a lighting switch within easy reach of the rider, and an automatic control mechanism of unique type. All parts are carefully protected from the weather and have an ample factor of safety to withstand the severe uses incidental to the exposed conditions on a motorcycle. Nothing carrying high or low tension current, with the exception of the spark plugs, is exposed.

### Ball-Bearing Shafts

The generator has its main shaft carried on ball-bearings. At one end of this shaft is a timer and low tension distributor, while at the other is the driving gear. Adjacent to the latter is another gear, meshing with the first and driving the armature at 50 per cent. greater than engine speed. Both gears are of the helical type and operate practically noiselessly. The armature, also carried on ball-bearings, has a simple low tension winding and a commutator with Bakelite molding. The condenser is carried above the main shaft and between it and the armature.

There are three brushes, two main ones and a third or regulator brush. The field winding, in two sections, to give clearance between them for the main shaft, is connected to one of the main brushes at one end and to the regulator brush at the other. By means of this third-brush regulation, the generator is prevented from delivering excessive voltage or current to the battery when the motor speeds up, as the fields are automatically weakened. The generator is proportioned so that it commences to charge the battery at a motorcycle speed of close to 9 miles per hour, increases up to 18 miles per hour, and then remains substantially the same until it reaches 30 miles per hour. After that speed it gradually diminishes, finally delivering 1¼ amperes at 50 to 60 miles per hour. The third brush is adjustable to regulate the current output at all speeds.

### Low Tension Distributor

The low tension distributor is provided to send an interrupted electrical impulse to the primary windings of both high tension coils in succession. These coils are sealed in Bakelite and are carried on top of the generator. From each coil a cable passes to the spark plug. These are the only high tension members in the entire apparatus. The apparatus shown was designed for and is being used by the Excelsior Motor Manufacturing & Supply Company, of Chicago, on its 1916 electrically-equipped models. The coil switch and control mechanisms have been designed in a unit system in order that they may be placed to suit local conditions on any motorcycle.

The control device is actuated by crankcase vacuum. A recent improvement in this apparatus consists of a coil spring interposed between the blade and a diaphragm flexible wall. This arrangement allows the flexible wall to vibrate which it does under the influence of a racing engine without interrupting the contact of the blade. When the blade is not under the influence of the vacuum, which is when the engine is at rest, it normally and automatically forms an electrical connection with a new contact member which grounds the generator and thus forms a safety device. It has been learned by experience that under some conditions, as with a leaky vacuum pipe or irregular partial vacuum that at very high engine speeds this vacuum control blade may not remain in contact.

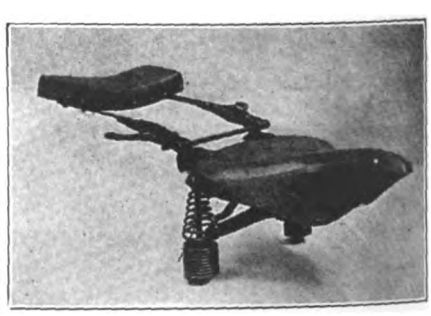
# TWO NEW MODELS OF WEED FOLDING BACK REST

TWO models have been added to the line of the Weed Folding Back Rest Company, of Stamford, Conn., which make the device adjustable to any saddle and any motorcycle marketed. The new models are the A-X and the A-1.

The height of the back from the saddle has been raised three-quarters of an inch over that of last year's model, making the rest suitable for a tall and long-waisted rider. Particular attention has been paid to the upholstering, which is now of a very heavy, luxurious order.

**Back Rest Raised**

Further comfort is derived from new flat steel spring sides to the back rest, which provide a smooth flexibility that takes up any see-saw motion when traversing rough roads. It also assists in absorbing vibration and road shocks.

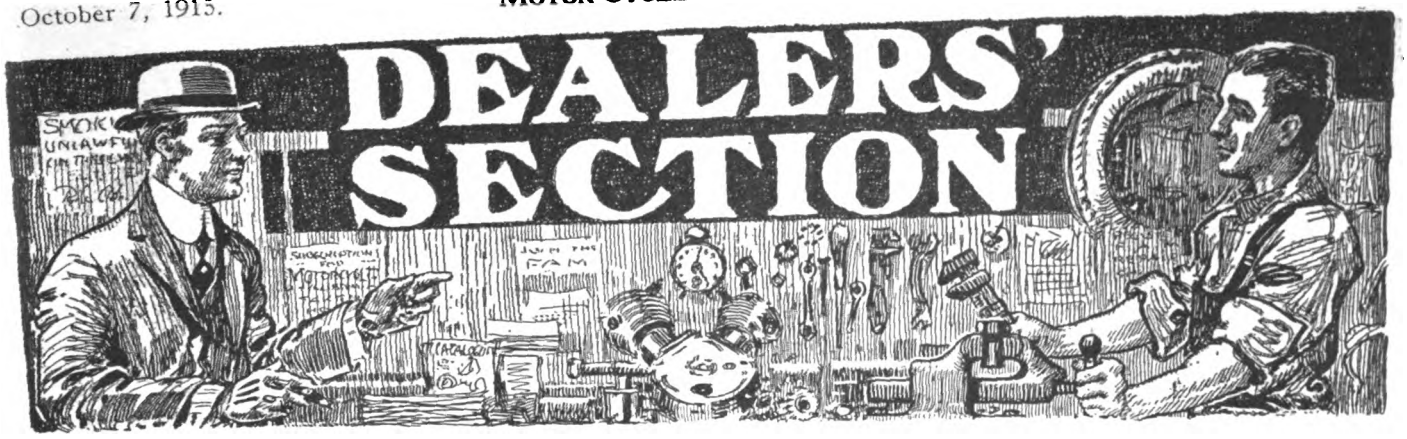


**Back Rest Folded**

The Model A-X is constructed especially for the 1915 Excelsior with Mesinger air-cushion saddle, but it can also be used to good advantage on the following machines equipped with luggage carriers: 1913-1914 Excelsior, Pope and Emblem. This model will fit the large Mesinger saddles and the large Troxel unpadded saddles.

Model A-1 is made only for the Indian spring frame motorcycle equipped with the high luggage carrier and Troxel unpadded or Persons or Mesinger saddles. Model A is designed to fit the same saddles as Model A-1 on all machines except the Indian spring frame, Excelsior, Pope and Emblem. Model B will fit Troxel Truform saddles as used on Harley-Davidson, Dayton, Thor and other makes of motorcycle.

Digitized by Google



# ON THE TRAIL OF THE PROSPECT

JUST how far a motorcycle dealer is warranted in carrying his follow-up policy when on the trail of a prospect has always been a question open to debate, but it is safe to say that few cycle salesmen err on the side of over-zealousness. One visit to the home of a prospective buyer is usually considered enough, and the truth is that too many dealers do not apply the visiting idea at all. Arguing that everyone in the district knows where his store is located, the average dealer depends upon chance meetings and circular letters to stir up business.

In sharp contrast to this is the follow-up policy of E. S. Pees, who handles Indian motorcycles in Palmerston North, New Zealand. Operating under the trade name of the Nonpareil Cycle & Motor Co., Mr. Pees has built up a cycle business which would compare favorably with any in either the United States or Europe. He carries a line the extent of which would fairly startle the leading dealers in this country, and his statement that his establishment is ready to meet every demand of the cyclist is true in the fullest sense of the word. Mr. Pees employs a staff of about twenty wideawake assistants.

### A Comparison of Follow-Up Systems

Mr. Pees visited the United States a week or two ago, primarily to look over the new Indian models at the factory and to say "Howdy" to the Wigwam folks. On heading for home he stopped off at New York and spent a chatty half hour at the office of **Motor Cycle Illustrated.**

"What gets me," said the sprightly New Zealander, "is the seeming disinclination of your American motorcycle dealer to dig out and visit the chaps who may be in line for new machines. I understand that comparatively little is done along that line in the United States. No doubt some of your dealers have a businesslike follow-up system, but as a general thing patrons are left to drop in at the stores in their own good time. This might be a good enough system to apply to the fellow who already has a machine, and who can be reasonably counted upon to come around again when he needs another mount, but it strikes me that a more active policy is necessary if we are to bring in all the recruits possible.

"Now, in our place in New Zealand we are always up on our toes to get a line on a prospect, and when we do—well, he jolly well knows we are after him. We don't make ourselves a nuisance, you understand, but we convince the potential buyer that we are deeply interested in him and that we are willing to go to any trouble to enlist him among our patrons. We don't pester him with circular letters—even though he may live 100 or 150 miles away; as soon as we have his name and address we send a salesman out on a motorcycle to visit him.

### A 100-Mile Trip to Land a Sale

"The fact that we have been sufficiently interested in a sale to send a representative out over 100 miles of good, bad and indifferent country to look into the matter always creates a favorable impression, and it is safe to say that 90 per cent. of such journeys give definite returns. In some cases the salesman sells the machine he goes out on and makes his way home by train, or another rider is sent out to pick him up, but this is not often necessary, as we are able to make prompt deliveries from our large stock. Not infrequently the salesman who makes a 100-mile trip today to land a sale will make another tomorrow.

"You may argue that this is a rather expensive policy, but we do not find it so. It is a good thing for any dealer to have his machines on the road, and many a time the salesman who is making a long trip sees opportunities along the way to open up new business channels. Needless to state, we make the most of every such chance that offers, and I have found that the yearly returns from these trips fully justify the outlay of time and money and the wear and tear on the motorcycles used.

"I understand, of course, that the territory allotted to the average dealer in the United States is far from being as large as that in which we operate, and 100 to 150-mile sales journeys would not often be needed; but I have been led to believe that even a 25-mile trip is usually outside the calculations of the American dealer. In short, I am convinced after a somewhat careful study of your trade conditions in America that the field is not being cultivated for all it is worth. I do not mean to assume a critical attitude, understand, but when I compare our sales methods with yours I am convinced that we work harder for success than you."

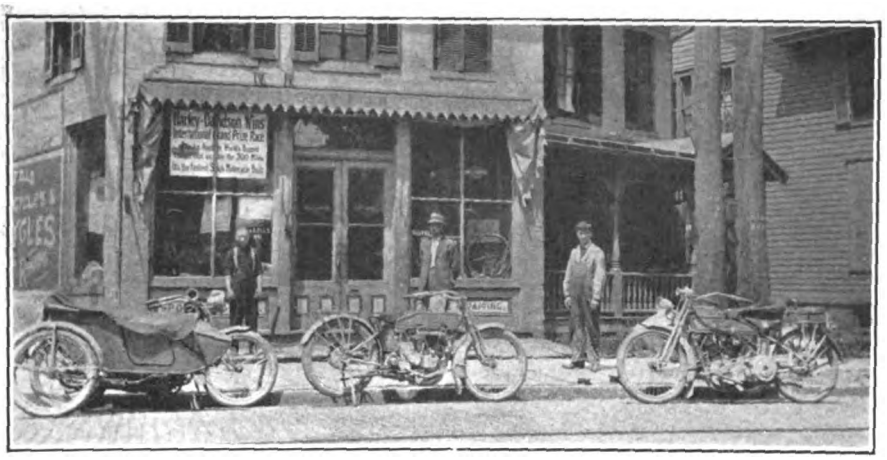
# DEALERS' SECTION



**Where Harley-Davidson Models Are Handled in Elmira, N. Y.—Agency of George F. Ellis, Pioneer Dealer in Central Empire State**

## U. S. PUBLIC PRINTER PURCHASES MOTORCYCLE VANS

Washington, D. C.—Cornelius A. Ford, Public Printer, has recently purchased two 1915 two-speed Indian sidevan outfits for the use of the Government Printing Office. The machines are fitted with Splitdorf Mag-Dynamo electrical equipment. These machines were purchased by Messrs. Osborne and Leishear, agents, for the Indian, and are a forerunner of extensive purchases of these outfits for government service. The first of these vans is being operated by G. C. Lang, an ardent Indian rider and a member of the National Capital Motorcycle Club. The Government now uses hundreds of bicycles for messenger work and for the delivery of various parcels of mail and correspondence between the different Government offices which are located all over the city. It is reported that they will soon be supplemented by motorcycle delivery vans.

## GOT FIRST 1916 EARLY

Brooklyn, N. Y.—"Bob" Brazenor, Harley-Davidson representative for Brooklyn and Kings County, received his first 1916 Silent Gray Fellow on September 20. It was a three-speed model with the new step-starter, and Bob and his assistants have been kept busy showing off its paces ever since.

George Barnes and Mrs. Brazenor now manage the Jamaica branch for Bob, while the Bedford store is under the care of the proprietor himself. The repair department is now located at the Jamaica avenue store.

## FAIR BRINGS VISITORS

Louisville, Ky., September 22.—During State Fair week, R. L. Davis, agent for the Pope and Reading-Standard, received visits from a number of out-of-town men at his shop on Broadway. Among the visitors were Dallas Ward, of Bratton, Ky.; Orla Jones, Lonnie Jones, Duard Johnson and James Paxton, all of Duvall, Ky.; Jesse C. Williams, W. L. Davis and Dr. Boone Phillips, of Maysville, Ky.; Adrian Skees, of Glendale, Ky., and H. C. England, of Mt. Olivet, Ky. All are enthusiastic riders and owners of motorcycles.

## COOPER'S RAPID SALES WORK

Less than seven months ago, that is, on the 1st of March, Fred Cooper opened an Excelsior agency in Ponca City, Okla., a town of seven thousand inhabitants. At that time, there were only five motorcycles in the territory. During the seven months in which Cooper has been in business in Ponca City, he has sold, according to the statement of a motorcycle representative at the Chicago Show, just seventy-nine Excelsiors.

## SETS UP IN NEW QUARTERS

Kansas City, Mo., September 27.—F. P. Ames, the Emblem agent, whose shop was burned here recently, has opened a new one on East Eighteenth street, and says that he will perhaps return to his old location at Fifteenth street and Brooklyn avenue, as soon as the building is completed.

## RENEW R-S CONTRACT

La Porte, Ind.—Plevo Brothers, proprietors of the West End Motorcycle Garage in this city, have renewed their contract for the Reading-Standard for 1916. They report a fine year in their territory.

## BIG SECOND-HAND SALES

Detroit, Mich.—Second-hand machines to the number of 225 have been disposed of by the W. F. Metzger Company, of this city. In addition to this, there has been a good season in new Indians, for which make as well as the Yale and Pierce line of bicycles, the firm is agent.

## MAXWELL BUYS OUT PARTNER

Beloit, Wis.—R. S. Maxwell has just bought out his partner, J. Shariff, and will conduct the business hereafter at 1310 Vine street by himself. He is local agent for the Harley-Davidson.

## PATERSON TO OPEN BRANCH

Brooklyn, N. Y., September 28.—A. W. Paterson, Brooklyn's pioneer cycle dealer, will soon occupy his new branch store at Flatbush and Parkside avenues, which he will run in connection with his present headquarters at 1080-82 Bedford avenue. Builders are rushing the work on the new establishment to completion and Paterson expects to open his branch about October 10.

## Heinz is Active in Clean-Up Campaign

ONE of the most important ideas put forth in the Harley-Davidson Salesmen's Convention just finished at the factory of the Harley-Davidson Motor Company, in Milwaukee, Wis., was that all hands should go after the dealers to get them to clean up and set better examples to the riders.

Among the dealers who attended the convention was Bert Heinz, of Baltimore, and Heinz was strong for the idea. He is one of the neatest riders and dealers in the whole aggregation of representatives of the Silent Gray Fellow, and he believes that the whole motorcycle industry could be greatly benefited by a "clean up" campaign. In the clean up, Heinz includes keeping the mufflers closed, and thus inducing more people to become motorcycle users.

**Bert Heinz**

Although many who have seen Heinz or his photograph consider him a "boulevarder," he is by no means one who habitually rides asphalt. One rider like this Baltimorean in a community will create more interest in motorcycles than one hundred speed bugs that go tearing along. This is the view of the Harley-Davidson Company, and that firm announces that it is going to keep the clean-up campaign in view for 1916, not only directly, but through its travelers. Bert Heinz has already done much to foster this idea, not only in his own, but in other dealers' territories through which he has passed.

# DEALERS' SECTION

## KENNY'S POPULARITY HAS BROUGHT STEADY SALES

Lafayette, Ind., October 5.—A rider of merit, a good mixer, a shrewd business man, an expert on motors—these are the four big reasons why Roscoe Kenny, the genial manager of the Kenny Motor Co., Harley-Davidson agent in this city, is selling on an average of forty machines each year.

The Kenny store is well located on the most important busines thoroughfare of LaFayette and is readily accessible to tourists stopping in the town. A number of new machines are always kept in stock, together with a complete line of parts, not only of the machine featured, but also of other prominent makes, with the result that many of the smaller dealers in northern Indiana get their parts from Kenny. Repair jobs come to this agency from a radius of fifty miles, for its manager enjoys a well-merited reputation as an expert on Harley motors.

Each year Kenny holds two runs for his riders, and then all the fellows bring their lady friends along and have a "great time" at good-natured Roscoe's expense. But Roscoe finds that it pays him to treat the boys occasionally, for his popularity has been growing steadily and so have his sales. Kenny is well known as a speedster, having won in 1913 the gruelling Northern Shore endurance contest from Chicago, when he rode as a team mate of "Hap" Scherer.

## AGENT TACKLES THE MOUNTAINS

David C. Russell, of San Saba, Tex., male a three weeks' trip recently through the wild country of the Southwest which offered about as hard a test in service as any part of the country. He rode through sand, ran into rain and rode through mountain gorges where there were practically no roads and these were badly washed. His route was as follows: San Saba to Brady, to Eden, to San Angelo, to Sterling City, to Midland, to Big Springs, to Sweetwater, to Abilene, to Ballinger, to Paint Rock, to Brady, to San Saba. Mr. Russell carried 60 or 70 pounds of baggage on his machine, a single-speed seven horsepower Indian. He is the Indian agent at San Saba.

## MOTOR WHEEL SALES BOOMING

Washington, D. C.—The local branch of the Haverford Cycle Company reports that during the past month over 12 Smith Motor Wheels have been put out to customers. The smooth streets of this city go a long way toward making the sales, and there appears to be a continuous demand for the little boosters. The Haverford firm sells the Motor Wheel attached to a Dayton bicycle for $100 on easy payments, and numbers of government employees have taken advantage of this price and are to be seen riding to and from their work on such combinations.

## RICE SALES GRATIFYING

Racine, Wis.—The L. R. Rice Cycle Company, local Excelsior agent at 1024 State street, reports the delivery of 45 machines during 1915, as well as fine sales in Excelsior bicycles. The repair department has been kept busy all season, but commercial sales have not been satisfactory.

## CAPITOL CYCLE CO. ADDS

Madison, Wis.—The Capitol Cycle Company, of 113 State street, is completing a $1,500 addition to its garage, to accommodate 60 more machines. The repair shop is to be reconstructed and new machinery added in the near future. The firm has renewed its contract for the Excelsior for 1916 and will cover Dane County and one-half of Columbia County. Excelsior and Racycle bicycles and the Smith Motor Wheel are also handled.

## FISKE HAD GOOD SEASON

Beloit, Wis.—L. C. Fiske, of 417 East Grand avenue, is now closing his sixth season as local Indian representative. His 1915 season was a good one in motorcycles, he reports, and fine with regard to Fisk and Goodrich tires, both of which he stocks.

## RUHLE TO TRAVEL AGAIN

William J. Ruhle, who resigned from the sales force of the Harley-Davidson Motor Company some time ago to organize the Albany Motorcycle Company with the Malcolm Brothers, at Albany, N. Y., has disposed of his interest in the latter firm. He will cover Illinois and Indiana for the Harley-Davidson firm for 1916.

## NEW EXCELSIOR AGENT

Louisiana, Mo. — M. E. Hanes, of this city, has taken on the agency for the Excelsior for Louisiana and vicinity. Hanes is one of the best known road riders of Pike County and holds the present record between this place and St. Louis.

## RECENT SALES BY EDWARDS

Battle Creek, Mich.—B. L. Edwards, local Indian representative, has delivered a single-geared twin to the Bordwine Welding Company, of this city, and a sidecar outfit to David Moon, local real estate operator. Edwards will add the Indian line of bicycles in a short time.

## THE IDEAL COMBINATION

L. E. Stair, Pope dealer in Mitchell, South Dakota, forwards the accompanying photograph, which strikingly presents the advantages of the angler who also uses a motorcycle. The fish were caught on a motorcycle trip to the "Jim" river, in South Dakota, the longest *un*navigable river in the world. Stair reports that Dakota roads are not particularly inviting, but that the motorcycle is growing rapidly in favor.

## TAKES ON MOTOR WHEEL

Racine, Wis.—The De Luxe Motorcycle Garage, of 529 Wisconsin street, has taken the Smith Motor Wheel agency and reports the delivery of six of the little boosters to date. A van outfit for the Western Printing and Lithograph Company was among recent commercial sales made by the Garage. The agency for the Thor is held.

## DUNLOP TROPHY RACE SCHEDULED FOR OCTOBER 11

TORONTO, Ont.—The twenty-second annual Dunlop Trophy handicap road race will be held from the Exhibition track, Toronto, on Thanksgiving Day, Monday, October 11, on which occasion a big race meet is to be staged on the track proper. The usual widespread interest is again being taken in the road race, which was established in 1894, and is the oldest annual sport classic in the Dominion. It is expected that both bicyclists and motorcyclists will come from many distant points to start in the road race and in the track events.

One feature of Dunlop Day will be a series of sprints between Hans Ohrt, the world's amateur bike champion, and Art Spencer, the clever Canadian aspirant. This will be their first meeting on a dirt track and their first appearance together in Canada. A civic reception will be held in honor of Spencer, who will be presented with a gold watch by Mayor Church of Toronto.

The motorcycle events on the program include a series of speed thrills with Harold Cole, Joe Baribeau and "Crazy Horse" Verrill among the contestants. Fred Miles, Wilfrid Morrison and other Canadian amateurs of note will meet in another set of flights.

Immediately after this meet it is expected that still more of the local wheel cracks will enlist for service with the colors. Two good riders, Gordon McMillan, former champion, and George Watson, one of Canada's representatives in the road race around Lake Malar, Sweden, have announced their intention of becoming soldiers.

Charlie Orr, of Toronto, renowned as a motorcycle racer five years ago, has enlisted with a battalion at Hamilton.

## EX-PRESIDENT TAFT A BOOSTER

Montreal, Que.—The Hon. W. H. Taft, ex-president of the United States, recently walked into the bicycle store of McNiece & Orchard, 774 St. Catherine street West, and bought a Canadian bicycle which he ordered to be shipped to his summer home, Murray Bay, Que., for his son, Charles Taft. A feature of the transaction was that the ex-president made a personal selection of the wheel but did not attempt to mount it.

## INSPECTED CONCRETE BOULEVARD

Oakville, Ont.—Bicycle, motorcycle and automobile officials accompanied members of Parliament and road engineers to this place on September 30 for a formal inspection of the new concrete boulevard which will connect Toronto and Hamilton next year. The magnificent highway, which will cost $700,000, is almost half completed and use is already being made of the finished stretches. The great road is almost a straight line between the two cities and the concrete is from eighteen to fifty feet wide. There are only five curves in the whole forty miles of the highway and only one unimportant railway crossing. The steepest grade is four per cent. and substantial concrete bridges span every river and stream.

## CYCLES INCREASE REVENUE

Ottawa, Ont.—The revenue of the Dominion for September showed an increase of $3,204,225.05 over September of last year. Two-thirds of this advance in receipts was due to the increased tariff on imported goods, including motorcycles, bicycles, parts and accessories of 7½ per cent. This, of course, goes to meet war expenditures.

## MOTORCYCLISTS BRING SUIT

Toronto, Ont.—What has been classed as an unusual legal action has been entered by Alfred Barron and his wife, two local motorcycling adherents, against Sir Donald Mann, of Toronto, a railway magnate, for $5,000 damages. The plaintiffs allege that the knight's motor car swept them off the road while they were on a motorcycle on Bedford road last summer.

## HORSEMEN BECOME CYCLISTS

Victoria, B. C.—Apparently realizing that this is to be a "horseless war" for a considerable time at least, sixteen troopers of the Victoria Squadron, Independent Horse, have left the ranks of that unit to enlist with the Divisional Cyclist Corps which is being organized in Canada. Lieut. Cameron, of Vancouver, is in command of the British Columbia platoon of this latest cycle unit which will be gradually concentrated at or near Toronto this fall for final training. Already all the platoons in Eastern Canada, including those from Winnipeg, London, Ottawa and other centers, have been mobilized at the camp near the Ontario Capital.

## NEW CANADA ACCESSORIES

Ford, Ont., Sept. 27.—After many years in the manufacture of lamps for all motor vehicles, the Canadian Lamp and Stamping Company of Ford is introducing several new lines for motorcyclists. Special attention is also given to lamp repair work.

## TORONTO BICYCLISTS IN 16-MILE ROAD RACE

TORONTO, Ont.—The first annual road race of the Toronto Bicycle Riders' Association was held on Saturday, October 2, on the Danforth road, when almost sixty competitors were sent away at intervals over a period of ten minutes. Thirty-four riders finished the sixteen miles, the winner being C. Coleclough, of the Classic Bicycle Club, who started with a four-minute allowance. His time was 42.08 for the measured course. A dozen or more cyclists rode down the stretch in a bunch, making one of the most exciting road finishes ever witnessed in Toronto.

Great credit is due the riders themselves for the race. They made all arrangements themselves, canvassed for the prizes, selected the course, met all preliminary expenses and then rode the race. Three thousand people turned out for the event. The road, which was in excellent condition, was patrolled by Toronto policemen on both motorcycle and horse.

The time prize was won by R. Brady, of the Classic Club, from the three-minute mark. His elapsed time was 41:46. Norman Webster, of the same club, won second time prize from the 2½-minute mark, his time being only five seconds slower than Brady's. The first scratch man to finish was Gordon McMillan in twelfth place, with a time of 41:55, and veteran Fred McCarthy finished one second afterwards.

Harry Martin, of the Salem Club, would have captured the time prize had he not gone back, voluntarily, to the scratch mark from the one and one-half-minute class. A feature of the race was the participation of a number of small boys on ordinary road wheels, the first of whom to finish was Roy Hendry in fifth place. He was given an eight-minute start.

## BUSY SALES CONVENTION

Toronto, Ont.—Sales managers and salesmen from coast to coast were in Toronto last week for the fourteenth annual sales convention of the Canada Cycle & Motor Company, Limited, which was conducted by J. W. Gibson, general manager of the company. The attention of the delegates was occupied with four different features—learning everything possible about bicycles and accessories; the discussing of ways and means to sell more bicycles; learning how to teach bicycle dealers to be business men, and a study of sales and advertising methods. The convention was in session for five days.

# KRAMER AGAIN CAPTURES NATIONAL TITLE

NEWARK, N. J., October 4.—Newark's bicycle populace went wild with joy on Sunday afternoon when Frank Louis Kramer, for the fifteenth consecutive year, won the national cycling championship. He accomplished this feat by vanquishing Alfred Goullet, of Australia, in a five-mile race, and turned the trick in a most decisive manner. There was no doubt in the minds of the fans, after the race was over, that Kramer is entitled to the honors which he had to fight so hard to gain and he demonstrated that he is still the premier cyclist of this country and the world.

**Uproar After Champion's Victory**

Kramer was given a great demonstration when he won the national title, and it even surpassed his ovation after acquiring the world's title. Hats were thrown in the air and women cheered the title holder to the echo. The band struck up "The Star Spangled Banner" and the crowd rose to its feet and cheered Kramer as he circled the track, draped with an American flag and carrying a large bouquet of flowers. He wore a smile that spread from ear to ear and seemed to be the happiest individual in America.

The race was paced by Percy Lawrence, Tim Sullivan, George Wiley and Worth Mitten. For four miles and a little more than four laps, Goullet rode behind the pace maker, while Kramer followed the Australian around the saucer. With two laps to go the pace makers were dropped. Goullet swung up the bank and Kramer rode along side of him. This was just what Kramer wanted, he had Goullet where he could watch him. Goullet was riding high and a few inches in the lead, but Kramer was right by his side. The positions continued this way to the middle of the back stretch when Kramer shot into the lead.

**Wins by a Length**

He was riding in front when the gong clanged for the last lap and started into the last circuit of the track leading. Kramer stalled "Goullie" around the first turn, but, when he hit the back stretch, he put all he had into his legs and let out. Reaching the twelfth pole he was fairly flying, and as he swung around the last turn into the home stretch it was apparent that he would win. The crowd began shouting, "Stick to it, Kramer"; "Go it, Kramer," and other such phrases of encouragement. The champion's face was flushed and his legs were going up and down like piston rods. He flashed over the line, riding very low on the track, a winner by about a length. He had ridden a great race and received a fitting reception.

Although Kramer has been riding for years he is by no means an "old man" and expects to have many good seasons to come. He will be thirty-five years old on

**Kramer's Winning Smile**

November 21, having been born at Evansville, Ind., November 21, 1880.

**McNamara Wins Tandem Paced**

The five-mile tandem paced race between Reggie McNamara of Australia and Marcel Dupuy of France resulted in an easy victory for McNamara. Dupuy was unfortunate in having his tandem team break a chain at about two miles and he lost his pace. When McNamara saw him in this predicament he ordered his pace makers to "hit it up" and they sure did. Before Dupuy could get behind pace, McNamara had opened up a big lead and increased it until at the finish of the race he had a lead of a lap and one-half on the French rider.

Jackie Clark, who performs like a "Kramer" one day and an amateur the next, showed a return to form by taking the Brassard title away from Iver Lawson, the Salt Lake City cyclist. The first race at a mile resulted in a dead heat when Lawson coming from the rear just managed to draw up on even terms with Clark. The second time the race as run it was only at a half mile and Clark won rather easily. Lawson tried to go around him, but Jackie had to much speed and led to the tape by a wheel's length.

**Spears Beats Lawson and Granda**

Bob Spears rode a strong race in the one-mile open and coming from fourth position on the back stretch of the last lap copped first place. He took the premier prize away from Iver Lawson, while Alfred Granda finished third. Frank Corry, with a 19-yard handicap, won the three-mile handicap affair for the professionals after having a great little battle with Ernest Jokus who had the same allowance. Eddie Root, the Boston rider, breezed home first in the two-mile invitation handicap for the "pros." Little Worth Mitten sprinted for a lap and got second place. Root had 115 yards, while Mitten was allowed 80 yards.

There seems to be no stopping that boy Hans Ohrt from San Francisco. Ohrt started from scratch in the quarter-mile race for the amateurs and won that. He was also in the two-mile open and again came home first. Fred Taylor, a Newark lad, finished second to Ohrt each time. In the two-mile race, Arthur Spencer of Toronto gave Taylor a stiff fight for second place. The summaries:

Half-Mile Novice (Amateur)—Won by Daniel Hughes, Newark; James Swann, Newark, second. Time, 1m. 14⅘s.

One Mile Open (Professional—Won by Robert E. Spears, Australia; Iver Lawson, Salt Lake City, second; Alfred Grenda, Australia, third; Francesco Verri, Italy, fourth; Jackie Clark, Newark, fifth. Time 2m. 28⅖s.

Two Mile Invitation Handicap (Professional)—Won by Eddie Root, Boston (115 yards); Worthington L. Mitten, Davenport, Ia. (80 yards), second; Floyd Krebs, Newark (100 yards), third; Ernest Ohrt, San Francisco (130 yards), fourth; John Schlee, Newark (140 yards), fifth. Time, 3m. 46⅘s.

Quarter-Mile Handicap (Amateur)—Won by Hans Ohrt, San Francisco (scratch); Fred Taylor, Newark (scratch), second; A. W. Rheinhardt, Newark (30 yards), third; William Keller, Newark (30 yards), fourth. Time 29s.

The Brassard Race (Professional)—Iver Lawson, Salt Lake City, vs. Jackie Clark, Newark. First race at one mile, a dead heat. Time, 3m. 52s. Last eighth mile, 12⅕s. Second heat a half mile, won by Clark. Time, 1m. 22s. Last eighth mile, 12⅗s.

Five Mile National Championship (Professional)—Frank L. Kramer, East Orange vs. Alfred Goullet, Australia. Won by Kramer. Time, 10m. 32⅕s. Last eighth mile, 11⅘s.

Three Mile Handicap (Professional)—Won by Frank Corry, Australia (190 yards); Ernest Jokus, Newark (190 yards), second; Robert A. Walthour, Atlanta, Ga. (225 yards), third; Eddie Root, Boston (200 yards), fourth; Alfred Goullet, Australia (scratch), fifth. Time, 5m. 46s.

Two Mile Open (Amateur)—Won by Hans Ohrt, San Francisco; Fred Taylor, Newark, second; Arthur Spencer, Toronto, third; Edward Kane, Newark, fourth. Time, 4m. 55s.

Five Mile Tandem Paced Match Race (Professional)—Reginald McNamara, Australia, vs. Marcel Dupuy, France. Won by McNamara. Time, 9m. 26s.

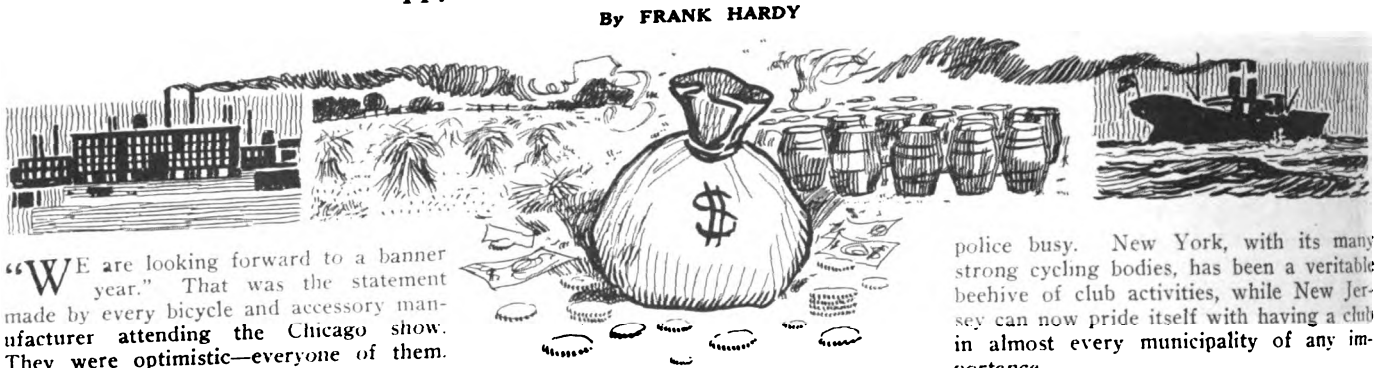
# STRONG MARKET ASSURED FOR 1916

## Facts That Back Up the Bicycle Manufacturers' Happy Smiles and Presage a Real Demand

By FRANK HARDY



"WE are looking forward to a banner year." That was the statement made by every bicycle and accessory manufacturer attending the Chicago show. They were optimistic—everyone of them. And their optimism was based on more than a "hunch"—it was based on facts.

Conditions that go to make a vigorous bicycle market were never more favorable in many years. With this country rapidly assuming the role of the great purveyor to a war-scourged world, with general interest in bicycling gaining daily through the formation of numerous bicycle clubs and the extension of cycle racing, with many strong publicity factors hard at work to boost effectively the sale of two-wheelers—with all these forces plugging away at a speedway pace, one can readily understand the widespread optimism which has taken such a strong hold on manufacturers.

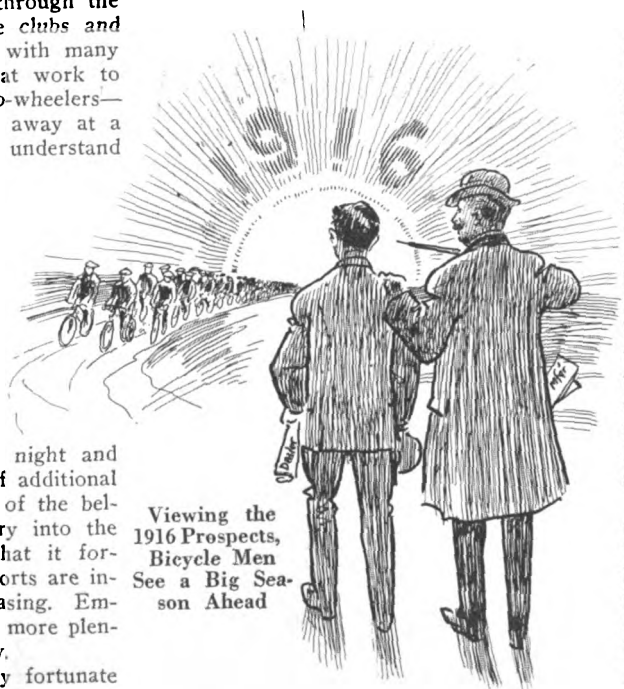
### Business Better

"Bumper crops" reports from all sections of the country read, "are stuffing the farmers' jeans with generous wads." Industries are coming back to normal, and in some cases the enormous war orders are keeping plants going day and night and necessitating the construction of additional plants. The isolation of some of the belligerents is forcing this country into the manufacture of commodities that it formerly bought abroad. Our exports are increasing, our imports are decreasing. Employment is therefore becoming more plentiful—people are earning money.

The West has been especially fortunate this year. Farmers are reaping the second largest wheat crop in the history of the West; the second largest corn crop is in the making; the oil industry has been given impetus by higher prices; lead and zinc mines are rushed by a great demand due to the war; live stock is selling at record prices; the milling industry is steadily thriving; labor troubles are happily absent; bank deposits have been increased by foreign business. People are earning money out West—they can afford to buy bicycles.

### Good Roads for Cycling

Good roads go hand in hand with well lined pocket books in creating a bicycle market. During the current year the federal, state, county and municipal governments have expended a record sum on road improvements. The Northwest has opened up a large number of new highways; California, the cyclists' paradise, is still improving its roads and constructing more of the boulevard type; the Middle West has accomplished much toward pulling itself out of the mud, Illinois now waging the strongest good roads campaign in its history, while Ohio is awarding huge contracts after just having completed miles of "permanent" highways. Even Florida, handicapped as it is by lack of road building material, now finds itself actively engaged in laying long stretches of brick and asphalt pavements. A glance at the bulletins issued at Washington will readily disclose the fact that the demand for good roads is being met all over the country in a thorough manner. Sections where wheeling has been a mud churning performance are now seeing more cyclists dot the roads, thus providing a strong foundation in many localities for increased sales in 1916.



Viewing the 1916 Prospects, Bicycle Men See a Big Season Ahead

One who has observed bicycle conditions during the past few years will have noted that club activities are more widespread. Numerous new organizations have sprung into existence during the course of the year; old clubs have come back to life. Chicago was previously considered a "dead one" as far as the bicycle sport was concerned. But last summer witnessed some hotly contested club races in which the entries were large and the crowds kept the police busy. New York, with its many strong cycling bodies, has been a veritable beehive of club activities, while New Jersey can now pride itself with having a club in almost every municipality of any importance.

### New Englanders Hustling

New England dealers were especially active in promoting clubs. This was well evidenced by the many letters which were received by the Bicycling World department wherein dealers inquired about the best methods of organizing clubs and managing road races. St. Louis, Dayton, Cleveland, Toledo, Philadelphia, Wilkes-Barre, Washington, Atlanta, Baltimore, Dallas, Milwaukee, Indianapolis, Buffalo, Boston are among the larger cities that have astonished observers by the renewed club interest manifested by their many cyclists, while the wheelmen of California and the Northwest had things humming throughout the season. Undoubtedly many more clubs will be formed during the new season, and many more clubs are needed to boost the bicycle properly. Dealers are being effectively educated to a fuller realization of the value of clubs, and the 1916 season will see the live merchants stepping into line and creating strong followings that will assure them a substantial, permanent trade and strong publicity media.

That velodrome racing tends to stimulate trade in and around the cities in which "saucers" are located is evidenced by the brisk trade in velodrome centers. The extension of professional racing by the Cycle Racing Association will, therefore, help business in several quarters. Providence, New York and Atlanta are the cities in which new velodromes will be located, while the C. R. A. will itself manage the Newark, Boston, Philadelphia and Chicago tracks, and racing will be continued at the Bison City track. Beside helping local trade the extension of cycle racing will exert a national influence by furnishing more live, crisp news than ever and keeping the bicycle fans constantly interested in the growing sport.

### Motor Attachments Hard at Work

Motor attachments, meeting with a surprizing popularity in one brief year, have opened up a new and lucrative field for dealers to exploit. They have increased two-wheeler sales and brought back to the ranks fellows who had deserted the army of push bikers. The novelty of the motor wheel has attracted considerable attention to the bicycle as is shown by reports from dealers all over the country.

Bicycle manufacturers are wide-awake to the possibilities presented by the motor at-

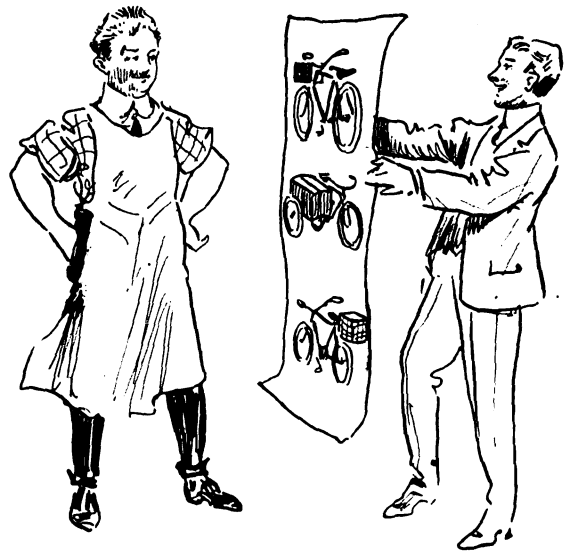
Digitized by Google

tachment and have shown their keen appreciation of its merits as a bicycle sales stimulator by bringing out among their 1916 models a type of sturdy machines, especially adapted to the needs of motor wheeling. Two motor attachments are on the American market for 1916, the Smith Motor Wheel and the Cyclemotor, the latter being a newcomer.

"One million bicycles a year"—the slogan of one accessory company for its 1916 campaign—aptly expresses the businesslike attitude of accessory manufacturers. They have pulled off their coats, rolled up their sleeves and are getting on the job in dead earnest. More bicycle sales mean more accessory sales—they know it and that's why they are willing to work overtime. The accessory men have their jaws set and are tackling the bike boosting game like men who know their business.

Co-operation is the watch word of these boosters—co-operation with the dealer in his effort to interest prospective buyers. Thousands of cycle dealers have received sales campaign ammunition from accessory factories during the year, and the real merchants have used it and hit the bull's eye. On a larger scale than ever before dealers will continue to receive this assistance from accessory makers, and will therefore have at their service a powerful publicity weapon.

With general business conditions swinging back to normal, the commercial demand for bicycle delivery outfits will naturally increase; inefficiency has an uncomfortable berth in an establishment where trade is brisk. And it doesn't take a wise dealer long to find the weak spots of a merchant's delivery system, and to show 'em up so strong that they'll be slipped right onto the tobbogan. The value of the bicycle way of making deliveries has been demonstrated—specific instances of its success exist in every community. Here is a huge field—the commercial field—which offers big opportunities and which has not as yet, strange to say, been exploited for nearly what it is worth.



**Variety in Commercial Bicycles Will Enable Dealers to Get Hard Headed Merchants Interested**

The exhibits at the Chicago and also at the New York Show reveal the splendid development of sturdy mounts with suitable package carrying facilities. Bicycles with wire paniers arranged in ingenious ways, luggage carriers, "bi-cars" and vans have been perfected to a point where they have left the experimental stage and are now giving efficient service to hard headed merchants. The commercial field is to a very large extent lying fallow—it is open to extensive as well as intensive cultivation, and if dealers get on the job they are bound to set a new mark for commercial sales during the 1916 season.

So manufacturers are optimistic—and they have mighty good reasons to back up their enthusiasm. They know that the demand is there—and they know better than any one else that their products are simpler, sturdier and more serviceable than at the beginning of any other season.

Salesmen from all sections of the country brought the good word back to their chiefs and when notes were compared at the annual conferences it was found that the jobbers and the dealers all looked forward to a banner year because of improved local conditions. The travelers have caught the chiefs' enthusiasm, and are actively spreading it broadcast.

The trade needs this enthusiasm to arouse it to a fuller appreciation of the possibilities the present season offers. 1916 brings with it an enthusiasm that is not born of exaggeration, but is the natural result of a happy combination of conditions that presage a strong market for the bicycle. It's up to the dealers to go out and hustle and keep on hustling the entire season.

### NORWAY'S BICYCLE MARKET

According to the American Consul at Bergen, Norway, "there is a pretty fair market for bicycles" in that territory. Such bicycles are imported in parts and put together on the other side by so-called bicycle manufacturers.

### ACTIVITY IN NUEVITAS, CUBA

The American Consul of Nuevitas, Cuba, advises that motorcycles and bicycles are imported into that district in considerable quantities, and that the trade is fast increasing. All of the hardware dealers in the district handle cycles.

## ST. LOUIS TRADE ASSOCIATION ELECTS OFFICERS

ST. LOUIS, Mo., October 3.—Members of the recently organized retail cycle dealers' association held a meeting last week and adopted a constitution and by-laws, and elected temporary officers who will act until the first 1916 meeting in January. A. Schueddig was chosen president and O. F. Hassemer, secretary-treasurer.

It was decided that the organization would be known as the St. Louis Cycle Trades Association. The term "cycle trades" was construed as covering all branches of the cycle business, including bicycles, motorcycles and accessories. The object of the association, as set forth by the constitution, will be to promote the use of the motorcycle and bicycle for pleasure and business purposes and to increase the general interest in cycling by various forms of advertising.

The membership will be active and associate; that is, any one who is engaged in the manufacture or sale of motorcycles, bicycles or accessories, or who is otherwise, directly or indirectly, connected with the cycle trade in St. Louis is eligible to active membership; any person likewise engaged in the cycle trades outside of St. Louis is permitted to take out an associate membership.

All applications for membership should be addressed to the secretary of the association at 4541 South Compton avenue, St. Louis.

### HAZELTON ADDS ANOTHER

Washington, D. C.—E. F. Hazelton has added another store to his already large establishment, and now occupies the premises at 427-29-31 Tenth street, N. W. His shop has been removed to the rear of 429, giving the salesroom a space of 50 x 125 feet. The store at No. 427, formerly a branch of the Vim Cycle Co., of Chicago, has been remodeled for use as a repair shop. Harry Hinton, formerly with T. N. Mudd, Jr., is in charge. The Hazelton stores handle the National, Racycle, Yale and Snell bicycles.

### ADD PIERCE BICYCLE LINE

Louisville, Ky., September 30.—The A. L. Ray Company, agents for the Rayo, Keystone, Princeton, National and Toledo bicycles, secured the exclusive agency for southern distribution of the Pierce line of bicycles. Mr. Ray attended the Chicago show and while there signed the agency for Kentucky distribution of products of the Pennsylvania Rubber Company. Mr. Ray, following his return from the Chicago show, seems well pleased with prospects for the coming year.

### WILL MAKE CORTINES' HANDLE BARS

Dallas, Texas, October 2.—The Chicago Handle Bar Company will close a contract for the manufacture of the "safety first" reversible bicycle handle bar, according to E. J. Cortines, inventor of this bar. Cortines has a large agency here.

AT THE NEWARK VELODROME WHEN THE NATIONAL TITLE RACE WAS RUN ON OCTOBER 3.

First Two Photos—Finish and Start of Brassard. Middle—Kramer After Victory. Start and Finish of Title Race

# SCHEPENS VICTOR OF CHICAGO FEATURE

CHICAGO, October 4.—Ralph Schepens, the Belgian, won the three-cornered ten-mile amateur motor-paced race, the feature event on the card at the Riverview Velodrome yesterday afternoon. Opposed to Schepens were two other local favorites, Willie Kell, the Chicago Cycling Club crack, and Olaf Lodal, the Dane. Schepens rode a consistent race all through and covered the ten miles in 16:04. Lodal finished second to the Belgian and Kell third, the latter being forced out in the last mile.

Two professional and two amateur races were also decided at the North Side track yesterday. The professionals appeared in a one-mile point race and an Australian pursuit race. The point race was won by Charles Piercey, the Australian, who won the third heat and finished second in the first and second, his total points numbering eleven. Gus Wohlrab, the Jersey City baker boy, ran second in the race, Wohlrab winning the first heat and also annexing a second and a third, making his score ten points. Joe Kopsky, the Bohemian, who won the second heat by a runaway, collected third money with six points, and Ned Young, the Salt Laker, finished fourth with four points. Piercey also won the pursuit race after riding down Kopsky, Wohlrab and Rudi-Russe in the order named. The pursuit race went 2⅓ miles.

Charles Stuckle and Ernest Kockler were the amateur winners in the sprint events for that class. Stuckle beat Kockler and Roy McWhirter in the repechage handicap at a half-mile, while Kockler proved to be the class of the five-mile open for the simon pures. Summary:

Half-mile repechage handicap, amateur—Won by Charles Stuckle, unattached, 80 yards; second, Ernest Kockler, Riverview C. C., scr.; third, Roy McWhirter, N. W. Skating Club, 40 yards. Time, 58⅕ seconds.

Five-mile open, amateur—Won by Ernest Kockler, Riverview C. C.; second, Roy McWhirter, N. W. Skating Club; third, Charles Minnetti, Riverview C. C. Time, 11:52.

One-mile point race, professional—Won by Charles Piercey, Australia, 11 points; second, Gus Wohlrab, Jersey City, 10 points; third, Joe Kopsky, Bohemia, 6 points.

Australian pursuit race, professional—Won by Charles Piercey, Australia; second, Joe Kopsky, Bohemia; third, Gus Wohlrab, Jersey City. Time, 6:30. Distance, 2⅓ miles.

Ten-mile motor-paced race, amateur—Won by Ralph Schepens, Belgian-American C. C.; second, Olaf Lodal, Danish-American A. C.; third, Willie Kell, Chicago C. C. Time, 16:04.

## HANSON WINS CHAMPIONSHIP OF HUDSON CO. WHEELMEN

JERSEY CITY, N. J., October 4.—Charles Hansen, the veteran racing cyclist of New Jersey, has just added another championship to his already long string of victories and is on the road of annexing the first prize for the weekly point races of the Hudson County Wheelmen of Jersey City, N. J.

The weekly point races of his club are held each Sunday of the year, and Hansen has seventy-five points to his credit so far, while his runner-up, George Kaetz, has but sixty points, with John Carey, holding third position with fifty-eight points.

The championship races which were held on September 19 and 26, were highly interesting, with twenty riders competing in the two and five-mile races of the 19th, and fifteen riders in the one and ten-mile races of the 26th.

Hansen scored a first in the two-mile, a second in the one-mile, a tie for second and third places in the five-mile, and third place in the ten-mile, scoring a total of 12½ points, while John Fargo, a recruit to the racing game, showing up well with one first, and two thirds, totalling eleven points.

Total points made by contestants are as follows:

1—Charles Hansen, 12½ points.
2—John Fargo, 11 points.
3—John Carey, 6½ points.
4—Clarence Benton, 5 points.
5—Richard Olsen, 5 points.

## C. R. C. A. RIDER IN FATAL ACCIDENT

While riding toward Greenwich, Conn., during the tri-state century, promoted by the Century Road Club of America, on September 26, Amello Piantedosi, a member of the C. R. C. Association, collided with an automobile and sustained a fractured skull. Two days later Piantedosi died at his home in Greenwich.

The deceased cyclist was very popular among the club riders of New York, and it is therefore with much concern that they heard of the sore straits in which Piantedosi's family has been left by the sudden death of its father. The Greenwich rider left a widow and six children, who are now without any means of support. The Century Road Club Association is asking cyclists to contribute to a fund which will be given to Mrs. Piantedosi on October 15. Contributions may be sent to Sylvain Segal, 1842 Seventh avenue, New York City. Nine dollars has been received.

## A POPULARITY CONTEST

Russellville, Ky., September 30.—Inman & Inman, local merchants, have inaugurated a popularity contest, the prize being a $25 bicycle. The mount, which is equipped with coaster brake, electric light, roller chain and motorcycle saddle, is offered to the boy securing the most votes. One vote is allowed for each cent spent in trade at this store. The purchaser may cast these votes in favor of any boy in the county, and the most popular boy will receive the bicycle on Christmas Day.

# RACE SCHEDULE FOR INTER-CLUB MEET

THE schedule of races of the Inter-Club Amateur Cycle Road Racing League, as decided upon at its meeting held October 4, and the various riders who will represent the various clubs in the races are as follows:

October 10, at 10 a. m. sharp, at Fort Schuyler Road and Eastern Boulevard, Bronx, N. Y., five and ten-mile unpaced races.

October 17, at same place and time, one and three-mile unpaced races; ten-mile individual team race.

The riders to represent the various clubs:

Acme Wheelmen—Fred Miller, Paul Reinike, George Schaab, Joseph Schafer.

Bayview Wheelmen—Robert Henderson, Robert Benwell, Charles Osteritter, Stephen O'Panowitz.

Century Road Club of America, N. J. Division—A. L. Everard, G. A. Knopf, E. E. Fraysse, E. T. Taborelli.

Century Road Club of America, N. Y. Division—J. G. Schmidt, L. A. Fraysse, W. J. Lock, Theo. Heisig.

Century Road Club Association, New York Division—Edwin Jensen, Nelson Johnson, John Marquart, Ray Caldwell.

Glunz Wheelmen—Henry Garbade, Harry Aron, E. Andrews, Peter Brock.

New England Wheelmen—Eugene Aickelin, C. H. J. Tonjes, Charles Eiler, George Polacsy.

Unione Sportiva Italienne—James Papesca, Tony Pace, James Alfonzo, Charles Rabbino.

The first rider mentioned of each club will ride for the individual honor.

# JENSEN SCORES HIGHEST IN C. R. C. A. MEET

THE annual championship races of the Century Road Club Association, New York Division, one set of four races being scratch races and another set of four races being in the unpaced style, brought Edwin Jensen, who won the 1914 unpaced races and the individual championship of the Inter-Club Amateur Cycle Road Racing League to the front as the champion in both styles of riding. However, Jensen was very closely pressed by Nelson Johnson and John Marquart and Ray Caldwell, who finished in that order.

Edwin Jensen

The competition races were not very fast but the sprints in each race left no room for doubt as to the real champion. The unpaced series showed some phenomenal time being made in the various distances, and but for the lack of sufficient clockers, would stand as new records.

Edwin Jensen, as the result of the unpaced series, will represent the Century Road Club Association in the annual championships of the Inter-Club Amateur Cycle Road Racing League, while the first four in the same series will make up the team, as follows: Edwin Jensen, Nelson Johnson, John Marquart and Ray Caldwell.

Points made in the scratch races are as follows: Jensen, 12; Johnson, 11; Marquart, 8; Mullin, 7; Desimone, 3; Welton, 2; Harvey, 1. The point scores in the unpaced race are: Jensen, 16; Johnson, 15; Marquart, 5; R. Caldwell, 5; Welton, 2; Desimone, 1.

The point scores in detail are as follows for the 1, 3, 5 and 10-mile unpaced races:

| Pos. | Name. | 1 m. | 3 m. | 5 m. | 10 m. | Pts. |
|---|---|---|---|---|---|---|
| 1 | E. Jensen... | 5 | 3 | 5 | 3 | 16 |
| 2 | N. Johnson.. | 2 | 5 | 3 | 5 | 15 |
| 3 | R. Caldwell. .. | .. | 2 | 2 | 1 | 5 |
| 3 | J. Marquart. | 3 | .. | .. | 2 | 5 |
| 4 | J. Welton... | .. | 1 | 1 | .. | 2 |
| 5 | A. Desimone. | 1 | .. | .. | .. | 1 |

## THREE SITES CONSIDERED FOR ATLANTA'S WINTER VELODROME

Newark, N. J., October 4.—Johnny Chapman, the manager of the Cycle Racing Association, returned from Atlanta, Ga., on Sunday afternoon with plenty of good news not only for the promoters, but for the rider's as well. Chapman was very optimistic and thinks the winter track would be a big thing for the promoters and furnish plenty of competition during the winter months for the riders. Frank Edmondson, one of the biggest business men in Atlanta, is going to help back the project to the extent of $5,000 and all of the business people in the Southern State are with the game.

There are three sites under consideration for the track, but the exact location will not be determined on until a week or ten days. Manager Chapman will also receive bids at the end of this week for iron work, carpentry and heating arrangements. When these bids are all in and the site selected work will start at once and by Christmas week the Cycle Racing Association expects to be running races at Atlanta.

## LOCK WINS BICYCLE RACES

Jersey City, N. J., October 4.—William J. Lock won the mile and half-mile championship races held over the Hudson County Boulevard, Jersey City, N. J., on Sunday, October 3, by the Century Road Club of America. Heisig was a few inches behind Lock at the finish of the mile scratch race. Kudrle was a close third. On the half-mile race, Kudrle was second and Schmidt third. L. A. Fraysse won the ten-mile unpaced race in 26:45. Heisig was second and J. Schmidt third. Lock has not been defeated in a scratch race in the last two seasons, and was the winner of the club championship last year. He won this year's handicap championship with 32 points. Heisig was second with 17 points. In the scratch races Lock had 80 points, Heisig 22, Kudrle 18, and Schmidt 16 for the year.

## HENDERSON WINS BAY VIEW RACE

Newark, N. J., October 4.—The Bay View Wheelmen, of this city, held their series of unpaced races on Sunday, October 3, to decide the unpaced champion of the club, who will compete in the Inter-Club contest next Sunday. Robert Henderson captured the club championship by annexing seventeen and one-half points, while Robert Benwell was a close runner up with 16 points. Henderson took the ten-mile and the one-mile events, while Benwell accounted for the three and five-mile races. Henderson covered ten miles in twenty-five minutes and forty-eight seconds. O. Panowitz got nine points in the series, Osterritter got eight and one-half, Grenda five, and Nagel three.

## ALCKELIN TAKES CHAMPIONSHIP

The New England Wheelmen held their championship races over the Eastern Boulevard, Bronx, N. Y., October 3, and E. Aickelin was the winner of the three-mile and five-mile races. In each race there was a close finish. Aickelin was also the winner of the club championship for 1915, with 40 points; C. H. Tonjeo was second, with 23 points. Aickelin will represent the New England Wheelmen in the interclub championships.

## TWO ST. LOUIS RUNS

St. Louis, Mo., October 3.—Two weekend runs were scheduled by the St. Louis Cycling Club for Saturday and Sunday, October 2-3. The Saturday event took the cyclists from the West Gate Tower Grove to Sever's Hotel at House Springs, and the Sunday run was scheduled for Eureka.

# PAPESCA WINS U. S. I. CHAMPIONSHIP

"JIMMY" PAPESCA, last year's champion of the New England wheelmen, captured the unpaced championship of the Unione Sportiva Italiana, by accounting for nineteen out of a possible twenty points in the series of unpaced races which were held on the Eastern Boulevard, Bronx, N. Y., on Sunday, October 3. Papesca took first position in the one, three and five-mile races and second place in the ten-mile, making good time in each event.

"Jimmy" Papesca

Because of his victory, Papesca will represent the U. S. I. in the Inter-Club championship races which will run on the Eastern Boulevard course next Sunday. After the races were over it was found that the distances covered in the supposed five and ten-mile races were short, so that something must be added to the time of 9:07 3/7 which Papesca made in the five-mile, and 18:21 3/5 which Thos. La Rossa made in the ten-mile race. Five points were allowed for first position, four for second and one for fifth. The positions of the first seven men, the points captured in each race and the totals are shown below:

| Pos. | Name | 1 Mi | 3 Mi | 5 Mi | 10 Mi | Total |
|---|---|---|---|---|---|---|
| 1 | J. Papesca | 5 | 5 | 5 | 4 | 19 |
| 2 | T. Pace | 3 | 3 | 3 | 2 | 11 |
| 3 | J. Alfonso | 4 | 2 | | 3 | 9 |
| 4 | L. Rabbino | 2 | 4 | 2 | | 8 |
| 5 | T. La Rossa | | | 1 | 5 | 6 |
| 6 | C. Zoccola | | 1 | 4 | 1 | 6 |
| 7 | C. Rabbino | 1 | | | | 1 |

# BROWN RETURNS WITH WESTERN CONTRACTS

BUFFALO, N. Y., October 4.—Fred Brown, the general sales manager for the Pierce Cycle Company, who has just returned from a two months' business trip to the Pacific Coast, reports that every dealer he saw was very enthusiastic and all expected that 1916 would be a bicycle boom year.

"And I also found," said Mr. Brown, "throughout my trip that it was the unanimous opinion of both jobber and rider that high grade bicycles, tires, etc., gave the best results, the least amount of trouble and were more easy to ride. These jobbers argue," he continued, "that it is no use trying to sell something the people don't want."

Saufley Supply Company, of Kansas City, Mo., will be the new Pierce Distributors in Northern Kansas, Oklahoma and part of Missouri. Formerly this firm only handled the Excelsior motorcycle. This is their first attempt in the bicycle field.

Pettee Cycle Company, of Denver, have signed up for Colorado and Wyoming. They have just opened up a jobbing department; publish a catalog and will have two men constantly on the road. Cortines Supply Company, of Dallas, Tex., are the distributors for eastern Texas and part of Oklahoma and Louisiana. At El Paso, Tex., C. D. Freeman, the oldest bicycle dealer in that section of the country, took on a Pierce agency.

John T. Bill & Co., of Los Angeles, signed up for the distributorship for southern California and Arizona. Mr. Bill and Mr. Brown made a five-day trip (800 miles) by auto calling on every dealer in the southern part of the State. The Bean Son Company, of San Francisco, Cal., are the northern California, Nevada and Hawaiian Island distributors.

Motorcycle Supply Company are the Portland, Ore., agents. F. M. Bailey, of Tacoma, signed his sixteenth consecutive contract has a Pierce agent. The Spokane Cycle & Auto Supply Company are distributors in eastern Washington, the States of Montana and northern Idaho.

**Sales Manager Fred Brown**

The Bicycle Supply Company, of Salt Lake City, Pierce distributors in Utah and southern Idaho, report that 90 per cent. of the bicycle sales are for Pierce wheels. And while signing up their 1916 contract they gave Mr. Brown an order for a carload of bicycles for immediate shipment. Of this order 25 per cent. called for $50 Pierce Racers, and taking the order as a whole, 50 per cent. of it called for bicycles selling for $40 or more.

### SANBORN'S MILEAGE LEADS IN C. R. C. A. MILEAGE

Chicago, October 5.—The standing of competitors in the annual century and mileage competition of the Century Road Club Association shows that Fred M. Sanborn, of Baltimore, Md., is still leading. He is followed by Sylvain Segal, of New York, N. Y., who gained from third to second place during the fifteen-day ending September 15. The following are the standings up to September 15:

1—Fred M. Sanborn, Baltimore, Md.
2—Sylvain Segal, New York, N. Y.
3—William M. Winquist, Brooklyn, N. Y.
4—George Steppello, Long Island City, N. Y.
5—Duane W. Moore, Bayonne, N. J.
6—Joseph Caldwell, Brooklyn, N. Y.
7—Andrew N. Segal, New York, N. Y.
8—Adolph Weiner, New York, N. Y.
9—Charles E. Hansen, Jersey City, N. J.
10—Carl O. Bonhardt, New York, N. Y.
11—Howard V. Carroll, New York, N. Y.
12—Ray Caldwell, Brooklyn, N. Y.
13—Harry A. Whiteman, Bronx, N. Y.
14—George H. Segal, New York, N. Y.
15—Louis Zemo, Elberon, N. J.
16—Amiello Piantedosi, New York, N. Y.
17—William Feil, New York, N. Y.
18—Robert Wolfson, New York, N. Y.
19—Ralph W. Zarr, New York, N. Y.
20—George Harvey, Brooklyn, N. Y.
21—Alfred Kipling, New York, N. Y.
22—John M. Mitchell, Greenwich, Connecticut.
23—William F. Thompson, New York, N. Y.
24—Alexander S. Thomson, New York, N. Y.

# MARTIN WINS ST. LOUIS HANDICAP ROAD RACE

ST. LOUIS, Mo., October 3.—Twelve riders finished the fourteen-mile road race of the St. Louis Cycling Club, which was held on Sunday, September 26. The first place prize went to W. C. Martin, who had a handicap of nine minutes. F. J. Pollnow, starting from scratch, accounted for the second place prize and first time award. Pollnow's time was forty-two minutes. In all there were nineteen starters.

A silver loving cup and a gold medal were presented to the victor, while the first time award was an order for ten dollars in merchandise, offered by C. B. Jansky, a local cycle dealer. Among the other prizes were Fisk, Akron and Hearsay tires, Atherton, Morrow, Corbin and New Departure coaster brakes, Diamond chains, Kelly handlebars, Star racing pedals and Solar gas lamps.

The officials in charge were as follows: Referee, O. F. Hassemer; timers, Lloyd Faidley, Wm. M. Butler; judges, E. J. Rotty, C. A. Axtell; starter, H. G. Wolzendorf, and clerk of course, Tim Bahnsen. Following are the summaries:

| Handicap. | Name. | Place. | Time. |
|---|---|---|---|
| 9 min. | W. C. Martin..... | 1 | 49:43 |
| 8 " | C. B. Jansky..... | .. | ..... |
| 7 " | Wm. Rodgers ..... | .. | ..... |
| 7 " | C. Lindenschmit ... | .. | ..... |
| 7 " | C. L. Barr..... | 13 | 65:04 |
| 6 " | A. C. Thompson..... | 4 | 49:59 |
| 6 " | A. J. Schreiner..... | 11 | 64:03 |
| 6 " | O. B. Henry..... | 12 | 64:04 |
| 5 " | Geo. Martin ..... | 5 | 49:14 |
| 5 " | Wm. Barry ..... | .. | ..... |
| 4 " | Geo. Mueller ..... | 8 | 50:25½ |
| 4 " | Geo. Henry ..... | 9 | 51:24 |
| 3 " | L. G. Brod..... | 7 | 48:42 |
| 3 " | A. F. Dietrich..... | 3 | 46:58 |
| 3 " | S. Gaskill ..... | 10 | 52:30½ |

# Cyclemotor

*"Wheeling without work"*

YOUR bicycle with our *Cyclemotor* will make for you a light-weight, easy-to-handle motorcycle.

The smooth running engine is a feature which has surprised everyone. Its pull on the transmission belt is practically as steady as would be secured from a four-stroke, four-cylinder automobile engine.

21 pounds heavy, with practically no vibration on the bicycle frame, is another remarkable feature of the *Cyclemotor*.

Dealers desiring territory should apply at once. State particulars and mention line of bicycles carried.

NEW YORK SHOW—SPACES 123-124

*Ask for booklet and detailed information by addressing*

### MANKATO FAIR RACE

Mankato, Minn., September 30.—Several races were held in connection with the St. Peter Fair which was held in this city on September 21-22. The five-mile professional was carried off by Dave Kinney, Cyclone, second place going to H. Zimmerman, Indian, and third to John Iverson, Cyclone. L. Salbe, Cyclone, accounted for the fifteen-mile open, with Zimmerman second and Iverson third. On the second day of the fair three events were run off, both the ten-mile open anl the ten-mile single cylinder being won by Kinney. Ray Earle, Cyclone, romped home second in the open affair, closely followed by Salbe, while the single cylinder race saw H. Zimmerman, Indian, cross the tape second, leading L. Zimmerman, Indian. A Pope rider finished first in the five-mile single cylinder amateur.

### PROVIDENCE RUN POSTPONED

Providence, R. I., October 4.—The twelfth annual Triangle Run of the Providence Motorcycle Club was postponed until next Sunday on account of rain. Many entries have been received from all points of New England, "Warhorse" Baker being one of the professional riders who was entered.

### NOW HAS HER OWN INDIAN

Springfield, Mass.—Mrs. Leon Filier, of this city, who for several seasons used to enjoy tandem riding on her husband's Indian, recently determined to ride on her own account. She accordingly invested in a "little twin" Indian, and both she and Mr. Filier now ride together on long and short trips. The first of these long tours was made to Saratoga, N. Y., for the races on July 4. The Filiers, on their twins, are familiar sights on the roads leading out of Springfield each Saturday and Sunday.

### INSURANCE FOR MOTORCYCLES

Riders who desire insurance on their machines against fire and theft, accident or collision can obtain the same from Fred C. Birnbaum, whose headquarters are at 533 West 110th street, New York. Mr. Birnbaum represents a number of reliable insurance firms which specialize in these lines for all kinds of motor vehicles. The rate is 2 per cent. of the machine's value. Liability insurance can also be had at the same rate. The policies cover sidecar combinations as well as solo and tandem machines.

### MONTHLY DANCES FOR READING M. C.

Reading, Pa., October 4.—The Reading Motorcycle Club will hold a dance on Thursday evening, November 4, in its rooms in the Leinbach building. During the winter the club will hold a dance once a month. Three new members were recently elected.

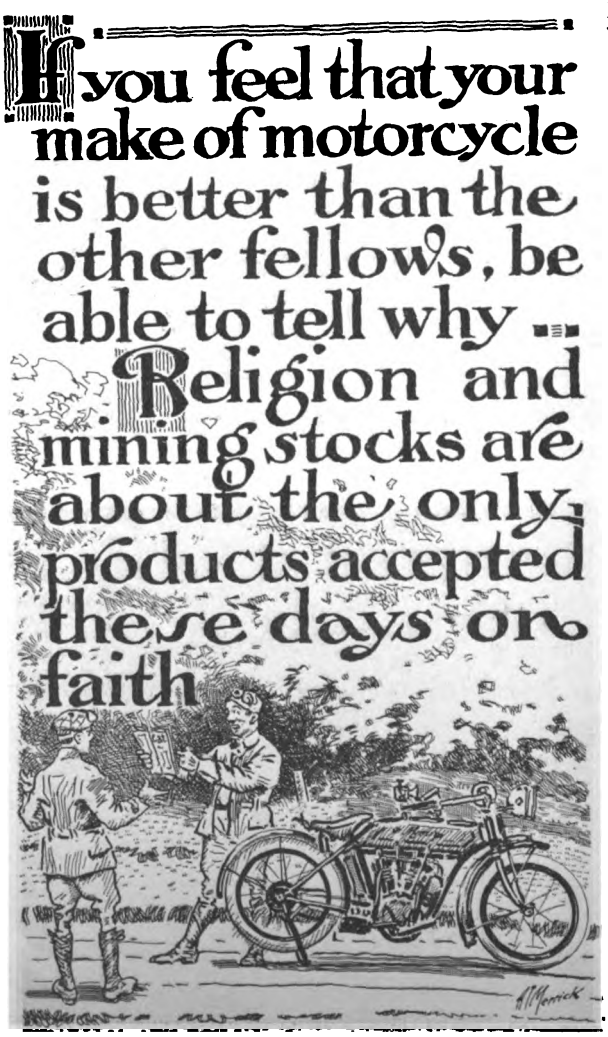
The shop of M. L. Ainsworth, at 215 South Kickapoo street, Lincoln, Ill., has registered with the F. A. M.

### OVER 150 EXCELSIORS IN VARIOUS CHICAGO DEPARTMENTS

Chicago, Ill.—Over 150 Excelsior motorcycles are now in daily use by the various departments of the Chicago police. Seven years ago the use of a motorcycle by any of the Park Boards would have been out of the question and it took a very hard fight on the part of Colonel Leroy Steward in the spring of 1909 to get the Police Department to purchase even half a dozen mounts at all.

However, the first lot used by the police were Excelsior belt-drive singles with magneto ignition, and it did not take a year's service to prove the value of the two-wheeler for park and other municipal work. In 1910, the city purchased 15 more Excelsiors, the various Park Boards were supplied with these mounts. But in Lincoln Park, automobile speeders were to be met with, and twin machines were desired, so another make than the Excelsior was selected, no twin models being at that time made by the Excelsior factory. In 1911 the city police department put on a number of Excelsior twins, however, and later all single cylinder mounts were turned over to city department messengers and officials, the police using twins only thereafter.

The next department to use motorcycles was the police ambulance corps, and eleven Excelsiors with sidecars were shortly purchased. At present, all old models have been replaced by recent ones, the city, Lincoln Park, West Park and South Park Boards all using up-to-date Excelsiors.



### KELLOGGS AT TACOMA

Tacoma, Wash.—W. E. Kellogg and his son Walter, passed through this city recently on their way to Tia Juana, Mexico, and Los Angeles from Middletown, N. Y. They used a Harley-Davidson sidecar combination, the young man driving while his father and camp outfit occupied the sidecar.

The Kelloggs were welcomed by the Tacoma Automobile Club in the person of President Outcault and made that club their headquarters during the stay in this city. They camped all the way along from their home city and had covered every kind of road to be found in the country since their starting out. The Kelloggs expect to have a total mileage of 10,000 soon.

### ELMIRA CLUB WANTS HOUSE

Elmira, N. Y., October 4.—The Elmira Motorcycle Club has been so prosperous during the past season that it has accumulated enough money with which to establish its own club house and now contemplates buying a house or building one immediately on the Chemung River. A purchasing committee will report on desirable locations.

### SEVENTY-MILE CLUB RUN

Marlboro, Mass., October 4.—Seventy miles will be the distance of the club run which the Marlboro M. C. is planning for October 10. Checking stations will be located at Still River, Concord, Framington, Shrewsbury and Marlboro. Competitors will have to cover the course twice, once in the morning and again in the afternoon, an allowance of one-half hour for dinner having been made. The local club will hold an outing at the Bella Hoola Cottage, Fort Meadow Pond, on October 17.

### COGSWELL NOW IN CAPITAL

Washington, D. C.—Ray Cogswell, for a number of years in the motorcycle and bicycle business in Georgetown, has located on 824 Ninth street, N. W., the former home of T. N. Mudd, Jr., Inc. Cogswell handles the Aviator, National, Hudson and Westminster line of bicycles, and is looking for the agency for a good make of motorcycle. He reports second hand motorcycle sales as fine.

### BAKER SELLS OUT

Elgin, Ill.—L. Baker has sold out his interests in the Peck and Baker Indian Agency. The two Peck brothers have organized a new firm to handle the tepee, and leased another store at 10 N. State street, where they will sell bicycles in addition to motorcycles.

### LOCAL COMMISSIONERS

The State F. A. M. Commissioner for Michigan has appointed Leo Crowell as local commissioner for Battle Creek and Calhoun county, and Tom R. Martin for Grand Rapids and Kent county.

# THE TIRES W

## Sales Guaranteed to Dealers

Goodyear-Akron Bicycle Tire sales more than doubled in one year.

And the number of Goodyear-Akron dealers trebled in eight months.

6,000 dealers now sell these low-priced *quality* tires.

Our 33⅓ per cent reduction in 18 months, coupled with a nation-wide advertising campaign, has made them the fastest sellers on the market.

And our guarantee sales plan is helping hundreds of dealers to increase their business. One dealer had 400 inquiries from 1,300 letters which we prepared, resulting in over 40 repair jobs and many tire sales.

We know what others have done and are doing. We know what you can do. And we know that you will do it if you take advantage of Goodyear dealer service.

Goodyear-Akrons mean more bicycle business for you, as well as more tire business. Quick turn-overs mean larger tire profits.

Goodyear-Akrons make friends as well as money for you. They reduce tire trouble—and that results in making more bicycle riders.

Are you selling them?

If you are, write to us and we'll tell you how we can help you *sell more* of them.

If you are not, send us this coupon, *today*, for our *guarantee sales plan.*

# OUT A RISK!

## Tires Guaranteed to Riders

Goodyear-Akron Tires save you an average of $1.75 each on your bicycle tires. We sell you a non-skid tire now for $2.50 that would cost you about $4.25 in other makes. Multiplied output makes this possible by bringing down factory cost. We pass the saving on to you.

You can pay *more*, but you can't get more at any price than you can get in a Goodyear-Akron: $2.25 each for the smooth tread, $2.50 each for the non-skid tread.

*But we don't stop there.*

We not only save you *money*, but our guarantee on Goodyear-Akron Tires saves you *risk* as well.

Goodyear-Akron Tires are made with the same faithful care and the same scientific understanding of tire problems that has resulted in the enormous success of Goodyear Fortified Automobile Tires and Goodyear Blue Streak Motorcycle Tires.

And we stand back of their performance.

So insist on Goodyear-Akron, the fully guaranteed tire.

Don't take chances on cheap tires—don't waste money on expensive ones.

Any dealer can supply you from stock, or get you the Goodyear-Akron at once from a nearby Goodyear branch.

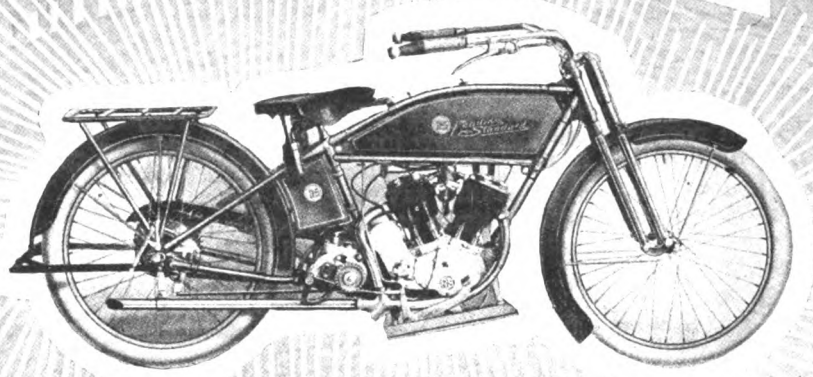
# At the Show



## THREE SPEED TWIN with SIXTY IMPROVEMENTS and REFINEMENTS

The R-S is now fully prepared to step into its rightful place as the world's master motorcycle. Never before in the history of the sport was there presented to the attention of the motorcycle trade such a glittering combination of ideal qualities as in the R-S for 1916.

## For Eight Years We Have Been Building SIDE BY SIDE VALVE MOTORS

And now, another leading motorcycle manufacturer has adopted this type and boldly proclaimed it to be the really perfect power plant. Mind you, we have been proving this for the past eight years.

Add to this fact, these innovations:

**Three Speed Transmission—Double Locking Device—Large Counter-Shaft Clutch Foot and Hand Operated—New Step Starter—New Front Fork—Stronger Frames—Etc.**

For super-ease and comfort, for convenience, for luxurious surplus of power, the equal of the R-S cannot be found. We say this advisably, with full appreciation of the belief extended ordinarily to statements of this nature.

But the R-S is so overwhelmingly the superior of the ordinary run of motorcycles, the brand of service it gives is so convincingly flawless—the terrific silent power of the engine, the beauty and grace of the "lines" of the R-S—these things are so evident—that we break our hitherto cast-iron rule of ultra-conservative statements and proclaim our belief that the R-S is indeed the finest value ever offered the motorcycle trade.

# "I Specify Morrow Brakes on all Bicycles that I buy"

# "I find that the Morrow is the easiest running, most positive brake on the Market"

Cordele, Ga.

Eclipse Machine Co.,
Elmira, N. Y.

Gentlemen:

I am mailing you under separate cover a few Morrow Coaster Brake Parts for which please ship new parts, and oblige.

I specify Morrow Brakes on all bicycles that I buy, and I use them altogether in repair line.

I have been in the bicycle business about twelve years and have used all kinds of coaster brakes, and I find that the Morrow is the easiest running, most positive working brake on the market; in applying the brake it doesn't hold with a jerk as most other brakes do, but it takes a firm hold and with very little pressure on the pedal it will stop the wheel instantly.

Trusting that you will ship me the new parts at once, I remain.

Very truly,
G. L. RILES.

# Emblem—The Only

## Real Lightweight Up-to-Date Motorcycle on the Market!

Here is the *real* lightweight motorcycle—up-to-the-minute in every detail that makes for comfort, convenience and power. Inconceivably light—yet strengthened in every important essential.

Think of it! A 7 h.p. twin cylinder, four-cycle motor—free engine clutch—high-tension magneto—kick-starter—spring front forks—chain drive—foot-boards—and many other features of the highest priced twins!

Since we first brought out the EMBLEM lightweight, we found it desirable to incorporate even further refinements, such as larger tires, better saddle, a more expensive finish—all of which caused us to place the list price of the EMBLEM at $175—at which price it is the greatest motorcycle value in the world.

Come to the show and see this 1916 marvel.

The Ever Popular Two-Piece Plug

## Above All Else—You Need Dependability

Perhaps you've had this experience: Out for a spin in the country—spark plug gone bad—long walk to the nearest garage.

Then you know the value of dependable plugs. And you also know that the best motor in the world is only as good as its spark plugs.

Insist upon Champions. They'll take the stiffest punishment you can give them and be right on the job for the trip home.

We've put Champion Motorcycle plugs clear through the mill in motorcycle engines. That's how we know they're right. That's how we can afford to give such an unusual guarantee.

Every Champion Spark Plug is guaranteed by us to give complete satisfaction or you may have free repair, replacement or your money back.

*Look for the name Champion on your spark plug porcelains. Do not accept imitations.*

**Champion Spark Plug Company**

# Here is the new Chief Kokomo

KOKOMO KORD, the new addition to the KOKOMO tribe, bids fair to duplicate the success made by the EVERLASTER tire we brought out some years ago—the first *motorcycle* fabric bicycle tire on the market. We set a pace that others found it hard to follow—we raised the standard of bicycle tire construction to a higher point *than it had ever known before.*

KOK KORD

In the KOKOMO KORD tire we set still a *higher standard* of tire building. This new tire marvel is the smoothest-running, cleanest-cut, toughest bicycle tire ever placed on the market.

Look at the extra high grade white tread, with its jet black sides. There's beauty—distinction—for you!

Then see the two plys of really large CORDS lying diagonally and transversely. This means a security against punctures—a security impossible with the ordinary thread fabric. Stone bruises have no effect on this tire.

**Kokomo**

**Kokomo,**

Digitized by Google

# papoose in the family

# OMO

## Lasts Better

Between these two plys of cord you will note a layer of black rubber. This is the highest quality of rubber obtainable—the highest quality used in ANY tire; motorcycle, bicycle or automobile.

Then finally, the thick black rubber inner tube completes a tire the like of which has not been seen before.

The trade does not know this tire—but it does know KOKOMO quality and it has respect for KOKOMO statements, and we KNOW you will believe us when we say that this KOKOMO KORD tire has proven itself to our entire satisfaction to be the nearest thing to *bicycle tire perfection* obtainable in a pneumatic tire.

Write us for full details.

## That's what dealers and riders say of the 1916 Harley-Davidson.

## Style and snap in every line—finish without an equal.

## The new Harley-Davidson shows matchless attention to the finest detail—no unsightly or flimsy trappings mar the appearance of the finished product.

## Read This Dealer's Letter

HARLEY-DAVIDSON MOTOR CO., Milwaukee, Wis. Vincennes, Ind., Sept. 27, 1915.

Dear Sirs:—Spun the new machine home in 11 hrs. 25 min. and she sure do go some, never missed a lick, and the big oil tank didn't have to be filled on the trip. I only bought one gallon of gas at Terre Haute. The new fork handles in the rough stuff *immense* and the starter—well it's all to the good; the boys here think it is a dream.

The gentleman who placed the first order for a 1916 has seen it and if his machine doesn't get here this week or the first of next I will have to let him have mine and I don't want to do that, so let's have that order No. 1 down here.

Hoping to receive the other machine in a very few days, and assuring you that there will be an increased showing down here for the coming season, I am,

Yours very truly,
F. E. BROOKS.

## DELIVERIES ON ALL MODELS SERIES 16

# EXCELSIOR AUTO CYCLE

We are now making shipments in quantity on all models of the 16 series, and have already made carload shipments to Girton & Hofer, Los Angeles; Harris & Sons, London; Haverford Cycle Company, Philadelphia; Mead Autocycle Company, Denver, and Motor Sales Company, Boston.

The Ultra Power model, 16-3, and Ultra Speed model, 16-S.C., are the two greatest motorcycles ever built, and are proving their supremacy in daily service and public tests.

Have you noticed how the EXCELSIORS have been cleaning up all the really important races that have been held since that model was put on the market? These events include

300-Mile AMERICAN NATIONAL CHAMPIONSHIP, breaking all World's Records 165 to 300 Miles.

F. A. M. 100-Mile CHAMPIONSHIP and 100-Mile Race at Peoria, Illinois, October 6th, breaking the hundred mile record on a one-mile dirt track by practically 5 minutes.

The fastest 100 miles ever ridden on a dirt track was also on a model 16-S.C., ridden by CARL GOUDY July 4th; time, 74 minutes 10 seconds.

Wise buyers are buying EXCELSIORS, and EXCELSIOR Dealers are doing business.

Are you in right for 1916?

**(Detachable)**

**"The Bicycle Booster"**

and it needs no argument to convince you that it is beyond all question the biggest success that ever invaded the cycle field.

If you didn't attend either show and you are not convinced that you need the Motor Wheel in your business, let us tell you that—

## Reasons Why

**1. Durability**—It is built by the largest manufacturers of automobile parts in the world—evidence of the high quality of materials used and skillful construction.

**2. Detachability**—It is the only bicycle motor on the market that is detachable as well as attachable and, because it is a complete power plant in itself and by the method of attachment it absorbs shocks from ruts and bumps and strengthens rather than weakens the bicycle.

**3. Utility**—Less than five minutes is required to attach the Motor Wheel to or detach it from any bicycle, hence, it can be used on a delivery van or on a lady's or gentleman's bicycle or tandem alternately.

## The Missing Link In The Cycle Man's Business

Grady, of Massachusetts, contracts for 1,000 Wheels and says he will sell double that number—Sladkin of the Haverford Cycle Company says it's the biggest thing in cycledom—and so on.

All you need to prove the salability of the Motor Wheel is a demonstrator. List price $60.00 f. o. b. Milwaukee.

**If you are a responsible, well established dealer in open territory, write for complete information and our proposition to dealers.**

*Fully Protected by U. S. and Foreign Patents*

## Reasons Why

**4. Economy**—It will push bicycle and rider from 100 to 125 miles on one gallon of gasoline, depending upon road traveled and weight of rider.

**5. Simplicity**—No "after the sale" trouble for the dealer. The Motor Wheel is well tired, has a high tension Magneto and float feed Carburetor—a child can operate it.

**6. Vibrationless and Cleanly**—It attaches to a bicycle in such a manner that no vibration from the motor reaches the rider and it sets back far enough so that the rider's clothing cannot become soiled.

**7. Cash Transaction**—About 75% of Smith Motor Wheel sales are made on a cash basis—no "trade-ins" to consider.

Standardi

Morrow

## Morrow Coaster Brake—The Standard

In its capacity as the highest example of reliable braking control that can be applied to a bicycle, the MORROW Coaster Brake performs a very important duty.

By its presence on a bicycle it injects into the sales-argument of the dealer an element of certainty, of surety, that reacts with strong emphasis upon the prospective buyer.

MORROW control means SAFETY. Safety is what the buyer demands first, last and all the time on his mount. And *no* brake can so strongly emphasize the smoothness, ease of handling and absolute safety of the bicycle as can the MORROW.

Thus, the MORROW is more than a brake. It is the compelling force that sells the bicycle—that seems to say "You are sure—you are safe—while I, the standard coaster brake, am on your machine."

Write for MORROW facts —they will interest you.

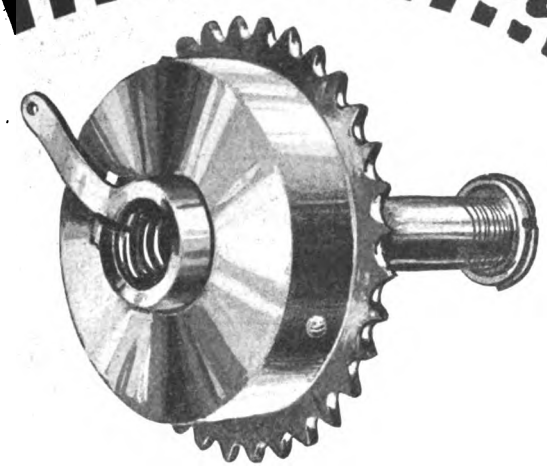
The Clutch of a Thousand Speeds



Eclipse Clutch—The Standard

There are many riders of antiquated machines in your town who will want the new ECLIPSE Multiple Disc Clutch, the standard since the sport of motorcycling began.

When they find that they can turn in their old models of clutches in part payment for new ECLIPSE CLUTCHES, you will have little difficulty in equipping every rider with "The Clutch of a Thousand Speeds."

Live dealers are seeing to it that every machine in their territory is clutch equipped, no matter how old. Remember this—EVERY RIDER OF A CLUTCHLESS MODEL OR A MACHINE WITH AN OLD-STYLE CLUTCH IS A RED HOT PROSPECT. SO GET AFTER THEM—right away.

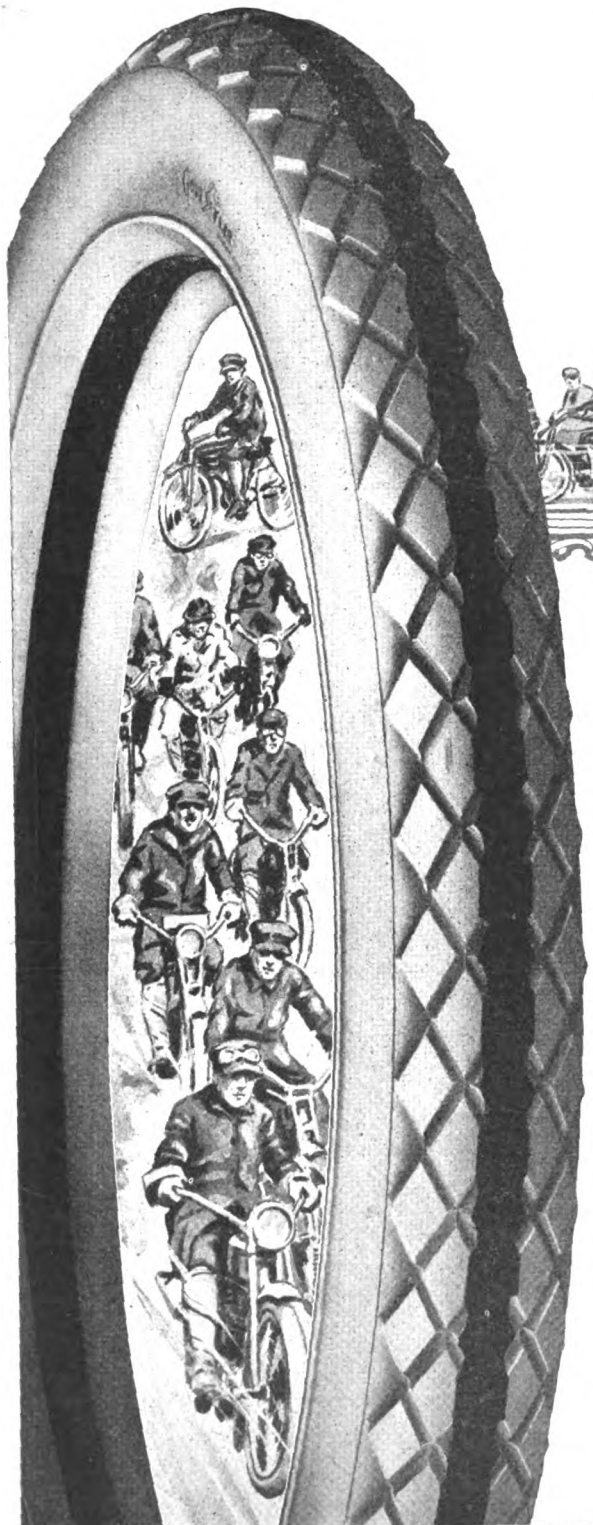
# Specify Blue Streak Tires



## Thousands of Riders are using them now

## Are You?

Why not insist on Blue Streak Road Tires when you buy a motorcycle? This adds nothing to the price. It gives you the sturdiest and handsomest tire men can make.

Only last month at Chicago's famous Speedway, Blue Streak Racing Tires captured all world's records in the 100, 200 and 300 miles. Twenty-five riders in that great classic staked their safety and success on Blue Streaks.

Remember the extra mileage Blue Streak Road tires will give you. In seven recent tests, the Blue Streaks averaged 9,515.57 miles on front wheels and 7,329.14 on rear wheels. These tests were national—made on all kinds of roads.

So Blue Streaks are the choice of all experts—men who have tried all makes of tires and know that these excel.

# Schickel—The $100 Lightweight

The man who rides on a SCHICKEL lightweight has distance at his mercy—he brings the far places to his door-step—and at a cost *one-tenth that of any other known means of transportation!*

For One Hundred Dollars he is in possession of the strongest, lightest, most powerful and yet vastly most economical lightweight motorcycle on the market.

The SCHICKEL LIGHTWEIGHT is ahead of all others—because,

1st, THE SCHICKEL TWO-STROKE MOTOR is the product of more than *eight years' concentrated manufacturing experience.* The name SCHICKEL has been identified with two-stroke motor building since the sport of motorcycling began. Hence, the SCHICKEL Lightweight motor is so far in advance of all others that it would be ridiculous to make comparisons.

2nd, The SCHICKEL Lightweight Motorcycle was on the road a year before others were past blueprint form. In this year's start, weaknesses were found and eliminated, certain refinements and improvements made—which changes could *only* result from *actual road service.*

These are points to be carefully considered, Mr. Dealer. Will you make your drive for Lightweight business with a machine that has yet to make good on the road, or will you tie your business to the SCHICKEL, that has behind it a record of *two years' flawless* road *performance?*

NEW YORK SHOW REPORT

# ACTIVE BUSINESS AND BRISK AIR OF OPTIMISM STAMP GARDEN SHOW A SUCCESS

AD there existed in the trade any concentrated sentiment in favor of the abandonment of the Eastern National Show, for simply one show in the West, that feeling must certainly have disappeared entirely as a result of the first three days' events at Madison Square Garden this week. At this writing it is safe to say that 90 per cent. of the exhibitors at the National Motorcycle and Bicycle Show, at the Garden in this city, have been most agreeably surprised to find here a very large attendance of dealers, a lot of keen interest among the public, and, most important of all, actual business far beyond expectations.

Notable about the show is the spirit of the exhibitors, dealers and other interested visitors. It is the spirit which, in the past, has been indicative of the advent of a year of big business. While folks in the trade do not look forward to a boom year any more in the cycle industries than in general business, there is a conviction that 1916 will witness a marked upward trend. Estimates at the show regarding the expected increase in 1916 over 1915 run generally from 25 per cent. to 50 per cent., and in a few cases as high as 100 per cent. It is felt that if sales are better by 50 per cent. than they have been this year, and most of the manufacturers and dealers expect that, then all will be satisfied.

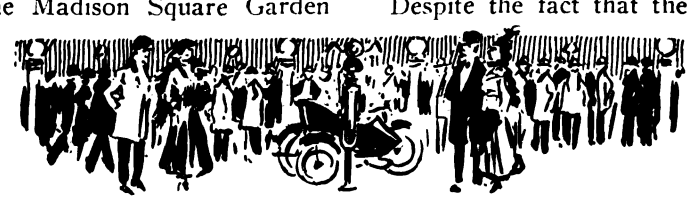
T is the almost universal opinion, as indicated by the amount of business done thus far in 1916 models and accessories, that the proportion of selling in the East, as compared with that in the West, will be larger this year than ever before. Trade in Eastern territory, in a field like this one, is usually of slow growth, but at the same time steady. It has taken time for the East to enthuse over the motorcycle, and whether it is because of the lightweight or other conditions, the fact remains that the long awaited Eastern enthusiasm seems to have arrived. That, at least, is the impression one gains at the Garden. If the interest shown and the amount of business done during the first three days are any criterion, then it can be stated right now, that the Madison Square Garden show, all things considered, will prove the most successful experiment in the history of the trade. In every way it outshines and surpasses the recent similar exhibition at the Coliseum at Chicago. And to most of the trade, even to those most optimistic regarding conditions in the East, the unquestioned superiority of the New York show comes as a great and very pleasant surprise. As stated above, this condition makes it certain that this year's first separate motorcycle and bicycle show in New York will be succeeded indefinitely by similar annual exhibitions here.

As in the case of the Chicago exhibition, but not quite so emphatically, one heard expressions here and there that the show dates are too early. At the same time, many who felt certain regarding this a fortnight ago in the West, are not now quite so sure about it in view of the splendid results of this week's Madison Square exhibition. It would appear, however, that late November or early December would be preferred by the parts and accessories people, the jobbers and most of the dealers.

IN this connection an excellent suggestion was made on Tuesday by W. J. Surre, of the Continental Rubber Works, of Erie, and manager of the annual conventions of the Cycle Parts and Accessories Association. Surre believes that the annual shows should be arranged by a joint committee of the various cycle trades associations, instead of simply by the Motorcycle Manufacturers' Association. The present efficient management could be continued, but he feels that the active co-operation of the committees representing all the associations in the trade would make for a larger participation of exhibitors among the manufacturers of parts and accessories and the jobbers. This plan would undoubtedly result in the selection of somewhat later show dates, and there is no doubt that the M. M. A. members would show a disposition to meet their fellow-manufacturers halfway.

The general appearance of the Garden show is most satisfactory and impressive; the decorations are handsome and in good taste; the exhibits are laid out in such a way as to make the most of the available opportunity, and the arrangements throughout reveal a thoroughgoing understanding of all the requirements on the part of Show Manager A. B. Coffman.

Despite the fact that the World's Series for the baseball championship has crowded the sporting pages of the metropolitan dailies, a liberal amount of effective publicity has been secured for the show, resulting in a large attendance.



Digitized by Google

## PRIMER AND SETTLING BULB ON EXCELSIORS

IN the interests of proper motor operation, the Excelsior Motor Mfg. & Supply Co. has fitted to its various four-stroke models a novel primer and settling bulb, these being shown on a 16-3 twin in the Garden. The primer consists of a valve with knurled head for permitting gasoline to flow from the fuel compartment of the tank through a pipe to each inlet valve chamber, the pipes and valve being always in place. The settling bulb is fitted below the tank in the fuel line, and is arranged to collect all sediment from the tank.

Another feature, seen on a short coupled roadster, is an outside oil pump, with glass body and ample check valves, the pump being hand operated. The rider can thus see the amount of oil drawn into the pump barrel and can graduate his charge accordingly. At this stand are to be seen in addition to the roadster and 16-3 twin, two of the two-stroke lightweights, both fitted with a novel draw-off device for priming or other purposes, a three-speed twin with electric equipment, a three-speed twin regular, a short coupled racer, and a two-speed regular model twin.

## SHOCK ABSORBER ON HARLEY-DAVIDSON SIDECAR

SIDECARISTS at the show all admired two attachments to the Harley-Davidson sidecar for the new season. These are a shock-absorber and a brake latch, the former being a strap attaching to a special plate on the back of the car body, passing under the axle and again attaching to this place by a coil spring. The latter serves to damp shocks. The brake latch, adaptable to any 1915 or 1916 Harley-Davidson, is a notched arm which swings backward from a pivot near the front sidecar tube and engages with the pedal pad. Normally, it is forward and out of contact with the foot lever.

A Harley-Davidson Model 16-F, is mounted with the name stencilled out on each side of the tank, and electric light within the tank. The letters appear with a red glow at intervals through the stencils. This model is only one of five shown, three of the others being arranged at various parts of the stand as solo mounts and the two remaining being coupled up to a sidecar and side-van respectively. A Model 16-E attached to a side-van is on show, as well as a Model 16-J, with Remy electrical equipment.

The speed element is of course interested in the Models 16-R, 16-S and 16-T, twin and single cylinder machines of short wheelbase and with dropped bars. An important feature of the Harley-Davidson exhibit is a full line of tools made by the company, the small tools being shown on attractive boards, while the larger ones are placed on a table. Among the latter is a special stand to bolt the gearbox to when working on it, while another is a flywheel truer. The methods used in packing various spare parts are shown on another series of boards. A cut-away gearset, clutch, and brake are shown, as well as a special brake, hand operated, with the necessary attachments.

## ELECTRICALLY-FITTED MERKEL AT MIAMI STAND

OF particular interest to riders, present and prospective, who visited the stand of the Miami Cycle & Manufacturing Company, are the three models of the Miami Power Bicycle. The Model 16, chain-driven, with countershaft two-speed gearset and kick-starter, is mounted on a raised stand in the center of the booth. The various details, such as the two-speed, clutch and started used on this model, are shown separately. The Model 14, belt-driven and battery-ignited, and the Model 15, magneto-ignited and belt-driven, conclude the Miami line of motor cycles.

In the Flying Merkel series, the main attraction is a Model 675 twin, with Remy electrical equipment. This machine is colored blue and has the Merkel two-speed gear and foot starter, as well as the pedal gear. A Model 673, in Merkel orange, and a single-cylinder two-speed model complete the line.

## LIGHT TWIN MODEL IS CHIEF EMBLEM FEATURE

PROMINENTLY staged on a raised platform at the exhibit of the Emblem Manufacturing Company, is one of the Model 106 lightweight twins, just as it came in from Chicago over the roads. It is finished in Emblem blue and has the curved leaf-spring front fork members which characterize this model. A feature on this machine that appeals to the neat rider is a novel breather arrangement, the exit of which is by means of a special vertical passage formed on the forward boss of the primary chain guard.

This passage is rectangular in section and offers an outlet to any surplus oil on the front chain. The passage extends downward a short distance, but amply sufficient to drop the oil well below the crankcase and rear parts of the frame. The breather from the motor is through the hollow crankshaft on the left side, the surplus oil passing outward to the front chain and thence to the ground through the vertical passage.

In addition to the Model 106, a sidecar combination consisting of a sidecar "Beautiful" attached to a Model 100 twin, of 76.6 cubic inches and a solo twin of Model 108 of 67 cubic inches, make up the Emblem motorcycle line.

## READING STANDARD EXHIBIT DRAWS CROWDS

ALTHOUGH only three machines of Reading Standard brand are on display at the exhibit of the Reading Standard Company, there are few booths that are closer packed from the time of opening to the last hour of each day's session. The three machines, all in Reading brown, with the lustrous finish which has characterized this make of motorcycle for years, are: a 12-horsepower twin, with Roger sidecar; a 5-horsepower single, and an R-S van. Both the twin and single passenger machines are fitted with the new three-speed gearset on the countershaft, a foot starter, and the new "camelback" type of frame, giving an unusually low saddle position. They both have mechanical oilers, double control of clutch, and the firm's "Perfection" seat post, with springs within the seat tube. The van, a three-wheeler, is very similar to the model produced in 1915 for commercial purposes.

The three-speed gearset has but one sliding member, this incorporating two dental clutches and a spur pinion. The dental clutches are for the high and low gears, respectively, each meshing with a corresponding clutch fitted to a gearwheel loose on the main shaft, but meshing continually with another on the layshaft. The sliding pinion is meshed with a mate on the layshaft to give the intermediate speed. An ingenious lock to the shift, of the cylindrical type, is fitted, this lock being interconnected with the clutch and preventing any movement of the slider with the clutch engaged. The change-gear lever has a plunger in the ball grip, this plunger having a curved latch-piece which fits into similarly formed notches in a quadrant to correspond with the three-speed positions and a neutral point. The form of the notches ensures the rider stopping the lever at the exact position for a given gear.

The clutch is controlled by both foot and hand lever, the former not interfering with the setting of the latter. The brake is of the Eclipse band type and is actuated by a substantial foot lever on the right footboard. The starter is of the lever type, with folding tread, the lever being on the left and the sector and gear on the right of the gearset. The muffler is a perforated cylinder, fitting into the tail pipe, no pot or shell being used. The seat device is incorporated in the post tube itself.

The oiler is of the pump type, working 1:22 with the motor. It is driven from an intermediate gear in the magneto train. The tank is large, probably having the greatest capacity—9 quarts—in the show. The single-cylinder model is the most recent in the Reading Standard line, while the twin motor is similar to that of 1915, save that the valves and admission passages are enlarged, and a larger carbureter is fitted.

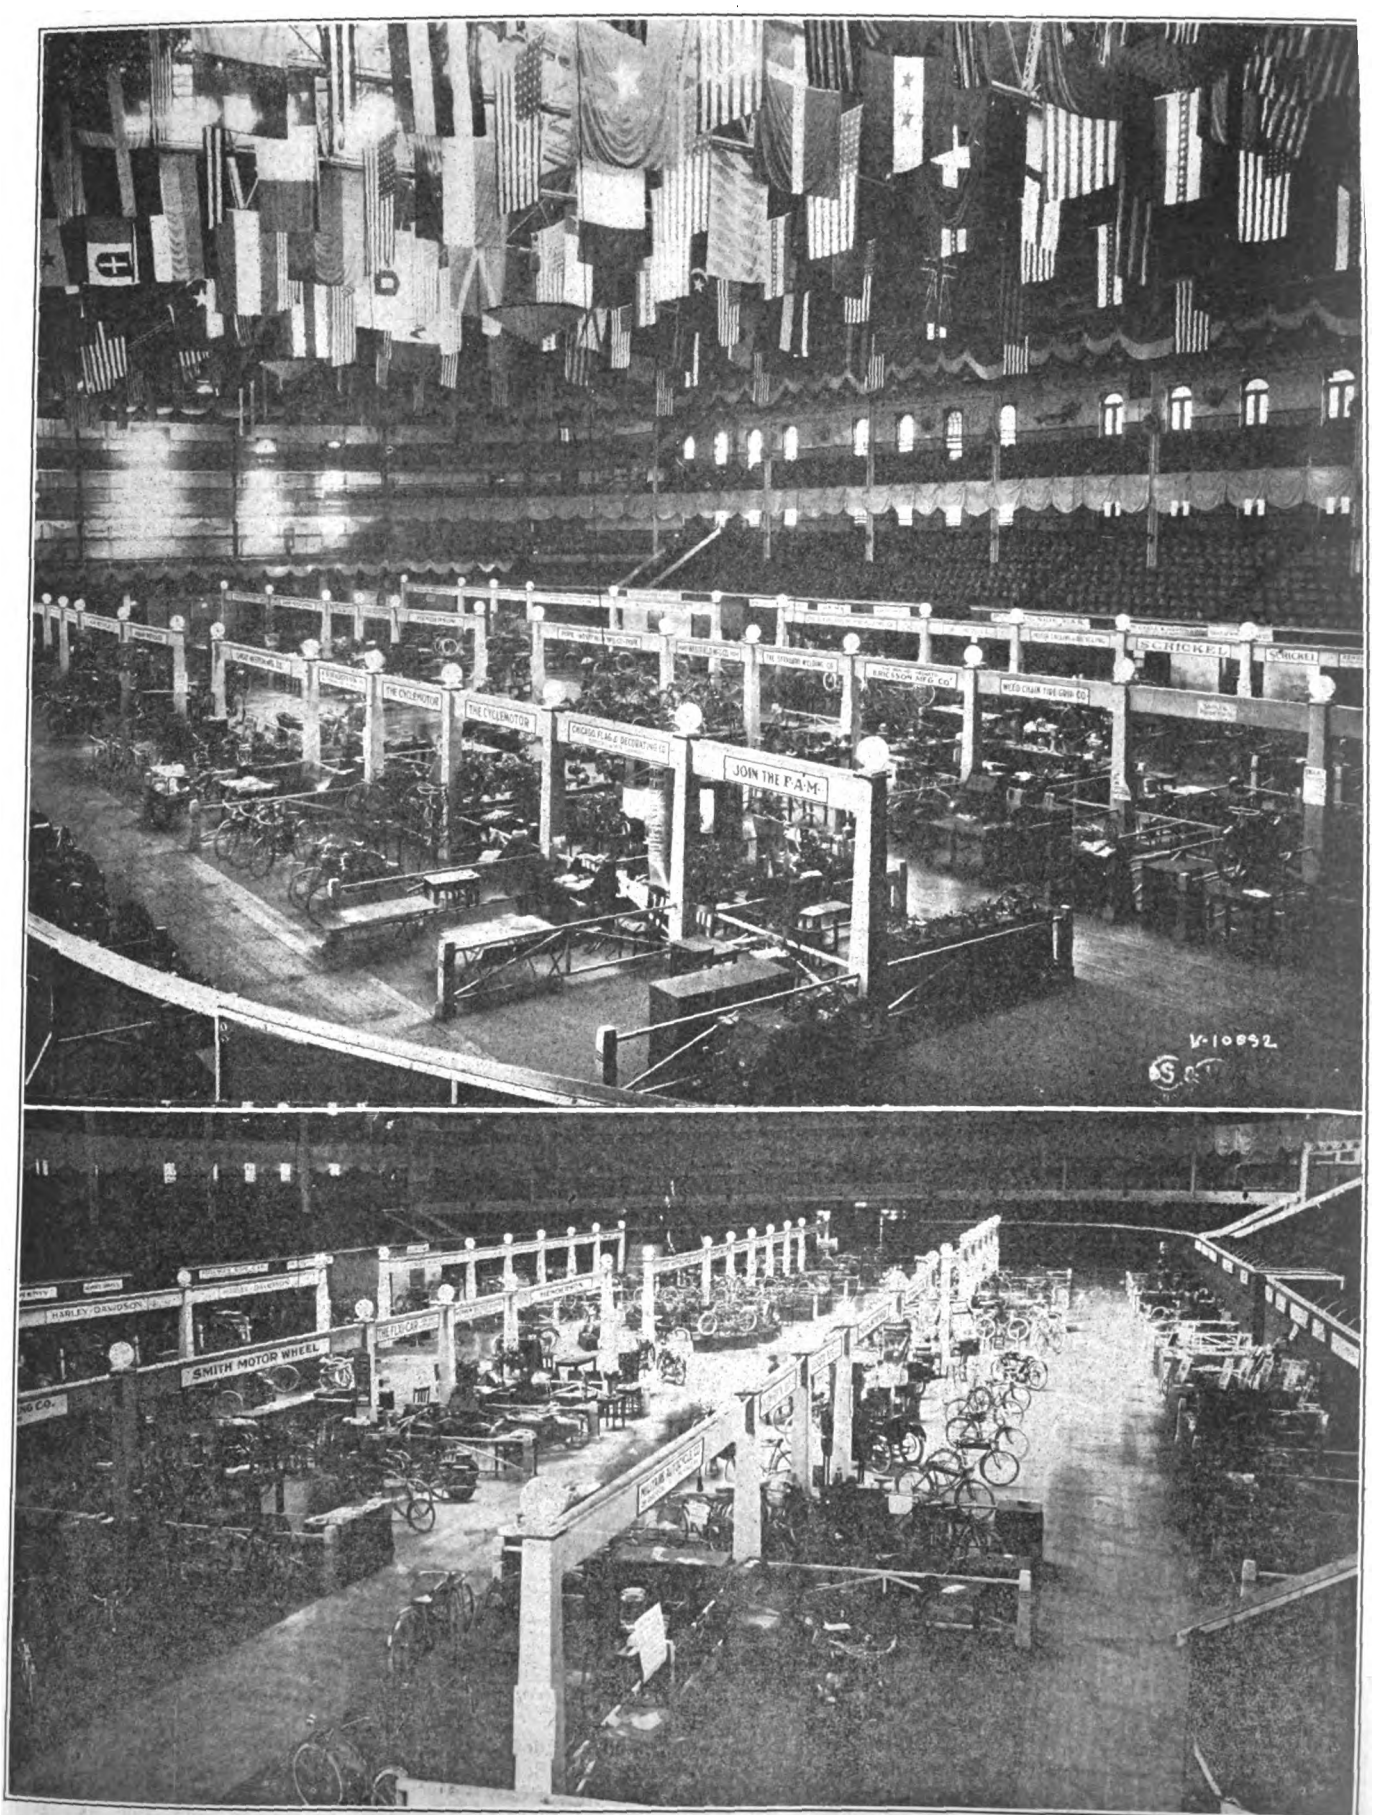
# TWO GENERAL VIEWS OF THE NEW YORK SHOW



**The Flags of All Nations Afford a Highly Artistic Setting for the Vehicle of All Nations—the Two-Wheeler. Note the Orderly Arrangement of the Booths and the Impressive Amount of Floor Space Occupied**

Digitized by Google

# AT THE MOTORCYCLE BOOTHS

What's New in Machines Since the Chicago Show

## HENDERSON IMPROVEMENTS FAVORABLY RECEIVED

FOUR models of the four-cylinder Henderson motorcycle are staged at the big stand of the Henderson Motorcycle Company. A two-speed model occupies a prominent position and is generally the center of the largest group in the exhibit, salesmen taking turns in explaining the fine points of the new machine. This model and the three others, all of which are single-geared, are fitted with the mechanical oiler an sight glass, the foot starter with its big dental clutches, the new starting-shutter on the air section of the carbureter and the combined hand and foot control of the clutch.

In addition to the machines, the various parts entering into the Henderson motor, gearset, and frame are attractively displayed on a large board, many of these parts being sectioned to show the construction. The gearset is shown in its several units, while the cylinder complete with its valves is sectioned to indicate its various internal details. The Henderson motors are of 61 cubic inch capacity for 1916, being smaller than those of preceding seasons.

## SPRING FORK AND SIDEVAN FOR SCHICKEL LIGHTWEIGHT

LIGHTWEIGHTS occupy most of the stand of the Schickel Motor Company, there being five of the little fellows on view. One of these has a spring fork of the coil type, the movable fork members having a coil spring at their united upper portion with the spring bearing against a specially-formed piece attaching to the steering head. This fork is at present fitted as an extra on the Schickel likhtweight model. Another lightweight has a commercial sidecar attached, this car being of such construction as to enable the motor to properly carry it loaded without trouble. The transmission on this model is of two-step construction, a V-belt driving the countershaft and a second V-belt driving from the countershaft to the rear wheel. This arrangement gives the desired low ratio of gearing for the added work of carrying the loaded sidecar. The body of the car is of wirework of capacity to take 100 pounds at least.

"Big 6" models are shown in two styles, one being flat belt driven and the other chain driven. A sectioned motor to show the Schickel principles of two-stroke construction occupies a prominent place on the stand.

## LADIES' MODEL OF DAYTON MOTOR BICYCLE

THREE Dayton motor bicycles, and three of the Dayton big twins are shown at the stand of the Davis Sewing Machine Company. Of the trio of motor bicycles, with the powerplant in the front wheel, two are gentleman's models, while the third is a drop-frame ladies' machine, the only one in the show specially adapted for a rider of the fair sex. The Dayton motor bicycle is fitted with a single-cylinder four-stroke motor, driving the disc front wheel through a reduction gear and compensating device and having a one-lever control on the handlebar. It is fitted with footboards and a substantial stand, as well as a special coaster brake.

Of the three Dayton motorcycles, one is a two-speed machine with the Dayton motor, another a two-speed fitted with the Spacke motor, and the third is a Dayton-motored twin with Rogers sidecar. All bear the new and neat Dayton insignia on the tanks and are finished in Dayton red. A three-speed Dayton, motored twin, is to be shown later in the week.

## TWIN AND FEATHERWEIGHT INDIANS ON VIEW

THREE speeds on everything with a motor in it, expresses the situation at the stand of the Hendee Manufacturing Company, where seven Indian motorcycles are on display. It would take a very acute observer to decide which model drew the greatest attention of the throngs that jammed the exhibit all day long, for the two-stroke Featherweight and the two models with Powerplus twins both have packed groups of devotees. Of the Powerplus models, four are shown with the Indian spring frame. Two of these have, respectively, a sidecar and a parcel car attached, while a third is fitted with the Splitdorf electric lighting system.

Of twins with the rigid frame there are two shown, both for solo work. The Featherweight is all by itself, but by no means lonesome, and stand attendants get hoarse explaining the different features of this model: three-speed gearset, kick starter, disc clutch, measuring cup, cartridge type spring fork and two-stroke motor. There are sections of the motor, of the three-speed gearset for the Powerplus models and a section of the regular Indian fork construction. The sidecar shown is the Indian Maid model for 1916 and the parcel van is similar to that brought out last season.

## NATIONAL GUARD EXHIBIT INCLUDES FIVE MODELS

UNDER the auspices of Captain Lorrilard Spencer, of the New York National Guard, is a military exihibit, located at the western end of the garden. This consists of an Indian sidecar combination, incorporating a regulation stretcher, a Harley-Davidson military model twin, with auxiliary oil and fuel tanks, painted the standard Russian war color; a 12-horsepower, three-speed Thor; an Excelsior three-speed twin, and an Indian outfit with Colt rifle-calibre automatic gun on special sidecar chassis. These vehicles are placed in an excellent position for viewing and form part of an extensive National Guard exhibit, which includes military engineering models (miniature pontoon bridges, surveying apparatus, etc.), hand, lantern and radio signalling apparatus and the heliograph. Motorcyclists are being enrolled at this stand for the volunteer motorcyclist section.

## MOSTLY MODEL V MOUNTS AT THOR BOOTH

THE Aurora Automatic Machinery Company, is showing six models of Thor motorcycles, four of these being light twins of Model V, while the remainder are of 12-horsepower model. All the machines are fitted with the countershaft three-speed gear, with dual clutch control and powerful brakes. One of the 12-horsepower models has a Rogers sidecar attached, and, like the entire display of mounts, is colored Thor blue and black.

The Model V mounts are fitted with the new Thor spring fork, of the single cylindrical type, long footboards and Thor spring seat post. The change speed and clutch levers are most conveniently located for the rider, permitting of easy movement, without interfering with leg grip or causing too great a motion of the hand from the bar. This model and the larger one are fitted with the new foot starter, acting on the countershaft member.

## WHITE AND GOLD CLEVELAND IS ATTRACTIVE

WITH black velvet as a background and set in a large painted frame, one of the Cleveland lightweights is the cynosure of all eyes at the stand of the Cleveland Motorcycle Manufacturing Company. The machine is pure white in color with gold striping and super nickel-plating, and is without doubt the most picturesque machine in the garden. So great has been the crowd each day, that the exhibitors have been obliged to erect a railing around the machine and its frame, otherwise the white enamel would soon become blackened from much handling.

Alongside of this beauty in white and gold is a gray-enameled Model 1-A, two-speed and disc clutch-fitted Cleveland, while a Model 1-B also occupies a space nearby. The stand has a neat cut-away section of the Cleveland powerplant, which incorporates the motor, gearset, clutch, cross-shaft, magneto and drive and front sprocket. A large board displays a number of parts entering into the power unit, each being removable in order that its construction may be examined. The universal joint, consisting of two steel discs with a thick fibre Maltese cross to allow for changes in alignment, is a most ingenious feature of the magneto drive.

## THREE-SPEED TWIN HEADS THE POPE LINE

LEADING the Pope line of motorcycles at the stand of the Westfield Manufacturing Company, is the three-speed twin Model R-16, with foot starter and combined clutch and brake operation on one lever. The Pope lightweight, Model H which has been on the market for six years, occupies a very prominent place in the exihibit, as does the Model L, single geared twin. A Model M, overhead valve single, is also displayed.

The three-speed twin has a novel-lockin

device on the shaft carrying the barrel cams which "select" the different speeds. An arm fitting into the notches on this locking plate prevents shifting the gears without withdrawing the clutch, and there is an interconnection between the clutch lever and the brake on the rear hub, so that when the clutch is withdrawn, a continued movement of its lever sets the brake.

## AUTOPED SHOWS INGENIOUS CONTROL FEATURES

SEVERAL specimens of a motor vehicle of unique construction are to be seen at the stand of the Autoped Company of America, the types being variations of the one model. This is the Autoped, designed to be ridden standing up, controlled as to steering by a long handle with a cross-piece, and as to motor speed, etc., back and forth motion of the handle and twisting grips on this cross-piece. The powerplant consists of a single-cylinder motor, driving the front wheel by gearing, with the fuel tank mounted above the wheel. The rear wheel is of the disc type and has a rolling motion only. It is fitted with a substantial mudguard. When not in use, the handle or steering pillar of the Autoped is lowered to the guard over the rear wheel and then latched.

## TIGER LIGHTWEIGHT HAS A UNIQUE MOTOR

TIGER lightweights, finished in tiger yellow with contrasting striping, are displayed at the exhibit of the Autobike Company, there being three of the one model shown. One of these has a neat electric lighting outfit, employing dry cells as the source of current, and having a powerful headlight and efficient tail lamp. The motor is fitted with two automatic mushroom valves, one establishing communication between the main gas passage and the combustion chamber, and the other acting as a check-valve between the carbureter and the gas passage. The sparkplug is mounted in the head of the motor just in the path of the incoming fresh charges. The transmission is by V-belt and a pedal gear and coaster brake is fitted.

## GIBSON MON-AUTO IS NOVEL TWO-WHEELER

A TWO-WHEELED motor runabout is the center of attraction at the stand of the Coalition Company, this vehicle being known as the Gibson Mon-Auto. It is designed to have the rider seated on top, the length being 48 inches and the greatest width overall being 18 inches, the rider being something like a foot from the roadway when seated. The Mon-Auto is driven by a single-cylinder, air-cooled motor of four-stroke type, with magneto in the flywheel and a 5:1 reducing gear to drive the rear wheel. The fuel tank is cylindrical and forms the upper member of the frame. The machine is steered by a T-handled arm, the back and forth motion of this arm operating the throttle and clutch and brake. A foot starter is provided. The total weight is 45 pounds.

## MILITAIRE AUTOCYCLE IN ONE MODEL ONLY

BUT one model of the Militaire autocycle is shown at the stand of the Militaire Autocycle Company. This machine, with its pressed steel frame of channel section, its rubber-tires idler wheels, wooden-spoked front and rear main wheels and its four-cylinder motor in unit with the gearset, is the center of much interest. The unique leaf springs in the compound front fork construction are frequently commented upon by most riders who visit the exhibit, and the stand attendants are kept busy with the numerous inquiries.

## SHOWING SOME NEW DETAILS ON VARIOUS MODELS

NEW details on several of the models shown in the Garden are given in the illustrations below. In several cases, the devices have been fitted to the machines since the exhibition at the Chicago Coliseum, last month.

In the vertical column at the left, and in that immediately to the right of the same, are constructional details to tbe found on the three-speed Reading-Standard single and twin cylinder models. The two Schickel drawings show new features for 1916, while the Harley-Davidson brake latch was first shown at Chicago, but has not been illustrated before. The Bosch GIEV apparatus was first fitted to any motorcycle at the opening night of the Garden Show.

## PLEASURE AND BUSINESS MODELS OF PULLMAN

PULLMAN sidecars adapted to instant attachment to Excelsiors, Indian cradle spring frame and rigid frame models are shown at the booth of the Harry Svensgaard Sales Corporation. The pleasure cars are finished to suit the motorcycle to which they are to be attached, an the one commercial model, a van with extensive rear platform, nicely railed, is finished in Excelsior gray. The frame of the pleasure model of Pullman is shown, with an auxiliary child's seat in its place with regard to the finished car. One of the cars is fitted with a Van Zile deflector.

## ROGERS SIDECARS SHOWN ON EIGHT MAKES

ROGERS sidecars finished to correspond with many different makes of motorcycle are displayed at the stand of Irving Beck, general representative for the Rogers Manufacturing Company, as well as at a number of motorcycle exhibits in the Garden. At the Beck stand, are two cars adapted to various Harley-Davidson models, one to fit the Indian and shown attached to a three-speed model of that make, and one for the Excelsior. Rogers sidecars are seen at the Miami, Reading Standard, Excelsior, Thor and Henderson exhibits also.

## FLXICARS ADAPTABLE TO ANY MOTORCYCLE

TWO Flxicars, the product of the Flxible Sidecar Company, are shown at the booth of that exhibitor. They are designed for and attached to an Indian and an Excelsior model respectively. The Flxicars have the side wheel arranged on a horizontal pivot with through link to enable the side wheel to incline with the wheel of the motorcycle. Demonstrations of the principle upon which the Flxicar operates are regularly made. The cars are adaptable to all makes of motorcycle.

## CORBIN PRODUCTS FORM EXTENSIVE DISPLAY

CORBIN-BROWN speedometers, Corbin coaster brakes and hubs are to be found at the exhibit of the Corbin Screw Corporation. The speedometers bearing the Corbin-Brown name are made with either front or rear drive and have been reduced in price recently, owing to increase in the number of sales. In fact, the price is now $12, with a corresponding reduction in list figures.

The Corbin-Brown speedometer is now made for lightweight models, the same instrument as on the large models being used but the cable being shorter. A sidecar model, minus bracket, however, is also to be seen. Each instrument has a safety or guide for the trip odometer so that mileage can be changed without at any time injuring the dials and connections.

Corbin coaster brakes for bicycles are shown in various models, including the two-speed coaster, which may be used for lightweights and bicycle models with motor attachments. The well-known Corbin Duplex motorcycle brake with V band is also on view.

## INTERESTING EXHIBITS AT WEED CHAIN STAND

PROMINENT in the stand of the Weed Chain Tire Grip Company, is the sidecar combination of "Jimmie" Walker, Weed traveler, just returned from a trip through fourteen States which totaled 13,418 miles. The sidecar rig, of Indian make, is in its third season, having been used by Walker for his trips during the last three seasons. Photographs of the roads and country traversed on his recent tour are nicely mounted on big cardboard sheets and give a good idea of the needs of Weed chains in cross-country work.

The full line of Weed chains is arranged in the booth, so as to be most effective in demonstration. The neat and compact bag in which a chain is carried often causes the visitor to become skeptical as to its contents until it is opened, so small is the package and so large the contents.

## NEW DEPARTURE FULL LINE ON EXHIBITION

COASTER brakes, bells and hubs spell "New Departure", almost at the mention of of the names of these articles and naturally the booth of the New Departure Manufacturing Company shows a full line of all of them. Very prominent in the booth is the literature devoted to the bicycle boosting campaign, the literature and a series of large swinging panels being finished in an orange tone. This campaign is for one million bicycles for 1916, and the firm is going after that number with all its forces.

The coaster brakes vary in size from those for light roadster bicycles to those for the heaviest twin motorcycles. Bells shown are single stroke, electric and plain chime, and are in size up to three inches diameter. Bicycle and motorcycle hubs are on view in a variety of sizes.

## SUPERIOR SADDLES INCLUDE 13 BICYCLE TYPES

SUPERIOR motorcycle and bicycle saddles in profusion are to be seen at the stand of the Superior Metal Products Company, in connection with a variety of bicycle tool-bags and saddle clamps. In the motorcycle saddle, the rear of the frame is carried by volute flat alloy steel springs, attaching to the main frame at the apex of each volute. The frame or base is of steel with rib reinforcements.

Bicycle saddles under the Superior trade-mark appear in 13 models, of which one is a ladies' and two others are juveniles. Most of the seats shown are fitted with the firm's shock absorbers, a spiral spring operating in a cylinder at each side of the rear in each model, in addition to the volute spiral round section springs above. Several models have single sets of reversed volute springs, while the lighter ones shown have spirals of few coils and great pitch. The tool bags are of various forms, with both two and three straps and patent fasteners.

## FEW "OLD SOLS" MISSING AT HAWTHORNE BOOTH

"OLD SOL" head and tail lights, with those adapted to sidecar service are seen in abundance at the booth of the Hawthorne Manufacturing Company, in both acetylene and electric models. Beginning with the "Old Sol" No. 8, the acetylene series runs through the No. 17, No. 1, 13, No. 5 generator, and Nos. 38 tail lamps and No. 14 generator. U. B. T. bracket No. 1 and A. J. B. No. 8 bracket is shown.

In the electric motorcycle series, tail lights 33 and 37 are to be seen, as well as searchlights 6 and 6 S. S. In the bicycle acetylene series, the Nos. 3 and 10 lamps and the No. 23 lamps with red rear signal are prominent, while in the electric series are Outfits Nos. 50, 53 and 18. Lamp No. 32 and Outfit No. 55 are shown as well as the No. 4 headlight outfit with two dry cells in iron casing, the casing being attached to the top tube of the cycle frame.

## UNIVERSAL VALVE AND PARTS ARE SCHRADER FEATURES

MOTORCYCLE, bicycle and automobile tire valves of Schrader make and parts for the same form the major part of the exhibit of A. Schrader's Son, Inc. The Schrader tire gauge and valve repair tool are also exhibited.

The Schrader Universal valve insides are packed in fives in very convenient tin boxes of small size, the boxes being dustproof and grooved to keep each inside apart from the others. The valves include the 609 bicycle type, the 761 for single tube repair work in both bicycle and motorcycle tires, the G. & J. shoe valve No. 1022 for double tube bicycle and motorcycle tires and the oval base valve No. 820 for single tube repairing. The Schrader gauge is registering and is put up in a neat purse for protection.

## MOSSBERG EXHIBIT IS GOAL OF TOOL LOVERS

MOTORCYCLISTS and other users of wrenches, and small tools find their Mecca at the booth of the Frank Mossberg Company, where kits and individual

Company's Stand**

tools are set out to view. Each kit or set is mounted on a card explaining its name and other details. The most prominent of the sets is the Quickkit A, with its few but effective tools; this set has been made up especially for the motorcycle rider.

Engineers' wrenches in sets are also to be found at the Mossberg exhibit, as are also service wrenches in kit and separate. Display stands show the various tools produced by the maker, and practically the full line can be seen.

## KORD TIRE ATTRACTS AT KOKOMO STAND

KOKOMO KORD tires with their characteristic double layer of cord in the carcase are featured at the stand of the Kokomo Rubber Company. These tires are noticeable for their jet black sides of high class rubber, for the double-grooved white tread and the heavy black rubber inner tube.

The layers of cord are wound at right angles to each other with a black rubber layer between. The cords do not run across the tire but diagonally to take strain in the best possible manner. The construction makes the tires very difficult to puncture or blow out.

## HECO HAND HORN FEATURES HEINZE LINE

HECO motorcycle hand horns head the list of exhibits at the stand of the Heinze Electric Company, the remainder of the booth being given over to magnetos of various types. The hand horn is of the rotating type with the rotor teeth engaging a contact on a diaphragm. The rotor is operated by a worm working within a nut on the rotor, the worm being formed on the handle of the apparatus. A ratchet clutch allows of over-running.

The horn has the diaphragm contact screw adjustable for tone and the whole horn is waterproof. The range of tone is a wide one. Heinze magnetos have magnets of circular cross-section and are adapted for use with lightweight machines as well as the regular motors.

## BRAKES AND CLUTCHES FORM ECLIPSE EXHIBIT

MORROW coaster brakes, Eclipse free engine clutches and front and rear hubs are shown at the stand of the Eclipse Machine Company, and this firm's products are also to be seen on many motorcycles and bicycles in the Garden also. The Morrow coasters are designed for bicycle service only, while the Eclipse hubs are made in both motorcycle and bicycle types.

The Eclipse free engine clutch is made in both countershaft and motor shaft type, for chain drive, and in motor shaft type for belt drive. The two-speed gear to fit in the hub is also shown. The display is typically comprehensive and practical.

## BERLING MAGNETOS FOR ALL IGNITION WORK

SEVEN models of Berling magneto for motorcycle ignition are to be seen at the booth of the Ericsson Manufacturing Company, in connection with a number of machines for 4, 6, 8 and 12-cylinder automobile and aviation service. The largest of the motorcycle models is the N-44, for four-cylinder ignition, as on the Henderson and F. N. machines.

The N-21 model, which like the other Berling magnetos for motorcycle ignition is of the true high-tension type, is adapted for twin motors of any power. There are two of these shown, one in connection with a group of all-motorcycle machines and the other on an exhibition stand. The US-13, for small single cylinder motors and the US-21 for small twin motors are also on view in a similar arrangement. The 8 and 12-cylinder magnetos are of the double distributor type.

## MAIN SCHEBLER EXHIBIT IS MODEL H CARBURETER

MODEL H Schebler carbuerters occupy the Wheeler & Schebler exhibit at the Madison Square Garden. It might also be said that they are on practically every model of motorcycle in the show, also, so that the seeker after Schebler carbureters need only traverse the various aisles to see them ready for use.

The Model H, often known as the Motorcycle Schebler by its admirers, is made in ¾ and 1-inch sizes, and incorporates the movable needle-valve operated by a cam attached to the throttle lever. The spring-loaded auxiliary air valve, with starting device and knurled knob adjustment are other features of this mixture-producing device.

## BULB AND MECHANICAL HORNS MARK NONPAREIL DISPLAY

BULB horns and the Bee-Jay mechanical alarm are shown where the Nonpareil Horn Company has its show headquarters. The bulb horns vary in size and tone to suit the most critical of riders and all are provided with sturdy clamps, which will withstand heavy service. The mechanical horn is of the vibrating diaphragm type, the motive power being a push on the handle by the rider, this push acting by a toothed wheel on a contact attached to the diaphragm.

The Bee-Jay mechanical horn is attachable to any machine and is positive in its sound-giving qualities. It is water-proof and will not go dumb during its lifetime.

## REMY GENERATOR HAS MANUAL IGNITION SWITCH

REMY generators in both assembled and cut-away models are featured at the booth of the Remy Electric Company, and there are all of the important component parts to be seen close at hand. A number of changes in construction have been made in the generator since the 1915 model was put on the market, one being in the use of a manual switch in place of the vacuum system controlling the ignition. There is a heavier spring on the distributor and the gear on the main shaft is fitted in place with two Woodruff keys in place of the one used in 1915.

The condenser is made much larger and is metal-covered, the Bakelite casing having been discontinued. In order to render the distributor dirt and liquid-proof, there is a felt washer placed between the body and the cover. The Remy generator is shown on a Model 16-J Harley-Davidson mounted at the exhibit and is also to be seen on a twin model of Flying Merkel motorcycle, at the Miami stand.

## HAVERFORD HAS SIDE-SEAT AND MOTOR WHEEL

MILLER Triplex side-seats and the Smith Motor Wheels are the chief exhibits at the stand of the Haverford Cycle Company, the stand being held by the Philadelphia headquarters of the company. Three of the Miller devices are shown with the addition of one in miniature.

The Smith Motor Wheel, for which the exhibitor is agent in various cities is seen attached to one of the firm's line of bicycles. A number of accessories handled by the various Haverford branches are on view.

## DUCKWORTH CHAINS SHOWN IN WIDE RANGE

CHAINS for bicycles and motorcycles, in connection with a chain and sprocket gear, are displayed at the booth of the Duckworth Chain & Manufacturing Company. The motorcycle range varies from pedal chains for lightweight models to the ⅝ x ⅜ inch heavy duty roller type for the most powerful twins.

In the bicycle line, the Duckworth chain series shows roller and block types varying from ½ inch. All chains are shown suspended on a neat board, but capable of being handled and in good contrast with one another, being graded according to size.

## SOLAR CYCLE LAMP LINES ARE MOST EXTENSIVE

SOLAR lamps for motorcycles and bicycles in both gas and electric models are shown in connection with brackets for the various models at the exhibit of the Badger Brass Company. The motorcycle line includes headlights of varying power from the small one often employed as markers on sidecars to those whose candlepower reaches into four figures. Finishes are in full nickel for the most part, but black and nickel are also to be seen.

In the bicycle section of the Solar exhibit, separate generator and self-contained models are on view. Solar lamps have had an excellent reputation since the dawn of the safety bicycle era and have held their standard high down to the present time.

## AIR CUSHION MODEL HEADS MESINGER LINE

SADDLES for both motorcycle and bicycle service are installed in numbers at the stand of H. and F. Mesinger Manufacturing Company. The leader in the motorcycle line is the Air Cushion Superba, incorporating spiral springs and air cushions located in cylinders at the rear of each side of the cantle. The top of this model is non-stretching and the upholstery is deep.

The leading saddle in the bicycle line is the Standard No. 2, having the rear springs arranged in spiralss in decreasing diameter, with interior cylinderical springs. On compression, the outer springs close their coils and the inner springs decrease their pitch, thus giving an excellent shock absorbing action. In addition to the saddles, the Whittle belt for motorcycles is shown at the Mesinger booth. This belt has a metal plate foundation, with the leather fastened to pins projecting at right angles.

## STANDS AND CARRIERS AT MARKET FORGE BOOTH

BICYCLE stands, luggage carriers, delivery baskets and lamp brackets are shown at the stand of the Market Forge Company. The stands, carriers and delivery baskets are made of flat metal stock, nicely enamelled black and made very strong. The "Maforco" lamp brackets are shown in both motorcycle and bicycle types and in two types: adjustable and rigid. Samples of the firm's motorcycle footrests and number plates are on view.

## NEW JUNCTIONS AND FUSEBOX FOR SPLITDORF

TO such a level of excellence has the Dixie magneto been developed that novelties in its construction are practically impossible. Consequently, at the Splitdorf Electrical Company's exhibit in the Garden, new things are to be found among the minor details of wiring in connection with the lighting systems which employ the firm's Mag-Dynamo.

Three types of junctions and an ammeter with clamp to fit the motorcycle top tube, along with a new fusebox, are the sum total of new things on view at the Splitdorf stand. The junctions are made straight tee for one cable in each arm; tee for two cables in one arm and one in each of the others and straight junction, for two cables in one end and one at the other. The junctions are all strongly insulated and have sturdy means of securing the cables in place.

The ammeter has a black casing and is fitted with a washer below the cover glass to keep it water and dust proof. Its base bolts to a flat "foot" to which are attached the two clamp pieces with lower ends to embrace the top tube of the motorcycle. The securing nut and bolt are above the tube. The ammeter is dead beat and reads in charge and discharge as well as in amperes.

The fusebox has the fuse in the center with the connections to cable ends direct. It is so arranged that no short-circuiting is possible when the cover is in place. The cables enter large insulated lugs before attaching to the fuse-carrying fingers.

Dixie magnetos shown are the No. 11, the S1 for lightweights, the M1, for single cylinder motors, and the M2 for twin motors. The No. 11 is for foreign as well as domestic motors, and has been used much for British motorcycle ignition. The Splitdorf Mag-Dynamo is in operation on an exhibition stand.

**The Number of These Exhibits and Their Variety Contribute Much to the Busy Atmosphere of the Garden Show**

## LOBDELL RIMS IN WOOD AND COMPOUND TYPES

LOBDELL wooden and steel-and-wood rims neatly arranged were on display at the booth of the American Wood Rim Company. The wood rims are for bicycles while the steel-and-wood rims are for motorcycle service primarily. The latter rim is made in 28 inches only, while the wood types are to be had in a variety of sizes and finished in different colors.

The Lobdell rim is one of the oldest and best known in the bicycle field, and is used on many of the highest class of bicycles made.

## EXIDE BATTERIES SHOWN FOR MOTORCYCLE USE

EXIDE batteries for motorcycle service, mostly to be used in connection with an electric generator, are to be seen at the booth of the Electric Storage Battery Company. These batteries are of the sulphuric acid electrolyte type, and are arranged with non-leaking vents.

The Exide battery is one of the oldest in point of service in any line in the country, having been introduced for vehicle propulsion and ignition before the motorcycle was manufactured in this country.

## PATTERSON SHOWS MOTOR WHEEL AND SUNDRIES

A. H. PATTERSON has an exhibit of which the main feature is the Smith Motor Wheel, the exhibitor being a Brooklyn, N. Y. distributor for this attachment. The booth shows a variety of accessories, such as the Leonard lamp bracket, for Prest-O-Lite tanks, and the Sturmey-Archer three-speed hub for bicycles.

At the Patterson stand is a wide range of clothing and caps, this line including footwear and general comfort articles for the rider. The Stevens line of accessories is shown in addition.

## STANDARD WELDING EXHIBIT IS INTERESTING

RIMS and complete wheels are the most noticeable constructions at the front of the exhibit of the Standard Welding Company, but these do not include the complete line of that firm's goods. Formed motorcycle parts are regular things with the firm, numbers of these are to be seen at the booth, but many more on the machines themselves at the show.

Standard Welding goods have been noted for their excellence for years past and have been on American motorcycles almost since the beginning of the industry itself.

## RENOLD CHAINS EXHIBITED IN COMPLETE SETS

RENOLD chains in complete sets are to be found at the stand of Peter A. Frasse & Company, Incorporated. In the motorcycle set, the range is from the ½-inch starter and racing chains up to the ⅝ x ⅜ inch Special Service model for the biggest twin motors. Smaller chains than those mentioned are also on view, these including the ½ to ¾ inch pitch types.

In the bicycle set, in which both block and roller types are to be found, the line is from the one-inch pitch block with ⅛-inch width to the ½-inch single roller type with one-inch pitch twin roller chain.

## BUFFALO SPECIALTY SHOWS USEFUL COMPOUNDS

AT the booth of the Buffalo Specialty Company are to be seen containers of the Hosmer ball-bearing compound and soapstone for tire service. The ball-being compound is a non-acid substance especially mixed to give the best lubrication possible for this type of shaft-carrying bearing.

More familiar to the cyclist, whether motor or pedal, is the Neverleak tire-stopping compound, of which this firm has been the maker for years. The substance has a most extensive use and its familiar two-color label is seen in practically every repair shop and agency in the country.

## SADDLES AND TOOLBAGS AT PERSONS' BOOTH

PERSONS' saddles, headed by the Pan Dandy in the motorcycle series and by the Zenith in the bicycle line, are, with an assortment of tool bags, shown at the stand of the Persons Manufacturing Company. The tool bags are on view in five styles for motorcycle and in nine styles for bicycle equipment.

The motorcycle line of Persons' saddles includes the Pan Dandy, Champion and Duplex Champion, among others. The bicycle line includes the Zenith, Imperial, Spartan, Colonial, Saxon, Sterling, Roadster, Special, Peerless, Overland, Old Comfort, Apollo, Tuxedo, Bon Ton, Cantilever, Motobike, Road Racer, Track Racer and Model B. For ladies there are the Trophy, Old Comfort and De Luxe. Twelve styles of padded saddle, one of which is for juveniles, are also exhibited.

## STOLL TANDEMS DISPLAYED IN VARIOUS MODELS

STOLL DREAM and other models of tandems are seen at the exhibit of the Stoll Manufacturing Company. One of the models is shown fitted to a Harley-Davidson motorcycle, and delineates clearly the fact that this firm's goods are readily adaptable to any form of rear construction on a motorcycle.

The Stoll tandems still keep up their reputation for easy riding and speed and ease in attaching or detaching from the motorcycle, if appearances are any indication to that effect. Most interest is taken by show visitors in the more moderate-priced Stoll goods, although there are many sheep's eyes cast on the de luxe tandems.

### BUSH RETURNS TO ECLIPSE

G. S. Bush, traveler for the Eclipse Machine Company in 1909 and 1910, and more recently manager of the Boston branch of the American-La France Company, fire apparatus manufacturers, has again joined the Eclipse sales force.

### GIBSON MON-AUTO

This novel little vehicle is the invention of Hugo C. Gibson, who is seen holding it in the picture at the left. It has several unique features, among which are a magneto in the flywheel, the control of spark, throttle and brake by a movement of the handle back and forth, disc wheels with demountable rims, and combined tank and top-frame member. The Mon-Auto weighs 45 pounds and is readily carried by its rider.

## GETTING DEALERS INTERESTED IN TRACK PROJECT

Kansas City, Mo., October 9.—Plans are being made by the local speedway association to get motorcycle dealers interested in its project—the building of a large track at Overland Park. Automobile dealers have been generous in subscribing for the stock of the association, and because motorcycle as well as automobile races will be held on the proposed track it is believed that the two-wheeler men will soon swing into line and take a financial interest in it.

## RACING AT DUBOIS, PA.

In a 10-mile motorcycle race around a half-mile dirt track at the DuBois, Pa., Fair, September 30, the Indian won first place with Cohen, of Altoona, up. Time, 12 minutes, 36 seconds. Two races were scheduled, but rain spoiled the second.

# OUR ARTIST SAYS THESE TYPES REALLY ARE AT THE SHOW

### THE BOULEVARDIER

". . . And sand! Why, man alive, this piece of landscape I'm telling you about was so porous that in spots I had to carry out-riggers on my motorcycle to keep it from dropping plumb through. It was something like the Sahara Desert, I reckon—only sandier. And every so often I went ker-swosh! into one of those arroyos, or whatever they call 'em; I always hit the drop wide open, hurdled the rocks at the bottom and busted up the other side lickety-split—with more rocks knocking the bottom off my crankcase, sand piling down on top of me by the half-acre and the sun peeling all the nickel off my handlebars. And the mountains! Whew!! Up one side and down the other, just like that. They seem to be steeper out there, and slipperier, and the rocks are rockier; and at nearly every turn I had to dodge a landslide. But I just kept a stiff upper lip and whooped the old boat through some way—gol-ding 'er. That's my gait. . . ."

### MR. MILE-A-MINUTE

". . . And the motor-cop flashes a paper on me and says 'Set your alarm-clock for 7:30 in the morning—the judge'll be waiting for you!' Can you beat that? And I was only creeping along at four miles an hour, or maybe four and two-thirds. Honest to goodness! Sometimes I make as high as eight or nine miles per, but I ain't speed crazy, and as long as I'm out in the air and enjoying the scenery I'm satisfied. I wouldn't break a speed law in a million years, I wouldn't. It hurts the motorcycle game, and besides a fellow takes too many risks. I'm off that stuff.

"Let the speed-boys go after the records—that's what I say. They get paid for it. Why, listen: I've got this here bus fixed purposely so's she can't travel faster than a dog-trot; I want to set a good example for the bugs that don't know any better than roar up and down the country, hitting the high spots. Say, do I look like a guy that would ride 72 miles an hour, run over twelve chickens, two ducks and a funeral and then sass a motor-cop the way that fellow says I did? Not much. There must have been something crooked with his speedometer. Every cop has to make an arrest once in a while, and I suppose this feller just needed me to help him out. Well, I'll give the judge an earful in the morning. I don't see why they have to pick on me. Wouldn't it get your goat?" . . .

### MRS. AVOIRDUPOIS

". . . Of course, it's very fine to have a sidecar if a person is getting stout, or happens to be nervous, or doesn't take a genuine interest in outdoor pastimes, but we have always managed so gor-r-rgeously with our dear little tandem seat that I just can't give it up. It seems so much more comraddy, don't you think, for a girl to sit right up like a little sport behind her hubby and help him run the motorcycle. That is, if she's not clumsy. I do love to help.

"What's that—it nearly pulls your arms out of the sockets to hold the machine in the road when my weight is on the rear? Well, there must be something the matter with your arms; I know I haven't gained a pound since we were married and many a school-girl would give something to be as agile as I am. I simply take a good grip on the back of your collar, and no matter how rough the road is, I feel perfectly safe and comfy. I can understand why some people ought to ride in sidecars—they can't help being unwieldy, poor souls—but as long as I'm spared my figure I certainly want to be right on the machine, where I can help you in an emergency. I don't mean to say anything against the sidecar, but as long as I weigh only 190 pounds I want my little tandem."

---

### FRAMED CLEVELAND IS HANDSOMEST MOUNT SHOWN

Nothing prettier has been seen at a motorcycle show, or an automobile show, for that matter, than the beautifully framed machine which features the Cleveland lightweight exhibit. The motorcycle, perfectly enamelled in white, is shown against a black velvet background, under a powerful illumination. It is unquestionably the handsomest exhibit at the Garden.

### OPENS REPAIR SHOP

Baltimore, Md., October 12.—George A. Gebhardt, the well-known motorcycle racer, and who was formerly connected with Howard A. French & Co., the Indian agent, has gone into business for himself. He has opened a store at 535 West Baltimore street, where he will do repair work and carry a full line of motorcycle accessories. Gebhardt obtained a thorough knowledge of the motorcycle by spending considerable time at the Indian plant.

# M. M. A. TO CONFER WITH OTHER TRADE BODIES CONCERNING SHOW DATES

THAT the bicycle, accessory and parts manufacturers, as well as the jobbers, should be invited to co-operate with the Motorcycle Manufacturers' Association in determining the best time and place for the National Motorcycle, Bicycle and Accessory Shows, was the most important decision arrived at by the M. M. A. in its session Wednesday morning, October 13, at the Prince George Hotel, New York City. It was also the sentiment of the meeting that this year's shows were held a little too early.

### Coffman's Chicago Report

The report of Show Manager A. B. Coffman occupied a good part of the time. An interesting feature of it was the statement that the door receipts at this year's show in Chicago were only $7 less than in 1914, although the show, generally speaking, was not as remunerative as in previous seasons. The slight falling off in door receipts was amply offset from a trade standpoint by the fact that 1,250 dealers visited the Chicago show this year, as against 900 dealers who were on hand in 1914. That the smaller number of admissions paid this year was due entirely to the early date none of the manufacturers was ready to say. It was pointed out that weather conditions during the 1914 show were particularly favorable, while general business was on a plane to have an additional stimulating effect. Conditions this year were not so favorable.

The New York Show, about which Manager Coffman could say but little at the moment, was pleasing to all. It was stated that the business being done both at the door and in the booths was greatly in advance of that at Chicago.

In calling for expressions of opinion from the various members in attendance concerning the show date and the advisability of having the bicycle manufacturers, parts makers and accessory men co-operate on the plans, President Henderson pointed out that the early show dates were unfavorable to the jobbing trade, and that at the same time the arrangement was not ideal for the makers of motorcycle parts and fitments. This, he explained, is due to the fact that the models are brought out at the last minute before the show, so that those who are accustomed to produce new devices and attachments for the models have no time to inspect them and develop their ideas.

### Plan Conference of Committees

Mr. Huffman moved that the secretary be directed to write to the president of the Cycle Parts and Accessory Association, and also to the president of the Cycle Jobbers' Association of America, with a view of having these associations appoint special committees to confer with a committee of the M. M. A. This action, he argued, would bring to a head definitely the show date question. The meeting of the committees will be held during the week of the New York automobile show, December 30 to January 8, the exact date to be named in the near future. At the same time the secretary was directed to write to all bicycle makers not represented in any association for an expression of their opinion regarding the logical dates for the annual shows.

H. N. Kirk, of the Thor, seemed to strike a harmonious note when he stated that an early show was all right to bring in dealers, and only dealers, but that a later date is necessary if the retail trade is to be properly interested. President Henderson supported Mr. Kirk in this opinion. It was his belief, based upon experience, that the Henderson would have obtained a fair proportion of the business written up at the present show, whether the show was held or not, and that to stage an early show to bring in business that his company would get anyway was, in his opinion, somewhat inconsistent. It was pointed out by Manager Coffman that a later date would allow him more time to work out the show details, and he argued that it should result in better all-round returns. While no action was taken toward setting a definite date for the next annual show, it was the consensus of opinion that late January or early February was about the right time.

### Victory at Washington

It was decided, in view of the fact that the legal action work comes in fits and starts, to dispense with Legal Action Chairman Johnson's services on a salary basis and to make some other arrangement with him whereby the same results will be accomplished.

It was carried that the resignation of the Excelsior Motor Manufacturing and Supply Company be accepted with regrets. At the same time two new members were taken into the organization—the Autobike Company, of Chicago, and the Schickel Motor Company, of Stamford, Conn.

President Henderson explained what had been done at Washington by the M. M. A. committee recently appointed to confer with Postmaster General Burleson over the matter of using motorcycle sidevans in R. F. D. service. The committee, made up of George M. Hendee, Walter Davidson and Ignatz Schwinn, succeeded in getting the postal authorities to alter their ruling concerning motor vehicles in such a way as to permit of using the motorcycle with sidecar or sidevan, provided the vehicle had ample capacity and was so built as to fully protect the contents from the elements.

### Those in Attendance

Mr. Weschler and Mr. Henderson both reported that the thirty-day guarantee clause had been favorably accepted by their dealers, while Mr. Davidson stated that in only a couple of instances had there been any objection to it on the part of Harley-Davidson dealers.

Following are the manufacturers who attended the meeting: President T. W. Henderson (Henderson Motorcycle Company); Treasurer Arthur Davidson (Harley-Davidson Motor Company); C. S. Beardsley (Autobike Company); H. N. Kirk (Aurora Automatic Machinery Company); W. G. Schack (Emblem Manufacturing Company); F. J. Weschler (Hendee Manufacturing Company); J. P. Fogarty (Westfield Manufacturing Company); Horace Huffman and John Webb (Davis Sewing Machine Company); W. S. Quinlan and H. G. Alexander (Cleveland Motorcycle Company); D. W. Donley and J. F. Treat (Schickel Motor Company).

The next meeting of the M. M. A. will be held at the Hotel Astor, New York, on Saturday, January 5.

## TWELFTH ANNUAL TRIANGLE RUN A PLEASANT ONE

Providence, R. I.—The twelfth annual Triangle Run of the Providence Motorcycle Club, which had been postponed from October 3 on account of rain, was held on Sunday, the 10th, and although all the entries did not appear the run was a big success and the weather was fine. The riders were checked out of Providence beginning at 7 a. m.

The first checking place was Boston, the riders checking out at 10 o'clock for Worcester, and checking out from Worcester at 1 p. m. for Providence.

The feature of the run was the driving of Miss Mildred Perkins, of Lowell, Mass., with Miss Curran as passenger. Miss Perkins drove an Indian, with Indian sidecar, and was always with the leaders. Little Eddie Swenson, as last year, drove a machine over the full course with the referee as passenger. Eddie is now fifteen years old and has run a machine regularly since 1913.

The perfect scorers in the Triangle Run were as follows: Miss Mildred Perkins, Miss Mary Curran, W. E. Goodwin, A. Semple, of Lowell, Mass.; W. F. Smith, Newport, R. I.; T. A. Lutz, A. J. LaCouture, Pawtucket, R. I.; J. G. Edwards, Geo. Boutelier, E. A. Swenson, B. A. Swenson, D. W. Gravell, W. E. Emins, Providence, R. I.; E. S. P. Hawkinson, E. Rask, Crompton, R. I.; John Sheeley, Anthony, R. I.; Geo. W. Kent, Danielson, Conn. All but Mr. Kent were mounted on Indians. Mr. Kent rode a Harley-Davidson.

## ASK CITY TO BUILD TRACK

Berlin, Ontario, October 12.—Steps were taken at the annual banquet of the Waterloo County Motorcycle Club at the Hotel Ewald, Berlin, Ontario, to interest this city in the establishment of a public park in which one of the features would be a mile speedway for motorcycle, bicycle and automobile racing. To keep matters rolling in this particular a committee of eight was chosen. These include President O. Olson, of the club; A. Walker, J. Neuber, A. A. Butler, A. Sehl, Irvin Weber, L. Henhoeffer and N. C. Hellmuth.

Several officials of the club, including Hon. President A. Sehl, President O. Olson. Secretary A. Butler, Assistant Secretary George Martin and Roadmaster George Bach, spoke on club topics.

# FINAL SCORES ANNOUNCED IN HACKENSACK RUN

FINAL scores in the run of the Hackensack M. C., held on October 3, show that T. K. Lee, Harley-Davidson sidecar, heads the list with 996 points, and Orrie Steele, Indian sidecar, comes second with 995. For third place, Elmer Havenstrite and J. W. Terhune, both with Harley-Davidson sidecars, are tied, each having 994 count.

The Professional Sidecar Cup goes to Orrie Steele, with J. W. Terhune second. The Amateur One-Speed Cup is awarded to A. Rhodes, Jefferson, with a score of 856, while the Three-Man Amateur Team Cup goes to G. Barr, Indian, F. Edwards and P. B. Garrison, both on Harley-Davidsons, with a total score of 2,894. The team composed of J. B. Werner, Harley-Davidson sidecar, W. Connelly, Indian sidecar, and F. Gross, Harley-Davidson sidecar, was second for this cup with 2,880. John and Orrie Steele and J. W. Collins riding as a team, win the Professional Team Cup, having a score of 2,974.

High score for Professional Sidecar Cup, Orrie Steele, Indian, 995; second, J. W. Terhune, Harley-Davidson, 994. Amateur One-Speed Cup, won by A. Rhodes, Jefferson, 856 points. In the Three-Man Amateur Team competition, the mixed team composed of George Barr, 983, F. Edwards, 957, and P. B. Garrison, 954, won, with a total of 2,894, over the team composed of J. B. Werner, 972, W. Connelly, 964, F. Gross, 954, totalling 2,880.

Professional Team Cup won by Orrie Steele, 995, John Steele, 992, J. W. Collins, 987, all on Indians. The F. A. M. Club Cup goes to the Hackensack M. C., score 5,984; the Haledon M. C. being second, with 4,950, and the Passaic M. C. third, with 3,764. The Indian M. C., with 3,746, was fourth, and the Arrow M. C. was fifth with 695 points.

**Tabular Standing of the Hackensack Contestants**

| Rider | Score | Machine |
|---|---|---|
| T. K. Lee | 996 | Harley-Davidson Sidecar |
| Orrie Steele | 995 | Indian Sidecar |
| J. W. Terhune | 994 | Harley-Davidson Sidecar |
| E. Havenstrite | 994 | Harley-Davidson Sidecar |
| John Steele | 992 | Indian Sidecar |
| J. W. Collins | 987 | Indian Sidecar |
| Geo. Barr | 983 | Indian Solo |
| S. Stone | 982 | Indian Solo |
| E. J. Mills | 974 | Indian Solo |
| J. B. Werner | 972 | Harley-Davidson Sidecar |
| Edw. Terhune | 970 | Harley-Davidson Solo |
| O. B. Hawkins | 970 | Indian Solo |
| E. Vernaleken | 965 | Indian Solo |
| Wm. Connelly | 964 | Indian Sidecar |
| F. Edwards | 957 | Harley-Davidson Solo |
| P. B. Garrison | 954 | Harley-Davidson Solo |
| F. Gross | 954 | Harley-Davidson Sidecar |
| A. Rhodes | 856 | Jefferson 1 Speed Solo |
| F. B. Leach | 843 | Indian Solo |
| G. Herth | 695 | Harley-Davidson Solo |
| W. H. Bergfels | 650 | Harley-Davidson Solo |
| Eric Matthews | 629 | Harley-Davidson Solo |
| R. Donaldson | 628 | Harley-Davidson Solo |
| W. Plump | 497 | Harley-Davidson Solo |

## HENDERSON RIDER WINS ST. PAUL ENDURANCE RUN

St. Paul, Minn., October 8.—Fourteen riders started in the first endurance run of the season to be held by the St. Paul Motorcycle Club last Sunday, the course being from this city to Rush City and return. The roads were in very poor condition, and, to make matters worse, a heavy rain began soon after the start and most of the route was covered in the midst of a downpour.

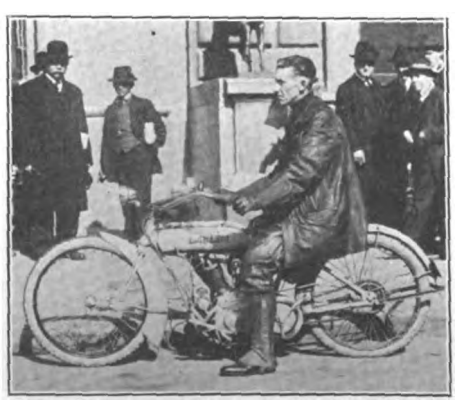
Only two of the fourteen starters were able to stick it out to the finish, and perfect scores were out of the question. The contest was won by Carl Boyer, driving a four-cylinder Henderson fitted with two-seated Dunham sidecar in which Mrs. Boyer rode as passenger throughout the run.

## FIRESTONE PLANT FOR KANSAS CITY

Kansas City, Mo.—The Firestone Tire & Rubber Company, of Akron, O., is to have a fully-equipped tire plant in this city in the near future. The cost is stated to be $200.000.

## EMBLEM LIGHT TWIN ON TRIP

Looking almost as new as it had when first exhibited at the Chicago show, one of the $175 Emblem lightweights is shown at



**Emblem Lightweight Arriving at Show**

Madison Square Garden, after a 500-mile journey from Angola. The conditions of the machine itself is the best evidence of its ability to stand up under punishment.

## RACES FOR MASON CITY

Mason City, Ia., October 12.—Two motorcycle races will be held in connection with the automobile events that are scheduled to be staged by the Mason City Driving Club at the local track on October 20. The motorcycle events will be a five-mile stock and a ten-mile-free-for-all. Prizes will range from ten to forty dollars. No entry fee will be charged, but five per cent. will be deducted from the winnings of the contestants that are placed. In case of rain the races will be postponed until the next day. Further information can be secured from H. S. Stanbery, secretary, Mason City, Ia.

## HERROLD VICTOR AT WASHINGTON

Washington, Pa., October 9.—Indian riders made a clean up in the racemeet which was held at the local track on October 6. Emory Herrold, of Wheeling, W. Va., won the five mile in 5:47¾, with Lee Taylor, of Columbus, second, and "Shorty" Mathews, of Chicago, third. Herrold also accounted for the ten mile, capturing this event in 11:35¼, while Mathews came in second and Taylor third.

## SCAMMON WINS FEATURE RACE

Antigo, Wis., October 12.—Seven thousand spectators witnessed the 10-mile motorcycle race, a feature of the program at the Langlade county fair here. Elmer E. Scammon, of Oshkosh, was the winner on a Jefferson; Herbert Grubb, Baraboo, was second; Howard V. Campbell, La Crosse, third; Grover Fossum, Ashland, fourth, and L. G. Ford, Wausau, fifth.

## CHATTANOOGA TO HAVE SHOW

Chattanooga, Tenn.—Following a meeting of the Chattanooga Automobile Dealers' Association, it was announced that an automobile and motorcycle show will be held in Chattanooga in November at the district fair grounds. Arrangements are under way for the construction of a temporary building in which cars, motorcycles and accessories of all kinds for both types of machines will be shown.

## EVERTZ TAKES ALPENA RACE

Alpena, Mich., October 12.—Edward Evertz, Indian, won the ten-mile race which was held in this city recently at the fair grounds. Willis Busby, on a Thor, finished second, while Vern Hay, Indian, and Louis LeDuc, Indian, took third and fourth places, respectively.

## RACING AT FORT WORTH

Fort Worth, Texas.—The motorcycle races at Fair Park, October 3, were well attended and much interest was shown in the two events. The first was an attempt of Fred Luther to beat the one-lap record of 39⅘ seconds on the quarter-mile track on a 1916 Excelsior. After three trials Luther failed to lower this time.

The second event was a twenty-five mile race for twin cylinder motorcycles which was taken by Hilliard on an Excelsior; he received 20 per cent. of the gate receipts. The balance of the money taken in goes toward equipping the club rooms of the Panther City Cycle Club.

# INDIANS AND POPE SHARE DAYTON-NEW YORK HONORS

By E. B. HOLTON

Special Representative of Motor Cycle Illustrated on the Run

**How the Riders Lined Up at Madison Square Garden After Their 800-Mile Trip**

EIGHT dust-covered and tired-looking riders swept into the New York show at Madison Square Garden, at three o'clock on Tuesday afternoon, and completed the four-day F. A. M. endurance run which started out from Dayton on the morning of September 9, and wound its way through Ohio, Pennsylvania, New Jersey and into the Empire State. Nine riders started on the run. "Cannon Ball" Baker was the unfortunate contestant who was reported out at Jamesburg, Pa.

### He Had a Damaged Frame

An examination of the control and secret check sheets shows that the Indian team, consisting of I. F. Jacobs, E. A. Robertson and Harvey Bernard, shared honors with Irvine Kohl, on a Pope, right up to the very last, that is, the Newark control. Between Philadelphia, which city he reached on time, and Newark, Kohl fell behind. Although he was due at Newark at 12:50, he did not sign until 1:27, while Jacobson, Robertson and Bernard, all on Indians, equipped with Splitdorf magnetos and United States tires, checked in on the dot.

### Penalized at One Control

The three riders above mentioned had perfect scores except for their having been penalized at one secret control. Kohl also lost out at one secret control, suffering the same penalty, in addition to a few points at the noon control at Newark. Jacobson, Robertson and Bernard are therefore one, two, three, with Kohl fourth.

The survivors of the run were checked in at Madison Square Garden at 3 o'clock Tuesday afternoon by Matt Halpin, captain of the New York A. C., and Paul Pilgrim of the same organization, who are well known in athletic circles throughout the country. In fact, Halpin has an international reputation, having had charge of the American team in the recent Olympic games. Messrs. Halpin and Pilgrim were helped by Messrs. Webber, Campbell and Noyes.

### Farewell to Philadelphia

Leaving Philadelphia on the last leg of the four-day run, the going was good until Brown's Mills, in New Jersey, was reached and then the trouble began. Sand roads were encountered which played havoc with the machines. All the guides that the fellows had were the small official triangles on the trees. After two miles of plowing over roads of that character, a chain link broke on the sidecar, and while it was being repaired the rest of the field sloughed through.

It was an experience never to be forgotten by the riders in this run to hear the motors snarling along in second speed, rising and falling in volume as the riders opened or shut off. They could be seen hitting off twenty-five and thirty miles per hour, skidding and tottering, but never going down. Along behind came that "hombre" Baker.

Spills were numerous; however, no one was hurt, the sand being soft. Kohl, Pope, went down, choked his carbureter with the sand and bent his condenser box on the Dixie magneto. It didn't take him long to make a few hurried repairs and he was off again. In the second sand stretch the New Jersey M. C. had a secret check—an admirable place to get the riders.

After leaving the sand belt the con-

## CONTESTANTS IN THE DAYTON-NEW YORK RUN

| Rider | Class | Mount | Variable Speeds | Tires |
|---|---|---|---|---|
| Iwin Jacobs | Pro. | Indian | 3-speed | U. S. Nobby |
| E. A. Robertson | " | " | " | " |
| Harvey Bernard | " | " | " | " |
| C. W. Waughop | " | Cleveland | 2-speed | Goodyear |
| Robert Larsch | " | Dayton | " | U. S. Chain |
| C. O. Wilkins | " | H-D | 3-speed | Firestone |
| E. G. Baker | " | Indian | " | U. S. Chain |
| E. E. Kohl | Am. | Pope | 2-speed | |
| J. D. Grove | " | Indian | 3-speed | Goodyear |
| J. R. Neis, E. B. Holton | " | Indian | Sidecar | " |

Digitized by Google

testants found smooth roads to Newark, at which point the only fellows to check in on time were the Indian team riders, the Dayton and the Indian sidecar. Up to this point the three riders who were to constitute a factory team, if other manufacturers had competed, were the only ones perfect at every check. E. G. Baker was late at the Newark check. Later a telephone message from Jamesburg, N. J., reported him in trouble. Kohl and Donelly arrived late.

**Jerseyites Entertain**

The New Jersey M. C. entertained the riders when they arrived and invited them to a hearty dinner. Promptly at two o'clock, with two motorcycle police at the head of the line, fifty club members escorted the dusty competitors over to New York. Again on the Hudson County Boulevard the police stopped traffic and led the procession. Entering New York, however, there were no riders to greet the contestants and the police gave no assistance

## THE START FROM DAYTON

DAYTON, Ohio.—It was just 5 o'clock on the morning of October 9 when the first entrant was sent out of Dayton for the long run to New York. J. R. Neis, with Indian sidecar, was the first man to hit the trail. As he was the only sidecar participant, his trip was a somewhat lonesome one.

One hour later Iwin Jacobs, E. A. Robertson and Harvey Bernard, of the Indian factory team, took to the road, followed a short time later by C. W. Waughop, on a Cleveland lightweight; E. E. Kohl, Pope, and J. D. Grove, 1916 Indian, two amateurs representing the Harrisburg M. C.; Robert Larsch, Dayton, and last, but not least, "Cannon-Ball" Baker astride his Three-Flag record-maker.

Ed. Hawkins, the Thor rider of Cleveland, who wired in from Galion, Ohio, that he had roadside troubles, did not reach Dayton in time to start, while C. O. Wilkins, Harley-Davidson, could not get replacements in time.

**Some Fine Going in Ohio**

As some of the roads in Ohio, especially in the northern and western sections, are laid out by using a streak of latitude, fine time was made by the contestants, Neis with his sidecar combination averaging 30 miles an hour for the first 70 miles. The first secret check was encountered 12 miles out of Columbus, where all the participants were seen to be riding close to schedule. Near Newark, Ohio, Neis had his chain jump and was held up for a while, and Kohl, the Pope rider, broke a chain at about the same point. Nearing Zanesville the roads changed from straight boulevards to winding stretches of dry mud.

Soon after Dayton was left Waughop, on his Cleveland lightweight, took up the rear guard position, and while he lacked the speed of the big fellows he did fine work in a general way. He purred along on the good roads and warmed up to the hills and rough patches in good style, averaging about 17 miles an hour. That two-stroke just wallows down in mud and sand and "eats it alive," as they say in the circus.

Leaving Zanesville, the schedule dropped from 25 miles an hour to 20 for solo riders, and from 21 to 17 for the sidecar. With the rumors of badly rutted roads on the long detours ahead, the bunch rode over the hills prepared for the worst. Going out of New Concord the course left the National Pike and for 13 miles wallowed through nearly-dry gumbo roads. One stretch of 250 feet kept the sidecar crew busy for about ten minutes. The solo riders tangoed through without damage, but with no end of excitement. From Cambridge the course was alternately good pike and rough clayey roads, gradually getting better from Cadiz on to Wheeling.

The Wheeling M. C., in addition to entertaining the riders at a smoker in its clubrooms, handled the regular and secret check in a most efficient manner. All the contestants arrived in Wheeling in good time, Waughop riding the last 24 miles, however, after darkness had set in.

There are no spills to record and no serious troubles to recount for the first day's run; in fact, the opening jump of 234 miles was on the order of an interesting tour. All the riders have now set their watches to Eastern time and hit the hay preparatory to the second day's run of 227 miles through the mountains of southwestern Pennsylvania.

## CLOSE OF SECOND DAY'S RUN

CHAMBERSBURG, Pa.—The end of the second day's run in the Dayton-New York endurance trial finds the list of competitors reduced by one. Bob Larsch and his Dayton mount have not been heard of since early morning. As he did not reach Somerset, Pa., it is feared that he went on down the National Pike toward Maryland instead of cutting across country to the Lincoln Highway.

Robertson, Indian, had the first puncture in the two days of riding. He had to stop for a repair near Uniontown, Pa. J. D. Grove, Indian amateur, took a header near McConnelsburg, Pa., and split his lip but was otherwise uninjured.

Today's ride began before daybreak from Wheeling, Va., and brought the riders into Pennsylvania via the National Pike. A heavy fog and some frost kept the speed down for the first few hours. When the run was promoted the idea was to show the contestants some beautiful scenery in addition to furnishing them with a genuine endurance trial, and as far as the scenery is concerned the program is a complete success.

**Few Endurance Features**

Even minor troubles have been few and the only thing that keeps the contest from becoming an out-and-out tour is the unearthly schedule of starting and finishing. The roads in the main are good, but some stretches show that with a little rain the run might have become an endurance trial of the real old-fashioned sort.

The side-car, with Jack Neis and E. B. Holton as the crew, made the noon check at Somerset, Pa., 17 minutes late. Neis blew into Uniontown, Pa., at 25 miles an hour, was haled to court and compelled to put up a one-dollar forfeit for both himself and his passenger. Why the latter was included in the forfeit-paying the chief of police did not say—probably it was because everybody picks on a fat man.

Uniontown Hill, the scene of the famous hill-climb, was mounted in great style by all of the riders. The lightweight division, made up exclusively of C. W. Waughop and his Cleveland, is still on the way, but everybody feels certain that this rider will check in all right. His plucky ride into Wheeling in the dark last evening has added to his laurels as a game roadster.

## TO PHILLIE ON THIRD DAY

PHILADELPHIA, Pa., October 11.—We left Chambersburg, Pa., in the cold gray dawn and headed over the Lincoln Highway as far as Gettysburg, where we swung right and arrived at Harrisburg about 9 a. m. The course was not marked properly and as a result the sidecar came on via the wrong road. As no secret check was out, no harm was done. Larsch, Dayton, is among us again. He broke a lamp bracket, took off the lamp and turned it over to the sidecar outfit. Later he broke an exhaust valve lift and when he got going dusk began to gather and he plugged at it in the mountains with no light until it was too dangerous to come on. Larsch put up at Shellsburg, Pa., and came on this morning.

J. D. Grove, Indian amateur, from Keystone M. C., Harrisburg, Pa., was bruised by his spil in the oil yesterday. He has a "shanty" on his lip that required a stitch in it and a badly wrenched left arm. He got into communication with thte club, and a substitute, "Jim" Donelly, was sent on to take the mount through. Donelly rode all night and arrived in Chambersburg one hour before the riders checked out. With E. E. Kohl, Pope, still going strong, there is every chance for the Keystone M. C. to have the Amateur Cup cinched. C. W. Wanghop, the Cleveland lightweight competition rider, is still plugging at it on his fifteen-mile-an-hour schedule.

**Strayed from the Route**

Leaving Harrisburg, the field soon was lost in the hills between that city and Reading. Arrows were few and far between, and many lost their way.

Reading, reached by as many routes as there were contestants, the riders stopped for a half-hour. Harvey Bernard had two punctures on this stretch.

From Reading the course led the riders down along the Schuylkill River and through Valley Forge, where Washington and his troops put in a strenuous winter in our early days, to Morristown. From there the short jump to Philadelphia was made.

Sidecar competition in these short October days is not all joy. They leave in the early morn before it is light and they arrive in a strange town long after dark. Unless you know your way valuable time is lost trying to inquire it. The speedometer cannot be read nor the arrows found, so altogether it is some job—especially when you are late.

The riders were met in Morristown by two of the New Jersey M. C. members who came down to see them the rest of the way. The last day's ride—tomorrow—will be short and sweet. Ohio gave us clay roads, Pennsylvania hills and heavy grades, but New Jersey has some deep loose sand through which to wabble.

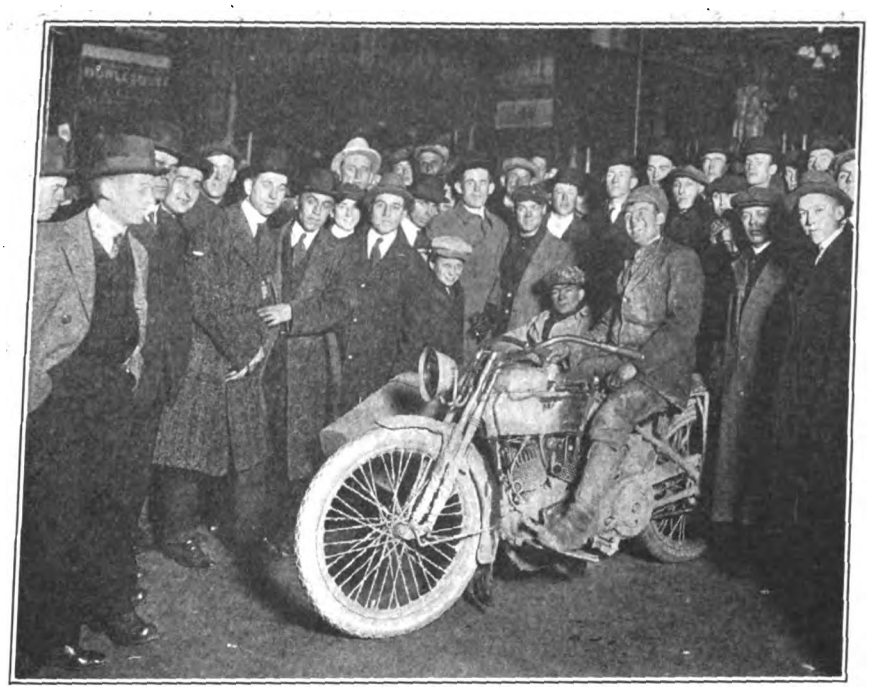
# ONLY TWO ENTRANTS FINISH BUFFALO ENDURANCE RUN

BUFFALO, N. Y., October 12.—Eight solo riders and one sidecar rider left Buffalo Sunday, Oct. 10, at 5 a. m., on the 328-mile Buffalo Motorcycle Club annual endurance run in which five makes of machines were represented. Freddy Schudt, driving a Harley-Davidson, with a sidecar with William Graso, finished first, winning a diamond gold medal. His time was 17 hours and 3 minutes. Howard Peters, a solo Harley rider, finished second, one hour and thirty minutes behind Schudt These were the only two riders to finish out of the nine contestants.

All the riders were late at the first control which was Lewiston, with Freddy Schudt first man in—40 minutes late. From Lewiston on, the roads, thoroughly soaked after a three-days' rain, were impassable in some places, with the result that some of the riders took to the fields. This proved to be a harder job than the riders had bargained for, so that M. Radice, H. E. Krieke and C. Hennrich concluded to bring this sort of joy riding to an end by returning home. Although the going was heavy and slow, mud clogging the guards constantly, six of the riders managed to reach Medina considerably behind schedule. At Medina E. J. Howes quit.



**Fred Schudt, Driving Harley-Davidson Sidecar, Who Took First Prize**

**Howard Peters, the Only Solo Contestant to Complete the Run**

Leaving Medina, the five riders trailed along through Indian Falls, Corfu and into Arcade, where Loscher decided to drop out. This was only a little over one-quarter of the course and the riders were beginning to regret having started in the run, as their lives were in constant danger, due to the bad condition of the road. Squires lead the procession into Arcade and this is the last that was heard of him until he rode into Buffalo at 2:14 Monday morning. The last place at which he is reported to have signed checking sheets was at Arcade. The four remaining riders were still plugging at Machias and through Franklinville to Olean.

At Olean, Schudt was the first man to check in. He was a little over two hours late. Dunham, who checked in a little over four hours late, had enough, and left Schudt and Peters to fight it out. Covered with mud so that neither the make of the machine nor identity of the man could be distinguished, the young pluggers plowed through the mire through Salamanca, Red House, Randolph and Kennedy, to Jamestown.

At Jamestown Freddy Schudt checked in at 5.19 p. m. When this information reached the club, Albert Peters and Harry Johnson went up the Lake Shore Road to escort the two remaining riders into Buffalo. Freddy Schudt, the star rider, arrived at Buffalo at 10:03 p. m., while Howard Peters, the only other finisher, completed the grind at 12:09 a. m.

## GARRISON WANTS RIDERS TO FORM RESERVE

WASHINGTON, D. C., October 11.—Secretary of War Garrison has come out strongly in favor of the formation of a motor reserve, to act in conjunction with the United States Army in case of necessity. He stated publicly last week that he believed the Plattsburg encampment has proved a success in teaching the rudiments of the art of war to a number of citizens, and in giving them an insight into actual field work. He suggested that the idea might be extended to automobile and motorcycle clubs by the organization of rifle clubs, and stated that the services of experienced army officers are available for such purpose.

That Secretary Garrison has looked deeply into the subject is shown by his suggestion that detachments of machines of the same make be detailed to the various branches of service, thus simplifying the matter of service and repair. Mr. Garrison suggested that machines of one make should be combined in one unit of an ammunition train, supply column, sanitary train or dispatch work. The general staff is now making a study of the proper organization of such units and securing lists of drivers and riders who will be available for such service.

Secretary Garrison announced that Congress has authorized the furnishing of rifles and ammunition to such clubs as may desire to become affiliated with the movement, and he made various suggestions as to how instructors could be obtained. He said that the automobile and motorcycle have shown their value for various transportation duties in the present war, and that to know how many machines are available is of value to the War Department. Several National Guards are taking steps in this matter.

## CUPID AND THE MOTORCYCLE ACTIVE IN APPLETON, WIS.

APPLETON, Wis., October 12.—Richard Groth, popular motorcycle dealer in this city, slipped one over on his many friends in the local fraternity when he came back from Port Washington, Wis., the other day with Mrs. Richard Groth, who was Miss Rose Steigenberger when the trip started. There is no need to mention that a motorcycle was a prominent actor in the elopement scene. Relatives confirm the marriage.

There are a number of motorcyclists in this city about to follow the example of the new benedict also, according to William Groth, brother to "Dick." The Groth boys' shop is a popular hangout for the local riders and is sort of a central exchange for the latest gossip. Said William in philosophic vein: "The old bunch is back-sliding; you don't see them all here any more. There is Ted Felzer and Carl Gerlach, both about to be married in a few days. Arnold Korte's engagement to Miss Henrietta Heckner, of Menasha, has been announced.

"Missed Bud Kunstman the other night and the boys tell me he is taking regular trips to Menasha. They tell me that Roy Schabo is busy elsewhere, but Roy denies it. Cupid and the motorcycle certainly have been a busy pair this summer."

Bill Groth heaved a dreary sigh.

"Well, I suppose it had to happen some time."

## OLYMPIA GIRL RIDER TAKES TRIP UP MT. RAINIER

OLYMPIA, Wash.—Miss Olga Hartman, who is a member of the Olympia M. C., has been an enthusiastic rider for the last four seasons. She uses an Excelsior twin for her recreations, being off every Sunday and holiday with a girl passenger on tandem, to fish or just for a long ride into the country. Miss Hartman is on the office staff of the Olympia Knitting Mills, Inc., of this city, and looks upon her machine as one of the finest means of relaxation and health-giving devices she knows of. She is of the opinion that if more girls and women would take to the motorcycle they would agree with her that riding is great sport.

Recently, Miss Hartman and a girl friend rode to Mt. Rainier, 92 miles away from Olympia. They carried a suitcase tied in front of the Excelsior, a knapsack on the handlebars and a bundle disposed of in a suitable manner. The knapsack was carried by the passenger when dismounted, and Miss Hartman took care of the bundle. The two girls rode up to the snow line on Mt. Rainier, the total time taken in the ascent being 4½ hours, which included a stop for gasoline and a rest. They stayed for two days at the mountain, and then returned to this city. This trip was Miss Hartman's second up Mt. Rainier.

## EIGHT PERFECT SCORES IN HARRISBURG CLUB RUN

Harrisburg, Pa., October 8.—Eight riders finished perfect in the two day reliability run of the Keystone Motorcycle Club which ended on Sunday, October 3, at Market Square, after a gruelling grind to Pittsburgh and return. The run was exciting from start to finish, the roads being in very poor condition in many places. No serious accidents occurred. E. D. Kramer, one of the contestants, rode a distance of one hundred and forty-two miles with a broken fork.

## STILL TALKING ABOUT STRATTON'S MADISON RIDE

MADISON, Wis., October 12.—Local speed fans are still talking about the wonderful ride made by Alva Stratton when he won the recent 150-mile relay here on the Dane county fair track. Stratton was teamed with George Meyers, but the latter took a bad spill at the twenty-third mile that put him out of the race completely and this forced Stratton to bear the brunt of the rest of the going for the Indian camp. His time was 2:27:44⅘.

Another noteworthy feature of the relay was the riding of Walter Ferch, Milwaukee, who copped third, riding two borrowed Excelsiors. Ferch was scheduled to team with Pat Neu, a local speedster, but Neu found that he could not do justice to himself and Ferch with his machine so Ferch decided to go it alone. This is Ferch's first appearance on Wisconsin tracks since his spectacular spill on the Houston motordrome, where he sailed clear over the edge of the saucer and landed on the outside, escaping instant death by a miracle.

A mixup in signals was what lost the race for Montgomery and Lochner, riding as an Excelsior team.

### 22,400 MACHINES IN OHIO

Columbus, Ohio, October 12.—W. H. Walker, Ohio Registrar of Automobiles, who also has charge of the registration of motorcycles reports, a total of 22,400 motorcycles registered in Ohio since the first of the year. This is 21,000 more than were registered during the whole of 1914, when the number reached 20,300. It is expected that there will be a much larger registration of motorcycles next year.

### BE CAREFUL IN LONDON, O.

London, Ohio.—Following complaints about motorists, both automobilists and motorcyclists, speeding through the residence streets with exhausts open, and otherwise rendering themselves objectionable, this town has come to the front with the appointment of a regular motor-cop, Charles Orcutt landing the job. Traffic police have also been stationed at strategic points.

## BURLESON OFFICIALLY INDORSES SIDEVAN

WASHINGTON, October 11.—An order was issued last week by Postmaster General Burleson which lifted the ban on the use of motorcycles in the rural mail service. This order supersedes the regulation scheduled to take effect January 1 next, in which the use of motorcycles in the mail service was prohibited.

The latest order of the department, which is expected to stand without further amendment, provides that motorcycles may be used in the rural mail service if equipped with side vans of prescribed dimensions. The piston displacement of motors used in this service must not be less than 60 cubic inches, and a commercial van body must be permanently attached to the machine. So equipped, motorcycle combinations may be used in the mail service under the same conditions as automobiles. The order specifies that the van bodies must be made of waterproof material constructed in such a manner that mail matter will be thoroughly protected from damage and loss. The van must not be less than 42 inches long, 24 inches wide and 18 inches high. The assembled machine must have a tread of 56 inches.

An official of the postoffice stated that complaint had been made of mail matter being received in damaged condition from routes thus covered by carriers using motorcycles, and hence the order prohibiting the use of the two-wheeler was issued. This order was followed by demonstrations of various package-carrying attachments suitable for use by the carriers, and the inspectors accepted the side van.

The use of panniers, or other package carriers, attached to the motorcycle without the use of a third wheel will not be permitted.

# NEW BRITISH IMPORT DUTY RAISES SERIOUS PROBLEM

## Motorcycles and Parts Taken Into England Henceforth Are Subject to a 33 1-3 Per Cent Ad Valorem Schedule

SALES of American-made motorcycles to England will be affected somewhat by the new import duty on motor vehicles and parts, provision for which is made in the budget which has just been submitted by the British Chancellor of the Exchequer. The purpose of the new arrangement is to increase the national revenue by imposing a 33⅓ per cent. ad valorem duty on both motor cars and motorcycles.

### An English Journal's Views

*The Motor Cycle and Cycle Trader,* a conservative and strictly trade magazine, makes the following interesting comment on the situation:

"It cannot be pretended that this radical departure from the principles of free trade which have hitherto governed our industrial life is altogether unexpected. A number of the most prominent and zealous free traders have urged that imported goods of certain classes should be subjected to a duty, their argument being that even the fiscal policy of the country must be sacrificed in face of the urgent necessity of re-establishing the balance of international trade. It is maintained that this can be achieved to an extent by enforcing on the public the lesson of economy and making it more or less prohibitive to buy imported articles of the luxury nature. Hence we have a duty on motorcycles and with it the inference that in the Government's opinion the motorcycle and the motor car have the character of luxuries ranking with clocks, musical instruments, and hats. In our opinion the motor vehicle has become of such paramount importance in transport and in the administration and organization of industry that it is an injustice to attach this character to it. It is only a small proportion of these vehicles which is purchased with no purpose in view but that of pleasure and recreation.

### Protecting Home Interests

"However other views have prevailed and in this connection it may be assumed that the Government has been influenced by the argument that while our English factories are so deeply engaged in producing munitions it is unfair to leave them powerless to oppose the tide of American invasion. Probably these aspects have been the main consideration at least so far as the motorcycle is concerned, for of course the duty on imported motorcycles raises a very insignificant sum in comparison with the estimated deficit in the national revenue of £1,285,000,000 which the Chancellor has to provide for. Other imports of motorcycles and parts totalled £269,250 for the first eight months of the year and 33⅓ per cent. on that sum would raise no more than £89,750, while of course if augmented cost to the purchaser will be accompanied by a substantial decline in sales and consequently in volume of the import business, this in fact being the effect aimed at, the amount passing to the treasury will be of even less account.

"From the point of view of the retail trade interested in the sale of American machines it is obvious that the new duty is a very serious matter. It is not to be expected that the price can be advanced 33⅓ per cent. without influencing sales to a degree which must disorganize the selling programme of every agent interested in them. We have already heard the opinion expressed that if the consumer is to bear the whole burden of the duty, in other words if there is no reduction in price designed to maintain sales at the normal figure, the demand will decline by at least 50 per cent. That, however, is purely assumption. Unlike protected countries we have no statistics available to indicate the effect on demand of prices advanced by such an agency and probably by the Chancellor of the Exchequer is as much in the dark as the trade as to the effect of his proposals."

### HOW ENGLAND'S RUBBER TAX HITS U. S. IMPORTERS

Rubber importers in the United States will be compelled to increase their annual purchasing outlay about $500,000 as a result of Great Britain's decision to place a tax of 2⅜ cents a pound on rubber brought in from Ceylon and exported by England. This action is part of the comprehensive scheme now going into effect to increase the national revenues.

The United States from January 1 to August 16 imported from Ceylon 8,567,536 pounds of rubber. Last month the imports ran up to 1,726,000 pounds. At this rate imports amount yearly to about 20,000,000 pounds. As the United States is the second largest user of this rubber, and as about 95 per cent. of the tire companies are using it, it is expected that prices will be more stabilized. It is expected that rubber from the other Eastern States will also receive a tax.

The United States in normal times consumes 50 per cent. of the world's production of rubber, and since the war its consumption has grown to about 60 per cent of the total supply.

It is doubtful whether the imposition of the tax will turn American buyers from the British supply to the Brazilian, as it is stated that the Ceylon rubber is 25 per cent richer than the Para product because of loss in washing. The Ceylon rubber is cleaned, milled and dried upon purchase and is ready for manufacturing, whereas South American Para requires from one to two months to be made ready for the mill.

### OHIO ORDERS 30,000 PLATES

Columbus, Ohio, October 12.—Orders have been placed by the Ohio Automobile Department for approximately 30,000 number plates for motorcycle registration for 1916. The number plates, of which only one is required on each motorcycle, cost the state five cents each. The plates will be on a white background with maroon lettering.

Digitized by Google

## WASHINGTON CLUB TO HOLD NOVEMBER CYCLE SHOW

Washington, D. C., October 9.—The National Capital Motorcycle Club of this city, at a meeting held on October 6, laid plans for holding a motorcycle and bicycle show on Thanksgiving Day in the Pythian Temple, a large auditorium located near Washington's motorcycle row. It is expected that the show will remain open until the Sunday following the holiday.

This exhibition will not be a money-maker, for the club proposes to charge no admission fee and will give a light buffet lunch to all who attend. All the dealers of the city will be invited to show their wares. Moving pictures of the various processes of cycle manufacture and views of machine parts will be shown. While the exhibition is in progress, efforts will be made to increase the membership of the club and the initiation fee will be waived as an added inducement to join.

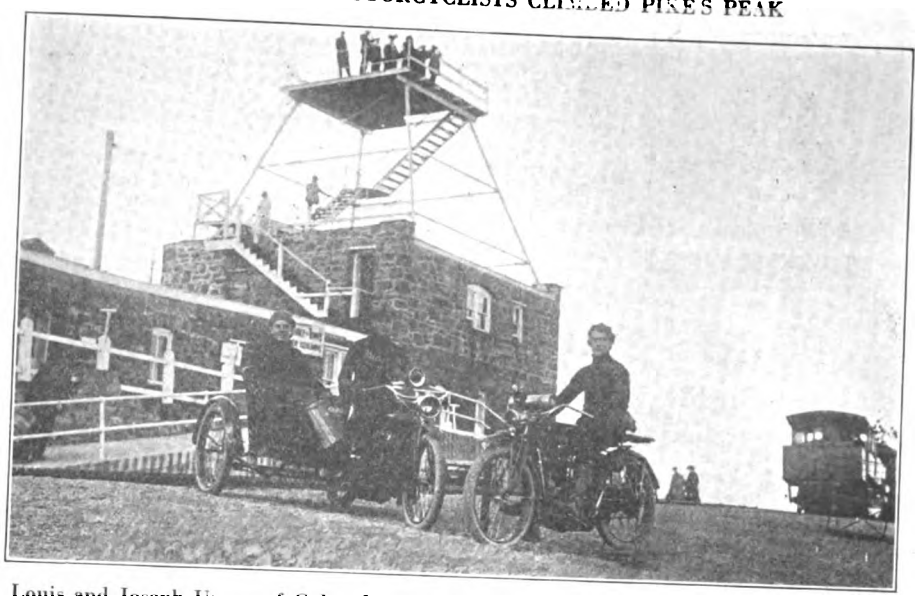
## CINCINNATI JUDGE GIVES ADVICE TO MOTORISTS

Cincinnati, Ohio.—Some advice which might be said to come straight from headquarters has been handed down by Municipal Judge Samuel Bell, who handles the police business of the city. Judge Bell is blind, but in spite of that fact he sees clearly the causes which bring motorcyclists and automobilists before him, and his advice directed to them, if heeded, ought to help them considerably in avoiding conflict with the traffic force. Among the most significant of the rules suggested by Judge Bell, from the standpoint of the rider, are the following:

Always drive on the right side of the street; pass all vehicles, except street cars, on the left; use the best lamps, and light them at sundown; get your state license at once; get your local vehicle license at once and save court costs; observe the traffic laws strictly; obey officers on crossings; avoid arguments with officers, although you may think they are wrong; report to the police or to the automobile club all speeders; watch your speedometer, and have it tested every ten days; study the city ordinances and the laws of the state pertaining to vehicles; pay special attention to the laws pertaining to speeding; don't drink intoxicating liquor while driving; don't permit your exhaust to smoke; don't keep your muffler open at any time; don't carry women or children on motorcycles.

## THESE YOUNG MOTORCYCLISTS CLIMBED PIKE'S PEAK



**Louis and Joseph Unser, of Colorado City, Col., Made the Ascent with Both the Sidecar and Solo Indian Outfits; Note Item Below**

## CLIMBED PIKE'S PEAK

To the summit of Pike's Peak on motorcycles is the unique experience of Jerome, Louis and Joseph Unser, of Colorado City, Colo., aged respectively 16, 19 and 18 years, who on September 19 made the trip by way of the new Pike's Peak auto highway on two Indians, one of which had a sidecar on.

They left Manitou at 9.45 in the morning and reached the summit two hours and 15 minutes later. After leaving Glen Cove the party experienced a number of serious difficulties, as blasting was in progress and in a number of places the road was practically impassable. Several times they were forced to carry the machines. The sidecar was the first ever to be driven to the top of the peak.

## BUTLER COUNTY CLUB IS BUSY

Hamilton, Ohio.—The Butler County Cycle Club is keeping up its reputation as one of the livest organizations in these parts. Its annual chicken supper, held in connection with the first dance of the fall and winter season last week, was one of the most successful affairs of the sort ever held by the club. Both affairs, if they can be considered separately, were confined to club members and their ladies, the dinner beginning at 7:30 and being followed by the dancing. The committee in charge consisted of Jack Dedrick, Walter Poffinberger and Elmer Ortolf. Arrangements are now under way for the organization for the season of a football team.

## POINTS THE AMERICAN EXPORTER MUST CONSIDER

### Reasonable Credits, Carefully Prepared Catalogs and Sales Methods in Keeping With the Customs of the Purchasing Country are Essential to Permanent Success, Say Argentine Business Men

ON July 29 there was a meeting of leading business men of Buenos Aires, at which they discussed the causes restricting the development of commerce with the United States. Opinions were expressed to the effect that the methods used by American manufacturers are not the same as those employed by the French, English, and others, and that European commercial development with Argentina was not due entirely to the credits granted by the wholesale houses, but to other factors as well.

In any event, according to Consul General W. Henry Robertson, "repeated conversations with American and other importers here have afforded convincing evidence that the American method of selling on the basis of cash with order, or part cash with order and the remainder against shipping documents in the United States, or cash against documents upon arrival of the goods in Argentina, is seriously resented here, especially by responsible wholesale importers who have to give long terms to local retailers. There is also no doubt that many American exporters are careless of their failure to observe detailed shipping instructions that are given here with special purposes. It is certain also that some manufacturers often ship articles to South America of quite a different character from those ordered, seeming to have the altogether erroneous idea that the next closest thing will suit as well.

"Now, above all times, is the opportunity for American goods of almost all sorts to compete for this valuable market, but present efforts should be made with a regard for lasting future results in order that when the war is over American interests as a whole will have taken advantage of the situation to intrench themselves securely here. Americans must remember that the Argentine people are quite as reluctant as they themselves would be to pay for articles of any sort that they have never seen."

As illustrating the Argentine view of the conditions that it is desired to emphasize in the present report, there is given below a translation of an article appearing in the local *La Nacion* of August 5, 1915, under the heading "American Commercial Policy."

"The North Americans ought to model their methods on those of the countries of Europe, offering the same advantages and facilities and adapting themselves to the exigencies and the peculiarities of the consumers whom they supply. They need to create an atmosphere favorable to their relationships, which will secure them a preference or which at least will not place them in a precarious position of inferiority.

"To suppose that the boom and the accidental conditions under which they are now replacing the countries at war will continue after the disappearance of this abnormal situation would be to fall into disconcerting error or negligence, which would inevitably condemn them to be ousted.

"Once the present fortuitous circumstances have disappeared they will be unable to sustain their positions unless they prepare to confront the rivalry of those who have temporarily withdrawn. The Germans, the English, the French, will return, each with their commercial systems, with their goods manufactured at prices and under conditions that consult the requirements of our market, favored, morever, by valuable traditional relationships long cultivated, and the North Americans will assuredly be dislodged if they do not adhere to a commercial policy of expansion, settlement, and reciprocity analagous to that of these competitors.

"The American government and trade should not allow themselves to be misled by the advantages and temptations of this abnormal situation. The time is now ripe for employing methods that will propitiate markets accidentally occupied, since these will otherwise be irretrievably lost or would be reduced to a mere ephemeral expansion.

"Such a result may also be contributed to by the fact that the intermediaries and agents in the present accidental commerce are European houses and firms, who have recourse to North America only provisionally and who logically will endeavor to resume their original relationships as soon as circumstances allow. In order to prevent such a failure and to consolidate their situation the Americans must act with foresight, liberality, and a discreet and broad-minded realization of the precarious situation that they enjoy by favor of the present course of events."

## HOW UNCLE SAM IS HELPING THE MANUFACTURER

MORE or less publicity has already been given to the activities of the Department of Commerce in extending its service to the business men of the country showing any interest in foreign commerce. But it will stand repetition, if for no other reason than that here democratic America shows that it can actually do more for business and do it as well as even the efficient States socialism of Germany or the highly trained diplomatic British service.

The entire consular service, representing every corner of the world, has been transformed into an information gathering machine. Consuls, commercial attaches, and commercial agents have had new instructions to study business conditions in their particular localities, discover business opportunities for American manufacturers and merchants, and report by mail or cable to the central office at Washington. The chances are immediately gathered together and distributed to some 13,000 manufacturers by means of a daily paper published under the direction of the department. The same names are classified to the most minute detail, and in special instances the notification of an opportunity is done through confidential correspondence. In addition to the Commerce Reports, the editorial division prepares the studies of the special agents and consuls on foreign markets and distributes the books at cost price. The hand book on Russia gotten out in this way is probably the most accurate and thorough work on Russian commercial conditions. Dr. E. E. Pratt, chief of the Bureau of Foreign and Domestic Commerce, has the country divided into eight districts, as a further aid to collecting and distributing trade information, including tariffs, export and import statistics. Government red tape has been discarded, and business men have been put in charge of the business places. The reports distributed among the manufacturers are simple and readable, because a newspaper man was made editor. Dr. W. C. Huntington, who has been placed at the head of the Chicago office, proved his efficiency in the steel corporation before entering the government service, besides having had several years of European residence. He is authority for the statement that the American system is superior to the German or British, without taking into account the further extensions planned. Special

Digitized by Google

agents have been secured to send to other countries, in addition to the ones already in the field. They will report on the possibilities of increasing trade where American goods are already on the market, or the means of getting a foothold where American-made goods have not yet appeared.

The Government is, in effect, providing information and advice free for the manufacturer of ordinary resources, which under other conditions would be at the disposal of only the most powerful organizations. Coupled with the activities of the Federal Trade Commission, the agitation for a merchant marine, and improved bank credits, this new efficiency is prophetic of a government leadership as contrasted with barnstorming methods. In this one instance, at least, the Government has shown up to advantage in an emergency. It is the sort of service that there must be more of in the future.

### SCOTTISH AGENTS

"Market conditions in this part of Scotland," writes the American Consul at Dumferline, Scotland, "at the present time for American motorcycles might be said to be above normal, owing first, to the good reputation of the American article and, secondly, to the delay in obtaining good British machines. The Indian and Henderson, both American motorcycles, hold a good footing on the market here, the British public recognizing the fine qualities of both machines. Other American makes are held in regard."

The Consul adds that in his opinion, "to obtain good results in this district, it would be advisable for firms in the United States to appoint an agent in either of the busines centers, namely, Glasgow or Edinburgh, to canvass Scotland, or have a general representative in London to cover all the United Kingdom."

### SPAIN'S CYCLE IMPORTS

Importations of bicycles, motorcycles and parts into Spain, from all foreign countries, were valued at $462,363 during 1913, and $395,940 during 1914. France has been the largest exporter, with Germany, Great Britain and the United States dividing up the balance. The United States could do at least $200,000, and probably $300,000 more bicycle and motorcycle business with Spain during the next twelve months than in any previous year.

### 100 CYCLES A YEAR TO BAHAMAS

Imports of American-made bicycles to the Bahama Islands, British West Indies, were practically the same in 1913 as in 1914. Less than one hundred American-made bicycles were imported each year.

### WHAT GERMANY IS LOSING

During the year 1913 Germany's exports to Great Britain and the British colonies, France, Russia, Italy, Japan, Belgium, Servia and Montenegro had a valuation of $2,400,000,000. Today, Germany is doing practically no business with these countries, and it is safe to say that it will be a long time, even after the end of the war, before Germany's exports to the countries with which she is now waging war, will again regain such proportions. Germany's loss, in this instance, is America's opportunity.

### PORTO RICAN IMPORTS DECLINING

Importations of motorcycles, bicycles and tricycles into Porto Rico have shown a decline for the past two years. Purchases by Porto Rican users for the twelve months ending with June, 1915, amounted to $25,377 as compared with $43,967 for the same period in 1914 and $51,367 for the twelve months ending in June, 1913.

### DANISH REQUEST FOR MOTORCYCLES

From a recent Commerce Report comes a request for American-made motorcycles for Denmark. The inquirer, says the report, is a man with a great deal of experience in this and other motor vehicle lines. Address can be had from the Bureau of Foreign and Domestic Commerce, Washington, D. C., referring to No. 18,390.

### CYCLISTS IN GUIANA

According to the American Consul at Georgetown, British Guiana, the bicycle is very popular in that district, as the country is flat the roads well adapted to the enjoyment of the sport. At present, there are about 110 motorcycles in use in the colony.

### FAVOR NEW YORK EXCHANGE

Several bills drawn on New York have appeared in the Chilian market lately. This is due partly to an increased demand for New York exchange to cover importation. Many large companies are insisting upon being paid in American money.

### THE PROBLEM IN ENGLAND

The following is from the advertisement of the Clyno Engineering Company, of Wolverhampton, England, in a recent issue of the *Motorcycle* of London:

"As long as government demands continue we must concentrate all our efforts and facilities on their fulfillment. That is why you wait."

The following is from the advertisement of C. H. Collier & Sons, manufacturers of the Matchless Motorcycle, in the same publication:

"As all our energies are now concentrated on the manufacture of war munitions, we cannot give attention to competition this season."

The above two advertisements are typical explanations of the inability of British motorcycle, sidecar and accessory manufacturers to make deliveries to their regular trade at this time. The situation is unfortunate in so far as our fellow-manufacturers in England are concerned, but at the same time, it means the biggest opportunity American manufacturers have ever had to introduce and develop the sale of their goods in English markets.

### RAISING PRICE OF BICYCLES

Although on June 1 an increase of from 5 per cent. to 20 per cent. was announced we learn that the Union of German Bicycle Manufacturers and allied interests have decided on a further increase in the prices of bicycles.

### SWEDEN NEEDS MOTORS

The American Legation at Stockholm advises that there is a tremendous demand in Sweden for small adaptable motors. Up to the present this demand has been met by Swedish manufacturers, who furnish 2 and 2½ horse power motors at prices varying from $94 to $107. American manufacturers who are seeking an outlet for this type of motor will do wisely to write to Charge-de-Affaires Jefferson Caffrey, of the American Legation at Stockholm, Sweden.

### BICYCLES AT HANKOW, CHINA

During the year 1914 bicycles to the value of $2,429 were received at the Port of Hankow, China. This compares with a valuation of $2,721 on bicycles imported into that Port during the year 1913.

### QUICK RESULTS

As a sample of the inquiries received from foreign dealers by the advertisers of **Motor Cycle Illustrated** the following letter from Maud's Motor Mart, of London, to the Van Zile Ventilating Co., of New York, is interesting:

"We shall be pleased to have full particulars of your new deflector advertised in **Motor Cycle Illustrated**. Also, your best quotation for this in lots of 500 delivered on board New York."

Maud's Motor Mart is one of the largest cycle jobbers and dealers in Europe.

### FINANCING FOREIGN TRADE

The establishment of a new banking institution under the name of the Mercantile Bank of Americas, with offices in New York, marks another step for providing adequate facilities for the financing of our foreign trade. The new bank has an authorized capitalization of $5,000,000, and is organized to carry on a banking business in the Latin-American republics, especially Central America, Venezuela, Colombia, Peru, and Ecuador, where active arrangements are now being made for the appointment of agents.

# GOUDY WINS PEORIA CENTURY

PEORIA, Ill., October 7.—Carl Goudy, the Excelsior racer of Fairbury, Ill., won the 100-mile race at the Implement Fair track in this city yesterday, in 1:22:30⅕. His average was 72.6 miles per hour. Goudy went through the race without a stop. Ray Creviston, Indian, came second, about half a minute behind Goudy, and Glen Stokes, Excelsior, was third. Don Johns, Indian, finished fourth.

There were eighteen starters at the line when the green flag went down. Creviston took the lead right away and held it for mile after mile. Goudy was riding sixth for at least 30 miles, but soon began to creep up on the leaders. The 85-mile mark saw Goudy riding in third place, with Stokes second and Creviston slightly in advance of Stokes. Goudy gradually overtook Stokes and on the ninetieth lap passed Creviston at the judges' stand, amid the cheers of the spectators. He held his lead to the end, with Creviston and Stokes finishing in second and third places. Johns was a good fourth, much to the chagrin of his many admirers.

Five other riders were on the track at the finish. They were "Bill" Brier, Harley-Davidson, who covered 99 miles; "Red" Parkhurst, Harley-Davidson, with 96 miles to his credit; Alva Stratton, Indian, 88 miles; Charles Bane, Excelsior, 84 miles, and George Filker, Indian, 82 miles. The following were forced out of the race by various troubles: Bill Goudy, Excelsior; Morty Graves, Indian; Dave Kennie, Cyclone; Bob Perry, Indian; W. C. Duewd, Harley-Davidson; George Lochner, Excelsior; R. D. Clean, Indian, and Fred Montgomery, Excelsior. A crowd of nearly 20,000 saw the race. The track was in first-class condition and the time made was considered excellent considering the light banking on the turns.

Saxby Uses Goodrich Black Safety Tread Tires, Averaging 1,000 Miles a Month and Says Tire Troubles Never Bother Him

## ADVOCATES A CIRCUIT FOR SMALLER CYCLE SHOWS

Milwaukee, Wis., October 12.—Encouraged by the tremendous success of the first exclusive motorcycle show held here last spring the Milwaukee Motorcycle Club will stage another next spring. The determination to hold a show again is prompted to large extent by the requests of Milwaukee dealers and accessory men for another exhibition larger than last season's.

The show at Milwaukee, in several instances, was the first real exhibition of models; that is, as they were to be made for the trade. There were numerous changes and improvements effected in several makes and the local show here was the first real exhibit of the new season's offerings. The floor space of this season's exhibition will be twice as large as last spring. The Milwaukee club is advocating co-operation on the local show proposition in order to avoid conflicts between various exhibitions.

"Last spring we held our show at the same time as the Indianapolis show, with the result that we both suffered," said Hugh Sharp, secretary of the club. "What should be done is to get together and arrange a sort of circuit so that outside exhibitors can send their stuff from one to the other and thus cut down transportation expense and obviate the necessity of manufacturers tying up so much money in separate show exhibits."

The Milwaukee club secretary has expressed his willingness to act as a clearing bureau for show dates if so desired.

## NEW QUEBEC 2-MILE RECORD

Sherbrooke, Que., October 4.—On each of the four days of the local fall fair a set of motorcycle races were staged, with a number of French-Canadian mile-eaters participating. Jack Laviolette, Montreal's speed king, was the hero of the series, while his chief rival was Joe Baribeau, former Canadian champion. Laviolette's supreme effort was the establishing of a new Quebec record of 2:10⅘ for two miles, using an Indian. Baribeau also kicked his spurs into an Indian.

## CLAIM FAIR TANDEMITES HIDE LICENSE PLATE

Users of motorcycle tandem seats in the United States will be interested in a recent statement appearing in an English trade journal to the effect that motorcyclists have been fined because the skirts of fair tandem passengers obscured the license number. In one district prosecutions for this fracture of the law have been quite numerous, and tandem-riding in some parts of England is threatened with a decided slump as a result of the stringent tactics adopted by the police.

"It is interesting to note," remarks the reader who called our attention to the item, "that the English authorities have apparently concentrated their attack on the skirts of the fair tandemites and have not felt called upon to brand the tandem seat as dangerous, when properly constructed and fitted."

## KELLOGG AT SPOKANE

Spokane, Wash., October 4.—Two motorcyclists from Middletown, N. Y., W. E. Kellogg and his son, W. D. Kellogg, arrived in this city this morning, completing 7,412 miles of a trip which will be 11,000 miles long before the tourists return home. The Kelloggs have visited the San Diego and Panama-Pacific expositions on their Indian sidecar outfit. They will average about one hundred and twenty-five miles a day and expect to get into Middletown by November 1.

## OHIO GOOD ROAD NOTES

Cincinnati, Ohio, October 12.—Hamilton County will get some of the state road fund in 1916 the County Commissioners were informed. In apportioning the funds for next year State Highway Commissioner Clinton Cowen has provided for the expenditure of $40,000 of the funds collected through automobile tax in this count, as well as a portion of the Hite road tax.

Dayton, Ohio.—The county commissioners have begun publication of advertisements asking the right to levy one-mill for the purpose of road improvement. Voters will pass on the request next month. If approved this levy will be in effect for a period of two years and will produce $460,000 with which the county commissioners will have improved every important pike entering the city.

## CINCINNATI SPEEDWAY ASSURED

Cincinnati, Ohio.—Plans for the Cincinnati speedway are maturing so rapidly that it seems certain that the course will be constructed, according to schedule, by early spring. Subscriptions to the capital stock have now been booked to an extent which removes any financial difficulty, and all that remains to be settled are the various details connected with the actual construction, including the design and material of the track. Several sites are held under option, but no decision has yet been made on this point. A party of stockholders and directors of the company, with Architect Harry Hake, left a few days ago for New York to inspect the Sheepshead Bay track at its opening and get pointers on its operation.

## SARGENT IS HOME AGAIN

Indianapolis, Ind.—Clarence (Spick) Sargent, the Indianapolis rider, who was injured in a race meet at Vincennes, Ind., on Labor Day, has improved sufficiently to enable his friends to remove him to his home at Churchman and Orange streets, where he lives with his father and mother. Sargent, while standing at the inside of the track astride his machine, was run into by another rider and suffered a broken leg. He is now able to get around on crutches.

## FIRST AID TO G. A. R. MEN

Washington, D. C., October 9.—In the recent G. A. R. parade, which was held here recently in connection with the convention of the Civil War veterans, the motorcycle was used by a local Red Cross volunteer to reach the old veterans in line, who were in need of medical treatment. The parade lasting four hours, the grand old warriors kept the motorcycle doctor busy administering first aid.

## OMAHA SHOW DATES SET

Omaha, Neb., October 11.—The Eleventh Annual Automobile Show will be held in this city during the week February 21-26. It is expected that motorcycles and accessories will be exhibited at this affair. Secretary Clark G. Powell has charge of the arrangements.

# PUTTING 12,418 MILES BEHIND A SIDECAR

## What It Means to Keep Going For Five Months Regardless of Weather Conditions

AFTER extricating myself from an almost endless series of mud holes while journeying out of St. Charles, Mo., on my twelve thousand-mile sidecar trip, I finally managed to get into the next town and put up there for the night, having spent a total of ten and one-half hours covering a distance of less than forty miles. I certainly called that a good day's work, and after supper turned in for a much needed rest.

The following day a drizzling, cold rain fell which was anything but inviting to ride in. But I knew that if I waited for fair weather I might spend the rest of the summer there. So after a man's size breakfast, I hit the lonely trail—for it was indeed a lonely one. In fact, I began to think that no one else was quite as foolish to try to get over such roads. By noon it began to clear up and the roads that lead into Kansas City were greatly improved.

While at that place I learned that a tour was being arranged to start within a few days from Kansas City to Dodge City and that there were to be several hundred in the party. This sounded good to me, for misery loves company and I was alone. The fellows gave me a full day's start before the tour since I had my interests to take care of and needed all the extra time. That night another big storm swept the district, blew down trees and houses and added to the already flooded condition of the roads.

### A Hideous Nightmare

The next morning I wanted to quit right then and there, for reports indicated that the worst possible riding lay before me. I waited until noon and then started out. At the next town I learned that the tour from Kansas City had been called off and I was left to fight it out alone. To recall what happened that afternoon is similar to reviewing a hideous nightmare. I can still vividly picture in my mind the miles and miles of sticky, gumbo roads with now and then a sheet of water to pass through. At one place I was forced to push my machine through a stretch of water when the saddle and handlebars only were visible. The fence, which had bordered the road, was floating on the water; but luckily the footing underneath the surface was firm.

**On the Much-Praised Lincoln Highway—Mile After Mile of Mud in Illinois Prepared Walker for Similar Conditions Along Vaunted Route in Other States**

### Soaked to the Waist

After that experience I was not in a pleasant frame of mind. I was soaked to the waist, and my carbureter refused to dry. I don't know how it all happened, but I finally succeeded in drying the parts of my carbureter and the plugs. Then the familiar purr of the motor again broke the still silence of the air and, as I remember it, I just shouted for joy.

The thick mud had caked on my machine until it resembled a mud plough and when the mud came in contact with the hot parts of the motor it baked like fire brick. My Weed chains kept the mud guards cleared, but my drive chain became so clogged that it broke a number of times. In addition to that I had a lot of punctures, which made me think of the fellows back home and the fine boulevards they had. That night I stopped at a place sixteen miles from Dodge City.

A loud peal of thunder awakened me the following morning; I hastily dressed and proceeded to make adjustments before starting out on the last sixteen miles into Dodge City. I had hardly touched my machine when the storm broke and hail stones landed on the cement pavements with loud reports that sounded like the rapid fire of machine guns. But the storm did not last long and the sun soon popped out of the clouds—the first time it had showed its face in a number of days. I got into Dodge City in quick time and was greeted by a score of old friends who told me that another rider and I were the only ones to get through from points below Kansas City.

The three hundred mile race at Dodge City brought many of the good sports of motorcycledom together at the city. We surely had a gay old time—there wasn't a single grouch in the whole crowd and every one of the good fellows was a genial as they make 'em. Everybody seemed to be a regular Mark Twain or Irvin Cobb, for the boys were kept in an almost constant uproar. After the race I went to Kansas City by train, for I was persuaded by those who had come from points in Nebraska and Iowa, not to try to cross into Illinois. My informants told me that only a few trains were able to get through and these only by taking different routes from the ones usually followed. So although I disliked to do it very much, I was forced to ship back to Chicago and spent two weeks in the Windy City.

Leaving Chicago, I visited several points in Wisconsin and started through Michigan, finding the roads there both muddy and sandy. My route took me through Battle Creek, Jackson and into Detroit where I was kept busy for a week and then made a bee line for Toledo.

### Mistaken for Tramp

After a short stay there I headed for Indianapolis through Ft. Wayne and Logansport. All went well until about 20 miles from the latter city, when, after breaking a number of spokes, my rear wheel became so out of line I could go

## Over Every Known Variety of Road—Part II—*By Walter F. Walker*

**Where Road Became a Swamp and the Combination Was Often Bogged Down—Between Vandalia and St. Louis, Mo., on Main Automobile Route Across State**

farther. My lucky star was guiding me, as my stop was in front of a farm house. All this happened in a downpour of rain, for I still had this jinx to contend with; and I did not wonder when the dog on watch tried to separate me from my rubber suit—I looked the part of a tramp for sure. But the farmer was a good soul and I needed no second invitation to come in; when he opened the door the heat from a big stove told me I had stopped at the right place.

From here I telephoned several places to get a rear wheel, but being Saturday afternoon my chances were poor; and when pressed by their invitation to stay, I became one of the family until I drove to a nearby town to get the wheel repaired. Needless to say, my stay with the farmer's family was fully enjoyed, for country fried chicken three times a day surely makes a hit with me.

### Helped Milk Cows

I took up some of the duties of a farmer and helped to feed the stock and milk about 20 cows, and when my wheel was finished and the time came to move along, I can't say that I wouldn't have liked to stay longer. But with many miles more to ride, and more rain, I set out and made the run to Indianapolis without further trouble.

My stay in Indianapolis this time was a brief one, because I knew that to reach New York on time I would have to keep on riding. However, I was favored with better roads and the towns were closer together. I was not through with bad roads yet, and knowing the conditions of West Virginia and Pennsylvania roads, I was making all possible speed. From Indianapolis, I rode to Cincinnati, Ohio, and points in Kentucky.

At Cincinnati I was again entertained by the Indian Motorcycle Club with a club run to a chicken dinner at New Trenton, Indiana. The run was a huge success and the fun was only marred by a drenching rain on the return trip. Most of the members were arrayed in striking costumes, it being their annual "Rube Run," in which all those taking part are supposed to mask.

From Cincinnati I rode to Dayton. Here I always find a host of friends, and as it happened, I was just in time to start with Irwin Jacobs and E. A. Robertson on their pathfinding trip from Dayton to New York when the route for the Ohio and Pennsylvania states endurance run was laid out. I left these two genial boosters at Columbus, O., where I remained a few days, but soon followed over roads which, as Robertson says, are five feet wide and four feet deep. At one place near Wheeling, through a particularly bad stretch of mire, I had the misfortune to break the long drive chain, and although I stopped as soon as I could, the chain was nowhere in sight. The only thing left to do was to roll up my sleeve and feel for it in about ten inches of soft mud and water and I found it after covering a distance of half a block.

The repair made, I started again and the high weeds both in the center and at the sides of the road made things interesting for a while. The tops of the weeds had a coating of mud and resembled the so-called cat tails that grow in marshy places. They were just high enough to strike a rider in the face, which made it necessary to ride with one hand and to protect your face with the other. The glass in my headlight was the first to get a swipe with these weeds and the small pieces went flying in all directions. Luckily I reached Pittsburg before dark.

### In a Tight Place

At Pittsburgh, I managed, between showers, to make my visits and take quite a few pictures, as this section affords many opportunities to get some very fine views. On my way out of Pittsburgh I enjoyed some very good roads, and, while coasting down a mountain road at a sharp hairpin turn, I came near taking a high dive also, for when almost at the center of the curve, I met an automobile which a lady was learning to drive. She became confused when she realized the narrowness of the road and that we would meet on the turn. While I had my machine under control, I could only play tag trying to dodge the auto. To make matters worse, the man in the automobile attempted to get possession of the steering wheel, the result being that their four-wheeler took up the entire road. I knew at a glance that I could not pass them and I could see a drop of about one hundred feet down a steep embankment ahead, with only an old-fashioned rail fence to stop me. I clung to my brakes for dear life, and, in the short space of time from leaving the road until I was brought to a sudden stop with a thud against the fence, I had ample time to review my past; thought of home and mother, and said, "Good-bye Jimmie." But it turned out better than I expected, for when leaving the road I swerved my machine all I could and struck the fence a glancing blow with the side car. Best of all, the fence held tight; and aside from a few new scratches, the machine suffered no great harm. I rode into Chambersburg with praise for the man who invented rail fences.

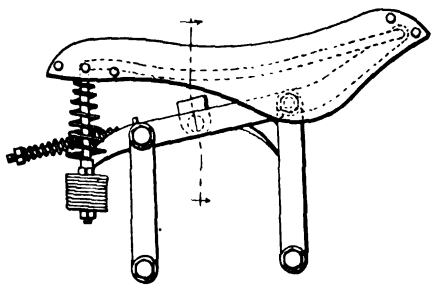
# WHAT CYCLE INVENTORS HAVE BEEN DOING OF LATE

## OLIVER SADDLE FRAME

In order that a saddle shall have limited and cushioned longitudinal movement and thus do away with any tendency toward throwing the rider forward or backward at change of pace of the machine, a frame has

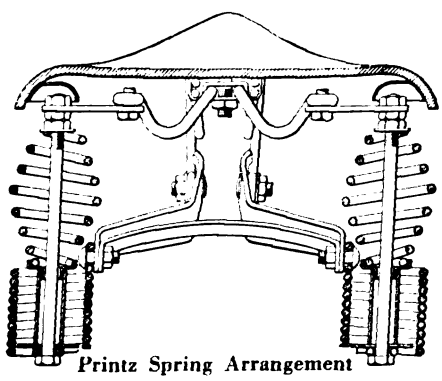


**Oliver Saddle Construction**

been designed by Immanuel Alvin Oliver, of Eden Vale, Cal. This frame includes a fixed saddle member straddling the frame of the motorcycle and extending considerably below the saddle post and a second saddle-carrying frame swingingly mounted upon a fixed frame to give longitudinal movement. Springs of the coil type are interposed between the fixed and movable frames and these springs give to the saddle the desired controlled longitudinal movement. The patent is No. 1,153,817 and was issued on September 14, 1915.

## PRINTZ SADDLE CONSTRUCTION

An arrangement of the compound springs supporting the rear of a motorcycle saddle such that either set will not interfere with the action of the other on the same side is the subject of a patent issued to Daniel F. Printz, of Reading, Pa., and assigned by him to the Reading Saddle & Mfg. Co., of that city. Printz mounts helical compression springs above ordinary coil springs on the same vertical shaft on each side, supporting the top of the helical springs by special arms from the

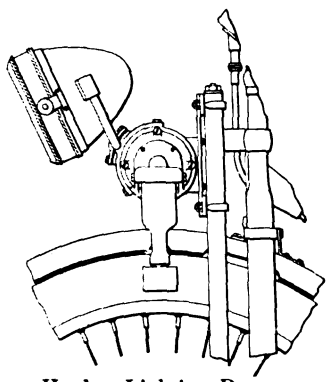


**Printz Spring Arrangement**

saddle frame. Stretcher members are fitted to the saddle itself and these are attached to plates or hangers carrying the vertical spring shafts. The patent is No. 1,151,613.

## HUGHES LIGHTING DEVICE

In combination with a dynamo and headlight, Patent No. 1,146,939 provides for an ingenious means of driving the dynamo from the front tire of a motorcycle or other motor vehicle. The dynamo, which is mounted with its armature shaft horizontal and lateral to the axis of the vehicle, has on its shaft a special form of gear. At an angle to the same and movable in that regard is a drive-shaft, carrying on its lower end a hollow pulley designed to be



**Hughes Lighting Dynamo**

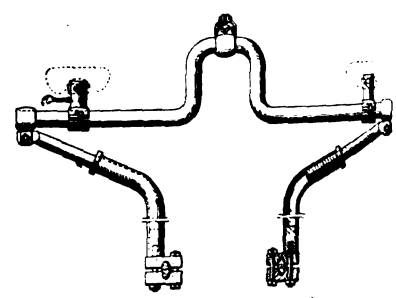
brought into contact with the side of the vehicle tire when the dynamo is to be driven to produce lighting current. On the shaft is fitted a friction clutch operated by a governor to regulate the speed and output of the dynamo. At the upper portion of the shaft is a pin-wheel, with teeth cut so as to allow of its rotation with the gear on the dynamo shaft, no matter what the angle between them. Means for keeping the shaft pulley in contact with the vehicle tire are provided. The inventor is Davydd C. Hughes, who assigns his patent to the Hughes-Wessling Company, of Chicago, Ill.

## GUSTAFSON SADDLE DESIGN

Carl J. Gustafson, chief engineer for the Henlee Mfg. Co., of Springfield, Mass., has been awarded Patent No. 1,152,172, for a motorcycle saddle, designed to have the seat portion yield vertically as well as have the usual pivot support. The design further has three-point suspension of the saddle. A long leaf spring is carried by a clip at the front, this clip attaching to the top tube of the motorcycle. The saddle frame consists of a yoke portion carrying pins to right and left at the rear ends, these pins supporting the coil and helical cantle springs. An arch connects the rear of the yoke and this arch bears on the leaf spring beforementioned. There is a cross-piece under the saddle cantle and to this are fastened the ends of a V-piece made of round wire stock. The lower spring coils are attached to a lug fitted to the rear fork of the motorcycle. Gustafson has assigned his patent to the Hendee company.

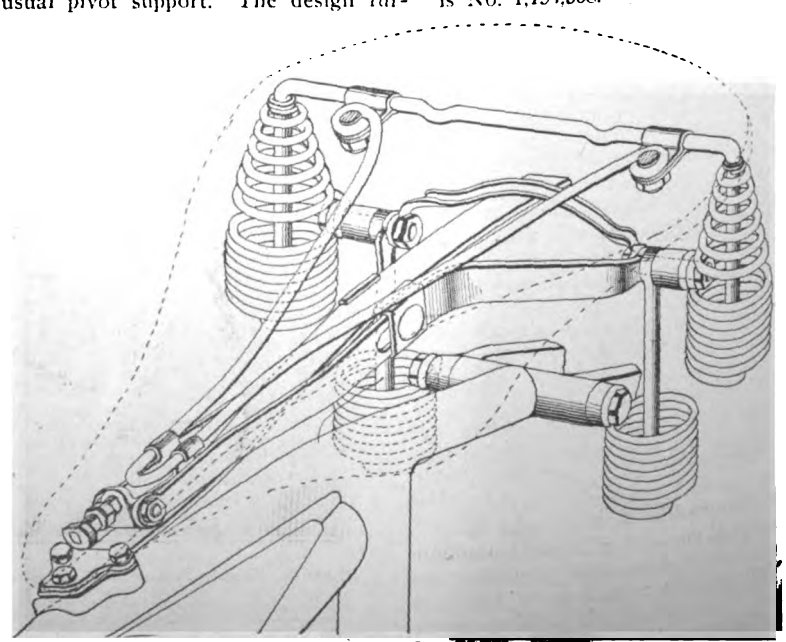
## HANNA TWIN SEAT FRAME

Tubular supporting means for a twin seat device which gives lateral adjustment to the seats in order to overcome the difference in weight between the two occupants



**Hanna Side-Seat Rigging**

are the features of a patent issued to Raymond G. Hanna, of New York, N. Y. The upper frame is arched in the center to attach to the saddle post and has its ends projecting to right and left. On the arms so formed are fitted saddle supports clamping in place and movable toward or away from the arch. There are other clamps at the extremities of the upper frame, and these go to the rear forks of the motorcycle and attach by special clamps. The patent is No. 1,154,308.



**Gustafson's Design for Saddle Frame**

# With the Manufacturers

## CRUDE RUBBER IMPORTS ARE 18,659,660 POUNDS

Crude rubber shipments to this country continue to be heavy, the figures for the month of July, 1915, showing 18,659,660 pounds imported. While this is slightly under the figures for June, 1915, which were 18,785,812, it is considerably in excess of the month of July, 1914, when the shipments reached but 9,579,124 pounds. The United Kingdom continues to furnish the bulk of the shipments, a total of 8,985,067 pounds being received from there during the month. Brazil also contributes heavily, shipping 3,263,561 pounds in July, and the East Indies 5,064,392 pounds.

The first seven months of 1915 show a total of 123,685,163 pounds imported. This is compared with 85,601,360 pounds during the period in 1914, and 68,070,989 pounds for the period in 1913.

## GOODYEARS IN JAPAN

That Goodyear tires are in much demand in Japan and are giving excellent service, is vouched for by a letter recently received by the Goodyear Tire & Rubber Company, of Akron, O. The letter was from S. Kuroda, of Kuroda Brothers, dealers and exporters at Los Angeles, Cal., and ran, in part, as follows:

"We often receive orders from Japan asking for Goodyear equipment. That in itself proves that Goodyears are running most satisfactorily and are giving excellent service on the roads of Japan. The people over there are using more motorcycles and bicycles every year, and the result is that our business is growing very large. We have the strongest regards for Goodyear tires, and have been able to establish a trade that is certainly well satisfied with your product. Nearly every bicycle and motorcycle we send over is Goodyear equipped."

## BALL BEARING IMPORTS

Imports of balls and bearings during July, 1915, amounted to $149,992, slightly in excess of June, 1915, when the valuation was $108,206. During July, 1914, the valuation reached $159,816. The first seven months of 1915 show a valuation of $881,604, a decrease when compared with $1,037,537 for 1914, and $1,573,904 for 1913.

Remaining in the warehouse as of July 31, 1915, were balls and bearings to the value of $7,235,850, compared with $18,881,858 on July 31, 1914, and $34,634,639 as of June 30, 1915.

## ACCESSORY MEN AT SHOW

Cincinnati, Ohio.—The annual automobile show, held last week, while not participated in directly by motorcycle dealers, included numerous exhibits of interest to all motordom, and especially those of several tire and accessory concerns. Among these were the Cincinnati Oil Works Company, Fischer-Griffin Storage Battery Company, Edward Manufacturing Company (portable garages), Heisey-Robbins Company, C. A. Kuhr, Miami Vulcanizing and Rubber Company, Paragon Refining Company, Ohio Rubber Company, Perfection Carbon Remover Company, and all of the leading tire manufacturers. The Goodyear Company took advantage of the show to use large advertising space featuring the names of local handlers of the Goodyear tire.

## GENERAL RUBBER MFG. CO.

Akron, Ohio.—The General Rubber Manufacturing Company is the name of the latest entry in the tire and rubber field, in this city. The company was organized recently with a capital stock of $200,000, M., A. F. and P. F. O'Neil being those principally interested.

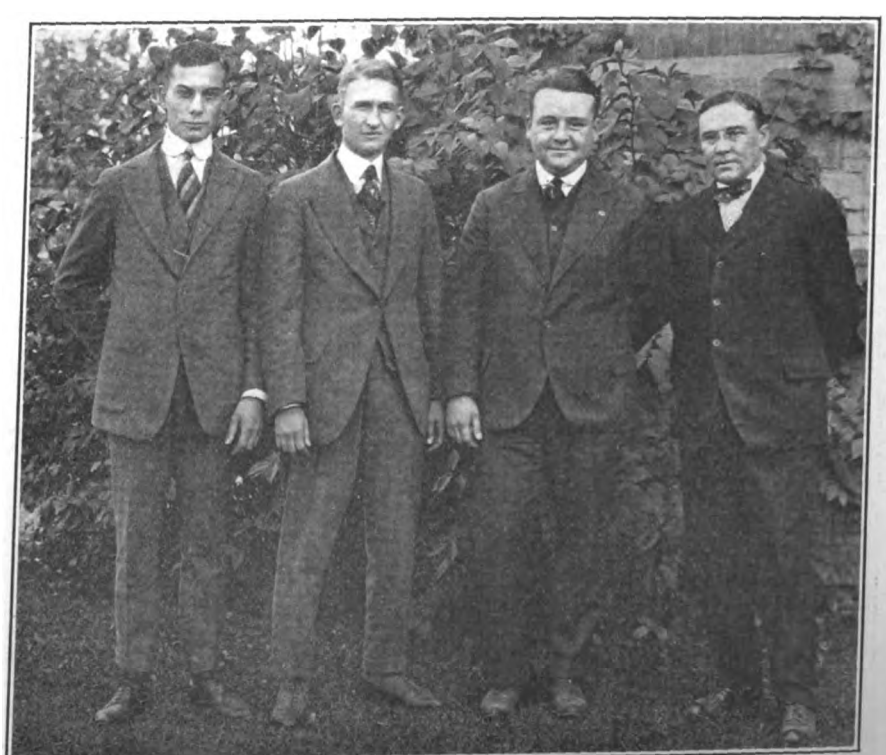
## HITTING THE SALES TRAIL

Three of the Smith Motor Wheel factory representatives have just left on their first swing around the Central States. Harold Schwind, who represented the Harley-Davidson on the road for two years, has joined the Motor Wheel staff, and will cover Indiana, Western Ohio and Kentucky. Otto B. Pupikofer has the State of Michigan for his initial trip, and L. C. Schwab will cover Iowa, Kansas and Nebraska. James E. Van Toor, assistant sales manager, will supervise all sales correspondence to the dealers.

## TWO NEW FEATURES IN THE MICALITE GOGGLE

Strauss & Buegeleisen, manufacturers of eye-shields and goggles, at 489 Fifth avenue, New York, are offering to the trade a new type of goggle, with at least two innovative features. Perhaps most important of these is the fact that while the "Micalite" goggle which they make has all the appearance of the ordinary celluloid eye-shield, and at the same time is possessed of all its virtues, its introduction marks a distinct advance in goggles of this type since the material from which it is made is an absolutely unburnable celluloid-like substance. It is extremely flexible and absolutely transparent.

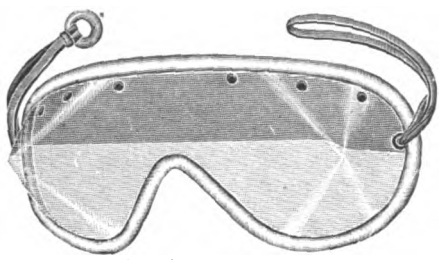
## FOUR BUSINESS-GETTERS FOR SMITH MOTOR WHEEL



Left to Right, James L. Van Toor, Assistant Sales Manager; L. C. Schwab, Traveler in Iowa, Kansas and Nebraska; H. Schwind, Traveling Western Ohio, Indiana and Kentucky; O. B. Pupikofer, Traveling Michigan

Digitized by Google

The other novel feature of the Micalite goggle is the two-color effect, which makes the device readily usable under ordinary conditions or in the glare of either the sun or a bright headlight; the two colors, however, are obtained without the use of a double layer of micalite. The transparent sheet is dyed across the top of a dark amber color; the bottom is left clear for ordinary usage. This method eliminates the seam across the center of the eye-shield and goes a long way towards making for clear vision. At the same time it is impossible for dirt or



**The Micalite Goggle**

dust to work up between the two layers and dim the goggles. It is claimed that the coloring process is so efficacious that it is absolutely impossible for the amber portion to fade or otherwise become impaired with usage.

The goggles are bound with soft rubber padding and are provided with a flexible headpiece, which holds them firmly against the forehead.

Micalite goggles are produced in four styles: No. 20 is perfectly clear; No. 21 is full amber; 2021 is clear bottom, with dark amber top; 2121 is light amber bottom with dark amber top.

## ALLAN BECOMES BRANCH MANAGER

The Burd High Compression Ring Company, of Rockford, Illinois, announce the appointment of Mr. Robert Allan, as district branch manager for Northern California. Mr. Allan was formerly attached to the Dallas, Texas, office, and assumes his new position with a full knowledge of Burd piston ring possibilities and the company's sales policies. Mr. Allan's headquarters will be at San Francisco, where he has taken offices and will carry a complete stock, at 847 Phelan Building.

## SILVEX CO. WILL PROTECT JOBBERS AND DEALERS

One of the most interesting announcements of the present year, is the one just made by Mr. E. H. Schwab, on behalf of the Silvex Company, manufacturers of the Bethlehem five point spark plug.

"This concern," stated Mr. Schwab, "has decided to take immediate and drastic action in regard to the cutting of prices on the Bethlehem spark plug by the so-called mail order and cut-price houses with a view of giving to the legitimate jobber and dealer in automobile accessories, the protection to which they are entitled.

"Having created a tremendous demand for Bethlehem plugs by an insistent and expensive campaign on advertising, the Silvex Company is in a position to understand the havoc raised by these cut-price houses insofar as the business of the legitimate dealer is concerned."

Mr. Schwab has stated on numerous occasions that it is his belief that a manufacturer of automobile supplies is in no position to expect the co-operation and support of the legitimate jobber and dealer when, at the same time, he sells either directly or indirectly to a cut-price house with the full knowledge of the fact that such house will inevitably cut prices in order to secure business on the product.

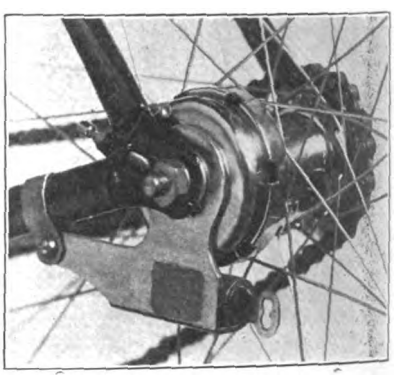
An idea of the importance of this announcement can be obtained when it is known that Mr. Schwab has stated that the adoption of this policy means the voluntary surrendering of a business of more than 100,000 Bethlehem plugs per year, which can be secured without difficulty from cut-price houses.

"The Silvex Company," further stated Mr. Schwab, "invites suggestions from all legitimate dealers as to further stands that may be taken to give them complete protection."

## GASOLINE SHIPMENTS IN JULY SHOW DECREASE

Gasoline shipments during July. 1915, were not as heavy as during June, at which time they were exceptionally heavy. The United Kingdom, for example, received but 2,080 gallons during July, 1915, as compared with 3,731,682 gallons during June. Shipments to British possessions, however, continue to be very heavy and it is possible that these are reshipped to the British Isles for eventual use. Canada during July received 4,627,443 gallons, compared with 2,780,343 gallons during July, 1914, and 5,048,451 in June of this year. British Oceania shows a large gain over 1914 when but 356,220 gallons were shipped, compared with 1,953,763 gallons during July this year. No shipments were made to France during the month, but the increased demand for gasoline is reflected in the total shipments of June, 1915, when 34,634,679 gallons were shipped from this country, and July, 1914, when 18,881,858 gallons were shipped. During July of this year a total of 7,235,850 gallons were shipped.

## THE POPE "FOR SURE" LOCK

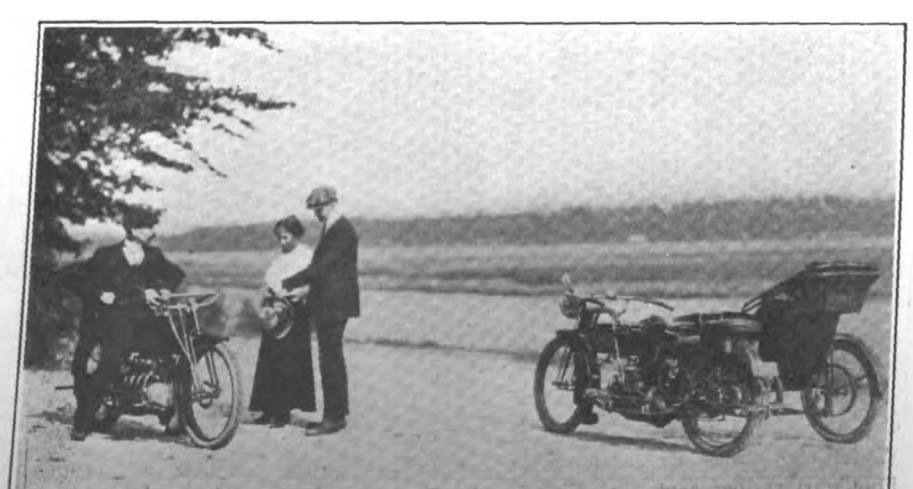


**Fitting to Arm of Coaster Brake and Remaining Permanently in Place, This Lock Prevents Rear Wheel Being Rotated**

## RANDALL-FAICHNEY REORGANIZATION SOON

Boston, Mass.—A committee of the creditors of the Randall-Faichney Company, of Jamaica Plain, purchased the property of the firm for $150,000, at the receivers' auction sale on September 30. Under a plan for reorganization decided upon by the purchasers, a new company, known as the Randall-Faichney Company, Inc., is to be formed, with a new cash capital and board of directors. The business will be continued as before under the joint direction of Randall and Faichney.

## GIVING THE NEW MODEL THE ONCE-OVER ON THE ROAD



**Having Stopped the Henderson Factory Rider on His 1916 Mount, the Sidecar Enthusiasts Are Discussing Salient Features of New Season's Product**

## HENDERSON EXPORT TRADE SMASHES ALL RECORDS

Tom Henderson, of the Henderson Motorcycle Company, of Detroit, advises that his business in 1916 models, both for domestic use and for export, continues to smash all previous records. For instance, to Holland alone, the Henderson Company is now shipping machines at the rate of 25 a week.

## LYNN COMPANY INCORPORATES

Lynn, Mass., October 12.—The Lynn Cycle Company has recently been incorporated for the purpose of selling motorcycles and bicycles. The capital stock is $5,000. The incorporators are: Elmer Rhoades, Jacob Newman and B. E. Hayes, all of Lynn.

## PROGRESS IN MOTORCYCLE DESIGN

### Development of Machine Since 1912 Shows Increasing Use of Variable Gears and Mechanical Lubrication as Well as of Foot Starters—Both Efficiency and Comfort Increased.

By MURRAY FAHNESTOCK

TO THE motorcyclist, show time with its anticipations and pleasant realizations, is as Christmas time to the small boy. Those who have ridden motorcycles for many years look with increasing interest for the latest products of the motorcycle designers, and often compare them with the motorcycles that have furnished such pleasant rides in the past.

In previous years, it has been possible to class all motorcycles in a single group, but this year there is a new type on the market that should be classified by itself. There are now enough lightweights to make their classification interesting, and this brings up the question as to just what is the difference between the lightweight and the standard types of motorcycles and where shall the line be drawn?

#### Classification Is Uncertain

In this grouping, the writer has arbitrarily taken one hundred and fifty pounds and four horsepower as the limits of the lightweight class—anything larger being considered as a standard motorcycle. This is hardly fair to the light twins which really belong betwixt and between the two classes, but the light twins are not yet numerous to justify a class of their own. Until the F. A. M. legally defines the lightweight, its true status must remain open to argument, one rider's opinion being as good as another's. The Wilson Cyclemotor, the Dayton, and the Smith Motor Wheel are so different from the more conventional types of motorcycles that misleading results would be obtained if they were included in the classifications.

The racing models are also eliminated from this classification, as they are few in number and are not often seen on city streets or on the open road. The prices are taken without the special electric lighting equipment, which is offered as optional in many cases.

#### Horsepower Rating Increase

The rated horsepower of the average motorcycle has increased from about 5 horsepower in 1912, to 7.3 horsepower in 1916, the drop from last year being due to the more conservative ratings now given to the motors and not to any decrease in motor sizes.

The large single cylinder motorcycle has been steadily losing ground, and has decreased from 32 per cent last year, to a percentage of 22 for 1916. The single cylinder will probably retain a permanent place as a utility type, as it is cheaper to run than any other. The four cylinder types are represented by the Henderson and the Militaire, the latter being built along automobile lines, particularly as regards frame and power unit.

#### Diversity in Valve Location

Valve location is the subject of increased interest this year, due to the tendency towards changes in this direction. All the valves of the standard types of motorcycles are now mechanically operated, but a great diversity of opinion prevails as to the best location. Fourteen per cent of the 1916 models have the valves placed side by side, and seven per cent favor overhead valves. Placing the inlet valve over the exhaust valve is still used on 71 per cent of the 1916 models, the remaining types being the valveless Schickel and overhead inlet valves of the light Thor twin.

Chain drive is used on 96 per cent of the models, or on all save the shaft drive Militaire, double chain drive by means of roller chains now being the accepted standard for nearly all of the heavier motorcycles.

With the belt drive, battery ignition has also departed from the field, magneto ignition being standardized on all the heavier models. Information is meagre as to the number of 1916 motorcycles furnished with double brakes, although dual brake control has become quite general and is very convenient in use. According to the table, the number of models fitted with double brakes has decreased slightly this year to a percentage of 22, but this may be due to a tendency to fit one large and reliable brake instead of the smaller brakes previously fitted. The wheelbase has increased 58 inches this year, which is greater than it has ever been and certainly makes for greater riding comfort. Little data is obtainable as to weights, so they are not included in the table.

#### More Fuel Capacity

The capacity of the gasoline tanks is slightly greater this year than ever before, while the oil capacity is slightly less than that of last year. The fact that mechanical lubrication is used on 86 per cent of the latest models may mean that less oil will be required, because the oil will be used to better advantage. Foot-starters have

### STORY OF FIVE YEARS' DEVELOPMENT IN FIGURES

Digitized by Google

become deservedly popular, and have increased from seven per cent in 1914, to 91 per cent this year.

While two-speed gears have decreased from 49 per cent last year, to 32 per cent this year, the reduction is due to the increase of the three-speed gears from 9 per cent last year, to 43 per cent in 1916, and not to any decrease in the popularity of change-speed gears. Clutches are fitted to all models, and while some of the two-speed gears are of the planetary type, the three-speed gears are invariably of the sliding type.

In spite of the improvements in the 1916 motorcycles, there has been a notable decrease in prices, a drop of nearly twelve dollars from the prices of last year being shown in the table, and this is in spite of the fact that two and three-speed gears are far more generally included than they were last year. Riders surely can't complain.

# DATA CONCERNING LIGHTWEIGHT MODELS

WHILE some lightweight models made their appearance at the New York Show last year, they were not then sufficiently numerous to justify a separate classification and so it is not possible to compare the past of the lightweight with its present. There are seven representative lightweights now on the market and the following results have been obtained by averaging their chief characteristics.

The average 1916 lightweight is rated at 2.75 horsepower, but this should be quite sufficient, for a solo mount. All of these lightweights are fitted with single cylinder motors, the light twins having been classed with the standard types of motorcycles because they are fitted with motors of six and seven horsepower. Since 72 per cent. of the lightweights are fitted with two cycle motors, and the two cycle single cylinder has the same number of impulses as the twin motor of the four cycle type, the lightweight has less need of more than one cylinder than the heavier types. Being two cycle they are also valveless; with the exception of the Tiger, a two-valve two-stroke, the Miami, four-stroke, with its side by side valves, and the Pope four-stroke with its valves in a pocket at the side.

### Divided as to Transmission

Chain drive and belt drive each have a percentage of fifty, if we count the combination drive of the Excelsior in each division, thus showing that the adherents of each form of drive are equal. Two speed gears are fitted on 43 per cent of the lightweight models, and three speed gears are found on 29 per cent, thus showing that the modern lightweight is quite generally fitted with change-speed gears.

Magneto ignition is widely used on the 1916 models, one only having battery and coil, the Miami model 14. A single brake is usually considered quite adequate for a lightweight. Information as to the tank capacities is incomplete but, in general, it may be stated, that the average lightweight will carry about one and a half gallons of gasoline and about a quart of oil.

### Wheelbase and Weight

The wheelbase of the lightweight averages 50.3 inches, which is about eight inches less than that of the standard types. Foot starters are used on about 29 per cent of the lighter models. Many of this class are so light and easily handled that they are started by the rider paddling off with his feet upon the ground, and no starters are therefore fitted.

The weight averages 113 pounds and the light weight is one of the reasons that so much can be done with a comparatively small motor. The price of the average lightweight is $138.

## ANSWERS TO TECHNICAL INQUIRIES

**What's Your Problem? If You Have One Let Us Help You**

### WAGNER PARTS

*PLEASE advise me where I can get parts for my Wagner single cylinder motorcycle; (2) where I can get broken bicycle frames repaired; (3) I have a magneto marked Ruthardt on my machine and would like to get some parts for the same. Please give address of makers.*

*Buffalo, N. Y.* T. J. S.

(1) From the Motorcycle Accessories Company, St. Paul, Minn. This firm took over the Wagner Company. (2) Your city directory will give you the names of some repairer who will do the work or of some welding firm that takes such jobs. (3) The Ruthardt magneto is the same as the Herz. Write Herz & Company, 245 West Fifty-fifth street, New York, giving number on magneto, also any lettering found on it.

### PARTS FOR MITCHELL

*AFTER much inquiry among dealers in my neighborhood and writing to others in different places, I am unable to get parts for my Mitchell motorcycle. I would like a new battery case, an inlet valve and a right side bearing.*

*Des Moines, Iowa.* C. K. L.

We fear that we cannot help you in getting parts for your mount. It is a matter of nearly eight years since the Mitchell ceased to be manufactured, and no doubt all spares have been exhausted long since. If you desire to keep the machine, have the parts you desire made to order. However, we think that you will find this rather expensive, so advise your getting a modern mount.

### OPERATING B. & B. CARBURETER

*HAVING a motorcycle fitted with a B. & B. carbureter and not being familiar with its operation, I am writing to ask you for information on the subject. Please give the position of the levers for starting, hill-climbing and running at speed.*

*Chicago, Ill.* FRANCIS JACQUES.

The two levers on the B. & B. carbureter are: the lower one for the throttle and the upper or shorter one for the air. There is no automatic air valve or lift of the needle valve in this carbureter. For starting, have the air lever closed (all the way to the left) and the throttle lever from ¼ to ½ way open. As soon as started off, bring throttle lever to about one-quarter opening and keep air lever as far open as possible; usually this will be about one-half. To climb hills give more throttle and more air, moving both levers to the right, throttle first and air afterwards. For coasting, close throttle and have air lever fully open. The exact positions of each lever will depend on the running of the motor, on road conditions, etc.

### LINING UP A SIDECAR

*BEFORE fitting my sidecar to the machine I have been told that the easiest riding is obtained with the machine leaning in toward the car. The dealer says that all wheels of the outfit should be vertical. Please advise me.*

*Boston, Mass.* ARTHUR VERNON.

The dealer is right, the motorcycle and sidecar wheels should be vertical, or as near as possible to bring them so. If the machine leans inward or outward from the car tires will be worn on one side, the sidecar connections will be subjected to an undue strain and a breakage will sooner or later result. This breakage may occur miles from home and may be disastrous, so keep the alignment of the combination perfect. In the *Motorcycle Manual* will be found directions for aligning a sidecar so as to get the best results.

### DIFFERENT THREADS THE CAUSE

*IN a recent lot of screws which I purchased, nuts of the same diameter do not fit the screws themselves, and almost every nut put on ruins the bolts or the nuts themselves. The nuts are ⅜ inch, but have more threads than the ⅜ inch bolts.*

*Brooklyn, N. Y.* JOHN FARQUHAR.

You probably have United States standard bolts and S. A. E. nuts. The bolts have 16 threads per inch and the nuts 24 threads per inch. Naturally, they do not fit. The S. A. E. system of threads differs from the regular standard in other respects, the idea being possibly to force users of motor cars to buy their screws and nuts from the automobile manufacturers or supply houses, as they could not get them anywhere else. The move, if it was such a move, failed, but there has since been much confusion as a result. Hereafter, get all U. S. standard threads or adopt the S. A. E. system throughout.

### CLEANING MUDGUARDS

The caked mud on the inside of the guards often takes considerable time to remove after having been in place for a week or so, but the following method of cleaning will generally enable the shop man or rider to do an effective job in comparatively short time. The mud should be wetted with a sponge or dripping rag, and then scraped loose with the flexible blade of a common table knife, kept moist with water. Chisels, screwdrivers or other sharp instruments should not be used for mud-removal.

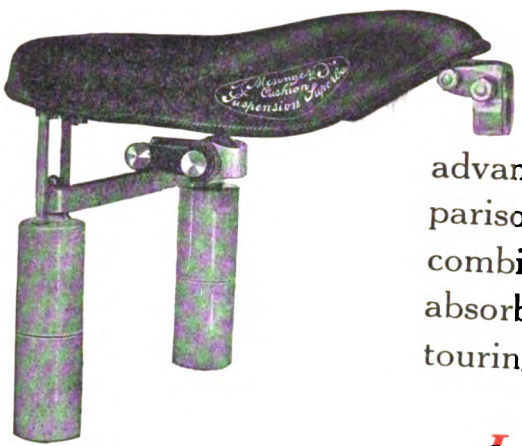
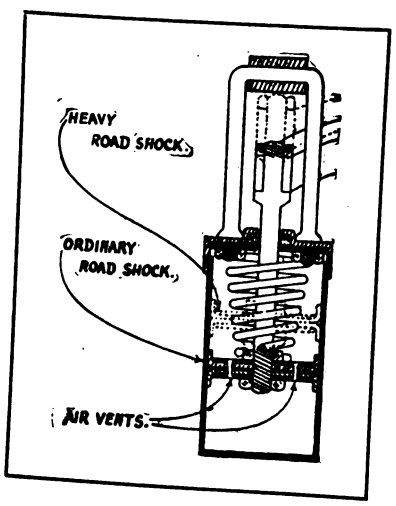
# MESINGER—The Saddle that has created a new standard in riding Luxury

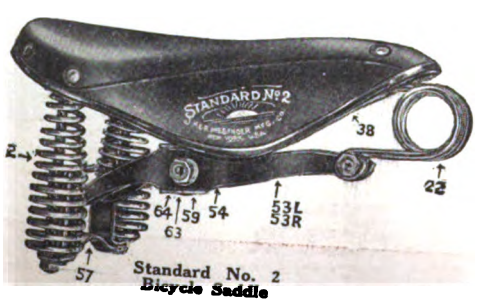


The MESINGER AIR CUSHION SUPERBA is so distinctly an advance on all other saddles made that comparison would be ridiculous. Imagine it! A combination of coil springs and a real shock-absorber action—the same as found on the big touring cars. In addition, you get



## *Lowest Saddle Position*
## *Real Air Springing*
## *New Height Adjustment*

The new height adjustment is the latest MESINGER innovation. This permits the rider to raise the saddle to any position he may require. This new saddle fastening is permanent for any kind of Motorcycle having spring seat post, L post or upright posts.



Standard No. 2 Bicycle Saddle

**Mesinger Air Cushion Saddles are covered by the fullest guarantee ever placed on any Motorcycle Saddle.**

# LATE BICYCLE NEWS CROWDED OUT OF THE SUPPLEMENT

## RIVERVIEW RACING SEASON CLOSES

CHICAGO, October 11.—Yesterday marked the closing of the Riverview Velodrome for the season. There was plenty of action on tap in all of the events run at the last meet and the crowd was an enthusiastic one. Arthur Van Der Palt won the championship of the Belgian-American Cycling Club, one of the features of the meet, he beating out the other members of the club in a style that was one of ease.

Roy McWhirter, the star of the Northwest Skating Club, won the ten-mile open for the amateurs. McWhirter rode in great form and beat out Fred Samlow and Charles Minnetti in a close finish. The contest for the leader of the most laps in both the five-mile Belgian championship and the ten-mile open was a hot one. The novice race, at two miles, which was reserved for Belgian riders, was won by Phil Klaes, who also won the lap prize in the Belgian titular race.

Charles Piercey, the Australian, won the one-mile point race for the professionals. Piercey won both heats and scored six points, while Joe Kopsky, scoring three points, finished second and Gus Wohlrab ran third. The novel pursuit race, in which Rudi-Russe and Wohlrab, mounted on a tandem, was opposed to Piercey and Kopsky, on single wheels was marred by an accident to the tandem, when a puncture sent Wohlrab and Rudi-Russe crashing to the bottom of the track just when they looked like winners. Ralph Schepens, the Belgian, won the ten-mile motor-paced race from Olaf Lodal, taking the event by over two laps. summary:

One-mile point race, professional—Won by Charles Piercey, Australia, 6 points; second, Joe Kopsky, Bohemia, 3 points; third, Gus Wohlrab, Jersey City, 2 points; fourth, Rudi-Russe, Austria, 1 point. Piercey won first and second heats. Times—2:35 and 2:50.

Mixed match pursuit race, professional—Won by Piercey and Kopsky, on singles; second, Wohlrab and Rudi-Russe, on tandem. Distance, 4½ laps. Time—1:41. Tandem fell.

Two-mile novice—Won by Phil Klaes; second, Emil Saelens; third, Rene Neirynck. Time, 5:02.

Five-mile Belgian-American C. C. championship, amateur—Won by Arthur Van Der Palt; second, Rene Neirynck; third, Phil Klaes. Time, 13:02.

Ten-mile open, amateur—Won by Roy McWhirter, N. W. S. C.; second, Fred Samlow, unattached; third, Charles Minnetti, Riverview C. C. Time, 25:57.

Ten-mile motor-paced race, amateur—Won by Ralph Schepens, Belgian-American C. C.; second, Olaf Lodal, unattached. Time, 16:10.

## 10,000 SPEED FANS SEE DUNLOP RACES

TORONTO, Ont.—Dunlop Day, the greatest of all occasions for Canadian bicyclists and motorcyclists, was celebrated at the Exhibition half-mile track on Monday, October 11, when the twenty-second annual Dunlop trophy team bicycle road handicap and many other events were staged. The star of the day was Hans Ohrt, the world's amateur bike champion, who not only disposed of Art. Spencer, the crack Canadian rider, in two straight heats of a match, but also grabbed the time prize in the feature grind in which there were fifty-four starters and thirty-nine finishers. Ohrt put up one of the most sensational demonstrations of grit and pluck ever seen in these parts. Riding practically alone throughout, Ohrt bowed down the big field and covered the distance of 16 3-10 miles in 42:37. He finished in twenty-third position, taking a place prize as well as the top time reward.

The trophy classic was also featured by a thrilling finish among the first quartette of struggling contestants who fell in a heap after they had crossed the tape in a bunch. The trophy winner was N. McNamara, of the MacDonald Bicycle Club, Toronto, who started with a 6½-minute allowance. His corrected time was 45:51. It was the first bike race of his career. The team prize was won by the MacDonald Club, whose first three representatives finished in first, fifth and sixth positions. Spencer started with Ohrt on scratch, but soon retired with a flat tire.

There were five motorcycle whirls in addition to the bicycle attractions, in three of which "Crazy Horse" Verrill, on an Indian, ripped through the ambient at a pace that was dizzying. Baribeau, of Toronto, was his closest contestant, while Bill Goudy, astride an Indian also, was a straggler. The best motorcycle race of the day was provided when Wilfrid Morrison, with an Excelsior, trimmed Fred Miles, Indian, in a three-mile match affair. Time, 3:44.

Ten thousand people were there and the receipts went to the Red Cross Society.

### JENSEN WINS FIRST INTER-CLUB TITLE RACES

Bronx, N. Y., October 11.—The first two unpaced races in the series of four to decide the championship of the Inter-Club Amateur Cycle Road Racing League were contested Sunday, October 10, at Pelham Park, New York City, with Edwin Jensen, of the Century Road Club Association scoring ten points by winning both the five and ten-mile events.

The roads were in perfect condition and the times made by Jensen in both races were fast. In the five-mile contest he went the distance in 12:47⅗, while in the ten-mile race he was clocked in 26:00⅖.

James Papesca, of the Unione Sportiva Italiana, was the runner-up to Jensen in each event and was credited with six points. Eugene Aickelin, of the New England Wheelmen, wound up the competitive with four points, finishing third at five and ten miles. The final races of this series at one and ten miles will be decided next Sunday. The contestants finished in the following order:

FIVE MILES:

| | |
|---|---|
| Edwin Jensen, C. R. C. A. | 12:47⅗ |
| James Papesca, Un. Sport. Italiana | 13:13⅘ |
| Eugene Aickelin, New England Wheelmen | 13:14⅘ |
| Paul Reinike, Acme Wheelmen | 13:29⅗ |
| Albion L. Evard, C. R. C. of A. (N. J.) | 13:47⅗ |
| Julius J. Schmidt, C. R. C. of A. (N. Y.) | 13:49⅗ |
| Henry Garbade, Glunz Wheelmen | 14:08⅘ |
| Robert Henderson, Bay View Wheelmen | 14:41⅕ |

TEN MILES:

| | |
|---|---|
| Edwin Jensen, C. R. C. A. | 26:00⅖ |
| James Papesca, Un. Sport. Italiana | 26:58⅘ |
| Eugene Aickelin, New England Wheelmen | 27:36⅘ |
| Paul Reinike, Acme Wheelmen | 27:58⅘ |
| Albion L. Evard, C. R. C. of A. (N. J.) | 28:47 |
| Julius J. Schmidt, C. R. C. of A. (N. Y.) | 28:54 |
| Henry Garbade, Glunz Wheelmen | 29:56⅘ |

The times made by Jensen established new American records for the distances: five miles, 12:47⅗; ten miles, 26:00⅖.

## VICTORIA'S LIVE BICYCLE DEALERS

VICTORIA, B. C., October 12.—One of the largest bicycle stores in the Canadian West is the place of business of Peden Bros., on Government street, Victoria, which has grown rapidly from a "hole-in-the-wall" to its present large size. The store reflects great credit upon the proprietors, inasmuch as the senior partner of the firm, Robert Peden, has just turned his thirty-first birthday. Tom Peden, a younger brother, is the second member of the firm. Robert started as an apprentice in the old store, which was conducted by a Mr. Munholland until the Peden boys bought him out.

In 1911 their business had grown to such an extent that they were compelled to rent a warehouse for storing their reserve stock and in 1912 they moved into larger premises, the front of which they remodeled, putting in double-deck windows. They also increased the floor space by adding fifty feet to the rear of the building. The office is located on a mezzanine gallery to give as much space as possible for display purposes.

The bicycle repair department is one of the best-equipped in the country and is under the supervision of a competent man. A feature of this business is that one employee has been given the responsibility of looking after the window trimming and the local advertising. The staff of the selling and repair department is made up of eight men in addition to the proprietors. Special attention is paid to commercial bicycles.

The Peden brothers are ardent sportsmen and a part of the store is devoted to the sale of guns, ammunition and fishing tackle.

### BEATS JENSEN'S TIME

Immediately after the Inter-Club Amateur Cycle Road Racing League's Championship race at New York on Sunday, October 10, Nelson Johnson, of the New York Division of the Century Road Club Association, decided to attempt to break the record for ten miles made by Edwin Jensen on the same date. After making a false start, in which he was forced to ride one-mile, he covered the distance in 25 minutes, 46⅘ seconds, bettering Jensen's time of 26:00⅖.

# GOULLET MAKES CLEAN SWEEP AT NEWARK

NEWARK, N. J., October 11.—Alfred Goullet, the light haired rider from Australia, swept everything before him at the local Velodrome here on Sunday afternoon. Goullet is not supposed to be at his best in the cool weather, but he surely rode in mid-season form on Sunday. He took first place in two races, and teamed with Alfred Grenda won the four-cornered International team match race. There was no stopping the Australian rider, who traveled around the boards with great speed.

Goullet's first victory was in the Brassard race. He did not finish first in this event, but Jackie Clark was disqualified for riding above the black line and giving Goullet a high ride all around the last turn. Goullet's greatest triumph was in the ten mile open race when he led a big field of stars to the finish line. Sandwiched in between these two races came his victory over Kramer and Lawson, Spears and McNamara, as well as Verri and Moretti in the four cornered match affair.

The ten mile open was the best race of the afternoon. With three laps to go Marcel Dupuy went to the front and took Goullet with him. "Goullie" was content to ride in third place, however, sticking behind Gordon Walker. Two laps from home Dupuy was leading, while the other stars followed behind in this order: Walker, Goullet, Grenda, McNamara, Clark, Hill, Menus Bedell and Kramer. Kramer had a "Chinaman's chance" of winning, riding in ninth position two laps from home. He stuck to the ship, however, and was finally able to grab off fifth place. Goullet passed Walker easily on the last lap and had McNamara to battle with to the tape. There was only about a foot's difference between the wheels as they crossed the finish mark. Grenda finished third and Clark was just able to lead Kramer home.

If Clark had stuck to the pole as the rules require, Goullet would have probably ridden around him and won the Brassard race easily. Clark, however, did not do this and rode high all around the last turn, making it practically impossible for Goullet to get around him. The referee saw this and disqualified Clark immediately, much to the sorrow of the fans who booed and hissed Goullet as he rode around the track.

In the team match race, Kramer doing the sprinting for his side won the first heat. The second time Kramer gave Lawson a good pull and then let the "Swede" alone to battle it out, but Iver was not there and only got third, Goullet and Spears leading him home. The last heat was also won by Goullet. When Kramer saw he could not win he let up and finished only fourth.

**Riders of All Nations Lining Up for the Ten Mile Open**

**Waiting for the Starter's Whistle in the International Team Race**

Half-Mile Novice (Amateur)—Won by Joseph Renda, Newark; Frank Kernan, Newark, second. Time, 1m. 16⅘s.

The Brassard, at One Mile (Professional) Alfred Goullet, Australia, vs. A. J. Clark, Newark—Won by Goullet. Time, 2m. 54⅖s. Last eighth mile 12⅖s. Clark finished first but was disqualified for riding in an illegal manner.

One-Third Mile Handicap (Amateur)—Won by Frank Scaduto, Newark (50 yards); Frank D. Huber, Newark (65 yards), second; Jerry Nunziata, Yonkers, N. Y. (40 yards), third; Christien Dotterweich, Newark (30 yards), fourth. Time, 37⅖s.

Two-Mile Invitation Handicap (Professional)—Won by Menus Bedell, Lynbrook, L. I. (40 yards); Percy Lawrence, San Francisco (55 yards), second; Worthington L. Mitten, Davenport, Ia. (70 yards), third; William Hanley, San Francisco (scratch), fourth; Eddie Madden, Newark (100 yards), fifth. Time, 3m. 47⅗s.

One-Mile Team Match Race (Professional)—Won by Alfred Goullet, Australia, and Alfred Grenda, Australia; Frank Kramer, East Orange, and Iver Lawson, Salt Lake City, second; Robert E. Spears, Australia, and Reggie McNamara, Australia, tied with Francisco Verri, Italy, and Cesar Moretti, Italy, for third place.

First heat won by Kramer and Lawson; Goullet and Grenda, second; Moretti and Verri, third; Spears and McNamara, fourth. Time, 2m. 22⅘s. Last eighth mile, 12⅕s. Second heat won by Goullet and Grenda; Spears and McNamara, second; Kramer and Lawson, third; Moretti and Verri, fourth. Time, 2m. 25⅗s.

# Along Bicycle Row

## At the New York Show

### GREAT WESTERN DISPLAYS ITS LEADING LINES

GREAT WESTERN bicycles to the number of fifteen are attractively staged at the stand of the Great Western Mfg. Co. Two of the recent models are a motorbike and a brace-frame or arched truss model, both being in men's or diamond frame style. One of the machines shown is a miniature but perfect-working cycle designed for the tiny son of Vice-President Lonn, this little cycle being mounted on an exhibition stand in full view of all visitors.

The twelve models on view, most of which are regular frame machines, are divided up among the three main series put out by the company—Crown, Adlake and American bicycles. The Number 10 machine is the same as the Motorbike model, but has a single bar and arched top tube.

### BICYCLES AND ACCESSORIES FOR N. Y. SPORTING GOODS

PIERCE and Stag bicycles head the list of goods shown at the booth of the New York Sporting Goods Company, metropolitan distributors also for the Indian motorcycle. There are seven models of the Pierce and two of the Stag. The Smith Motor Wheel is also exhibited, as well as a full line of accessories for both motorcycles and bicycles.

The company not only handles the products of a number of manufacturers of accessories from all parts of the country, but also makes a few for itself. Among the most recent of fitments for the bicycle is the Sturmey-Archer three-speed hub. Exhibitor's own brand is the Infallible, seen in speedometers for the the most part.

### EXCELSIOR QUINTETTE INCLUDES A RACER

EXCELSIOR bicycles in five models, all with the firm's name plates, occupy the stand of the Excelsior Motor Manufacturing & Supply Company, along with the Excelsior line of motorcycles. Four of the models exhibited are diamond framed, for men's service, while the fifth is a racer, with suitable fittings, transmission and saddle. The construction of these wheels is of the same quality as that of the Excelsior motorcycle, with due regard to the differing class of two-wheeled vehicles.

### STORM KING MODELS LEAD IN LENG'S LINE

STORM KING bicycles in two models are the leaders in the numerous lines shown at the stand of John S. Lengs' Sons. These are shown in two models, one of which is all-nickel finish. A Monarch racer is a recent addition to the firm's line and vies in popularity with the roadster of the same name-plate. The lines shown are rounded out by the Gloriana, a moderate priced wheel.

The company handles bicycle and motorcycle tires with special non-skid tread, and a line of bells, saddles and general bicycle accessories. Samples of these are attractively displayed.

### FOURTEEN MODELS SHOWN AT WESTFIELD STAND

FROM the factory of the Westfield Manufacturing Company, in addition to the series of motorcycles, is displayed the Pope Special, leader of the Pope line, and especially adapted for use with the Smith Motor Wheel. It is an extra-strong mount, well constructed for commercial service as well as for the little motor attachment.

Many of the 95 different models have representatives at the company's stand, and among these are Columbia chainless and chain mounts, the latter with Sturmey-Archer three-speed hub, Pope Motorbike, Cleveland, Defiance and Niagara cycles. Another member of the Columbia family is a racer, and there is a Hartford model fitted with the three-speed Sturmey-Archer hub also. The Fay juveniles, Ladies' Niagara, Tribune "Blue Streak" and the 726H complete the line. The last mount is for the growing boy, having an 18-inch frame with 28-inch wheels and a short wheelbase.

### DISC FLYWHEEL ON CYCLEMOTOR OUTFIT

SIX sets of the Cyclemotor, on as many different models of bicycle, occupy the stand of the Cyclemotor Corporation. The most noticeable features of the power plant on this outfit are the disc flywheel, of uniform section, which is externally fitted, and the one-lever control. The latter, fitted to the right handlebar in each case, is of the friction-controlled type and operates the spark and throttle through a wire mechanism.

The muffler in unit with the motor and the characteristically-formed fuel tank, of good capacity, without interfering with the position of the rider, are also noticeable, as well as the round belt drive, the transmission means being of Spartan manufacture.

### HIGH-QUALITY EMBLEM MODELS ON VIEW

FIVE bicycles bearing the Emblem name-plates are shown in connection with the firm's line of motorcycles. The quintette on view includes a ladies' wheel with the remainder of diamond frame or regular models. Emblem bicycles are of high quality and enjoy a fine reputation in foreign lands as well as in this country, as is evidenced by the lively export trade of the Emblem factory.

### NINE NEW INDIANS EXHIBITED IN FIVE MODELS

SIDE by side with Indian motorcycles and sidecars, are shown nine of the new Indian bicycles at the Hendee Manufacturing Company's big stand. Speed riders naturally admire the racer, which like the others is finished in the well-known Indian red. The ladies are catered to by a model especially designed for them, while those who favor the motorbike styles, can find two different models.

The first of the motorbikes has a tank between the top and brace tubes and in one case this tank is used for the carrying of dry cells to supply current for an electric headlight. This style of motorbike is shown with and without the electric system. Another motorbike model has the top and brace tubes, but is minus the tank. Two roadsters are on view, and these complete the exhibit.

### SMITH MOTOR WHEEL SEEN ON MANY CYCLES

SMITH Motor Wheels fitted to ten different models of bicycle take up most of the space devoted to products of the A. O. Smith Company, while a section of the Motor Wheel itself rounds out the display, along with the bicycle used by Bob Lawson, the transcontinentalist. For the pleasure user, the bicycle booster is seen attached to a Great Western roadster, a Reading Standard regular, a Yale Seminole road model, Dayton, Iver Johnson truss frame mount, and a drop frame R-S for ladies' use.

In the commercial field, the Motor Wheel is attached to a Worksman Model A delivery van, this being a three-wheeled vehicle with coaster brake on the countershaft; a Jones & Noyes "Commercial" bicycle and a Consolidated package car. The cut-away model enables the visitor to note all the details of the device as they are in the assembled power plant. Lawson's bicycle is seen fitted with a Motor Wheel.

### GRADY SHOWS RED WING AND NEW ENGLAND MODELS

RED WING bicycles in ladies', men's, men's truss frame, motorbike and juvenile models are featured at the exhibit of J. W. Grady, along with special tires and tubes. The Red Wing juveniles are made in boys' and girls' types, following received bicycle designs. The New England line, a more popular priced series, is to be had in drop and diamond frame styles, and has a newcomer in a racer model, which has proven itself very popular. These wheels are shown, fitted with New England tires, in blue, having the words "New England" raised on the tread in each case.

The Grady firm also shows a number of jobbing series of single tube tires, in both 18 and 20 numbers, as well as the New England series of single tube bicycle and lightweight motorcycle casings.

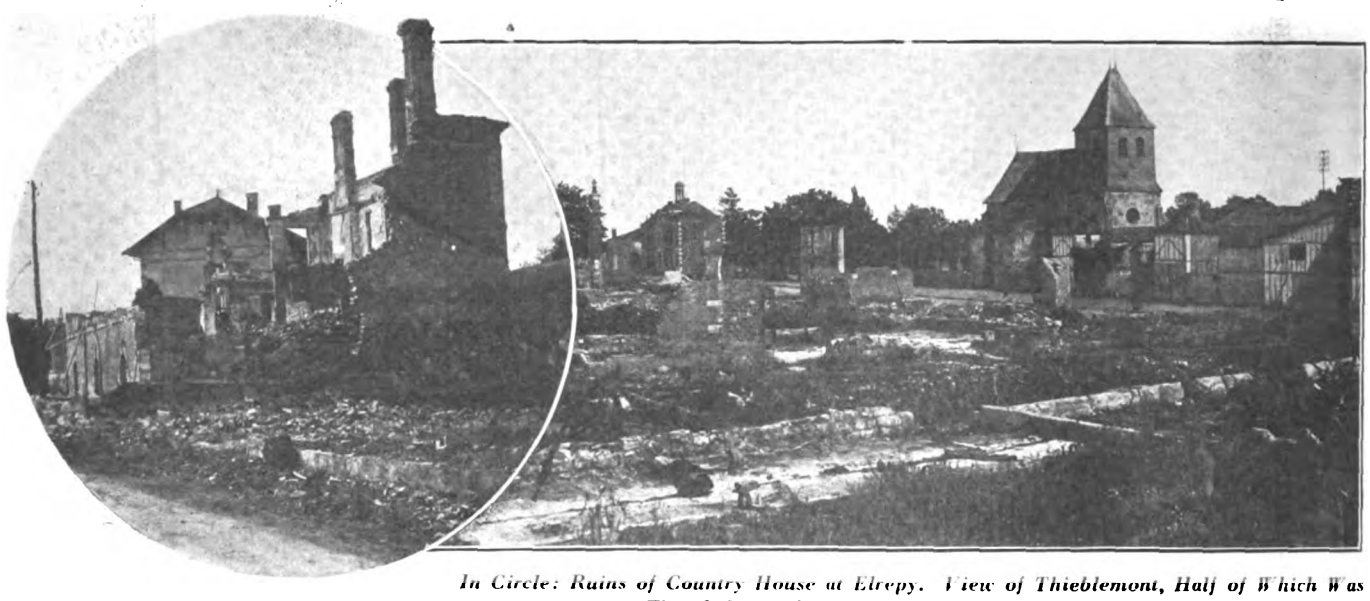
# ON THE BATTLEFIELD OF THE MARNE WHERE

## Vivid Story of Experiences Encountered by a War Correspondent



*In Circle: Ruins of Country House at Etrepy. View of Thieblemont, Half of Which Was Wiped Out and the Other Half Untouched by Shells*

TOURING over the Marne battlefield, which, located in the upper eastern portion of France, has been the scene of the fiercest and most devastating fighting between the Allies and the Germans, W. F. Bradley, special war correspondent for *Motor Age*, has encountered some very interesting experiences among the ruins of this war-scourged district.

Mr. Bradley and a friend had been making their headquarters at the Cafe Lorraine in Nancy, when they decided to visit the eastern portion of the Marne district. They met with the usual quantity of red tape in trying to get a pass from the military authorities, but finally succeeded in securing a permit which allowed them to travel through the scarred and battered region.

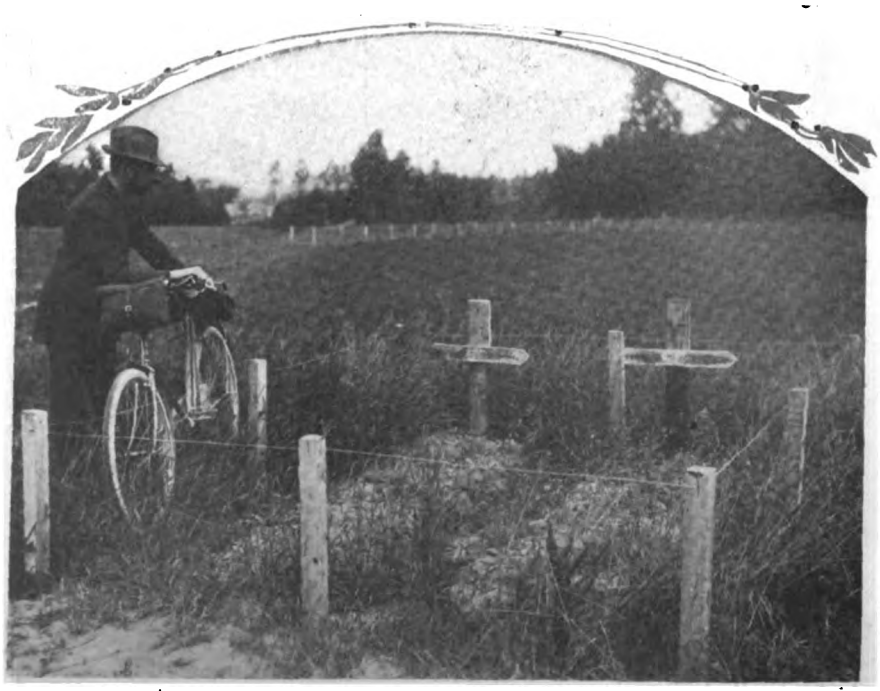
The following story is written by Mr. Bradley and is reproduced here, with the original photographs, by the special permission of *Motor Age*:

It was at Thieblemont-Faremont that we struck the first indications of a great battle. The town does not cut much figure on a small scale map, but is on one of the great national highways uniting Paris with Nancy and the German frontier. It was at this eastern end of the long battle line that the fight was the most bitter and where destruction was greatest. It is declared that on a 30-mile length between Vitry-le-Francois and Bar le Duc, 50,000 civilians were left homeless. How many soldiers lie buried in the fields, or unburied in the woods, nobody has dared estimate.

Because of its convenience for exploring the surrounding country, we selected Thieblemont-Faremont as a center. According to a now out-of-date guide book, the place possessed an inn, but we did not attempt to look for it among the ruins. Instead a village tobacco store offered to provide bed and food. It was more interesting here than in the big hotels, for there were bullet holes in the ceiling to count while lying in bed, the wrecked church to examine while dressing, and the chunk of shell to inspect while waiting for the soup to be served in the dining room.

It looked as if a line had been drawn across Thieblemont-Faremont and the order given to destroy everything to the west of it and leave intact everything to the east. The village lawyer was one of those who found himself on the line. His garden wall had gone and his garage had disappeared, so the car was kept between the flower beds. If the lawyer looked east he could fold his arms and be satisfied with the world in general; if he looked west, he would be likely to weep.

To tour modern battlefields with any intelligence it is necessary to travel far and do a lot of detail work. There are no more Waterloo plains into which two armies march in the morning and from which some of them march out at night. On the Marne front, there is a 100-mile stretch of variable depth, some portions of which can be taken at good speed and some which must be examined in detail. Between the towns of Vitry-le-Francois and Revigny is one of those detailed portions, where every inch of ground, whether it indicates it or not, has been stubbornly fought over.



*Graves of Von Moltke, Descendant of the Franco-Prussian War Hero, and of Another German Officer by the Side of a Highway Near Esternay*

To the south of our village was the canal from the Rhine to the Marne. It was devoid of traffic and offered a good substitute for the bathrooms which never existed in the village. Eight months before it had run red with blood, for it had formed a natural obstacle to the southward march of the

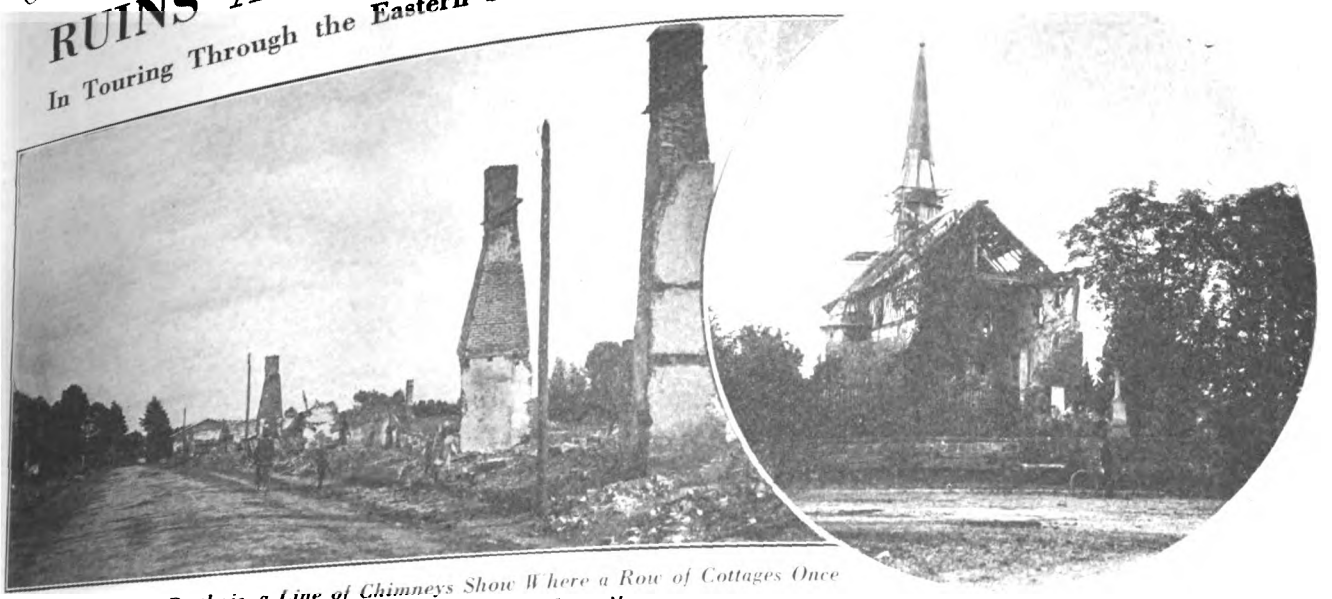
# RUINS AND GRAVES ARE ROAD MARKERS

## In Touring Through the Eastern Section of the Battlefield



*Above: At Vitry en Perthois, a Line of Chimneys Show Where a Row of Cottages Once Stood. War Correspondent Inspecting Church at Huron*

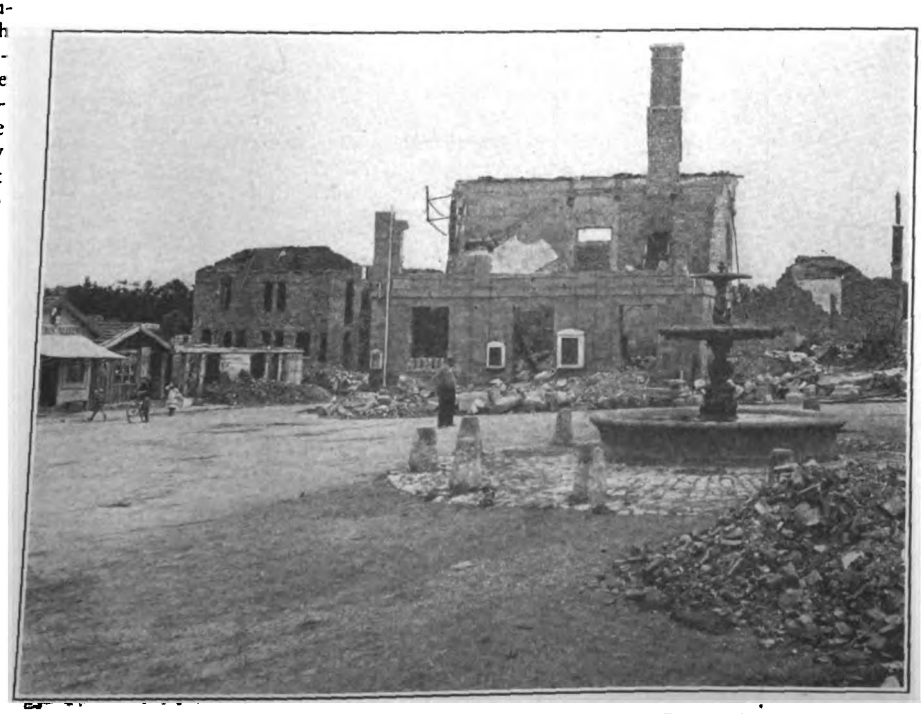
Germans, but nevertheless had been stoutly fought for and lost. Half a mile above the canal is the village of Ecriennes, possessing a church with one end blown away entirely, a roof that looks like a fine-mesh sieve, and a tower that is held up by ropes and props. According to the story, the Germans had quick-firing guns in the tower, the French bombarded the church, and the Germans fired the village before leaving it. There is nobody to confirm the story, for the only civilian who stayed behind to watch the battle never will see another, and the soldiers who could use their legs went north to cut off the retreat of the Teutons who were engaged in mad flight before the victorious French onrush.

The village of Vaudelere, on the north side of the great highway, had suffered the same fate as its neighbor on the south side of the road; the only difference was that there was less of it to destroy. On the edge of the road itself, two privates and a sergeant were putting the finishing touches to a grave in which sixty-four French soldiers and officers had been buried immediately after this portion of the Marne battle. Our visit happened to coincide with that of a general commanding one of the neighboring armies, and we were able to gather that the men had been told off for this work of making suitable tombs over their fallen comrades, without being provided with funds for material. They had secured wonderful results with nothing, even to the erection of a granite column, chiseled out of a block of stone secured in a wrecked chateau. Thus were the fallen heroes honored by these simple and crude monuments.

It must not be expected when touring later in France, to get much real information on the battles from the staffs of the big hotels. In most cases the people did not belong to the neighborhood, or if they did belong to the district, had gone away in safe time before the battle and come back a few weeks after it. Our lodging place was an exception. The good woman had gone away the night before the fight and come back the morning after. Staying with her was a refugee who had found herself unable to leave Chalons before the enemy had taken possession of that little town.

"They were quite well behaved," she explained. "Some of them got drunk, of course, and some wine cellars were pillaged, but what can you expect? Generally, they paid for what they took, and I had no reason to regret having missed the last train. In these hard times an enemy's patronage comes in handy."

After fighting to the south of Chalons, General de Castlenau advanced to take possession of it. This suggested a story of a triumphal and joyful entry, but again the reality was not in accordance with the story book accounts. "We heard strange bugle calls all over the town and noticed a great activity on the part of the troops, 40,000 of which were stationed at Chalons," said a Frenchman who had spent 20 years of his life in Strasburg and who believed that the bugle call was an order to retreat. Before the enemy all had gone, an old French reservist wandered into the Place de Ville. At the same moment a German soldier was coming out of a baker's shop with a bread loaf under his arm. Catching sight of the Frenchman, the German flung his rifle to the right, the loaf to the left and bolted. The Frenchman had no intention of running after him. He



*Wrecked City Hall in the Public Square at Sermaize. The Frame Structure at the Extreme Left is the "Cafe des Allies"*

Digitized by Google

dragged himself to the edge of the fountain and sat there with his head in his hands. A few hours later cavalry arrived, then an infantry regiment, and all the Germans who had been too drunk to obey the order to retreat were rounded up and made prisoners.

Getting off the main road at Thiebleemont-Faremont, we mapped out a morning's run with Revigny as its outermost point. Although secondary roads, they were invariably good, for since the army moved north there has been no civilian and not much military traffic in this part of France—yet the up-keep of the roads has continued just the same. The Saulx valley was soon reached and with it the village of Faveresse. Here a house was pointed out as the place where thirty French colonial troopers faced a strong force of Germans and killed 300 as they attempted to advance across the plain. When cannon was brought to bear on the house, such of the Frenchmen as remained had to beat a retreat. A French shell passed right through the schoolhouse and in the center of the blackboard a bullet lies embedded. The schoolmaster, who was present during the fight, is certainly very proud of that bullet.

If we attempted to deal with every wrecked village passed through on that morning's trip we should be in danger of running out of descriptive matter. Domprey, Blesme, Pargny, Etrepy and many others which are meaningless names to thousands, had been wiped out as though they had never existed. Besides, it is necessary to reserve some description for Sermaize-les-Bains, which could claim to be more than a village, and which used to attract tourists to its trout streams, its baths and its pleasant country-side. What happened to Sermaize was related to us by the proprietress of the Cafe des Allies, located opposite what used to be the town hall. The cafe, it should be mentioned parenthetically, is a two-room wood shack, built since the battle.

"Nobody would believe that the Germans could get to Sermaize," she said. "There was the river to cross and the canal, and all the hills to the north. But one Sunday morning, a fine morning just like this, they began raining shells on the place. Some of the people had gone—we thought they were cowards—we who were left got into the cellars and remained there all day. When they ceased firing at 6 o'clock that Sunday evening more than 2,000 shells had fallen on Sermaize. After that we fled, and on Monday morning the Germans came in. Only half the houses had been destroyed by the bombardment, but the Germans pillaged and set fire to the others. Then the French advanced, there was fighting among the ruins, and that finished all. We have lost everything—and some of us have lost our sons, too."

### What's Left of Sermaize

To get an idea of the appearance of Sermaize, a few months after the battle, it is necessary to think of a town shaken by an earthquake, struck by a cyclone, and burned by fire. Then think that some very orderly persons have come along and removed all the refuse from the roads and streets and piled it up on the particular plot to which it belongs, so that Madame Blanc is almost certain that it is her wrecked sewing machine lying by the charred timbers, and not Madame Brun's Wheeler & Wilson. This tidiness of the streets and muddle of the plots form a striking contrast. The proprietor of the Hotel de la Coche, for instance, had unearthed his signboard, only slightly damaged, and had placed it on the top of his ruins, so that the visitor would know that the place had once been a well-kept hotel and not a pigsty. Even the name plates of the streets, broken and with all the paint rubbed off, had been placed in position on the heaps of rubbish. Perhaps this was done to guide the government officials who came round to estimate the amount of compensation. It is wonderful how the natives managed to recognize their own streets.

A body of English Quakers had not waited for the government to give compensation, but had set to work to build shacks, particularly for the farmers who were obliged to remain on the spot to cultivate their fields. Despite a disaster which almost passes comprehension and might have been thought of a nature to stun its victims for a lifetime, very few fields have remained uncultivated. As we sipped a soft drink outside the Cafe des Allies, one of the gray-clad Quakers came down the main road on his bicycle. At the sight of him, a Frenchman rushed out of the shack and hailed him boisterously:

"Hi, you, the English."

The Englishman dismounted deliberately and speaking slowly and seriously, said:

"It is too late; I gave you a rendezvous in front of your plot; I waited half an hour and you did not come. I must suppose that you do not want me to rebuild your house. It is too late now; I am very busy."

It was a lesson in exactitude which left the Frenchman dumbfounded. When the neighbors recovered their tongues, it was to pour forth further good advice on the necessity of always being on the spot on time.

**(To be Concluded)**

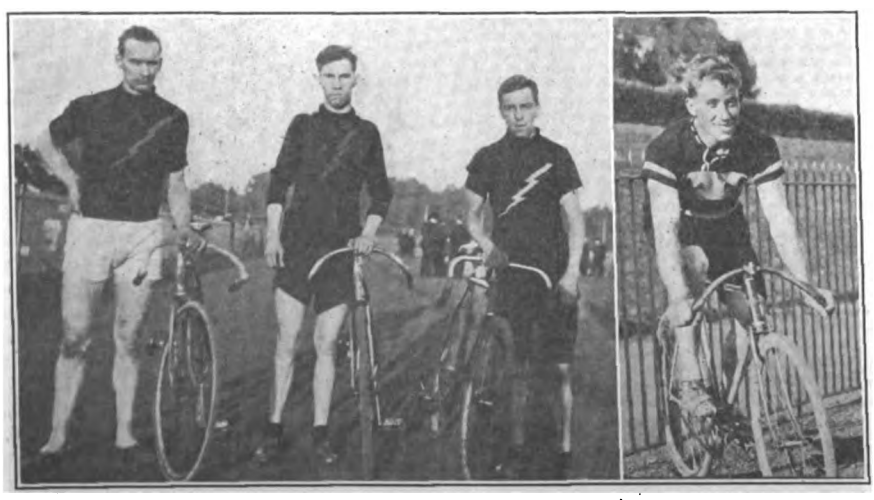
## EISENTROUT MAKES NEW CYCLE RECORD

SAN FRANCISCO, Cal., October 9.—Nick Eisentrout, the sturdy rider of the Garden City Wheelmen, of San Jose, broke the Pacific Coast half-mile unpaced cycling record last Sunday afternoon at the Park Stadium, doing the distance in one minute five and one-fifth seconds. The best previous time was made in 1914 by Henry Schmitz, of the New Century Wheelmen. Eisentrout clipped three-fifths of a second off the old record.

Harry Hoffman, of the Olympic Club, pressed Eisentrout hard, doing the distance in one minute and six seconds flat. Eddie Carroll, of the Olympic Club, finthird in one minute and seven seconds.

The feature race of the day was the five-mile handicap race in which 34 riders started. This event was won by Walter Hammitt, of the New Century Wheelmen, riding from scratch. Hammitt did the distance in 13 minutes and 34 seconds. Phil Morgan, of the same club, with 250 yards, was second. Harry Spence, of New Centurys, third; Harry Hoffman, O. C., fourth; Harry de Brie, N. C. W., fifth; Leslie Drury, N. C. W., sixth; Jean Stalker, N. C. W., seventh, and Ralph Welch, N. C. W., eighth. Fourteen prizes were put up in the five-mile handicap.

The one-mile open race was won by Harry Hoffman, of the Olympic Club, hard pressed by Eddie Carroll, of the same club, who finished second, and Nick Eisentrout, of the Garden City Wheelmen, was third. The time was 2:12.



**From Right to Left: Hammitt, Morgan and Spence, Who Finished in That Order in Five Mile Handicap. Nick Eisentrout, Record Breaker**

## MANY MAKES STAGED BY MIAMI FACTORY

MOST prominent among the bicycles shown at the stand of the Miami Cycle & Manufacturing Company, in addition to the motorcycles, is the Hudson racer, a mount of excellent fittings. These include Chater-Lea hubs, high-grade chain, and special racing forks, etc. The Racycle Pacemaker and Racycle Rideabout are also the centers of much attention.

In the Flying Merkel line of bicycles, three models are shown, two in black finish, while a third has the Merkel orange enamel and a neat electric lighting system is fitted. In the Rami line of Racycles there are two types on view, while the Miami series is represented by one machine only. A Hudson roadster and a Racycle roadster complete the exhibit of bicycles.

Digitized by Google

### CAHN COMPANY NOW DIRECT FACTORY REPRESENTATIVES

It was announced at the show by the A. O. Smith Company, through Manager Jackson, that the New York State and Connecticut territories will be handled in the future by the factory, through the William H. Cahn Company, of 261 Broadway, New York City. In other words, the appointment of dealers and all other business will be transacted by the Cahn Company, as direct factory represenatives, instead of through a New York City distributor, as heretofore.

### HIGH QUALITY BICYCLES IN DEMAND, SAYS WEBSTER

Ralph D. Webster, who travels New York and Pennsylvania for the Miami Cycle and Manufacturing Company, called attention to the fact that there is an unusually large demand among dealers for high quality bicycles. For example, an order for fifty wheels will include 10 retailing at $60, 10 retailing at $50, and so on. The bicycle manufacturers regard this condition as a most encouraging one, pointing to the use of the bicycle again by people of wealth.

### CYCLEMOTORS IN MARCH

Niagara-on-the-Lake, Ont., October 12.—A spectacular military feature of the near future will be the 100-mile march of 15,000 Canadian soldiers from the summer camp here to Toronto. A number of the soldiers will ride motorcycles and bicycles, including several Cyclemotors, which are to be given a trial by members of the Cyclist Corps.

### AFTER THE FARMER

Kansas City, Mo., October 9.—At least two cycle concerns in this city have their hooks and lines out for the farmers. The American Royal Live Stock Show will soon open in Kansas City and will naturally attract people from many rural sections of the state. The Schmelzer Arms Company and the Richard & Conover Hardware Company have gotten up special window displays to attract the show visitors, in which the bicycle and motorcycle are cleverly featured.

### DAYTON POLICE ON BICYCLES

Dayton, Ohio, October 12.—The police department of Dayton, Ohio, has assigned six of the patrolmen to use bicycles on outlying beats. This is the first time in the history of the city that the police department has used bicycles. The experiment is being watched with considerable interest by police departments in Ohio.

### ST. LOUISANS RIDE TO BALLWIN

St. Louis, Mo., October 11.—The regular Saturday run of the St. Louis Cycling Club left this city at three in the afternoon for Pacific, Mo. The Sunday affair took the riders out to the Ballwin and return.

### CARLOAD OF MUDGUARDS

The International Stamping Company, of Chicago, shipped a carload of bicycle mud guards to the H. P. Snyder Manufacturing Co., Little Falls, N. Y., on October 1.

## BRITISH ENGINEERS NOW USE THE BICYCLE

*Regulation Machine Is Furnished to All Field Companies of That Body—None in U. S. Army*

*British Cyclists of Field Company of Engineers Fully Equipped For Service*

THAT the bicycle is invaluable in all operations which pertain to forward movements of regiments or divisions is recognized very clearly by the British War Office, in providing all field companies in the Royal Engineers with chain-driven mounts. By means of these the engineer cyclists can speed ahead of horse or foot troops and commence work on pontoon bridges, field fortifications and other military constructions before the main body comes up. And this is by no means the sole arm of the British service which has found the bicycle to be most useful, for practically every infantry battalion has its cycle squad.

In contrast to this policy is that of the United States service, where there are no bicycles used whatsoever, and not twenty motorcycles in all. The Federal Government has obtained all bodies mounted on two-wheelers from various National Guard organizatitons, or from volunteer squads. There are, no doubt, a considerable number of cycles owned by military men, but these are not Government property and therefore cannot be counted on the strength.

The two R. E. privates in the photograph are equipped with the new regulation kit for bicyclists. The personal belongings are carried in the knapsack, while the cape or poncho is mounted on the rear carrier. The rifle is carried with the barrel along the frame and over the handlebars in order to have it ready to hand. A breech-cover is provided. Each private wears a sun-flap or "havelock" to protect his neck from the sun and heat. Experience has shown that this equipment is ample for practical needs.

## 400 CYCLISTS HONOR ART SPENCER

TORONTO, Ont., October 12.—Nearly four hundred bicyclists of Toronto gathered to do honor to Art Spencer, the Canadian champion, upon his return from a successful campaign at Newark, N. J., at a reception at the Classic Bicycle Club on Wednesday night, October 6. The program included speeches, presentations, bicycle roller races and boxing bouts. The feature of the evening was the presentation to Spencer of a valuable solid gold watch by his club mates, the ceremony being in the hands of J. W. Gibson, general manager of the Canada Cycle & Motor Company, Limited. Twenty-nine prizes, including a bicycle for first place, were also presented to the winners in the first annual road race of the Toronto Bicycle Riders' Association.

Four of the Classic cyclists took part in the bike race, the distance of which was one-half mile and the winner was Norman Webster. Time, 21 seconds. Second man was R. Penny; third, H. Bounsall, and fourth, Fred Harris.

Short speeches were delivered by Robert Falconer, vice-president of the C. W. A.; J. W. Gibson, A. A. Briggs, of the Dunlop Company; G. L. MacKay, the C. W. A. Racing Board chairman.

# YOUNGSTER CAPTURES CRESCENT HANDICAP

BALTIMORE, Md., October 12.—Bicycle road racing in Baltimore again came into its own on Sunday last when a field of thirty-five cyclists faced the starter's gun at 9:30 a. m. at the junction of the Old Harford and the State Roads in Hamilton, which point was the start and finish of the Crescent Bicycle Club's ten-and-half-mile handicap road race. The race was run over a loop, measuring three and a half miles, which was covered by the riders three times.

W. T. Wright, Jr., a fifteen-year-old lad who had never before competed in a race, won the event, riding from the seven-minute mark and finishing with a good lead over his nearest competitor, George Leishear, from the four-minute mark, who also accounted for the fourth time prize, Walter Doersch of the seven-minute bunch finishing third. The Wright family, as usual, were very much in evidence, W. T. Wright, Jr., finishing first; W. T. Wright, Sr., fourth, and fourteen-year-old Amos Wright getting the fifth prize. The winner shook his bunch in the first mile, and overhauling the limit men, led every lap to the finish.

Much comment was excited by the riding of little Albert L. Wilson, the ten-year-old son of a local bicycle dealer. The little fellow got very tired toward the close of the race, but was game to the core, and stuck it out to the finish, getting the eighteenth prize. The battle for the time-prize honors was a most exciting one, Welby Sherman of the promoting club winning after a terrific half-mile sprint; Fred M. Sanborn of the same organization and L. Howell of the National Cycling Club of Washington finishing half a wheel's length behind him, but so close together that only the judges could separate them. They awarded the second time prize to Sanborn. Four riders started from the honor mark, but the strenuous going eliminated L. M. Sanborn in the first lap, the remaining three continuing together to a point half a mile from the finish, where a short grade is encountered. Each of the three started his sprint at this point and a nip and tuck struggle ensued to the top of the grade, where Sherman drew away from the other two and held his advantage to the tape.

George Leishear and Wilbur W. Shaw won the fourth and fifth time prizes, riding respectively from the four- and two-minute marks. The race was marked by the participation of a number of novices, nearly all of whom rode well land finished well up in the prize list. No accident of any kind marred the affair and, thanks to the efficient co-operation of the officials, everything went off without a hitch. E. R. Boehm, former star of the Lafayette Wheelmen, was chief timer, and was ably assisted by Charles Bokemeyer and William Leimbach. The prize winners:

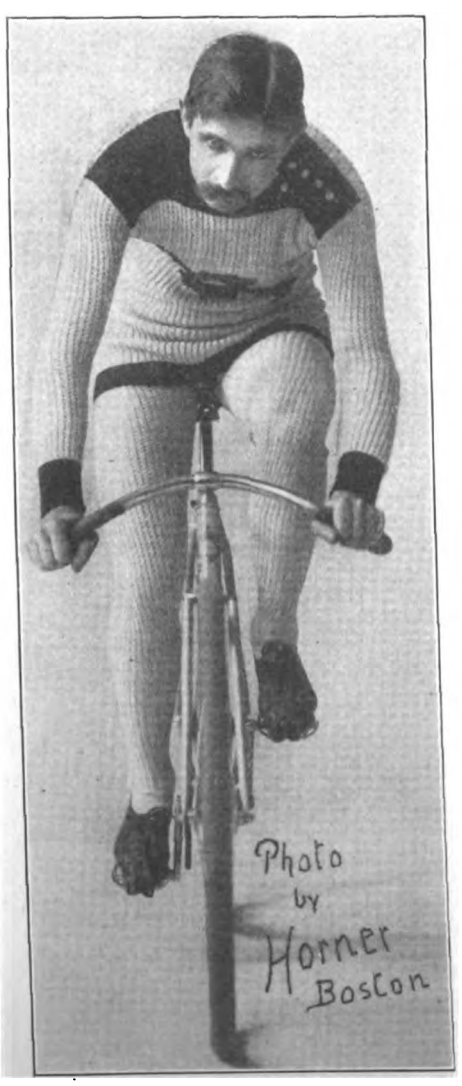
## HE KNOWS THE GARDEN

Perhaps no man in the booths at the cycle show now in progress at Madison Square Garden is as well acquainted with every nook and corner of the great structure as Frank Albert, the factory representative of the Schickel Motor Company. Albert has competed in nine six-day races held in the Garden, at a time when six-day grinds were certainly no pink tea stunts and each man had to ride day and night continuously. His first long race was on an ordinary in 1891, in which he captured fourth place. From a top notch pedal pusher, Albert has developed into a consistent motorcycle rider, covering at present hundreds of miles each day on his Schickel lightweight as the traveling representative of the Stamford factory.



Frank Albert

## SIX DAY RACES ARRANGED FOR NEW YORK AND CHICAGO

Newark, N. J., October 12.—Announcement is made by the Cycle Racing Association that six day bicycle races will be held this year both at New York and Chicago. Madison Square Garden, New York, will be the scene of the six day grind in New York, which will start at one minute past midnight on December 6 and end at one minute past ten on the night of December 11. Sixteen riders will start in the classic. The usual preliminary sprint program will be staged on Saturday, December 4, with motor-paced events as the features. Chicago will see its six day race at the Coliseum, November 19-25, at which there will be fifteen entrants.

## ST. LOUIS WEEK-END PARTY

St. Louis, Mo., October 12.—The annual week-end party to the Cedars will be held by the St. Louis Cycling Club on Saturday and Sunday, October 16-17. The cyclists may either wheel to the Cedars or go by train. The total expense, including railroad fare, will not be much over two dollars and a half. The "Frisco" train leaves St. Louis at 5:26 p. m. and arrives at Barnhart 6:26 p. m.; the return will start from Barnhart on Sunday at 8:01 in the evening. All of the cyclists have been asked to bring their lady friends along.

## COPS BAYONNE RACES

Bayonne, N. J., October 9.—John Carey, of the Bayonne Wheelmen, won the two races which were staged on the Boulevard last Sunday. In the one-mile open, Carey broke the record for local riding by six seconds, covering the distance in two minutes, forty-six and two-fifths seconds. There were nine starters in the two-mile event, which was also won by Carey in four minutes and six seconds. Carey won the last event by a terrific sprint of four hundred yards.

## C. R. C. OF A. INTER CLUB MEN

Hoboken, N. J., October 12.—As the result of a number of championship try-out races held in this city by the New Jersey Division of the Century Road Club of America, the following men have been selected to represent the club in the Inter-City races at New York: A. Z. Everard, Geo. A. Knopp, E. E. Frayse, E. E. Taborelli, F. H. Pearson and J. Baumgartner.

## BELTER LEASES NEW SHOP

Neenah, Wis., October 12.—O. H. Belter, proprietor of the bicycle shop on Wisconsin avenue, has taken a long lease on the new Sherry street building and in a few days will start to enlarge what will be his new quarters and make extensive improvements for a most up-to-date bicycle establishment.

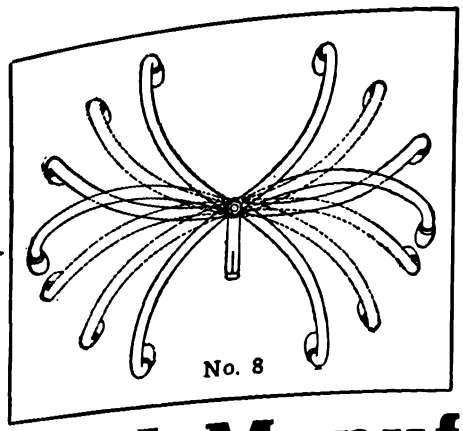
# Kelly Handlebars



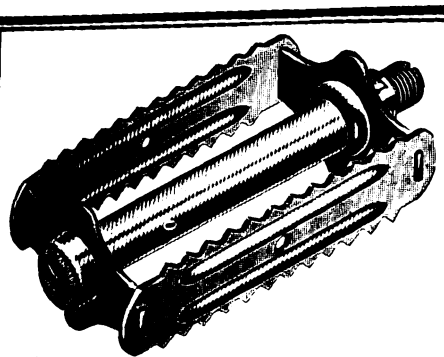
## Jobbers and Manufacturers Who Seek Standardization

should invariably equip with KELLY HANDLEBARS—the standard of the world. No high-grade bicycle is complete without KELLY ADJUSTABLE HANDLEBARS. With these handlebars, 25 different riding positions are possible. No other bar made allows anywhere near this number of different positions. KELLY HANDLEBARS ARE THE STRONGEST SELLING POINT A BICYCLE CAN HAVE.

They are the ideal bars for racing, distance work, boulevard riding, etc. Adjustable to ANY position.

**KELLY HANDLEBAR DEPT.**

**5017 Perkins Ave. Cleveland, Ohio**



No. 4 STANDARD RAT TRAP PEDAL

## THESE STRONG SUBSTANTIAL MOTORCYCLE TYPE PEDALS

have that sturdy look that comes only from correct design and first class construction.

THE NO. 4 STANDARD is a new type of rat trap pedal added to our line this year, making it the most comprehensive line of rat trap pedals offered to the trade.

THE NO. 5 PIRATE has such big, soft, easy rubber cushions! It minimizes the jars and bumps. Try a pair and find out for yourself.

Our cycle parts and accessories appeal to the mechanical expert. They have been standard from the beginning, and mark the utmost in the industry.

Our products comprise: Diamond "E" trade mark brand, Spokes and Nipples for Bicycles, Motorcycles. Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals.

**THE STANDARD COMPANY, Torrington, Conn.**

Here is a line of *honor-made* bicycles—wheels built with an eye to the sort of service expected of machines costing much more than these. The name RED WING is going to be very well known ere long—it will be the distinguishing mark of a line of bicycles whose selling qualities are so far ahead of all others that the dealer stocking them *will be the leading bicycle merchant in his town.* Read these descriptions—it will repay your spending five minutes doing so.

## Red Wing No. 10—Jr.

The RED WING No. 10-Jr. is designed for the boy who is too small for a regulation Gent's machine and too large for the standard make of Juvenile. The frame on this model measures 18 inches from the center of hanger to the top of seat mast. The smallest size gent's model measures 20 inches, making a gain of two inches, which is accomplished by curving the rear end of the upper cross bar downward ..... **$30.00**

## Red Wing No. 11—Jr.

The RED WING No. 11-Jr. is the little Ladies' Model. The seatpost mast measures 18 inches from the center of hanger to the top and the cranks measure 5½ inches. This model is equipped with the Diamond roller chain, Morrow brake.

This model has been stripped of all unnecessary weight in frame construction and equipment, which is a very important point to be considered, as every pound of surplus weight requires greater exertion on the part of the rider ..... **$35.00**

## Red Wing No. 10

The RED WING No. 10 is a standard diamond frame machine. This machine is light, strong and speedy, just the thing for messenger boys and for light delivery purposes, as any standard bicycle basket or luggage carrier can be quickly attached to this model.

This machine is equipped with RED WING tires, Morrow brake and Diamond roller chain. The saddle is the padded type with wood base and cushion comfort springs. The pedals are the rubber motorcycle type..... **$30.00**

## Red Wing No. 50

The RED WING No. 50 is a truss frame design which has become very popular and is a big seller. The extra truss bar gives the machine a very graceful appearance and also reinforces the frame at the points which are subject to the greatest strain. This model is especially recommended for heavy riders or those who travel over rough or hilly roads ..... **$35.00**

## Red Wing No. 11—Ladies

We have gone over every detail in the construction and equipment of the RED WING No. 11, to insure the comfort and safety of the rider; we have equipped the model with a saddle made from the best leather, supported by resilient cushion springs, which absorb all vibration and will smooth all roads ..... **$35.00**

## Red Wing No. 30

The RED WING No. 30, or Motorbike, as it is sometimes called, is the heaviest of the RED WING line. The frame is reinforced by an extra cross bar which extends from the lower head joint to the top of the seatpost mast.

This type of bicycle has been used extensively in the past season in connection with the Smith Motor Wheel, as the extra reinforced frame and forks are necessary features in a bicycle used for this purpose ..... **$40.00**

# THE LATEST BOSCH PRODUCTION

## DELIVERIES AFTER JANUARY, 1916

THE much heralded Bosch Ignition-Lighting System has been brought to that state of perfection which warrants its being stamped with the Bosch name. It is now offered to the motorcycling public with full confidence in the satisfaction that will result.

Unlike other devices which attempt to accomplish a like purpose, the Bosch System not only provides ample lighting current but retains the reliable and efficient Bosch Magneto Ignition. None of the Bosch vim, vigor and snap have been sacrificed, and the supply of ignition, that paramount essential, does not in any way depend upon the lighting unit.

You have the same Bosch Magneto Ignition with the addition of a lighting system that provides abundant light. Most important of all, is that, excepting the driving medium, the two systems are entirely independent of each other.

ADVANCE INFORMATION NOW AVAILABLE

# Quantity for Dealers

Dealers! Make your profits on *quantity*. Don't think that your sales are limited to a portion of the bicycles ridden in your territory.

Mail order houses thrive off the customers of dealers who take that mistaken view. The present demand is for a *quality* tire at a *low price*.

We prosper, and our dealers prosper, because we have satisfied this demand with Goodyear-Akron Tires.

It's the one tire that wins for you every time against the competition of mail order houses.

It's the one tire that gives you the full benefit of the natural advantage you have in being on the ground.

Bicycle riders have learned that there is no need to pay $4 each to get a high-grade tire.

And they won't send to mail order houses for low-priced tires *if* they can get the Goodyear-Akron without delay from their home dealer.

Thousands now want Goodyear-Akron Tires at $2.25 each for the Smooth Tread, $2.50 for Non-Skid. But we don't sell through mail order houses.

So here's your chance to win and hold your home market. And we'll help you do it.

Send this coupon *today* and get full particulars of our *guaranteed sales* plan. Don't waste any time about it.

Every mail is carrying business away from you to the big centers. Put a stop to that now.

# Quality for Riders

Riders! Don't pay $4 or more for a quality bicycle tire, and don't accept inferior, poorly made tires. That's not economy.

Get *both* quality and true economy in Goodyear-Akron Bicycle Tires—the *quality* tire at the new low price.

**$2.25 Each for Smooth Tread**
**$2.50 Each for Non-Skid Tread**

They save you about $1.75 per tire. They save you tire-trouble, too.

No matter how much you pay, you can't get more *quality* than Goodyear-Akron Tires bring. They are fully guaranteed!

Should any fail, the dealer makes good to you, and we make good to the dealer. So you take no risk on Goodyear-Akrons.

We can sell this quality tire at this low price because the growing demand has doubled our sales, and multiplied output brings down factory costs. This saving we have passed on to bicycle riders in three reductions within 18 months—a total saving of 33 1-3 per cent.

Ask your dealer for Goodyear-Akron Tires. If he hasn't them, let us know. He'll want to keep them for you—and you'll want him to. Send this coupon.

# Friction Reduced means Power Increased

# SKF BALL BEARINGS

Smoothness means more power every time. Friction means waste—wear. Follow the example of one of the world's greatest motorcycle manufacturers—and that of the leading motor car builders in this country and abroad. Specify SKF.

HARLEY-DAVIDSON engineers know the superior qualities of SKF—that's why all Harley-Davidson motorcycles are fitted with them.

The most important feature that should recommend SKF Ball Bearings to the earnest consideration of every motorcycle manufacturer is the fact that the double row of Swedish crucible steel balls **automatically** adjusts itself to any deflection of the shaft upon which it is fitted.

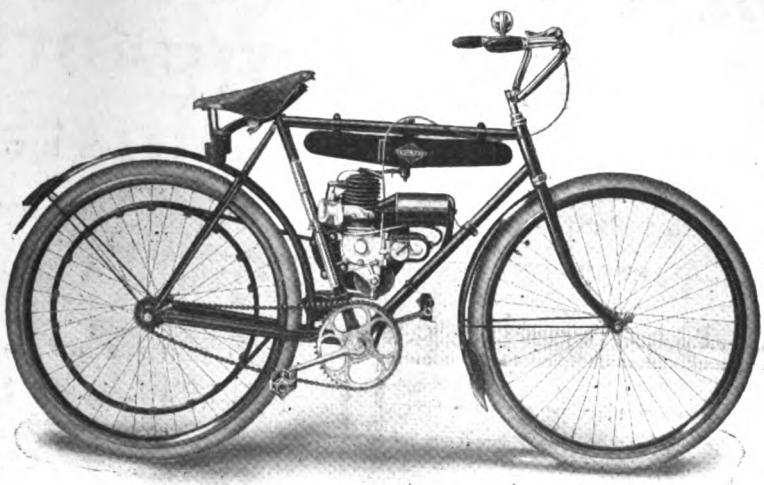
# Cyclemotor

*"Wheeling without work"*



BICYCLE dealers can largely increase their sales by handling the *Cyclemotor*.

The *Cyclemotor* makes a strong appeal to those prospective purchasers who have hesitated to buy a bicycle due to the physical exertion required in pedaling.

This motor, due to its lightness in weight (21 lbs. complete) and simplicity in design, operates with practically no vibration on the bicycle frame—a feature of considerable importance.

Department store managers, errand boys and messengers will find that the Cyclemotor operates at a low cost and is quick in service.

*Dealers desiring territory should give full particulars and mention bicycles carried. Use coupon below.*

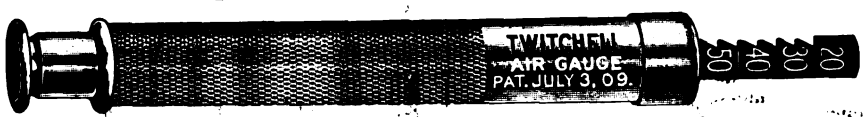
# TWITCHELL AIR GAUGE

## Guessing May Cost You Your Life

## BE SURE

You can't tell how many pounds pressure there is in your tires by pinching them or looking at them, and a difference of a few pounds between what they have and what they should have means the price of a new tire or a broken collar bone, or both.



Inflate your tires to the pressure prescribed by your tire maker and test the pressure in them by means of a Twitchell gauge. There is no other SAFE way of doing it.

Write for table of air pressures recommended by the tire manufacturers.

# STEVENS MOTORCYCLE NECESSITIES

## SAMPSON FEATHER-EDGE INNERTUBE PLUG

The quickest, cleanest, most efficient puncture repair ever invented.

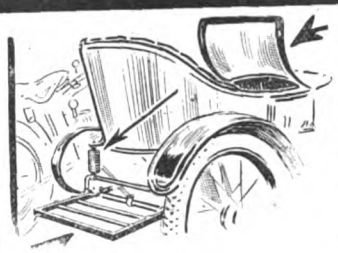
NO CEMENT NO CLEANING
NO PATCHES

Just a little plug that hermetically seals the worst puncture in a minute and a half.

Kit, including tool and six various-sized plugs, all in an enamelled canvas kit-bag, $1.50.

Guaranteed satisfactory or your money back.

Your dealer carries it or can get it from his jobber.



### COMPLETE SIDECAR EQUIPMENT

The STEVENS SHOCK ABSORBERS smooth out the shocks of spring rebounds, and prevent sidesway and skidding. Price, $1 per set, complete.

B. R. T. SIDECAR LUGGAGE carrier has a weight carrying capacity of 150 lbs. It is made of triangular steel, fitted to the sidecar frame by four strong steel clips. Price, $2.50.

To keep the cold winds from the fair passenger, the STREAMLINE WINDSHIELD is ideally fitted. Offers no wind resistance.

DEALERS, ask your jobber. Get the Stevens literature.

### FRESH AIR FOR THE CARBURETOR

Fit this little "jigger" on your machine and watch your carburetor take on new life.

### THE STEVENS AUXILIARY AIR VALVE

Set your carburetor for a rich, easy starting mixture, and when she "warms up" open the air valve. You'll be tickled.

Price, 20c. Each

### STEVENS SPEEDOMETER LAMP

Here's a handy little lamp to have on your machine. Attached to any speedometer in a minute and operated from either a storage battery or small dry battery cell. Can also be used as a trouble lamp.

Price, $1.50.

# Perfected Electric Lighting-Ignition System for Motorcycles

For more than a year the Remy Electric Lighting-Ignition equipment has been in use on thousands of motorcycles throughout the country.

Its complete success has been established beyond all question. It is not an experiment. It is an accepted triumph.

# REMY

## Motorcycle Lighting-Ignition System

provides strong, synchronized ignition, high and low headlight, horn, tail light, and reduces the bulk of the machine.

The wiring is thoroughly protected; the battery can't spill.

It is just what every Motorcyclist wants. See it on the **HARLEY-DAVIDSON.**

Motorcycles equipped with the Remy Electric Lighting-Ignition System have won some of the biggest road races during the past season.

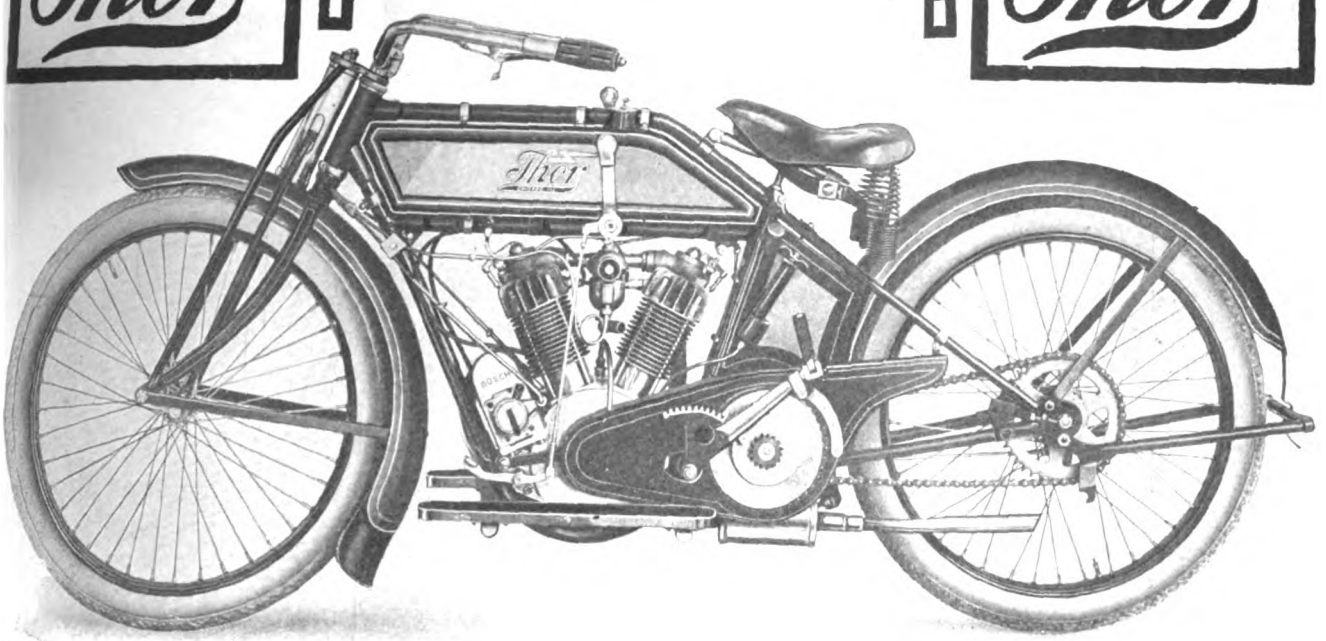
THE QUALITY MOTORCYCLE

Thor Thor



Model V—6 Horse Power

# The Thor 1916 Models were the choice at the New York show of the men who know

When men of engineering skill and practical experience meet to examine the various models they usually decide in favor of the Thor.

This was again most conspicuous at the New York show.

Back of Thor there are records of satisfaction that make the Thor the most valuable asset to the dealer.

Thousands of Thors do duty daily, the year around. The Thor dealer profits by the satisfied riders.

RELIABILITY CONSISTENCY

Model U—12 h. p. Twin $265
Model V— 6 h. p. Twin $225

# Cleveland $150

# What the Cleveland Organization Means to Dealers

Public demand unmistakably points to the light motorcycle of low initial cost and upkeep.

To motorcycle dealers this trend offers **the one big opportunity**—a vastly increased number of prospects—far more sales—bigger profits.

But remember that not all the manufacturers will have the quality of product, financial resources, manufacturing facilities, to enable them to meet the keen competition that is sure to arise. And fewer still will be able to become leaders in the light motorcycle field.

Also remember that only a few dealers in each community will be affiliated with the leaders.

Your success as a dealer depends largely on your selection both of the machine and the manufacturer. Tie to the manufacturer who will be a **permanent, dominating factor in the industry.**

The automobile dealers who are making money today are the ones who a few years ago tied up with the present day **big volume** manufacturers.

Consider this—The Cleveland Motorcycle Manufacturing Company is the outgrowth of two of the largest manufacturing concerns in Cleveland.

## Cleveland Light Motorcycle

Single cylinder, 2-port, 2-stroke motor.
Wheelbase 53".
Frame of heavy gauge seamless steel tubing.
Low, substantial and effective spring fork.
Two speed spur gear transmission with sliding jaw clutch.
Float feed single jet type carburetor.
Final drive by roller chain from counter shaft to rear wheel.
Bosch high tension magneto.
Motor lubricated by mixing oil in gasoline. Gears lubricated by running in oil bath.
Contracting brake band operated by foot pedal.
Extra heavy tires, double-tube clincher, 26x2¼.
Bowden wire control from handlebar to compression release throttle and auxiliary air.
Spark position controlled through linkage from lever on frame.
Gears shifted with right foot.

The Cleveland Light Motorcycle is a **new idea** in this country. Abroad, the Cleveland type is the **biggest success** in the industry.

To our dealers the Cleveland Light Motorcycle will be a continually growing asset.

We are with you to stay.

Wire or write today.

# "Class"

## That one word describes the 1916 Harley-Davidson to the letter.

**A. P. TYLER**
**Boise, Idaho**

October 9th, 1915.

Harley-Davidson Motor Co.,
Milwaukee, Wis.

Gentlemen:

Beg to advise that we have received our first 1916 model and are more than pleased with it. We were greatly and pleasantly surprised by the artistic appearance of the machine. There has been more favorable comment on the lines of this machine than any we have ever received. Our 1915 machines proved the motor and capability of the Harley-Davidson, and now the new machines are here with beauty and graceful lines. We agree that there is nothing that can equal it in 1916. Let us extend our thanks to the Harley-Davidson Factory and hope they will keep up the good work as they have in the past.

When we were told by the Sales Dept. to pin our faith on one machine only and that we would not regret pinning it on the Harley-Davidson, we confess that we were ready to be shown. Well, we have been shown and are mighty thankful that we represent the Harley-Davidson, and assure you that we are giving the best we have in us to make our business and the Harley-Davidson a success.

Very truly,
(Signed) A. P. TYLER.

**Built for the man who wants unquestioned quality and who appreciates those luxuries and conveniences which make long distance touring a downright pleasure.**

Designed throughout by Harley-Davidson engineers—this, in itself, guarantees that it is mechanically right.

Manufactured entirely in Harley-Davidson factories, the buyer knows the workmanship and material are the best.

The Harley-Davidson buyer gets what he pays for—Harley-Davidson class.

**Harley-Davidson Motor Co.**

# Make Your Store Bicycle Headquarters

Many a dealer has written to tell us that since taking on the Smith Motor Wheel, his store has become the bicycle headquarters of his town. This is easy to understand. The Smith Motor Wheel advertises the store of the man who sells it and continually attracts customers for motor wheels and bicycles too. In short, the

**Smith Motor Wheel**
(Detachable)
**"The Bicycle Booster"**

is a regular little business booster. Every Smith Motor Wheel dealer received his full share of help from headquarters. Our dealers are one big, happy family of cycle men who are making more money this year than they ever made before, notwithstanding that in many other lines business is none too good.

The Motor Wheel attaches to any bicycle—speeds up to 25 miles an hour—runs 100 to 125 miles on one gallon of gasoline and is fully controlled by one small thumb lever attached to the handle bars of the bicycle. High tension Magneto, float feed Carburetor, non-skid, double tube clincher Tire.

We invite applications for territory from responsible, well established dealers who will mention make of Motorcycles and Bicycles now handled volume of business done, etc.

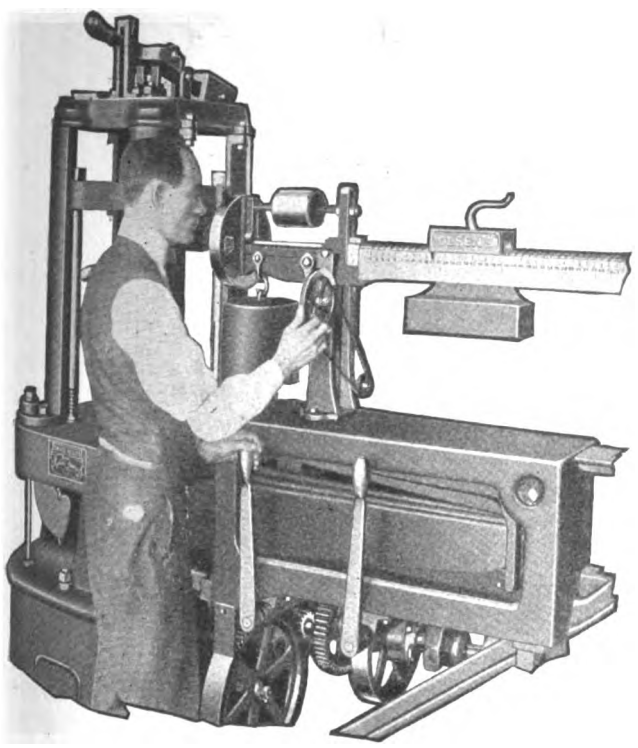
# STANWELD PRODUCTS



## *Measuring Strength*

is distinctively a twentieth century method of determining efficiency. In the building of bicycles and motorcycles the advantages of increased strength are lost if gained only by adding weight.

There is, however, a happy medium where ample strength meets minimum weight. The proper quantities of these factors cannot be determined by mere computation or guess-work. They must be found by actual test.

All metal used in the manufacture of *Stanwela Frame Parts* is carefully tested for strength. We know the strength-limit of every *Stanweld Rim* and every piece of *Stanweld Tubing.*

The motorcycle or bicycle you buy will give better service, be safer and stronger, and worth more when you want to re-sell it if built of *Stanwela Frame Parts.*

Insist that you get them.

## The Standard Welding Company

# Machines That Establish a Money-Making Reputation for the Dealer Who Sells Them

Since the first bicycle—the name Pope has had a very definite meaning for the dealer as well as the consumer. In their minds it has stood for certain qualities of workmanship—certain outstanding superiorities.

The Pope machine was never made to compete on a price basis. Behind its manufacture was the constant purpose to give the dealer a motorcycle or bicycle that would at once return a reasonable profit and retain a satisfied customer.

# Bicycles Pope Motorcycles

Here are the five Pope "quicksellers"—sales leaders since the pioneer days of wheeling. This year, bicycles will be more popular than ever. You'll be prepared for one of your biggest seasons if you stock the full line today.

# A 33⅓% Drop in Prices
# A 119% Gain in Sales

## The Year's Sensation in
# Bicycle Tires

Dealers! Riders! This means more money for you both. For manufacturers, too—whose future depends on the "bike's" popularity.

Goodyear-Akron Bicycle Tires are helping you all. A strictly quality tire, mind you, fully *guaranteed*, at about half the price of other standard tires.

GOODYEAR AKRON

**The New Retail Prices**
**$2.25 each for Smooth Tread**
**$2.50 each for Non-Skid**

These new prices are mainly due to multiplied output—quantity production. For as priced the past year, the sales of Goodyear-Akron Bicycle Tires *more than doubled!*

As priced now—saving the user 33 1-3 per cent within two years—they will, by modest estimate, gain thousands more riders everywhere.

This means for riders, better tires at very little cost. It means for dealers *—profits multiplied by larger volume!*

**Widely Advertised**

These quality tires at the new low prices are advertised to millions.

If you are selling Goodyear-Akrons *now*, we have a plan that's guaranteed to "speed up" your sales. Write us.

If you are not, then mail the coupon.

You *may* be able to get "along" without these winning tires—

But we will give you tested plans to get *ahead* with them.

# AUTOMOBILE TIRE STRENGTH FOR MOTORCYCLES

**The design and construction of the "Chain Tread" Motorcycle Tire is identical with that of the "Chain Tread" Automobile Tire. The rubber and fabric in the "Chain Tread" Motorcycle Tire is of the same high quality and has the same ability to resist wear as the materials used in "Chain Treads" for motor cars.**

**That is why the "Chain Tread" Tire gives such remarkable mileage and perfect protection against skidding when used on the speedy, lighter weight motorcycle.**

**Profit by the experience of the keen automobile and motorcycle manufacturers who are increasing the prestige of their products by equipping the machines they make with "Chain Tread" Tires.**

**You can buy "Chain Tread" Tires from good dealers everywhere.**

## ALL-STAR CAST CRACKS RECORDS

**Marks for Mile Track in Columbus Are Lowered as Speed Merchants Ride Elbow to Elbow—Davis Wins 25-Mile; Perry Is Best 5-Miler.**

### NO MISHAPS MAR SPEEDFEST

COLUMBUS, Ohio, October 18.—Track records went by the board repeatedly and rivalry reached the sizzling point in the race meet of the Interstate Racing Association at the Driving Park mile track on Sunday afternoon. The stars of the speed camps were on hand and the pace they turned loose was so hot that it crackled.

Don Johns, with his 8-valve Indian; Jim Davis, who cut down the 100-mile flat track record twice this summer; Lee S. Taylor, of long-distance fame; Bob Perry, Glen Stokes and Frank Montgomery, of the Excelsior aggregation; and W. R. Kemp, who competed on the close-coupled Henderson which he had introduced in the Chicago 300-mile race, all were on deck and primed to the minute.

Perry out-generaled Davis in the first heat of 5 miles and won by a short length in the econonomical time of 4:03. Taylor and his Indian were third. Maldwyn Jones pitted his single-cylinder Merkel racer against the big twins in the second heat and got third place. Stokes beat out "Shorty" Matthews for first position in 4:08. In the next heat Don Johns tore loose as if the fiends were on his trail. He pulled away from his team-mate Taylor and crossed the line in 4:01 4-5. Taylor brought his Indian through second, and Kemp, with his Henderson purring its four-cylinder song, took third.

Bob Perry set sail after Don's five-mile time in the final heat and lost no spare moments on the way. He shot over the mark with a good lead at the finish and was clocked at 4:01 flat. Davis was second, and Matthews third.

The 25-mile battle that closed the program was dramatic all the way, the first four men riding in a bunch that a fair-sized napkin would have covered for mile after mile. As the race drew on the margins widened a little, but it was close at all stages. Davis was the winner, in 20:19, with Bob Perry second, Taylor third, and Kemp and his Henderson fourth.

### ADDITIONS FOR NEW DEPARTURE WILL DOUBLE PRODUCTION

Bristol, Conn.—The New Departure Manufacturing Company is erecting extensive additions to its ten-acre plant, and is putting in machinery which will enable it to double its production. One of the additions is a heat-treating building, which will contain 230 oil-fired furnaces when completed, as well as the proper equipment of quenching vats, and an ammonia refrigerating system for use in connection with steel making. Another building will be specially fitted for grinding, and will in the opinion of experts, be the largest known structure for such purpose. Other departments in the factory will be increased as soon as the new structures are completed.

### GOODYEAR TO TAKE ON 1,000

Akron, O.—The Goodyear Tire & Rubber Company, of this city, has started a house-to-house canvass to find quarters for 1,000 men that the firm will bring here within the next few weeks. Four new buildings will be put into operation as soon as the men arrive, and additional hands are obtained to work in them.

### EARL ASSUMES NEW DUTIES

C. A. Earl, who recently resigned from the Hendee Mfg. Co., has assumed his duties as vice-president of the Willys-Overland Co., Toledo, O. He arrived in Toledo last week and is now actively engaged at his new task.

### PROVIDENCE SHOW NOVEMBER 12

Providence, R. I., will open its automobile show on Friday, November 12, instead of Saturday, as usual. Friday was chosen in order to take care of the many passes that are to be issued, and thus relieve Saturday of a part of its crowd. Saturday is a good day for business men to attend, and the new plan gives two whole Saturdays for them. Several motorcycle and cycle accessory exhibits are promised as usual.

### U. S. RUBBER DIVIDENDS

The United States Rubber Co., New York City, has declared a quarterly dividend of two per cent. on its first preferred stock, and 1½ per cent. on the second preferred. The dividends are payable October 30 to stockholders of record October 15.

## EIGHT PERFECT IN CHICAGO RUN

**Twelve Contestants of the Englewood Club Tackle Rain-Soaked Course to St. Joseph and Experience Little Mechanical Trouble.**

### THOR SINGLE MAKES HIT

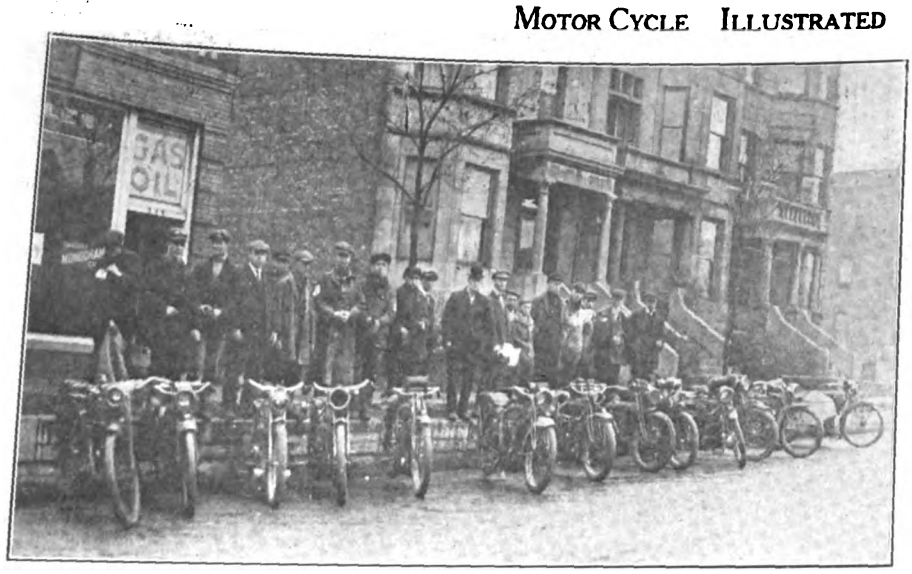
CHICAGO, Ill., October 17.—Out of twelve riders who participated in the third endurance run of the season, staged by the Englewood Motorcycle Club today, eight fellows covered the rain-soaked course, from this city to St. Joseph, Mich., and return, with perfect scores. The total distance of the run was two hundred and twelve miles. The perfect scorers were: A. Dryer, F. W. Mead, E. Wearing, W. Cropp, R. Kewley, J. E. Jenkinson, F. R. Thompson and R. R. Grady.

It had been raining badly early on Sunday morning so that the roads were in very poor condition; but fortunately it cleared up somewhat as the contestants started and when St. Joseph, the noon control, was reached the clouds broke over the heads of the riders and everyone of them was drenched.

The outstanding feature of the run was the performance of J. E. Jenkinson on a Thor single. Jenkinson is only a little rider, but he had the nerve and kept his single going without a falter. Though he encountered one spill and traveled twelve miles out of his way in Indiana, while trying to find the right road to East Gary, he had no mechanical trouble at all, and finished with a perfect score at the home control, fully fifteen minutes ahead of the schedule time.

At the very start of the run trouble was met with when the riders had to feel their way down the boulevard which was covered with oil. A. Dryer went down twice on the pavement before the club house was out of sight. But the roads leading into Michigan City were in good condition and enabled the Chicagoans to go at a hair raising clip, nine riders arriving just outside of the checking station at the first control, thirty minutes before the time set. After leaving Michigan City the fellows were vying with each other in an effort to be the first to hit the six miles of sand

Digitized by Google



**Preparatory to the Start of the Englewood Run**

that stretch out from Three Oaks. Most of the riders were seen to try the "Bunny Hug" before negotiating this sandy stretch. They were happy when they came to the end of it, and finally reached St. Joseph, the terminus of the run.

The rain came pelting down again before the return journey was begun at twelve thirty. At that time the contestants left in pairs, at intervals, to cover the one hundred and six miles that separated them from the Windy City. All wanted to dodge the sand stretch, so they searched round for the best detour, with the results that they only got into still worse going—additional mileage being the self-inflicted penalty. A. Schroeder, one of the contestants, covered twenty miles that brought him no honor.

Taken as a whole, there was little mechanical trouble in the run, the only cases reported being that of R. Stoffer, who experienced some motor trouble and sprang a leak in his tank, and of H. Parker, who punctured his tire at Michigan City. Though the rain interfered with the pleasure of the run, the contestants seemed to have gotten a lot of fun out of the grind and finished in good time.

# PLAN CANADIAN ASSEMBLY PLANT

### Militaire Autocycle Co. Aims to Offset Heavy Import Duty by Locating a Branch Over the Border for Handling Dominion Trade

TORONTO, Ont.—Two of the directors in the new motorcycle manufacturing concern, the Militaire Autocycle Company of America, with headquarters at Buffalo, N. Y., are Toronto men. One is N. R. Ferguson, formerly a local real estate man, who has gone to Buffalo to be the manager of the company, and the other is Gideon Grant, a prominent Toronto solicitor. In a recent interview Mr. Grant declared that an assembling plant would be established in due time to take care of the Canadian trade, as it had been found that the present Canadian import duties would boost the price of the machine in Canada to an unreasonable height.

N. R. Sinclair, president of the Militaire company, was formerly an assistant manager of the Traders' Bank of Canada, and Canadian stockholders include a number of prominent business men. Some of them are W. Frank Goforth, president of Ladies' Wear, Ltd.; R. G. McLean, and J. Robert Page, the latter being of the firm of Elgie & Page, Ltd., Toronto.

Practically all of the directors and stockholders are Buffalo and Toronto business figures.

No arrangements have yet been made for the placing of agencies anywhere in the Dominion.

### CHANCE TO HELP A FRIEND

Fred G. Milligan, who did such excellent work on behalf of the motorcyclists in this state in the New York State Legislature last Winter, is the Republican candidate for re-election in the Fifth Assembly District of Brooklyn. Had it not been for Mr. Milligan's efforts a five dollar license bill would have undoubtedly been enacted into law. As it was, in order to protect the interests of riders in this state, Mr. Milligan did not hesitate to antagonize some of the party leaders. Under the circumstances, motorcyclists who live in Mr. Milligan's district have an excellent opportunity to prove their appreciation by casting their votes for him on Election Day.

### PREPARING NEW CATALOGUES

Louisville, Ky., October 16.—R. E. Hickey, manager of the sporting goods department of the Dow Wire & Iron Works, reports that the company is now preparing a new catalogue of bicycles and sundries which the company will job during the coming season. The lines will be carried on the road by the company's regular salesmen, who handle other lines which are manufactured by the concern. The demand for the company's Louisville-made bicycle luggage carriers has been very good during the past year, and it was decided to job bicycles and sundries. Hence the catalogue will be a big one.

# MORE ACRES FOR FIRESTONE TIRES

### Akron Company Contracts for 110,000 Square Feet of Additional Floor Space and Will Increase Output to 12,000 Tires Per Day.

AKRON, Ohio.—Continuing its policy of rapid expansion, which has been so consistent during the last year as to attract widespread attention, the Firestone Tire & Rubber Company, of Akron, O., has just placed contracts for additional floor space amounting to 110,000 square feet. When it is considered that this new area will be nearly three acres in extent, and that it supplements the five new wings which were begun last spring, and which are now nearing completion, a fairly good idea is obtained of the broad lines upon which the company is working.

A total of ten acres of floor space has been added this year, and when the additions above mentioned are finished the total floor space of the plant will be somewhat over 31 acres. It was believed that the five new wings would enable the company to keep abreast of developments for at least a year, but it became evident not long ago that further material extensions would have to be made without delay in order to maintain the pace that is being set by the rapid-fire sales organization. With characteristic promptness the company took steps to provide the 110,000 square feet of new area for which contracts have now been let.

These new additions will permit of increasing the Firestone tire output from 7,500 tires daily to 12,000 per day, a manufacturing expansion of 60 per cent. Just how the production of Firestone motorcycle tires will be affected by the vast extensions now under way, and in prospect, is not stated in the company's official announcement of its plans, but it is understood that the rapidly broadening market for its motorcycle tires will necessitate the setting aside of considerable sections in the new additions for these products.

### HERRINGTON AND STEVENS RETURN

Newark, N. J.—Art. Herrington and P. W. Stevens finished their round trip from Newark to Milwaukee, Wis., on October 2, on their Harley-Davidson sidecar, having covered 1,201 miles in all. They left Newark for the Chicago show, arriving at the Coliseum on September 20, and afterward visited the Harley-Davidson factory in Milwaukee. They left that city on September 28 and came on in four days. One of the day's trips consisted of over twenty hours of constant travel.

The itinerary for the return trip was: Milwaukee to Bryan, O., first day; Bryan to Erie, Pa., second day; Erie to Syracuse, N. Y., third day and to Newark for the final day's run. They experienced no trouble except having to change over the rear tire to the side wheel, owing to the excessive wear on the shoe.

# CYCLE MEN PLAN MORE ACTIVITY

### Standardization Committee of Cycle Trades at New York Meeting Asks All-Around Co-operation — to Entertain Manufacturers on January 6

VARIOUS lines of activity with a bearing on the general upbuilding of the cycle field were discussed at length by the Standardization Committee of the Cycle Trades at its meeting in the Hotel Astor, New York City, on Thursday morning, October 14. Letters from leading manufacturers were read expressing willingness to co-operate with the committee in its work, and in this connection it was decided to extend a special invitation to the manufacturers to attend the luncheon which will be given at the Hotel Astor on Thursday, January 6, 1916, during the week of the National Automobile Show. At that time reports will be given on the results accomplished and interesting addresses will be delivered by trade men.

It was the opinion of the Standardization Committee at the meeting that bicycle manufacturers should be helped to market more of their machines, which would naturally enliven all the allied branches of business. To this end the Standardization Committee will receive liberal appropriations from the Cycle Parts Association and the Jobbers' Association to permit of carrying on the good work now under way. Satisfaction was expressed over the progress already made and over the helpful attitude assumed by cycle and accessory manufacturers in general. It was argued that the upbuilding influence exerted by the committee will soon make itself felt along broad lines inasmuch as hearty co-operation has been promised from all quarters.

The Standardization Committee states that the work ahead had been fully planned and the assistance of the trade in general is asked along the following lines:

1. To eliminate waste and added expenses through standardization.
2. To obtain more publicity for the bicycle.
3. To help the dealers market bicycles more profitably.
4. To have the parts makers and bicycle manufacturers co-operate in the fullest sense with one another and with the jobbers who handle their products.
5. To encourage the cycle trade journals to lend their aid and devote more space to the bicycle.

The next meeting of the Standardization Committee will be held at the Hotel Astor on Wednesday afternoon, January 5, 1916, at 3 o'clock, when reports will be heard and action taken on several matters of great importance to the cycle field, which will come up for discussion at the mid-winter luncheon to be given by the Cycle Parts and Accessories Association on the following day.

Those in attendance at the meeting on October 14 were as follows: Keyser Fry, J. W. Grady and John Henry, representing the Jobbers' Association; D. F. Printz, C. Lovell and W. J. Stokes, representing the Cycle Parts Association; W. J. Schack, J. W. Ash, Horace Huffman and F. W. Starr, for the Cycle Manufacturers. Keyser Fry, as chairman, presided at the meeting and J. W. Ash acted as secretary.

"THEY ALL THINK IT'S FINE"

"As long as I own a motorcycle," writes Neil H. Campbell, of Arlington Heights, Mass., "I would not be without that helpful paper. **Motor Cycle Illustrated**. It always has a lot of good dope for riders and dealers. Quite a few of the boys around here look over my copy each issue. They all think it's fine."

## GUTERMAN TO TRAVEL FOR READING STANDARD COMPANY

Lou Guterman, formerly traveller for the A. O. Smith Company, Motor Wheel Division, has signed up with the Reading Standard Company to travel in R-S interests during the 1916 season. Guterman will cover New York, New Jersey and upper Pennsylvania for the present, and will later travel through Georgia, Florida and Alabama, Michigan and California.

Guterman is one of the veteran riders on track and road in the East, having started in competition work in the days when 2¾ clutchless singles were "high powered" motorcycles. He was a star rider at Guttenberg, N. J., track during 1910-1911, and was prominent in road events and endurance runs season after season since 1908. He was president for several years of the Harlem M. C. of New York.

## BRITISH DISTRIBUTOR FOR R-S

Albert T. Otto & Sons, the well-known importers at the Motor Mart building, New York, and in London, England, have taken the distribution of the Reading Standard product for Great Britain. The contract for this territory was signed with E. W. Theurer, assistant treasurer of the Reading Standard Company, Inc., Reading, Pa.

# DAYTON HERALDS 3-SPEED MODELS

### Davis Company Adds Four De Luxe and Dayton Motored Twins to Extensive 1916 Line—Two Are Electrically Equipped.

FOUR three-speed models, fitted with Dayton and De Luxe motors, are announced by the Davis Sewing Machine Company, of Dayton, O., in addition to those introduced at the Chicago and the New York Shows. These models are the D-3, three-speed Dayton motored, priced at $265; D-4, three-speed electric, with Dayton motor, $305; D-7, three-speed De Luxe motored, $265 and D-8, three-speed electric, De Luxe motored, $305.

Coincident with this announcement is another referring to the reduction in prices on the two-speed Dayton models. This reduction has been made possible by the large number of orders already received by the company and the evidence of an increased business during the coming season than in previous years. All improvements previously announced as pertaining to the 1916 Dayton line will be included in the new models, regardless of this reduction in price.

The D-2 model two-speed is now listed at $250, instead of $265 when it was catalogued as D-3, while the D-6, with De Luxe motor, formerly the D-7, is listed at $250, a reduction of $15 from the original 1916 figures. The revised Dayton line for 1916 is then:

D-1, Dayton motor, single speed, $240; D-2, Dayton motor, two-speed, $250; D-3, Dayton motor, three-speed, $265; D-4, Dayton motor, three-speed electric, $305; D-5, De Luxe motor, single speed, $240; D-6, De Luxe motor, two-speed, $250; D-7, De Luxe motor, three-speed, $265; D-8, De Luxe motor, three-speed electric, $305.

## ENFORCING LIGHTING RULES

Akron, O.—Motorists of this city have gone definitely on record in favor of assisting the police to enforce the dimmer and tail-light regulations.

## SETTING AN EXAMPLE IN NEAT RIDING COSTUME

ODDS ARE 10 TO 1 ON THE POPE MOTORCYCLE

# AUSTRALIANS IN BIG ROAD EVENT

**Stellar Feature of the Year Brings Out Strong Club Teams and Enfield-Burwood Crew Wins Again—Other Doings in New South Wales.**

SYDNEY, N. S. W.—One of the most important road events of the year in Australia has just recently been concluded, this being the Dunlop Interclub Premiership of the N. S. W. Cyclists' Union. This is a run for teams of five, each team nominated by a club, and the trial is over a 24-mile course at Homebush, near Sydney. The result is decided by the points scored by the first four of each team to finish.

The returns for this year's run were as follows: Enfield-Burwood team, T. Tracey, 1; R. A. Munro, 4; C. Walton, 5; J. J. Hogan, 6; giving a total of only 16 points off in penalization for this team. The Central Cumberland team, being penalized 20 points on the first four men to finish, was in second place, the riders checking out as follows: S. Patterson, 2; J. Smith, 3; L. J. Banks, 7; J. N. Doody, 8. Tracey won by a minute in 1 hour 5 minutes 52⅗ seconds.

Out of deference to public opinion the N. S. W. Cyclists' Union will not sanction any more open races until the war has at least taken a more favorable turn for the Allies. It is probable that no Australian Amateur Championships will be held during the coming season for the same reason.

The Queensland Cyclists' Union Interclub Premiership, a 25-mile team race, on similar lines to the N. S. W. feature, has been won by the Hamilton Wheelers for the third time in succession. Their time for the quarter-century was 1 hour 17 minutes 24 seconds. The Junior Premiership was won by the Brisbane Juniors, and the individual championships went to S. C. Ashley (senior), and M. Flint (junior). A. J. Lewis won the 25-mile amateur road championship of Western Australia.

### MACHINES IN QUINCY PARADE

Quincy, Ill., October 18.—The largest industrial parade in the history of this city was staged here on Friday, October 15, and was led by a motorcycle division. The parade was over six miles in length and took two hours to pass the reviewing stand. Carl Futterer, local Harley-Davidson agent, had three decorated machines in the line, while the Excelsior agency was represented by a racing motor mounted on a float, and the Henderson short-coupled model, adorned with colored bunting, also made its appearance in the march.

### AN INDIANA LIVE-WIRE

State F. A. M. Commissioner Jack Carr

# NEW AGENCIES FOR TORONTO

**Reported That Dayton, Cleveland and Tiger Will Help Boom Things There for 1916—Other Trade News of Canadian Metropolis.**

TORONTO, Ont.—Dame Rumor has passed the confidential tip that several new agencies are to be established in Toronto in the not far distant future. These will include, it is declared, selling arrangements for the Dayton and the Tiger and Cleveland lightweights. None of the established local dealers will reveal the inside information for the present.

The Dunlop Tire & Rubber Goods Company, Ltd., has been sending out literature to dealers in the principal centers in which encouragement is given for the formation of local trade associations.

Many Canadian motorcycle or bicycle dealers have had special Goodyear or Dunlop tire displays in their windows during the past month.

There are now 4,176 motorcycles in use in the Province of Ontario, or slightly more than one-tenth of the number of automobiles registered in the province.

The military authorities took no chances during the running of the twenty-second annual Dunlop Trophy bicycle road race from Exhibition Track, Toronto, on October 11. The course outlined took the fifty-odd starters through some military property where Germans and Austrians are interned as prisoners of war. During the race a small army of soldiers with fixed bayonets were on guard to check any dash that was not on the program.

Art. Spencer, the Canadian bicycle champion, has decided to take a needed rest as the result of his poor showing against Hans Ohrt, the world's champion, at the Dunlop meet here. Spencer blames overtraining at Newark for his downfall.

### CARR'S TRIP A SUCCESS

Indianapolis, Ind., October 18.—The first leg of the tour of Jack Carr, F. A. M. commissioner, over the state of Indiana has been completed. Carr met with excellent success. A great many old members, who had allowed themselves to become delinquent, were gathered back into the federation, while several new members were gained during the trip. Carr encountered a great deal of gravel on the trip and rode during the last two days in a driving rain. The towns touched on were Shelbyville, Rushville, Connersville, Morristown, Richmond, Hagerstown, New Castle, Muncie, Anderson, Fortville, Pendleton and Greenfield. Fred Dyer accompanied the F. A. M. commisisoner.

As a result of Carr's missionary work, the Indiana F. A. M. has had an increase in membership of over 170 per cent. since the first of June, when the present officers were installed. Indiana riders who do not belong to the F. A. M. are requested to address the State F. A. M. office at 325 N. Delaware street, Indianapolis, as the state organization has a special offer to make to all new members.

# MOTORISTS PLAN TARIFF FIGHT

**Motorcyclists of Quebec Will Join Campaign to Reduce 42½ Per Cent. Import Schedule Now Imposed on Their Machines and Accessories.**

MONTREAL, Que.—Steps have been taken in Montreal to organize automobilists and motorcyclists of Quebec to take up a more or less exclusively original campaign which is designed to fight down the Canadian tariff regulations which compel Canadians to pay practically 50 per cent more for everything in the shape of motor vehicles or accessories. Local motorcyclists feel, more and more, that they are the objects of discrimination when they see themselves compelled to pay at least 42 1-2 per cent more for machines or supplies than the United States consumer pays for the same motorcycle or accessories.

It is proposed to hold a convention during the Montreal Motor Show to discuss the situation. The Government will be urged, in all probability, that a reduction in the tariff and war tax would mean more business and yet the same amount of Government revenue because of the increased imports.

### MOTOR WHEEL HAS 2¾-INCH BORE

In an article on the Smith Motor Wheel which appeared in the October 7 issue, the bore of the motor was stated as being 2¼ inches and the wheel as being fitted with a 1⅝ inch tire. The bore of the motor is actually 2⅜ inches, while the stroke is 2¼ inches and the disc wheel is fitted with a 2 inch tire instead of the size mentioned.

E. H. Beltzig has been appointed office manager of the St. Louis branch of the Firestone Tire & Rubber Company, of Akron, O.

# DON JOHNS GETS THE PRO. BACON

**Grand Rapids Meet Brings Out Field of Top-Notchers Who Keep Don on the Hop Throughout—Johnny Foster Corners the Amateur Events.**

GRAND RAPIDS, Mich., October 10.—The race meet held at the mile track here this afternoon by the Grand Rapids Motorcycle Club was a wonderful success, viewed from the standpoint of competition, as practically all of the first-rank stars were here with their fastest cruisers.

Don Johns was the big noise in the professional events, going home with the best of the bacon in his knapsack, but the rest of the pack were on his heels all the time and any of them fully capable of trimming him if he eased up the pace for an instant.

In the Indian camp were also Morty Graves and Ray Creviston, each possessed of certain renown; Dave Kinnie and Beltram sailed the Cyclone craft; in the Excelsior crew were Perry, Wolter, Stokes, Lockner and Frank Montgomery.

In addition, the State F. A. M. amateur championship races were staged, and these developed some fast work, as witnessed by Foster's time of 4:38 for five miles.

Don Johns started by winning the five-mile open in 4:14, with Graves second and Kinnie, Cyclone, third.

Next he pocketed the ten-mile open, winning in 8:41, with Boy Perry, Excelsior, second, and Stokes, Excelsior, third.

The final event, 15 miles open, was won by Don Johns, while Ray Creviston showed on the scoreboard for the only time in the day by taking second. Bob Perry, with his Excelsior, was third. The time, 13:00.

The amateur championship events were all Johnny Foster and his Harley-Davidson, with Byrne Hull, Excelsior, running a close and consistent second. It was thus in the three-mile event, time 2:46; also in the five-mile race, time 4:38; and again in the ten-mile battle, time 10:10.

PARTICIPANTS IN RUN OF THE INDIAN M. C. OF CHICAGO TO KANKAKEE

# With The New York Show Boosters

**Personal Paragraphs Which Help to Explain Why the Show Was the Best of Its Kind on Record**

Sales Manager Horace M. Huffman was in charge of the exhibit of Dayton Motor Bicycles and twin motorcycles. He was assisted by J. N. Young, A. T. Brown, R. K. Larsh, W. Harland, and H. W. Webb. Colonel G. A. Huffman was a visitor to the Show and was well pleased at the results.

President W. G. Schack headed the Emblem forces, which included M. Welpe, Ray Frawley, who rode the light twin from the Angola factory to the Show, G. McCune. The little Emblem was a comer, if the order books are any criterion of a season's sales.

Pope forces, led by Publicity Manager Fred W. Starr, and Sales Manager L. D. Harden, included B. A. Edgar, D. W. Corbet, Edwin Sala, H. A. Stillman, E. V. Hanagan, Carl Leander, D. J. Marshall, W. H. McGrath, and D. G. Ryan. The Westfield coterie was kept busy showing the Pope motorcycle models as well as the large collection of Pope and other Westfield-made bicycles.

Norbert H. Schickel was at the head of an efficient force composed of W. Treat, B. Benziger, Frank Albert, and H. Weinert. The lightweight with spring fork and the commercial model with its undergear kept the stand attendants busy in explaining matters to the trade and other visitors who crowded the exhibit.

R. F. Rogers, president of the Rogers Manufacturing Company, with Eastern Representative Irving Beck did the honors at the booth showing Rogers sidecars. B. Riddell and Gus Rotholz lent their able assistance in demonstration.

Hugo H. Young and A. Norris took care of orders at the Flxicar booth. They were kept on the jump demonstrating the salient features of the Loudonville passenger-carrying attachment.

Under the leadership of Sales Manager W. V. C. Jackson, the Smith Motor Wheel staff had its hands full answering all the questions and booking the orders that came to them. The staff included William F. Cahn, Lou Guterman, Harmen Carpen, Charles Singer, Jr., and K. A. Muirhead.

At the stand of the Excelsior Motor Mfg. and Supply Company were Frank Schwinn, Sales Manager Fred Mathis, Stanley Kellogg, "Art" Rochow, T. J. Sixsmith, and Gus Rotholz. The Midco generator at this exhibit was under the direction of John S. Milton, the inventor. A large number of Excelsior motorcycle and bicycle dealers registered throughout the week.

President Tom Henderson was on hand at the booth where the four cylinder Henderson models were staged, and had as his assistants, Harry Immel, David Kunz, and Felix Lewin, the latter being the New York branch manager. Otto Rosenberg and Irwin Lewin, with George Scheren and A. H. Jackson gave able assistance to the factory men.

Sales Manager Frank Weschler, assisted by J. Howard O'Brien, John McDowell, Advertising Manager R. L. Harriman, E. M. Jackson and John A. Priest of the factory forces were ready to welcome braves at the Hendee Mfg. Company's exhibits. In addition, E. A. Robertson, Hal Noyes, Harvey Snyder, L. J. Mueller, Orrie Steele, John Steele, J. L. Seidell and O. V. Atwood were on hand, as well as Edward Buffum and Herb Kipp, from the Toronto tepee. Dealers who visited during the week were Louis Goldsmith, Frank Baker, the Hanna Brothers, and H. Raoul.

Headed by Sales Manager Arthur Davidson, the forces at the stand of the Harley-Davidson Motor Company, included Jes Campbell, New England branch manager; Walter Koch and E. R. Durkee, of the travelling staff; T. A. Miller, of the sales staff; Fred Steirhoff, George Wood, E. J. Mueller, Bob Brazenor, W. A. Ford, and Carl Bush, dealers. Later arrivals were Gene Coughlin, Bronx representative, Art. Herrington, P. W. Stevens and Elmer Havenstrite.

H. N. Kirk, the genial Thor sales manager, headed a group of assistants who made things hum. They were R. S. Cooper, J. D. Hurley, H. G. Pruett, Wm. F. Connell, and W. H. Spear. Their sales sheets showed the efficacy of the force at the end of Saturday's session.

Corbin products were under the charge of A. H. Harrop, with able aid by F. K. Hess, L. E. Barton, J. F. Shelton, R. J. Smith, and W C. Brown.

C. A. Van Doren, with Advertising Manager H. K. Forster and Ralph Webster did the honors at the Miami stand, with the assistance of Harry Gliesman and a number of dealers. Van Doren closed up ten contracts in succession on Wednesday, one being for 100 bicycles of the various lines made by the firm.

Messrs. H. G. Alexander, W. S. Quinlan, B. S. Dougherty, and O. Ling were on hand to tell about the Cleveland lightweight, with the able assistance of Herbert F. L. Funke, eastern distributor, E. A. Derby and C. W. Waughop, now with these forces. Chief Engineer C. R. Neracher was busy at the exhibit during the time he was present.

Joe Merkel, assisted by Harold Sweet, demonstrated the fine points of the Auto-Ped to the large crowd that blocked the exhibit each day.

W. F. Emerson was in charge of Atherton coaster brake interests at the exhibit of the Buffalo Metal Goods Company. He was assisted by Bob Lawson, the trans-continental bicyclist, whose machine with full equipment and with a Smith Motor Wheel hitched on occupied a prominent position in the stand. Lawson has used the Atherton brake during the entire 18,000-odd miles of his tours and is more than enthusiastic about its performance.

In addition to Mr. Emerson and Bob Lawson, who is travelling the entire country, the Buffalo Metal Goods Company was also represented at the Show by John McKenneth, who travels the Eastern territory.

Some of his many friends may not know that Mr. Emerson is the owner of a large apple orchard, located on his Summit farm. This year's crop has been large, no less than between six and seven thousand boxes having been shipped by Mr. Emerson. He received a box daily at his booth at the Show and distributed the contents among the visitors.

H. A. Flagg, with A. F. Stengle and W. C. Voss were on hand at the exhibit of the Standard Welding Company during the entire week. Fred Wilhelmy stopped in during the early part of the week and greeted his many friends in the trade. The Standard Welding exhibit created more than the usual amount of interest, the showing of motorcycle parts at the Garden being a very large one, embracing as it did parts for the great majority of models shown.

Kokomo Kord and other models of tires made by the Kokomo Rubber Company were displayed under the direction of Clyde and D. L. Spraker. The exhibit was a most attractive one.

Splitdorf exhibits are always interesting and well crowded, and the present one was no exception to the rule. Advertising Manager D. R. Walls headed a contingent which included Mike Toepel, C. O. Dail, C. H. Lincoln, John O'Hara, M. J. Dooley, F. S. Perrin, and M. J. Murray, among others.

At the stand of the New York Sporting Goods Company, were Irving Barnard, J. F. Pope, H. Lanhorn, W. J. Dowse, Wallace Stuart, A. O. Brown, and Melville Bernhardt. Vice President Fred A. Baker and President Powhatan Robinson were daily visitors to the Show.

Schebler carbureters were demonstrated by a picked staff, which included R. W. Doherty, B. A. Okey, and Jonas Jensen. The attendants were kept busy explaining the action of the Model H motorcycle Schebler to the many riders who thronged the Garden.

Walter F. (Jimmie) Walker and Charles Stevens were at the stand of the Weed Chain Tire Grip Company. Walker was kept busy telling what good things the chains are, with photographic evidences from his recent 12,000 mile trip right at hand as proof. The pictures drew big crowds at all times.

# WITH THE NEW YORK SHOW BOOSTERS

**More Light on the Personal Side of the Garden Exhibition—Cont. from Page 18**

H. A. Gould and C. F. Johnson took care of Exide battery interests during the Show. They came in for plenty of questioning, showing that electricity is a big feature in motorcycle lighting these days.

The John S. Leng's Son contingent included George Hess, R. D. Hance, and L. H. Kent, with T. C. Leng in charge.

A. H. Patterson, the Brooklynite, had as assistants at his exhibit, John A. Hall, Leo Wichoff, and S. Henderson.

Frank Chase and H. E. Ring were at the Mossberg stand, ready to explain the fine points of the line of tools made by the Attleboro firm.

A. A. Bliss, S. E. Hayes, and P. D. Sedley were at the Heinze Electric Company's booth to inform all comers about the Heco horn and Heinze magnetos.

H. A. Jackson, F. K. Pierce and George Schneider were ready to talk saddles at the stand of the Superior Metal Products Company, and were accordingly kept pretty busy by those interested in both motorcycle and bicycle seats.

Harry Svensgaard and W. D. Rumsey demonstrated Pullman sidecars at the stand of the Svensgaard Corporation. The pleasure models vied with the commercial car in attracting attention, which was followed up by numerous orders.

Reading Standardites were headed by Assistant Treasurer E. W. Theurer and Sales Manager G. W. Atkins. Factory Superintendent E. J. Wilson, and J. S. Deysher of the testing staff, were on hand, as well as a number of dealers from all parts of the country.

G. A. Hosmer, Fred S. Wood and George Schneider were on the jump most of the time telling about the Hosmer compounds and other things which the Buffalo Specialty stand had on exhibition.

The J. W. Grady forces included Harry Howe, and J. W. Grady in person, at the head of a staff of bicycle enthusiasts.

F. H. Jones had charge of the Persons exhibit of saddles, in company with Charles A. Persons, president of the company.

Haverford Cycle Company interests were looked after by Fred Jaffe, C. W. Smueller, Hyman Landau and Harry Michelofsky. President Max Sladkin was on hand to meet friends and generally see to things during the entire week.

Old Sol lamps in a dazzling profusion were exhibited at the Hawthorne stand, with C. A. Mackey, Henry Biren, and A. Horace Hawthorne to do the honors.

The Militaire Autocycle was described to all comers by E. E. Richter, Charles Eden and Harry Schnauffer.

Eclipse clutches and Morrow coaster brakes were in charge of F. M. Ball, J. C. Ferguson, A. C. Rice and W. M. Ingalls. Both the bicycle and motorcycle contingents were naturally interested in these products.

Renold chains, at the Frasse booth, were demonstrated by John R. Cautley, assisted by Jos. Joeg, E. W. Mills, and others from the firm.

A. E. Lonn headed the Great Western staff, which included F. H. Leng, J. Katz, and G. A. Winslow. They were all kept busy showing the Crown, Adlake and America bicycles.

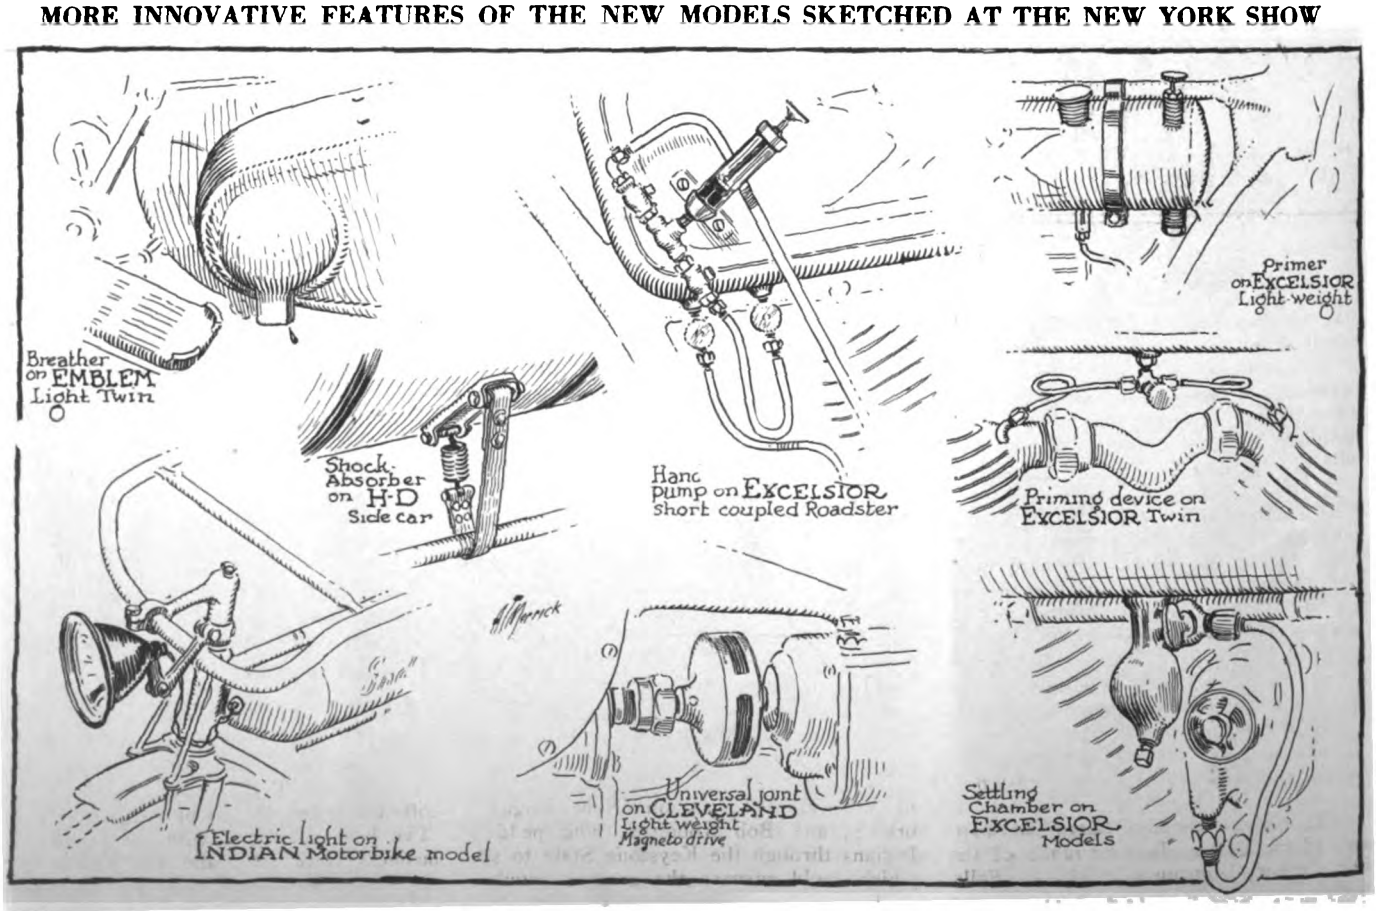
M. J. Horton and E. W. Mink were among those who showed New Departure goods at the booth of that company.

Fred Mesinger, Jr., with W. Mesinger, N. Palto, Alexander Sciasion and A. Erb was at the Mesinger exhibit. It goes without saying that Henry Mesinger himself was present and was greeted cordially on all sides.

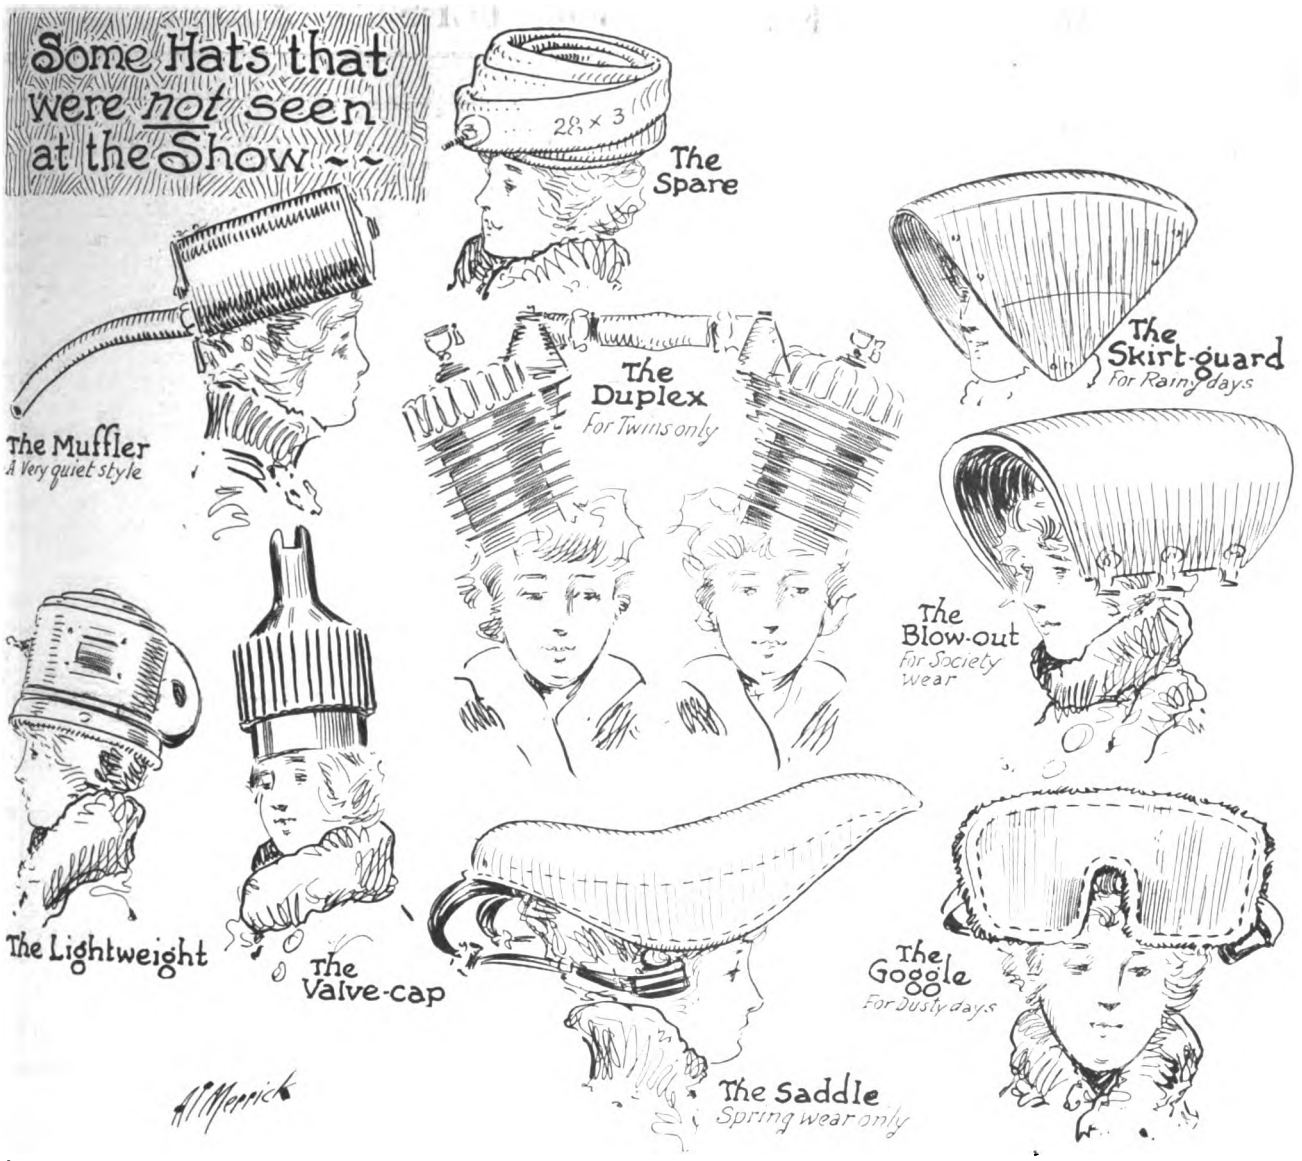
J. L. Brothers was to be seen at the stand of the Ericsson Mfg. Company, in charge of the striking display of Berling magnetos for all kinds of motors.

P. J. Fisher presided over the booth devoted to Duckworth chains. The wide variety of these products kept him busy explaining things to both bicyclists and motorcyclists.

## MORE INNOVATIVE FEATURES OF THE NEW MODELS SKETCHED AT THE NEW YORK SHOW



Digitized by Google



D. W. Wetzel, of the Mott Wheel Works, was a visitor to the Show during the week in the interests of Mott products. He renewed many old acquaintances during his stay at the Garden exhibition.

W. W. Shoemaker, of the Graton & Knight Mfg. Co., came into the Garden for a day's visit and was cordially welcomed on all sides. He took particular notice of the belt and combination drive machines, most of which use Spartan belts.

C. B. Brooks, of the 20th Century Company, of New York, was a Show visitor during the week. He combined both business and pleasure during his inspection of the various exhibits.

Walter P. Coghlan is now sales manager for the Lovell-McConnell Mfg. Company, makers of Klaxon horns in Newark, N. J. He was formerly in charge of Klaxon sales in the Northwest. Mr. Coghlan succeeds W. O. Turner, resigned.

E. E. Rhoads has been appointed manager of the Dallas, Texas, branch of the Fisk Rubber Company, of Chicopee Falls, Mass. He succeeds Wayne Murray, who goes to the Fisk Chicago branch. Rhoads was for the past two years manager of the firm's branch in San Antonio, Texas.

Fred Clark, who used to be the main squeeze on the old Bi-World, and who follows the "society" dope through to a finish every time he gets hold of a newspaper, told Arthur Davidson that he (Arthur) had been mentioned as subject to a personal tax on a few millions and some more odd change. Arthur spent the odd change buying up back date Brooklyn papers, but failing to find the item, left it in the hands of the F. A. M. publicity bureau for immediate attention.

Joe Merkel was not the only person on the floor who had a carbureter "in hiding" throughout the better part of the week. Charles Hagsted, of 77 East 52nd street, New York, seeing Joe with the new Motsinger device, pulled out a Claudel gassifier—also for lightweights—and right there the gassing began.

The keen rivalry between Jess Campbell, of the Harley-Davidson New England branch, and Bob Robinson, who peddles Indians through the Keystone State to see which could ensnare the greatest number of F. A. M. members between Thursday afternoon and Friday night at the New York show, had its "raison d'etre." It was not pure unadulterated love for the F. A. M., either. Bob, who was the least efficient ensnarer, bought the fish supper for Mr. and Mrs. C. and Mr. and Mrs. R., and the Federation banked a bit over $100 in celebration of the occasion.

R. F. Rogers, maker of the sidecar of that name, left on Thursday night. Rogers did not explain his haste, but Irving Beck, in charge of the exhibit, said it was due to the number of cars sold at the show. Rogers got nervous lest the factory could not turn them out on time and made tracks West to speed the plant up.

Heard at the Mon Auto booth: "Why do they make it so low?"

"That's so you can ride under the horses and not get hurt."

"Well, at last!" exclaimed W. L. McGrath, mechanical engineer for the Westfield Manufacturing Company and designer of the Popes, when the F. A. M. collector poked out his paw for two bones. "I've been connected with the motorcycle business since 1907, and this is the first time I've been asked to join; I thought it never was coming, but here's the two."

# PUTTING 12,418 MILES BEHIND A SIDECAR

## Last Installment of the Story Telling What Happened on a Five Months Trip

By WALTER F. WALKER

FROM Chambersburg to Harrisburg is only a short ride of 53 miles and a very pretty one, but the roads are not the best. I arrived in Harrisburg in good time and spent the night there. Next day I was around early and started for Philadelphia. There are some very fine roads through this section and the contrast was so great from the roads I had been getting over, that I sat up and looked around and greatly enjoyed the riding.

Between Harrisburg and Philadelphia are a number of toll gates. At the first one I bought a string of tickets—one to be left at each gate I had to pass. I stopped at the first two and handed in my ticket; then I would only get going good when I had to stop again. Therefore, I decided to drop off the tickets on the run. I tried this and the first time it worked all right. I rode by and dropped the ticket on the stoop. At the next gate I was moving a little faster and I tried to throw the light piece of paper where the gate-keeper could get it, but I must have failed, for I heard someone yelling at me. I looked back and saw a man standing in the road, but I was in a hurry so I did not return. I was going to try the same stunt at the next gate; but when I came up close I saw the keeper standing in the door with a shot gun, so I changed my mind, stopped and gave him the ticket. In Lancaster I had another scare.

### "Jimmie, You're Pinched"

I was riding down the main street; the traffic was rather heavy. At the turning point I waited for the traffic officer to give me his signal to cross; he blew his whistle; but motioned for me to stand still. Then he let the traffic move the other way and started on a brisk walk towards me. The crowd on the street, thinking I was to get a lecture, began to gather around; while I was saying to myself, "Jimmie, you're pinched."

Well, I was never more surprised in my life when this big policeman walked up, put out his mit to shake hands, and began to ask about some one I did not know. I shook hands with him but told him I thought he was mistaking me for someone else. I was relieved when the traffic congested so that he had to signal the vehicles to move on. And then I put on all speed, was up the hill and on the rest of the way to Philadelphia. I was not really alarmed, but a little uneasy, for I had visions of "Good morning, Judge," and parting with some of my bank roll. I had been very lucky all summer and had never even been "touched" by the guardians of the law.

I found my way to Philadelphia in good time, where I remained several days. Nothing unusual happened here, and on September 23, I headed my machine towards "Old New York Town." The ride was very fine; the new State road, just finished, was surely a treat, and the old motor hummed while I fairly flew over these splendid roads. I made a number of stops in the towns along the way, and when I drew up for a visit with my friend Saunders, at New Brunswick, N. J., I was persuaded to stay there for the night. Next day I made the short run to New York and breathed a sigh of relief when the ferryboat touched the dock on the New York side. As usual I made straight for the office of **Motor Cycle Illustrated,** where they awaited my coming, and after pictures had been taken and we had had a short chat I then started my motor once more for the fifty-nine miles that would bring me home to Bridgeport, Conn.

This ride holds no terrors now like it did a few years ago, when the Boston Post Road was known to tourists as the worst road anywhere in the East. So after leaving New York City behind I settled down to a slow gait and began to review all I had passed through since going over the same ground five long months before. As the familiar sights of Bridgeport began to loom up, I gazed down at the faithful old motorcycle that had shared my many bumps and troubles, and thought what a wonderful piece of machinery it was to withstand over 30,000 miles of all kinds of road conditions and all sorts of weather. As this is the second season for the same motor, it doubled my admiration for what a motorcycle can do.

### CLEVELAND SPECIFICATIONS

In our review of 1916 models published in the October 7 issue, an error crept into the specifications of the Cleveland lightweight. These should have read as follows:

Two models: 1-A, two stroke, two speed model, with unit power plant, including motor, two speed set, clutch, countershaft and magneto, $150. Model 1-B, two speed machine, with unit power plant, including motor, countershaft and magneto, $140.

# JULY SHIPMENTS SHOW INCREASE

## Total Value of Motorcycle Exports for the Month is $304,801

WITH the one exception of shipments to Porto Rico, the month of July, 1915, shows a gain in motorcycle shipments over the month of July, 1914. In comparison with the month of June, 1915, July of this year shows very favorably, such decreases as are noted being offset by increases on other items. Shipments of motorcycles are considerably in advance of last year and only slightly below the figures for June, 1915. Bicycle shipments are in excess, July, 1915, being greater than both July, 1914, and June, 1915. Imports have fallen off considerably.

Shipments of motorcycles for the first seven months of this year are far in advance of the shipments for the seven-month period of 1913 and 1914. The bicycle shipments for the seven-month period shows 1915 to be below both 1913 and 1914. Imports of motorcycles and bicycles are considerably below both 1913 and 1914. While the shipments to Hawaii, Porto Rico and the Philippine Islands for the seven-month period of 1915 do not aggregate as much as the periods of 1913 and 1914, the monthly shipment for July of this year, with the exception of Porto Rico, shows an increase over July, 1914.

### Good Showing in June

June, 1915, showed a total of 2,133 machines, valued at $389,964, shipped to foreign countries. July, 1915, totals 1,806 motorcycles, valued at $304,801, while July, 1914, shows but 501 machines, with a valuation of $104,091. For the first seven months of 1915 the figures show shipments of 8,432 motorcycles, valued at $1,506,597. This is far in excess of the period in 1913, when but 3,010 machines, valued at $579,183, were shipped. The seven-month period of 1914 shows 5,517 motorcycles, with a valuation of $1,064,039.

Bicycle shipments for July, 1915, show a valuation of $43,735. This is an increase over both June, 1915, and July, 1914, the figures for the first being $33,561, and for July, 1914, $39,829. Notwithstanding this monthly increase, the figures for the seven-months periods show 1913 to have lead with $447,978, followed by 1914 with $353,243, and 1915 showing a valuation of $281,028.

### The Falling Off in Imports

Imports continue to show a decrease, the month of July, 1915, showing a valuation of $2,712, as compared with $3,802 of June, this year, and $14,755 during July, 1914. This decrease is reflected heavily in the seven-month periods, 1915 being $27,060 as against $161,651 for 1914, and $111,352 for 1913.

Motorcycles and bicycles remaining in the warehouse as of July 31, 1915, show a slight gain over July 31, 1914, and June 30, 1915, the figures being $1,050, $610 and $258, respectively. Shipped to this country to be exported to other countries in July, 1915, were mounts valued at $24. None were shipped during July, 1914, and only a $2 valuation was placed on those received during June, 1914. The seven-month period of 1915 shows a total valuation of $56, as compared with $644, covering imports to be exported during the seven-month period of 1914.

### Hawaiian Shipments Growing

A substantial increase is noted in the shipments of motorcycles and bicycles to the Hawaiian Islands. The valuation for the month of July, 1915, reached $8,000. During the month of July, 1914, it was $4,044 and for June, 1915, total valuation was $4,044. The seven-month periods, however, show 1913 to have lead with $79,008, followed by 1914 with a valuation of $40,594, and 1915 with $37,563.

While the valuation of motorcycles and bicycles shipped to the Phillipine Islands during the month of July, 1915, was higher than for the month of July, 1914, a decrease is noted when comparing the month with June, 1914. For July of this year the valuation is shown as $8,712. July of last year had a valuation of $7,555, while the month of June, 1915, showed a valuation of $11,170. The first seven months of 1914 showed $47,387 as the valuation, compared with $47,216 for 1913, and $28,216 for the period during 1915.

Shipments to Porto Rico have fallen off considerably, July, 1915, showing a decrease when compared with both July, 1914, and June, 1915. During July of this year motorcycles and bicycles shipped reached a valuation of but $1,196. During July, 1914, the valuation was $3,344, and for June, 1915, it reached $2,822. The decrease is also shown in the seven-month periods, 1915 having a valuation of $12,062, as compared with $22,489 for 1914, and $26,250 during 1913.

## NO NEW YORK CITY LICENSE

Largely through the efforts of Fred Baker, of the New York Sporting Goods Company, of this city, the proposed city ordinance licensing motorcyclists will not be adopted. Mr. Baker assured the city authorities that a special city license would cause a lot of confusion, and was hardly worth while, in any event, on account of the prospective passage of a law by the legislature covering the entire situation in the Empire State. The coming State legislation, as elsewhere, will prohibit and dispose of all local licensing of motorcycles.

From present indications, a bill will be introduced into the New York State Legislature soon after it convenes in January and a special effort will be made to have the bill enacted into a law so that it will be effective February 1.

## TIRE MAKERS PARTICIPATED IN DISPLAY WEEK

Cincinnati, O.—Practically all the leading makers of tires took part in the recent "Newspaper Display Week" celebration, in which goods nationally advertised in the daily papers were specially featured in window displays. Goodyear, Goodrich, Fisk, United States, Firestone and other well-known makes of tires which have become familiar to readers of newspapers were shown prominently in the windows of motorcycle and automobile dealers, and much valuable publicity was afforded as a result.

## STROGONOFF IS ENTHUSIASTIC

A. P. Strogonoff, Emblem agent in Schenectady, N. Y., was very enthusiastic over the new Model 106 Emblem with its seven horsepower motor. "The only thing that gives me any uneasiness about the little fellow," said Strogonoff in a talk with **Motor Cycle Illustrated's** representative, "is that I may not be able to get my full allotment of them, for the demand is going to be huge. Other representatives with whom I have spoken agree with me in this."

## FIRST LADY SIDECARIST TO FINISH SIDNEY-MELBOURNE TRIAL

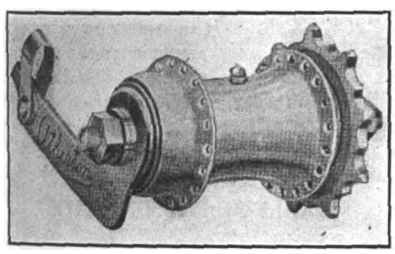
# With the Manufacturers

## MOTOR-BIKE BRAKE MODEL FOR ATHERTON LINE

Designed to effectively brake any heavy-service, commercial or lightweight motor bicycle, as well as two-wheelers fitted with the Smith Motor Wheel, is the Atherton Motor-Bike coaster brake, the recently produced product of the Buffalo Metal Goods Company, of Buffalo, N. Y. In principle this brake is the same as the well-known Atherton bicycle coaster model, but of course is made stronger and has a stouter sidearm than the latter.

The spoke flanges on the Motor-Bike model are extra heavy and drilled for large



**Motor-Bike Brake**

spokes. The sidearm is very strong and is attached to the rear fork by means of a stout clip with a unique fastening. The braking efficiency is approximately greater by 50 per cent. than any bicycle brake. Like the other Atherton models, this brake follows the firm's slogan, "It always works." It is, furthermore, the only heavy-service coaster brake on the market.

The brakes made by this firm have two driving contacts, giving instant action to the driving movement and doing away with any chance of slipping. There are three braking surfaces, combining the cone principle with that of flat surface friction, thus giving double braking power.

## WENGATZ PARTY AT DENVER

Denver, Colo.—Mr. and Mrs. R. W. Wengatz, with their Dayton sidecar combination and special trailer, arrived in this city recently, having covered about 4,200 miles since leaving their home in Albany, N. Y. Mr. Wengatz stated that he had used 126 gallons of gasoline and 41½ gallons of oil up to his arrival in Denver.

"Since leaving Ohio," said Mrs. Wengatz, "we found Colorado roads better than any others. Nebraska had the worst surfaces we encountered so far; ruts two feet deep, any quantity of sand and lots of streams to ford. We got lost several times by leaving the railroad grade on which we had to run. At one place we had to run downhill on low gear for 2½ miles, the sand being too deep to allow of any other way of going at all."

In this city, the Wengatz' are camped out in one of the public parks. A part of this park has been devoted to tourists, for camping purposes, and there are rarely less than 60 machines parked every night. The city supplies the wood for fires, free of charge.

The Wengatz pair will shortly leave Denver for Salt Lake City, Reno and San Francisco. They will come East next winter by way of New Orleans.

## SPLITDORF INSTRUMENTS FOR ELECTRICAL MEASUREMENTS

Electrical measuring instruments especially adapted to service on motorcycles, automobiles and motor boats are being put out by the Splitdorf Electrical Company, of Newark, N. J., makers of the Splitdorf and Dixie magnetos. The line consists of ammeters, voltmeters and voltammeters, all being made with standardized parts. Each instrument has a uniform scale division and is accurate within one per cent. There are extreme high-torque springs in each meter which give strong controlling force, and the temperature co-efficient is low. The indication is dead-beat.

The meter used in connection with motorcycle outfits has a 2½-inch scale length and a range of 10-0-10. It is marked in discharge and charge from a central zero, with graduations in units. The finish is dull black enamel. A special bracket for attaching the instrument to the top tube of the motorcycle frame is furnished.

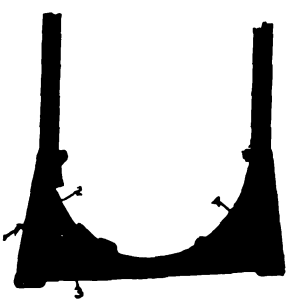
## CHAPPLE IN TEXAS

Dallas, Texas.—A. J. Chapple, southern representative of the Miami Cycle and Manufacturing Company, is now covering Texas, placing agencies for the Miami power bicycle. This machine is proving very popular, especially among the boys.

## INDIAN-PIONEER STARTER AND ADJUSTABLE STAND

Riders of single-geared Indians of 1913 or 1914 models will be interested in the Indian-Pioneer starter, produced by the Pioneer Manufacturing Company, of Milwaukee, Wis. This starter, which is of the kick type, is to be fitted to the clutch on the chain sprocket and incorporates a front plate with starter ratchet-pinion, an anchor plate for the starter arm and the arm itself.

The starter resembles that used on 1915 Indian models, having a toothed arm meshing with a ratchet-pinion on the clutch unit. The arm has a folding pad or tread, the same as the regulation starter. The anchor plate is fitted direct to the crankcase. The starter incorporates a clutch-operating device which enables the rider to fit his control on the right hand side, using a lever.



**Ideal Stand**

In addition to the starter, the firm is putting out the Ideal stand. This stand is so arranged at its base as to enable the machine to be kept upright on uneven ground, levers at each side enabling the base to be shifted out of the perpendicular position or to be returned to it when set at an angle. It has a wide base so as to prevent digging into the ground. It lists at $4.

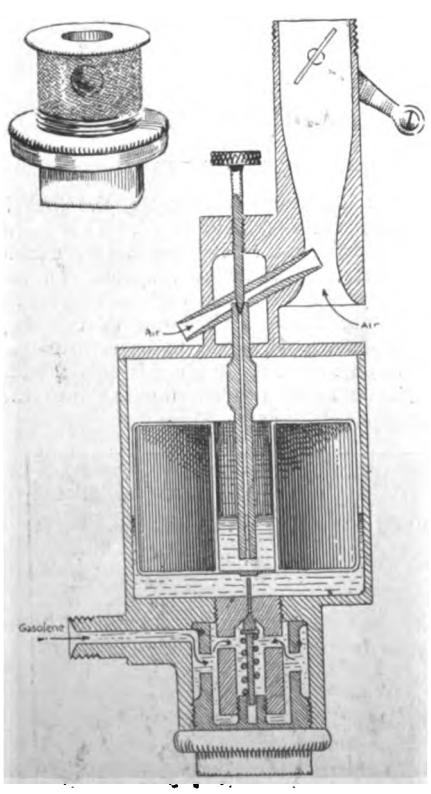
# FEW PARTS IN NEW MOTSINGER CARBURETER

WHAT is probably the most recent addition to the carbureter field is the Motsinger carbureter for lightweights, produced by the Motsinger Devices Manufacturing Company, of Lafayette, Ind. It made its debut at the stand of the Auto Ped Company of America during the New York Show.

This carbureter, which has been designed by Homer Motsinger—the head and shoulders of the Motsinger firm—is extremely simple. It consists of a vaporizing chamber of the straight-through Venturi type, so that apart from the taper in the Venturi itself and the varying friction occasioned by the butterfly throttle valve, there is nothing to obstruct the free passage of air. The Venturi is inclined at an angle and into it projects a central jet with a vertical needle-valve, the latter being controlled by a knurled knob at the top of the instrument. The higher end of the Venturi projects into the vertical mixing chamber, at whose lower end is taken in the air for mixing. At the top of the latter is the butterfly throttle valve.

### Action of Carbureter

As will be seen by reference to the illustration, the suction of the motor creates a partial vacuum in the main mixing chamber, also of the Venturi type, and this in turn gives rise to reduced air pressure in the vaporizing Venturi. The gasoline is then forced from the jet into the inclined tube. At the same time, air is drawn into the inclined tube below the jet and vaporization takes place. The vaporized air then passes into the large Venturi and so to the motor. The arrangement is such that the gas is quite thoroughly mixed with the air before reaching the mixing chamber and in the latter the mixing process is completed.



**Section of Motsinger Carbureter Showing Jet Needle Valve, the Only Adjustment —Inset Shows Gauze in Settling Basin In Lower Part**

Aside from the jet needle valve the Motsinger carbureter has no adjustments. It is claimed that in spite of the simplicity, the instrument is perfectly capable of producing a correctly-proportioned mixture for every condition of motor speed and power. The Motsinger firm therefore recommends this carbureter for lightweight two-stroke motors.

### Concentric Float Chamber

The float chamber surrounds the jet and the float valve is directly operated. The float, which is of hollow metal, does not touch the vertically-acting valve when the level is correct, but only contacts with it when the level falls below a certain point. This arrangement does away with any movement of the valve due to jarring the machine. There is a lug on the center of the float base which touches the pin of the valve and presses it down against the action of a spring to open it. A settling basin is formed at the lowest point of the carbureter, and this basin surrounds the float valve. The basin has a fine gauze cage to prevent foreign matter entering the float chamber. The float is made of a special non-corroding alloy, as is the jet, while the rest of the carbureter is of brass.

The Motsinger carbureter will be used on the Auto Ped motors for the 1916, according to the statement of the designer of this unique little vehicle, Joe Merkel.

## FIRESTONE MEN GIVE LECTURES ON BUSINESS TOPICS

Akron, O.—Officials of the Firestone Tire & Rubber Company, of this city, are becoming popular as preachers of the gospel of better business methods, judging by the addresses of two members of the staff made recently. Edward S. Babcox, advertising manager of the concern, gave a highly interesting talk before the Young Men's Business Club last week, the subject being advertising. R. E. Lee, manager of the company, addressed the Young Men's Business Club of Canton on general business topics a week or so ago.

## BIG INCREASE FOR HENDERSON

President T. W. Henderson, of the Henderson Motorcycle Company, certainly had no fault to find with the early show. Mr. Henderson himself is authority for the statement that his 1916 business exceeds by fully 200 per cent. that done in 1915 machines up to this time last year. This applies to both domestic and export business, the combination of improved machine and lower prices making it practically certain that 1916 Henderson sales will establish new records.

## STEWART-WARNER 8-HOUR DAY

All the plants of the Stewart-Warner Speedometer Corporation, Chicago, have been placed on an 8-hour basis. With the change in hours has gone a readjustment in the wage schedule to assure that the men will receive as much per day as they did under the previous 9-hour basis.

## NEW MOSLER PLUG HAS DOUBLE WIRE ELECTRODES

A. R. MOSLER & COMPANY, of Mt. Vernon, N. Y., have brought out a new type of Mosler motorcycle plug, obtainable in both metric and S. A. E. (⅞-18) threads. This plug made its debut at the New York Show, it being displayed and described by Sales Manager Fisher of the Mosler concern.

The new plug has double wire electrodes which offer a continuous knife-edge sparking surface with numerous contact points. The arrangement is such as to produce a wide brush-discharge instead of the usual line-discharge due to employing pointed electrodes. The insulation is provided for by a solid core of East India mica, hand wound on the center electrode.

This insulation construction is such that the new Mosler plug is claimed to entirely eliminate the old "out of adjustment" trouble experienced in many plugs, particularly on the motorcycle, by reason of the terrific vibration. The plug will sell at $1.00 whether metric or ⅞-18 size.

## HARLEY-DAVIDSON DEALER

Descriptive of many long distance rides and tours, runs and records is the October issue of the *Harley-Davidson Dealer*, the house organ of the Harley-Davidson Motor Company, of Milwaukee, Wis. In addition to these there are over two pages devoted to timing the motor and tuning up the battery on the 1916 models, and illustrations and descriptions of new accessories, the latter being in the line of caps and mitts in preparation for cold weather riding. The R. F. D. men get two pages in their interest, the subject being the decision of Postmaster-General Burleson anent sidecars. It is needless to say that the pictures are well up to the usual Harley-Davidson standard of artistic taste.

## VICTOR RUBBER CO. INCREASE

Springfield, O.—Stockholders of the Victor Rubber Company have authorized the firm to increase the capital stock from $150,000 to $300,000, in order to meet the increased demand for its products by running night and day for the next six months. Two shifts of men are now being employed, each 200 strong.

## SPRAKER SELLS SOME STOCK

D. C. Spraker, founder and president of the Kokomo Rubber Co., Kokomo, Ind., has parted with the greater part of his interest in the company to a group of stockholders. Most of the stock has been acquired by Lon Spraker, John Neary and A. V. Conradt. A sum of approximately $200,000 is mentioned as the selling price.

# News of the Clubs

## FOUR PERFECT SCORES FOR INDIAN CLUB RIDERS

Chicago, Ill., October 11.—Four perfect scores were made in the fifth endurance run staged by the Chicago Indian Motorcycle Club last Sunday to Kankakee, Ill., and return; distance, 150 miles. Those making perfect scores were Leemhuis, Hertzer, Kolb and Hauser.

Nine riders started on the run. At 7:11 a. m. all the boys had gotten under way for Joliet, Ill. They all got off the road somewhere enroute to the first control, and it was a case of cutting loose on speed once they got on the right road again.

All checked in on time at Joliet and then hit the high places for Kankakee, the noon control, where a grand rush was made for dinner.

Bill Chalowski was trying to negotiate one of the numerous ruts going out and had a mix-up with a "bossy" which laid Bill out with a sprained ankle. No damake was done to the machine. Nelson, the only sidecar entrant, came through this run with only minor trouble. Going at the rate of 40 miles an hour, the sidecar wheel came off, sending the machine into a fence, but the crew escaped. Hannon proved himself the "goat," getting lost at every cross-road. His chances went glimmering after he arrived in Kankakee. Johnny Morris proved himself a sticker; getting a puncture 12 miles outside of Chicago Heights, he rode on a flat tire into the Heights where it was found he was several minutes late. Kolb was chicken hungry and gathered two fries en route for future use. Houser came through with a perfect score, making him the leader with 950 points for the five runs so far this season.

### PLAN HALLOWE'EN PARTY

Milwaukee, Wis., October 12.—The appearance of the first snow flurries as early as October 9 caused the entertainment committees of the Milwaukee Motorcycle Club to get busy and begin plans for the winter's social activities. The first big event scheduled is the annual Hallowe'en party of the club to be held in the club rooms, Thirty-fifth and Wells streets, October 30.

Miss Lillian Hauerwas, official hostess of the club and the only feminine rider in the organization, has been appointed chairman of the Hallowe'en committee with the other members Irving Janke, Harry Grande, Leslie Garrow and E. Harrisburger. Last year's party was a social event par excellence and one of the best affairs ever staged in the local clubhouse. The committee this year has a hard task ahead to make this year's party better than last. Paul Bruess has promised to furnish an orchestra for the affair. Pumpkin pies and apples will be donated galore and the success of the eats end of the Hallowe'en party already is assured.

### TO HOLD ANOTHER MEET

Milwaukee, Wis., October 12.—Encouraged by the tremendous success of the first exclusive motorcycle show held here last spring, the Milwaukee Motorcycle Club will stage another next spring. The determination to hold a show again is prompted to a large extent by the requests of Milwaukee dealers and accessory men for another exhibition larger than last season's.

### POLITICAL SPEECH TO READING M. C.

Reading, Pa., October 15.—At a meeting of the Reading Motorcycle Club, George M. Jones, a candidate for mayor, gave an unusual feature to the program by making a political address. He pledged himself to the improvement of more streets if elected, and was vigorously applauded by the riders.

### BAY CITY M. C. TO MOVE

Bay City, Mich.—New quarters are to be taken by the Bay City M. C., of this city, as soon as a proper location is decided upon. Several are now under consideration by a special committee.

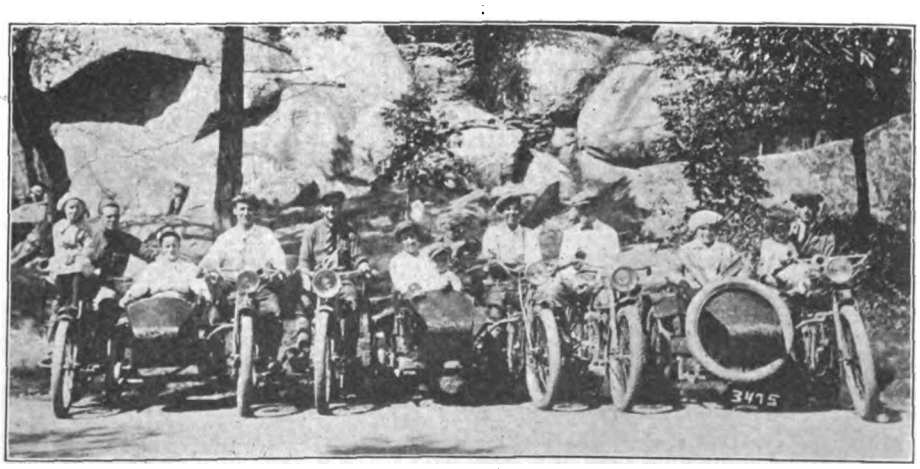
## CONSOLIDATED M. C. FATTENING ITS TREASURY

Indianapolis, Ind.—The membership of the Consolidated Motorcycle Club of Indianapolis has reached the coveted 99 mark. The membership campaign now being waged briskly by the members is bringing fine results. Each meeting night between ten and fifteen members are added to the roster.

A Ways and Means Committee has been selected and given the important job of putting money in the club's treasury to defray expenses over the winter months. The chairman has made arrangements for placing the club on a strictly business basis, and every member will be extended the usual sixty days' credit and then dropped from the roll if he does not show a good reason for failure to pay up. A statement of the condition of the club's treasury will be mailed to each member of the club after the auditing committee has finished its work.

One of the plans of the committee to improve the club's treasury is to ask every member by mail to pay his dues at least three months in advance. Most of the riders approached have signified their willingness to assist the club in that way. Another plan of the committee is to call for volunteers to act as collectors.

## VISITED SCENE OF FIERCE THREE-DAY CIVIL WAR BATTLE



**Members of Keystone M. C., of Harrisburg, Pa., at Little Round Top, Gettysburg, on Recent Run—The Number Three Played an Important Part in This Affair**

Harrisburg, Pa., October 5.—It was a rainy day and but few of the many riders of the Keystone Motorcycle Club participated in the run to Gettysburg, where the accompanying photograph was taken. Perhaps that was why the number "three" played such an important part. It was almost uncanny to see how "three" asserted itself every now and then. For instance, in the photo there are three Indians, three Harley-Davidsons, three sidecars, three solo riders, three ladies, three children. Then it required three hours to reach Gettysburg, because of the bad roads, and last but not least one unfortunate rider had three falls.

# -REPRESENTS WHAT

# INDIAN DEALERS WILL RECEIVE IN 1916

**The shows are over.**

**1916 announcements are all made.**

**Now we can stop talking and get down to business.**

**Everybody has seen the Indian achievements for the coming year—the completest Indian line in its history—the most comprehensive line under one name in the whole field.**

Indian Motocycles alone will pay to the dealers during the season at hand $2,000,000. Indian Bicycle earnings will be in addition to this.

At the factory we are already driving the final nails in Indian 1916 sales and advertising plans. We don't need to tell you how much factory support you will get in 1916. Every Indian dealer knows how the Hendee organization stands by him.

It is enough for us to say that we are going to do our part with characteristic Indian liberality.

Beyond this it lies with the Indian dealer to get a satisfying share of the $2,000,000 profit paid on 1916 business.

Ask yourself the question *"How much am I going to get?"*

And please realize that the answer rests most of all on your own powers as an aggressive merchant.

# SNAP-SHOTS OF THE DAYTON-NEW YORK ENDURANCE RIDERS

Dayton-New York Run Contestants Entering New York City

FOUR days of real riding were chalked up by those who came through to the New York show on the Dayton-New York run last week. While full details of this event have already been given in these columns, photographs were difficult to obtain, due to poor weather conditions and lack of opportunity to get satisfactory pictures. Those seen on this page illustrate some of the conditions under which the seven solo riders and the lone sidecar outfit traversed the 800 miles from Dayton to the metropolis.

At the finish, the mud-smeared mounts were taken into the show and displayed for the benefit of the thousands who thronged the Garden. This was the first run from any great distance to a motorcycle show, and will undoubtedly establish a precedent.

Jack Neis, of Splitdorf Forces, with Only Sidecar Entered in Run

Contestants Stopping at a Secret Check in Ohio—Neis' Sidecar Combination Is in Background—Solo Riders Are Part of Indian Contingent

### BUILD CAMP AT HARP LAKE

Two Rivers, Wis., October 12.—Fifteen Harley-Davidson riders of this city have organized a club and have leased a camp at Harp Lake, Gibson, where they have built a shack which has been furnished up and equipped in fine style. Lounging and sleeping quarters are provided and the kitchen has been stocked up to suit the most fastidious chef. There is good hunting and fishing in the vicinity of the Harp Lake camp and the boys propose to make it an all the year round rendezvous.

### MOTORCYCLE PROVES VALUE

Passaic, N. J.—Albert Marshall, a special officer of the Passaic County S. P. C. A., is an enthusiastic motorcyclist and uses an Indian in running down offenders against the cruelty to animal laws. In an interview Mr. Marshall said that he would be unable to do his work without the aid of a motorcycle.

### CINCINNATI SPEEDWAY SITUATION

Cincinnati, O.—At a meeting of the stockholders of the Cincinnati Speedway Company, held last week, additional subscriptions to the capital stock of the company were pledged, bringing the total amount up to $348,000. This sum will ensure the speedway being built. Much secrecy is maintained regarding the site of the track, although it is understood that options have been taken.

### A SPEEDY MOTOR COP

Clifton, N. J.—Motorcycle Officer Anthony Battell caught two motorcycle riders speeding through town on Sunday. They were traveling at the rate of fifty miles an hour but the officer overtook them on his Harley-Davidson. Each paid a fine of $5.

# JENSEN CAPTURES INTERCLUB TITLE

### C. R. C. A. Rider Takes Inter-Club Championship by Making Clean Sweep of Races—New England Wheelman Second.

EDWIN JENSEN, champion of the New York division of the Century Road Club Association, accounted for the premier title of the Inter Club Amateur Cycle Road Racing League, when he captured the two final races of the series of four, which were staged over the Eastern Boulevard, Bronx, New York, on Sunday, October 17. Jensen made a clean sweep of the entire series of unpaced events which were at distances of one, three, five and ten miles, the last two events having been run off on Sunday, October 10.

The field was one of the best which had ever turned out for the Inter Club championship races and gave hard battle to Jensen. In this series the young cyclists broke both the five and ten mile records; the five miles were covered in 12:47⅗, and the ten miles in 26:00⅗. Jensen was the winner of last year's Inter Club championship and still holds the fifteen and fifty mile amateur records.

Jensen with his team mates, Nelson Johnson, John J. Marquart, and Ray Caldwell, also accounted for the mile team championship race, covering the distance in 24 minutes and 12 seconds. This victory was made in spite of the fact that considerable time was lost on one of the turns owing to a recklessly driven automobile, which ran into them, but luckily did not cause any great damage to either the riders or their wheels.

The course this year was over the Eastern Boulevard in the Bronx Borough, New York, on which several hard hills had to be mastered. The northern turn was at the foot of a hill, so that the times made were considered excellent—in fact, in each instance they bettered the times made last year over the famous Southfield Boulevard in the Richmond Borough, New York. The runner-up in the individual championships was Eugene Aickelin, of the New England Wheelmen, of New York, who finished in second place in both the one and three mile races, and in third position in both the five and ten mile events.

The runner-up in the team race was the team of the Unione Sportiva Italiana, composed of James Papesca, Tony Pace, J. Alfonzo, and Charles Rabbino. Jensen, Marquart and Caldwell rode Iver-Johnsons.

The summaries:

*One mile (unpaced):*

# KRAMER FAILS AT PACE FOLLOWING

### McNamara Beats the Veteran Champion By One Lap and a Half—Goullet Retains Brassard Title By Defeating Jackie Clark.

NEWARK, N. J., October 18.—Frank L. Kramer, for fifteen years the sprint cycling champion, proved to be a failure at following pace. He stacked up against Reggie McNamara, of Australia, in a five mile tandem paced race here on Sunday afternoon and was beaten decisively, McNamara winning the race by a lap and one-half. Kramer was all right for two miles, but as soon as the pace started to get red hot he was all in, losing his pace.

Alfred Goullet continues to ride in splendid form and defended his Brassard title by defeating Jackie Clark in a one mile match race. It was on last Sunday that Goullet won the Brassard title from Clark, but he got it on a technicality, Clark being disqualified for giving Goullet a high ride. There was no fluke about Sunday's race, and "Goullie" won in a clean cut manner, leading Clark over the finish line by about a length.

In the tandem paced race, Kramer rode behind McNamara for two miles. Alf Grenda and Freddy Hill them came out on the track and started to rip things up with McNamara behind them. They went so fast for two laps that Kramer was shaken off and soon was trailing. At three miles, the champion was a half lap behind. He avoided being lapped until four miles and four laps were covered, when McNamara, riding behind Grenda and Hill, went by him. They continued a stiff pace to the finish, and at the end of the race Kramer found himself one lap and a half behind.

In the Brassard race, Clark was leading

**Winners of Team Race in the Inter Club Contest. Left, C. R. C. A. Team; Right, Unione Sportiva Italiana Riders**

Digitized by Google

two laps from home. On the first turn of the fifth lap, Goullet went to the front; he showed the way, going into the last lap. Clark trailed him to the back stretch, and at this point started to give the blond Australian a battle. They raced almost even to the last turn when Goullet worked his way in front and beat Clark down the home stretch.

Francisco Verri was credited with a victory in the one mile open for the professionals, after Alfred Grenda had been disqualified for switching. Verri was coming hard around the last turn and the fans were watching for him to go by Grenda, but the crafty Australian switched and Verri was forced up the track, while Goullet, who was riding behind him, suffered the same fate. Frank Corry, Bob Spears and Harry Kaiser finished fourth, fifth and sixth respectively, but these places were moved up one on account of the disqualification of Grenda.

Hans Ohrt, of the Olympic Club of San Francisco, won two races, which is nothing out of the ordinary for this youth from California. He led the way home in a three mile race and also crossed the line first in the half mile handicap for the amateurs. Freddy Taylor, the Newark boy, pressed Ohrt in both races, finishing second each time. The novice race was taken by Anthony Lapero. The summaries:

One-third-mile novice (amateur)—Won by Anthony Lapero, Newark; Charles Schapiro, Newark, second. Time, 45s. Roy Nestor finished first, but was disqualified for foul riding.

One-mile open (professional)—Won by Francesco Verri, Italy; Alfred, Goullet, Australia, second; Frank Corry, Australia, third; Robert E. Spears, Australia, fourth; Harry Kaiser, New York, fifth. Time, 2m. 40s. Last eighth mile, 12s. Alfred Grenda finished first, but was disqualified for switching.

Half-mile handicap (amateur)—Won by Hans Ohrt, San Francisco (scratch); Fred Taylor, Newark (scratch) second; Walter White, Newark (40 yards), third; Chester Smith, Baldwin, L. I. (30 yards), fourth. Time, 55⅘s.

Half-mile handicap (professional)—Won by Marcel Dupuy, France (25 yards); William Hanley, San Francisco (25 yards), second; Harry Kaiser, New York (20 yards), third; Edward Rupprecht, Newark (65 yards), fourth; Alfred Goullet, Australia (scratch), fifth. Time, 53s.

Three-mile open (amateur)—Won by Hans Ohrt, San Francisco; Fred Taylor, Newark, second; Chester Smith, Baldwin, L. I., third; Eddie Kane, Newark, fourth. Time, 6m. 56⅕s.

The Brassard race at one mile (professional)—Alfred Goullet, Australia, vs. Jackie Clark, Newark. Won by Goullet. Time, 3m. 2⅖s. Last eighth mile, 12s.

Five-mile tandem-paced match race (professional)—Reginald McNamara, Australia, vs. Frank L. Kramer, East Orange. Won by McNamara. Time, 8m. 56⅗s.

## LAWSON'S CYCLE AT ATHERTON BRAKE EXHIBIT

AT the stand given over to Atherton Coaster Brakes, the most noticeable feature was the cycle ridden by Bob Lawson across the continent and for intermediate distances, making a total of 18,854 miles in all. This bicycle was fitted with an Atherton brake, and Lawson himself was on hand to show its good points. Sectioned coasters were on display, one very interesting model being that adapted for use on lightweight motorcycles.

The Atherton coaster brake has been on the market since 1892 and is quite close to its original design at the present time, the thoroughness of the first model doing away with the need of radical changes in subsequent constructions.

## SMITH COLLEGE GIRLS ARE ARDENT ROAD RIDERS

That bicycling for ladies and girls is on the increase once more is known pretty much all over the country, but photographic evidence of the girl riders in a group seems very difficult to get. However, Thomas Purseglove, a dealer in Northampton, Mass., has taken the picture herewith which shows a number of students of Smith College about to start off for an afternoon spin. The scene is laid alongside Purseglove's establishment, about one mile from the big girls' college.

"I persuaded one of the Smith College girls to ride a bicycle some two years ago, and the example she set led others to take up wheeling," said Purseglove in a recent interview. "Now, I have to keep 20 machines ready for the girls, and at least twelve to fourteen are in use every Saturday afternoon that the weather is good. It isn't only the girls themselves, but the teachers, too, who use the wheel as a means of health-giving recreation.

"Either I or one of my men teach anyone to ride, and of course we sell quite a number of ladies' mounts as a result. Most of the wheels are rented to the girls. Some of the girls who own their own bicycles bring the same ones year after year, and some bring the wheels their mothers used to ride.

"I think that if every dealer went after the girls on the bicycle question there will be more of the fair sex riding," continued the dealer, "and this would popularize the bicycle with both sexes more than one would think. There are big possibilities in this direction."

**Smith College Girls Taking Their Machines at Purseglove's Agency**

## KAISER PARDONS DOERFLINGER

Berne, Switzerland, October 15.—C. A. Doerflinger, the Swiss professional cyclist, who was condemned by German court martial to die as a spy, has been pardoned by Kaiser Wilhelm, following the intervention of the Swiss government with a request for clemency.

Doerflinger was accused of furnishing military information to foreign agents, and it is said that he bribed the wives of German soldiers to reveal secrets of great importance. Another account has it that Doerflinger, through an acquaintance with a German aviator who had conducted a factory at Freiburg at which military aeroplanes were manufactured, was able to take a trip in a war plane and thus obtained some valuable information.

## PIANTEDOSI FUND GROWS

The New York Division of the Century Road Club Association acknowledges the receipt, up to October 18, of twenty-four dollars and seventy-five cents for the Piantedosi Fund, while the Century Road Club of America has accumulated eighteen dollars. This fund is being raised by the friends of Amelio Piantedosi, who was recently killed at Greenwich, Conn., by a speeding automobile while participating in the tri-state run of the C. R. C. of A. The contributions will be given to Piantedosi's widow. Riders of the C. R. C. of A. will act as witnesses in the suit that will be brought against the reckless automobilists. Further contributions can be sent either to the S. Segal, of C. R. C. of A., at 1842 Seventh avenue, New York, or to the E. E. Fraysee, of the C. R. C. of A., at 724 Syms street, West Hoboken, N. J.

## C. R. C. A. THEATRE PARTY

West Hoboken, N. J., October 18.—The New Jersey Division of the Century Road Club of America will give a theater party to its members on Monday, October 25. The past season has been a very prosperous one for the New Jerseyites, and the club officers have decided upon a theater party as the best way of lowering the fat surplus in the treasury. All members are being requested to notify E. E. Fraysee, of 724 Syms street, of their intention to attend the party.

## HIGH SCHOOL BOYS' CLUB

Reading, Pa., October 15.—Students of the Boys High School, to the number of 53, formed a bicycle club, with the following officers: Prof. R. N. Kocher, of the faculty, guide; captain, Wilbur Heck; first lieutenant, Emerson Rasbridge; second lieutenant, Paul Stetson. Trips to rural towns will be made every Wednesday afternoon and Saturday.

# AWHEEL FROM VANCOUVER, B. C., TO SAN FRANCISCO

## Story of a Rambling Bicycle Trip That Was Taken by Two Canadian Cyclists to the Exposition City

By A. FRASER REID

Charles Stride and Robert Barr, Vancouver Cyclists, Starting on Their Trip

VANCOUVER, British Columbia, October 18.—Writing from Chico, Cal., Charles E. Stride, of Burnaby, gives a most interesting running account of his trip from Vancouver to San Francisco, by the cycle route. Along with Robert J. Barr, a companion, the writer left on the morning of August 25 on the long trip of 1,200 odd miles. They were but scantily outfitted for the long arduous trip, both wearing long pants and one of the duo sporting a boater straw as a lid. The machines were ordinary wheels of an inexpensive type. The photo accompanying was taken in front of the City Hall at New Westminster, a suburb of Vancouver, and gives a particularly fine idea of the equipment carried by the boys. Stride's machine, as shown in the picture, weighs 39 pounds, the carrier in front, with the contents, weighs 25 pounds, and the rear one 36 pounds—in all a total of 100 pounds, quite a heavy weight to push uphill and an ample test of the machines handled by Fred Deeley, the B. S. A. agent for British Columbia. I give the experiences of the two intrepid wheelmen in the following paragraphs in the words of Charlie Stride as far as possible:

### Through Washington and Oregon

The trip through the states of Washington and Oregon was a most enjoyable and interesting one; many digressions were made en route, visiting interesting places off the main trunk roads. So far my only trouble has been a few broken spokes; the continual jumping of the front carrier, due to the rough nature of the roads, has fractured the front mudguard, which has had to be spliced. The first day out, as we were riding easily and slowly through the dust, I tripped a piece of wood, which retaliated by ripping out six spokes and bending the front guard. As the rims were extra strong, I managed to ride slowly the three miles to Lynden, where I replaced the spokes and riveted up the guard before proceeding to Bellingham.

Two days were devoted to sight-seeing in Seattle, the Sound city; one and a half days sufficed for the delights of Olympia; while Portland, the Rose City, claimed a couple of days, and Salem one and a half. On the night of August 30 we stayed in Tacoma for a short while, finally coming to anchor in South Tacoma about 8 o'clock. As it was by this time fairly dark, we were reluctant to go to the bother of pitching the light silk tent, carried for evening shelter, as this was an absolutely pioneering trip. About two blocks behind the main street we located an empty foundry warehouse with the sliding doors securely locked, but the windows completely shattered. Inside we crawled, lifting our machines gingerly through the vacant window frames with their jagged glass margins. Here we snuggled up to rest for the night, but not in peace—oh, no! Along about 4:30, as the watery rays of dawn began to glimmer in the east, something more vivid than these same rays penetrated the gloom of the warehouse and flashed in our sleep-encrusted eyes.

### Along Comes the Constable

Rubbing the sleep from our heavy eyelids, all that we could perceive at first glance was a piercing beam of light, behind which shone brilliantly a sparkling silver star. As our eyes became gradually accustomed to the blinding flashlight, a big, bulky body in blue became visible and a raucous voice threw out the interrogation: "Well, boys, is this a place for respectable citizens to pass the night?" Explanations were made, the plea put forward that it was too late to erect our tent, the legend on the carriers spoke eloquently as to our bonafides, and in answer to our query, "Is it all right?" the gruff voice answered, not unkindly, "I guess so," and the big powerful frame of the constable vanished from sight and we were once more left in peace to resume our disturbed rest.

Early on September 1, we essayed the run from Olympia to ten miles north of Toledo, Wash., a distance of only 40 miles, amid a pouring rain, this run taking up practically the whole day. In the early part of the morning a ride of 15 miles to Tenino preceded breakfast, a call being made at a lineman's camp en route, where hot water was requisitioned in order that a light visitation of soft downy fluff might be erased from the cheeks of the riders.

### A Real Muddy Test

At three o'clock, a quarter mile of pavement, immersed in three inches of clay of a rabidly glutinous composition, had to be negotiated. This so badly clogged the wheels of our bicycles that they locked absolutely tight, with the natural result that they had to be carried to a stream in the neighborhood of the mud hole. Here both

**Palmer Keith and Jasper Bryant, Bessemer, Ala., Who Have Just Completed One of the Longest Motor Wheel Trips on Record**

Digitized by Google

of us and the machines were formally baptized in the cool waters, and, counting the time necessary for the washing of the bicycles, and the complete elimination of the mud, the crossing of this awful quarter of a mile had consumed one and a quarter hours of good valuable time. After riding ten miles or so on our now spotless bicycles, another stretch of some two miles of newly torn-up clay roadway was encountered. Profiting by experience, we lifted our mounts into a field, which helped considerably. The field was tough going, but even at that it was infinitely preferable to the mud, and we managed to reach the end of the bad stretch by 7 p. m. It was once more raining hard and almost dark, and a kindly farmer came to the rescue by proffering the use of an antiquated barn for the night, into which we crawled to bed—supperless! Next morning Toledo—and a much-needed breakfast—was reached after a short spin over a rough country road.

**Caught in Thunderstorm**

On the evening of September 10, we became involved in a thunderstorm, about six miles north of Oakland, Ore. We took hasty shelter in a farmhouse for awhile, but started again as soon as the rainfall had ceased. But not for long did we ride, however. The viscid clay clogged our wheels so badly that we had perforce to give in and to spend the night in a handy empty shack—supperless and dry (the latter only as far as the inside was concerned).

Six miles north of Burlington, I struck a sharp stone, causing a blowout and consequent gash on the rear tire. I patched the tube and wrapped the casing with electric tape and had no trouble in making Seattle a day and a half later. Those Stadium tires have carried me 1,125 miles; the front one is still in apparent good shape and is stored in Seattle for future use. Had it not been for the Burnaby oiled roads, over which I travel when at home, they would have lasted much longer and traveled many more miles.

**"Bread and Cheese, and———"**

On Sunday morning, September 12, we breakfasted sumptuously on a couple of loaves of bread and a pound of cheese. To use an Irishism, our only meat was a crawfish, which we espied crawling along the bed of a stream. The crawfish raised such a kick at being thus summarily removed from the confines of his Sunday morning tub, that we returned the poor sucker to his native element and feasted on the memory of what might have been.

That night again we were stranded, many miles from nowhere, and came to rest upon the slopes of a mountain. A profusion of pine needles carpeted the mountainside, and these we used as a mattress—not in all respects an admirable one, as experience proved. Of course, we tired wanderers slept with our heads pointing towards the crest of the mountain, and more than once during the cool night hours we awoke to find ourselves slipping down the slope underneath our coverings, showing a rather indecent display of calf and only pulling up when our bare understandings braced against the log to which our light tent was anchored.

**NEW JERSEY TITLE HOLDER**

C. Hanson, Champion of Hudson Co. Wheelmen, of Jersey City

**The Portals of the Golden State**

We entered the Golden State on the morning of September 15. The hill up the north side of the Siskiyou Range proper is seven and a half miles, with a six per cent. grade; so, with our loaded machines, we had to foot the entire length of the ascent. Several hills of from two to five miles afforded us splendid coasting, and on two or three occasions we went down some rather lengthy and precipitous slopes having a twenty-eight per cent. grade. Our coasters held all right, but they sure did get hot on some of these inclines. We had a sublime view of lordly Mount Shasta as we traveled along the base of this magnificent landmark. My pal, Barr, says when he has seen the 'Frisco Fair he is coming north again to settle in the Sacramento Valley—but not for me! Now that I have come thus far, I wish to see the rest of California, and will most probably go clear through to Mexico.

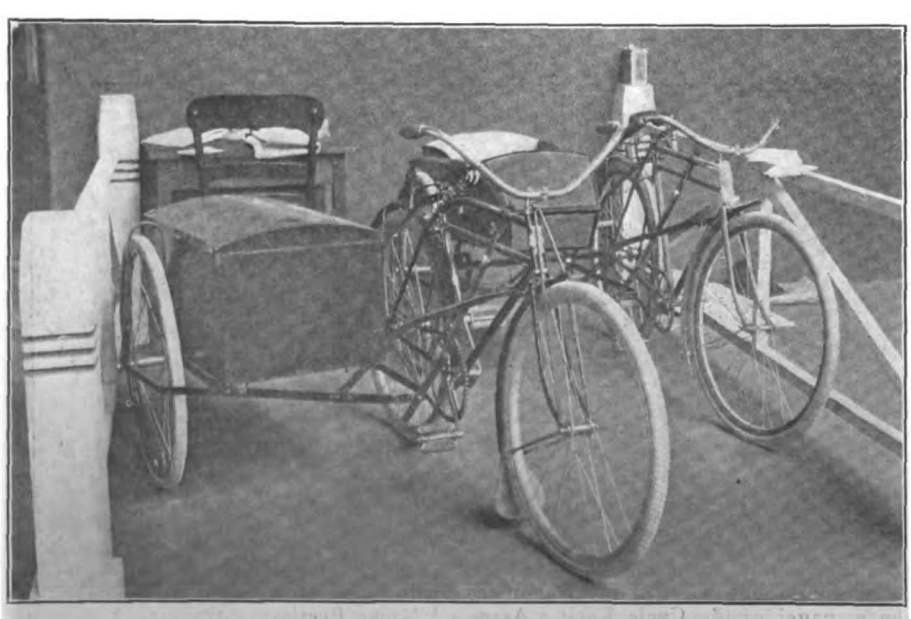
**Nearing San Francisco**

We are now within 200 miles of the Exposition city, and about 1,030 miles from home. We have only been actually 18 days on the road, and if we went straight ahead we could do the balance of the trip in three days, making it a 21 days' trip in actual running time from British Columbia to San Francisco.

The best day's travel was 68 miles, and the lowest 32 miles. September 17 proved the toughest day on the calendar, when the 15-mile ride to Delta and breakfast occupied three whole hours and ten minutes. Starting about 10 again, we did not hit another town where we could get anything to eat until 7 in the evening, when we arrived at Kennet, absolutely dead beat, with a total of only 40 miles for the day. It seemed a continual repetition of pushing the bicycles up the north sides of the dozen and one mountains which skirt the canyon of the Sacramento River, and then in turn coasting down the other sides through a wealth of truly magnificent scenery.

**Among the Prune Orchards**

We are now staying in the prune orchards of Sacramento, awaiting the return of some friends who have gone to a visit to the Exposition. While working in these orchards, cedar poisoning commenced to bother me—a return of the trouble which got into my system last fall, when I was incapacitated with it for nearly a month. Then it was centered in my right hand, but this present attack is located in my left knee and has kept me a prisoner indoors for six whole long days. I am getting medical attention, and expect that we will be able to resume the trip in a few days at the most.



The Booth of Houghton Bi-Cars at the New York Cycle Show

## HOUGHTON BI-CARS FOR PLEASURE AND BUSINESS

TWO of the Houghton Bi-Cars were on display at the stand of Houghton, one of these being a passenger model and the other a delivery van. The Bi-Cars were shown attached to bicycles, the frame in each case being of flat steel stock, and giving means of adjustment to any bicycle on the market.

### DESIMONE WITH U. S. I.

Anthony Desimone, the Inter-Club League home trainer champion for 1915 and crack track and road rider, will hereafter wear the white and green colors of the Unione Sportiva Italiana, of New York, having been granted his release from the Century Road Club Association. Among the cyclists now members of the U. S. I. are "Jimmy" Papesca, the Rabbino brothers, Tony Pace, T. LaRossa, J. Alfonso, L. Bizzoni, C. Zoccola, A. Terrero, A. Ramezzano and S. Maccanio.

While an old club in general athletics, the Unione Sportiva Italiana entered the cycling field about six months ago and is steadily adding to the bicycle members. George Bieregel, who is one of the most active leaders in the bicycle sport about New York, is the U. S. I.'s manager in athletics and takes an especial interest in cycling. The Italian club has a splendidly equipped house at 410 Eighth avenue, with home trainers, shower baths, rubbing tables and lockers for each member.

### N. J. CYCLIST REACHES PEORIA

Peoria, Ill., October 15.—Percy V. Hendricks, of Bound Brook, New Jersey, enroute across the United States to the Panama-Pacific exposition on a bicycle, came into Peoria yesterday afternoon. He is a young lad twenty-one years of age, and left home on June 17. He expects to reach the Pacific coast before the close of the fairs.

Enroute young Henricks has been working at various cities making sufficient money to carry him through on his trip. Before reaching Peoria, he stopped at Eureka, Ill., where he was employed for three weeks in a canning factory. He has been riding twenty-six days, covering over 1,063 miles. He averages from twenty to sixty miles a day, according to the weather and road conditions. The young rider has completed about one-third of his trip. His complete outfit of camping utensils and bicycle weighs 105 pounds.

### WINQUIST CAPTURES MEDAL FOR GREATEST SEPT. MILEAGE

William M. Winquist, of Brooklyn, N. Y., has won the medal offered by Centurion Jacobson, of the New York Division of the Century Road Club Association, to the member riding the greatest number of miles during the month of September. In striving to win this medal, Winquist has boosted himself from third position to the second place in the Annual Century and Mileage Competition of the Century Road Club Association.

The positions of the contestants in the competition to the end of September are indicated in the following list:

1—Fred M. Sanborn, Baltimore, Md.
2—William M. Winquist, Brooklyn, N. Y.
3—Sylvain Segal, New York, N. Y.
4—George Steppello, Long Island City, N. Y.
5—Duane W. Moore, Bayonne, N. J.
6—Andrew N. Segal, New York, N. Y.
7—Joseph Caldwell, Brooklyn, N. Y.
8—Adolph Weiner, New York, N. Y.
9—Charles Hansen, Jersey City, N. J.
10—Carl O. Bonhardt, New York, N. Y.
11—Howard V. Carroll, New York, N. Y.
12—Ray Caldwell, Brooklyn, N. Y.
13—Harry A. Whiteman, New York, N. Y.
14—George H. Segal, New York, N. Y.
15—Lawrence Smith, New York, N. Y.
16—Louis Zemo, Elberon, N. J.
17—William Feil, New York, N. Y.
18—Robert Wolfson, New York, N. Y.
19—Ralph W. Zarr, New York, N. Y.
20—George Harvey, Brooklyn, N. Y.
21—Alfred Knipling, New York, N. Y.
22—John M. Mitchell, Greenwich, Conn.
23—William F. Thompson, New York, N. Y.
24—Alexander Thomson, New York, N. Y.

### A BELGIAN CHAMPION

**A Van Der Palt, Premier Rider of Chicago Belgian Cycling Club**

### EIGHT PROFESSIONALS RIDING TO CHICAGO FOR SIX-DAY RACE

Newark, N. J., October 19.—Amid the tooting of fire whistles and clanging of fire bells, eight sturdy professional riders on their bicycles started out from in front of the local Velodrome here on Monday morning for Chicago, where they will compete in the Chicago six-day race which will start on November 19. The riders in the party were Iver Lawson, of Salt Lake City; Worthington Mitten, of Davenport, Ia.; Percy Lawrence, Ernest Ohrt and Lloyd Thomas, of San Francisco; Charley Miller, of Atlanta, Ga.; Norman Hansen and Martin "Grassy" Ryan, of Newark. Hansen is a Dane, but he makes his home in this city.

Alfred Goullet, Alfred Grenda, Tommy Grimm and Ray Eaton accompanied the riders as far as Paterson on their wheels, while Frank Mihlon, the president of the Cycle Racing Association, along with Frank L. Kramer, Peter Drobach and Eddie Root rode as far as the Silk City in Kramer's automobile. In another automobile was Johnny Chapman, the manager of the Cycle Racing Association; Jimmy Hunter, the motorcycle rider, and a number of other riders. They went as far as Suffern, N. Y., with the bike riders.

The automobile in which Kramer and his party was riding set an awful pace and every one was shaken off with the exception of Grenda. He stuck behind the automobile when it was making forty-five miles an hour, but when it went forty-six miles an hour he was left by the wayside also.

The riders expect to travel at a moderate gait and expect to reach Chicago in eleven or twelve days.

### WRIGHT BREAKS CRESCENT MILEAGE AND CENTURY RECORD

Baltimore, Md., October 16.—Every previous monthly mileage and century record of the Crescent Bicycle Club has been broken by Wm. T. Wright, who as the leading competitor in the annual century mileage contest of the club reported in September the greatest number of miles, the greatest number of centuries and the greatest number of total points ever accumulated by any member of the club in the nine years of the club's existence. Wright pedaling in this month the phenomenal total of 2,601 miles and 14 centuries for a total of 4,001 points, one point being given for each mile and one hundred points additional for each century ridden.

In making his record Wright broke the best previous record for the number of miles ridden in a month by 407 miles, Fred Welsh holding the old record of 2,194 miles, made in December of 1907, and bettered by two centuries the best previous mark of 12, made by Fred. M. Sanborn, in December, 1913, surpassing his own record, hung up in December of last year, for the greatest total number of points by 928 points. One of the most remarkable features of Wright's accomplishment in establishing the new mark is the fact that he did not lose a single day from work, being on the job every day in the month but September 13, which is a state holiday in Maryland.

Wright, who is 39 years old, has been riding a bicycle for 29 years and has been a member of the Crescents for three years, joining the club in 1913, in which year he finished eleventh in the century mileage competition. He improved his standing the next year, however, finishing third, and has been in the lead in this year's contest since early in the spring, and will no doubt remain in that position if he continues to travel at his present rate of speed. Wright's mount is an Emblem bicycle, equipped with Palmer Armstrong tires and geared to 84 inches.

### 16,574 MILES IN SIX MONTHS

Dallas, Texas, October 18.—Sixteen thousand five hundred and seventy-four miles on a Pierce bicycle without any repairs is the sworn record of John T. Dickson, a messenger boy of this city, for his riding during six months beginning March 31, 1915. His minimum mileage during this period was 84½ miles per day and the maximum was 121. The wheel was bought from the Cortines Supply Company, and is equipped with an Atherton coaster brake and Kokomo Everlasting tires. Dickson is still using his bicycle in the messenger service.

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## AMERICAN SALES INCREASING

During the year 1914, imports of bicycles and parts into British South Africa totaled $760,411, of which Great Britain imported $709,093 and the United States only $7,290. Motorcycles and parts were imported to the valuation of $797,439, $698,635 coming from Great Britain and $63,532 from the United States.

American Consul Edwin Gunsaulus, at Johannesburg, South Africa, reports that "up to this year practically all the motorcycles sold in the Union of South Africa were of British manufacture, and although the dominating influence of Great Britain as an exporter of motorcycles to South Africa still prevails, it is to a lesser extent than before." This is apparent from the fact that although exports of motorcycles from the United States into South Africa were valued at $32,430 in 1913, they reached a valuation of $63,532, or practically doubled, last year.

## THE SPANISH MARKET

Wilbur T. Gracey, American Consul at Seville, Spain, advises that there seems to be a good market there for the sale of American-made bicycles. Up to the present most of the bicycles sold in that Consular district have been imported from France and England. The demand for motorcycles is not very large, on account of the high cost of gasoline, which retails for about 65 cents a gallon.

## PORTUGAL NEEDS U. S. CYCLES

There is an excellent opportunity for the sale of American-made cycles, parts and accessories in Portugal, according to Consul-General W. L. Lowrie. He states that those of our manufacturers who have agencies in Portugal are doing well. In a recent competition to supply the government with 29 motorcycles and 5 sidecars, the Indian was selected and the order was placed with the Hendee Manufacturing Company.

During 1913, there were imported into Portugal 392 motorcycles, valued at $68,878, from the following countries: Germany 127, Belgium 105, Spain 4, United States 35, Brazil 2, France 99, Holland 3, England 10, Sweden 7.

No statistics are available as yet as to imports of 1914. But it may be noted that several of the countries which have heretofore supplied a considerable number of motorcycles to Portugal are not now in a position to do so. American machines are in high favor, because of their extra power, excellent workmanship and fine appearance. According to the Consul-General the obstacles in the way of increased sales of American-made machines are high freight rates, a low exchange, and the difficulty of shipping with tires on account of the agreement now existing between American tire manufacturers and the English Government.

Owing to special provision in the Portuguese tariff law and foreign agreements, the duty is higher on machines imported via England than by direct steamer from New York or any other American port.

"However," concludes the Consul-General, "all these difficulties are being overcome and sales of American motorcycles are increasing."

## IN NEW SOUTH WALES

There are few better fields for the importation of American-made motorcycles and bicycles, than New South Wales, particularly at the present time. Until now Great Britain has sold more than nine-tenths of the motorcycles imported into that country. During the first six months of 1914, the value of imports of motorcycles by British manufacturers was $136,822, as against $7,353 for Belgian machines and $1,893 for American-made motor driven two-wheelers. As a result of the war, however, British imports into New South Wales show a material loss, that is, from $136,822 to $92,035. Belgian imports are practically nil, being only $68, representing a few parts. On the other hand, there is a material increase in the imports of the United States, viz.: from $1,893 in 1914, to $6,691 for the first six months of 1915.

There is probably no other country in the world in which the number of motorcycles so closely approximates that of automobiles, the registration figures for June, 1915, showing that there are in use 6,461 motorcycles as against 10,507 automobiles. There are 8,463 motorcycle riders licensed, as against 17,432 automobile drivers.

## INQUIRY FROM LONDON

From the Albert Harman Company, of 26 Hamilton Road, Highbury, London, England, comes an inquiry for bicycle bells, lamp and other accessories of American manufacture. In addition to this, the firm desires tools suitable for the bicycle and motorcycle trade, this line to include wrenches, pliers and other small tools. The company wishes to obtain control for these products for the European market on an agency basis.

## GAIN OF MORE THAN $100,000,000

The total exports from the Port of New York for the month of August approximated $141,971,554, a gain of $109,130,311. England was the largest purchaser, the exports to that country from the Port of New York alone exceeding $50,000,000 in value, as against about $12,000,000 in August last year. France was second, with more than $25,000,000; Russia third, with more than $10,000,000; Italy fourth, with nearly $10,000,000, and the Netherlands fifth, with nearly $4,000,000. Exports to North and South America, Asia, Africa and Oceania all show substantial increases for the corresponding period a year ago.

## IMPROVING CANADIAN ROADS

The building of good roads in Canada, while stopped to some extent by the lack of funds, continues in many sections of the country. During the fiscal year ending 1914, Quebec Province expended $3,303,882 on the good-roads movement, ample provision being made out of revenue for meeting sufficient annual interest and sinking fund charges to repay in a term of years the whole amount borrowed for this service. A fairly large amount was spent last year also. This betterment of country roads is adding largely to the value of farm lands, and to the comfort, contentment and prosperity of the farmers, and the popularizing of agricultural pursuits.

Saskatchewan is another Province making excellent progress with the building of good roads. Ontario for some years has made a policy of better roads of primary consideration. It is building roads to assist settlers in Northern Ontario and also in the more settled communities. Now being constructed is a concrete highway from Toronto to Hamilton, a distance of about 40 miles.

## BRIEF FACTS ABOUT NEW ZEALAND

Consul General Alfred A. Winslow, of Auckland, New Zealand, has prepared a circular letter which covers some of the "pertinent facts American exporters should know about New Zealand trade." This may be had from him on application. Mr. Winslow comments: "If American interests will come after this business in earnest, they can have 25 or 30 per cent of it instead of 9 per cent. The tide has turned, but it needs pushing along."

## BALANCES ON THE RIGHT SIDE

During the week ending September 4, 1915, imports reported from thirteen principal customs districts of the United States totaled $32,454,477. The exports were $60,071,198 during the week in question, showing a favorable balance of $27,616,721. For ten weeks ending September 4, imports have totalled approximately $300,000,000, and exports, more than $480,000,000, there being a favorable balance of approximately $180,000,000 for a little less than three three months ending September 4.

### SALES FOLLOW FAIR DISPLAY

Louisville, Ky., September 30.—The Dow Wire and Iron Works, local agency for the Merkel as well as the Pope, Waverly and Greyhound bicycles, reports that two motorcycles and several bicycles were sold as a direct result of the display at the Kentucky State Fair, held at Louisville September 11 to 16. The Dow Wire and Iron Works is publishing a handsome catalog of supplies, bicycles and various models of the Merkel.

### GETS PUBLICITY FOR NEW MODEL

Youngstown, O.—When Garnet F. Howard, of the Mahoning Cycle Company, Harley-Davidson agent, wanted to get a little publicity for his 1916 Harley demonstrator, he had a photographer snap the new gray fellow in the "bucking act." The daily newspaper reporter when he saw the picture, which is reproduced on this page, immediately realized its news value and rushed it to the editorial office. Howard got a splendid write-up in the Youngstown Telegram and the picture was used.

The stunt was a simple one which has already been tried by many of the dealers throughout the country. The rear of the machine is loaded down with two or three people and then the throttle is opened wide, the two-wheeler being started suddenly under full power. The dead weight on the rear acts as a brake for the moment, and the front wheel rises about forty degrees. Then the rear wheel begins to revolve and the motorcycle shoots through the air and is on its way.

### LIGHTWEIGHT FOR DELIVERY WORK

Dallas, Texas.—Three models of the Miami lightweight motorcycle, with vans, have been received by the Charles Ott Company, which has secured the agency for this machine in Dallas and nine surrounding counties. Mr. Ott is confident of heavy sales of this motorcycle, as it meets the requirements of druggists and other business houses of the city for a lightweight for quick delivering at very low cost.

### WESTING VETERAN WEDS

Indianapolis, Ind.—Elmer Myerose, the oldest motorcycle man in the employ of the G. H. Westing Co., was married on October 6, to Miss Esther Bronke, a former stenographer for the firm. The bride and groom were given many handsome presents, chief among which was a silver dining room set presented by the employees of the Westing Company.

Mr. Myerose has been in the motorcycle department of the local motorcycle firm for seven years, and has worked his way up from a delivery boy until he now holds the position of manager of the Parts Department, one of the biggest branches of the business. Myerose has become so thoroughly acquainted with the various parts for the Indian and other makes that he is classed as one of the few experts in this line in the country.

Mr. and Mrs. Myerose are taking a typical motorcycle honeymoon, a la sidecar, and are visiting all their relatives in the state.

### IS HARLEY-DAVIDSON AGENT

Toronto, Canada.—Walter Andrews has taken on the Harley-Davidson for his territory, Central Ontario, having given up the Flying Merkel for 1916. He is looking forward to a good season, stating that there is practically no competition from English models now. His repair business is rushing and he has taken on several men to care for it.

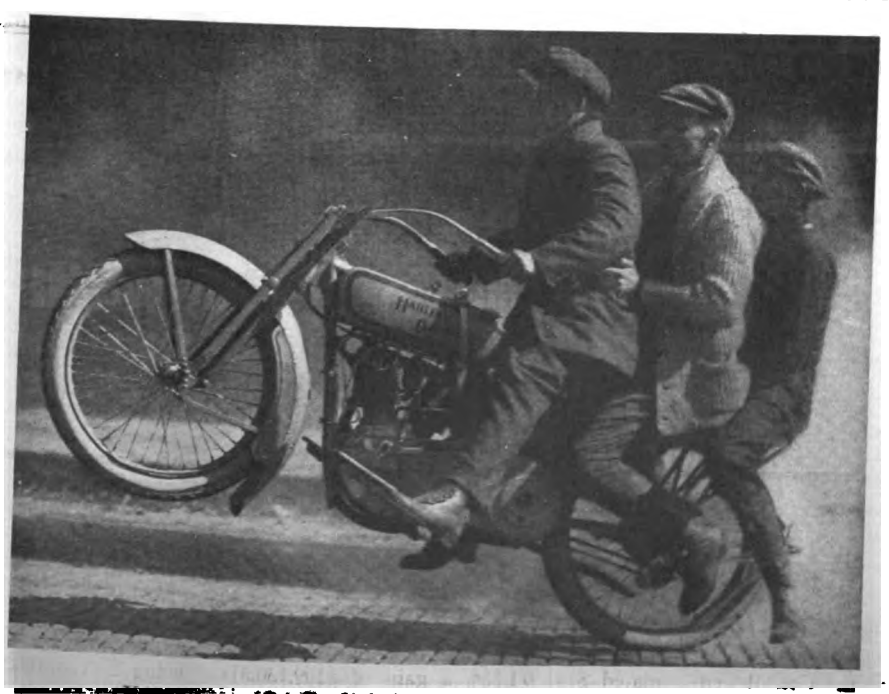
### NOW GENERAL MOTORCYCLE SALES

Boston, Mass.—The Henderson Motorcycle Sales Company, which is New England distributor for the Henderson product, has changed its name to the General Motorcycle Sales Company, and taken on the Excelsior representation. The new firm has increased its capital stock from $15,000 to $25,000.

Ben C. Straube, treasurer and general manager, has just returned from a trip to the Excelsior factory and to the Chicago Show. He reports conditions as very favorable for a busy 1916 season.

### WILL TRAVEL TO MILWAUKEE

Paterson, N. J., October 11.—Following a successful season, E. S. Havenstrite, the local Harley-Davidson dealer, will take a sidecar trip to Milwaukee, Wis., to visit the home of the gray fellow. Havenstrite will be gone for two weeks and will take with him Mr. Louis Weible, of the Haledon M. C. The route of the trip will follow the Lincoln Highway.



Youngstown (O.) Dealer's Novel Publicity Stunt; Item at Left

### SELLS 1916 DEMONSTRATOR

Washington, D. C., October 11.—A. Zimmerman, Washington agent for the Harley-Davidson, received a 1916 model twin last week, and placed it on display in his window, flanked by a big sign reading: "The new Harley - Davidson is here." This machine was the first of the new crop to get here.

The new machine looked so good to one rider that he induced "Zimmy" to part with his demonstrator. Then "Zimmy" exhibited $265 in bills in his window, and told what happened.

# DEALERS' SECTION

## PATTERSON TO HANDLE BIG LINE OF CYCLES

BROOKLYN, N. Y.—A. H. Patterson, the veteran cycle distributor of this city, who has recently entered the wholesale field as a manufacturer and jobber of Buckhead specialties, has secured the distribution rights for Brooklyn and Long Island for the Reading-Standard and Cleveland lightweight motorcycles, as well as the Smith Motor Wheel. He is also Brooklyn agent for the Excelsior. In the bicycle line, Mr. Patterson has also been appointed distributor for the same territory for the Houghton Bi-Car and the Crown line of two-wheelers. The Buckhead line includes bicycles and specialties manufactured especially for him.

Patterson has already started his salesman out on the road and particular attention is being paid to the Long Island territory. A feature of the Patterson establishment is to fill all roadmen's orders in quick time by motorcycle and sidecar from the Brooklyn headquarters. With the Reading-Standard van, Houghton Bi-Car and other similar delivery outfits, plans are under way for an active campaign among Brooklyn merchants on delivery service. A special booklet, entitled "Let Us Solve Your Delivery Problems," is a part of this campaign.

On the closing night of the New York show, Patterson purchased practically every bicycle displayed by several manufacturers and moved a large van load at daybreak on Sunday to his Bedford avenue store. The framed white Cleveland lightweight shown at the Garden was removed to Patterson's headquarters and is on exhibition there during the present week. It is needless to say that it attracts wide attention. This exhibit will be transferred to the new Flatbush avenue branch, on the corner of Parkside, when that establishment is opened on November 1.

Patterson announces that John A. Hall, former New York State F. A. M. Commissioner, will take charge of sales and publicity for the Patterson interests, with the title of sales and advertising manager. Patterson and Hall have been personal friends for over ten years, and the new connection is most pleasing to both. Hall is very enthusiastic regarding prospects for the coming year and looks forward to a big season.

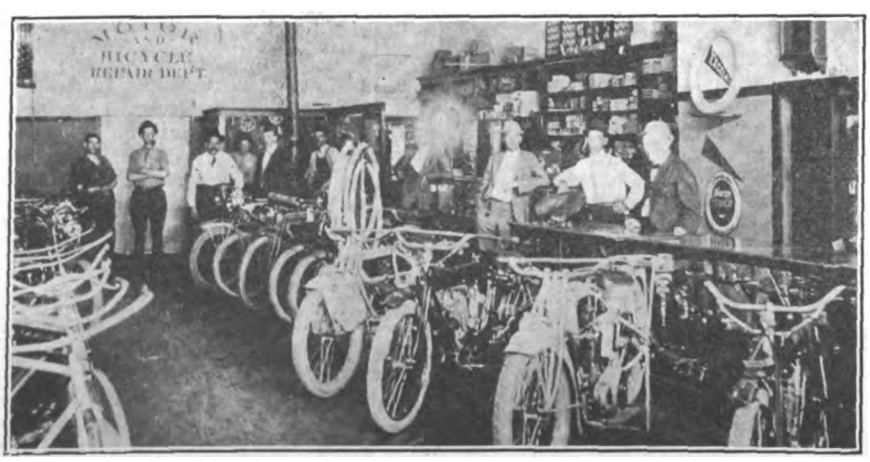
**Part of Indian Contingent, Members of Which Were Guests at Recent Picnic Given by Higginbotham & Douglas, Local Wigwam Proprietors at Phoenix, Ariz.**

### ACKERLY ON THE JOB

New Castle, Ind.—The New Castle Motorcycle Company has changed managership with the coming of A. C. Ackerly from Los Angeles, Cal. The old owners, Meyers & Burk, have gone out of the cycle game and turned over to Mr. Ackerly the entire business, including the agency for the Harley-Davidson and the Cyclone motorcycles.

Mr. Ackerly has had several years' experience in the cycle business, having operated shops in Los Ageles and Rockford, Ill. He is one of the old-time F. A. M. members and is pushing the movement strongly in this city for the forming of a motorcycle club that will be affiliated with the F. A. M.

The repair shop of the firm has been renovated and some of the latest machinery installed to further the handling of the repair business. At present New Castle boasts about seventy riders.



**Where Indians and Excelsiors Are Handled in Oklahoma City, Okla.—Headquarters of Oklahoma Arms & Cycle Company, Who Also Sell Bicycles**

### SHEBOYGANITE ON LONG TRIP

Sheboygan, Wis., October 12.—Charles H. Cone, manager of the Charles Cone Cycle Shop, has returned from a 600-mile motorcycle trip on his Indian motorcycle. Mr. Cone visited the show at Chicago and visited relatives in the Windy City and in Michigan City, Ind., Lake Geneva, Wis., and Kenosha. Cone made the trip between Sheboygan and Chicago, about 115 miles, in six hours, which is considered excellent time in view of the poor highway between Milwaukee and Chicago.

### BURLESON ORDER GOOD NEWS

Louisville, Ky., October 12.—Motorcycle dealers of Louisville were considerably interested in the recent announcement of Postmaster General Burleson to the effect that motorcycles equipped with sidecars may be used in handling rural delivery. Several rural carriers in the vicinity of Louisville have been using motorcycles and sidecars to advantage during the past two or three years in delivering mail, and the former order from Washington was a severe blow to both the carriers and dealers.

### WALKER IN NEW HOME

Boston, Mass.—W. J. Walker, local Harley-Davidson representative, is now located at 178 and 182 Columbus avenue. In addition to carrying a complete line of the Silent Gray Fellow, Walker will handle bicycles and bicycle supplies.

### ONE RIDE DID IT

That just one ride on a machine fitted with a Miller-Triplex side-seat is sufficient to close an agency is proved by a letter recently received from Abe Bernstein, of 443 South Broad street, Trenton, N. J., to the Haverford Cycle Company, of 827 Arch street, Philadelphia, Pa. Mr. Bernstein, who handles the Excelsior, got his ride on the Belmont Park track on Thanks-

giving Day, in 1914, at the invitation of Mr. Miller, the inventor of the device, and immediately afterward signed up with the Haverford firm for a number of these seats.

"This ride was the one best chance I ever took," said Mr. Bernstein in his letter, "it being in the way of finding out that this invention was the missing link in motorcycle comfort. I have sold 32 pairs of these seats since my ride, and have had each purchaser give full endorsement to the comfort and satisfaction of a ride taken on them. I never thought that it was a woman's place to ride on a machine until I got a pair of these seats, and my wife and I go for a ride almost every Sunday and we get as much pleasure out of those rides as friends of ours do in their big automobiles."

In the photograph are 21 machines sold by Mr. Bernstein, of which 19 are fitted with the Miller Triplex seat.

## LIGHT CO. TAKE FIRST 1916 INDIAN FROM HANSON

Kansas City, Mo.—L. Hanson, who is in charge of the local tepee, has delivered the first 1916 machine ordered by the Kansas City Electric Light Company some short time back. There are three others to come, according to Hanson, and the four will make over a dozen Indians used by the power and lighting firm in and around this section.

## NEW MOTOR WHEEL DEALERS

Milwaukee, Wis., October 18.—Among the new Smith Motor Wheel dealers added last week were: Brounde Motorcycle Company, Enid, Oklahoma; Arizona Sonora Motor Sales Company, Douglas, Arizona; Thom-McLeod Company, Rushmore, Minn.; W. B. Penn Co., Browerston, Ohio; Zakarevicz and Bossell, Shenandoah, Pa.; J. L. Swiggett, Highpoint, N. C.; Keystone Supply Company, Newark, N. J.; P. Larum, Los Angeles, Cal.; S. LaGrenade, Lacona, N. Y.; Ed. Lebrecht, Valatie, N. Y.; F. R. Holmes, Kendallville, Ind.

## GOLDSMITH HAS TIGER AGENCY

Louis Goldsmith, of 94 St. Nicholas avenue, New York, has taken the agency for the Tiger Autobike in addition to his Indian representation. Goldsmith is one of the best known of the metropolitan hustlers and has already started to corral the prospects on his two lines for the new season.

## EXCLUSIVE HENDERSON AGENT

Baltimore, Md., October 15.—The Excelsior Motor and Supply Company, West North avenue, has obtained the exclusive right for the distribution of the Henderson in this territory. The machine had been handled for some time by Howard A. French & Co.

## WANDSTRAT HAS NEW EX. TWIN

Cincinnati, O.—Joe Wandstrat, of the Brendamour firm, is exhibiting a brand new "16-3" Excelsior twin, and is busy demonstrating the same to admiring riders and prospects. He is booking orders for this and other models of the "Big X" for delivery in a short time.

## OVER ENDURANCE RUN COURSE

Bessemer, Ala., October 18.—F. B. Bryant, of Bryant Bros., Smith Motor Wheel dealers here, and James Reid, gave the Smith Motor Wheel probably its most gruelling test on a trip to Atlanta, Ga., and back. The route taken was the famous Birmingham-Atlanta motorcycle endurance run route, which has the worst possible roads most of the way. To add to the hard going, a heavy rain followed the motor wheelers to Atlanta and back. The distance covered was 462 miles.

## CAPITOL CYCLE CHANGES

Madison, Wis., October 19.—An announcement which has created more than ordinary interest in local motorcycle trade circles states that the Capitol Cycle Company has become the Harley-Davidson dealer for this city. The Capitol company, under the management of M. J. Morrissey and G. W. Hammar, has been handling the Excelsior here for several years and is one of the oldest dealers in this section of the state. The 1916 Harley-Davidson demonstrator has arrived and tryouts are the order of the day.

## ROTHOLZ CONTINUES R-S FOR 1916

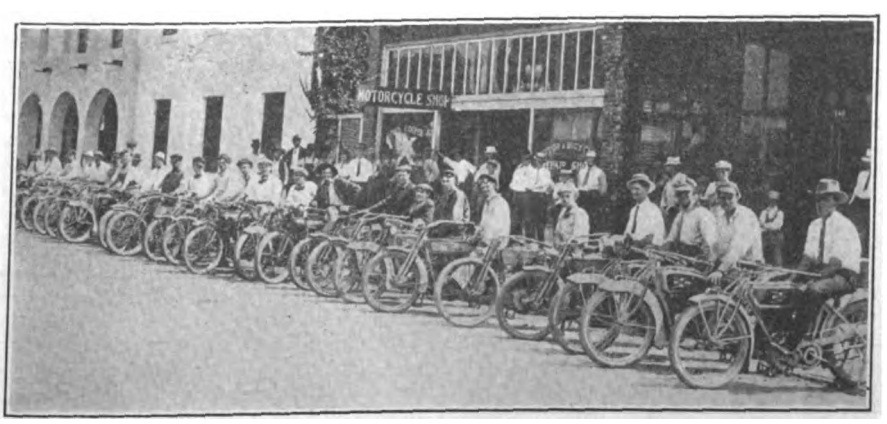
Gus Rotholz, the veteran New York agent, has again signed up for the metropolitan distribution of the Reading Standard product. Rotholz will handle the "Reliable Brown" machines from his headquarters at 1491 Fifth avenue, near 120th street, New York.

## NEW HENDERSON PLEASES RIDERS

Washington, D. C., October 15.—The first 1916 Henderson has been delivered by Osborn & Leishear, local agents. The machine has attracted a great deal of attention, much favorable comment having been heard among Henderson riders on the foot starter, new location of spark plugs, mechanical oiler and other new features.

## NEW REPAIR SHOP

Quincy, Ill., October 15.—William Childers and Ralph Stegnan, two well-known riders of this city, have opened a first class repair shop and garage at 719 Main street.



**Some of Fred Cooper's Patrons in Front of His Excelsior Agency at Ponca City, Okla.—Cooper Sold 79 Machines in All During 1915 Season**

## WHERE THE LIGHTWEIGHT COMES IN

### Newcomer in Motorcycle Field Is Designed for the Moderate Rider, and Has Its Distinctive Place

By COURIER

THAT the lightweight will be seen in large numbers during 1916 is a foregone conclusion, and nobody rejoices more in the widespread use of this class of mount than I do. To be frank, I have had the lightweight germ in my system since the days of the old Riley 2¾ single with its combination carbureter and fuel tank, accumulator ignition and belt drive. That was way back in 1905-6, and the "bug" has been with me ever since, in spite of the good qualities of the large twin and the sidecar rig. Something that I can pick up and carry across a stream on my shoulder if the need arises and yet will climb steep hills and ramble along at 30 miles per hour at a pinch, seems to me to be about right for a solo machine.

But right here comes up something with regard to the lightweight that everyone ought to read, mark, learn and inwardly digest. The lightweight is not a machine for "beating it" along the roads. As a speed proposition, it is not in the class of the 6 to 8 horsepower twins, and no rider should use one of the little fellows to burn up the roads. In the first place, no motorcycle motor will stand over-driving for any considerable time, whether the motor is a 2¼ horse single or a 9 horsepower twin, and to force a light machine to the speed normally traveled by the "highway incinerators" is to shorten its life appreciably.

#### Not Meant for High Speeds

Then there is the question of comfort to be considered. A light machine at high speed (considering its power, of course) will not afford such easy riding as a big twin, for example, at the same pace. Not having the weight to hold it close to the road it will bounce on anything but smooth surfaces, and this bouncing is not good for either the machine or its rider. The best proof of this statement of mine is for the owner to get out and "open her wide" on an average dirt road; he will quickly note the difference in the riding of the little fellow and of a bigger and more weighty mount, and will find it more comfortable to travel at a slower pace.

The manufacturers and designers have considered all these things when they got out their lightweights and did not build a machine for the rider who has the speed mania in an aggravated form. In fact, it is safe to say, they did design and build their little fellows for riders who like a moderate speed, coupled with good hill-climbing ability and ease in handling under all road conditions. And this class not only includes the moderate riders of today and yesterday, but also a new class, those who for various reasons do not desire a heavy and powerful mount.

#### A New Class of Riders

How big this class is and will become before the end of 1916 it is impossible to estimate. Certainly, it will include many people who have not ridden before, and the age limit will be that of inability to control the machine only, at both ends of the scale. We may outdo our English cousins, too, in the number of girl motorcyclists before another two seasons pass, for a light and handy mount is an ideal one for a fair motorcyclist.

Now there is another thing that ought to be pasted in the rider's cap. This is in regard to carburetion. It doesn't matter to many riders of large twins whether they are getting the best mixture possible or not. The motor will whirl them along at a fine clip, for there are oodles of power in those cylinders just the same. But if the mixture for the lightweight motor is not tip-top, she won't run anywhere near her speed, and if it is much too rich or too poor she probably won't perform at all. The same applies to keeping the cylinders clean of carbon, to keeping the transmission in first-class shape and all the bearings properly oiled. With the little motor, you can't afford to lose power if you want good speed and economy, and you have to see that everything is in top-notch order to get the best results. There is no margin for extravagance or carelessness on the little fellow.

#### Easy to Keep in Condition

Possibly all this sounds formidable, but it isn't. The carbureters fitted to lightweights are all good, for if they weren't the machines would not give satisfaction. The oiling systems, particularly on the two-strokers, are as good as anything put out on a bigger model, and the ignition is the same as regards constant and long-lived production of current. So the care needed for a lightweight is no more than that which should be given a larger machine, with the difference that there is less surface to work over and consequently less time to be consumed in any operation. In other words, it is easier to care for a lightweight than for a larger mount, and it naturally pays better in the long run.

There seems to be a rather general idea that the heavyweight is the only machine for cross-country touring. I need not say that this arises from lack of acquaintance with the lightweight. Twin machines of 2¾ horsepower and 130 pounds weight have been in use over the war-scarred roads of France and Belgium; roads which, while once the pride of Europe, are now crushed by ten-ton trucks, the enormous weights of siege guns and their wagons. Besides, they are full of shell-holes and are never repaired. Any road left alone for a year will go to pieces—so what must a series of roads not only neglected but literally beaten out of shape by loads for which they were never intended look like? Yet these lightweight motorcycles perform day in and day out in the hardest kind of service: Despatch riding and escort duty.

#### A South African Experience

South Africa is not noted for its boulevards. In fact, roads there are mostly wagon-tracks or foot-trails. I know a young mining engineer who took a four-day motorcycling trip in 1911 through The Rand. Of 355 miles, this rider on a twin 2¾, with total load of 160 pounds (machine and luggage), covered 45 miles of wagon-tracks and the rest was river fording, prairie riding and traversing buttes along foot-paths. In places he had to carry the mount down 40-foot river banks and up on the other side. Of course, he had some work to do, but he got through just the same. I hardly think that we have much worse riding conditions in this country, and if an Afrikander can get along with a lightweight with hand-controlled carbureter and 2½-inch tires, an American rider can do the same with an automatic carbureter, bigger tires and somewhat better country to traverse. The mixture is taken care of for him and there are plenty of supply places all around, so its only a case of riding.

# THE TWO-STROKE MOTOR—ITS OPERATION

## Including Some of the Individual Characteristics of This Type

By D. R. HOBART

**This is the First Article of a Series of Three Dealing with the Two-Stroke Motor**

WITH the general introduction of the lightweight to the American motorcycling public has come a type of internal combustion motor about which only a handful of riders really knows anything. This is the two-stroke motor, so-called because *two strokes*, one up and the other down, complete the full *cycle* of its operation. It differs from the better-known four-stroke motor in having twice the number of power-strokes for a given number of revolutions, in being valveless (except in one or two cases) and in having only the following moving parts per cylinder: piston, connecting-rod crankshaft and flywheel. These four in some motors can be reduced to three moving parts, as the flywheel and crankpin are practically integral.

All gasoline motors have to complete a regular cycle of operations in order to produce power. These are: admitting the charge, compressing it, exploding it, and finally getting rid of the burnt gases to let the next charge in. In the four-stroke motor, about which every rider is, or should be, familiar, the charge is admitted (1) on a down stroke of the piston, (2) it is compressed on the next upstroke, (3) it is expanded by being exploded to get power, (4) the charge is expelled on the next upstroke. An inlet and an exhaust valve are used to admit and expel the gases, each being operated at the proper time. Now, in the two-stroke motor, these four operations are performed two at a time; the piston descending on a power stroke compresses the next charge in the crankcase, and on rising again, draws a fresh charge into the crankcase and compresses the one which has entered the cylinder through a special passage ready for the next explosion. As there are only two strokes to complete the cycle, the motor is called a *two-stroke*.

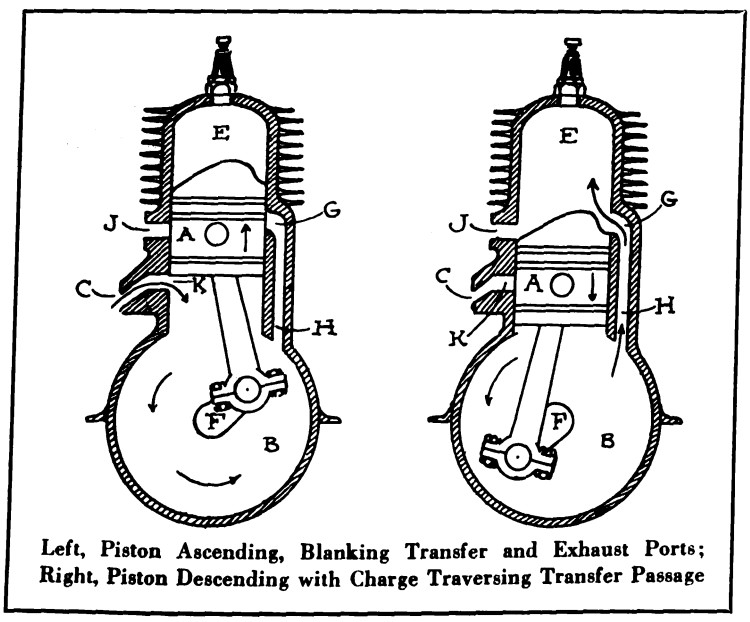
### Three-Port Type of Motor

The type of two-stroke motor used on lightweights with but few exceptions is what is known as a *three-port* type. In other words, in the cylinder itself there are formed ports, one to establish communication between the carbureter and the interior of the crankcase (admission port), a second to give the charge in the crankcase access to the cylinder (transfer port) and a third to let the burnt gases pass out of the cylinder (exhaust port). The transfer port is at the end of a passage known as the *transfer passage*, which opens near the bottom of the stroke at one end and into the crankcase at the other.

Looking at the first figure, you will see that there is a piston A moving in the cylinder E. G is the transfer port and H the transfer passage, while B is the crankcase. The inlet port communicating with the carbureter (not shown) is C-K, while F is the crankshaft. J is the exhaust port. This motor has an outside flywheel. An arrow on this piston shows that the latter is ascending.

### Action on Upward Stroke

Supposing that there is a charge in the cylinder E, piston A is compressing it in the figure. The piston is blanking ports J and G, thus closing off the crankcase to anything but the carbureter and sucking in a fresh charge under the piston. On reaching the top of the stroke, the charge in the cylinder is exploded and the piston descends until it reaches the position shown in the second figure.



**Left, Piston Ascending, Blanking Transfer and Exhaust Ports; Right, Piston Descending with Charge Traversing Transfer Passage**

At this situation of the piston and other moving parts the exhaust port J is opened, permitting the burnt gases to escape, and right afterward the transfer port G is opened. The piston in descending has compressed the charge in B and as soon as the piston uncovers port G the compressed charge rushes through the transfer passage H-G into the cylinder. The top of the piston is formed with a curved plate called a *deflector*, to prevent the new charge being set fire to by the hot exhaust gases and also to cause the new charge to rush upward toward the top of the cylinder.

### The Two-Stroke Cycle

Admission port C-K is blanked all this while, and is not uncovered until the piston reaches the position shown in the first figure. Successive strokes are a repetition of these in the same order. We can now describe the strokes of the two-stroke motor thus:

(1) Upward stroke: Charge in cylinder is compressed and new charge is drawn into crankcase. Admission takes place during this stroke.

(2) Downward stroke: Charge in cylinder explodes and descending piston compresses new charge in crankcase. Exhaust and transfer of fresh charge into cylinder take place successively near end of this stroke.

As these two strokes make up one revolution, there is one explosion per revolution in place of one *every other* revolution in the four-stroke motor. Hence ignition occurs twice as often in a two-stroke as in a four-stroke motor, and the carbureter has to make up a mixture twice as regularly.

There are several types of lightweight motorcycle two-stroke motors which are arranged with a slight modification of the above. This has a port cut in the tail of the piston opposite the inlet port, and the charge enters the crankcase through this piston port after traversing the admission passage. The action is, however, the same as before, a saving of height of the cylinder being effected by this construction. Another arrangement has the piston with a port corresponding with the two ends of the transfer passage and this prevents any gas going from the crankcase into the cylinder too soon, as the piston port acts as a valve to let in the compressed charge only at the proper time.

So much for the action of the two-stroke motor. Now as to some of its characteristics. As regards balance, it is the equivalent of a two-cylinder vertical four-stroke motor, and is smoother-running than a V-twin four-stroke. The two explosions occur at regular intervals in two revolutions the same as in the vertical two-cylinder type and not at unequal intervals as in the V-twin. There are twice as many explosions in any number of revolutions as in a four-stroke motor of the same cylinder dimensions, and in theory the power developed should be twice as great. However, there are certain details about the two-stroke motor that prevent its doing this, and only about 65 per cent. more power is actually developed than in the four-stroke.

**(To Be Continued)**

---

### TWO MORE AFFILIATE

Two recent additions to the list of F. A. M. affiliated clubs are the Stone City M. C., of Bedford, Ind., and the Washington M. M., of Washington, Pa. The secretary of the Stone City club is W. E. Smith, whose address is 610 R street.

# Plenty of Variety on this Cross-Country Tour

ARL KIENZLE and a companion recently took a trip on an Indian sidecar combination through Illinois, Wisconsin, Nebraska and Iowa, camping as they went. In the upper left-hand picture is Kienzle writing a letter home; directly below he is constructing a bridge in Nebraska. The third picture shows the driver putting in a new hub and is eloquent of the mud found on the Lincoln Highway. At the bottom is Kienzle among the Indians at Fort Duchesne.

The view at the top shows the party starting from Elgin, Ill., and right below it is Kienzle on a Nebraska "highway" bridge. At the right the genial sidecarist shows the depth of water found on some of the Middle Western roads, but the real thing is shown in the lowest picture, taken in Iowa, while an average road in that State is seen directly above. Note the sticky mud over everything. The canteen was frequently called into play after a hard ride or mud-plug.

# Electric light for your motorcycle

The Remy Motorcycle Lighting-Ignition System is a complete success, both in providing light and in furnishing strong synchronized ignition.

Thousands and thousands of motorcyclists throughout the country have for more than a year been putting it to the hardest kind of tests.

It has made good in every way. Its success is completely established.

# REMY

## Motorcycle Lighting-Ignition System

reduces the bulk of the machine, without adding to its weight.

The wiring is thoroughly protected and unaffected by vibration. The battery can't spill.

It provides ignition which will increase the efficiency of your engine. In addition to the high and low head-lights and tail-light, it operates the horn.

See it on the **HARLEY-DAVIDSON,** and you will realize that it is perfect.

This new arrival in the KOKOMO tribe *will put more satisfied bicycle riders on the road.*

BECAUSE:

1st, It will last longer than other bicycle tires made.

2nd, It is the smoothest-running, most resilient tire ever placed on a bicycle wheel.

3rd, Its attractive appearance will convert a legion of riders to the KOKOMO KORD.

KOK
KORD

Then look at the white tread, with its jet black sides. There's a good-looking tire! A tire that will please the eye and sell quicker because of its manifest quality. Its high-class appearance gives a hint of the quality of service to be found in the KOKOMO KORD.

Kokom
Kokom

Digitized by Google

We say "It will last longer than other bicycle tires" —advisedly. For its construction is unique in that *real cords*—not threads—are used in the building of KOKOMO KORD. These cords lay diagonally and transversely—they're so strategically placed that they give a toughness to the tire that *turns off* stone bruises and punctures as if it were armored with steel. This means vastly increased mileage—less wear and better service.

# OMO Lasts Better

In the KOKOMO KORD TIRE you'll find more rubber and *better* rubber than is generally put into *motorcycle* tires. This gives a resiliency and smoothness of running like nothing else on wheels. It means easier pedalling for the rider—less jolts on road bumps—hence, greater satisfaction and comfort.

*Get in touch with us at once, dealers! This tire gives all the indications of beating even the high sales and service records reached by the famous EVERLASTER tire. It is the one best bicycle tire sales bet for 1916. KOKOMO KORD is sure to be a winner. Join the procession now!*

# The Talk of the New York Show

If you were there you know the sensation created by the Cleveland Light Motorcycle at the New York Show. And you also know that it was not only due to its exhibit, which was easily the most striking of the show.

You know that the hundreds of dealers, riders and jobbers who visited our display were quick to appreciate these exclusive features of Cleveland construction—

**Two-Stroke Valveless Motor**
*Explosion at every revolution. Smooth—silent—economical. Runs like a "twin."*

**Worm-Driven Countershaft**
*Eliminates set of sprockets and chains. Adds much to smoothness of operation.*

**Direct Drive Magneto**
*Also eliminates set of sprockets and chains. Positively the highest type of motorcycle ignition.*

**Unit Power Plant**
*All moving parts enclosed in dust proof casings. Clean—simple—accessible.*

## Two Speed Transmission

They went over in detail the following accessories combined only on the Cleveland—

Eclipse Multiple Disc Clutch—Bosch Magneto—Brown Barlow Carburetor—Troxel Truform Saddle—Coventry Chain—Full Ball Bearings—Drop Forged Frame Fittings—Aluminum Castings.

The consensus of opinion was that in construction and equipment the Cleveland is today alone in its field and fully **a year ahead.**

Follow the lead of the live dealers at the Chicago and New York Shows and get in touch with us at once.

# Champion

"TOLEDO MADE FOR THE WHOLE WORLD'S TRADE"

## Prepare For Cold Weather

Winter is hard on spark plugs.

Every time you start your engine the explosion hits the icy cold plug a violent blow.

Ordinary spark plug porcelains frequently crack and become worthless before the engine is fairly started. But Champions are built to withstand such hardships.

These plugs have been tried and proved winter and summer under every condition. The porcelains are baked in our own ovens—we know they are right.

And we back our confidence in them by an out and out guarantee:

Complete satisfaction to the user—free repair, replacement or money back.

# It Sells

## Harley-Davidson dealers say the 1916 Harley-Davidson *sells on sight.*

## Many dealers profited by ordering demonstrators at the very opening of the season.

They had *something to show,* and got the business on the strength of it.

Many Harley-Davidson dealers have profited *immensely* because they had *demonstrators.*

One eastern dealer has ordered out nine machines, as against one in the same period last season.

A large western dealer has ordered out more than twice as many machines as in the same time last season.

We could mention almost any number of similar cases.

Digitized by Google

# on Sight

## 1916 Harley-Davidson shipments are far and away ahead of 1915 Harley-Davidson shipments during the like period at the beginning of the season a year ago.

## One important reason for the big sales of the 1916 Harley-Davidson is the fact that *it sells on sight.*

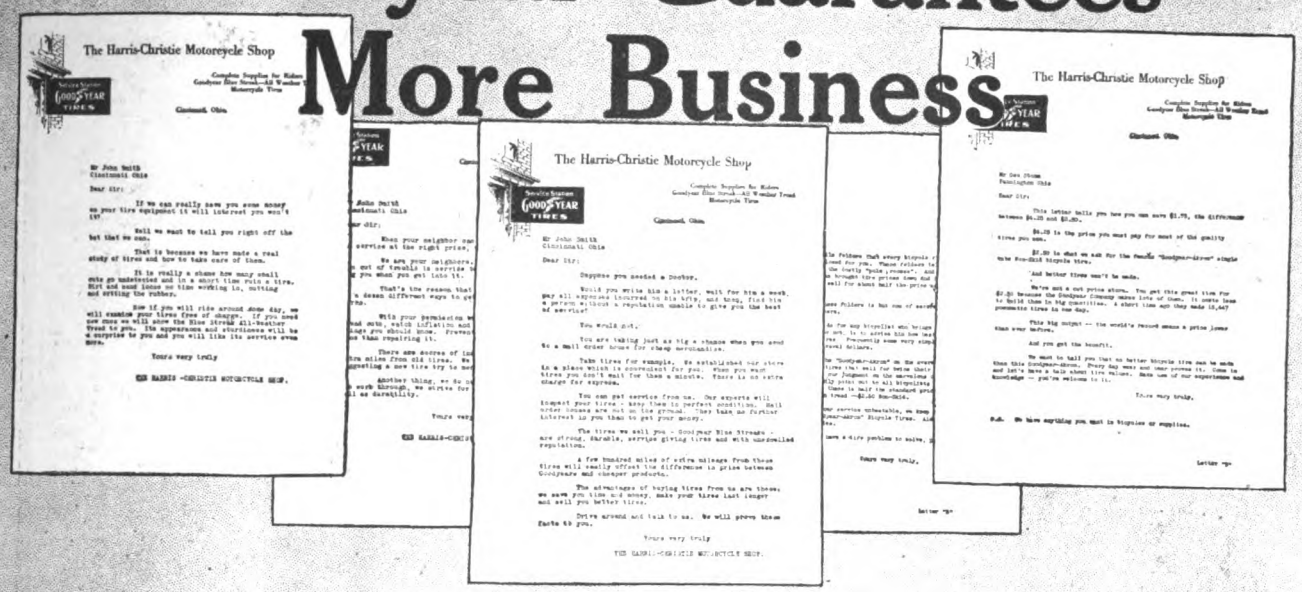
# Goodyear Guarantees More Business



## To Dealers Who Use This Expert Letter Service

## Win Trade From Motorcycle Riders—From Bicycle Riders

These letters—stamped, and addressed to your customers or prospects—come all ready for you to sign and mail. And with them we give you this guarantee—

**All money back unless the letters pay for themselves through increased business.**

You take no risk whatever, remember that. But you stand every chance of winning increased business, just as thousands are doing. Read this:

### 400 Answers from 1300 Letters

Scores of dealers are having remarkable results with these guaranteed letters. One man in a large city received 400 answers to 1300 letters. These brought over 40 jobs at once, besides a large number of tire sales.

Dealers in smaller towns are doing nearly as well in proportion. For results from these letters are limited only to the number of riders and prospects in the community.

### 115,155 Sent in One Month

We launched this guaranteed sales plan last June. Hundreds of dealers seized it. Since then the demand for these letters has trebled. In one month alone Goodyear dealers ordered 115,155 of these trade-winning letters.

### Complete Campaigns

For motorcycle or bicycle dealers, vulcanizers, accessory stores, etc. Each campaign consists of from 3 to 6 letters and includes almost any subject you want to talk about to motorcycle or bicycle riders, as shown by coupon attached.

We also write special letters, at your request, to fit special conditions.

You are to be the judge of whether these letters bring in enough business to pay their cost to you—2c for postage and 1c for labor, a total of 3c each.

We furnish the handsome stationery *free* for this letter service and print your name and address on it. All you have to do is sign the letters and drop them in the mail box.

### Don't Put Off

Dealers each week are besieging us with more requests for this guaranteed sales plan. It is too remarkable for good, aggressive men to neglect. If you want to make sure of more business, check, sign and mail this coupon *right now*.

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## BAKER TO RIDE IN AUSTRALIA

### Record-Holder Plans to Hang Up New Marks There As Well as in New Zealand and the Hawaiian Islands; Carries Two Indian Motors

E. G. BAKER—"Cannonball" to motorcycle enthusiasts the country over—started a few days ago for a tour of Australia and the islands of the South Pacific. He took with him the Indian Powerplus motor with which he established the Three Flag record, as well as another 1916 Indian motor for emergency service, and aims to hang up a few new records before he again sets foot on United States soil. Chief among the speed trips which Baker intends to make is one from end to end of Australia, Sidney to Melbourne, about 600 miles. The records on this course are now held by the Douglas and Triumph, English machines. Another course on which Baker hopes to do something sensational is that which follows the Australian coast-line all the way round, a distance of about 1,200 miles.

When he is through with Australia, Baker will start for home by way of New Zealand. At Wellington, N. Z., on the north island, there is a run of 1,000 miles which he is anxious to tackle, and when that is over with, he will find waiting for him a run of 500 miles on the south island. Later Baker will put in at Honolulu and try out the roads in the Hawaiian Islands. The South Sea Islanders can be assured of rare sport if the Hoosier meets another big boy from Yankeeland, Lieut. Hoffman, of the United States army forces, who is something of an endurance rider, for a match race is on the cards if Hoffman is game. Then the Indiana rider will start for home.

Baker left Springfield, Mass., the middle of last week for his home at Indianapolis, where he will spend five days before starting via Chicago over the Santa Fe to call on his friends in Los Angeles. He will sail from San Francisco on the "Sierra," November 10, stopping at Honolulu on the outward trip to make arrangements for some runs on his return trip, and will then proceed to Australia. He plans to be back in this country in April. In the meantime he carries the good wishes of riders for his success abroad.

## TRADE TOURISTS REPORT ADVANCE SALES

LOS ANGELES, Cal.—The first 1916 machine to make a complete tour of Southern California has just returned to this city. It was a three-speed Harley-Davidson with sidecar, driven by H. A. Lillie and E. E. Welborn, the latter being sales manager for the Appeal Mfg. & Jobbing Co., State distributors. The pair visited Pasadena, Pomona, San Bernardino, Riverside, Redlands, Colton, Corona, Santa Ana and Orange, and went down as far as San Diego and across the border to Tia Juana, Mexico.

At San Diego, Welborn and Lillie found that Bruschi & Pierce, the local Harley-Davidsonites, had already sold 18 of their allotment. At Riverside, the Jones' Cyclery had disposed of six, and at San Bernardino, William Gurr had sold three. Messrs. Clem and Hunsaker, of Uplands and Pomona, sold respectively three and four of the 1916 Gray Fellows. "In fact," said Welborn, "all the dealers are running ahead of last year."

### GUTERMAN TO TRAVEL FOR SCHICKEL

An announcement was made in these columns recently that Lou Guterman was to travel for the Reading Standard Company, the information to this effect having been obtained from an apparently authoritative source. Guterman now states that he is to travel Florida in the interests of the Schickel Motor Company, of Stamford, Conn., demonstrating the lightweight.

## FLECKENSTEIN MAKES CLEAN-UP

### Cyclone Rider Captures All Three Events in St. Joseph (Mo.) Program with McNeil and Graves Hot on His Trail Throughout.

ST. JOSEPH, Mo., October 24.—L. Fleckenstein, of Denver, riding a Cyclone, proved the sensation of the racing program here on Sunday, carrying off the three events of the day and the lion's share of the prize money. Fleckenstein's closest competitor was McNeil, on an Excelsior. The latter was always well up and his brushes with "Fleck" furnished many a thrill.

The first event carded was at 3½ miles, run in two heats, and was easily taken by Fleckenstein. In the final of the second race McNeil entered a protest because Fleckenstein had been permitted to change places with Al Ward, of the Indian team. McNeil failed to qualify against Fleckenstein and Graves. The matter was patched up by the withdrawal of Ray Creviston, of the Indian team, and the race went to Fleckenstein.

Fleckenstein then captured the free-for-all race at 4¾ miles, which closed the program. The summaries:

Three and a half mile race—First heat at 1⅞ miles, won by McNeil, Excelsior; Roy Shaw, Excelsior, second; Ray Creviston, Indian, third. Time, 1:21.

Second heat won by Fleckenstein, Cyclone; Graves, Indian, second; Meyers, Excelsior, third. Time, 1:14⅗.

Final won by Fleckenstein, Cyclone; McNeil, Excelsior, second; Graves, Indian, third. Time, 2:13⅕.

Four-mile race—First heat of 2⅛ miles won by Shaw, Excelsior; Creviston, Indian, second; Kenny, Indian, third. Time, 1:41.

Second heat won by Fleckenstein, Cyclone; Graves, Indian, second; Meyers, Excelsior, third. Time, 1:30. McNeil was retired by motor trouble.

Final won by Fleckenstein, Cyclone; McNeil, Excelsior, second; Graves, Indian, third. Time, 2:33.

Four and three-quarters miles, free-for-all.—Fleckenstein, Cyclone, first; Graves, Indian, second; McNeil, Excelsior, third. Time, 3:00.

### GRAVATH WINS SOCIABILITY RUN

Atlantic City, N. J., October 25.—Frank Gravath, Indian, won the sociability run of the Atlantic City M. C. to Camden and return yesterday. Edward Willitts, Harley-Davidson, was second, and David Parks, Thor, came third. Fourth place is credited to Howard Arthur, Harley-Davidson. Twenty riders started in the affair.

# BECK REPORTS RECORD SALES

## Rogers and Fentress-Newton Traveler Returns to New York Loaded Down with Orders After Middle Western and New England Trip.

AFTER a business trip which kept him on the road since the Chicago Show, and which included St. Louis, Indianapolis, Dayton, Springfield, Columbus, Toledo, Elyria, Cleveland, Pittsburgh, Erie, Buffalo and Boston on the way back to New York, Irving Beck, sales representative for Rogers sidecars and Fentress-Newton products, reports the finest crop of orders he has reaped in years. Mr. Beck, radiating optimism from head to foot, breezed into the office of **Motor Cycle Illustrated** a day or two ago and supplied figures which point to truly remarkable trade conditions in the districts he traversed.

"I am sufficiently conservative when I state that the trade outlook in the cities I visited is better than it has been in years," said Mr. Beck, "and that all indications show a marked upward trend. As far as Rogers sidecar business is concerned, we have enough orders already in hand to keep the factory mighty busy until Christmas, and on my trip I found the demand for the Fentress-Newton line equally good. Mills and factories all over the Middle West and in New England are rushed with work, and many of them are operating on day and night schedules. The natural result is improved financial conditions. Money is much looser and the cycle and accessory men are beginning to feel the benefits. That they will continue to feel them, and on an increasily broad scale, is only a fair assumption."

An interesting sidelight on Rogers and Fentress-Newton business in the East is obtained from Mr. Beck's statement that his orders taken at the New York Show, with their explanatory notes, were so voluminous that it was found necessary to forward them by express. Beck is now back at his New York headquarters, 1493 Fifth avenue, where the Rogers Mfg. Co. recently opened a service station under his management.

### WASHINGTON HEADLIGHT RULING

The law of the District of Columbia prohibits the use of any electric or acetylene headlights on the streets, avenues or public highways of the District, unless the rear reflectors are removed from them, or the front glass either ground or covered with some material of sufficient density to prevent the light being dazzling.

# GOTT MAKES A 24-HOUR TRIAL

## Peoria Dealer Covers 488 Miles with a Tandem Passenger Through Fog and Over Heavily Rutted Illinois and Indiana Roads.

PEORIA, Ill.—Paul Gott, local Harley-Davidson dealer, accompanied by Arthur Opie, of Tivoli, on a tandem seat, left here on Thursday afternoon, October 21, at 12:30, with the aim of crowding as many miles as possible into 24 hours of riding. When the period had expired Gott's cyclometer showed 488 miles, although he had traveled much of the time through a heavy fog and over roads which were deeply rutted.

The plans designated Richmond, Ind., as the end of the first twelve hours' run, and the remaining twelve hours were to be devoted to the homeward trip. The stretch of 71 miles to Springfield was full of ruts and mud-holes.

At Newman another stop was made for oil and fuel and before Montezuma was reached it began to grow dark and a dense fog settled over the countryside. A puncture was added to the other troubles at this point. When repairs had been made the ride was continued and Indianapolis was reached at midnight. The riders were wet from the heavy fog and pretty well exhausted, but they hunted an hour for a garage, loaded up again with oil and gas and at 2 p. m. started on the return run.

They had another puncture near Danville and finally reached Springfield at 12:30 the next day. Then time was up and Gott had covered 488 miles.

ARRANGED WITH EACH PIECE PRICED AND READY TO HAND

# 1,000-MILE RUN FOR HUB RIDERS

**Bay State M. C. of Boston Makes Early Start on Big Three-Day Event for Next May Which Will Take Contestants Through Seven States.**

BOSTON, Mass.—Something entirely out of the ordinary in the way of an endurance run is being planned by the Bay State Motorcycle Club, of Boston, Mass., for May 28-30, 1916, when riders from all parts of New England will be taken over a course of about 1,000 miles. The route has not been fully mapped as yet, owing to the fact that the special committee to handle the affair was only named at the last regular meeting of the club, but it is understood that the endurance riders will have to struggle for their points through the states of Massachusetts, Maine, New Hampshire, Vermont, New York, Connecticut and Rhode Island. Judging from the rough plans which have so far been outlined, it is evident that the Hub organization is determined to set a high-water mark for such contests in the United States, both as to the length and diversity of the course and the number of riders who will participate.

The club officials state frankly that it is their desire to demonstrate the durability of motorcycles and the stamina of riders to all who may be interested, and that their idea of the proper way to approach the task is to provide the stiffest all-round contest of the kind on record. A rumor that the contestants will be required to ride a few miles in the Atlantic Ocean on their way back from Maine has been indignantly denied by the committee. "There will be plenty of variety in the course we select without dragging in the poor old Atlantic," say the committeemen.

Gold medals will be awarded by the club to all who finish the three-day run with perfect scores, while every survivor will receive a silver medal. A loving cup will be awarded to each member of the team of four which makes the best showing, and another cup will go to the individual rider who has the most consistent score. Special prizes will be given to sidecar entrants, and in addition there will be a number of valuable merchandise awards.

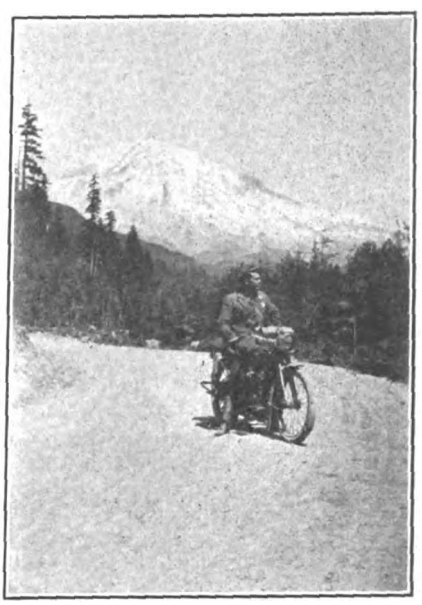
The contestants will be expected to ride fifteen hours on each of the three days, and at each night control all the machines will be locked and sealed. No repairs can be made during the night. Each rider will receive his mount half an hour before starting in the morning, thus allowing him time to fill his tanks and tune up a bit.

There are indications that the run will receive much attention from the motorcycle manufacturers and that each factory will be represented by one or more teams of four men each. Communications should be addressed to the following committee: Ben C. Straube, chairman; Donald Pope, L. W. Norwood.

## FIVE MINUTES WITH THE CAMERA MAN

ABOVE is shown a squad of motorcyclists connected with the New Mexico Military Institute at Roswell, N. M. Ordnance Sergeant B. F. Leonard is introducing the motorcycle there and has created an excellent impression.

Below are M. W. Kibbe, traveler for the Henderson (in the sidecar) and I. L. Kibbe, new Henderson agent in Keene, N. H., on the machine. They are both hustlers. The former is traveling in northern Massachusetts, New Hampshire, Vermont and Maine and placing many agencies.



Directly above is a picture of Art Holmes, of Los Angeles, snapped in Rainier National Park, Ore. Mt. Rainier is seen looming in the background. Note the excellence of the road, despite the rugged country.

In the panel below are seen (from left to right) J. E. Sanders and Miss Edna Sanders, Mr. and Mrs. J. A. Ward and Mr, and Mrs. R. O. Robinson, all of Clovis, N. H.

# JERSEYITES TO HELP UNCLE SAM

**State F. A. M. Commissioner Holton Starts Movement to Line Up New Jersey Motorcyclists for Volunteer Military Service.**

AIMING to have motorcyclists of New Jersey keep pace with the New Yorkers in applying the power two-wheeler to military service, State F. A. M. Commissioner E. B. Holton, of Newark, has communicated with the American Legion, 10 Bridge street, New York City, and suggested that official steps be taken to include New Jersey's riders in the general plan for national preparedness. Commissioner Holton's idea is to have a representative of the American Legion visit Newark and address the members of the New Jersey Motorcycle Club and all other motorcyclists who care to be present, thus working up patriotism and paving the way for a definite organization of motorcyclists that could be relied upon for field service in the event of war.

The New Jersey club, which has its headquarters in Newark, has long been the most active motorcycle organization in the state, and there are indications that it will take up the military idea with the same enthusiasm that has marked its undertakings in the past. It has been suggested that drills of motorcycle volunteers could be held in the larger cities throughout the state during the year, under regular army officers or the National Guard, and that the riders from all districts could gather at an annual encampment to work out on a broad scale the manoeuvres practised by the various clubs.

The success attending the participation of motorcycle volunteers in the recent manoeuvres at Van Cortlandt Park, New York, has inspired F. A. M. and club officials in several other Eastern states to prepare for action along similar lines, and Commissioner Holton is the first booster to get after the folks in charge of the national movement. The purpose of the American Legion is to line up men in all walks of life whose services, on the firing line or otherwise, would be valuable to Uncle Sam in war time, but so far it has taken no definite action with reference to the motorcycle.

Commissioner Holton stands ready to put his 180 pounds of concentrated enthusiasm behind the military movement as far as it applies to motorcyclists of New Jersey, and feels that the state will be able to show a formidable detachment of volunteer riders as soon as uniforms, equipment and officers to take charge of drills are assured.

## THIRTY-FIVE FINISH JAMAICA ENDURANCE RUN

JAMAICA, N. Y., October 26.—Thirty-five out of thirty-eight entrants finished the endurance run of the Jamaica M. C., over the course, Jamaica-Greenport-Jamaica, on Sunday, October 24. The final scores are not yet available, owing to check-sheets from various points along the course not having been sent in to club headquarters, but it is expected that several contestants will have perfect scores. Complete results are expected before the end of the week.

The run led from the clubhouse, at 447 Fulton street, this city, through Rockville Centre, Freeport, Amityville, Babylon, Islip, Bayshore, Patchogue (check), Moriches, Eastport, Quogue (check), Riverhead and Mattituck to Greenport, a distance of 105 miles. Five hours were allowed for this leg. Leaving Greenport, the noon control, the contestants returned via Mattituck and Riverhead once more, but turned off and came to Jamaica through Wading River, Shoreham, Port Jefferson (check), Smithtown, Huntington (check), Roslyn and Mineola, a distance of 103½ miles. Five hours were allowed for this leg also. The departure was slated for 7 a. m., and the finish time at Jamaica at 6 p. m., one hour being allowed at Greenport for lunch. Riding schedule called for 20.7 miles per hour outward bound and 21 miles per hour for the return trip.

The finishers included seven Harley-Davidson solo riders and one Harley-Davidson sidecarist, seventeen Indian solo riders and one sidecarist, two Thor solo entrants and six Excelsior entrants. Those who did not finish were one Harley-Davidson sidecarist, one Excelsior solo rider and one Harley-Davidson.

## ADD 100,000 SQ. FT. TO SPLITDORF PLANT

NEWARK, N. J.—Plans for a new building 300 feet long, 50 feet wide and six stories high have just been approved by the Splitdorf Electrical Company. When the structure is finished the company will have added 100,000 square feet to its floor space, and will be enabled to keep pace with trade developments no matter how fast the demand for Splitdorf products continues to grow.

For some time it has been evident that the present Splitdorf buildings were outgrown. Although the manufacturers of Dixie magnetos, Splitdorf spark plugs and mag-dynamos have been located in the present quarters only about three years, the growth of the business has been so rapid that calculations as to the length of time the existing plant would meet the demands were upset. The output of magnetos now is 315 a day, and it is the intention to increase this to about 2,000 a day when the new addition is completed next spring.

## EARL BECOMES A MEMBER OF WILLYS-OVERLAND OFFICIAL STAFF

Clarence A. Earl, who recently resigned from the Hendee Mfg. Co., to join the Willys-Overland Company, was elected a director and one of the vice-presidents of the latter concern at the annual meeting of stockholders on October 26. Representatives of 165,000 shares of common stock voted.

## POPULAR TRADE MAN TO WED

Mr. and Mrs. John Hassett announce the engagement of their daughter, Mae C., to John W. Henry, president of the Vim Cycle Hardware Co., of Buffalo. The wedding will take place soon.

# GOODRICH CO. TO INSURE EMPLOYES

**Tire Firm to Put Into Effect Plan Providing Life and Disability Insurance and Old-Age Pensions for All Workers on November 1.**

AKRON, O.—The B. F. Goodrich Company, of this city, is to insure all of its 15,000 employees on and after November 1, 1915, according to a recent announcement. The insurance is to be of the group type, and by means of funds especially set aside by the firm for this purpose. The idea is to provide a pension after a stated term of service, compensation in case of disability, and life insurance in the event of death.

As regards the pension and disability forms of insurances, the Goodrich company will set aside certain funds for these purposes. The life insurance is to be taken through the Equitable Life Assurance Society in the form of a policy for each employee, valued at $500 for the first year of service, and increasing $100 with each subsequent year until a maximum of $1,000 is reached.

A recent bulletin to the employees explains the plan. The pension is to provide for those employees who have earned an honorable retirement in their old age. The disability compensation will afford some protection to the employee during periods of illness. In announcing the insurance plan the company states:

"In providing these benefits, the corporation is expanding its plan of developing the mental and physical efficiency and well-being of its employees, so successfully begun in the physical examinations undertaken in 1914.

"To this end the corporation is establishing its department of health and these forms of social insurance, believing them all to be in accordance with the sound underlying principles of American industry and honest workmanship.

"The corporation provides these safeguards in no way as a gift, but rather as a fine example of the mutual service possible through co-operation."

## IMPROVED CONSTRUCTION IN LEONARD BRACKET

For the 1916 season, the Leonard's Prest-O-Bracket, produced by the G. A. Leonard Manufacturing Company, of Burlington, Vt., has a most useful improvement. This is in the extension of the bands holding the tank down to the fork of the motorcycle directly under the tank and securely fastening to the fork. The arrangement makes for added steadiness, thus doing away with any vibration.

The Leonard bracket has the form of a curved trough to whose rear and upright portion are fitted clamping devices to attach to the forks of the motorcycle. At each end of the lower portion of the bracket are bands for affixing the Prest-O-Lite tank in position, these bands being fitted with a simple device to enable the tank to be changed when exhausted.

# PAGE IS HEAD OF NEW DEPARTURE

**Elected to Presidency of Big Bristol (Conn.) Company After 23 Years of Successful Service; A. C. Hitchcock Succeeds Him As Secretary.**

BRISTOL, Conn.—At the annual meeting of the board of directors of The New Departure Manufacturing Company, held on Tuesday afternoon, October 19, DeWitt Page was elected president; Frank P. Furlong, of Hartford, vice-president; C. T. Treadway, treasurer, and A. C. Hitchcock, secretary. The following directors were also elected: DeWitt Page, C. T. Treadway, F. P. Furlong, Charles F. Pope, E. R. Burwell, A. C. Hitchcock and Townsend G. Treadway.

Mr. Page succeeds Albert F. Rockwell as president, and Mr. Hitchcock succeeds Mr. Page as secretary. The new directors are Mr. Hitchcock and Townsend G. Treadway.

Mr. Page, the newly-elected president, has been identified with The New Departure Manufacturing Company practically since the first days of its existence. He came to Bristol from Hartford twenty-three years ago and accepted a minor position in the office of the then New Departure Bell Company. In the succeeding years he won promotion from one position to another in practically all departments, so that he brings to the presidency an extraordinary and comprehensive knowledge of the business. In the earlier days he was paymaster, then purchasing agent and later advertising manager. Soon after he assumed the duties of the last mentioned position, he was appointed assistant general manager and his duties became general throughout the factory.

About ten years ago he was elected secretary and entered the directorate of the company. Shortly after this the business grew to such proportions that it was deemed desirable to change the method of marketing the company product. Selling through a New York agency was discontinued and a sales force established at Bristol, Mr. Page becoming the head of that department. This change proved to be thoroughly successful, the company's business showing a handsome increase each year.

**De Witt Page**

In December, 1913, Mr. Page was unanimously elected general manager of the company. He will continue in the duties of this office in addition to his executorial work.

The selection of Mr. Page for the head of one of the most important manufacturing concerns in New England shows the confidence of his associates in the abilities, methods, and policies which have marked his management of the company's affairs.

Mr. Page is a native of Meriden, Connecticut, but spent practically all of his boyhood and youth in Hartford where his two brothers now reside—Bertrand A. Page, as first vice-president of the Travelers' Insurance Company, and Ralph E. Page, of the Page Hardware Company.

Mr. Hitchcock, the newly elected secretary, came to the company six years ago as assistant sales manager and succeeds Mr. Page as secretary and sales manager. Mr. Hitchcock was born in Cheshire, Egland, of American parents. He was educated abroad and returning to this country held responsible positions with the American Brass Company for twelve years. For three years previous to his coming to Bristol, he was a maker of bicycle accessories in Boston.

## HARRY JACOBS LOSES INFANT SON

Their many friends in the trade will regret to learn that the son born last week to Harry and Mrs. Jacobs died shortly after birth. Mrs. Jacobs, however, went through the ordeal splendidly, and is making very satisfactory progress toward complete recovery.

**HAS IT EVER STRUCK YOU—**

**That All Detours Seem to Be Rocky and Winding and That the Gradient Is Usually Only a Few Degrees Off the Perpendicular?**

# AFTER BIG SALES IN NEW ENGLAND

**General Motorcycle Sales Co. of Boston Increases Capital, Takes on the Excelsior and Prepares to Open a String of Up-to-Date Branches.**

BOSTON, Mass.—Following the announcement that the Henderson Motorcycle Sales Co., of this city, New England distributors for the Henderson motorcycle, has also secured the agency for the Excelsior line, comes the statement that papers have been filed with the Secretary of State changing the corporation's name to the General Motorcycle Sales Co. At the same time the capital stock was increased from $15,000 to $25,000. The officers of the company have not been changed. They are as follows: Charles A. Hubbard, president; Ben C. Straube, treasurer and general manager, and Charles A. Waterman, secretary.

The company states that its purpose is to open branch stores in Lynn, Waltham, Cambridge, Brockton and a number of other surrounding towns where both the Henderson and Excelsior sales will be pushed. Arrangements are already being made for the first branch, which will be in Cambridge.

The General Motorcycle Sales Company has already sold and delivered 19 of the 1916 model Hendersons and has orders on hand for several more. Fourteen sub-agencies have been arranged for, three of these being closed by Treasurer Straube at the New York Show. Although it has just taken on the Excelsior the company has found it necessary to place a carload order.

# On the Pacific Coast

## AUTOS IN RELAYS TRY TO BEAT BAKER 3-FLAG MARK

LOS ANGELES, Cal., October 9.—An effort to beat the three-flag record set up by E. G. Baker on his Indian machine, equipped with the new "Powerplus" motor, was recently made by the Chandler Automobile Company. In spite of the fact that the distance from Tia Juana, Mexico, to Vancouver, British Columbia, was made by several relays of automobiles, the drivers of which stopped only to replenish their oil and gasoline supplies and to get refreshments, "Warhorse" Baker's time wasn't even approximated. The four-wheelers, with all the huge advantages they had, traveled over the distance of 1,655.5 miles in 124 hours. Baker's time for the same distance was 81 hours and 15 minutes. Local motorcyclists who heard the news were enthusiastic over the superior qualities of the two-wheeler and weren't at all backward about "rubbing it in" on the autoists.

## FLETCHER MADE GOOD AS SALESMAN AND MECHANIC

John A. Fletcher, of the sales staff of T. Will Risden, Indian agent at Los Angeles, Cal., has been both a shop man and demonstrator before going on the road. He started his mechanical career in Detroit as a mechanic in the Packard Motor Car Company's factory, but on coming to Los Angeles later, worked as a mechanic with Risden. Staying two years in this capacity, Fletcher was not satisfied and wanted to sell, so as soon as a vacancy presented itself in the Risden jobbing organization, he was given his opportunity. He made good on his first road trip and did even better on the second, and now is considered one of the best of the Risden outside men.

## SAN FRANCISCO M. C. DOINGS

San Francisco, October 20.—The San Francisco M. C. staged a club run to Niles Canyon last Sunday. Thirty riders participated, taking along a sidecar filled with good things to eat and drink. The outbound trip was made by way of Lake Chabot, over excellent roads. Returning, the party separated, some of them journeying to San Jose and thence home by way of the Peninsula route; others returned by way of Oakland.

The club members are enjoying a swim night, every alternate week, at Sutro Baths, out at the beach. Some of the boys say they are taking the "bawths" whether they need them or not, just to be in the swim.

## CHELINI FUND INCREASES

Two dollars were contributed last week to the Chelini Fine Fund, making the total receipts eleven dollars at this writing. The contributions, which were for one dollar each, came from Mr. Gibson, secretary-treasurer of the F. A. M., and Arthur B. Croft, the proprietor of the Indian agency at Ouray, Colo. Fifty dollars is the amount of money which the friends of A. Chelini are trying to raise in order to reimburse him for the fine he had to pay for speeding while covering the last leg of the Transcontinental Motorcycle Relay. Contributions should be sent to the editor of **Motor Cycle Illustrated.**

## APPEAL COMPANY BOOSTS CAMPAIGN FOR NEATER RIDERS

J. D. FRASER, manager of the Appeal Mfg. & Jobbing Company, distributors of Harley-Davidson motorcycles, with headquarters in San Francisco, Cal., forwards the accompanying photograph of Mr. and Mrs. George Chenoweth, with the remark that these riders are doing much to set a high standard of neatness for motorcyclists in Los Angeles and vicinity. Mr. Chenoweth is an employee of the Appeal company's Los Angeles house, and it is explained that the manner in which he and Mrs. Chenoweth attire themselves for roadwork has elicited many approving comments from both riders and non-riders.

"We have always noted," writes Manager Fraser, "that when a motorcycle and sidecar or motorcycle with tandem passenger passes along any city street with closed muffler and with the motorcyclists neatly attired, the face of every pedestrian reflects surprise; the latter is amazed because he has just learned that a motorcycle can run quietly and be ridden neatly. We are heartily in favor of the campaign to improve the appearance of the riders, for we believe that it will go a long way toward removing some of the prejudice which exists in the minds of non-riders concerning the motorcycle."

**Mr. and Mrs. George Chenoweth**

## SO. CALIFORNIA F. A. M. OFFICIALS

Los Angeles, Cal.— C. F. Gates, Commissioner of the F. A. M. for Southern California, has made up his advisory board as follows: Chairman Competition Committee, Paul J. C. Derkum, Los Angeles; Chairman Legal Action Committee, Perry F. Backus, Los Angeles; Chairman Membership Committee, O. B. Bray, Los Angeles; Chairman Press Committee, John E. Hogg, Los Angeles.

Derkum has had some success as a promoter, Attorney Backus is one of the directors of the L. A. Motorcycle Club, and Bray is secretary of the L. A. M. C.

## RISDEN TO SELL INDIAN PRODUCTS IN ARIZONA

Los Angeles, Cal.—Arrangements have been made between the Hendee Mfg. Company and C. Will Risden for the latter to be distributor of Hendee products for all of Arizona except Maricopa County.

Risden has also pushed his activities into Lower California, having established agencies at Mexicali and another at Tecarte. The latter covers the Guadalupe Valley.

## LITTLE DAYTON IS TAKING

San Francisco, October 20.—The new Dayton motor bicycle has caught on in the West with a vengeance. According to W. E. and W. H. Jackson, of this city, who are Pacific Coast distributors for Dayton motorcycles and bicycles, dealers from Denver west are clamoring for agencies for the new Dayton motor bicycle. Judging from the interest displayed in the new motor wheel, the coming season promises to see a large number of these machines in operation on the Pacific Slope.

## T. & H. COMPANY OPENS

Seattle, Wash.—The T. & H. Cycle Company has just entered the field in this city, at 1533 Eleventh avenue. H. D. Taintor and A. E. Hagan compose the firm and are both familiar with all makes of motorcycles. General repair work will be carried on.

## MADE SALES AT FAIRS

San Francisco.—The Hendee Manufacturing Sales Company of this city exhibited the 1916 Indian models at the recent county fairs at Merced and Fresno and, according to B. Anderson, manager of the company, a large number of sales were made. "Happy" Alzina was in charge of the exhibits.

## MOTORCYCLE SUPPLY TO ADD

Portland, Ore.—The Motorcycle Supply Company, of 209 Fourth street, is shortly to build a modern garage and repair shop with club rooms on its own property. The firm is headed by Percy Abbott, one of the best-known of Portland's motorcycle men.

## LILLIE ESCAPED LUCKILY

Los Angeles, Cal.—Herbert A. Lillie, the well-travelled "misisonary" of the Appeal Mfg. & Jobbing Company, came out of a recent collision with an interurban electric train with nothing but bruises, and he and his friends consider him specially protected by Providence. The train hit him at a crossing and hurled him and his mount for 37 feet into the Tules river. Lillie is still wearing bandages, but will soon be none the worse for his encounter.

## GOOD MOTOR WHEEL DEMAND

San Francisco, October 20.—A. Freed, president of the Pacific Motor Supply Company, reports a very good demand for Smith motor wheels and bicycles throughout Northern California.

## HE NEEDS BOTH WHEELS

EVIDENCE that the New York Motorcycle, Bicycle and Accessory Show was the most fruitful exhibition of the kind ever held, continues to accumulate. Almost daily come sales reports showing that the business stirred up at Madison Square Garden was definite and plentiful. There was no lost motion. Trade men who attended the Show were repaid for their time and efforts, orders went back to the factories in sheaves and cycling spirit in the East received a big impetus.

Under the circumstances there appears to be no reason for depriving the trade machine, as symbolized in the cartoon above, of one of its wheels. We consider it a highly efficient piece of business mechanism as it stands and another season with its present equipment should make it an all-around record-breaker. We feel that the rear wheel has fully justified itself.

### SIGNED ALL CHECKING SHEETS

Editor: Apropos of the recent endurance run of the Buffalo Motorcycle Club I wish to state that I signed checking sheets at all the controls of the course and that after being in the lead up to Arcade, I encountered some mechanical trouble, my inlet valve breaking and puncturing a hole in my front piston when it dropped into the cylinder. I took three hours to remove the broken parts and to get my motor to turn over freely. And then with only one cylinder in use, I plugged on to Jamestown, my home town, covering about 115 miles in this crippled condition, checked at every control and arrived in Jamestown about two hours and forty-five minutes after the leading man. There I took my motor down, replaced the broken parts in less than one and a half hours and left the town at nine in the evening. I arrived in Buffalo at 2:15 the next morning. Your correspondent stated that the last place I had signed checking sheets was at Arcade.

VERN F. SQUIER.

Jamestown, N. Y.

### MORE ABOUT MILLIGAN

Editor, **Motor Cycle Illustrated**—I was very glad indeed to note your mention of Assemblyman Milligan in your last issue, and just want to add a few words. I have had quite some experience with politicians and various legislatures, but I can say without fear of contradiction that Fred G. Milligan, member of Assembly from the fifth district of Brooklyn, is more truly a representative of the people who elected him than any other man I have ever known. During my ten weeks' experience in Albany attending the sessions of the legislature I had the opportunity to watch the various members at close hand and know that Milligan stood for the interests of his constituents at all times.

In regard to motorcycle legislation I have received several letters to the effect that if the motorcyclists had not had a representative on the ground we would have had one of the unjust bills enacted into law and the riders of this State would now be paying without doubt a five dollar registration fee. But I can say and have no fear of contradiction from any source that if I had not been able to secure the interest and aid of Assemblyman Milligan that we would have such an unjust law now. It was Milligan who at the last minute, on the last day of the session, found an error or trick in the bill that finally passed corrected but which in the original form would have provided a registration fee of five dollars. It was only Milligan's forcefulness and absolute independence that won the day for us in the Assembly by having the Fuess bill amended reducing the fee to two dollars after the three dollar Cristman bill had been made a party measure in the Senate. This Milligan did against the tricks and crack of the whip of the bosses, and so aroused their disfavor and they would be glad to see him defeated at the coming election, and it is for this reason that every motorcyclist and everyone in fact that believes in a true representative of the people to do their utmost to have Mulligan re-elected by the largest majority ever known in the district.

# POWERPLUS-

## Here's What Some Representative Indian

"The new Powerplus motor is one big roar. I did 44 miles in 50 minutes going from Providence to Worcester. Eddie Lutz took one of them into a recent endurance run and he said that his experience was that it took the hills so easily that he thought the machine was geared low. Then, on the other hand, in riding on the level he thought the machine was geared high. Can you beat it?"

B. A. SWENSON, Providence, R. I.

---

"Everybody who has covered the road from Springfield, Mass., to Brockton, Mass., knows that there are some good sizable hills to roll up. I made the round trip of 228 miles with a new Powerplus motor and never shifted a gear. Two other things which particularly impressed me about this new 1916 achievement is the steadiness and abundance of its power at low speed and its extreme quietness. I can also say that as a sidecar motor it is a world beater."

G. A. GOVE, Brockton, Mass.

---

"I am very much pleased to acknowledge your favor of the 12th and also to receive the new 1916 motor mentioned therein. To say that I am pleased is putting it mildly. This new motor seems to be everything that I could desire, having not only power in the first place, but a degree of quietness I hardly dared to anticipate."

A. H. CROCKER, Kansas City.

# The New Battle Cry!

## Men Think of the New Indian Motor——

"The new Powerplus motor is the slickest thing I have ever seen in all my exeprience in the motorcycle business. Its quietness is truly remarkable and it is so high strung that it seems capable of doing anything."

ROY CROSS, Worcester, Mass.

"During my recent trip from Bridgeport to Niagara Falls and back through the mountains of Pennsylvania I rode a 1916 Indian with Powerplus motor. I want to say right here that it is the fastest and most powerful machine I ever sat on. I never was out of high on the entire trip and I am willing to do it again on a bet with gear locked into high. That is how much I think of Powerplus."

ARTHUR DUNHAM, Bridgeport, Conn.

"I can truly call the Powerplus motor a sensation. It has proved to be such everywhere that I have been with it. There was never a time when my machine has been on view that the crowd did not immediately get busy examining and admiring its details. You can take it from me that the factory claims for Powerplus are very modest when put beside its actual performance. I have had it on the road for thousands of miles and I did not strike any cross country rough stuff that the Powerplus motor couldn't easily trim."

E. G. ("CANNONBALL") BAKER, Indianapolis.

# The Valley of the Beautiful and the Land of Dead Things

By John E. Hogg

THE perfect medley of bird-songs awakened me suddenly and I sat up in bed, rubbing the sleep out of my eyes with my fists. It seemed that all the birds for miles around Los Angeles had congregated about my sleeping porch for the express purpose of awakening me. Every tree and shrub seemed to be alive with orioles, mocking birds, thrushes and linnets—all singing as if their lives depended upon it.

### "Big Ben" Speaks

I was just in the act of reaching under my pillow for my timepiece, when "Zing! Bang!-!-!-!" went "Big Ben" out in the hall, and I heard Ruth scamper out and choke it.

An hour later, with the sun not yet up over the eastern mountains, we had finished a dainty breakfast, bade good-bye to home and mother, and were off, up the beautiful palm-bordered Callé Hidalgo, to the Mission Road, where we turned to the east, out through San Gabriel and past the historic old mission San Antonio de Padua.

Twenty-five miles of boulevards through orange and lemon groves, through avenues arched over by eucalyptus and pepper trees, with the snow-covered Sierra Madres as a background, to the left of our road. Add to this picture a motor which ran with the perfection of a watch, the most glorious June morning, and you have a combination that would certainly give joy and contentment to the worst "hard-boiled" individual who ever carried a grouch in California sunshine.

### "Profanity-Provoking Ruts"

Coming out of Pomona, we encountered road repairs and were sent off on a detour marked "Best Temporary Route," but which developed into two miles of deep dust and profanity-provoking ruts before we reached good roads again.

We were now out of Los Angeles county, with the "county cop bugaboo" left behind; so, touching the throttle a bit, we sailed down the San Bernardino road at an exhilerating clip. The last few days had been very warm and we were rather surprised upon rounding the base of Mt. San Antonio ("Old Baldy") to notice how far up the snow line had crept. I told Ruth to note the amount of snow on this side of the mountain and that I would bet her my next week's wages that there was more snow on the other side—although the other side was next the Mojave Desert (pronounced Mohäh-vee). "When we come out at the upper end of the Cajon (pronounced Kahone) pass," I told her, "you will find that I am right."

### No Speed Limit

The rest of our run to Riverside is only the story of a joy-ride over a boulevard along the foot of the mountains, through mile after mile of orange and lemon groves. The road was so smooth that it glistened in the sunlight. There was no speed limit other than the speed limit of the machine, and for miles and miles we simply toured along with the speedometer standing at 65 and sometimes a little more. It was pure joy, unadulterated.

We rattled around the base of Mt. Roubidoux, the California Sinai, where religious services are held every Sunday, and over the long wooden bridge spanning the river, beside which the city of Riverside was built in order to call it Riverside. It is a beautiful city of homes and well-parked yards and streets, but we went right through, hesitating only sufficiently to comply with the speed ordinances.

### Helping Themselves to Oranges

The fifteen miles between Riverside and San Bernardino was over a boulevard that was in sore need of repair, and we encountered several detours that sent us over some abominable roads and delayed our progress. The country was mostly given over to oranges, although we found a fine lemon tree growing at the side of the road, and filled our pockets with the fruit to serve as thirst quenchers on our dash through the dry desert with its alkali and cactus.

**In the Desert, Filled with Sagebrush, Mesquite and Joshua Trees**

At San Bernardino we filled up on gas and oil, inquired the road out to the Cajon Pass and were off again. We were now at the foot of the San Bernardino range—great snow-covered peaks that towered into the very heavens, with Mt. San Bernardino's ten thousand feet of snow and icefields looming up most prominently of all.

We were sailing up the Cajon Pass road at a merry clip when suddenly we dropped into a heavy chuck hole without the slightest warning. In the glare of the sunlight I had failed to see it, and the jar of dropping into it so unexpectedly nearly unhorsed us both, so that Ruth bounced up and came down with her pretty little Grecian nose against my shoulder so hard that it made tears come to her eyes. It hurt a great deal worse than she let on, but she never whimpered.

### Barren-Looking Country

Our road now led up and up—not by very steep grades, but by the long gradual climb. The orange groves merged into hay fields, and the hay fields into sagebrush and mesquite, until at last we found ourselves in a most barren and desolate-looking country, consisting almost entirely of rock.

**Near Summit of Cajon Pass**

As we climbed higher our road became poorer, until by the time we had reached Cajon (a watering tank on the Santa Fé Ry.) we found ourselves on a mere gossamer of a road that wound up and up between great perpendicular walls of rock that gave us much the same sort of feeling that one has as he walks along between the sky-scrapers of lower Broadway in New York.

The curves and grades were simply shocking, as was also the view hundreds of feet straight off the

Digitized by Google

edge of our road down into the canyon as we toured along on its very edge for mile after mile.

About half way up through the pass we stopped to snap some photos, and here we became aware of the fact that the pass not only acts as a pass through the mountains for wheeled vehicles, but for the elements as well.

### Air Roars Up Like Hurricane

The air down in the valley, heating and expanding faster than that of the mountains, roared up through the pass in a perfect hurricane that nearly swept us off our feet, and was anything but pleasant.

We started again in low gear, pumped a gunful of oil to the motor, and went growling on up the grade with the open exhaust from the motor sounding like a sham battle as it was echoed back and forth between the adamantine walls.

From the standpoint of the motorcyclist, the Cajon Pass could not be considered safe. In fact one is under a severe nervous strain all the way up, if he plays "safety first." I found myself in a cold sweat before I came to a point where I was reassured by a sign bearing the information —"Summit one-half mile."

It was quite a relief when we came to the summit, and stopped on two edges of the world to rest and let the motor cool. In front of us for miles and miles—as far as the eye could reach—stretched the Mojave Desert; mile after mile of barren sand, with no vegetation except cactus, mesquite and a few great Joshua trees. Back of us was the mountains, with the Cajon Pass road winding down through them like a ball of string that a kitten had played with; and beyond, dim and hazy in the distance, lay the fertile San Bernardino valley.

### Smelled Like Roasting Turkey

We now had 23 miles of desert road into Victorville; that is, "road," such as it is, consisting of fine sand and alkali dust, anywhere from six inches to bottomless in depth. It wasn't such bad going, though. Desert though it was, it was by no means monotonous to us, as we were seeing all sorts of strange things. The ground literally swarmed with horned toads and lizzards that scattered in every direction as we approached. Great Yucca flowers blossomed on all sides and wafted their fragrance in the air, blended with the odor of the sagebrush, that smelled like the kitchen when the Thanksgiving turkey is being prepared.

The Joshua trees were also new to us, and there seemed to be something weird about them. They are positively uncanny-looking things, with their great shaggy branches reaching out like the hairy arms of legendary giants.

We could also see now the back side of Mt. San Antonio, and true to my prophesy, the snow line extended down more than half of its height.

### Made Good Progress

Although we slid about and skidded almost continually from one side of the road to the other, we made fairly good progress, and at two o'clock rolled into Victorville, where, leaving the machine at the Central Garage to be filled with gas and oil, we betook ourselves to a nearby restaurant, or rather the Victorville Hotel.

The town of Victorville is on a little oasis in the desert, and, considering its surroundings, is a wonderful little place. It has some very nice buildings and houses, to say nothing of an abundance of trees, flowers and other vegetation. We were also pleased to find that the hotel sets about as fine a meal as anyone could care to sit down to.

Filling our canteen with fresh water, we struck out once more, this time straight west into the desert with a grim determination of crossing it and reaching the Sierra Madre mountains on the other side. We roared up a big sand dune and down on the other side, and had gone less than two miles before we realized that we were into seventeen kinds of hell and damnation. Oh! no, it is no mystery to us now why men go crazy in the desert!

### Why Men Go Crazy

The air literally crackled with the heat. The sun beat down on the glistening sand in blinding fury, and the wind blowing a perfect gale and laden with sand and alkali dust, was like the blast from a hot-air furnace. The vegetation had dwindled to a clump of cactus and mesquite here and there, while in all directions stretched the glistening sands and great barren hills with rocks of the most vivid colorings.

I soon dispensed with attempting to use the high gear of the machine, and even in intermediate it took half a throttle and a speed of nearly 30 miles per hour in order to be able to turn a wheel.

The sand and alkali was absolutely bottomless, and when we desired to stop, all we had to do was to shut off the motor and step off. The machine would sink in up to the hubs, and, with the motorbase in the sand, would stand without additional support.

### Eyesight Getting Bad

We had little time for lingering, however, for there were 56 miles of desert ahead of us and with only a small canteen of water every minute counts. The heat and brilliancy of the sunlight made goggles out of the question, and I soon found that the alkali dust and glare of the sunlight, with its reflection on the white sand, were playing havoc with my eyesight.

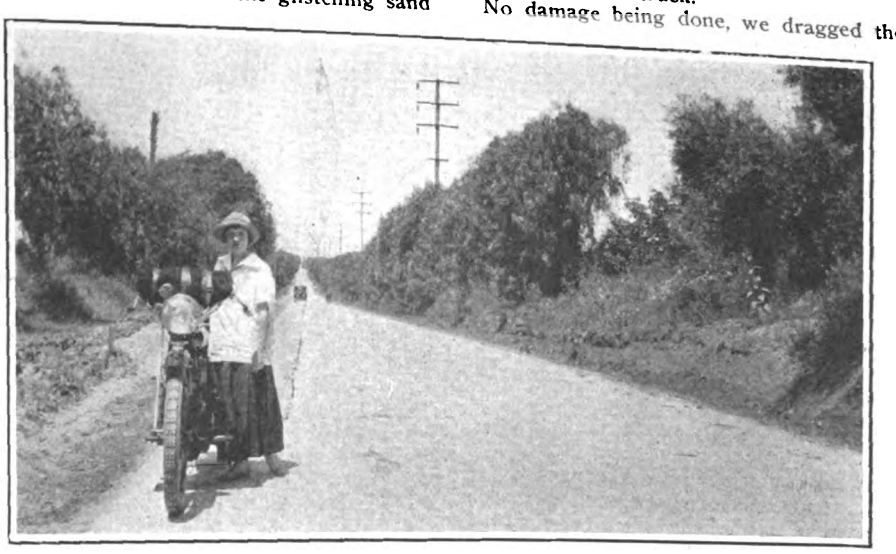
My eyes became terribly inflamed, burned as if they were full of red pepper, and by the time we were 25 miles west of Victorville I became horror-stricken lest my eyes should fail entirely, and we should wander hopelessly about until rescued, or die from thirst with our bones left to bleach in the burning sands.

Although I was in both physical and mental torment, I spoke not a word of it to Ruth, for I knew that to tell her would avail us nothing and would only frighten her.

### The First Spill

As near as I am able to tell, it was at a point some 30 miles west of Victorville that we took our first spill. We came down over the side of a mountainous dune at terrific speed, and due undoubtedly to my inability to see distinctly where we were going, we piled into a bank of fine alkali, the handle bars twisted out of my hands and we rolled like a couple of ten-pins when a spar is struck.

No damage being done, we dragged the machine out of the alkali, and we managed to start again. For the next 15 miles we never got out of low gear. Going it half-blind, it was just a case of making a guess at where the best going was, pumping oil and with the throttle half open, sliding in every direction, but for the most part ahead. It seemed that this stretch would never end, but it finally did, and we found ourselves on the edge of one of those phantom lakes that have driven many a thirst-perishing person into insanity.



**On the Boulevard Leading from Los Angeles**

### See Mirage of Lake

When we first caught sight of it, from a distance of two or three miles, it appeared to be a beautiful body of water, miles in length, and so wide that the other shore was almost invisible; but, alas! Upon coming to it we found our beautiful "lake" to be only a mirage hanging over the dry bed of what had in prehistoric ages probably been the bed of a lake.

It was some six miles across this dry lake, where the ground was cracked up like broken saucers. The dried discs of hard adobe broke under our tires with a perfect roar, and occasionally we would snap and throw a piece high in the air. The going, however, was fine, and it certainly was a pleasure to get into hign gear again and open the throttle.

**(To be continued)**

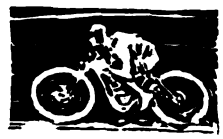
# Student and Speed Merchant

## What the Racing Game is Doing for Me

By BOB PERRY



THEY call me "the student" on the track—and I'm proud of it. Some people are inclined to look down on the professional speed merchant who spends many of his best days in chasing the bacon, and wonder what's to become of him after he has been relegated to the ranks of the "has been." But the right sort of fellow can make good use of the cash he nails, and put it to work in helping him to shape a really worth-while career.

### His First Experience

Perhaps I didn't look upon the racing game in just that light when I started to whip up the dust. I well remember how the speed demon first flirted with me out in Joliet, Ill., about the early part of 1911, when a kind-hearted owner of a single cylinder Armac allowed me to try out his machine on the local dirt track. He told me not to open up until I had gone twice around the track, but just as soon as I hit the first turn and got into the back stretch, I just naturally opened up everything and flattened out on the tank, expecting to smash all the records in creation.

When I got round to the grand stand, I saw the owner of the machine frantically waving his arms for me to stop. I did so and he promptly took the mount away from me, although I had only raced at a speed of thirty to thirty-five miles an hour. But the crowd, not at all used to a real display of "mile eating," went wild at my performance and thought that I had made the Empire Express look like a freight train on an up grade.

### Along Comes the Speed Demon

This experience, together with the fact that I lived near a track where all the local motorcyclists were wont to exhibit their prowess, thoroughly embedded the speed mania in my system. In the Fall of 1911 I became the proud possessor of a single-cylinder, belt drive Excelsior, and rode it for all that I could get out of it and every moment that I could spare for the exciting pastime.

In May, 1911, I saw the races at the Hawthorne track in Chicago, in one of which Harry Nixon was killed. It might seem that this would have put a damper on my racing ardor, but, on the contrary, after those races I felt more determined than ever to ride one of the big twins some day. During the summer months I did considerable practicing, both on mile and half-mile tracks, and met my first accident when I smashed my left foot trying to hug too closely an inside fence.

### Six Entrants—Sixth Place

My first real race was ridden on July 30, 1911, in which there were six entrants, and I managed to get sixth place. That was nothing to brag about, to be sure, but in the next race, on August 20, of the same year, I was more than pleased in winning two firsts, two seconds and one third, with a single, belt drive, at Aurora, Ill. What made me as happy as a lark was the beating I gave Shorty Matthews in the last race of the day, a ten-mile handicap. Matthews was riding an open port; but it is only fair to state that I was given a pretty long lead.

The next year saw me as eager as ever to get in the big races. I saved up and

Bob Perry

bought a new belt drive, single, and on May 30, in a race meet in Joliet, I slipped into fourth place in a century grind for single-cylinder machines and accounted for second honors in a ten-mile open. It was there that I first met "Happy" Allen, of Odell, Ill., who won the ten-mile open.

### Not All "Silk"

But racing wasn't all "silk." While breezing around the track at Minooka, Ill., on June 19, 1912, I fell and dislocated my left wrist. In a couple of weeks I was again in good shape and participated in the Independence Day races at Fairbury, where I became acquainted with Carl and William Goudy, both of whom were riding Excelsiors. While none of us anticipated anything of the sort at the time, it turned out that a year later, Carl Goudy, "Happy" Allen and myself took in a number of races together and rode as an Excelsior team.

Two third places were the best I could get at the August 4 races held under the auspices of the Joliet M. C. The tables were turned a few weeks later when I captured three firsts and one second at Braidwood, Ill., still riding a single-cylinder machine. This closed up my racing season for 1912, and I was more determined than ever to have a real "hot one" for 1913.

### Buys Big Twin

Giving in my old single in part payment, on March 4, I purchased a twin Excelsior, against the advice of my friends, who claimed that a twin was much too heavy for me to handle. During May the Joliet club held another race meet and the dealer at Joliet, for whom I was working, pursuaded the Excelsior factory to send on a stripped stock machine for me. This was done and on the stripped stock, I won all the races except one, in which I took second place. Messrs. Cravens and Walmberg, of the Excelsior factory, attended these races and decided to let me show my mettle again at the Rockford races, held in the early part of June, 1913. I won the majority of the events there and also made my first successful attempt on an open port racing machine.

### His First Road Race

Two tumbles and a cut under the chin were my winnings in the Terre Haute, Ind., one hundred-mile feature, while later at Columbus, Ohio, I romped home a couple of firsts. My first road race was at Elgin, Ill., where, on July 4, I participated in the two hundred and fifty-mile grind. I had wanted to win that race more than any other in which I was entered. But the jinx stopped me. After leading for nearly eight laps my cam shaft loosened and I was forced to withdraw. After that I attended a number of races in Joliet.

My first real mark in the racing world was made when I fought the late Charlie Balke in the national championship races at Denver, Colo., in the middle of the 1913 season. In the ten-mile title race I took second place, first going to Balke, but in the next race I succeeded in reversing the order, taking the ten-mile open from Balke. A new world's ten-mile dirt track record and the capturing of every open event was my performance for the following day. During the remainder of the summer I rode at Fort Wayne, Indianapolis and Richmond, Ind., Columbus, O., and at Rockford and Chicago, Ill., and was fortunate enough to win a majority of the races entered.

With a nice bit of money tucked in my wallet, the latter part of September, 1913, saw me enter within the "sacred" halls of learning of the University of Illinois Engineering School. After putting in some hard licks at college, I made a hurried trip to Savannah, Ga., to participate in the three hundred-mile grand prize race on Christmas Day. I won that race and returned to college,

Digitized by Google

staying there until the middle of April, when I went to Sacramento, and won the five-mile championship, defeating Balke again, in addition to capturing every other race of the day, except one, in which I sailed across the tape second. I then returned to college until June.

Early in the summer of 1914 I attended the Chicago M. C. race meet, but I did not ride, for in one of the events fearless Balke lost his life, and I, like practically all the racing men there, refused to ride in deferrence to the memory of a splendid racer whom we all respected and loved as a brother.

The following week I fell while practicing at Toronto, Canada, and sustained injuries that prevented my riding until July, when I entered the races held at the St. Louis convention of the F. A. M. But I was urgently advised both by my physician and friends to keep out of the races and I followed their wishes. My next riding was done at Indianapolis and Milwaukee, but at neither place did I make a good showing.

On invitation I attended the races at Winnipeg, Canada, to participate in the Canadian championships. In spite of my invitation I was barred after I had arrived there and was only permitted to ride in the open events, most of which I captured. From Winnipeg, I went to Hibbing, Minn., one of the livest towns on the map, where I got in a fifty-mile road race and won all the events on the card. After a number of unimportant races, winning some and losing others, I hopped on the train and rode into Columbus, Ohio, to enter the one hundred-mile national championship. I thought this race was going to be an easy win, when about fifty yards from the finish my tire blew out. My last race for 1914 was at Savannah, on Thanksgiving Day. After a discouraging start, I had trouble with my chains and finally finished in fifth place, the event being carried off by my team mate, Joe Wolters.

The races of the current season I presume are sufficiently fresh in the minds of motorcycle fans and I shall not try to make my story unduly long by recounting those in which I took part and in each of which I rode an Excelsior, my good old friend, for which I feel an attachment that nothing can sever.

The racing demon has not deserted me yet—no, not by a long shot! For I still need the bacon with which to lay the foundation for good professional knowledge of engineering. And if ever the day comes when I shall be hailed as a second Col. Goethals, I must give due credit to my speed merchant career.

### RECORD TIME TO BEDFORD

Pittsburgh, Pa., October 25.—Lou Crist, riding a 1915 three-speed Indian, captured a match race on October 17 against Walter Gregg, also a wigwam follower, by covering the 200 miles to Bedford and return in the record time of four hours and fourteen minutes. Gregg completed the grind fully forty-one minutes after the victor. The start was made about six o'clock in the morning in a dense fog, which obscured the road and made the going dangerous. Crist had no trouble of any kind, while Gregg, who defeated Crist in a similar race one month ago, had a couple of spills, ran out of oil once, and saw his machine catch fire at Ligonier.

### BREEZE WINS AT MASON CITY

Mason City, Iowa.—J. Breeze, on his Indian, carried off first honors in the ten mile open, and came second in the five mile event, at the meet held in this city on October 20. Breeze's time for the ten miles was 12:20. Slaby, on a Cyclone, won the five mile event, which was for stock mounts. In the ten mile open, Eggart, Excelsior, came a close second to Breeze, and Whitcomb, Indian, was third. The time made in the ten mile race was considered very fast considering the condition of the track.

### KENOSHA M. C. PROGRAM

Kenosha, Wis., October 19.—Otto Kuball, of this city, was the bright and shining star of the race meet held at Ideal Park, under the auspices of the Kenosha Motorcycle Club, Kuball taking three first places, but losing the last race by a margin of two seconds to Paul Jacobsen. The fastest time was made by Eddie Harmer, who covered the mile in 54 seconds. The fine weather brought out the best crowd that has ever attended a motorcycle meet in this city.

# PERRY CLEANS UP NARBETH EVENTS

**Takes Four Professional Races, with Klebes a Good Second in Each—Bessinger, Harley-Davidson, Proves to be a Crack Amateur.**

NARBETH, Pa., October 23.—Bob Perry astride his Excelsior took the premier honors in all the professional races which were held here on the Belmont track on Saturday, October 16; while John Bessinger, Harley-Davidson, of Chester, Pa., accounted for the majority of the "simon pure" events.

Besides coming within two-fifths of a second of breaking the track mile professional record set up by Harry Klebes last year, Bob captured all four of the professional events—the five-mile, fifteen-mile, ten-mile and twenty-five-mile. Harry Klebes, Indian, won second place in the cash chasers races. It was a nip and tuck affair when both these stars sped around the track, and Perry's superior ability to negotiate the turns was the deciding factor.

The big surprise of the day was the performance of John Bessinger, who, clinging to his Harley-Davidson, captured the five-mile amateur, ten-mile and the time trials. He had a hard time winning the five-mile, for he got away to a poor start, being one-quarter of a mile behind the field; but he managed to open up a pretty wide gap at the finish. The summaries:

Five-mile novice race—Won by A. Vighetti; second, Dipman. Time, 5 minutes, 54 seconds.

Five-mile amateur race—Won by John Bessinger, Harley machine; second, H. G. Rose, Indian; third, Jack Muntz, Indian; fourth, Richard Jocker, Harley. Time, 5 minutes, 7 seconds.

Five-mile professional race—Won by Bob Perry, Excelsior; second, Harry Klebes, Indian; third, Glen Stokes, Excelsior; fourth, John Empfield, Excelsior; fifth, Pancoast, Emblem. Time, 4 minutes, 15 seconds.

Ten-mile race for amateurs—Won by John Bessinger, Harley; second, John Muntz, Indian; third, H. G. Rose, Indian. Time, 9 minutes, 47 seconds.

Ten-mile race, for professionals—Won by Bob Perry; third, John Empfield, Excelsior; fourth, Glen Stokes, Excelsior. Time, 8 minutes, 33 seconds.

Fifteen-mile professional race—Won by Bob Perry, Excelsior; second, Harry Klebes, Indian; third, John Empfield, Excelsior. Time, 12 minutes, 36⅘ seconds.

Amateur time trials (one mile)—Bessinger, Harley-Davidson, won (time, 54 seconds flat); second, John Muntz, Indian (time, 1 minute, 1 second); third, A. Vighetti, Indian (time, 1 minute, 6 seconds).

Professional time trials (one mile)—Won by Bob Perry, Excelsior. Time, 48⅗ seconds). Perry came within ⅖ second of Harry Klebes' record of 48 seconds, made here on an Indian last year.

Twenty-five-mile professional race—Won by Bob Perry, Excelsior; second, Harry Klebes, Indian; third, Pancoast, Emblem. Time, 20 minutes, 53⅗ seconds.

### BELL COUNTY FAIR RACES

Midway, Texas, October 15.—Motorcycle races proved to be the most attractive features of the Bell County Fair held at Midway, Texas. They were witnessed by an audience of over five thousand enthusiastic motorcycle fans from all over the state. Results were as follows:

Five miles, free-for-all.—Won by A. C. Hilliard, Excelsior; Fred Luther, Indian, second; John Bozeman, Excelsior, third. Time, 6:59⅖.

Ten miles, professional—Won by Fred Luther, Indian, first; Sam Corenti, Harley- second; John Bozeman, Excelsior, third. Time, 12:4. The races were under the auspices of the A. F. M.

### SAN ANGELO FAIR RACES

Motorcycle races will be held on five days in connection with the San Angelo (Texas) Fall Fair, to be held November 2-6. The program will be staged under the auspices of the San Angelo M. C and with F. A. M. sanction. There will be three races Tuesday, Wednesday, Friday and Saturday of the Fair week, and two events on Thursday. Entries close on November 1.

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## ARGENTINA REQUIREMENTS

According to the American Consul at Rosario, Argentina, the principal demand for motorcycles in his district appears destined to come from the country districts, for which twin cylinder seven and eight horse-power American machines are receiving the preference. While roads cannot be called good, the country is level except after heavy rains, and negotiable by motorcycles.

As regards bicycles, local requirements are for a strong, well-built machine, with a handle brake. Coaster brakes are used comparatively little. Rubber pedals are preferred. English bicycles lead the market and the principal objection to other makes is apt to be that they are too unlike the English. One dealer cites the case of a shipment of German wheels which gave little satisfaction for that reason. At his request the manufacturer made necessary changes to conform to the English type and the dealer has since then carried German bicycles in stock. This is of interest as illustrating preference for English wheels, on the one hand, and the readiness of German manufacturers to comply with local requirements, on the other.

Bicycles retail at from $42.50 to $85. The latter price is paid for Italian racing machines. The most marketable bicycle costs from $50 to $60, selling at the factory from $16 to $20. The duty on bicycles is high, $10.42 each, including surtax. Freight and packing are an important factor. Importers state that breakage is frequent. The Consul believes that if an American wheel can be placed in the dealers' hands for $30, it will find a good market, provided it is well built and gives satisfaction under hard usage.

## GENERAL CONDITIONS IMPROVED

As indicative of improved conditions in the South American countries, a record of commercial failures in Argentina during the first eight months of 1915, as compared with the first eight months of 1914, shows a most encouraging reduction every month. The total liabilities involved in the failures during the first eight months in 1914 were $115,000,000. For the first eight months this year, liabilities total only $51,000,000; in other words, a reduction of more than sixty per cent.

## HOLLANDER OFFERS SERVICES

From Arnhem, Holland, comes a letter stating that a Hollander of business experience, fifteen years in the cycle trade, and with good connections among Dutch and Belgian jobbers and manufacturers, wishes to represent American cycle and accessories manufacturers. The writer states that the present situation in Holland offers exceptional opportunities to cycle makers in this country, as the demand there cannot be met for some time to come by Germany or England. Manufacturers who are interested in this opportunity to obtain a representative of experience in Holland are invited to communicate with **Motor Cycle Illustrated.**

## CANADIAN CONDITIONS BETTER

Reports on labor conditions throughout Canada this fall indicate that unemployment has been very considerably relieved as compared with last year. At present there is comparatively little unemployment in urban centers, except in two or three cities in the far West. The outlook for the coming winter is considerably brighter than it was this time last fall. In this connection, it is interetsing to note that at the present time there is not a single strike or labor dispute of any magnitude in the whole Dominion and that wages remain steady.

## FAIR MARKET IN CHILE

Although neither the bicycle nor the motorcycle has been used to any great extent in Chile, we are informed by the American Consul at Valparaiso, that interest in motorcyling is increasing and that the market may be considered a fair one from the standpoint of the American manufacturers.

## SEEKS AGENCY IN HOLLAND

That there is plenty of activity in cycle trade circles in Holland is indicated by the number of letters received of late from companies anxious to represent American motorcycles, bicycles and accessories. Among the latest communications to reach this office is one from Rotterdam, Holland, which states that "a large Dutch firm wishes to have the sole agency for Holland of a good American motorcycle." Those interested are requested to address "W. Z. D.," Care Nifgh and Van Ditmar's Gen. Adv. Agency, Ltd., Rotterdam, Holland.

## A WEEK'S EXPORT BUSINESS

Exports from thirteen principal customs districts of the United States, for the week ending October 2, totaled in value $67.749.531, as against imports valued at $32.279,809, showing a favorable trade balance for the week of $35,-469,722.

## A NEW ZEALAND MARKET

T. M. Lane & Sons, Ltd., Kings Drive, Auckland, New Zealand, are in the market for magnetos, spark coils and storage batteries for automobiles, motorcycles and marine and stationary motors.

## MOTORCYCLES IN CARDIFF, WALES

According to the American Consul-General at Cardiff, Wales, there are something like 3,000 motorcycles in use in that district. He is of the opinion that under present conditions, the opportunities for trade in American-made machines are excellent. He suggests that American manufacturers desiring to enter the field, send over energetic representatives to appoint agencies among the leading dealers. By way of explanation, the Consul says:

"During the last few months, quite a number of American motor car manufacturers, especially those offering runabouts, have done quite a large business over here. In most cases they have sent across direct representatives who have supplied machines for trial to dealers of repute and have given them favorable terms. Purchasers will not send cash against bills of lading, or take any risks in regard to ocean transport, but they will willingly pay promptly for goods that they have an opportunity of seeing and trying before purchase. It is probable that the opportunities for the sale of American-made bicycles are not quite so favorable although there is no doubt a good field is open for business effort in this direction. There is also a growing shortage of accessories."

## GAINING IN MARTINIQUE

While the imports into Martinique are steadily increasing and France and the United States continue to supply 85 per cent. of the products, the percentage furnished by France is decreasing, while imports from the United States are increasing. During 1914 France supplied 48 per cent. of the goods imported into Martinique and the United States about 36 per cent.

## ITALIAN BIKES IN TRIPOLI

According to the American Consul at Tripoli, North Africa, motorcycles have made little headway in that part of the world. Quite a number of bicycles are in evidence, many having been brought from Italy by their owners, others acquired locally. Tripoli dealers now handle Italian bicycles that retail for from $25 to $40.

## WAREHOUSES NEED RESTOCKING

Importers' warehouses in New Zealand contain smaller stocks at this time than for many years. Consul-General Alfred W. Winslow, at Auckland, advises that "there is nothing promising as yet from the European supplies, which leaves a great opening for American goods. This opportunity should be taken advantage of by American exporters, by going after the business in earnest."

## ACTION OVER TWO-COLOR GOGGLES IS NON-SUITED

JUDGE HAND, sitting in the United States District Court for the Southern District of New York, on Monday, October 11, rendered a decision which is of vital importance to those who make goggles and eye shields and those who sell them alike. The suit was one brought by the American Spectacle Company and John U. Barr against Strauss & Buegeleisen, both New York goggle and spectacle makers, on a patent granted to the said Barr on spectacles of the type wherein two colors are combined on a single lens, a construction much used in automobile goggles at the present time. After taking the testimony of the plaintiff Judge Hand non-suited the case, not even waiting to take testimony from the defendants. The American Spectacle Company and Barr had claimed that Strauss & Buegeleisen had infringed the patent.

## WHEN WALKER'S DIXIE DEFIED MUD AND WATER

AFTER putting more than 30,000 miles behind his Indian sidecar outfit, over more varieties of bad roads than any other motorcycle tourist ever traversed in a similar period, Walter F. (Jimmie) Walker, the Weed Chain Tire Grip Company's hardy missionary, could think of nothing more remarkable in connection with his trip than the ignition service, which he obtained flawlessly throughout. On one stretch of the route Walker's outfit was ditched repeatedly because of the hub-deep ruts and the numerous miniature lakes, ranging from six inches to two and three feet in depth, and finally after going through a water splash which drenched him to the waist he relinquished all hope that his carbureter would continue to "carb" or his magneto give him another spark. Then came, as the hardy Weed traveler puts it, "one of the biggest surprises of the five-months' journey."

"Somehow," writes the redoubtable Walker, "after I had reassembled the carbureter and dried the plugs (even yet I can't quite fathom the mystery), my motor roared on the first kick, thus proving that my Dixie magneto had come through in fine shape, although it had been submerged for more than two hours.

"While the whole outfit stood up to the terrific strain without a whimper," Walker continues, "it is only fair to say that nothing excited my admiration oftener than the performance given by my magneto. But for its consistent service through mile after mile of slimy mud, and other miles of flooded roads, I might still be fighting the elements somewhere in the Middle West."

## EXPERT GIVES FIGURES ON CRUDE RUBBER OUPUT

Akron, O.—One of the experts of the Goodyear Tire & Rubber Company states that the world's production of crude rubber this year will reach 142,000 tons, a substantial increase over that of 1914. Of this total, 75,000 tons will be used in the United States, and out of this 75,000 fully one-half will find its way into the rubber factories in this city. The acreage of plantation rubber for 1915 is about 1,330,000 as compared with 75,000 in 1905.

By reason of the lower cost, the production of plantation rubber is progressing more rapidly than the output of wild rubber and now comprises close to two-thirds of the world's output.

Near Battle Creek, Mich., Typical of Roads Traversed by Walker on Recent Trip

## WINDOW DISPLAYS FEATURE CHARLES GOODYEAR

AGENCIES throughout the country, as well as Goodyear branches, now are featuring the second in a new series of special displays prepared by the Window Display Department of the Goodyear Tire & Rubber Company. A week ago the display featured a section of the Brazilian jungle, showing where and how the rubber trees grow, how the valuable "blood" or latex (crude rubber) is obtained from the trees, and how crude rubber from various parts of the world looks, when it is ready for shipment. A big feature of the display was a portrait of Charles Goodyear, who discovered the method by which crude rubber was made commercially valuable.

The present display is based on the premise: "If Charles Goodyear could return." Goodyear died in poverty. The world wasn't ready for him then. But the industry as it is now known is largely the result of his discovery. Following out this idea, the Goodyear company has sought to show in the present window display the great variety of articles now manufactured by it, to indicate the vast strides taken since Goodyear's time. Some 44 window cards, designating different articles, are part of the display, which includes automobile, motorcycle, truck, bicycle and carriage tires, and a varied line of rubber goods.

## APPEAL COMPANY WILL DISTRIBUTE MOTOR WHEEL ON COAST

Milwaukee, Wis., October 15.—For the 1916 season, the Appeal Jobbing and Manufacturing Company, of Los Angeles, Cal., according to an announcement just made by the A. O. Smith Co., will handle the distribution of the Smith Motor Wheel in Southern California and Arizona. This same concern is also the distributor for the Harley-Davidson and carries a complete line of bicycles and accessories. J. A. Benson, who boosted the motor attachment on the coast last summer, has joined the Appeal Company, and will have full charge of its motor wheel section. In spite of the fact that he got a late start, Benson says that he sold 329 of the little boosters last season. Benson is an old bicycle man, and has had a broad experience on the coast in both cycle lines.

## NORMAL SCHOOL OFFICIAL VISITS DAYTON PLANT

Dayton, O.—J. P. Culbertson, of the executive staff of the State Normal School, of Eastern Kentucky, was a recent visitor to the factory of the Davis Sewing Machine Company, in this city. He stopped over on his way from Richmond, Ky., to points on Lake Erie. He rides a Dayton twin mount, using it in preference to all other forms of transportation.

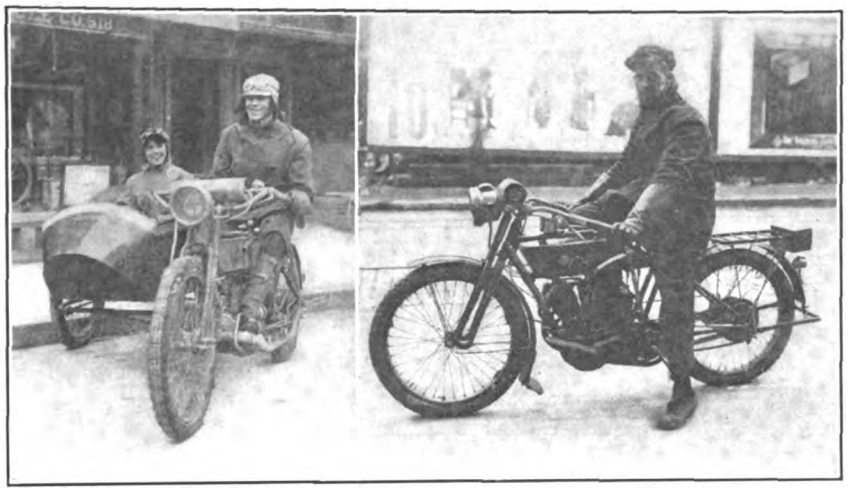
## ONLY TWO CONTESTANTS FINISH MUDDY ST. PAUL RUN



**Left, Carl Boyer, Henderson, with Mrs. Boyer in Sidecar, First to Finish; Right, E. Sandberg on His Reading-Standard Twin, the Other Survivor**

ST. PAUL, Minn.—Carl Boyer, with Mrs. Boyer as sidecar passenger, on his Henderson outfit, and E. Sandberg, Reading-Standard twin, riding solo, were the only ones to finish the endurance run of the St. Paul M. C., held on October 3. The course, 161 miles in length, led through Forest Lake, Center City, Rush City, Braham, St. Francis, Anoka and Minneapolis. Roads were very muddy, due to a week of steady rain.

There were nine starters in the run, but much rain and mud-wallowing eliminated seven at Rush City and Braham. Sandberg on his Reading-Standard struggled on, making the last 80 miles in a downpour. He lost his starting chain and had to make running mounts every time he started, and finished so exhausted he could hardly stand. He came in one hour—55 minutes late, having covered the coures in 10 hours 10 minutes. The Boyer combination came in 50 minutes late.

The first prize of a Corbin-Brown speedometer was awarded to Carl Boyer, and Sandberg got the second premium.

Mr. Culbertson was enthusiastic over roads in Ohio, and spoke at length over the possibilities of riding with the development of the new lightweight machines this year. He paid great tribute to the hospitality with which he was received at the factory where Dayton twins and motor bicycles are turned out.

## BIG VITALIC FAMILY STILL GROWING

One more enthusiast was added to the Vitalic family of boosters when, on October 6, J. C. Zeffer, representing the Continental Rubber Works in the South and Southwest, was married to Miss Nellie Brabender, of Erie, Pa. The popularity of both brought together a large number of their friends who gave them a hearty farewell as they left for an extended trip over Mr. Zeffer's territory.

## GOODYEAR MANAGER WINDS UP TRIP

Owensboro, Ky., October 25.—A. W. Ellis, Louisville manager for the Goodyear Tire & Rubber Company, has just returned to Owensboro, Ky., and other cities in the western section of the state, where he reports he closed up some nice orders for motorcycle and bicycle tires. Conditions in the western section of the state are good and the outlook is for a substantial fall business.

## RUHLE ON HIS ROUNDS

Springfield, Ill.—William J. Ruhle, Harley-Davidson traveler, visited this city on his first trip through his new territory. Ruhle was formerly traveler for New York, New Jersey and Pennsylvania in Harley-Davidson interests, but entered business with a partner in Albany, N. Y., in 1914. He returned to the fold recently, and is now covering Illinois and making new friends.

## GOODYEAR MEN AS SHARPSHOOTERS

A rifle range has been completed on Brittain road, Akron, O., where upwards of 100 members of the Goodyear Rifle Club, organized this year, are holding weekly target practice under the regulation of the United States War Department. The club was organized by C. R. Johnson, assistant factory superintendent.

## CREDITORS HEAR REPORT ON JOERNS COMPANY

ST. PAUL, Minn.—Creditors of the Joerns Motor Mfg. Co. met October 19 and heard a report from a representative of the David Quail Company which has just completed an audit of the business. The report stated that the real estate and manufacturing plant was valued at $36,000, which is regarded as a liberal estimate. The plant, together with the machinery, all fixed tools and the power plant is mortgaged for the purpose of securing an issue of bonds amounting to $21,500 held by the Capital Trust and Savings Bank, of St. Paul. The accrued interest on the bonds is about $1,000.

The total available assets on July 31 last amounted to $32,726.91. Among the items are accounts receivable to the sum of $1,361.97; material in process of manufacture to the value of $18,943 (if completed into motorcycles); merchandise at the branch store, $3,950; raw material, $3,332; patterns and drawings, $1,167.67, and smaller items ranging from two to eight hundred dollars.

It is stated that the material at the branch is made up of supplies and parts for the former Thiem motorcycle, and the value of this material as well as of the rough stock in hand and the patterns and drawings depends upon whether arrangements can be made to continue manufacturing operations. The total liabilities of the company are given as $130,433.52. The heaviest item under this heading is $52,557.56, which is due Fred Joerns for salary and money advanced to the corporation.

There are no plans at present for continuing the company, but Mr. Joerns has expressed the belief that some suitable arrangement can be worked out in the not distant future by which the company can at least take advantage of the materials in hand and thus keep them as assets.

Automobiles and motorcycles constitute 83 per cent. of the vehicles passing over Massachusetts roads, according to a census of vehicles just completed.

# SOCIAL RUNS VS. THE ENDURANCE VARIETY

## Factory Man Makes Instructive Comparison of Road Contest and Pleasure Jaunt

By PATHFINDER

"BILL, you're just in time."

A dusty but well dressed motorcyclist pulled up in front of Jimmie Saxe's store. His machine bore a license number from another state. At the sight of him the half dozen loungers in Jimmie's front window languidly sauntered out to the curb to exchange greetings and ascertain the stranger's wherefrom and whereto.

Meanwhile Jimmie had spotted the new arrival, and came running down to the curb with outstretched arms. It was Bill Hatch, factory man, and Jimmie's heart was gladdened by the sight of him. "Boys, I want you to meet Mr. Hatch; represents the factory, you know."

"But why am I just in time?"

"Well, you see, I forgot to tell you in my last letter. The club has arranged for an endurance run day after tomorrow You're just the man we need to help bring through a good percentage of our machines with perfect scores. You don't mind, do you?"

"Oh, no," but there was a trace of vexation lurking at the corners of Bill Hatch's mouth. If Saxe detected it he never let on. But he did surmise that Bill's acquiescence did not come from the bottom of his heart, as was subsequently revealed when Hatch got comfortably seated in Jimmie's private office half an hour later.

---

AFTER discussing various formalities, factory routine stuff mostly, the talk edged around to the coming endurance run. "Say, Bill, I hope I am not putting you out by asking you to enter that run Sunday. I can see now where you might have had some previous engagement or something. At least I might have asked whether you were disposed toward coming in rather than assuming that you would, as a factory man."

Bill hemmed a little. "W-well, it isn't that."

"What is it then. Come on, come clean; you and I have been good friends for all these years. You don't have to enter if you don't want to. I can press in some of the regulars at the regular rate, you know."

"But that is exactly where the trouble lies," retorted Bill. "You dealers expect too much from the factory man. I have been in too many runs like yours is going to be to hail the prospect with unalloyed joy. It seems just naturally understood that I am going to bring in a perfect score, although the chances against me are as plentiful as against the next man. I'm human, you know. Then there are the other fellows. I'm supposed to get them through within reasonable bounds with perfect scores also. My fingers begin to ache already when I think of the punctures I fixed for helpless guys in the last run I entered—by request.

"Tell me, Jimmie, do you really feel that endurance runs benefit your sales any?"

"Well, er, I think they do. Of course the last one ended up in a wrangle, but we finally got it straightened out to everybody's satisfaction. The referee first awarded the high trophy to George's gang, but we showed him where our protest had the backing of good evidence, and he reversed his decision."

---

"YES, but George was the fellow that came out with the big ads the day after the run announcing that he had won, as I recall the circumstances," came back heatedly from Bill. "George banked on the referee's first decision and hollered his head off, and your fellows—what did they get? And what good did it really do after they got it. The whole affair was stale news then, and all the advertising you could do would not offset the big yell that George let out at the time the run was news."

"Well, we had the facts, . . ." and then they argued back and forth for half an hour, bringing back every detail of the run that had ended in a row.

"Let's go over to the motorcycle club," and Bill pushed a tired hand over his brow. He had ridden 135 hot and dusty miles that day, and was not in much of a mood for argument. "I always did like your club here. Finest bunch of fellows in my territory. How is the club getting on?"

"Oh, so-so. Nothing to crow about. It seems hard to keep the fellows together. Before that last endurance run we never mentioned names of machines at all, but *since then*—" and Jimmie stopped when he realized he had underestimated the evil effects of that endurance run. He was beginning to think that Bill Hatch was right after all. The thing had never struck him in exactly that same light before.

He and George never had the same hearty friendship toward one another since that run, either. George's competition did not have that clean-cut aspect that characterized motorcycle sales before that wrangle run spoiled things.

---

"WHAT your town needs to boost business, and put it back on the clean competitive basis you enjoyed before, is sociability runs, not endurance runs," said the traveling man. "You will find that, with very few exceptions, the towns that harbor enthusiasm for endurance grinds do not have the solidity of friendship among riders and dealers that is evident in other towns where the social side of the sport is boosted.

"Endurance runs are the best little club busters known. They don't create a favorable impression anywhere. The riders dress in the worst-looking clothes

## BADGER STATE CO. LAUNCHED IN MILWAUKEE

MILWAUKEE, Wis., October 22.—The local fraternity regrets the loss of a fine fellow in William C. Chesak, one of the best scouts in the business, who leaves this city to take a position with the Dallas branch of the Hendee Mfg. Co., traveling in Texas, Arkansas and Oklahoma. Chesak was chairman of the show committee of the local club last spring and it was his conscientious efforts in its behalf that made Milwaukee's first exclusive motorcycle show the big success it was. He was head salesman and temporary manager of the Wisconsin Motocycle Co., which went out of business during the latter part of September.

C. H. Hinkley, assistant treasurer of the Hendee Mfg. Co., has been in the city for the past two weeks straightening out the final details in the dissolution of the old Wisconsin Motocycle Co. and getting the Badger State Motorcycle Co., 2220 Meinecke avenue, the new Indian home in this city, safely launched as the new dealer. The Badger people bought most of the machine and parts stock of the old company, while major portion of the accessory stock was bought by Leo Lippow.

The Badger State Motorcycle Co. is one of the oldest motorcycle establishments in the city. R. F. Clarke and Adolph Waech are partners of the concern which hitherto has handled the Reading-Standard and Iver Johnson. They will handle the entire county of Milwaukee for the Indian exclusively it is announced.

## GOOD CROPS; BRISK SALES

Muncie, Ind.—Charles B. Kirk, of Muncie, who has handled the Excelsior line of motorcycles and bicycles since they were first put on the market, has signed up to continue the lines for 1916. Mr. Kirk reports that the motorcycle business was not so good in the last year as it was in 1914 when he disposed of 22 machines up to the month of July. After that date some of the factories ceased to operate on a full schedule and the bicycle business fell off. With the factories working full blast now and the farms producing good crops this year, Mr. Kirk promises to set a new sales record during the next season. Mr. Kirk combines sporting goods with his cycle business with excellent success.

## USEFUL D & D CIRCULAR

Useful gear and speed tables for Indian riders occupy the two interior pages of the latest circular issued by the D. & D. Motor Supply Company, Indian agents, at Radde street and Bridge Plaza South, Long Island City, N. Y. The circular is of four pages, the front cover representing the head of a racing motorcyclist drawn in artistic poster fashion. The table of gears will apply to Indian mounts of all types, no matter what the year. President S. H. Dubon of the company is responsible for the circular, which is furnished to all his patrons on request.

## SIGNS UP FOR HENDERSON

Marion, Ind.—G. C. Harwood, but more familiarly known over Indiana as "Korky," who is the Indian agent at Marion and Anderson, has taken on the Henderson lines at both the stores. Mr. Harwood looked the line over at the Chicago show and contracted for six counties. Harwood is one of the largest dealers in the entire state. His stores are up to the minute in every detail and well stocked. He takes active charge of the Marion store and has G. C. Gadbury to manage the other.

**Indian Agency of Horn & Baird at Minneapolis, Minn.—a Fireproof Establishment on Most Efficient Lines and One of the Most Prosperous in the West**

## MAKING SUCCESS IN CYCLE TRADE

Nashville, Tenn.—One of the most progressive business women in this city is Miss Rosa May Rust, who is secretary and general manager of the Duncan R. Dorris Company, Pope agents. Miss Rust does

**Miss Rosa May Rust**

all the buying for the firm and is a guiding influence in its policies. Through her close watchfulness to the details of the business and her general courtesy, the Dorris firm has more than doubled its business since Miss Rust was connected with it. The Dorris company handles bicycles as well as motorcycles of the different Pope brands.

## TAKE ON TIGER AUTOBIKE

The New York Sporting Goods Company, of 15 Warren street, New York, has taken the distributing agency for the Tiger Autobike for the metropolitan district and vicinity.

## GOES WITH POPE AGENCY

Altoona, Pa.—Dean Finn, of this city, who has made his appearance in many race meets this summer astride the Pope racer owned by Geo. Roth, the local agent for the Pope motorcycle, has accepted a position with Mr. Roth. He will assume charge of Roth's repair shop at once.

## TATHAM'S SALES AT FAIR

Waterloo, Ind.—W. C. Tatham, Harley-Davidson man, showed the 1916 models at the County Fair last week. He booked two orders for fall delivery and several for the spring as a result.

## TIGER AGENCY IN BOSTON

Boston, Mass.—The Cut Price Auto Supply Company, of this city, has signed up with Sales Manager C. S. Beardsley for the 1916 representation in this section of Massachusetts for the Tiger Autobike.

# DEALERS' SECTION

## BREEZY NOTES FROM NEWARK

NEWARK, October 18.—Walter Goerke, Indian agent, was married on the 12th and enjoyed a brief honeymoon trip hastening back to get those '16 models a-rolling over the road.

Carl W. Bush, Harley-Davidson, has two '16 models that are the target of many admiring glances.

Bert Coryell, manager for F. C, Cornish, was approached by several manufacturers at the New York Show and urged to handle their product in 1916. The Yale has been Cornish's line for years. No decision has been reached as yet.

The Newark police have taken a leaf from the Metropolitan police methods book and are cruising 'round the streets in citizen's clothes on Harley-Davidsons, their regular mount being red Excelsiors. As a result of the disguise several speeders have been hailed to court and compelled to "dig deep." C. W. Bush has closed an order to deliver two Harley-Davidsons to the police department by November 10.

## STARR IS LOCAL COMMISSIONER

Big Rapids, Mich.—Ebar Starr, who handles the Excelsior in this city, has been appointed local F. A. M. commissioner for Mecosta County by State Commissioner Scherer.

## RISDEN SIGNS UP AGENT

Bakersfield, Cal.—C. Will Risden, the Southern California Indian distributor, has closed a contract for the 1916 Indian agency in Kern county with the Burges Motor Supply Company. This firm is headed by Jules A. Burges, a young man with quite a reputation for endurance riding and racing. Burges will handle the Indian exclusively, in addition to a full line of accessories and bicycles.

**Jules A. Berges**

**Extensive Establishment of E. E. Stillabower, Who Represents the Indian and Excelsior in Columbus, Ind.—Line-Up Shows Stillabower's Staff and Several Patrons**

## HAGAN BROTHERS MOVE

Rochester, Ind.—Hagan Brothers, Harley-Davidson representatives in this city, have moved to a new location on Main street, in order to better handle the rush for Gray Fellows which has commenced already.

## SAUFLEY AWAITING NEW X'S

Kansas City, Mo.—E. B. Saufley, of the Saufley Supply Company, Excelsior agent in this city, is anxiously waiting for the new 1916 models to arrive. He says that the Chicago Show and the racing results for the year have sold a number of "Big X" models for him, but deals are difficult to close without the demonstrators.

## WILLIS TO OPEN SHOP

Canton, O.—Dan Willis, former racing man, will open a motorcycle shop at 123 Third street, N. W., in a short time. Willis has taken the Stark county agency for the Thor motorcycles and Knight tires, and will handle a line of bicycles and supplies.

## PARTNERSHIP DISSOLVED

Dallas, Texas, October 22.—The partnership of H. L. Flake and Fred Greenhalgh conducted at Houston, Texas, under the name of Houston Motorcycle and Supply Company has been dissolved. The business will be continued under the same name at 1314 Preston avenue, by H. L. Flake.

## NOVEL TIME PAYMENT PLAN

St. Louis, Mo.—Most useful in the line of caring for time-payment sales of motorcycles is the plan adopted by George H. Schmitt, who distributes the Harley-Davidson in this city. Schmitt issues a book like that of the pass books issued by savings banks to each rider purchasing in this fashion. He enters each payment made in the book so that the rider knows just how his account stands at all times. This does away with giving receipts which are easily lost. The record is kept at Schmitt's office, so that a lost pass book can be quickly replaced.

## TO SHOW AT EXPOSITION

Marion, Ind.—Glenn Scott, local Harley-Davidson dealer, is planning to show the new models at the forthcoming Marion Industrial Exposition. He will have all the 1916 types on display if he can find room for them. "Hap" Scherer, of the factory forces, is expected to be on hand during the Exposition.

## TO OPEN IN EAST ST. LOUIS

St. Louis, Mo.—Harry Losser, of the Olive Motor & Cycle Co., Harley-Davidson representative in this city, will shortly open an agency and repair shop in East St. Louis. He will take care of East Side trade from this establishment exclusively.

## FORM PARTNERSHIP

Hudson, N. Y., October 12.—Loren Stevenson and L. T. Stewart have formed a partnership in the bicycle business and will conduct a modernly equipped establishment in the Stevenson block. Stevenson has had a broad experience in selling and repairing bicycles, while Stewart is a newcomer.

## POLICE AND COMMERCIAL SALES

San Francisco, October 21.—John H. Baumgardner, local agent for the Indian line, reports the sale of three 1916 three-speed machines to San Mateo County, for use by the county traffic squad. Baumgardner also reports the sale of 1916 three-speed to W. P. Barruth, city salesman for the Valvoline Oil Company, who heretofore has covered his territory with an automobile.

Algona, Iowa.—R. E. Scroggins has taken on the Indian for Kossuth County, in addition to several lines of bicycles.

# Along Technical Lines

## THE TWO-STROKE MOTOR—MORE DETAILS

### Ease in Timing and Peculiarities in Operation of the Type

By D. R. HOBART

**Second Article of a Series of Three Dealing With the Two-Stroke Motor**

IN the first article of this series, the operation of the two-stroke motor was described and some of its characteristics touched upon. The features wherein the two-stroke differs from the four-stroke type were, however, by no means exhausted in that article, and I shall take up several others, beginning with the timing of the motor. When you read about the latter, you will see just how simple this process is.

With a two-stroke motor of the accepted three-port type, the moving parts are: Piston, connecting rod and crankshaft. There being no valves to be operated, the timing consists of putting the piston and other moving parts in the cylinder and crankcase, or putting the cylinder in place should it have been removed from the motor. That sounds pretty simple, I guess. About the only mistake a man could make in assembling the motor would be to have the piston put on the small end of the connecting rod so that the short groove in the deflector does not come in its proper position to open and close the transfer passage. If the piston was so put on, the motor would not operate at all in some models, or so badly as to cause the user to take her apart to see what was the trouble in other cases. However, if the user notices the location of the deflector short curve with regard to the transfer passage on the cylinder, he need not fear of this happening, and besides, a wrist pin bearing rarely needs enough attention to have to take off the piston.

#### Motor Is Reversible

The fact that the motor is timed when the piston is in place in the cylinder, brings up another feature of the two-stroke motor. It is capable of running in the reverse direction from normal, pretty nearly as well as ahead. In other words, with the conditions correct, the two-stroke motor will run in either direction very nicely, if the spark passes at the plug. This might cause some trouble were it not for the fact that magnetos do not give a spark except when driven in one direction, and so any tendency on the part of the motor to start off backwards is promptly checked. This little point is given for the benefit of those who may experiment in the future with combined lighting and ignition systems which do not employ the magneto principle on two-stroke models.

Cold two-stroke motors have a tendency to four-stroke, that is, they fire every other revolution instead of every revolution until sufficiently warmed. Various reasons have been assigned for this, and it is probable that the whole truth on this point is not known among designers as yet. However, the action is the same as that of a very cold four-stroke motor being started on a thin mixture, and the means of overcoming it are simple. Keep the tickler down, or the air inlet closed, thus giving a very rich mixture on starting the motor and then, if four-stroking manifests itself, it will not last long.

#### Four-Stroking Not a Fault

There is nothing wrong in the motor firing every other revolution—nothing that will interfere with its operation when warm, provided of course that the mixture is right for running, but the change from the pleasing purr ordinarily given off by a two-stroke motor to the pop-pop-pop which calls to mind the single cylinder four-stroke is often misunderstood by the user. He, and I am quoting the motorboat "chauffeur"—the most extensive two-stroke motor user to date—feels that she is not performing well and that there is something wrong, when it is only a question of a few seconds at most before the purr of perfect action will commence. The motorcyclist should have no concern at all on the subject, for there is nothing to worry about in this action of the motor.

This brings us to the question of mixture. Generally speaking, have it quite rich for starting, much more so than with a four-stroke motor. The mixture when running has to be very close to perfect, as the rider is not dealing with leviathan four-stroke twins, to whose ability to burn up the roads a shade too rich or too thin a mixture will not make very much difference. The two-stroke is a small motor for the most part and needs every ounce of power to be gotten out of it when climbing or when going through sand or other heavy stuff, so the correct mixture is very important.

**(To be Continued)**

## USING THE KICK STARTER TO BEST ADVANTAGE

WITH the fitting of a kick starter on many different models for 1916, will come an uncertainty in starting to many riders who have used other means of giving the motor its initial impulses. There is no good reason for this, provided of course that the carburetion is in good order, but the fact remains that there have been "kicks" on this ever since the particular form of starter made its debut in this country. For, except with a very cold motor, a failure to start is generally due to lack of skill on the part of the rider.

#### Drop Valves at Proper Time

Of course, there are always hard-starting motors, but these are usually very uncommon. The fault in starting lies in dropping the valves too quickly or too late in the stroke of the starter. It is an easy matter to drop the valves at the right time and it means a snappy purr-off on the part of the motor in the big majority of cases. The proper point in the stroke to drop the valves is when the motor is being turned over at the highest speed at any stroke of the starter and its gear. This point is very easy to find, it being just as one piston passes the dead centre on compression stroke.

This point as a rule is just before the toothed sector leaves the pinion. The foot will be pretty near the end of the stroke at that time, and an instant later it will be too late, for if the valves are then dropped the motor will rumble a bit and you will have the job to do once again. This is not conducive to good temper or to the pleasure of motorcycling and has caused many a rider to wish for pedals again.

#### Wrinkle for Starting Indian

On the Indian machine you have an excellent guide in the little nicks in the spark control sleeve for kick starting: keep your eye on the nicks and when you feel your foot come down to where the starter arm is horizontal twist the wrist and the motor will bark off as the nicks come around. You can practice this manoeuvre to good advantage in the garage and make it a second-nature proposition when out on the road. But whether you have such a guide or not, a little practice will get you into the way of dropping the valves by instinct when the foot reaches the proper position.

# LITTLE CARE NEEDED FOR STORAGE BATTERY

WITH the increasing use of electric lighting systems on motorcycles comes an increase in the number of users of storage batteries, as these sources of power are part of practically all systems. But, although the storage battery is easy to care for and can stand much abuse, it is very mulish if neglected beyond a certain point and will lay down entirely, to the wrath and expense of the negligent owner. For, neglect of a storage battery spells considerable expense in most cases. It may even amount to replacing the whole battery in extreme instances.

This is not said to "throw a scare" into the present or prospective user of electric equipment, but is a recommendation to give regular attention to the cell or unit in order to keep the same up to the mark. In a system which incorporates a generator, the latter will feed charging current to the battery, but it will not make up the water that is evaporated regularly in spite of the ingenious constructions which are being brought out by the dynamo-sharps. It is in the regular replacing of the water which is evaporated in the cells that the main duty of the user lies, and certainly, the putting in of a thimbleful or two of distilled water is nothing that will strain the muscles or tire the brain of any motorcyclist.

### Keep Up Electrolyte Level

If you look at your instruction book, you will find somewhere in the first part something like this: "Replenish the battery with distilled water so as to keep up the level of the liquid." This is usually a once-a-week job, depending, of course, upon how often the machine is used. It should be performed regularly, and the reason will be understood by reading the paragraphs which follow:

In the first place, any storage cell consists of a series of plates, which are *positive* and *negative*. The plates are kept from touching by *separators*, usually made of wood. On the positive plates are what is known as the *active material*—lead peroxide or oxidized lead. On the negative plates are spongy lead free from oxygen. The electrolyte is sulphuric acid or oil of vitriol, mixed with water. The cell casings are of hard rubber, celluloid or some other substance which is acid proof.

### Action When Discharging

Now when the cell is discharging or giving off current, the lead peroxide on each positive plate is acted upon by the sulphuric acid, and lead sulphate is formed on the plate, with water given off. At the same time, on each negative plate the same lead sulphate is being formed in place of the spongy lead. The result is that the electrolyte grows weaker and less current comes from the cell. If the cell is not recharged, it will become useless, and the maker will have to clean the plates, renew the electrolyte and recharge the cell.

If we stop here, there will be apparently no need of adding water, but the battery has to be recharged in order to get it to give off current. The charging or recharging breaks up the lead sulphate on each plate and restores the material on the positive plates to oxidized lead and on the negative plates to spongy lead. But hydrogen gas in being given off all this time and this absorbs much of the water, and the level of the liquid or electrolyte goes down a little each charge.

### What Low Water Does

If no water is added, in course of time, the plates remain with lead sulphate on them and they may buckle. A sulphated plate cannot always be cured by charging, and in most cases needs to be sent to the makers for rebuilding. A buckled plate means a short circuit and a destroyed cell. Too much acid to the proportion of water may eat off the material from the plates entirely. So you see, adding water will prevent all this trouble, and it is up to you to take care of your battery in this direction. Use distilled water if obtainable, but if not, put in good drinking water, free from iron, salt or chlorine. Any impurities in the water are left behind when the water evaporates, and any metallic substance will cause a short circuit sooner or later.

## GIVING THE NEW MODEL ITS KEROSENE BATH

By DWIGHT B. PANGBURN

IT is generally admitted that nothing is more beneficial for a motor than a kerosene bath, but with the new models it is no easy matter to give one in the usual way. With the old style of pedal machines it was easy to spin the engine against compression. The new ones, however, equipped only with kick starters, lose the momentum necessary to carry the engine over at every return stroke of the starter arm, making it almost impossible to work against compression.

I have found the kerosene bath at frequent intervals, say every 200 to 300 miles, altogether too good a thing for keeping the engine in condition to give it up. As I am no Hercules, I had to do a little thinking. With the old machine I would pedal the back wheel at about 12 miles per hour for a minute or so at a time and repeat about three times, using a fresh charge of kerosene on each occasion. That meant I moved the wheel almost exactly two-tenths of a mile with each injection, or six-tenths in all.

With the kick-starter machine, I put a large-necked (to admit squirt gun) bottle of kerosene in my pocket and rode up a hill nearby, which was about three-quarters of a mile long. The climb insured a proper warmth in the engine. Then I shot in part of the kerosene, grounded the magneto terminals, opened the crankcase drain cock and started coasting. As soon as the machine acquired a little speed I dropped the valves and ran against compression. A third of the way down I stopped and repeated the operation, also at two-thirds. By the time I reached the bottom of the hill the bath was complete—and with the absolute minimum of effort, all that was left to do being to close the drain cock and inject a supply of fresh oil.

A word of advice. If you adopt this plan pick a steep hill. I have found that it takes a grade of about 10 per cent. to 12 per cent. to keep the engine turning satisfactorily against compression.

### PUTTING THE MAGNETO IN TRIM

In looking over the mount for fall use, a little attention to the magneto will generally insure its working properly during the entire season. The small carbon brush which collects the current from the brass ring or "groove" on the armature shaft should have its end slightly roughened by means of a piece of 00-emery cloth or the striking compound on a safety-match box. The platinum points should be cleaned with gasoline and should be adjusted to get the proper gap when opened, by means of the magneto gauge. On four-cylinder magnetos the distributor ring should be detached and wiped down with a gasolined rag and the small brush that distributes the current should be roughened.

### OHIO STATE HIGHWAY ROUTE IS LOGGED BY PARTY

Columbus, O.—The proposed State Highway, linking Cleveland, Columbus and Cincinnati, has just been logged by a party of officials of the Ohio Good Roads Federation and the Ohio State Automobile Association. These two organizations are back of the project to connect portions of the main market and intercounty highways already constructed to establish a through-paved thoroughfare across the State, linking these important centers of population.

It is understood that the co-operation of the State Highway Department is assured with regard to the project. While the proposed highway will link the three most populous counties in Ohio, the money for road-building will actually be spent in the less populous counties where the roads are not already improved. The co-operation of every automobile and motorcycle club and numerous chambers of commerce is to be engaged.

### KENTUCKY ROADS IMPROVED

Louisville, Ky., October 18.—Kentucky motorcyclists are very much pleased with the development that is being shown in Kentucky roads at this time. During the past summer a number of the worst roads in the state were greatly improved, and bond issues are being voted on in various portions of the state in order to build new pikes. The state has made arrangements to aid the various counties in building their roads, and the outlook for road building in 1916 is excellent.

### SUNDAY RIDING POPULAR

Kansas City, Mo.—Sunday rides are becoming popular among the Indian faction in this city, and specially so among the personnel of C. Hanson's Indian wigwam. The advent of the Fall season with its numerous kinds of nuts takes many a party into the country on week-ends, and sacks full are brought back hung over the tanks.

### READING RUN PRIZES

Reading, Pa.—Prizes for the 207-mile endurance run of the Reading Motorcycle Club have been awarded, in the form of gold medals, a follows: Arthur E. Brudereck, first, 989 points; Charles Hart, second, 988 points; William F. Dolch and Alfred Eisenberg, 980 points each. There were 13 contestants in all.

### COLLEGE CLASSES STOP WHEN SIDE SEATERS VISIT SPRINGFIELD

Springfield, Mass., October 22.—Two young men of Syracuse, Wesley Harst and Willard Kinney, farmers' boys, drove through New York State and over the Berkshire Hills on a side seat, single speed Indian, Saturday and Sunday, October 16 and 17, arriving at Springfield at 11 o'clock Sunday. The trip was 256 miles and the young men made it for the purpose of visiting Mr. Harst's brother, Arthur, who is a student at the Springfield Y. M. C. A. College. Classes at the college were broken up for the time being Monday morning, due to the curiosity in the C. & G. side seat machine.

The footrests on the machine are broad and comfortable and were built by Kinney. Coming through the eastern side of the Berkshire, the riders were charged by a huge Holstein bull, but when they braked the machine the bull pulled up short and, catching sight of a brilliant sign in another part of the field, headed for that. The trip otherwise was a smooth one and without special adventure.

# Our Canadian Letter

## CANADIAN SOLDIERS RETURN FROM FRONT

BROCKVILLE, Ont., October 22.—The first member of the original company of motorcycle signalers of the First Canadian Division in France to return home as an invalided soldier is Corporal Dunham, of Brockville, who has been through some particularly trying experiences.

"It may sound very fine to tell about riding a motorcycle at top speed on torn-up roads and across country carrying despatches during a battle," said Corporal Dunham, "but it is hard work. There is no hiding in trenches for a motorcyclist—you have to trust to speed and to luck, if you have any, to pull you through. The enemy used to watch for us and I have seen a number of riders go sprawling along the road when hit by shrapnel. I was never hit by a bullet, but my motorcycle was not fast enough to permit me to escape the German gas at Ypres. The fumes put me out of business, but the doctors say I will totally recover shortly."

Another Canadian motorcyclist, Sergt. A. Dyas, of Toronto, of a motor supply column, describes a number of thrilling incidents in a letter to relatives. "Late one night I was ordered to take a column of seventeen trucks with supplies up to the trenches," says Sergt. Dyas, "and at daybreak when we were about to beat it back I found that three of the trucks were missing. It was up to me to find out about them and I started out on my motorcycle. I am not at all reckless—not at all—except that I ride about 70 m. p. h. over all kinds of roads and have to take all kinds of chances. Suddenly I came to a road, in the search for the three transports, and the sign I read made my hair raise. It read: 'Danger. This road is in the direct fire of the enemy.' I simply had to use that highway, however, and I made a dash to get through. They opened fire on me immediately and I could hear the bursting shells as I sprinted for my life. I came through without a scratch and found that the three trucks had returned by a circuitous route."

Word has been received that Pete Bert Kennedy, of the First Division motorcycle despatch riders, has not been killed as reported several months ago.

### HE IS SERGT. SELF NOW

Vice-President William G. Self, of the Canada Motorcyclists' Association, who appears in the photo above, is now Sergt. Self of the Army Service Corps of the Canadian Expeditionary Forces. Self is now accomplishing one of his ideals of motorcycle military service, he having organized the first motorcycle corps in Canada years ago.

## MORE ENTHUSIASM IS NEEDED IN MONTREAL

MONTREAL, Que., October 22.—The number of motorcycles in use in Montreal increased fifty per cent this year, but yet the total number is about 300—for a population of over 700,000. The majority of the motor two-wheelers sold this season were Indians which were handled by R. A. Radmore, of the Arlington Bicycle Company. This company also disposed of over 1,000 bicycles during the summer. Sidecar sales during the year have amounted to almost twenty, or in the ratio of one sidecar to every five new motorcycles sold.

A lady who wishes to remain anonymous has presented a motorcycle to the second Universities' company, composed of college students who went to France as reinforcements for the Princess Patricia regiment, a Canadian fighting unit. The machine is to be forwarded to the battle zone in North France.

The motorcycle club spirit in Montreal is as dead as the cool side of the moon in winter. There were two clubs here in 1914, but both starved to death and no motorcycle races of any kind have been staged here this year. Several bicycle contests have been run off, however. The dual population of French and English is a formidable handicap in any endeavor to keep a club alive. Individual riders have done considerable touring, the most popular run being over the King Edward model highway to Rouse's Point. R. A. Radmore, the local Indian agent, has returned from a 2,000-mile jaunt through New England and his ride has been the most spectacular yet taken by a Montrealer.

At the opening of the McGill Stadium recently, one of the features was a burlesque bicycle race in which the contestants were required to disentangle a heap of bicycles to which their costumes had been tied in knots. It was the funniest scramble on the card and proved the most popular event of the day.

# Trade and Sport in England

By OLD RAMBLER

LONDON, England.—In all probability some of you have seen, heard or written much on the British innovation of a tax on American automobiles, cycle and parts, but one ought to add a few words to the riot of arguments. Nominally and normally, you might fancy Britishers would welcome an import tax on American goods, but opinions are varied, decidedly so. Those who detest the idea of a tax on motorcycles and other motor goods coming from America while our big factories are unable to produce scuch goods due to making war munitions approve of the new taxation on the grounds—such is one of their arguments—that this will protect our firms while they cannot compete in open market.

But many agents, such as the retailers, garage owners and shop keepers, resent the taxation—33⅓ per cent. *ad valorem*. This pushes the price of a motorcycle, hitherto coming into England at £45 ($225) up to £60 ($300) right away. To this must be added the retailer's profit, of course. The retail vendor's point is this, and it applies to the motorcar equally: There is a demand over here for machines, and as our firms are not able to supply the demand, let us get the goods where we can. When the war is over we will be only too glad to buy British mounts again.

### Taxation May Choke Orders

It is felt that taxation will choke off 40 per cent. of orders that would otherwise be given for American goods, but we shall see what we shall see. Meanwhile, advanced prices are now being advertised, although the new tax was only proclaimed a week or two ago.

There has not been the same rush into the British market by American motorcycle firms during the last fourteen months as by the American automobile makers. If others do come after our business, it is to be hoped they will keep the quality high. The Harley-Davidson and Indian people have sent nothing but first-class goods. Anybody who tries to foist cheap, jerry-built stuff on to John Bull will regret the day.

### The Bicycle Invasion

One cannot help recalling the bicycle invasion by the Yankees in the '90s. I remember one huge warehouse in Liverpool where some thousands of American bicycles were stored—and they were never sold. I never had the courage to ask what became of the monster pile. Beware, then, anybody who thinks of cutting down the quality of motorcycles in order to outdo Britishers in price.

I fancy I've wandered a bit from the original topic, but then I have always been a bit of a rambler. Anyway, the chat is all bearing in important affairs. Some folks have an idea that the new taxation is a hit at American motor products, but those who will take the trouble to read carefully will see that it refers to "foreign" goods. So there are others in this category.

### Tax on Gasoline

Not only users of American motorcycles but all riders of motorcycles will have bigger bills to meet in the future. The tax in spirit (or gasoline) has been advanced 3d. (six cents) a gallon, but what is making the riders groan is that the spirit-magnates have also shoved the prices up. As I write first-class gasoline is going up from 1s. 9d. (42 cents) to 2s. 1d. (exactly 50 cents), of which six cents is advanced taxation by the Government and two cents the jump imposed by the gasoline-emperors. But the users of No. 2 and No. 3 grades of spirit get a still nastier knock, for these have gone up 5d. (10 cents), which includes six cents new tax and four cents advance by the aforesaid crowned heads.

### Why Agent Feels Peeved

The retail agent has good reason for feeling aggravated at these extra costs. He used to get 3d. (six cents) a gallon profit on 1s. 9d. (42 cents), or about 14 per cent. He will still get only his six cents on a half-a-dollar, and this works out at 12 per cent. And the average owner of a motorcycle shop and garage can't pay all the overhead charges on such a margin, so, obviously, he must make profit out of something else. But when he tries to ferret out a way of doing that, he only finds himself faced by other difficulties.

Take, for instance, the sale of calcium carbide for lamps. The sale of this has appreciably gone down because of the lighting restrictions that obtain owing to the war. However, business has a trick of balancing itself for those fellows born under a lucky star. A wholesale merchant told me the other day that a big development in the use of calcium carbide had been noticeable in another direction—that of oxy-acetylene welding. Many first-class garages and repair shops have special apparatus for this, nowadays. It has avoided a fat repair bill in many an accident case. Cracked cylinders were at one time not repairable, but today it is otherwise, to cite an example.

An agent complained to me the other day that he could not get deliveries of motorcycles or anything else from the works for which he is the representative. Then, with a malicious bit of facetiousness, he added, "The only things I can get are advice notes, saying prices are advanced five per cent. or ten per cent." Some concerns have issued two, three or more such warnings to retailers. If the policy is repeated a few more times it will reach to the point of *ad nauseam*, and the advances will just about equal the 33⅓ per cent. advance on imported goods.

### What the Trade Experiences

Let me show by a concrete instance the trials of this period. A trade friend sent £30 ($150) as deposit with an order to one of our biggest British factories and offered to send the other £30 as soon as the machine was ready. Delivery was promised in "about" three weeks, but they grew into three months and the firm then confessed that they were so busy they had no prospects of supplying the motorcycle. Accordingly the deposit was returned. You may guess no factory likes to refund money received from a dealer who offers spot cash, money down, like that agent did.

One of the striking effects of the war concerns second-hand motorcycles. Some of these are realizing prices nearly as high as when the machines were new. I was making some special inquiries at retail depots or shops only last month and they will demonstrate the scarcity of new British motorcycles. "We could sell any number of 1914 models at £40 ($200)," said the representative of a big manufacturer, "if they are in anything like good condition. Motorcycles with superior sidecars fetch £60 ($300)." It's true that many old machines are advertised at $100 or less, but you can depend on it that the buyer very often gets no more than he paid for—peradventure, something less.

# Of a Personal Flavor

Walter B. Brady, formerly with the sales staff of the Maxwell Motor Co., has affiliated himself with the sales force of the U. S. Tire Company. He will be a general sales representative.

S. W. Hartley, production manager for the Standard Welding Company, of Cleveland, O., has announced his intention of resigning on January 1, 1916. His arrangements for the future have not yet been made known.

L. G. Hartdorn, formerly production manager of the Emil Grossman Manufacturing Company, Inc., makers of "Red Head" spark plugs, at Brooklyn, N. Y., has been appointed factory representative to cover territory west of Buffalo.

R. S. Bryant, formerly consulting engineer for the Standard Welding Company, of Cleveland, O., has been appointed factory manager for the big tubing firm.

George Maslen, Indian dealer at Philadelphia, Pa., has been visiting the Hendee plant at Springfield. He will handle the Indian bicycles in addition to the regular motorcycle line.

Another visitor at the Wigwam during the last week was Louis Mueller, of Cleveland, who enlivened his stay in Springfield by placing his name at the bottom of a 1916 Indian contract.

H. C. Forster, who has been advertising manager of the Miami Cycle & Mfg. Co. for some time past, has severed his connection with the makers of the Merkel, his resignation taking effect October 21. Mr. Forster has not announced his plans for the future.

Wilmer Reichert, who has a wide circle of friends in Southern trade circles, has signed up to travel for the Thor in Florida, Georgia, Alabama, Louisiana, North and South Carolina and Tennessee. For some time past Reichert has been an Indian traveler.

G. T. Brummit, who has been traveling Kansas and Oklahoma for the Thor and also conducting a retail store in Topeka for the past year, was killed in a train wreck Saturday, October 16, near Randolph, Kan. Prior to joining the Thor staff Mr. Brummit was for two years attached to the Excelsior traveling force

## MOTORCYCLE SCOUTS FOR PENN. N. G.

Philadelphia, Pa., October 26.—Colonel Charles T. Cresswell, commanding the Third Infantry Regiment, N. G. P., has decided to form a detachemtn of motorcycle scouts, it was announced last week.

The organization of a regiment of infantry contemplates a body of especially trained men, designated as mounted scouts, but on account of the difficulty of securing horses for the use of such a body the National Guard has never been able to organize and train a separate detachment for this work.

Colonel Cresswell, however, has determined to surmount the problem of the horse by enlisting and raining for this service some twenty men who will be mounted on motorcycles and who will be especially trained for scout duty.

## SOCIAL RUNS vs. THE ENDURANCE VARIETY

(Continued from page 27.)

they possess, and further spoil their looks by twining inner tubes around their necks and arms. Their pockets bulge with tools. They look 'all in' before they reach the noon control because they are riding under a strain. They don't encourage others to take up riding for a little bit, that crowd.

"The sociability run, on the other hand, gives the women and children of the fraternity a chance to enjoy motorcycling. The presence of the ladies is an incentive for the fellows to make a good appearance and see that their machines are clean. The sociability run stops in every town to give the natives a chance to ask what it's all about. The sheriff is glad to see this kind of motorcycling. On the other hand, endurance riders sort of rile him up, and he takes it out on everybody.

"The social party doesn't dread punctures. There's plenty of time. And in some sociability runs they have a first-aid squad that takes care of the punctures; and there's a tire car handy for bad blowouts. Why, Jimmie, you people in this town don't know what you have been missing in not going in for this kind of run."

But Jimmie had been doing some tall thinking. "Wait a minute; let's go over to George's place first before we go to the club."

"What for?"

"That sociability stuff of your looks good to me. I am going to get together with George, and see if we can't change that endurance run, and . . ." Jimmie was gone.

"Wait at the club," he called from across the street.

Bill chuckled as he reached for a perfecto and headed for the clubhouse. "This is the best day's work I have done in a long time," he remarked, but when Jimmie returned he found the factory traveler taking it easy on the sofa and blowing smoke rings with every evidence of perfect satisfaction.

### "EARNING ITS OATS"

Allyne M. Freeman, the young motorcyclist, who is shown in the accompanying illustration, is making his Indian machine "earn its oats." Freeman has had an exceptional opportunity to see the world, and now spends a great part of what ought to be his leisure time in lecturing on his trip around the globe. When Freeman is invited to speak anywhere, he doesn't wait for a train to take him to his audience, but hops on his Indian and covers the roads at a thirty-mile per hour clip. He has a record of not having been late at a single lecture, though he uses his machine in all sorts of weather. Freeman was one of the forty-seven boys who, under the leadership of Major Peixotto, of California, were authorized by President Wilson to take a 38,000-mile world trip. As secretary of the party, Freeman visited England, France, Italy, Egypt, India, Australia, China, Japan, and the Philippine and Hawaiian Islands, and has covered much of the United States since.

# AUSTRALIANS WIN FIFTY KILO. RACE

## Corry and Walker Defeat Crack Teams at Newark by Scoring 37 Points—Kramer Beats Goullet in Brassard Race.

NEWARK, N. J., October 24.—Frank Corry and Gordon Walker, two sturdy Australian cyclists, won the fifty kilometre team race at the Velodrome here on Sunday afternoon. (Fifty kilometres is just thirty-one and one-quarter miles.) The race was run on a point basis and these two riders finished up with 37 points, four more than Alfred Goullet and Alfred Grenda, who were credited with 33 points. The third of the Australian teams, Bob Spears and Reggie McNamara finished in third place with 29 points. Fourth money went to Marcel Dupuy, of France and Peter Drobach, the Boston boy, this team accounted for 24 credits. Frank L. Kramer, the national and world's champion, teamed with Jackie Clark, who was once his bitter rival, finished in fifth place with 14 points.

There was quite a bit of scoring to be done before the final winner was decided. To begin with there were three points given to the team winning at each odd mile, the second team got two points and the third received one credit. The team leading the greatest number of laps in the entire race received 20 points, while the duo leading the second largest number got ten points. In the final sprint to the tape the winning team got fifteen points, second team ten points, third team six points, fourth team four points and the fifth team two points.

Corry and Walker led the greatest number of laps during the race and it was this practically gave them the victory. In the final dash to the black mark, Corry doing the sprinting, finished second, this raised the total to thirty points. In the intermediate sprints, this team twice finished first and second once, bringing the grand total up to 37. Goullet and Grenda had to work a good deal harder for their points. In seven sprints they finished first, four times they came home second and twice they were third. In the final sprint home Goullet was run down on the pole by Cameron and could only get fifth place. In this sprint which ended the race, McNamara was first, Corry second, Hanley third, Clark fourth and Goullet fifth.

Walker and Corry stole a march on the rest of the field when they jumped away from the long train at ten miles. They alternated at setting the pace and were enabled to hold the lead from the ten mile mark to the thirteenth mile. By this time they had chalked up a large number of points and gained a good lead for the point honors.

Frank Kramer competing for the first time in the Brassard race at one mile defeated Alfred Goullet in a great finish in which Kramer passed over the line a winner by a few inches. Going into the last lap Goullet was in the lead. He held this advantage to the first turn when he let out with a great burst of speed. Kramer followed him down the back stretch and around the last turn pulling up on almost even terms as they entered the home stretch. "Big Steve" was there with a final kick, which gave him the race.

Fifty Kilometre Team Race, 31¼ Miles (Professional)—Won by Frank Corry, Australia, and Gordon Walker, Australia (37 points); Alfred Goullet, Australia, and Alfred Grenda, Australia (33 points), second; Reginald McNamara, Australia, and Robert E. Spears, Australia (29 points), third; Marcel Dupuy, France, and Peter Drobach, Boston (24 points), fourth; Frank L. Kramer, East Orange, and A. Jackie Clark, Newark (14 points), fifth. Time, 1 hour, 10 minutes, 4⅘ seconds.

The Brassard, at One Mile (Professional)—Alfred Goullet, Australia, vs. Frank L. Kramer, East Orange—Won by Kramer. Time, 2m. 49⅕s. Last eighth mile, 12⅕s.

One Mile Handicap (Amateur)—Won by Chris. Dotterweich, Newark (125 yards); Bennie Zager, Newark (150 yards), second; Fred Knoller, Millburn (100 yards), third; William Keller, Newark (150 yards), fourth. Time, 1m. 56s.

One-Third Mile Novice (Amateur)—Won by John Best, Irvington; Bennie Clark, Orange, second. Time, 44s.

### GRIMM TURNS PROFESSIONAL

Newark, N. J., October 24.—Tommy Grimm, the Irvington boy, who has been riding amateur here all season, turned professional on Sunday when he rode in the long 31¼-mile team race with Eddie Madden as a partner. He only got five dollars out of the long race, which he copped in prize money.

# HOWELL CAPTURES WASHINGTON TITLE

## Close Fight for National Capital Championship Between Victor and Cy Coffman—Races Promoted by Local Dealer.

WASHINGTON, D. C., October 24.—A red-hot finish between Cy Hoffman, the local champ, and L. Howell, the challenger, contending for the title of District of Columbia champion, marked the close of an interesting afternoon of bicycle racing, witnessed today by a crowd of several hundred spectators. Howell captured the title which carries with it a solid gold medal that the title-holder will defend against all eligible challengers.

The occasion was the first of a series of road races promoted by the Washington Cycle Club, the course being over the road between this city and Marlboro, Md. The races started and finished at Bradbury Heights, on the line between the District of Columbia and Maryland, and the race was over a smooth but somewhat hilly stretch of newly-finished bluestone pike. This road is a popular automobile thoroughfare and many machines were passing during the progress of the races. The riders were further handicapped by a stiff wind on their return from the turning point to the finish line. In spite of these handicaps good time was made.

The first event was a 10-mile race for boys under 15 years of age, the course being out 5 miles from the starting line and return. This race brought out the best of the younger talent, boys who daily cover many

Lining Up for the Fifty Kilometer Team Race at Newark

Digitized by Google

bicycles in messenger service. were 9 starters, 3 of them having a minute handicap and the others starting from scratch. The 10 miles were covered by the winner in 37 minutes flat. A motorcycle rider who kept pace with the winner over the final five miles declared that a speed of better than 25 miles per hour was maintained over the straight stretches, and good time made on the hills.

The second event, open to all riders, brought out an entry of 26, of whom two riders started from scratch, the others being given various handicaps up to 9 minutes. The distance was 25 miles, 12½ miles and return. This race was a duel between C. Coffman, the former champion, and L. Howell. The summaries:

First event, 10 miles, open to boys under 15 years: First, Edward Hazelton, time 37 minutes; second, Robert Hazelton, time 39:10 minutes; third, P. Torrens, time 39:45 minutes.

Second event, 25 miles, free-for-all: First, L. Howell, time 1 hour 15 minutes 20 seconds; second, Cy Coffman, time 1 hour 15 minutes 20⅗ seconds; third, R. Darcey, time 1 hour 16 minutes 20 seconds. Coffman and Darcey rode Dayton bicycles, while Howell, the winner, was mounted on a Pierce.

## FRAYSEE-EVERARD WIN FOUR-HOUR RACE

THE Century Road Club of America held its annual four-hour team race at Staten Island, New York, on Sunday, October 25, the affair being run off on a two-lap track. It was only after the hardest kind of plugging that the team composed of L. A. Fraysee and A. L. Everard managed to win the race, covering sixty-nine miles and one lap in four hours, and beating last year's performance of sixty-four miles.

A number of exciting sprints marked the first hour, at the end of which L. A. Fraysee was in the lead. Near the end of the second hour the Fraysee-Everard team was tipped off by its trainer that the time was opportune for "going out after a lap." Fraysee then set a good pace, was quickly relieved by his partner, who opened up a gap which was increased steadily until the speedy pair nailed their coveted lap after eleven miles of stiff going. The end of the third hour, however, saw this advantage begin to dwindle, when a combination was formed that gradually pulled away from the leaders. It required three-quarters of an hour of consistent grinding for the teams of Heisig-Miller and Lock-Hubbard to regain their lost lap. This they accomplished just seven minutes before the four hours were up.

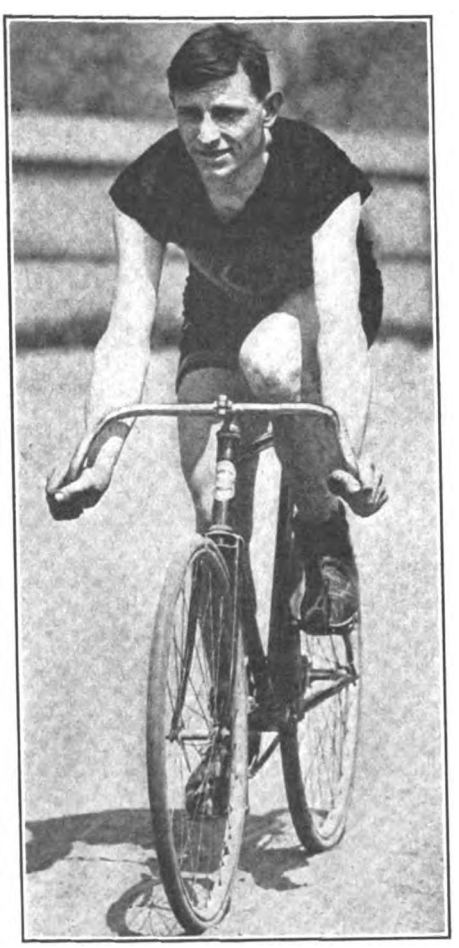
But the point score system obtained, as in six-day races, for the last half hour, so that the Fraysee-Everard team, keeping in the lead until so near the end, captured the race. The day was ideal and the splendid prize list brought out some of the "America's" best riders. Heisig and Lock proved to be excellent sprinters, while Akerman and Reiff showed their sticking qualities, and Hubbard, Kudrle and Muller were dangerous contestants throughout. The winning team cleaned up all the lap prizes. Emile E. Fraysee, the veteran rider, managed the race. The Summary:

| Position. | Team. | Miles. | Laps. |
|---|---|---|---|
| 1. | L. A. Fraysee-L. Everard | 69 | 1 |
| 2. | Heisig-Miller | 69 | 1 |
| 3. | Lock-Hubbard | 69 | 1 |
| 4. | Kudrle-Akerman | 69 | 1 |
| 5. | Reiff-Eisenberg | 59 | 0 |

# McMILLAN TAKES RACE AT TORONTO

### Canadian Vet. Makes Final Appearance Before Joining the Ranks of the Allies in France—Spencer Has Mishap.

TORONTO, Ont., October 25.—Gordon McMillan, the Toronto Bicycle Club veteran, is going away soon to fight for his country. The same McMillan has demonstrated, however, that he is still an expert cyclist and that his enlistment has nothing to do with covering up his retirement from the game. On probably his last appearance in a race, namely in



Gordon McMillan

the first annual road race of the Classic Athletic Club held on Saturday, October 23, McMillan corraled all the chief honors. He won the sixteen-mile grind, over the Danforth avenue course, from the one-minute mark and his time, 41:50, entitled him to the chief time prize as well. McMillan's deadly rival, George Wright, of the Classic club, starting with a 1½-minute allowance, rode into third position, being beaten for second place by C. Coleclough, also of the Classic unit. McMillan and Wright have been arguing about their respective merits all season and the dispute is probably now settled. The real race was between the crack pair.

It is a singular fact that McNamara, of the MacDonald Bicycle Club, who won the Dunlop Classic, was the first rider to reach home in the Classic club's grind, but the scorers discovered that he did not cover the whole route and he was therefore disqualified. The same applies to J. Coleclough of the Classics, who apparently finished in second position.

There were fifty-nine entries for the contest and over fifty cyclists lined up for the dash. The two scratch men were Art Spencer, the Canadian champion, and Norman Webster, both Classic stars. Spencer found a nail on the road and tore a tire. He ripped the rubber from the rim and proceeded to pace Webster his club-mate. He did so at a terrific clip with the result, partly, that Webster took second time prize and landed in tenth place.

A number of racing wheelmen came to Toronto, seven in all, to participate. W. Kernahan, of London, Ont., finished twenty-first and H. Kidd, of Brampton, found twenty-fifth place. The first Classic club rider to finish, C. Coleclough in second place, was presented with a handsome silver trophy, which is his property for a year. About thirty prizes of all kinds were the awards and rewards for the racing. The early finishers were:

| | | |
|---|---|---|
| 1. | G. McMillan, Torontos (1 min.) | 41.50 |
| 2. | C. Coleclough, Classic (2½ min.) | 43.21 |
| 3. | G. Wright, Classic (1½ min.) | 42.22 |
| 4. | F. Harris, Classic (2½ min.) | 43.22 |
| 5. | G. Watson, Classic (2 min.) | 42.53 |
| 6. | P. Brown, H. M. B. C. (3 min.) | 43.53 |
| 7. | R. Golsmith, Salem (2½ min.) | 43.25 |
| 8. | H. MacDonald, H. M. B. C. (1½ min.) | 42.26 |
| 9. | W. Bulger, H. M. B. C. (3½ min.) | 45.25 |
| 10. | N. Webster, Classic (Scr.) | 42.03 |
| 11. | R. Brady, Classic (1 min.) | 43.05 |
| 12. | H. Bounsall, Classic (2 min.) | 44.20 |
| 13. | H. Martin, Salem (2 min.) | 44.21 |

## SIX-DAY RACE FOR BOSTON TO BEGIN NOVEMBER 6

NEWARK, October 22.—A six-day bicycle race will be held in Boston this year and will start on November 6. Manager Johnny Chapman was up in Boston last Thursday and made arrangements for the holding of the affair in the arena. As soon as he got back to Newark he started in signing up riders for the long grind and did not encounter the least bit of trouble. The riders he signed follow: Reggie McNamara and Bob Spears, Francesco Verri and Harry Kaiser, Menus Bedell and Frank Corry, Eddie Root and Willie Hanley, Al Grenda and Freddy Hill, George Cameron and Ray Eaton. Marcel Dupuy has been signed up, but as yet has no partner.

Alfred Goullet teamed with Freddy Hill won the race last season. Goullet has shown a tendency not to enter long races this season, but he may find the lure of the game too strong and mount his bike once more. The addition of Goullet's name to the entry list would add considerable weight.

## EAST ORANGE TO HONOR KRAMER

East Orange, N. J., October 25.—A dinner in honor of Frank L. Kramer, the world and national bicycle champion, will be given at the Woman's Club house Saturday evening, October 30. The principal speaker will be Rev. W. Warren Giles, pastor of the First Reformed Church, whose theme will be "Athletics and Clean Living." The other speakers will be Mayor Mountain and Mayor Redmond.

# ESSENTIALS OF LONG DISTANCE RIDING

## Points That Should Be Considered By All Road Pluggers Who Are Trying to Better Their Work

By FRED M. SANBORN

Holder of National Amateur Road Record for 500 Miles; Southern Records for 100, 200, 300, 400 and 500 Miles

LONG distance bicycle riding should properly be considered under two heads—first, plugging against time or in competition; and, secondly, pleasure riding, touring, etc. In this article I shall first discuss those factors which I believe go to make a successful long distance cyclist of the competitive class.

My wide experience in this form of riding has demonstrated to me that there are few branches of athletics that demand of the participant a greater degree of stamina, both mental and physical. A strong body is, of course, highly necessary, but mental stamina is certainly a very essential qualification.

### "Stick-to-it-itiveness"

By mental stamina I mean those qualities of resolution, determination and perseverance that keep driving the rider on, despite the many obstacles and difficulties that he may encounter—the spirit that will not allow him to quit, but gives him confidence in his ability to put miles and miles behind him, and makes him forget his fatigue.

A rider's physical condition must be such, of course, that he can endure the strain of plugging along the road. Some cyclists are fortunate in possessing this quality in a degree that makes extended training unnecessary to attain the end of sustained long distance riding; but in the case of others the proper physical condition can only be acquired after conscientious and consistent training. I have known of many cases where those aspiring to be road pluggers had, in my estimation, the proper physical qualification, but they lacked self-confidence and never made any real efforts to get themselves into the right trim. And, on the other hand, there are plenty of fellows who try hard, but lack the foundation on which to build. I believe that where a man makes no progress, due to lack of the proper kind of physique, he is just injuring himself when he tries to exceed his capacity for long distance work.

### Frequent Rides Necessary

But I find that most fellows are too lazy to train properly, or else do not know how. Twenty or thirty miles at a fair rate of speed, once or twice each week, and about sixty or seventy miles on a Sunday at a fourteen or fifteen miles an hour clip—such a schedule is sufficient to keep one in the pink of condition, when once this condition is attained. It is well not to overdo the training, frequent rides at short distances being much better than very severe grinds at too infrequent intervals. This, however, is a danger from which few suffer, the average racing man being more prone to under-train than to over-train.

The question of stamina is an interesting one. Many riders who apparently lack nothing physically fail completely under the strain of continued hard riding, while others in possession of what seems to be an inferior physique appear at their best after prolonged plugging. I believe that the fellow who is able to maintain the continued hard pace is the one whose vital organs, the heart and lungs, work in coordination with his muscles, pumping blood and supplying air as needed by them, and whose system is able to throw off the poisons of fatigue so rapidly through the skin and blood that these poisons do not accumulate and clog the muscles so that the rider becomes "joed." Clean living will do much toward keeping the heart and lungs functioning properly.

Fred M. Sanborn

### Determining Proper Position

There are many other important points, such as equipment, gear, position, etc., that must be considered in connection with long distance riding against time and in competition. It is assumed that the cyclist uses a high-grade machine, equipped with fast and resilient tires. The rider ought to keep a position that can be maintained for a number of hours without becoming unduly irksome. This question of position is one which has always struck me as being mighty important and worthy of more attention than is generally accorded it.

The average rider usually dopes out what he thinks is a "fast position," or else he copies from some other rider, instead of studying the position best adapted to his individual requirements. The inexperienced bicyclist has the idea that all the work in riding is done by the leg muscles, but this is far from being the case, as the muscles of the arms, chest and back all play an important part—those of the back especially. The ideal position is one so balanced that the rider gets the maximum "pull" on the handlebars and "push" on the pedals, with the minimum of discomfort to the arms and back. The saddle should always be a good one, preferably a racing saddle of a type best suited to the individual.

### The Size of the Gear

The size of the gear is another important consideration, worthy of the most careful attention. The character of the course, whether hilly or otherwise, is a big factor in determining the gear size, but generally speaking it will be found that a moderately high gear will produce the best results. However, gears vary with the individual, some cyclists getting very good results from comparatively low gears, as 80 and 84. Personally I find an 88 more useful than any other when riding for time, unless the grades are very heavy; and at that, I used an 88 on my recent record run to Frederick and Hagerstown, Md., from Baltimore, when I was compelled to cross two mountain ridges, each with a steep ascent of about three miles.

The effect of different gears on a rider is very interesting. A low gear when used for fast work seems to burn up energy, but makes comparatively little demand upon the leg muscles, while a high gear, on the contrary, seems to demand more muscular effort and to draw less on the vitality. This appears to have some connection with the age of the cyclist, as most riders find it necessary, as they grow older, to increase the size of their gear in order to obtain the same results formerly secured with a lower one.

### The Question of Pace

The proper judgment of pace is also vital factor in qualifying for long distance work, as the distance performer finds it very necessary to gauge the speed at which he is traveling, too fast a pace at the start often resulting in the cycler riding himself out before his goal is reached, while too slow a pace may result in his holding back too long, so that his efforts will not produce the best work of which he is capable. For the same reasons, the rider should be well acquainted with his own ability, so that while riding at the highest speed which he is capable of maintaining throughout the competition, he should yet be able to reserve enough strength to make a strong finish. This knack of conserving strength and energy, easing up a little on the hard places and opening up on a good stretch,

Digitized by Google

ong distance riding.

To sum up, it might be said that what is most needed by every aspirant to long distance cycling honors are lots of determination, plenty of self-confidence, a strong and healthy body, good equipment, a thorough knowledge of his own requirements as to position, gear, and an accurate appraisal of his strength and pace.

### Riding for Pleasure

Long distance riding for pleasure, such as touring, etc., is of course a different proposition altogether. A comfortable position on the bicycle is perhaps the most important consideration, though it must also be borne in mind that the position must be one in which the rider can do effective work should heavy grades and strong winds be encountered. In this connection I might state that my experience has shown up-turned handlebars, when touring, to be ineffective, especially when going against strong winds and climbing steep or long hills.

A low gear will be found to add to the enjoyment of a touring or pleasure trip, for in traveling through hilly country the pace maintained is generally slow and tourists find many objects that they wish to stop and inspect. I find that a 77 gear seems to fill the bill better than any other gear when traveling through almost any kind of country, as it greatly reduces the effort I have to make in order to negotiate hills, and a fair rate of speed can be maintained even on roads comparatively level. Traveling through mountainous or very hilly sections the cyclist will find a still lower gear acceptable, 62 and 68 being effective when covering a country where a succession of mountain ridges or steep hills are encountered for a distance of any great length.

### Ten Miles Without Trouble

These low gears are certainly good only for pleasure riding, and the higher gear is, of course, absolutely essential when fast time is the goal sought, even though the grades be steep. The cyclist on a pleasure run will find, however, that he can average ten to twelve miles an hour on his low gear without any trouble and thus travel sixty to seventy miles per day without any undue exertion. He will even discover that by making an early start each day, he can loaf along at an eight or ten miles an hour clip and still average sixty to seventy miles per day. This distance daily will be found to be about all that the cycler will care to cover, if he really wishes to make his trip a genuine pleasure journey and desires to spend a little time in viewing points of interest.

It might be stated parenthetically that the number of riders in a party also has much to do with the enjoyment of a trip. The ideal party should be composed of not more than four, as too large a group of riders makes it difficult to keep the members of the party together and trouble may be encountered in getting the proper accommodations, and there are numerous delays in making repairs, etc. A small party can make a good daily mileage, exceeding the seventy mark.

To put it in a nutshell, the essentials for the fullest enjoyment of a pleasure trip or tour are a low gear, a sensible, comfortable position, and a program that can be lived up to without too much effort. And in this list might well be included a coaster brake, which I have found to add greatly to the pleasure of a run when riding a low gear through hilly country.

## ORGANIZE COMPANY OF BICYCLE BOY SCOUTS IN NEW YORK

Plans are now being made for the organizing of a company of boy scouts in New York City, to be called the National Bicycle Scouts of America, for lads between the ages of 13 and 19 years.

The uniforms will consist of campaign hats, khaki shirts, army belts, blue knickerbockers, bicycle stockings of uniform color, and the regulation boy scout shoes.

Application for membership should be made direct to the first lieutenant of the organization, Richard T. Wells, 321 West 116th street, New York City, by mail, or by personally calling on him, any Sunday afternoon, between one and five o'clock. Full details will be published in Motor Cycle Illustrated in the near future.

This is the first bicycle scout company in the United States.

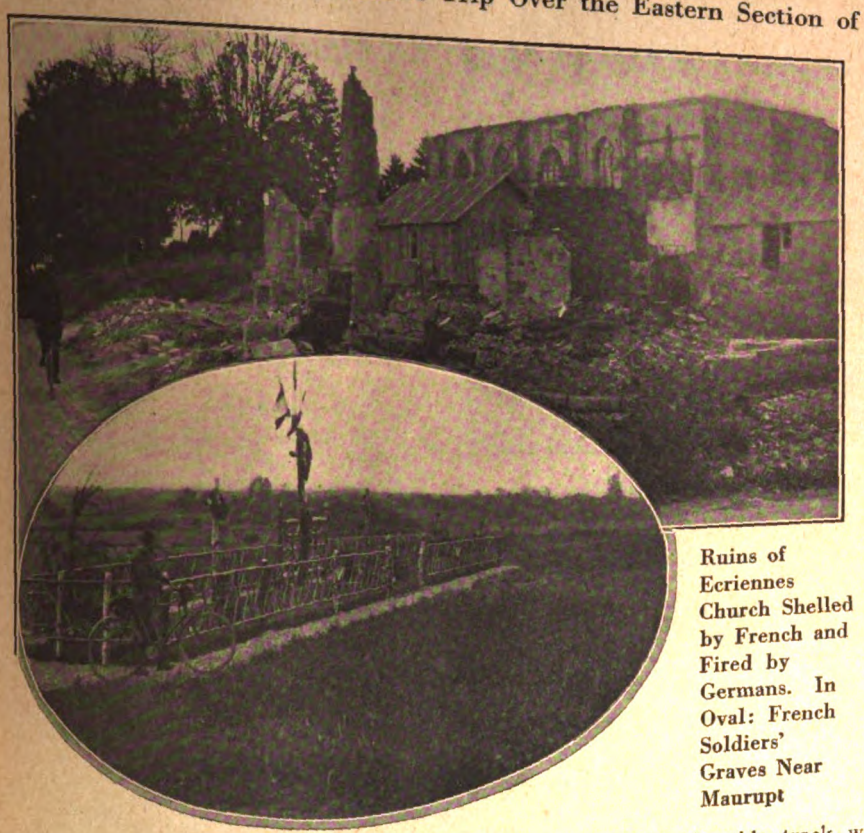
# ON THE BATTLEFIELD OF THE MARNE

## War Correspondent's Trip Over the Eastern Section of War-Scourged France



Ruins of Ecriennes Church Shelled by French and Fired by Germans. In Oval: French Soldiers' Graves Near Maurupt

FOLLOWING is the second and last installment of the interesting tour of the eastern section of the Marne Battlefield, which was taken by Walter F. Bradley, special war correspondent of *Motor Age*, by whose permission the original story and pictures are reproduced here:

Vitry-le-Francois is the biggest town in this district and is about 18 miles from Sermaize. Unlike the villages, the town has not suffered by reason of the war. Pillaging is hardly worth considering by the side of destruction. Yet Vitry was occupied by the Germans for 6 days. The French, who had been retreating for a week, passed through Vitry and made their way towards the south. They had hardly got out of the town when the Death's Head hussars galloped in with wild cries. The French turned and attacked them with machine guns, causing the Germans to gallop off in disorder. This, however, did not prevent the German occupation.

### Stopped by Soldiers

If the town had nothing to show, the country to the southwest bore indelible traces of a great battle. We passed out on the main road going west, and were stopped on the outskirts of the town by a big board placed in the center of the road and bearing words painted on it that were a command to stop. There were such boards, and in some cases chains, at the entrance to every town in or near the war area. Soldiers examined our pass and permitted us to continue. After a detour to the southwest to look at the wrecked villages of Glannes and Huiron, we sought to make a short cut back to the main road without passing through Sompuis.

It was soon evident the side track we had got on was not intended for vehicles. However, as turning was difficult, we continued in the hope of forcing a passage through. Suddenly we ran into a big farm, where soldiers were washing.

"We have got lost; can you direct us to the main road?" we inquired.

"Have you got a pass to travel through here?" queried the sergeant.

We presented two flimsy, but valuable bits of paper covered with official seals and bearing our respective photographs. After reading them through carefully, the soldier handed them back with the remark:

"You are all right; we can have a drink here."

In the big, old-fashioned kitchen a bottle of white wine was uncorked and glasses raised to the success of the allies.

"Where are we?" we asked.

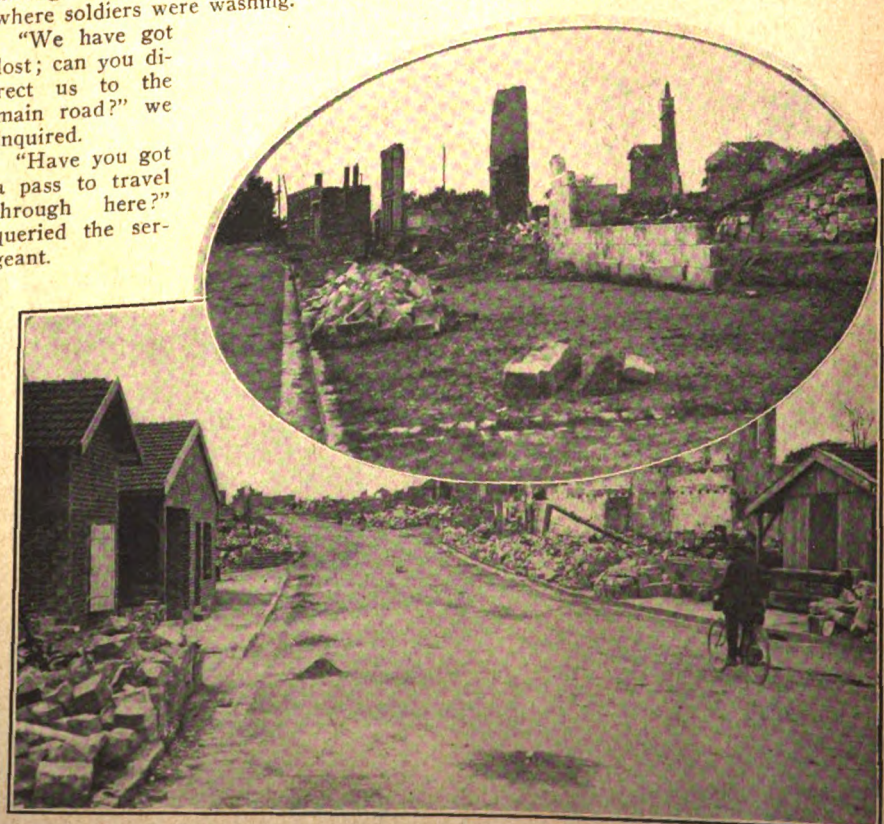
"This is the Ferme des Hirondelles, near La Certine, the bloodiest portion of the battlefield."

It was meagre information, and no more details were available, for all the men were strangers to the district and they did not possess a map. However, a soldier who was described as a native, although he came from above Rheims, 40 miles away, was brought forward to give us all necessary instructions. The soldier suggested that we might pay a visit to the nearby battlefield, and the consent of the sergeant having been obtained, we set out afoot.

### French Relics of Battle

After crossing a deep valley, we began to climb a pine-clad hill along a track possible only for men and mule teams. From time to time bits of military equipment were found: a leather belt, harness, a broken rifle, etc. A German tunic, lying by the side of the track, drew our attention. The soldier turned it over and noticed that the lining was stained with blood.

"Poor devil," one of us remarked, "he probably died in the woods."



In Oval: View of Thiebiemont Faremont, Half of Which Was Wiped Out. Glimpse of Sernaize, Showing Temporary Town Hall, Built Since the Battle, on Left

**Where German Soldiers Were Buried After the Fight Around Esternay**

"Well, he had only to stay at home; we never asked him to come into France," replied the soldier, abruptly.

Reaching the top of the hill we found ourselves on a plateau which had been almost untouched since the fight which the Frenchmen described as the bloodiest in the battle of the Marne. The dead had been put under a shallow layer of earth, but the plateau was in too wild a country and too far removed from all lines of communication for any of the cleaning up to have taken place, as on other parts of the battlefield. The plateau on which we stood had been held by the Germans and formed a naturally strong position. A few miles to the south, across wild undulating country studded with numerous pine woods, the French had been in position. The German trenches had not been touched since they were abandoned by their occupants and were surrounded by all the refuse attending a body of men in the field. The heights had been heavily bombarded.

### Unknown Soldiers Fell

After the bombardment, there had been a fierce bayonet charge, in which some of the French had fallen. Their graves stuck sad and grim on that wild plateau. Mostly they were unidentified men, as the words, "Soldats inconnus," written on the rough cross, indicated. Their torn kepis indicated to which regiment they had belonged.

"Across there to the southeast is La Certine farm," explained the soldier. "It was the hottest point in the bayonet charge. When we cleaned up the ground we found two pairs had bayoneted one another; each man was standing dead with his enemy's bayonet through his body. At this spot we buried 600 Germans on a length of 300 yards. They had evidently come out of the wood for a bayonet attack and our guns had caught them as soon as they got into the open. The undergrowth being thick, they could not get back quickly and every man must have perished."

We moved to the far side of a little thicket to find there a great heap of German equipment; greatcoats riddled with bullets, a pair of rubber braces cut through by a pierce of shell; knapsacks with the hair left on them; medical bandages, torn trousers, broken rifles, cans, belts, water bottles and an immense quantity of heavy iron-heeled army boots of the kind made only in Germany. One pair of boots was partly buried, merely the toes sticking out. As I was idly kicking the earth away, the soldier said:

"You had better not do that; somebody's feet are in those boots."

### Asked to Come Again

Before we left him, the soldier gave us his address, a little village north of Rheims, where he cultivated vines in peaceful times. He assured us of a welcome if we came through that place after the Germans had been driven out.

With our bearings secured, we ran through Sompuis, then on to the main highway running east and west between Paris and Nancy. Although this was one of the main roads leading up to the battle front, there was surprisingly little traffic. During a week on the road we never saw a private car. Sometimes a whole day would pass with only two or three automobiles being encountered. These would be officers' touring cars driven at high speed, or maybe a light truck towing a dismounted aeroplane on a two-wheel float. On another day it would change and a convoy of several hundred trucks would go by. This was an indication that troops were changing positions. After this the roads might again remain deserted for weeks.

With a fixed battle front, the war cars work within a very restricted area. Supplies are sent by train to within 20 miles of the firing line and trucks have to travel from these points to the neighborhood of the trenches. Everything back of this 20-mile strip is so quiet that were it not for the constant booming of the guns, it would be impossible to believe that a war, or indeed any martial activities, were in progress.

### Nothing Escaped Destruction

Where the main road east and west was cut by the great highway lying north and south, with Chalons and the battle front at the northern end, we put in for lunch. The village was Sommesous, a place not likely to attract the attention of the tourist in ordinary times. When the lunch was disposed of, a run through the village naturally suggested itself. The wreckage was much greater than appeared from the main road; indeed, with the exception of the railroad station, there was not much that had escaped destruction. By the side of the wrecked church we got in conversation with a lad who was doing a man's work.

"I suppose you beat it when the Germans were coming?" we remarked.

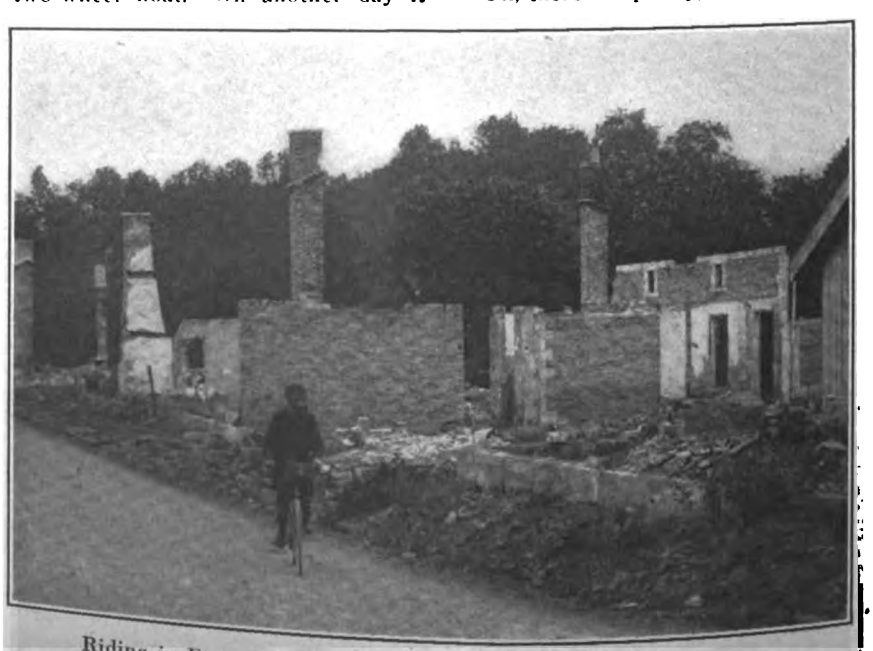
"What do you think; we came back in time to do the cleaning up. The engineers had been in before us, but they left us plenty of work burying the dead and the bodies that had not been put down deep enough. We have a lieutenant-colonel here."

He led us into a field and pointed out the grave of the French officer about a couple of feet from the church railings.

"He was in a motor car down that lane when he was killed by a shell. The driver was injured, too, but another officer brought the car back. The driver died in the village."

"Are no Germans buried here?" we asked. "We never see their graves."

"Oh, there are plenty, but nobody ever



Riding in [illegible] Which Was Razed by the Terrific Bombarding

Digitized by Google

thinks to mark them. There was one in that field who came up after he had been down awhile and the crows ate his head. We have a captain in our potato patch. There, don't you see, under that stick, where the potatoes are rather withered."

He noticed our grimace.

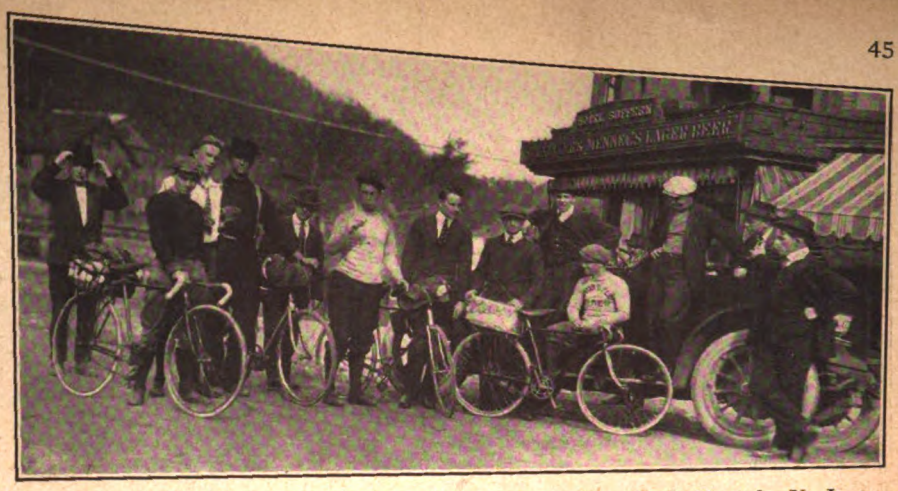
"Bah," he exclaimed, "the potatoes are good enough for the pigs."

He left us and a few seconds later was shouting across the field to one of his mates: "Jean, the stranger here, has taken my picture—true."

National Highway No. 34, from Sommesous to Esternay, might be designated "the bloody road." Both the French and the Germans were a little to the south of it when General French sent out the order last September for the advance which was to produce the great victory of the Marne. As they stood to the impetuous French attack, the Germans made a determined stand on the road itself. Even 8 months after the fight, the German dug-outs can be seen in the southern ditch, varying in intervals from a few inches to a few yards. As they continue for mile upon mile. On the north side of the road there is no such cover, but instead, clearings where the French guns were placed, for when the Germans were driven from the south side of the road they retreated right across and took up positions in the various woods.

## PROS. RIDING TO CHICAGO USE PYE-MUSSELMAN CORD TIRES

Chicago, Ill., October 26.—The Cycle Mfg. & Supply Co., of this city, announces that on the bicycle trip from Newark, N. J., to the Windy City, which a number of professional riders from the Vailsburg Velodrome are now taking, preparatory to their appearance in the Chicago six day race, Messrs. Miller, Iver Lawson and Worth Mitten are among those using the Pye-Musselman cord tires. The strenuous test of the Pye-Musselman is being watched with interest, for the professionals are going at a good clip, and the roads they are now traveling over are in bad condition in some sections. Coincident with this announcement the Cycle Mfg. & Supply Co. stated that the Pye-Musselman tires would be used exclusively at the Chicago six day race, and that each individual rider would pay for his tires. The Pye tires were used extensively with big success at last year's races.



**Professional Riders at Suffern, N. Y., Who Are Cycling From Newark, N. J., to Chicago to Get in Trim for the Six Day Race**

## NEWARK STELLAR RIDERS PASS THROUGH BUFFALO

Newark, N. J., October 25.—The last word received from the professional cyclists who are on their way to Chicago reached Newark on Sunday and was to the effect that the riders had arrived in Buffalo at about noon on Saturday. They stopped at the home of Walter Bardgett's sister and had a hearty meal. Bardgett acted in the capacity of manager of the Chicago Velodrome during the latter part of the season.

By reaching Buffalo the riders covered about 500 miles, an average of about 83 miles a day. They expect to make even better time on the roads along the shore of Lake Erie, through Erie, Cleveland and Toledo.

## JENSEN FIRST IN C. R. C. A. RACE

Edwin Jensen, riding from the limit mark of one minute and thirty seconds, easily finished first in the five-mile bicycle race of the Century Road Club Association over the course at Eastern Boulevard, Bronx, N. Y., on Sunday, October 24. Jensen not only won the race with ease, but his time was one minute and nine seconds faster than that of the first scratch man to cross the line.

On Sunday, November 14, a one-hour team race will be held on the Sheephead Bay Velodrome track, and during the final fifteen minutes of the race, the cyclists will ride in the six-day style, with the members of teams relieving each other at will.

The summaries of Sunday's race are given as follows:

| Name | Handicap | Time |
|---|---|---|
| Edwin Jensen | 1:30 | 13:13 |
| John Marquart | 0:30 | 14:21 |
| Raymond Caldwell | 0:30 | 14:23 |
| George Harvey | 1:30 | 15:10 |
| Ernest Kuno | 1:30 | 15:11 |
| Joseph Naphtal | Scratch | 13:47⅖ |
| Jackie Welton | Scratch | 13:47⅗ |

## EX-BIKE CHAMPIONS ARE NOW GOODYEAR MANAGERS

Akron, O.—Among the branch and district managers who attended the recent sales conference of the Goodyear Tire & Rubber Company, held in this city, were three bicycle champions of the halcyon days of racing. When interest in this sport began to decline toward the beginning of the present century, these men entered the tire field and made good. They are E. F. Jackson, Detroit district manager, who won 44 firsts, 30 seconds and 12 thirds in 1896; H. P. Ziegler, Chicago district manager, who set a new world's record in 1899 for the mile, in 1:40⅖, at Garfield Park track, Chicago, and Eddie Lingenfelder, Los Angeles branch manager, who was ten-mile national champion in 1898.

## FORT WORTH SHOP OPENS

Fort Worth, Texas, October 22.—A bicycle store considered the largest in North Texas, has just been opened at 111-115 Fifth avenue, by H. S. Jary, who has for many years been in the bicycle business in San Antonio, Texas. The new company specializes in the Texas bicycle.

# "The Most Efficient Gasoline Motor Ever Placed On The Market"

Simplicity—Efficiency—Economy. These are the big outstanding features of the Smith Motor Wheel according to one of the most widely known cycle men in the country. He says, "Besides its extreme simplicity and most remarkable economy, the Motor Wheel is proving itself to be the most efficient gasoline Motor ever put on the market and as a natural result, every rider is satisfied and an enthusiastic booster."

Again speaking from the dealer's standpoint, a western cycle man sums up the attraction of the Motor Wheel for the dealer like this:

**Smith Motor Wheel**

(Detachable)

*"The Bicycle Booster"*

**Mr. Dealer:**

Write any of the following leading Bicycle Dealers for their opinion and experience with the Smith Motor Wheel:

J. W. Grady & Co., Worcester, Mass.
Haverford Cycle Co., Philadelphia, Newark, Washington, Norfolk, Buffalo, Cleveland, Detroit.
Sutcliffe Company, Louisville, Ky.
Pettee Cycle Company, Denver, Colo.
Sauffley Supply Co., Kansas City, Mo.
Lakeview Cycle Company, Chicago, Ill.
Hall-Williams Company, Minneapolis, Minn.
Pacific Motor Supply Co., San Francisco, Cal.
Branch, Inc., Stockton, Cal.
A. E. Bregent, Montreal, Quebec, Can.

"One big feature about the Motor Wheel is that sales are almost always on a cash basis and the Motor Wheel is so well made that it stays sold and does not develop mechanical trouble after the sale."

"Another thing—I have sold more high grade bicycles during the six months I have handled the Motor Wheel than I did in the whole year previous."

# THREE POINTS OF 'VANTAGE IN OUR NEW "THREE-SPEED"

"Years ahead"—That's what those who know say about the famous Pope Motorcycles.

It was with this pace-making record in mind that we made the new

## Pope Three-Speed Twin Model

Here are just three out of many of its indisputable superiorities:

**POWER** The Pope Overhead Valve Construction gives a motor of 15.4 H. P. with cylinder displacement of only 61 cubic inches—a record which has never been equalled so far as is known.

**SPEED** Pope Overhead Valve Motors have won speed and endurance records that demanded abilities far beyond the ordinary.

**COMFORT** The Front and Rear Wheel Spring Suspension keeps shocks away from both rider and machine.

This is the machine that those who have followed the wonderful progress of Pope manufacture have been looking for. And it's the machine that the farseeing Dealer is bound to carry.

### TAGS BOOST MEMBERSHIP

Newark, N. J., October 25.—In order to boost its membership the New Jersey Motorcycle Club is distributing yellow tags, which can easily be tied to the handlebars of the machines or in coat lapels, calling upon motorcyclists to "take a tip from this tag and be square to yourself—to the sport that you enjoy." The card then goes on to invite riders to "tie up" with the N. J. M. C., and thus enjoy the club's "good times" and help in the fight against adverse legislation. The reverse side of the tag states that the cost for membership both in the club and the F. A. M. is but two cents a day, and that all of its members are striving for "good roads, sane laws, sport, companionship, entertainment and instruction." All riders are cordially invited to drop in at the N. J. M. C. rooms, at 847 Broad street, Newark, and get acquainted with the fellows.

### SEMAPHORES TO AID TRAFFIC

Nashville, Tenn., October 25.—Chief of Police Bartlett has announced that as an aid to the traffic regulations of the city a number of semaphores will be installed in the downtown section of the city in order to aid the traffic policemen in properly directing traffic in the crowded districts. Motorists are pleased with the idea, which will aid the "safety first" campaign considerably. The new semaphore system will probably be installed early in December. Safety zones will also be marked off.

### MORE CLUBS AFFILIATE

Recent affiliations among clubs include the Spartanburg, of Spartanburg, S. C.; the Chickasha, of Chickasha, Okla.; the St. Joseph, of St. Joseph, Mo., and the Peerless, of New York, N. Y. The secretary of the Spartanburg club is T. E. Gibson, 115 Magnolia street, Spartanburg, and the corresponding official in the Chickasha organization is Jess Tucker, 122 South Third street, Chickasha. E. R. Young is secretary of the St. Joseph club, at Savannah Road, and Anthony Besio, 1895 Washington avenue, New York, is the Peerless club's secretary.

### INGLES PASSES ON

Springfield, Ill.—Lon Ingles, a prominent member of the Springfield M. C., died on October 20, after a lingering illness, much to the regret of his fellow club members. Ingles was foreman in the shop of his brother, J. Ingles, local Indian dealer. The funeral was attended by a large number of the trade here, the pall-bearers being members of the Springfield club.

### KNIGHT LINES UP SOME AGENTS

St. Louis, Mo.—A. A. Knight, of the Knight Motor Co., which handles the Excelsior and Henderson, and which has just added the Tiger lightweight to its line, has returned from a three weeks' trip through the East, during which he visited several motorcycle factories and a number of accessory makers. He reports having closed the following subagencies in his territory: Park Auto Co., of Cape Girardeau; Ralph Koch, of New Haven, Mo.; A. Baker, of Alton, Ill.; Fred Frost, of Collinsville, and C. H. Berry, of Belleville Ill. Frost is featuring the Henderson in his territory and is also a motorcycle cop for the city.

### HAS NOVEL OIL SCHEME

St. Louis, Mo.—George Schmitt, Harley-Davidson distributor for this city and vicinity, has introduced a novel scheme to interest riders in Harley-Davidson oil. He offers a two-gallon tin of the oil to the rider who makes the best record each month for mileage on oil and gas. Written reports are submitted by each rider entered in the contest, and competition is keen. The two best records so far were made by August Kern, Jr., and Charles Bott, the former covering 540 miles on a gallon of oil and 50 miles on a gallon of gas. Bott made a gallon of oil do for 640 miles and covered 50 on a gallon of gas.

### PERTH AMBOYERS RETIRE

Perth Amboy, October 20.—Arthur La Roe and John Rosenberry, who handled the Indian motorcycle agency for this section of Middlesex County during the past three years, have retired from the motorcycle business.

La Roe is in his senior year at Jefferson Medical College and soon expects to prefix his name by "Dr.," while Rosenberry has accepted an engineering position with the Public Service Electric Co.

### WANTS TO ARRANGE RACES

Trenton, N. J.—John A. Johnson, of the Trenton Post Office special delivery corps, is anxious to arrange a road bicycle race with any local or nearby rider. Johnson prefers to ride fifty miles or upward. Address John A. Johnson, care Trenton Post Office, special delivery department.

# THE LATEST BOSCH PRODUCTION

## DELIVERIES AFTER JANUARY, 1916

THE much heralded Bosch Ignition-Lighting System has been brought to that state of perfection which warrants its being stamped with the Bosch name. It is now offered to the motorcycling public with full confidence in the satisfaction that will result.

Unlike other devices which attempt to accomplish a like purpose, the Bosch System not only provides ample lighting current but retains the reliable and efficient Bosch Magneto Ignition. None of the Bosch vim, vigor and snap has been sacrificed, and the supply of ignition, that paramount essential, does not in any way depend upon the lighting unit.

You have the same Bosch Magneto Ignition with the addition of a lighting system that provides abundant light. Most important of all, is that, excepting the driving medium, the two systems are entirely independent of each other.

# REMY

## Motorcycle Lighting-Ignition System

Proof of the complete success of the Remy Electric Lighting-Ignition System for Motorcycles is furnished by thousands upon thousands of Motorcyclists who have used it during the past year.

In every respect it has fulfilled their highest expectations and met their most exacting demands.

## It is not affected by road vibration

Thoroughly protected wiring and a battery that cannot spill make the Remy Electric Lighting-Ignition System trouble-proof.

It furnishes high and low head-lights, tail-light, operates horn, and provides strong, synchronized ignition which increases engine efficiency.

Remy Ignition-Generator

See this thoroughly successful equipment on the **HARLEY-DAVIDSON.** It has been an important factor in the winning of some of the biggest road races during the past season.

# Where it should be

The proper position for the Prest-O-Tank is on the front construction of your machine—as near the headlight as possible. The best method is to use the

## LEONARD PREST-O-BRACKET

because it holds the tank rigidly secure. It gives a direct connection from tank to lamp and insures lowness of pressure and steadiness of light. It adds to the attractiveness of your motorcycle and adjusts itself to the balance of the machine. You can regulate gas pressure from the saddle while riding without inconvenience. You can insert a new tank or remove the old one easier than with any other bracket. No annoying rattle of loose parts—no rusting—no danger of striking the tank if thrown.

We will ship you the LEONARD Prest-O-Bracket on receipt of $1.00, and guarantee perfect satisfaction. It will fit any make of machine. Write now enclosing $1.00, and if not satisfied that it's the biggest dollar's worth of *real equipment* you ever owned return it and you'll get your dollar back.

Jobbers and dealers, proposition on request.

# BLUE Motorcycle

# The Tire that Averages 8,422 Mile

Let us settle now the question—which Motorcycle Tire is best?

Claims mean nothing. Riders who want a safe, sure tire should look at past tire-performance.

Blue Streak Racing Tires hold every World's Record for speed and endurance. But the Blue Streak Road Tire now holds a greater record.

Every Motorcycle Manufacturer has adopted Blue Streaks as tire equipment for 1916.

No question now which is best with such endorsers as these before you. But consider these newest tests, made in actual service by the Goodyear Tire Testing Crew.

Seven Motorcycles were sent out on Blue Streak Tires over every sort of road. They were run till the tires gave out. Then these convincing facts were noted:

On front wheels Blue Streaks average 9,515 miles—on rear wheels, 7,329 miles So the Blue Streak Tire averaged 8,42 miles. And remember this test was mad on the worst roads a tire encounters.

As made last year, Goodyear Motorcycl Tires excelled all rivals for speed and en durance. As made this year—$50,00 better—these Motorcycle Tires far out-dis tance many Automobile Tires.

Yet our prices are 15 per cent lowe than a year ago—due to the growing de mand for Blue Streak distinction and relia bility.

Go to the Goodyear Service Station i your neighborhood. Examine this Blu Streak Tire and the service that goes witl it. Then join the class procession that nov rides Blue Streak Tires. They will brin you tire satisfaction you have never befor known.

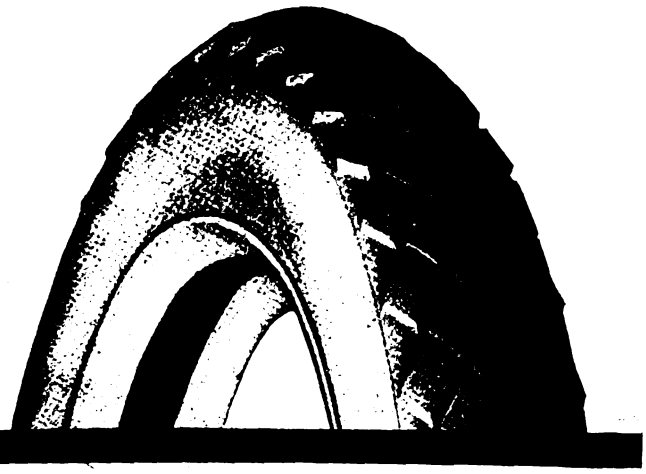
# TREAK Tires



# is Letter Service Free to Dealers

unless it repays its cost to you in increased business.

Have us prepare a complete letter campaign for you—to be sent out during the next few weeks.

If these letters fail to pay you back their cost in increased business, we will return to you the full purchase price, making the Service free.

Never before has such a warrant been given. Never before has such profit-making co-operation been offered to motorcycle dealers.

These letters are written to fit your own special conditions. They increase your sales of standard lines. They help you speed up slow moving goods, collect money, create good will, land new motorcycle orders, bring in new customers, resist local competition, resist mail order competition, turn over stocks quickly, do a volume of business on a small margin, sell to farmers, win confidence, build up a steady, profitable trade.

Goodyears are giving Dealers in Blue Streaks the best in motorcycle tires.

Now, besides this quality tire, we offer a letter service that insures more sales and more profits. We show our confidence in Blue Streaks by aiding you in selling them.

In this and other ways we are aiding Goodyear Dealers. We want you to share these newer sales methods with us—and make these greater profits.

We gladly send you on request full particulars about this Dealer Sales Promotion Service. Address Motorcycle Tire Dept.

The master power plant. Long stroke, big valves, high efficiency. Automatic mechanical oiler. Kick starter. Dual control of clutch—hand or foot. Special Schebler carburetor with Henderson air shutter for easy starting, and hot-air intake pipe for perfect vaporization.

# The claims of the Henderson dealer may *sound* strong, as he tells of the smoothness and speed and pulling power of the 1916 models of his four-cylinder machine. But Henderson riders soon find that in actual performance the machine even *exceeds* the strongest claims made for it, for mere words simply cannot do justice to the wonderful ability of this master motorcycle. Your own first ride on a Henderson will confirm this.

***The thoroughness with which the 1916 Henderson "makes good" is a powerful business-building influence for every Henderson dealer. A little territory remains open. Write at once to learn if you can arrange to represent us in your vicinity.***

# "Please Send Me Contract to Sign For Next Season," writes J. E. FERLAND, Lawrence, Mass.

"I expect to double my Motor Wheel sales over last year," he says. Another dealer writes: "We will do at least three or four times the Motor Wheel business next year we did this year." At the New York Show nearly all the dealers said: "Next year Smith Motor Wheel business all over the country will develop into even more enormous proportions, and every dealer who introduces it in his territory will be well paid for his effort." And such are the sentiments of every one of our fifteen hundred dealers all over the country.

When our present dealers say such things and *write in* asking for renewal contracts for next year, isn't it about time for you to take notice of *your* profit possibilities — Smith Motor Wheel profits and profits on bicycles and accessories the Smith Motor Wheel sells along with it?

Come! Get in on this big wave of Smith Motor Wheel dealer prosperity that's coming. Be a Smith Motor Wheel dealer and get your share. We want more dealers—we need more dealers to take care of the increasing Smith Motor Wheel business. We want you! You'll have a clear field ahead of you—no competition. The Smith Motor Wheel is the only *detachable* bicycle motor on the market. It is absolutely vibrationless, light in weight, safe, and easy to operate; and so cleanly and free from mechanical troubles it appeals to both sexes, to the young and to the old, and to the better classes. A tremendous market—the most profitable one for you. Are you with us? Will you come along *now*—before your territory is taken?

Write to us today for our 1916 Profit Proposition To Dealers—and what territory we have for you. No obligations. Tell us the lines you handle and the size of your business. Write right now.

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## FREIGHT RATE DECISION GIVEN

**Interstate Commerce Commission Supports Claims of Two Spokane Motorcycle Firms Concerning Less Than Carload Shipments.**

WASHINGTON, November 1.—Once again the Interstate Commerce Commission has done justice to motorcycle interests of the Far West. The most recent decision regarding motorcycle freight rates has just been handed down in the case of the Spokane Cycle & Supply Company and the Inland Motorcycle Company, both dealers of Spokane, Wash., against the Boston & Albany Railroad Company and connecting lines. The complainants, who filed their briefs as long ago as September 23, 1914, alleged that the rates charged by the defendants for the transportation of less-than-carload shipments of motorcycles from points of Massachusetts, Ohio, Illinois, Michigan, Wisconsin, Minnesota and Nebraska to Spokane and Colville, Wash., during the period from March, 1910, to January, 1913, were unreasonable and unjustly discriminatory to the extent that they exceeded one and one-half times the first-class rates. The complainant asked for reparation. The statute of limitation, however, barred some of the claims for reparation, since the shipments were made more than two years before the complaint was filed.

The commission voiced its opinion that the rates charged on such of the claims as were allowed were unreasonable insofar as they exceeded a rate of one and one-half times the first-class charge, and the railroads involved were ordered to make reparation for the overcharge.

### PRINCE WILL FORM RACING CIRCUIT IN MIDDLE WEST

Kansas City, Mo., November 1.—John Prince and W. H. Pickens, two prominent builders of racing saucers, have announced that with the closing of the huge bowl at St. Joseph, Mo., for the season, they will make arrangements for the construction of four or five more big racing bowels through this section of the country, which will form a motorcycle racing circuit. Mr. Prince stated that his cash prizes will be so large that they will attract the best riders in the country and that every make of motorcycle will be represented on the boards. Kansas City and St. Louis will most likely be placed on the circuit. When the St. Joseph track reopens next spring races will be held every Sunday and on the holidays.

### JOHNSTON IS DISTRIBUTING KLAXON HORN PRODUCTS

San Francisco, Cal.—W. R. Johnston is now acting as distributor for the Klaxon horns and other accessories, with headquarters at 444 Market street, this city. He was formerly Pacific Coast representative for the Lovell-McConnell Mfg. Co., of Newark, N. J., makers of Klaxon specialties.

### STEWART-WARNER TO BUILD

Chicago, Ill.—Having purchased a site 286 by 125 feet opposite its present factory in this city, the Stewart-Warner Speedometer Corporation is having plans prepared for a new building for which ground will be broken at no far distant date. The estimated cost of the new structure is $250,000.

### MURRAY WINS AT SAN ANGELO

San Angelo, Tex., November 3.—R. Murray, Harley-Davidson, won both five-mile events at the local track on November 2, his times being 4:49⅗ and 4:51 respectively. Lynn Rogers, Cyclone, was second in both races, and A. C. Hilliard, Excelsior, third. The track was very dusty and in bad shape, so no other races were run.

### NEW BUILDING FOR DOEHLER

Toledo, O.—Work will be started soon on a new factory building, with 60,000 square feet of floor space, for the Doehler Die Casting Co., of Brooklyn, N. Y. The company has just purchased a site on Smead avenue, this city. The company has leased factory space for several years but now needs a building of its own in the western territory.

### DAVIS CO. INCORPORATES

Binghampton, N. Y.—The Davis Automobile Company has incorporated in this city to carry on a general sales and renting business in motorcycles and automobiles. The capitalization is $5,000. The incorporators are: John Davis, Cora Davis and Harry C. Walker.

## B. & S. RAISES CAPITAL STOCK

**Hartford Firm Increases Capitalization to $300,000 and Re-incorporates as The Billings & Spencer Company—To Extend Scope.**

HARTFORD, Conn.—The Billings & Spencer Company, of this city, has increased its capital stock to $300,000. By this move the company will acquire the necessary financial resources to take advantage of an increased volume of business which has manifested itself, and will in addition, increase its output.

The stock consists of 12,000 shares of a par value of $25 each. In order to comply with the legal requirements of the State of Connecticut, the increase in capitalization has to be made by dissolving the old company and forming a new one. The company is, therefore, now known as The Billings & Spencer Company, and takes over the assets, stock, liabilities and good will of Billings & Spencer Co. Stock in the new concern is to be exchanged for that in the old in the ratio of three shares of new to two shares of old stock.

Stockholders in the new company will, in addition, be given the right to subscribe to 8,000 shares of stock at $37.50 per share, in proportion to their holdings. Subscriptions are to be made on or before December 15 and paid on or before January 3, 1916. Any shares not disposed of to stock holders may be offered outside at not less than $37.50 each, at the will of the directors.

The officers of the new company are: C. E. Billings, president; F. C. Billings, vice president; E. H. Stocker, secretary; Lewis D. Parker, treasurer; F. H. Stocker, assistant secretary and treasurer. With the additional financial strength, the company expects to easily eclipse its high record of the past season.

### GRAVATT NOW IN CHARGE

Atlantic City, N. J.—Frank P. Gravatt has taken over the entire control of the Indian agency formerly known as Hall & Gravatt, at 2202 Fairmount avenue and 2522 Atlantic avenue, this city. He will continue the business of the former firm and improve its service as far as possible during the coming season. Gravatt started business in 1909 in this city, with his office in his hat and has steadily risen ever since.

# MANUFACTURERS HELP RED CROSS

**Tire and Accessory Makers in United States Contribute to Fund Started by Dunlop Company, of Toronto, in Aid of British Society.**

TORONTO, Ontario.—The Dunlop Tire and Rubber Goods Company, Limited, recently made an appeal to tire and accessory manufacturers of the United States for donations to the British Red Cross Society, with the result that slightly more than $2,000 was received. Invitations to subscribe to the fund were sent to twenty-two firms and each responded with gifts ranging from $10 to $250. A. Schrader's Son, Inc., New York, gave $225; the Firestone Tire and Rubber Company, Akron, donated $100, and the Standard Welding Company sent a check for $50.

The employes of the Dunlop company collected $1,596.50 and the Dunlop firm itself gave $500. This is entirely in addition to the $1,400 representing the proceeds from the Dunlop Trophy bicycle race on October 11.

Three more members of the Toronto Motorcycle Club have enlisted for service overseas. They are A. Fife, F. J. Blackie and V. Smith.

The Toronto club is giving consideration to a plan to hold a club hunt for rabbits and partridge in rural Ontario. The winter's indoor season has been started with the inauguration of a pool tournament.

### MASON TIRE INCORPORATES

Cleveland, O.—The Mason Tire & Rubber Company has been incorporated to manufacture tires, inner tubes and other rubber articles. Capitalization, $250,000.

# FLECKENSTEIN STILL WINNING

**Cyclone Rider Captures Both Professional Events in Last Racing Program of the Season at St. Joseph, Mo.; Amateurs Perform Well.**

ST. JOSEPH, Mo., October 31.—Fleckenstein again proved himself a top-notcher at the races here today when he made a sweeping clean-up. He did not have to contend with the Excelsior team, Shaw and McNeil having left early in the week after a dispute with the management.

Among the most interesting features of the racing today were the amateur events in which Dudley Steele starred. These races were between Kansas City and St. Joseph riders. Steele and Wehrman were the local representatives, and Hildebrand and Martinogni wore the Kansas City colors. Steele went down for a spill at the start of the final, but redeemed himself by winning. The racing machines were shipped out right after the races, most of the riders heading for Phoenix. Summaries:

First heat, one and seven eighths miles—Ward, Indian, first; Kenny, Indian, second; Meyers, Indian, third; time, 1.20. Second heat, same distance—Fleckenstein, Cyclone, first; Graves, Indian, second; Creviston, Indian, third; time, 1:17⅗. Final, three and a half miles—Fleckenstein, first; Graves, second; Kenny, third. Time, 2:15.

First heat for amateurs on stock machines—Dudley Steele, Harley-Davidson, first; Hildebrand, Thor, second; time, 1:21⅕. Second heat—Martinogni, Harley-Davidson, first; Wehrman, Indian, second; time, 1:33. Final—two and three eighths miles—Steele, first; Martinogni, second.

Four and three-quarter miles, for professionals—Fleckenstein, Cyclone, first; Meyers,, Indian, second; Kenny, Indian, third. Creviston had motor trouble. Time, 3:05⅘.

### CAMPING TRIP ON A DAYTON

Louis J. T. Lahrs, physical director of the Park Branch Y. M. C. A., Brooklyn, N. Y., has just finished a camping trip on which he used a Dayton motorcycle and Majestic sidecar. Mr. Lahrs, part of whose business is to study all forms of outdoor recreation, asserts that the outing just completed was the most successful he has known, although the sidecar was loaded with a great deal of luggage.

# SMITH CO. ADDS A BIG BUILDING

**Manufacturers of Motor Wheel Will Increase Floor Area by 50,000 Square Feet; Plan for 1916 Output to Triple That of 1915.**

MILWAUKEE, Wis.—An addition of 50,000 square feet is being built for the A. O. Smith Company, adjacent to its main plant in this city. This will give a total area of 388,000 square feet of factory space for the manufacturers of the Smith Motor Wheel.

The company further announces that its output in the little motor booster will be tripled in 1916 as compared with that of 1915. Extensive preparations are being made for a most intensive selling campaign to this end. General Manager W. V. C. Jackson of the Motor Wheel Division of the company, states that the factory is prepared for whatever demand may arise in connection with the Motor Wheel.

"There are 35 acres of ground here and the great part is as yet unoccupied," said Mr. Jackson. "We have every interior factory facility for an exceptional rush of orders, which we anticipate, and are equipped to add machines on very short notice. In fact, right now, arrangements for additional mechanical equipment are being made, and although we are handling present orders nicely, we will be ready for the rush which indications point to. Nineteen hundred and sixteen should be the banner year of all for the cycle trade."

## SICONOLFI, ON INDIAN, WINS THE MORON-LUJAN RACE

Buenos Aires, Argentina, September 12.—The Moron-Lujan—Moron road race, held here today by the Moto Sport Club de Buenos Aires, resulted in R. Siconolfi, Indian twin, winning the class for solo riders, and D. Deletang, Indian sidecar, capturing the class for sidecars. Siconolfi covered the 100 kilometres (62.1 miles) in 1:59, while Deletang rode the distance in 2:42.

A. Bonavera, Pope twin, was second in the solo class, his time being 2:04, and A. Bernasconi, on a Matchless 3½ horsepower mount, was third. Fourth place went to E. Villa, Indian twin. The times made were considered excellent, for the roads were very bad and there were many deep mud-holes and washouts.

## MILWAUKEE HALLOWE'EN PARTY

Milwaukee, Wis., Nov. 1.—Spooky ghosts, weird sounds, shaky floors and banisters with a sting in them formed part of the ghost walk was was a feature of the annual Hallowe'en party of the Milwaukee Motorcycle Club. After a ghost walk there were the old traditional games, bobbing for apples, etc., and the balance of the evening was given over to dancing to the music of the Paul Bruess orchestra.

The game program was in charge of the official hostess of the club, Miss Lillian Hauerwas, and she was assisted by the Misses Hazel Wotherspoon, Ernestine Langenberg and Martha Wehr. Then stories were told by Arthur Davidson. He related his famous Swede Baseball yarn. G. F. Magill, formerly of the Hendee branch at Chicago, but now with the Essanay film people, was one of the out-of-town guests of the club.

## NEW COMPANY WELL LOCATED

Cincinnati, Ohio.—The Advance Battery & Manufacturing Company, a company recently organized for the purpose of handling motor accessories, has secured quarters at 815 Race street, opposite the Business Men's Club. This section is almost wholly devoted to the automobile, motorcycle and accessory business.

# SALES OUTLOOK PLEASES HENDEE

**Big Chief Tells Stockholders at Annual Meeting That Orders Are Already in Hand for 2,500 Indians; Profits for Fiscal Year, $603,829.**

SPRINGFIELD, Mass.—The financial report submitted at the annual meeting of stockholders of the Hendee Manufacturing Company on October 28 showed profits amounting to $603,829 for the year ending August 31. The assets totalled $13,689,188, and the liabilities, including the company's stock capitalization, amounted to $12,831,908, leaving a balance of undivided profits of $857,279.

Samuel H. Miller, vice-president of the Chase National Bank, of New York City, was elected a director in place of Albert H. Wiggin, president of the bank, and Charles E. Childs, treasurer of the Hampton Mills, East Hampton, Mass., was made a member of the directorate to fill the vacancy left by the resignation of Clarence A. Earl, who left the Hendee company recently to join the Willys-Overland Company, of Toledo. The other directors elected were as follows: George M. Hendee, William E. Gilbert, Henry H. Skinner, Frank J. Weschler and Edwin A. Carter, all of Springfield, and William B. Thompson and Robert Winsor, of Boston.

George M. Hendee was elected president and general manager at the organization meeting of the directors, which followed the stockholders' meeting, and the remainder of the official staff was made up as follows: William E. Gilbert, vice-president; Frank J. Weschler, treasurer; Charles N. Hinckley, former assistant treasurer, was elected secretary, and John D. Stevens, formerly cashier, was made assistant treasurer.

In an address of optimistic tone at the meeting President Hendee stated that the company has on hand orders for immediate shipment for 2,500 Indian motorcycles, and that the new $150 Featherweight model is meeting all expectations as a seller, largely due to the fact that it is interesting a broad field of buyers who were waiting for just such a type. War orders filled at the Hendee factory during the last year covered 2,200 machines, nearly all of which went to Russia. The gross sales last year were $5,321,000, as compared with $5,693,000 in the year 1914.

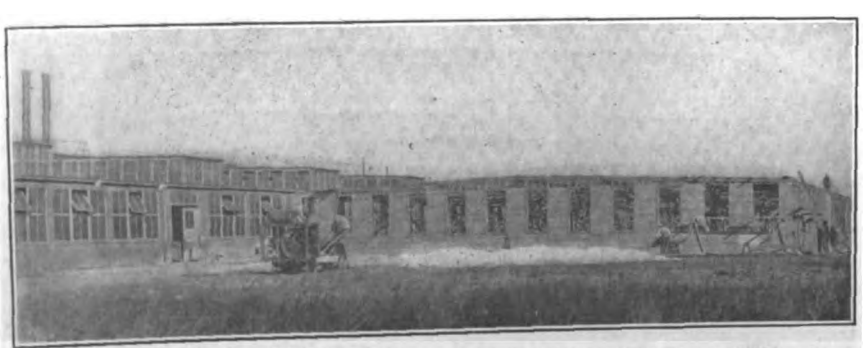
## INDIAN RIDERS WIN JAMAICA ENDURANCE RUN

JAMAICA, N. Y., Nov. 2.—When the scores made by the participants in the recent endurance run of the Jamaica Motorcycle Club were tabulated by the officials it was found that H. V. Mauritho, Jr., riding a 1913 single speed Indian, copped first place with one thousand points. Fred Frenger and Ted Efferts, Indian, both accounted for second position, piling up 996 points, while William Diederich, on a 1912 single speed Indian, took third honors with 995 points. Twenty-three riders will be given silver medals for finishing within the time limit, and the occasion of distributing the awards will be made a gala affair by the Jamaica M. C. club at its house.

Other scores made in the run are as follows: Geo. Conaty, H.-D., 991; C. Horn, H.-D., 986; Ed. Garnier, Excelsior, 995; W. Stuart, Indian, 979; Berten Walker, Indian, 978; Sam Billings, Excelsior, 978; C. R. Webber, Indian, 977; J. Gildersleeve, H.-D., and sidecar, Mrs. B. Braznor passenger, 974; Wm. C. Bollhoeffer, H.-D., 974; C. Carlston, H.-D., 970; Wm. Merkel, Excelsior, 969; Wm. Geiser, Indian, 968; C. Mutter, H.-D., 967; Leo Morrison, Thor, 965; H. Daufkirch, Indian, 964; L. Timmerman, Indian, 961; Jos. Ruderman, Thor, 953; W. F. Scholz, Indian, 936; F. P. Barker, Indian, 907. All hard luck stories have not yet been received for the "hard luck" prize, but a series of interesting narrations in this direction are being looked forward to by all participants.

## WILL ADD 50,000 SQUARE FEET WHEN COMPLETED



**Wing Under Course of Construction at A. O. Smith Company's Factory in Milwaukee, Wis., to Be Devoted to Motor Wheel Building Exclusively**

# TRADE MEN HERE FOR U. S. GOODS

**Motorcycles and Bicycles Are Included in Great Variety of Products Sought by Foreign Representatives Who Are Now at Washington.**

WASHINGTON, D. C.—More than twenty nations are represented by visitors to the United States who are now making their headquarters at the branch offices of the Bureau of Foreign and Domestic Commerce, Department of Commerce, and who are seeking new trade relations. It is stated unofficially that some of these representatives are empowered to place large motorcycle and bicycle contracts for the countries at war, while others aim to sign up for general lines, including machinery, in order to offset the shortage caused by the partial suspension of manufacturing in the warring nations.

A bulletin from the Bureau of Foreign and Domestic Commerce states that many of the visitors are members of foreign firms. Others are representing big commercial houses which offer unusual facilities for American manufacturers to establish agencies abroad. Reports from the branch offices of the Bureau indicate that the visitors are quite willing to make long trips to manufacturing districts if the wares offered come within their requirements, which goes to prove that the demand for all kinds of American products is unprecedented.

Among the countries represented by trade representatives here at the present time are Australia, Russia, Italy, Argentina, Spain, India, China, Canada, Japan, South Africa, Bulgaria, New Zealand, Brazil and others. Each week during the fall has added to the number.

While the classes of goods sought are of great variety, motor vehicles, tools and kindred lines are among the most prominent.

## GAVE UP CROSS-COUNTRY TRIP

San Francisco, Cal.—Lieutenant Hoffman, who started from Boston with the idea of cracking E. G. Baker's transcontinental motorcycle record, finished the trip to this city by train. Hoffman struck fifty-seven kinds of mud and some snow before he had been out long and decided that he had started at the wrong season to make a successful cross-country run. He sent his mount on to the coast by freight.

## ROLLER POLO AT RACINE

Racine, Wis., November 2.—Members of the Racine Motorcycle Club have become so proficient in the art of roller skating that the local organization has taken over the Racine team of the Roller Polo league. The Racine team has been one of the strongest in the league and the local motorcyclists feel confident of being able to sustain the reputation of their city as containing the best polo players on the little wheels.

# PLAN BIG SQUAD OF ARMY RIDERS

**Members of National Capital M. C. of Washington Enlist in a Body for Service in New Provisional Corps; Backed by U. S. Army Officers.**

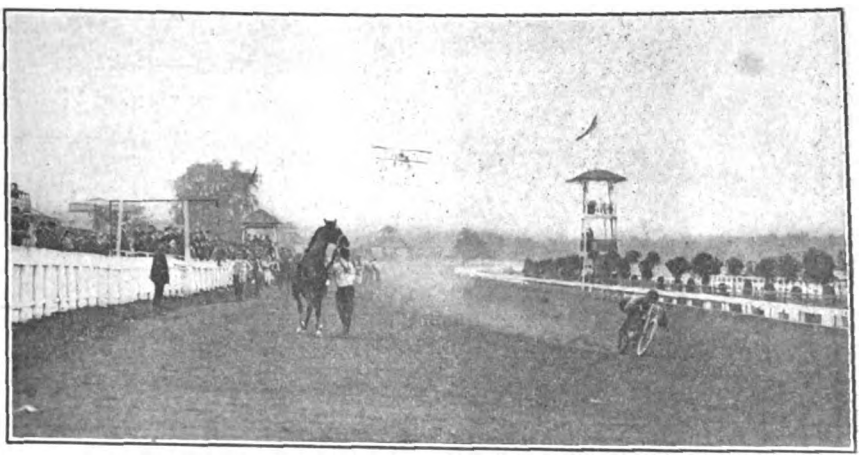
WASHINGTON, D. C., November 1.—Backed by an advisory board of retired United States Army officers acting in an advisory capacity, and with the active support of the National Defense League and the Navy League, preliminary steps were perfected in this city last week that are expected to lead to the organization of a large and efficient corps of military motorcyclists. Original plans that contemplated amalgamating the new organization into the National Guard of the District of Columbia have been modified, and the motorcycle squad is now expected to be entirely independent and self-supporting, but operating in close co-operation with both the National Guard and the Signal Corps of the United States Army.

The plan now in process of execution was originated almost a year ago by Captain R. A. Sturgeon, formerly of the Missouri National Guard, and Lieutenant Joseph R. McKey, of the District of Columbia National Guard, but owing to the reorganization at that time of the guard in this city, the scheme was postponed. At a largely-attended meeting of the National Capital Motorcycle Club last week, Captain Sturgeon and Lieutenant McKey laid their plans before about fifty representative motorcyclists. The riders present signified their approval by signing enlistment forms for membership in the new organization, and it is probable that the military feature will be adopted as a club policy at its next meeting, in which case the older organization will be merged into the new and the National Capital Motorcycle Club be hereafter known as a military body rather than a social organization.

Tentative plans, as outlined by the two officers responsible for the movement, call for an organization of about 250 motorcycle riders. These will be divided into various units, consisting of dispatch riders, scouting and wireless sections. The intention is that in actual service the new organization shall be very flexible, not only of use to headquarters staff for dispatch work, but as an actual fighting unit in advance base work, scouting, etc. The equipment plans, so far as worked out, provide that each rider shall be supplied with regulation army uniform, arms and equipment. At least four machine guns of a suitable type, mounted on sidecar chasses, will be included, with two wireless outfits having a radius of over one hundred miles. Members of the new organization will use their own machines in maneuvers and drills, a fund being provided to supply oil, gasoline and supplies, and to take care of any damage that may be sustained while the mounts are in the service.

Winfield Jones, Secretary of the National Defense League, and Secretary Dadmun, of the Navy League, have assured Captain Sturgeon of their hearty support.

## THREE TYPES OF RECORD-CHASERS ON ONE TRACK



**Al Stratton Is Setting the Pace on His Harley-Davidson, with the Aeroplane Well in the Rear and the Horse a Mere Spectator**

### HANDLING THE CYCLEMOTOR

Rochester, N. Y.—Following is a list of agents appointed by the Cyclemotor Corporation, of this city: W. R. Stroud, of Philadelphia, for western Pennsylvania; J. G. Wright, traveller in the Chicago territory for the Great Western Mfg Company, will handle the Cyclemotor in Illinois; Burton & Co., Watertown, N. Y.; Dunlap Sporting Goods Company, Rockaway, N. Y.; W. T. Thompson, Mt. Vernon, N. Y.; Miami Cycle Company, Miami, Fla.; Walter K. Francis, Batavia, N. Y.; Flynn Bros., Rochester, N. Y.; John Kimpson, Rochester, N. Y.

### GRUBB AND STEINKE SCORE

Reedsburg, Wis., November 2.—Herb Grubb and Rollo Steinke, two Baraboo boys, captured most of the honors in the recent race meet held here, which was attended by the largest crowd ever drawn by a similar attraction. Grubb captured the 5-mile event and Steinke easily took the 25-mile when Grubb had to stop to replace a spark plug. M. Debrey was referee.

### MORE ROOM FOR SUPERIOR

Elyria, O.—So rapidly has the saddle business of the Superior Metal Products Co. grown since the firm formally entered the field three months ago that plans have been completed for another building, 300 by 100 feet in area, and one story high, which will be an addition to the saddle-making department. The new structure will be ready in the spring and is to be of brick, glass, concrete and steel construction, after the type of the modern building now devoted to Superior saddles.

That the long months of testing and experimenting to which the company devoted itself before placing its saddle on the market have been fully justified by the instantaneous success of the new line is evident from the fact that President H. A. Jackson has been deluged by orders since the New York and Chicago shows, the sales jumping by thousands from week to week.

### A DETROIT HUSTLER

**Benny Flanders, Service Man and All-Around Booster for W. E. Wandersee**

### 45 RIDERS IN RUN STAGED BY VINELAND DEALER

Vineland, N. J., October 30.—Anthony Cresci, Jr., Harley-Davidson agent for this section, gave his annual time run to Fortescue recently. Forty-five riders all mounted on Silent Gray Fellows participated in making the affair a success.

Sheriff Marshall, of Cumberland County, started the contest, which was won by Charles Ramish in 1 hour and 21 minutes —the exact time chosen by Mayor Stevens of Vineland. When Fortescue was reached all riders sat down to a fish dinner and afterwards indulged in sport.

### SWINGLE AND ROTH ARE STARS

Prairie due Chien, October 30.—Dan Swingle and Arthur Roth carried away most of the money in the two days of racing promoted by the Gays Mills Fair Association, Swingle winning the 5 and 10-mile races the first day and the two 5-mile events on the second's program, while Roth captured first place in the first day's 10-mile and in the 5-mile the next day. Howard Campbell, La Crosse, took second place in each. The meet was managed by J. E. Harris and William Johnson was timekeeper.

### AFTER SALES IN THE ORIENT

San Francisco, Cal.—The Pacific Trading Company has sent a representative to the Orient with a Smith Motor Wheel demonstrator, and will have a shipment of ten of the machines follow on the next boat. This is the second invasion of the Smith Motor Wheel into the Far East, it having made its appearance a few months ago in Japan.

# IN THE VALLEY OF THE BEAUTIFUL AND THE LAND OF DEAD THINGS—Part II

By JOHN E. HOGG

Above—Going Through the Mountains Near San Bernardino, Cal.,
Left and Right—Stopping on the Summit of the Cajon Pass

COMING near the Sierra Madre Range, we found the going better, but our desert troubles were by no means over, for, in addition to the desert sand, we encountered a series of washes that lead down from the mountains. We encountered a dozen or more of them in half as many miles, and to say that the going across them was "a fright," is putting it mildly. They were all the way from a few hundred yards to a quarter of a mile in width, filled with bottomless alkali dust and strewn with rocks and boulders.

It was half way across the third wash that we took our second spill. My sight had diminished to a point where I only had a faint idea of where I was going, and we came to grief when the motorbase climbed on to a rock and refused to go on over. We simply spun around sidewise and flopped.

We both felt like lying in our tracks, just where we had fallen, but knowing that to do so might be disastrous, we pulled ourselves together again and in low gear proceeded carefully to the other side.

### Cool Drink at Last

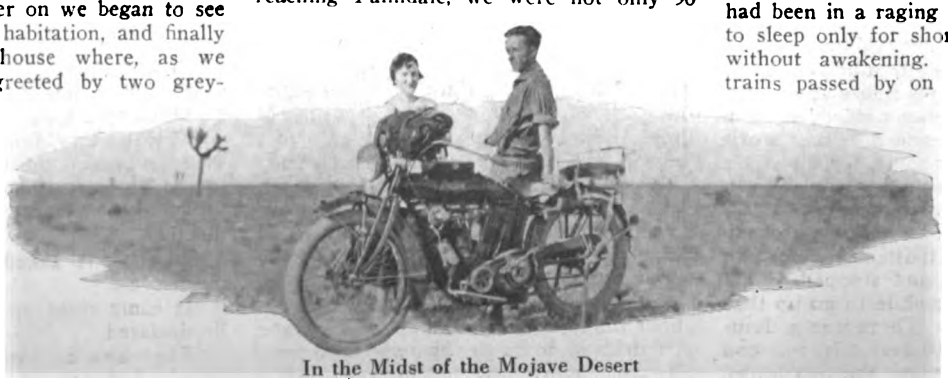
Our joy at coming to the next wash and finding that it had about eight inches of fine cool water flowing through it, can better be imagined than described. That wash came down from the melting snows of the mountains. After a cool drink and a wash in the stream, we both felt greatly refreshed. It also seemed to have a wonderful restorative effect upon my inflamed eyes.

A few miles farther on we began to see evidences of human habitation, and finally came to a ranch house where, as we stopped, we were greeted by two greyhounds that came out and barked until a ranchman with a face tanned to the shade of Cordova leather came out to see what was up. We had a friendly chat and were delighted to learn that we only had about three more miles of desert before coming onto good clay road, where the ranchman declared that we could hit it up just as fast as we pleased.

This was indeed pleasing news, as the sun had now sunk below the horizon and we knew it was only a matter of a very few minutes before it would be entirely dark. We realized, of course, that with this sort of conditions we would easily be able to reach Palmdale, where we would stop for the night.

We found the road to be exactly as the ranchman had informed us. Although it was nothing to brag of, it felt like a boulevard by comparison with the roads we had come over. We had no more than gotten well under way when a jackrabbit jumped up in front of us and tore along at a 45 mile an hour clip, right ahead of us, and we chased him for nearly half a mile before he sidetracked into the sagebrush. We took this nine miles of good road at tremendous speed, and it certainly sounded good to us as we dropped down over the brow of the low-lying hills, and heard the "puff, puff, puff" of a Southern Pacific freight train as it labored up out of the hills.

Palmdale is really nothing more than a wide place in the road. It is on the Southern Pacific Railroad, with a railroad station, a watering tank and a hotel. There is also a garage and a cluster of houses. We had expected to get back to the city that night, but long before we got out of the desert we had realized that we were confronted by a sad impossibility; for, on reaching Palmdale, we were not only 90 miles from home and on the wrong side of a mountain range, with mile after mile of tortuous mountain roads to be negotiated, but we were both of us so tired out that we felt it would be useless to proceed further.



In the Midst of the Mojave Desert

### Stop at Palmdale

Under the circumstances the only logical thing to do was to stop in Palmdale tor the night. We therefore put our machine in the garage and betook ourselves to the Palmdale Inn. Although in a mere village, it is about as neat and well-arranged a little hostelry as anyone would care to visit.

After a hot bath and supper we called mother on the long-distance telephone and told her where we were. She was disappointed, of course, that we could not get home that evening, and told us that we had missed a good supper. We were disappointed ourselves, but under the circumstances there was nothing else to be done. We were both terribly sun-burned, and at the table Ruth swiped the olive oil bottle and took it to her room. After she had finishing making an application of it to her face and arms, she set it out in the hall, where I got it and took my turn at it; and oh! how good that oil did feel as I applied it to my sun-burned nose and forehead.

### Unable to Sleep

I was either so tired, or so sun-burned, or so worn out, that I was unable to sleep. My eyes felt as if someone had rubbed pepper into them. My face burned as if I had been in a raging fever, and I was able to sleep only for short intervals at a time without awakening. Three or four big trains passed by on the Southern Pacific road. They went through the town like beans through a down spout with the most terrible of noises and creating miniature earthquakes as they went. There was a crazy old dog that sat right under my window and bayed at

Digitized by Google

the moon, until in desperation I got up and fired the water pitcher out at him. It had the desired effect, and after the dog quieted down, I got to sleep. It seemed that I had no more than gotten asleep when I was awakened by the "gobble, gobble, gobble" of a big turkey gobbler, just outside my window. I was just staggering out of bed when there came a knock on my door, and I heard Ruth's voice saying, "John, are you going to get up? It's five o'clock, let's be on our way."

### Going Down, Down, Down

After a good ham and eggs breakfast we said good-bye to Palmdale-on-the-Desert, and were on our way, down through the mountains and off toward the valley through Mint Canyon. Mint Canyon is really very similar to Cajon Pass. All the climbing up that we had done through the Cajon Pass, we were now taking down through Mint Canyon. It was simply mile after mile of winding mountain road, down, down, down, continually; places where we pushed the clutch out and coasted for mile after mile, and I stood on the brake pedal until my limb ached. It was 37 miles from Palmdale to Saugus, in the mountains all the way. Beautiful scenery on every side, and I don't think I ever saw so many jackrabbits in all my life. Jackrabbits every place. They jumped up out of the bushes helter-skelter on both sides of the road, and ran in front of us.

At Saugus we came onto the San Fernando valley road, which is boulevard all the way into Los Angeles, 35 miles of road that is just as smooth as a floor. It certainly was a joy to get onto this road, after all the abomination that we had to come over. We put the miles back of us at a great rate, and were soon past the town of Newhall and the great Newhall tunnel through the Sierra Madre range of mountains.

### Nearing Los Angeles

The country about the Newhall tunnel is some of the most beautiful in the vicinity of Los Angeles, and is a favorite resort for all the motion picture companies for getting scenes and background settings for photoplays. Here also they find the atmospheric conditions most favorable to photography practically the entire year round.

The remaining distance in through San Fernando, Pasadena, and to Alhambra was merely a joy ride through the cool of the morning. We were soon back on the balmy Callé Hidalgo and were home again.

That evening we sat out on the veranda in the cool contentment of an evening breeze that blew in alternate scents of roses and honeysuckles, and watched the moon rise over the snows of the mountains at the east side of our beautiful valley. But no longer did we look at those mountains and wonder what was on the other side of them. The combination of a modern motorcycle, the Cajon Pass, and a keen desire for knowledge had cleared up the mystery of the desert that lay beyond the mountains.

# A MATTER OF TIME

**Why a Skeptical Farmer Finally Decided to O. K. His Son's Plea for a Three-Speed Motorcycle.—By R. S. Spears.**

"IT'S no use, boy, we can't afford it. You don't seem to realize what a heap of money $275 amounts to! Why, the interest on that much money would be $8.25 a year at the bank. Two hundred and seventy-five dollars would pretty nearly buy a team of horses. It'd buy more wagons than we'd wear out in a hundred years. No, sir! A farm isn't any place for a motorcycle!"

Mr. Dolen shook his head. He didn't like to refuse his boy anything in reason, but $275 for a kind of a bicycle with a sort of gas engine slung in the frame—it was out of question! There were lots of ways of spending money on the big farm, without buying that kind of a toy. That was Mr. Dolen's opinion.

'Gene knew that he could not argue the matter just then. It was out of the question. His father owned a farm away up on the top of the ridge west of Middleville, the lowest part of which was a thousand feet above the West Canada creek, not two miles away. It was a fine farm. The hay was good, the crops of corn and oats were larger than most in the neighborhood, and Zenas Dolen had made a notable success up there among the clouds, so to speak.

He was a progressive farmer. He built his own telephone line up to the summit; he had a hydraulic ram that filled his cattle tanks and watered two acres of garden; he was thinking of putting a dynamo down on the stream where the ram worked to light his house and barn; already he had a gasoline motor to saw fire wood, cut silage and do other work around the place.

Every year for ten years he had gone down to the automobile agents in the valleys and said that he would purchase the first new car that came up the Diamond Back road and stopped at his gate. The first automobile to go up that hill was yet to come. There was a thousand feet rise in 9,000 feet. It was too much for the gears of the machines. Some could have made it, except that the road was rough and rocky, and the pitch was so steep that both hind wheels of a wagon had to be chained for the trip down.

Even the motorcycles tried in vain to make the ascent. It was a "stunt" that no rider succeeded in doing till the days of the three-speed machine. Even Vernon Vedder, the champion hill-climber of the Mohawk valley, had essayed the hill in vain, and what he could not climb none could climb on a two-speed.

### Then Along Came a 3-Speed

But one day a motorcycle came climbing up over the road gap of the divide, turned up through the Dolen barn yard and went right on up the sloping hay field and stopped in the oats at last, silhouetted against the sky where no other motorcycle had ever been before. The rider was a 200-pound man, and he looked off across the southwestern part of the Adirondack mountains with great satisfaction.

While he stood there, 'Gene Dolen came hurrying up the hay field and along the oats field haul road to where the man sat.

"Say, mister!" he exclaimed, "what did you do to your machine so you could climb that Diamond Back road? Nobody ever rode up here on a motorcycle before!"

"Is that so? Well, then I'm a pioneer, am I? Well, well. But I didn't do anything to the machine. This is one of those new three-speed machines that you've read about in the advertisements—there are a lot of them on the market. You see, on high gear, you use all your power to make sixty miles or so an hour; then on intermediate speed—that's about the low of the former two-speed machines—you use all your power to get about thirty-five miles an hour; but when you drop it down to low, why you have all your power—about 15-horse—when you are going about nine or ten miles an hour. You see the difference—a light horse goes fast, but it can't haul the load of a big dray."

"Yes, sir, I understand. We've a 12 horsepower motor on our place. We put on a small drive wheel to saw wood, but a big one to cut corn or run a fan."

"That's exactly it."

"And you rode right up—didn't have to walk?"

"Not a step. Fact is, I stopped on the steepest place down there and then started up, and it brought me right along. The only fault with the machine is that it hasn't a brake to keep us from starting backwards when we stop on a steep incline."

"How much did it cost?"

"Three speeds cost about $275."

"Yes, sir; thank you, sir. You see, it's a long way up here, and it takes a lot of time to climb this hill with a horse. You came right up—I saw you—eight miles an hour, right up this hay field."

"About that, I think."

Having looked at the scene again, while 'Gene stared at the motorcycle, the man told 'Gene to get on behind and he would take him down to the house. 'Gene got on the luggage carrier seat, and as he had ridden a bicycle, naturally balanced himself while they coasted down to the yard, and there Mr. Dolen greeted them with a smile.

"That's all right to run around on," he said, "but I like a light spring wagon that'll carry a load."

"This'll carry four hundred pounds," the man argued, but the farmer shook his head. The man smiled and rode on down into North Frankfort, about ten miles distant.

Then 'Gene asked point-blank for a motorcycle.

"It came right up here to the door!" he declared.

"That isn't an automobile," his father

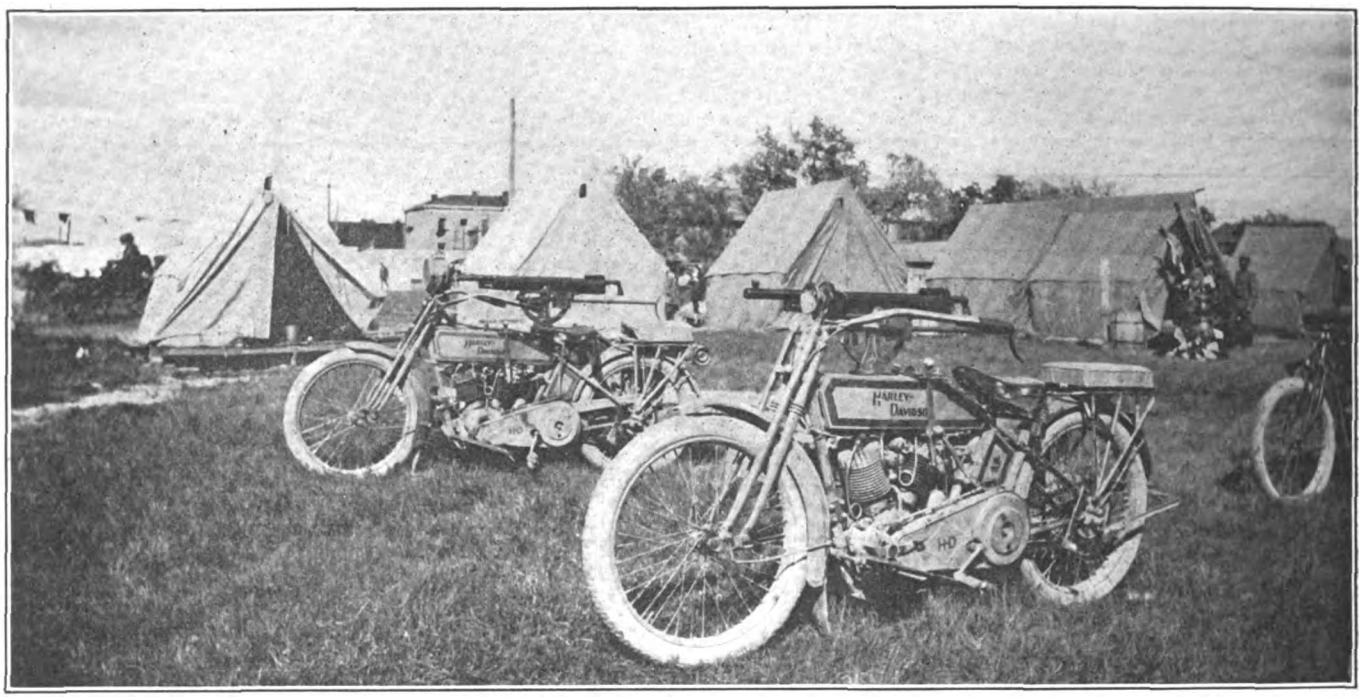
# ROSWELL, N. M., HAS A MOTORCYCLE MACHINE-GUN CORPS

## Remarkable Efficiency Shown Despite the Heavy Weights Carried When In Action



**Two of the Motorcycle-Machine Gun Outfits Which Are Part of the Regular Equipment of the New Mexico Military Institute**

ROSWELL, New Mexico.—The first, and indeed, the only machine gun corps in the United States is here at Roswell, and is a part of the regular equipment of the New Mexico Military Institute. Complete in every detail, the corps consists of four motorcycles, with attached side-cars, on which are mounted Colt automatic, 30 caliber, machine guns. Instead of the regular gun-mount, however, a mount with shorter legs and no saddle is used, the same being fastened to the car by means of a quick releasing device which permits two operators quickly to remove the piece and set it up preparatory to firing. The side-cars are without springs. The ground over which the machines are intended for use is rough, and springs would give the gun carriages a rocking motion.

### What the Machines Carry

Some interesting data in connection with these machines is enumerated below:

| | |
|---|---|
| Weight of gun (with short tripod) | 95 lbs. |
| Weight of ammunition (six boxes, or 1,476 rounds, to a gun carriage) | 114 lbs. |
| Weight of two operators, pioneer tools (wire-cutters, sledge hammers, trenching tools, etc.), and repair equipment for guns and motors | 375 lbs. |
| Speed | 20 m. p. h. |

The speed given is an average maintained for fifteen minutes over rough prairie, hence where regular roads may be used a correspondingly greater speed can be made. In a recent test these machines, carrying full equipment, attained a speed of 43 m. p. h., and held it for a thirty minute run over a fair road. In another test, a trial trip from Roswell to Dexter, 18½ miles were covered in twenty-three minutes, nothwithstanding four bad turns in the road and a severe grade. The total weight on the machine making the run was something over 500 pounds.

### Experimental Stage Is Past

This machine gun corps has been in operation for two months. The experimental stage has been successfully passed. The corps has demonstrated the efficiency and flexibility of the machines to the public at the state fair and at various county fairs; and usually some form of target has been fired at.

Full credit for the Roswell squad should be given to B. F. Leonard, ordnance sergeant at the New Mexico Military Institute, who not only conceived the plan, but carried it into effect. Sergeant Leonard is a retired soldier, who in addition to his army work has had a somewhat varied career as a sailor and as a mechanic. He has achieved no little reputation in the Southwest as a motorcyclist, and at present has a new project—that of utilizing the side-cars of motorcycles to carry the necessary equipment for a field wireless corps. He expects to put this branch of the school service in the field during the latter part of the year.

In the operation of the machine guns, Sergeant Leonard has a remarkably well-trained group of cadets. They show wonderful proficiency in estimating distances; signaling; operating and caring for the guns; in driving, and making quick road repairs on the motors.

**Machine Gun Ready for Action After Dismounting From Sidecar**

## PHYSICAL DIRECTOR AN ENTHUSIASTIC EXCELSIORITE

Norwich, Conn.—Orville H. Nickerson, physical director of the local Y. M. C. A., is the enthusiastic owner of an Excelsior, which he uses to carry him between his summer camp at Gardner's Lake and the association building in Norwich. The camp is about ten miles out of the city, but it is not often that Nickerson rides directly home after his day's duties are ended. He is piling up considerable mileage on his daily trips as it is.

## ONTARIO REGISTRATIONS

Toronto, Ontario.—According to figures issued by the Provincial Secretary's Department, there are 4,176 motorcycles in use in Ontario, or 543 more than were registered on December 31, 1914. This increase is less than the advance made in 1914 over the previous year. Last year the number of motorcycles registered by the department was 3,633, while in 1913 the total of machines in Ontario was approximately 2,900. The war, of course, is blamed for the smaller increase this year, but the motorcycle dealers have probably made as much money, and perhaps more, as a great number of motorcycles have been re-sold as used machines and the sale of accessories has been heavy because of the renovation of so many old mounts.

# THE FINAL LEG OF MY SIDECAR TRIP WITH WERLE

## Scouting by Motorcycle for Data to Support Anti-Tuberculosis Campaign

By HUGH SHARP

BARABOO, Wis., is famous for being the winter quarters of Ringling's circus, so it was with considerable interest that Werle and I rolled into this pretty little town on our way home after a week's trip around the state. Ted had been out to accumulate a new batch of material for his health exhibit, which was being prepared for the Wisconsin Anti-Tuberculosis Association, of which Ted is the motorcycle field worker.

### Not Like a City Zoo

But Baraboo, as far as its winter zoological attractions were concerned, was a bitter disappointment. Instead of seeing elegant parked ways lined with pretentious animal houses and beautiful cages we found Ringlingville to be nothing but a group of tumbledown shacks and some fair-sized barns.

But we did find the town of Baraboo beautifully laid out in parks and driveways. Just north of the town is Ableman, situated in a vicinity full of splendid marble formations, and America's greatest marble center. Many of the country's finest buildings depend to a large extent for their beauty of interior on the marble which comes from this little place near Baraboo. The road passes through huge blocks that sheer straight up alongside the tourist and scintillate in marvelous tints in the sunshine.

We passed through Ableman at night but went back next day to get a glimpse of its wonderful marble quarries. We reached Baraboo about 9 o'clock. Ted had converted the sidecar into a Pullman and had been fast asleep for the fifteen miles preceding. Opposite the hotel was the public park where a band concert was in progress and a lively time was too much for Ted, and he opened his eyes in profound surprise.

### Ted Knew Nothing About It

"Wha-wha-where are we," and he rubbed his sleepy peepers.

"Baraboo—they got out the town band to meet us. That was some slide we took going around that curve out there."

"Where was that?" asked Ted, and I was glad he had slept through the one little incident that came near wrecking the health dispensing crew. The machine we were using had a Prest-O tank that had rightfully expired several hours before this particular happening, but I had been nursing it along, not thinking Baraboo was as far off as it turned out to be.

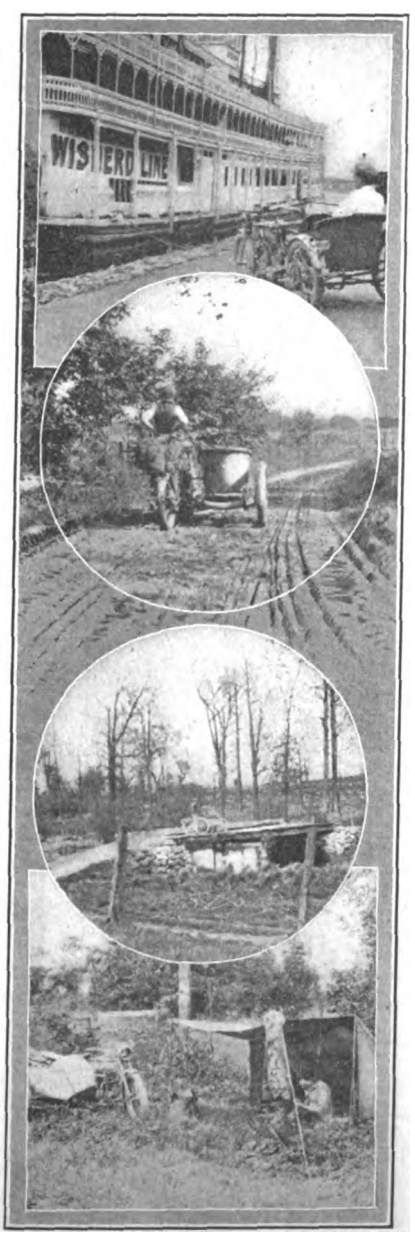
Leading into Baraboo from the north is a stretch of concrete highway, and when we hit that I opened up wide, the feeble glimmer of our lamp barely lighting up twenty feet ahead of us.

Suddenly the road made a sharp left hand turn. Slam went the brake and in less time than it takes to relate the fact we were turned around and heading back to where we had come from. It was a prank of fortune that I happened to glimpse the turn in time or it might have been goodnight for the pilot. Ted was buried down in the sidecar with his head on the seat and might have escaped serious damage if we did run off into a fence or brick wall or something.

### Sand Without a Bottom

The trip from La Crosse to Baraboo, although it was only ninety odd miles, was one of the most strenuous of our tour. The greater portion of the going was through sand of a variety that we had not encountered before. This sand was bottomless. Kind hearted farmers—perhaps they owned automobiles—had strewn grass and hay over the top in some places and that helped a little.

We made one mistake. When we left Wilton we were given the choice of the valley road or the high road, going up over the hills. Scenting scenery, we chose the latter. The road selected was all right once you got up onto it, but getting there involved climbing two terrific hills, the worst heart-breakers in the state.



Top—Mississippi Paddle Boat Seen at La Crosse, Wis. Two Circles—Road Glimpses of the Journey Through the State. Bottom—Werle Making Notes After Day's Ride Through the Country

### Dirt Collectors Hit Frame

One went straight up on a 30 per cent. grade for half a mile, and every hundred yards or so a log had been thrown across the road to keep the surface from washing away. These dirt collectors stuck up so high that they hit the motorcycle frame and then we would have to lift the outfit over. Ted's improvised tow line did heroic duty. Running alongside to gather momentum and hopping into the saddle put me into a state where I heartily seconded Ted's actions by flopping down full length on the grass beside him. Then came another hill, almost as bad as the first. Oh, there was the obliging Wiltonite that recommend either road! We found out that the valley road should be taken by tourists going south, but going north it is advisable to hit the other road as the worst hills are all taken going down. Going north one hits the choice of roads on leaving La Valle.

An incident that we will both remember for a long time happened near Wilton. We shot through a cross road and after we did it Ted questioned the route, so we stopped at a farmhouse and inquired of several ladies sitting on the porch. Finding we were wrong we retraced our route and took the turn at the crossroad. We had gone about a mile when suddenly several farmers came running up the road toward us brandishing hats and pitchforks.

We looked back and there was no sheriff in sight. We wondered what the excitement was all about! Coming up to the men we stopped. We were ready for anything.

"You're on the wrong road," said a pleasant voiced farmer. "Didn't want you to go out of your way."

### Ladies Telephoned Warning

The ladies had watched us take the wrong turn and had telephoned down the road we took to head us off. That was one of the pleasant happenings of our trip. It may have seemed insignificant to a seasoned tourist, but to me it represented a thoughtful accommodation for which I have wanted many times to extend thanks in a letter; but we did not get the ladies' names.

The last day was devoid of sensations. We were both anxious to get home, as our trip had lasted two days longer than schedule. Ted had another trip planned northward for a series of lectures at Marinette, where an election was pending, in which one of the chief issues was to be an appropriation for a sanatorium. Besides, I knew that the boss was getting anxious, wondering whether I thought he was paying me for gallivanting around the country.

Ted gathered an immense amount of material. The health exhibit was a success. Ted wrote a rattling good poster around that little shack with the tuberculosis history, using the picture which appeared in **Motor Cycle Illustrated**, enlarged, as a center piece.

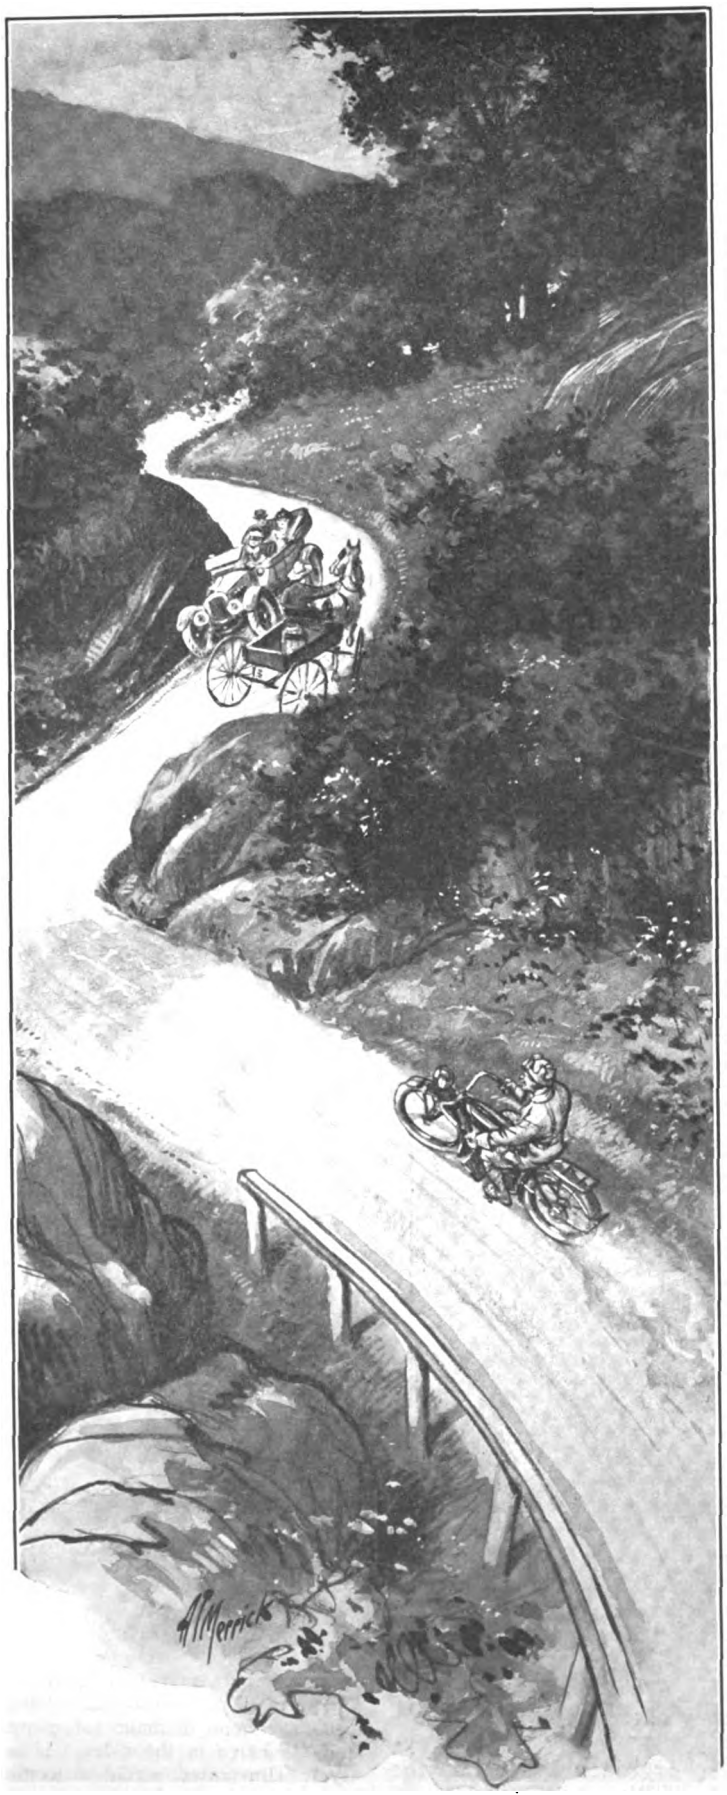
## HAS IT EVER STRUCK YOU—



That When You Are Making a Difficult Grade with Unexpected Success You Are Almost Certain to Encounter a Skittish Horse and an 80-Horsepower Automobile, Occupying the Whole Road Around a Turn?

# MAY BAR CYCLES FROM FIFTH AVE.

**New York Police Commissioner Would Keep Them Off Famous Thoroughfare Between Washington Square and Sixtieth Street.**

MOTORCYCLISTS and bicyclists of New York City who wish to continue using Fifth avenue between Washington square and Sixtieth street will have to file an immediate protest with the Board of Aldermen in order to prevent the adoption of an amendment to the traffic ordinances which is designed to place a ban on the two-wheelers in the district mentioned. The corporation counsel has stated that the police have no power to make such a ruling and that the matter must be dealt with by the city fathers in the form of an amendment. This at least permits of the filing of a formal protest, and may bring about a reconsideration of Police Commissioner Woods' recommendation which asks for the restriction on cycles—if prompt action is taken.

The proposed ban on cycles between Washington square and Sixtieth street is part of a general scheme for relieving traffic congestion on Fifth avenue. Other provisions refer to public hacks, the speed of commercial vehicles, etc. The aim is to deflect some of the present Fifth avenue traffic to other thoroughfares.

In view of the fact that hundreds of motorcyclists daily traverse Fifth avenue between the points above mentioned and that other north-and-south arteries open to them involve rougher and more hazardous riding, it is evident that the prohibition against cycles would impose a considerable hardship.

## FIRMS WHO WILL EXHIBIT AT AUTOMOBILE SHOWS

IN addition to exhibiting at the New York and Chicago motorcycle and bicycle shows, a number of manufacturers of motorcycle and bicycle accessories will have stands at the forthcoming automobile shows in the two big cities. Stevens & Company, of 375 Broadway, New York; the Victor Auto Parts Co., of Cincinnati; Van Cleef Brothers, of Chicago and Peter A. Frasse & Co., of New York are among this number, as is also the Spitler Plug Co., of New York.

Other makers of goods for the cycle trade who will exhibit at the automobile shows, but who were not represented at the cycle shows are the Morrison-Ricker Mfg. Co., of Grinnell, Iowa; the Rutherford Rubber Co., of Rutherford, N. J.; the Silvex Company, of New York; Superior Lamp Mfg. Co., of New York; Charles O. Tingley, of Rahway, N. J.; White & Bagley Co., of New York; Sharp Spark Plug Co., of Cleveland, O.; Philadelphia Storage Battery Co., of Philadelphia; Asch & Co., of New York; B. & L. Auto Lamp Co., of New York; Fitzgerald Mfg. Co., of Torrington, Conn.; J. H. Faw, of New York; Emil Grossman Mfg. Co., Inc., of Brooklyn.

# On the Fence

IT is true that the farmer, generally speaking, is more prosperous today than for years past and that he is a proportionately good motorcycle prospect. But it is equally true that he is unlikely of his own accord to seek out the motorcycle. There are so many capable salesmen bringing their wares to his door that his attention and his funds are soon fully occupied. Most active among those who camp on the farmer's trail is the automobile agent. On all sides he is ruthlessly cutting into the opportunities of the motorcycle dealer.

The farmer is on the fence. He is open to argument. He has the money and the inclination to spend—and he is willing to be "shown." In seven cases out of ten a motorcycle, or a sidecar combination, will meet all his requirements. But he does not know that. It remains for the motorcycle dealer to tell him—early and often.

## HOW MANY CORKING GOOD PHOTOS HAVE YOU?

Unusually striking photographs, suitable for use as cover illustrations, are always welcomed by **Motor Cycle Illustrated,** and are paid for at a special rate. Correspondents and readers in general who may be interested in photography are invited to give particular attention to such subjects and to submit them to this journal, addressing them to the Editor. A prompt remittance will be made for every photograph accepted as a cover illustration, and those which do not meet the requirements of the Art Department will be returned without delay if such instructions accompany the pictures.

The essentials of a good cover illustration are: (a) a strong artistic appeal; (b) presentation of the motorcycle's, or bicycle's, advantages in such a way as to make a pleasant and lasting impression; (c) such an arrangement of contrasts in the photograph as will permit of effective reproduction in colors. There are many minor considerations bearing upon the selection of a cover illustration, but the above suggestions will afford a general basis upon which to judge photographs.

If photographs are to be returned, instructions to that effect should always be written with a *soft pencil* on the back.

Look over your photographs and see if you have a picture that is striking enough to be given a country-wide display on the front cover of **Motor Cycle Illustrated.** If so, we will be just as pleased to receive it as you will be to see it artistically reproduced.

**The man who is selling motorcycles ought to inspire confidence by riding one himself. A fountain pen salesman who filled out his order with an old-fashioned quill wouldn't get far.**

## SUGGESTIONS FOR THE CLUBS

This is the time of year when motorcycle clubs that have been active throughout the summer begin to feel the pressure of various cold-weather amusements and suffer lapses of interest, followed by thinning memberships. That there is no justification for this attitude upon the approach of wintry weather has been demonstrated by quite a few wide-awake clubs throughout the country, and **Motor Cycle Illustrated** will devote space to all suggestions offered for keeping up club spirit during the winter season. How does your club bring its members out on meeting nights—and other nights—during the period when snow and icy winds have reduced road fellowship to the minimum?

It may be that you have an interesting photo of your clubrooms, showing what you have done to make the quarters cosy and attractive to the riders; if so **Motor Cycle Illustrated** would welcome an opportunity to print the picture and tell what your organization is doing to stimulate interest in motorcycledom the year round.

## VISITING RIDERS GUESTS AT ST. JOSEPH M. C. SMOKER

ST. JOSEPH, Mo.—The St. Joseph M. C. of this city gave a smoker on the evening of October 16 at the club rooms, Tenth and Francis streets, for the entertainment of visiting riders who participated in the races at the Motordrome on the Sunday previous. All the riders attended, as did Jack Prince, the well-known track builder and race promoter, who is back of the Motordrome. This is Prince's first public appearance for a long period and he was welcomed with enthusiasm.

Arch Strong, Hendee traveler, made a strong plea during the evening for the local club to join the F. A. M. He succeeded in arousing enthusiasm toward this end, and 15 of those present put in their applications for membership in the national body. The visiting riders were all called upon for short talks and all responded. Jack Prince made a speech which was well received.

Those present were Jack Prince, Ray Creviston, Morty Graves, Tony Fleckenstein, T. McNeal, Roy Shaw, George Meyers, F. P. Martin, Glen Smith, Frank Meir, M. Alfasser, Richard Seward, Elmer Young, Ross Seizer, Frank Klepner, Arthur Weherman, Charles Willetts, Carl Gabriel, P. Savereno, Fred Wetlich, Rice Elliott, Lloyd Fleishman, Miller Blunt, Dr. Snyder, Claud Wright, Earl Poteet, A. E. McCarthy, and A. M. Carthy.

### THEY ARE PROUD OF BURDICK

Norwich, Conn.—Residents of this city have reason to feel proud of "Wild Bill" Burdick, otherwise Herbert F., not only for his achievements on the track, but also for his representing Connecticut in the Inter-State Rifle Team Matches at each annual meet. Burdick belongs to the National Guard, and qualified sufficiently high as an expert to make his State rifle team.

Burdick has to his credit a number of victories on the Danbury track, his last performance netting him three firsts and a third. He has shown his speed on the local oval against riders like Fred Nixon and Eddie Carroll and A. B. Carlson, the New England cracks. He will compete in a number of the big meets next season, it is announced. Burdick rides an Indian.

### "SHORT GRASS GIRL" MARRIES

Pratt., Kan., November 1.—Dr. B. J. Patterson, former president of the F. A. M., has announced the marriage of his daughter, Miss Inez Patterson, of "Short Grass Tour" fame, to Harry Arble, of this city. Both bride and groom are nineteen years old, and the wedding resulted largely from Cupid's efforts at the last tour of the Short Grass Motorcycle Club.

### OLD CLUB AGAIN ACTIVE

Columbus, Ohio, November 2.—The Franklin County Motorcycle Club of this city is being revived after a period of inaction extending over a portion of the summer season. Several meetings have been held at the Belt-Barr Motor Company's sales rooms, and another will be held soon when officers will be elected. It is planned to have a series of social sessions, and the proposition of limiting the membership has also come up and will probably be approved.

# With the Manufacturers

### BIG MILEAGE FOR 1,000 GOODYEAR TIRE USERS

Akron, O.—As the result of a tire mileage investigation made recently by the Goodyear Tire & Rubber Company, of this city, the average of one thousand users of Goodyear tires was found to be 9,974 miles. Of these, one user, W. S. Hussander, of Chicago, Ill., had covered 23,000 miles according to his own report, while a Louisville, Ky., medical man had covered 25,000 miles with one of his Goodyears. The names of the users with their mileages has been published in a neat booklet issued by the Goodyear firm, and the mileage investigation results will be the subject of an exhibit at all Goodyear branches during the week of November 1.

### BRITISH ADMIRALTY APPROVES THE DIXIE MAGNETO

That the British admiralty recognizes a first class article in the ignition line is proved by its recommendation and formal approval of the Dixie magneto, manufactured by the Splitdorf Electrical Company, of Newark, N. J. The admiralty put the Dixie through the required severe tests, and made its recommendation for use of this machine in aircraft.

### ANOTHER BIG CONTRACT

We are informed by the Badger Brass Manufacturing Company that they have just secured a contract from the Excelsior Motor Manufacturing and Supply Company, of Chicago, for the latter's 1916 requirements on all electrically-lighted Excelsior machines. This is in addition to the contract, received some time ago, for all the requirements of the Harley-Davidson Motor Company.

### R-S AGENTS APPOINTED

Reading, Pa., November 2.—The Reading-Standard company announces that Gus Rotholz, of New York, has renewed his contract as distributor for Manhattan and the Bronx. He has signed up A. Stenfeldt, of 521 East 149th street, as sub-agent to cover the Bronx. A. H. Patterson, of Brooklyn, has been appointed distributor for Long Island, while F. W. Anderson has taken the Albany agency for the R-S.

### IDEAL WHEEL CO. FORMED

Massillon, O., November 1.—The Ideal Wheel Company has been formed in this city for the purpose of manufacturing wheels for automobiles, motorcycles and aeroplanes. No directors or officers have been elected yet. It is reported that the Ideal wheel will be constructed of steel, that steel springs will be used as spokes, and tires will be of the airless cushion type. The company will start business by making automobile wheels and will employ about 25 men. Arno Merkel, of Cincinnati, one of the owners of the patent on this wheel, will be general manager of the concern.

### OIL SLOT MACHINES TO BE MADE IN OWENSBORO PLANT

Owensboro, Ky., October 30.—The Hull Pump and Tank Company has just been incorporated with a capital stock of $100,000 to manufacture self-registering or automatic oil pumps which will operate by placing a coin in a slide. The pumps are so arranged that the amount sold for a stated price can be changed by moving a thumb nut. These tanks will be installed in retail establishments and on the sidewalks, and will not have to be attended by an operator. The company expects to place the tanks on the market about January 1. The incorporators of the company are: W. D. Hull and J. J. Trefz.

### GENEROUS GOODRICH OFFER

Akron, Ohio.—Delay on the part of the city in paving a long stretch of Main street, a prominent thoroughfare, on account of lack of funds, led the B. F. Goodrich Company to offer to do the work at its own expense, as a sort of donation to the public. The city authorities have not yet announced whether they will accept the offer.

### SVENSGAARD SALES ACTIVE

Detroit, Mich.—The Harry Svensgaard Sales Corporation, Excelsior agents in Detroit, and who also manufacture Pullman sidecars, report recent sales to Australia, Sweden and Southern California dealers. The factory at Ionia, Mich., has been considerably enlarged in order to provide for an increased output.

### RUBBER MEN GET 15 PER CENT. RAISE

Akron, O.—About 1,500 machinists employed by local rubber factories and allied industries have had their wages advanced 15 per cent. The increase was made voluntarily by the employers.

### KILLIAN BEARING CO. FORMED

Dover, Del.—The Killian Roller Bearing Corporation has been organized in this city to manufacture roller bearings .The capitalization is given at $3,000,000. Incorporators are: H. E. Latter, H. P. Coffin and C. M. Egner.

### HAVILAND ON THE JOB

Pittsburgh, Pa., November 1.—H. A. Haviland, branch manager of the Splitdorf Electrical Company, is on the hop every day bringing forcefully to the attention of

**H. A. Haviland**

the dealers and riders in and about Pittsburgh the prompt service that can be secured at the Pittsburgh branch by all users of the Splitdorf equipment. Haviland has been with the Splitdorf organization for nine years and has made a thorough study of ignition or lighting.

### RECORD SADDLE BUSINESS

A large saddle order was filled recently by the H & F Mesinger Mfg. Co., of New York, when the New York police department purchased 400 bicycles for use throughout the greater city and specified the fitting of Standard No. 2 Center Compression saddles throughout. This saddle is the most popular of the firm's bicycle line and has had a great deal to do with bringing the sales of Mesinger bicycle saddles to the present mark, the highest reached by the company in this branch of the business in nearly a decade. In the motorcycle department of the Mesinger establishment the Air Cushion model continues to be a big favorite.

### ROLLFASTS ROLLING FASTER

Following a business trip through southern territory President D. P. Harris, of the D. P. Harris Hardware Co., New York, reports that the following live-wire jobbers have been added to the list that will handle the popular Rollfast line of tires for 1916: Keyser Fry, Reading, Pa.; George W. Robb, Philadelphia, Pa.; Henry Keidel, Baltimore, Md.; Walthour & Hood, Atlanta, Ga.; McGraw Bros., Jacksonville, Fla.; Johnson Mars, Memphis, Tenn.; Al. Ray Company, Louisville, Ky. He has also closed with the Detroit Cycle Supply Co., of Detroit, Mich.

### SCHACK MAKES FRIENDS ABROAD

Having just closed for shipments of Emblem motorcycles including the lightweight model, to India, Japan, China, Scandinavia and England, W. G. Schack has returned from New York City to the seat of Emblem activity in Angola, N. Y., and the plant is humming with industry from end to end. Mr. Schack is especially pleased over the fact that his orders are not for war machines but for motorcycles to meet the regular market. The business in Emblem bicycles is 50 per cent. better than it was in 1914 at this time.

### STEWART BABBITT BEARING HAS STEEL REINFORCEMENT

Unique in the field of bearings is the die-cast babbitt bearing with steel frame produced by the Stewart Manufacturing Company, of Chicago, Ill. The bearing has the babbitt compressed and the steel frame set deep in the babbitt to give stiffness and strength. It is being extensively used in automobile construction and in other machinery where good bearings are important.

A steel insert is set within the babbitt in such a manner that the bearing metal is much heavier on the surface toward the shaft than at the back. The thin babbitt coating at the back serves as a cushion for the seating of the bearing into whatever inequalities there may be in the machining of the backing. This reinforcement not only gives the bearing a maximum of rigidity but reduces the bearing-costs to a very considerable extent.

### ARGENTINA REPRESENTATIVE

**Senor Juan Bielet, of Buenos Aires, Motorcycle Tire Factor for Firestone Tire & Rubber Company, Akron, O.**

### AN AD. WITH A PUNCH

That W. F. Emerson, president of the Buffalo Metal Goods Company, which manufactures the Atherton coaster brake, has the knack of putting across advertisements with a genuine punch in them was demonstrated recently in a rather striking manner. The Buffalo Metal Goods Company had used an advertisement for the Atherton coaster brake in which a photograph of a Dayton Motor Bicycle appeared, attention being called to the fact that the popular newcomer at the Dayton plant was equipped with the Atherton brake.

A New England dealer spotted the ad. and hustled off this letter to President Emerson: "Have been studying your Motor Bicycle and would like to take the agency. We will take three and you may deliver them right away." The letter gave Mr. Emerson something of a jolt for a moment, but he forwarded it to the manufacturers of the Dayton, and now all hands are smiling over the situation, including the New England dealer who is going to get his Motor Bicycles without delay.

### ON THE GOODYEAR SALES STAFF

The sales department of the Goodyear Tire & Rubber Company, Akron, O., has taken another booster into its ranks in the person of W. H. Schaefer, who was formerly a member of the truck specification department of the Packard Motor Company. Schaefer will devote much of his time to the foreign end of the Goodyear business.

### WELL-EQUIPPED JUNIOR SPEEDSTERS

Los Angeles, Cal.—Indian motors and United States tires are employed on the miniature racing cars used by members of the Junior Racing Association of America, whose headquarters are in this city. Two of the cars used are shown in the accompanying photograph, the pair being members of the Indian racing team. Harry Hartz is at the wheel of number 21, while Clark Brown is the driver of number 22.

The speedsters were posed before the branch of the Hendee Manufacturing Company in San Francisco at the Exposition. The designs for these vehicles are the result of the combined efforts of Paul Derkum and Harry Hartz when the pair came together during the Exposition.

## TRADE-MARKS IN PARAGUAY

In view of the frequency with which foreign trade-marks are registered in Paraguay by third parties in order to force the real owners to buy the right to their use, the American Consul at Asuncion has suggested that he be notified when American firms arrange for the registration of their marks in that country. He will then be in a better position to determine whether the marks are being registered in the name of the owners or not, and may be able to save manufacturers and exporters considerable annoyance and expense at a later date.

## SPAIN A FERTILE FIELD

The success achieved recently by American commercial travelers in Spain has made it evident that there is at present an exceptional opportunity for the sale of various classes of American goods if merchants will go after the business in the same way they do in the United States. American Consul Gracey, stationed at Seville, reports the following:

"A traveler in the hardware and machinery line came to Spain after a tour of several months through Russia, Switzerland, Italy, and France, excepting to pick up a few orders en route from the north to Gibraltar, where he intended to take a steamer to return to the United States. He was astonished to find Spain the most fertile field for orders in Europe. In a hurried trip through the Spanish cities, covering less than three weeks, he took over two hundred and fifty substantial orders, more than he had received in all the other European countries he had visited."

## CONSULAR CO-OPERATION

Various methods are used at the American consulates to interest foreign merchants in their catalog and trade publication libraries. At many of the consulates, upon receipt of a new catalog or trade journal, a circular letter is forwarded to the firms likely to be interested, in the hope of bringing a representative to the consulate, so that the literature may be shown and explained to him. In some cases a member of the staff of the consulate is sent with the new literature to local merchants.

Consuls report that one of the most difficult parts of trade extension work is the failure of the manufacturer or exporter or his distributing agent abroad to notify the consul of the placing of agencies or the sale of goods. The apparent indifference of the exporter after he has secured one order and his failure to advise the consulate make it difficult for the consul to know whether or not he is approaching the problem in the right way. This gives him little or no opportunity to follow up his initial efforts. A little co-operation would not only greatly encourage American consuls abroad, but also show them the weakness or strength of their methods and would enable them to follow the successful lines to the advantage of American manufacturers and exporters.

## WHERE TRANSPORTATION IS TEDIOUS

O. C. Gould, American Consular Assistant at Curling, Bay of Islands, Newfoundland, Canada, informs us that the roads in his district, like most of those in Newfoundland, outside of the region of St. Johns, are short and poor. The population is sheltered along the water, in the bays and coves of the coast, and practically the only means of transportation, aside from the railway, is the motor boat. There are a few bicycles in use, but no great demand for them.

## WISHES TO TRAVEL IN FRANCE

We are in receipt of a letter from Charles Meister, of 6 Boulevard Pont Noyelles, Amiens, France, who advises us that he desires to be put in touch with American manufacturers who wish a traveling representative for bicycles and cycle accessories in France. According to his statement, Mr. Meister has been employed for more than twenty-five years with a large French Company, for whom he has called on garage proprietors and bicycle dealers in more than half of France. He speaks not only French, but also English and German. He declares that he would also be interested in establishing branches for American concerns in this line.

Manufacturers who desire French representation may find it to their advantage to make Mr. Meister conversant with their proposition.

## NOW IS THE TIME

American manufacturers, as a general rule, have grossly neglected their many opportunities for building up business in foreign fields. There may have been some excuses for this neglect in the past, but just now these opportunities are so exceptional it is safe to say that any manufacturer who does not or cannot secure business now, never will.

The American manufacturer must not expect to get returns from an export sales campaign in foreign fields as quickly as he can from a similar campaign in simply a distant state in the Union. As a successful exporter puts it, "It takes time and patience, but good common sense plus untiring effort is bound to bring results."

## POOR ROADS HAMPER SALES IN CARTAGENA, COLOMBIA

"Adverse street and road conditions in this consular district," writes Consul-General Rose Hazeltine,, at Cartagena, Columbia, "have greatly retarded the sale of bicycles and motordriven vehicles. As regards the latter, the very high cost of gasoline and lubricating oil has also reduced the imports.

"The city streets are very narrow, and, except for a mile of paved streets, are in very poor condition. There are no outlying roads suitable for excursions.

"Gasoline costs 40 cents a gallon retail, and 36 cents wholesale. Lubrication oil sells at the same price. Both are manufactured locally.

"In spite of these unfortunate factors, however, the importations of bicycles, motorcycles and accessories through the port of Cartagena during the past calendar year were valued at $15,359 as against $6,742 during the fiscal year ending June 30, 1914. American manufacturers enjoy about two-thirds of the trade. The custom house statistics for the periods referred to were:

| | Fiscal Year June 30, '14 | Calendar Year 1914 |
|---|---|---|
| United States | $4,607 | $11,533 |
| Great Britain | 1,278 | 2,761 |
| Germany | 857 | 766 |
| France | .... | 299 |
| Totals | $6,742 | $15,359 |

"The import duty adds a relatively small amount to the original cost. According to item No. 855 of the import tariff schedule, the duty on *bicycles, tricycles, velocipedes,* with or without motors, is $0.05 a kilogram levied on the gross weight. Thus the duty on a bicycle amounts to approximately $1.25 if packed lightly, while the duty on a motorcycle is $7.50 to $8.

"Bicycles are usually sold by the dealers for cash, while motorcycles are purchased on monthly installments.

"Bicycles for this district should be most fully equipped. The outfit should include lamp, bell, coasterbrake, mudguards on both wheels, and a complete tool kit. Motorcycles should also be quoted with extra parts.

"At present there are only four motorcycles in this city and only one active agency. Three of the machines are American made, and the fourth is an Italian make"

## INCREASE IN MANITOBA

In the Province of Manitoba, Canada, there are 888 motorcycles licensed at $2 each. This is an increase over the number licensed last year.

# INDIAN IS TWO OF LAST YEAR

**We have on our books today as many orders as we had up to January 1st last year. In other words, Indian Fall business has reached *first-of-the-year dimensions* in mid-Autumn—a two months jump on the previous year.**

**Early shows naturally advanced the season. *But the real underlying cause of unusual Indian sales is a line of models that created immediate and heavy demand by reason of overpowering merit.***

**The new Indian Powerplus Motor has turned out to be the only important motorcycle advancement that the 1916 season has produced.**

## IT COMMANDS THE SALES SITUATION!

Digitized by Google

# MONTHS AHEAD
# N SALES VOLUME

**Indian Bicycles are showing a like success. Dealers are ordering far in excess of our expectations. As a high grade wheel with highest grade equipment marketed under a nationally known name plate, the Indian Bicycle has been given instantaneous recognition. It is another brilliant example of how dealers will cash in on Indian Red.**

## AGAIN—ANOTHER INDIAN YEAR!

## HENDEE MANUFACTURING COMPANY

### THEY PAY DUES PROMPTLY

Altoona, Pa., October 25.—The executive committee of the Blair County Motorcycle Club, in order to minimize the delinquency which was shown by some of its members in paying their monthly dues, has availed itself of a method which is keeping all of the fellows in good standing. The committee has hung on one of the walls of the club's assembly room a board bearing a list of the club's members. Opposite each rider's name are twelve white spaces, each corresponding to a month in the year; as a member pays his dues for a certain month, the secretary stamps a red star in the corresponding white space. In that manner a delinquent's carelessness would be widely advertised—and most of the riders have shown by their present promptness in meeting dues that they do not care for that kind of publicity.

### BAY CITY M. C. HAS NEW ROOMS

Bay City, Mich., November 1.—The Bay City Motorcycle Club is now located in new quarters that are being redecorated and fitted up in a pleasing manner. The officers of the club are planning a vigorous program for the winter months in an effort to keep the riders together. Motorcyclists of Bay City are invited to drop in at the clubrooms on Washington avenue, between Center and Fifth, and meet the genial group of riders that gather there every evening.

### DIXIE HIGHWAY PROGRESS

Cincinnati, Ohio.—The early completion of all of that part of the Dixie Highway which lies in this part of the country is awaited with some eagerness by motorists of all classes, from the owner of the biggest touring car to the man who rides a lightweight two-wheeler. The several miles of concrete road which comprise the link in Kenton county are nearly finished, and this will give a splendid highway leading straight through the most beautiful part of Kentucky.

### ST. JOSEPH CLUB JOINS F. A. M.

St. Joseph, Mo., October 30.—The St. Joseph Motorcycle Club, which was started in this city by A. E. McCarthy, of the firm of A. McCarthy & Son, local Indian agent, has joined the F. A. M. Twelve members of the club are now affiliated with the national body. The past summer has been an active one for the St. Joseph riders, runs and picnics having been staged quite frequently.

### TO BUY THREE MOTORCYCLES

Detroit, Mich.—Sheriff Robert Oakman, of Wayne County, has been granted funds for three motorcycle officers who will watch automobile speeders. The order for the machines has not yet been placed, but will be in the very near future.

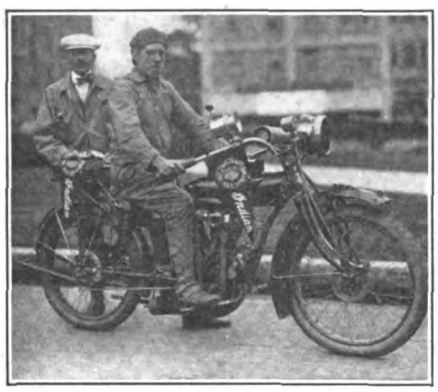
### BAN ON OPEN MUFFLERS

Detroit, Mich.—The Detroit police department has declared a ban on open mufflers. Riders have been warned that unnecessary noise will bring them into court.

### MUSICIANS TAKE A LONG TRIP ON THEIR INDIAN

Montgomery, Ala.—Alexander Findlay and his son Charles, two musicians of this city, are among the recent recruits to the growing ranks of motorcyclists. Their latest achievement is a 1,286-mile trip through the Blue Ridge mountains, through Gettysburg, Pa., and then up to the Indian factory at Springfield, Mass. The mount used in the trip was a 1915 three-speed Indian; Charles, who is 15 years of age, doing the driving while his father rode on the tandem seat. The pair returned here a few days ago, having retraced their outward trip in all details.

The trip was made after much persuasion on the part of the young cellist to have his father allow him to use a motorcycle. The elder Findlay was skeptical as to the



**Alexander and Charles Findlay**

effects that riding might have on his son's hands, but after the purchase was made, rapidly became as enthusiastic as his son over the machine. Accordingly, the long trip was planned and carried out without trouble. Alexander Findlay is a teacher of music at the Woman's College in this city.

### FOLKROD GOT PROVISIONS TO CLUB PICNIC ON TIME

Cheyenne, Wyo.—F. D. Folkrod, Indian agent in this city, recently pulled the local motorcycle club out of a difficulty which confronted them on the occasion of the annual picnic. It looked as if the club would have to hire a truck to haul the provisions to the picnic grounds, as the pile amounted to about 500 pounds weight. Folkrod immediately took charge of matters, and secured an express wagon in short order.

Hitching the wagon to an Indian twin, he had the load put in, then told four men to sit in the wagon. Putting another man on tandem, he started off carrying the load along in fine shape to the grounds. There was no difficulty in the Indian hauling the whole outfit. The picnic went off in its usual successful Western manner.

Folkrod is a consistent booster of the game. When Lieutenant Hoffman, U. S. A., reached Cheyenne on his trip East, Folkrod went all over his machine and fixed it up in fine shape, working all night in order that as little time should be lost as was possible.

### NEW ENGLAND AGENTS CONTRACT FOR HENDERSON

Boston, Mass.—The General Motorcycle Sales Company, of 143 Columbus avenue, this city, New England distributors for the Henderson, announces that the following dealers have signed up during the last two weeks: H. G. Adams, Portland, Me.; I. H. Atherton, Union, N. H.; B. & W. Motor Co., Providence, R. I.; J. E. Ferland, Lawrence, Mass.; Frank N. Hutchinson, Barre, Vt.; Irving L. Kibbe, Keene, N. H.; Lowell Cycle Co., Lowell, Mass.; Stephen Marsh, Springfield and Amherst, Mass.; A. A. Soucy, Lynn, Mass.; H. C. Wing, Greenfield, Mass. and George O. Williams, New Bedford, Mass.

The contracts were closed by Milo W. Kibbe and H. F. Smith, travelers for the Sales Company. Each agent has received his demonstrator and several have delivered one or more machines to riders so far.

### A POPULAR ESTABLISHMENT

Cincinnati, Ohio.—The new clubroom and hunting-lodge of the Brendamour Sporting Goods Company, which was completed a short time ago, bids fair to be the most popular place in the city during the winter. Its unique and attractive appearance, with the walls and ceiling in rough logs and the immense boulder fireplace, is calculated to warm the heart of the sportsman.

### NEW USE FOR MOTOR WHEEL

Hammond, Ind.—The J. S. Bretz Company, this city, has rigged up a clever arrangement for attaching Smith Motor Wheels to invalid chairs. The Motor Wheel is made the third wheel, in front, and the starting is taken care of by the same method as on a bicycle.

### WADEWITZ CUP TO ALBRIGHT

Racine, Wis., November 2.—Charles Albright captured the cup offered by William Wadewitz, president of the Racine Motorcycle club, in the last race meet of the season. The trophy was hung up for the winner of the 10-mile stock machine event and Albright copped the mug against five other fellow members who contended in the race.

### INSPECTED THE NEW MODEL

Detroit, Mich.—A feature of the recent meeting of the Harley-Davidson Motorcycle Club, of Detroit, was the exhibition of a 1916, three-speed Harley-Davidson machine. It was placed on a raised platform where it could easily be examined.

### PATTERSON'S NEW AGENCY

Brooklyn, N. Y.—A. H. Paterson, this city, has made a contract with A. O. Smith Company, Milwaukee, for two hundred Smith Motor Wheels. His territory will be all of Brooklyn.

### REPAIRMEN ARE BUSY

Detroit, Mich.—Joe Adcock, of the W. E. Metzger Co., reports unusual activity in the repair department. There has been so much work of late that he has been compelled to increase his force of repairmen.

### NEW BICYCLE CLUB IN BALTIMORE

Baltimore, Md., November 2.—A new cycle club has entered the field in Baltimore. The new club will be known as the Eagle Cycle Club and will be headed by Babe Anderson, who was elected captain at the first meeting of the club. Anderson has quite a reputation as a racing man, having won several important races held in Baltimore several years ago. The first run of the new club was held Sunday to Belair and a good turnout resulted. Among the members are Frank Merando, Harry Nachamys, Manon Fisher, Abraham Weinstein, Jacob Willen, Morris Zuber, Abraham Harrison, Morton Robinson and Babe Anderson.

### MISSOURI C. C. ELECTION

St. Louis, Mo.—The Missouri Cycling club held its annual election of officers on October 28 at Rock Spring Turner Hall. L. W. Brown was elected to the presidency and Curtis Long to the vice presidency. Other officers are E. R. McLeary, secretary-treasurer; A. W. Gilhen, road captain, and P. W. Hangge, road lieutenant. The supper which followed the election was enjoyed by all.

### ITHACA BI-CLUB FORMED

Ithaca, N. Y., November 1.—Followers of the silent two-wheeler have formed an organization in this city and will call it the Ithaca Bicycle Club. The following officers have been elected: Arthur Kendall, president; Daniel Clark, vice-president; Rudolph Wicks, secretary and treasurer; Richard Bamber, captain of first squad; Roger Booth, captain of second squad. Other members are: Kenneth Wilson, Leroy Pritchard, Emmet Doan, Robert Holland, David Fletcher and Archie Wicks. Meetings are to be held every Friday.

### BARBECUE FOR ST. LOUIS C. C.

St. Louis, Mo., November 2.—The annual barbecue of the St. Louis Cycling Club, a stag affair, was held on Sunday, October 31. The "eats" were good and quite a number of cyclists journeyed out to Rankin's Spring to participate in this yearly event. The annual Columbia "get together" will be held on Saturday, November 6.

## CRESCENTS RIDE ANNUAL CENTURY

**Eight Members of Baltimore Club Wheel to Washington and Return—Sightseeing at National Capitol a Feature of Event.**

BALTIMORE, Md., November 2.—The National Capitol was the Mecca of the Crescent Bicycle Club on Sunday last when the local organization held its annual century run to Washington, seven club members and one unattached rider making the trip, which has always been a favorite with the riders of the Monumental City, owing to the magnificent boulevard between the two cities and the many interesting sights of the capitol. In fact, the local riders do not feel that they have become real cyclists until they have made this trip.

At 7:15 Sunday morning the little party got under way, proceeding through Halethorp, from which point the riders followed the Washington Boulevard. Passing through Relay and Elkridge the first stiff hills were met, but the novices acquitted themselves well. The first mishap was at a point 14 miles from Baltimore, where one of the party came to a sudden stop as a result of his brake locking.

A little first aid and strong-arm work with a monkey wrench soon put the disabled bicycle in condition for the road once more. The bunch were about ready to proceed on their way when soneone called out, "Here he comes." "He" was Welby Sherman, who had made a late start owing to Hallowe'en celebrations the night before, but he was burning the wind to catch up. Laurel was the next stop, and refreshments were in order at this point. A long level stretch begins here and the cyclers bowled merrily along for six miles with very little effort till the ups and downs were again encountered. No more stops were made till the famous spring five miles from Washington, where many a thirsty wayfarer has quenched his thirst, was reached. Moistening their throats, the cyclers remounted, and half an hour's pedaling brought into view the white dome of the Capitol.

Continuing on down Maryland avenue and past the Capitol building, the travelers switched to Pennsylvania avenue to the old stand-by, the "F. V. A. Lunchroom," a rendezvous for many years for Baltimore bicycle riders. Dinner was next on the program and it was a good one, roast turkey, sweet and tender, being the "piece de resistance." Sight-seeing followed, and for several hours the fellows were on the move, viewing the White House, Treasury, Wash-

NEW WAY OF TAKING THE BABY OUT

C. B. Hamilton, Dealer at Wichita, Kan., Has Made This Bicycle Carriage for His Youngster

ington's Monument and many other points of interest, and finally winding up at the Capitol building. At 1:45 p. m. the riders turned their faces homeward, but had not gone far before another late starter hove into sight. Falling in line, the new arrival followed on with the crowd, all reaching Laurel, the half-way point, at 3 p. m. More eats, and then on again toward Baltimore, over some steep hills. One of the riders began to tire soon after leaving Laurel, but, aided by the strong arms and legs of three of the club's stalwarts, no time was lost, the "joed" cyclist and his escorts climbing the grades faster than the balance of the bunch.

Reaching Elkridge, the hills were left behind and the party passed on through Halethorp and into the city to the accompaniment of much comment by the Sunday evening crowds. At Fulton avenue and Mulberry street cyclometers were checked and the cyclists disbanded to ride a few more miles necessary to complete the century, each taking a direction that led toward home and supper. Those on the trip were Walter Doersch, Ernest Nitz, Walter Iglehart, Leslie Nickles, Welby Sherman, Fred M. and Langdon M. Sanborn, and Wm. H. McAvoy.

## BIG MEET MAY BE STAGED AT 'FRISCO EXPOSITION

SAN FRANCISCO, Cal., November 1.—The Pacific Coast bicycle championship races will be held on Sunday, November 7, at the Golden Gate Park Stadium here under the auspices of the California Associated Cycling Clubs. The races will include one-half and one mile unpaced record trials, one-half, one, three, five and ten-mile championship events with the usual heats.

Hans Ohrt, who starred for the New Century Wheelmen last year in the titular events, will, it is reported, be on hand to sport the colors of the Olympic Club. Pitted against Ohrt will be such riders as W. Hammitt, L. Drury, H. Spence, R. Welch, H. De Brie and P. Morgan, all of the New Century; H. Hoffman, M. Burger and E. Carroll, of the Olympic Club; N. Eisentraut, I. Moon, W. Plummer and A. Concilla, of the Garden City Wheelmen, of San Jose; and R. Girard and W. Jones, of the Acme Club of Oakland.

On good authority it is said that a big cycle meet will be staged at the Panama-Pacific Exposition about the end of November. Mr. Humphreys of the Olympic Club was in Newark, N. J., recently to make arrangements for having six of the best eastern amateurs compete in this event. This season has been one of the most successful for the cycling club in and around San Francisco.

The indefinite postponement of the N. C. A. Panama-Pacific champ, races has keenly disappointed California riders, who are eagerly awaiting a meet.

## RABBINO LEADS U. S. I. RIDERS

Louis Rabbino scored the greatest number of points in the competition for the bicycle championship of the Unione Sportiva Italiana by accounting for eighteen out of twenty in a series of four races, two of which were held Sunday, October 31, on the Eastern Boulevard, Bronx, New York.

Louis Rabbino

The distances of the series were one, three, five and ten miles, the three and five-mile races having been held two weeks ago.

Rabbino scored first in the three, five and ten-mile events, and finished third in the one-mile race. Second position resulted in a tie between James Alfonso and C. Zoccola with twelve points each, which was decided by a half-mile match race and won by Alfonso, placing him in second position, with third place going to Zoccola. Thomas La Rossa finished in fourth position with nine points, while John Fargo, who is a recruit to the racing game, came in for fifth place with six points. Fargo won the one-mile race yesterday. The time made in the one-mile race was 2:47⅗, and for the ten miles 26:27⅕. Scoring was on the basis of five for first place, four for second, and one for fifth place. Total points made by the contestants are as follows:

| | 1 Mile. | 2 Miles. | 5 Miles. | 10 Miles. | Tot. Pts. |
|---|---|---|---|---|---|
| Louis Rabbino | 3 | 5 | 5 | 5 | 18 |
| James Alfonso | 2 | 3 | 3 | 4 | 12 |
| C. Zoccola | 1 | 4 | 4 | 3 | 12 |
| Thos. La Rossa | 4 | 1 | 2 | 2 | 9 |
| John Fargo | 5 | 0 | 0 | 1 | 6 |
| A. Ramezzano | 0 | 2 | 0 | 0 | 2 |
| Chas. Rabbino | 0 | 0 | 1 | 0 | 1 |

# LAUD VET CHAMP AT BIG BANQUET

**Prominent Citizens of East Orange Present Frank Kramer with Loving Cup at Dinner in His Honor—300 Admirers Attend.**

NEWARK, N. J., November 1.—Frank L. Kramer, the national and world's cycling champion, was given a testimonial dinner by three hundred of his friends and admirers from his home town, in East Orange, on Saturday night. He was also presented with a handsome silver loving cup suitably inscribed, and during the entire course of the banquet he was showered with praises. The gathering was composed of men in all walks of life and practically all of the city officials of East Orange sat down to the dinner.

Mayor Worrall F. Mountain, of East Orange, was the first speaker of the evening, and he was followed by the Rev. Dr. Fred Clare Baldwin, Amos G. Batchelder, first president of the National Cycling Association, and Edward S. Pierson, a former member of the City Council.

The banquet was in the hands of E. Tracy Lanterman, postmaster of East Orange; Chief of Police William H. O'Neill, City Clerk Lincoln E. Rowley, Edward Christopherson, water registrar; William W. Knott and Charles Stasse.

Mayor Mountain in praising Kramer said in part: "It seems as if Frank Kramer had deliberately planned out his course and then stuck to it doggedly. It meant a huge sacrifice. He must often have declined pleasant invitations, for, to keep in perfect condition he must get the proper amount of sleep and do without many things that usually add to the pleasure of life. His has been, in fact, a Spartan existence, and he must have constantly put aside temptations of all sorts. He deserves credit not only for the victories he has won, but also for the character that gave him the grit to go through it all. That is what counts."

All of the speakers were lavish in their praise of Kramer. Mr. Howley, the toastmaster, said: "Kramer has given East Orange a lot of advertising and never charged it a cent. More people know of East Orange because of Frank Kramer than because of any one of the remaining 40,968 of the population."

## ARMY OFFICIALS ENDORSE MOTOR WHEEL

MILWAUKEE, Wis., October 30.—General Leonard Wood, the commander of the East, and the officers who were in charge of the military training camp which was held at Plattsburg, N. Y., last summer, have gone on record as endorsing the Smith Motor Wheel as a military adjunct, and will recommend that Congress vote appropriations for acquiring "bicycle boosters" for the United States Army. The officers who witnessed the work of the motor wheels at Plattsburg are reported as being highly pleased with their performance and consider the attachment to be well adapted for dispatch and scout service.

Smith Motor Wheels in Use at the Plattsburg (N. Y.) Training Camp

According to the accounts given by Lou H. Guterman, formerly a Smith Motor Wheel traveler, who used a motor wheel equipped bicycle at Plattsburg, he had to ride over railroad ties and ploughed fields in carrying messages from one section of the battlefield to another. His services were used by the higher officers in command for over six weeks in all kinds of weather, in preference to dispatch bearers who utilized horses and automobiles.

And in scouting the motor attachment helped on one occasion to bring back the first word of the "enemy," says Guterman, who recalled the event as having been the hardest day's work which he had ever performed on his machine. But he had no sooner looked forward to a few minutes of respite when he was ordered to carry a message to a point that necessitated climbing down a forty-foot embankment and fording a river three feet deep and one hundred yards wide. This trip was made four times, before the interested officers permitted Guterman to be relieved.

Lecturing to the recruits at Plattsburg after a hard day's fighting, Captain Van Horn, commander of the second battalion, brought out the strong point of the motor attachment by deploring the time which was lost in bringing an important message from one corner of the battle to the commanding officer when a private was obliged to carry the communication on foot. "Had a motor wheel been handy, the private who carried the dispatch would not have taken a half hour to reach the officer in command, but would undoubtedly have conveyed the information in less than five minutes." On several occasions, Guterman reports, Captain Van Horn asserted that the motor wheel was superior for scout and dispatch duty.

## GARDEN CITY RIDERS WIN TEAM RACE

SAN FRANCISCO, Cal., October 30.—The Garden City Wheelmen of San Jose won the six-man combination sprint team race of the California Associated Cycling Clubs on Sunday, October 24, at the Golden Gate Park Stadium, defeating the New Century Wheelmen of this city by four points. The San Jose riders scored 90 points, while the New Centurys were credited with 86.

The first heat resulted in a victory for Plummer, of the Garden City Wheelmen, over Harry Spence, of the losing team. In the third heat Ralph Welch plugged away from Flint, of the Garden Citys, and made the points even. In the final heat a big surprise was sprung when Harry De Brie, of the New Centurys, beat Nick Eisentrout, of the Garden Citys, in four out of six sprints, scoring 26 points, while Eisentrout took 22.

First heat—Won by H. Plummer (G. C. W.); Harry Spence (N. C. W.), second. Time, 16:34.
Second heat—Won by I. Moon (G. C. W.); Phil Morgan (N. C. W.), second. Time, 14:14.
Third heat—Won by Simondi (G. C. W.); Walter Hammitt (N. C. W.), second. Time, 8:45.
Fourth heat—Won by Ralph Welch (N. C. W.); F. Flint (G. C. W.), second. Time, 13:25.
Fifth heat—Won by Leslie Drury (N. C. W.); T. Cancilla (G. C. W.), second. Time, 16:23.
Sixth heat—Won by Harry De Brie (N. C. W.); Eisentrout (G. C. W.), second. Time, 8:25.

## SHEETS HAD BANNER SEASON

Alton, Ill.—Harry H. Sheets, who handles the Pope line of bicycles, has had a banner year. From his headquarters at 724 East Second street, he has sold 57 of the different models up to October 1.

In the motorcycle line, Sheets has sold a considerable number of second-hand machines during the season. Bad roads, much rain and floods at various times have interfered with riding, he states, but 1916 looks like a fine year for the power two-wheeler.

## BICYCLES FOR POLICE

Detroit, Mich.—Seven new Pierce bicycles have been sold by the W. F. Metzger Co., 501 Woodward avenue, to the Hamtramck police department.

# NEWARK RIDERS REACH CHICAGO

### Eight Professionals Make Fast Time into the Windy City—Are in Fine Trim for Six-Day Race, Which Will Start November 27.

CHICAGO, Oct. 29.—Tired, dusty, and as hungry as wolves, the eight professional cyclists who left Newark en route via the trusty wheel arrived in this city late yesterday afternoon. The party had many interesting details of the trip to relate, and the group of cycle fans who met them a few miles out of the city proved to be interested listeners.

According to Worth Mitten, who was the one to organize the trip, the cyclists had a journey that was free from rain, but head winds most of the way made the going very hard. Despite the long trip, the first of such length undertaken by six-day cyclists, the riders showed no ill-effects and after a good sleep last night might have continued on a like journey.

Their first day's trip netted eighty miles. In the first division were Worth Mitten, Iver Lawson, Ernest Ohrt and Clarence Miller, while the second division was made up of Lloyd Thomas, Martin Ryan, Norman Hansen and Percy Lawrence. The first division went up the east side of the Hudson and the second took the short trip through the Central New York country. The second day the mileage was 105 and brought the tourists into Schenectady. The first division turned the 105 miles in seven hours and ten minutes. At the end of the third day of the trip Utica was reached, with 85 miles added to the score. The riders struck a head wind all the way on the third day. Division No. 2 made Binghampton on the third day, making 76 miles, their correspondent, Lloyd Thomas, states that they struck bad roads, hills and head winds.

Syracuse, Auburn and Rochester were next on the itinerary of the first division, then they hit Byron at the end of the fifth day, making 461 miles in all in 32 hours and 7 minutes. Buffalo became the following objective point and they reached there about noon on Saturday, the sixth day. After visiting some friends in Buffalo and "cabareting" a bit, with part of the group making a side trip to Niagara Falls, plans were made to leave Buffalo early in the morning.

Accompanied by Sax Williams and some of Buffalo's star amateurs, the first division left Buffalo at 8 o'clock Sunday morning. They reached Girard, Pa., at 5 p. m., making 115 miles in the day's riding. Ten miles east of Erie, Pa., they ran into the second division eating grapes in a vineyard. All of the cyclists stopped for the night at Girard and started early on the following morning for Ashtabula, Cleveland and Elyria, finishing the day's touring at the latter place with 118 miles as the day's total. Just previous to reaching the latter stop they indulged in a regular six-day "jam," and lost most of the second division.

From Elyria the party headed for Toledo and from that city the tour developed into

Digitized by Google

**Neatly Arranged Interior of Rob C. Carty's Bicycle Store at San Diego, Cal.**

a race to Chicago. Mitten, Lawrence and Hansen left Toledo early on the morning of the ninth day, making Ligonier, 129 miles away. The balance of the party left Toledo later in the morning and decided to ride all night in order to beat Mitten, Lawrence and Hansen into the city. Mitten's party stopped at Ligonier for the night and then came in, going through Elkhart, South Bend, La Porte and Hammond. They left Elkhart at 8:30 last Thursday morning, while Lawson and his troupe had left South Bend an hour or so earlier, and were then busy pedaling toward the big Illinois metropolis.

Lawson and Miller reached the city shortly after 4 o'clock last Thursday, having left Ryan, Thomas and Ohrt near Hammond owing to a puncture to Thomas' tire. Quick repairs were the order and the trio soon followed Lawson and Miller into the city. Mitten, Lawrence and Hanson reached the city at 6 p. m., having finished the 1,130-mile trip in ten days of elapsed time, their average speed on the trip being about fifteen miles per hour.

Most of the party were fortunate in their lack of punctures and other tire trouble, Lawson, Mitten and Miller having but one puncture on the entire trip, Miller's puncture coming on the first day, Lawson's thirty miles from Chicago and Mitten's about half-way. Ernest Ohrt rode the entire trip with no tire trouble at all.

The trip proved to be a fine test for the new Pye-Musselman tire, with which most of the rider's wheels were equipped; despite the rough going the tires showed very little wear. Ohrt's wheel was equipped with Advanced Palmer tires. The riders, who are entered in the six-day race at the Coliseum this month, will finish their training on the boulevards of the city and the Riverview Velodrome.

John M. Chapman, manager of the Newark Velodrome and the local six-day race, was in the city when the riders arrived. Chapman was enthusiastic over the ride made by the professionals and a race from Newark to Chicago or Chicago to Newark, is now a pet scheme of the Newark manager. It is already rumored that such a race may be staged next spring.

### SIDELIGHTS OF THE TRIP

Worth Mitten told a good one on Lawson at the finish of the journey. After heading into a strong wind for over fifty miles his party reached Victor, N. Y., when Iver went into the village hotel and asked for a high one. "High what?" said the hotel keeper. "Beer," Iver remarked. "Shucks! This town has been dry for six

**J. A. Benson, of Los Angeles, Who Will Manage the Distribution of the Smith Motor Wheel in Southern California**

years," was the retort of the hotel proprietor, and Iver nearly fainted.

Ernest Ohrt, the punctureless member of the troupe, always likes to look prim and neat. Ohrt carried a bottle of hair tonic all the way and a quart bottle at that.

Ohrt and Miller hold the record for boosting the high cost of living. At Buffalo Ohrt ate a meal that carried a $1.90 check with it and Miller's meal put him back $2. In addition Ohrt had an electric massage at Buffalo that separated him from $2.50. Some class to them.

Martin Ryan made a vow when he left Newark that he would not shave until he reached Chicago. He lost his nerve and his vow at the same time when he reached Toledo. He looked like a woodsman after a month's exile until he had the growth removed. He stated that he was afraid that some squirrels might try to camp in the patch.

Mitten states that so many tourists, motorcycle and bicycle, try to get by on trips of this kind by selling post cards, that at a number of stops they were asked what they were selling. At North Girard, Pa., Lawson was asked by a hotel man how much "gas" he used on the trip.

### MAKE SPECIALTY OF LADIES' WHEELS

Dallas, Texas, October 23.—A new firm has been organized under the name of the Longbotham Sporting Goods Company, to take over the stock of the Ruff Sporting Goods Company, which has dissolved. The entire store has been overhauled and a complete line of Westminster, Carnival, Dexter and Dayton wheels are being installed. The new company will make a specialty of ladies' bicycles, as they are again becoming popular among the ladies here.

### LIVELY BICYCLE SALES

Detroit, Mich.—"We have sold more than 100 bicycles up to October 1, which is more than we sold the entire year of 1914," said Joe Adcock, of the W. E. Metzger Co. recently. "We sold them to some of the richest families in the city who bought them for their children."

### BUSY ALL YEAR

St. Joseph, Mo., October 30.—F. Lee, the Merkel bicycle agent at St. Joseph, Mo., says that the bicycle business has been fairly good this summer. His assistant, however, insists that "fairly" is only putting it very mild, for he has been busy all year uncrating the bicycles for delivery. Lee's shop is an exclusive bicycle establishment.

### FIRE IN LOUISVILLE STORE

Louisville, Ky., October 30.—The sporting goods and bicycle store of Bourne & Bond, at 317 West Market street, was slightly damaged by fire which started from a defective flue on October 21. The building, which is owned by J. C. Bourne, and the stock, were fully insured and no loss was suffered.

### BLAZE IN CYCLE STORE

Detroit, Mich.—Fire did damage to the amount of $500 in the store of the Slipson-Kleefus Cycle Co., 621 Woodward avenue, on October 23. The loss was fully covered by insurance.

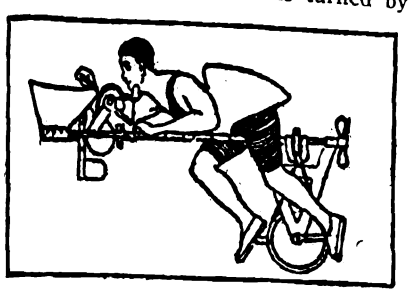
### MOVES HIS SHOP

Attica, N. Y., November 1.—John Turell, a local bicycle dealer, has moved his bicycle shop to larger quarters. He will occupy an entire building and will remodel his new store along modern lines.

Digitized by Google

### UNIQUE "WATER BICYCLE"

Chicago, Ill., October 2.—A unique "water bicycle," which has been patented by a Chicago man, is shown in the accompanying illustration. A long bar has wing-like floats at two sections to support it, and at the rear end is a propeller. This propeller is operated by pedals that drive a small wheel depending from the back, and also by a gear in front that is turned by



the hands. Thus double impetus is given to the shaft. The "rider" lies flat on his stomach along the top of the bar, his chin resting in a pivoted support that turns the rudder which is located in front. By turning his head one way or the other the operator can steer easily and well. While the apparatus is made buoyant, it is probably just as well that the user should know how to swim, as well as how to ride a bicycle.

### BICYCLE SALES ARE BIG ONES FOR JOBBER SMITH

Los Angeles, Cal.—C. L. Smith, the bicycle jobber and distributor is elated over the business done during the past six months. Four days after he received his last lot of 257 bicycles he had delivered over 200 wholesale, and was accepting orders against the carload to be shipped in November.

Smith states that his business has increased so fast since taking the Great Western line of cycles that he has had to put in a mezzanine floor or big balcony during the entire length of the store. This gives plenty of room for stock, the room being utilized for an up-to-date arrangement of additional shelves. "The bicycle business" says Smith, "is a good booster for tires and accessories as well as motorcycle and bicycle parts."

The Smith establishment is considered one of the best-arranged large stores in the Pacific section, and its activities are considered an excellent barometer of bicycle business throughout Southern California.

### FISHER VICTIM OF COLLISION

Rochester, N. Y., November 1.—Ward H. Fisher, a former bicycle racer, died today as the result of injuries received in a collision between his motorcycle and that ridden by another Rochester man. The accident occurred near Garbutt on the Scottsville road. Fisher's skull was fractured and he received severe lacerations in addition. The other rider, Roman Brahler, had his leg broken and suffered internal injuries. Fisher died before reaching the hospital.

Ward Fisher was one of the best known cyclists in Rochester and this part of New York State before the advent of the motorcycle. He was a member of the Old Century Bicycle Club, which used to hold races on St. Paul boulevard and on the Genessee Valley Park track. In the 50-mile distance races on the Martin road out of Buffalo, Fisher never failed to share in the money. He was later an expert motorcyclist, being connected with the Harley-Davidson agency at 210 Main street, this city.

## CYCLE DOINGS IN TORONTO TRADE AND CLUBS

TORONTO, Ontario.—Like a bolt from the blue was the announcement made by Robert Falconer of the Queen City Bicycle Club of Toronto, the second oldest member in the Canadian Wheelmen's Association and the vice-president of that body, that he had resigned from office as a protest against the alleged steamroller methods of G. L. MacKay, Chairman of the Racing Board, in arranging for various recent races. One charge made by Falconer is that G. L. MacKay knowingly permitted a professional bicyclist to compete in the Dunlap Trophy race which is for amateurs only. Other protests are to follow, it is declared, and one or two other officers of the C. W. A. have threatened to resign.

The Salem Bicycle Club has made arrangements for the holding of a bicycle handicap road race on Saturday, November 6.

A crowd of roving cyclists, including Art Spencer, the Canadian champion, rode to Hamilton and return last Sunday. The total distance covered was about 95 miles.

The Board of Police Commissioners of Toronto have decided to banish the glaring headlight within the city lines. The cyclists are thankful.

### RENTING MOTOR WHEELS

A. J. Hockett, Smith Motor Wheel dealer for Grinnell, Iowa, is employing a profitable Motor Wheel renting system. He has three Motor Wheels in the service and his rental price is fifty cents per hour. Records show that Hockett has taken in as high as $6 a day.

### BOY SCOUTS IN NOVEL RACE

Toronto, Ontario.—A unique incident occurred in "Toronto the Good" last Sunday when eighty-five Boy Scouts engaged in a race from the Scout headquarters to the many churches of the city in order to deliver a message for the Red Cross Society.

### SANBORN TRIED TO BREAK BALTIMORE-WASHINGTON RECORD

Baltimore, Md., October 30.—Fred M. Sanborn, of the Crescent Bicycle Club, made a strenuous but unsuccessful attempt on October 24 to break the inter-city record for the run from Baltimore to Washington and return, riding the distance of 80 miles in 4 hours 38 minutes and 45 seconds, 11 minutes behind the record made by August Leimbach, of the Crescents, in 1912. Sanborn rode the first 21 miles, from the City Hall at Baltimore to Laurel, in 1 hour and 5 minutes, and the remaining 19 miles to Washington in 1 hour flat, but was unable to maintain this pace against the strong north wind encountered on the homeward trip, 2 hours and 33 minutes being required to make the second half of the run. Sanborn feels confident, however, that he can break the old record under more favorable weather conditions and will make another attempt at a later date.

### CRESCENTS WILL HOLD THANKSGIVING DAY RACE

Baltimore, Md., November 2.—The Crescent Bicycle Club will promote a big open track meet on Thanksgiving Day morning on the quarter-mile track at one of the local tracks. The races will be open to any rider in the State, and no entry fee will be charged in any of the races. There will be a novice race, one mile state championship race, team pursuit race and several other events, in adidtion to the three club championship races at a quarter mile, half mile, and one mile, which will be run at the meet. The one mile state championship and unlimited Australian pursuit team races will bring out a field of the best men in the state and some very good sport should result.

### TOURS GETTING POPULAR

That the touring "bug" has possessed the members of the New York Division of the Century Road Club Association is shown by the many stories, told at the club meetings, of week-end trips to points of interest. First Willian Winquist and Lucien Wetzel reported a three-day tour to Albany and return to New York, and then Captain Steppello and Sylvain Segal spoke of their tour to Boston and return, while Lucien Wetzel, Ernest Kuno and Andrew N. Segal reported a number of week-end trips.

# NEWS AND VIEWS OF F. A. M. DOINGS

By GOSLIN

WHEN anyone wishes to make a protest against a referee's decision in track or road event, they should get out the little F. A. M. Competition Rules book, and proceed as per the instructions found in Article 16. During the Chicago Show week, the competition committee as a whole met and turned down the Hess-Capital City M. C. appeal from Referee John L. Donovan's decision awarding the Bosch trophy to Liggett. No written protest was filed, merely a verbal complaint made 30 hours after the races at Sacramento were over; and, consequently, the committee had no power to act. Hess thus lost the chance for a hearing. It is up to you, Mr. Competitor, to make your protest promptly and in the proper manner.

**Status of the Dealer**

Ever since the Columbus convention of the F. A. M. in 1912, when the trade-rider class was abolished, there has been dissatisfaction regarding the amateur and professional classification of F. A. M. competition riders. Some efforts to restore the abolished class have been made, showing a desire for a dealer's class from both the amateurs and professionals.

In track events it is the writer's opinion that riders should either be amateurs or professionals; in road events also—but as regards dealers, they should be classed as amateurs if they have never competed upon enclosed tracks. In road events, dealers may not be as proficient as amateur owners in negotiating the rough stuff, so why should they be classed as professionals? The average dealer enters runs and hill-climbs for the sport, and not for the pecuniary benefits.

**Ruling on the Professional**

At the meeting of the competition committee during the Chicago show it was decided that a professional, according to Article 5, Section 3, is one who competes for cash, or who, being directly or indirectly connected with the trade, competes on tracks where the public is charged admission. This will enable a lot of dealers or trade men to compete in road events as amateurs, and thus keep their standing in other branches of sport. That it will be abused by a few riders is probably true, but with a referee on the job few infractions of the rule will get past him.

**Woody Has No. 35,000**

F. A. M. card No. 35,000 has just been issued to W. H. Woody, of Oklahoma. If all the gaps in the ranks were filled in we'd make a mighty force in all parts of the country. The federation is just as strong as each individual tries to make it. If you don't pay your initiation fee and sit down waiting for all the benefits to fall into your lap, as it were, you will not get much out of the organization. But if you get out and boost, and try to secure by organized effort what belongs to you, then you will feel that the F. A. M. really amounts to something.

**The Federation Lawyer**

Don't expect the federation to pay for an accident or hire a lawyer to fight your case for you—no accident insurance company can do it, even for $25 per year. The F. A. M. expects to help when the case affects a whole group of riders, but not a lone individual here and there. Get busy, then, and appoint your own F. A. M. lawyer in every town, so that you have some one you can look to as a legal advisor. The lawyers are only too glad to take up the proposition; it means business for them.

So lose no time in appointing your lawyer. Write to William M. Johnson, 811 Ashland Block, Chicago, Ill., for particulars.

## F. A. M. GAINS IN OCTOBER

F. A. M. membership statistics for the month of October, 1915, show 223 renewals of membership, with 87 unaffiliated new members and 107 new affiliated members. New York leads with 80, of which 20 are unaffiliated, 20 affiliated and 40 are renewals. Massachusetts came second with a total of 36, of which 23 were renewals and 13 unaffiliated members. Pennsylvania comes next with 30, of which 10 are affiliated, 3 unaffiliated and 17 renewals. Missouri is fourth with 12 affiliated, one unaffiliated and 13 renewals totaling 26 members.

New Hampshire, Vermont, Idaho, Panama and Florida only had one new member each for October. The District of Columbia did not gain in new members at all, having one renewal only for the month. Oregon had one new member and one renewal, Maryland had the same, as did West Virginia, Tennessee, Minnesota and North Dakota. Rhode Island had six renewals and four new members, while New Jersey had 13 new members and 11 renewals. Virginia got two new members and had two others renew their membership.

Two renewals are the total from North Carolina, while from the State next south were 14 affiliated and one renewal. Georgia had four renew their subscriptions. Alabama had one new member affiliate. Texas had 12 renewals and 3 affiliated and 4 unaffiliated members for October. Oklahoma had 4 renewals, 15 affiliated members and 3 unaffiliated. Ohio reported 4 affiliated, 8 unaffiliated and 14 renewals, while Indiana only had two unaffiliated, but otherwise was the same as Ohio.

Illinois scored 2 affiliated, 7 unaffiliated and 6 renewals. Wisconsin had one affiliated, 4 unaffiliated and 9 renewals. Michigan had 3 renew and 2 affiliated, while Nebraska had 3 affiliated, one unaffiliated and 5 renewals. Kansas had three riders renew; Iowa had two renew; California had 6 affiliated, one unaffiliated and 15 renewals. Colorado had three renewals, and Arizona two.

## THAT MOTORCYCLE MOVIE PICTURE

Los Angeles, Cal., October 23.—The appearance in a recent issue of Motor Cycle Illustrated of a photo showing Walter A. Klintberg, a Keystone motion picture actor, in the daring feat of jumping through the top of an automobile, has brought many letters to the Keystone Company, asking the name of the film and the time when it would be released. Being too busy to handle the correspondence that would be entailed in answering all these requests, the manager of the Keystone Company wishes to announce through Motor Cycle Illustrated that the film will be called "Sabed By Wireless," and that it will be released in New York City during the first week of November.

## ANOTHER CYCLE CORPS

Ottawa, Ontario.—A call has been issued by the Militia Department for bicyclists and motorcyclists for still another Divisional Cyclist Corps of about 250 officers and men to act as despatch riders, signallers, scouts and mobile infantry. This will make the fourth bicycle corps to be raised in Canada since the war began. The fourth corps will be recruited from all parts of the Dominion and will be mobilized at a convenient camp in Eastern Canada.

# SELLING LIGHTWEIGHTS—POINTERS FOR THE DEALER

## Classes to Whom the Light Machines Will Appeal and How to Reach Them

By TRADESTER

NOW that lightweights are here, the question which will at once loom up in the minds of most motorcycle dealers is: "What are we going to do with them?"

"Sell them," say the sales manager and the traveler; but the dealer with a skeptical turn of mind comes back immediately with, "To whom?"

Both queries promulgated by the dealer are in order. For the past five or six years at least, the motorcycle dealer has been catering strictly to one class of buyers, the class that buys for sake of speed and power—and nothing more. To put into the hands of these riders the comparatively slow, quiet, and considerably less powerful type of machine, which makes its appearance this year, will be next to an impossibility; and every dealer knows it. Riders of this type cannot be weaned from their chosen vehicle, any more than the Ethiopian can change his color, or the leopard his spots. The lightweight machine will be straddled by an entirely new class of riders—perhaps classes would be more fitting—and the dealer who would clean up on the 1916 innovation must bend every effort toward creating this class or classes as the case may be.

### One of the Classes

The dealer will now come back, not only with a "Who," but also a "How?" The first question is easily answered. In the first place there is that class of riders, or would-be riders, the members of which have not the money to purchase machines and who must look to their parents for the necessary outlay. The dealer who handles the lightweights has two very strong appeals to the parents in this case. Number one—price; and number two—safety. There is not a doubt in the world that many a parent can be induced to buy a lightweight machine for their hopeful offspring, who, because of the high price and the to him terrifying speed of the high-powered twin, would not think of allowing his son to ride heretofore. To reach this class of buyer it is first necessary to reach the son, so that the high school and the college will immediately appeal to the dealer as the proper place to interest the young idea in machines of this type. With this thought in mind it will perhaps redound greatly to the benefit of the dealer who first takes advertising space in the high school or college paper, the dance program, or who in any other way gets his name before the student body.

### How to Handle Young Prospects

There are many other ways of accomplishing the same result. It might, for instance, be feasible to get hold of a school roster, or, perhaps, to obtain the names of the members of some school organization, such as the Athletic Society, and to circularize this list well. After interesting the young fellow, provided the parent can afford it, the lightweight machine offers an excellent opportunity of making him a new recruit to the ranks of the motorcyclists. Advertisements to the young fellow should play up the sporting side of motorcycling—the pure joy that comes of possessing a vehicle and keeping out in the open. Advertisements to the parent should drive home the fact that the lightweight machine is a fully practicable motor vehicle with the speed and danger elements removed; a machine that is simple to control and easy to handle and which sells for half the price of the larger ones.

Then there is the working man who would use a motorcycle instead of the street car, or the bicycle, to get to and from his work each day, provided it was brought home to him that the price was within his reach. He, too, has his organization—the labor union—and with a little diplomacy there is not a doubt in the world but what a live dealer could so work matters, as to have the list of union members put at his disposal. Letters calling attention to the convenience and dependability of the new type of vehicle as contrasted with other means of getting to and from work, and pointing out the low first cost, as well as the slight running expenses; letters calling attention to the installment plan method of paying and playing up the recreative side of the motorcycle, will be a good way toward bringing the working man into the motorcycling fold.

### Easy Jump From Bicycle

The dealer who sells bicycles has an opportunity to convert many who have heretofore preferred the simpler two-wheeler into full-fledged motorcyclists, through the intermediary of the lightweight. For, after all, it is but a step from the bicycle to the lightweight, while it is a good-sized jump from the featherweight bicycle to the high-powered twin, and a jump that a fairly large proportion of riders cannot be induced to take, because either of fear of the larger and speedier mount or the price considerations. The dealer who starts right now and circularizes every person who bought a bicycle from him in seasons past, pointing out the comparatively slight difference in cost and the very great difference in convenience between the bicycle and the motorcycle and making sure to emphasize the simplicity, lightweight and easy handling of the motor vehicle, cannot fail to rouse an interest in the new vehicle that will result in a thriving trade when the season opens.

Don't forget the motorcyclist who has quit—the fellow who bought a heavy machine and found that he could not handle it, or whose parents were afraid of it. There is not a dealer the country over who has not lost at least one customer in this manner. Many times these boys can be induced to take up riding again when they learn that weights have come down, as well as prices.

### Men Who Fear Heavyweights

In the same category, only not quite so easily reached, are the men who never could be induced to ride, for pure fear of the heavy machine; the men who kept away from it because of the high cost, and the fellow who is wont to look contemptuously on the motorcycle as a "dirty, noisy little vehicle." All three can be reached, some through the show window, many through friends, some through letters, some through advertising, a very great many through newspaper publicity—for, regardless of what we say, the fellows who do not believe what they read in the papers are few and far between. Get after them—drive home to them features that distinguish the lightweight machine from the heavy twins. They are all comers.

And speaking of newspaper publicity, the time to get that is right now, while the lightweight machine is new and unheard of in many quarters. Give the "dope" on the lightweight to the editor, sporting editor, or the man who comes to you for your ad. He will see the possibilities of the lightweight from a news standpoint and will be glad to give it space, especially if an ad accompanies the story.

# DEALERS' SECTION

## SECURES CONVICTION FOR THEFT OF MOTORCYCLES

Indianapolis, Ind.—The G. H. Westing Company recently secured a conviction for the theft of a motorcycle and sidecar, one of the convictions it has been possible to make in this city for such a theft. The sidecar combination of Foreman Charles Foley was taken from his barn about midnight one night, but the loss was not discovered until early the next morning. The Westing firm sent out riders over all the main roads to search for the stolen outfit at once.

Jack Carr, motorcycle department manager, rode east and finally overtook a rider on the stolen machine, but the sidecar was missing. He rode with this man until both reached the Exelsior agency of Elmer Smith at Richmond. Inviting the rider to dinner, Carr notified Smith, who sent for the police and the thief was quickly apprehended. He was Charles Staley, of San Antonio, Texas, and was a cripple with but one hand. In court, Staley was sentenced to three months at the penal farm, owing to his maimed condition.

## ST. LOUIS DAYTON AGENCY

St. Louis, Mo.—Blissner Brothers have taken the agency for the Dayton for this city and vicinity for 1916. Their shop is at 3563 Lindell avenue.

## GOTT BUYS OUT PARTNER

Peoria, Ill.—Paul Gott, the welll-known Harley-Davidson dealer and racing man has bought out the interest of his partner, J. G. Martin. He will run the firm hereafter under the name of the Paul E. Gott Company.

Gott will shortly add the Dayton and Pope lines of bicycles to his bicycle department. He reports booking ten orders for 1916 Harley-Davidsons so far and has several commercial prospects for the new models. He recently delivered a three-speed twin to the Peoria police department and several to local grocery establishments.

## WALKER HOLDS OWN SHOW

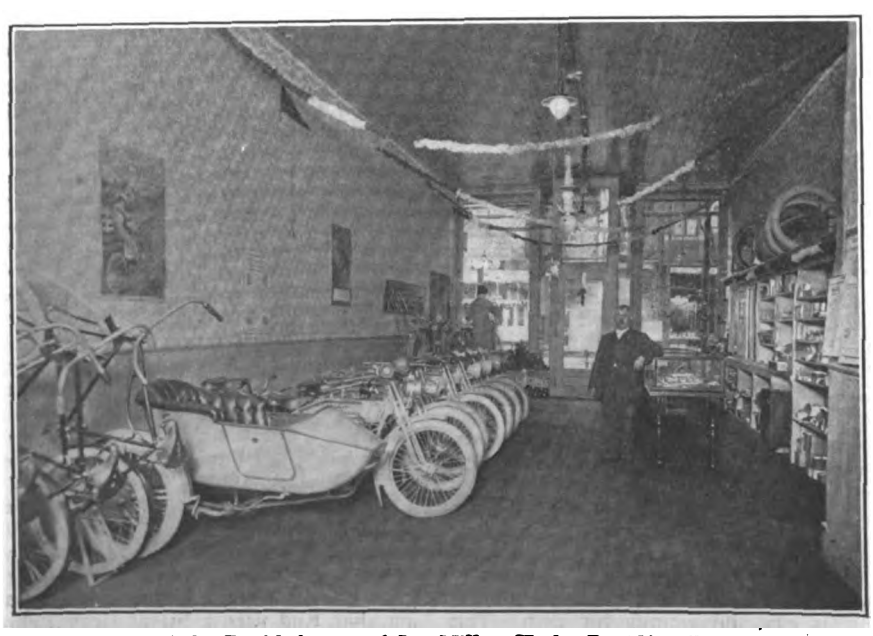
Boston, Mass.—W. J. Walker, local agent for the Harley-Davidson, at 178 Columbus avenue, had the entire Harley-Davidson exhibit from the Madison Square Garden show, in New York, transplanted to his headquarters in this city, and held a special exhibition of his own during the week of October 18-24. The exhibition was a "howling success," according to Walker, and the sales for fall delivery were much increased by it.

## BRAZENOR AT H-D FACTORY

Brooklyn, N. Y.—Bob Brazenor, who distributes the Harley-Davidson in this city and over Long Island, is spending three weeks at the factory of the Harley-Davidson Motor Company in Milwaukee, Wis. This is Brazenor's annual trip to the home of the Silent Gray Fellow, and he always comes back with the fullest understanding about the new models, and also has little kinks in repairs and adjustments as the result of his stay at the big factory.

## PATTERSON ON VACATION

Kansas City, Mo.—Andy Patterson, mechanic for Newby Brothers, Merkel, Thor and Henderson agents, has locked up his machine in the shop and gone off on a month's vacation. He is driving through Iowa in a motorcar which he recently purchased, his wife and Ernest Bush accompanying him.



**Neat Interior of the Establishment of Joe Miller, Harley-Davidson Representative in Burlington, Iowa—Scrupulous Cleanliness and Order Are Insisted On**

## SIDECAR SALES BY MILLER

Burlington, Iowa.—Joe Miller, proprietor of the Hawkeye Cycle Works, Harley-Davidson agency in this city, reports the sale of an electric model with sidecar to Dr. W. H. Ryan for use in making professional calls. Another similar sale was made a short time ago to the Merrill Drug Company, for the use of their traveling salesman, J. L. Warwood. In spite of rains and general poor weather the agency has sold its entire 1915 allotment, and is looking forward to a fine season in 1916.

## WITH WANDERSEE FORCES

Detroit, Mich.—R. D. Brown and Paul Garst have joined the organization of the W. E. Wandersee Company, Harley-Davidson representatives in this city. Brown was formerly in the Harley-Davidson Boston branch, and Garst is a rider of considerable note, being one of the Dodge City speedsters. Both men will perfect a system in the parts and repair department of the Wandersee firm.

## TAKES ON HENDERSON

Newark, N. J.—Bert Coryell, who is in charge of the establishment of the late Frank Cornish on 219 Clinton avenue, has taken the agency for the Henderson for Newark and all of Essex County for 1916. Ever since Cornish opened this establishment, the Yale lines have been handled from this address, and this is the first change of representation in the motorcycle line.

## WEBBER WITH N. Y. SPORTING GOODS

Calvin R. Webber, formerly of Lynchburg and Roanoke, Va., has joined the forces of the New York Sporting Goods Company, of New York, as manager of the motorcycle department. Webber promoted many of the activities of the Dixie and Seminole motorcycle clubs in the South and has been a consistent Indian booster since his first entrance into the trade.

## REPORT SATISFACTORY BUSINESS

San Francisco, October 21.—F. H. Lundblade, of the firm of Knudsen & Lundblade, Eureka, Cal., who are Humboldt County agents for Indian motorcycles and Iver Johnson and Pierce bicycles, was a recent visitor in this city. Mr. Lundblade says that his company has enjoyed a very satisfactory business in both motorcycles and bicycles during the present year.

## TAKES ON TANDEM LINES

St. Louis, Mo.—The R. J. Leacock Sporting Goods Company has taken a jobbing agency for the F. N. tandems and Stoll tandems for this city, thus adding two more well-known lines to their other extensive representations.

Digitized by Google

# DEALERS' SECTION

### KREBS ON REGULAR VISIT TO WESTFIELD CO. PLANT

Westfield, Mass., November 1.—Charles Krebs, Newark, N. J., agent for the Pope motorcycle and bicycle lines, arrived at the factory of the Westfield Manufacturing Company today. He left his headquarters at 51 William street yesterday with a two-speed Pope and rode all the way from the New Jersey metropolis.

Krebs reports that Pope business is better than ever in his territory. He is steadily increasing his list of riders of Pope motorcycles in and around Newark. Recent bicycle sales include two to the Public Service Corporation for use of their outside men. The repair shop is busy these days, he says, on work for all makes of machines, including bicycles as well as motorcycles. The chief demand is for big twins with two or three-speed gears on the one hand and for roadster and commercial bicycles on the other.

### JOHANNES BROS.' 1915 SALES

Springfield, Ill.—The results of the first season's representation for the Henderson by Johannes Brothers, of 310 East Cook street, this city, showed six sales, but the two brothers, Nicholas and Louis, look for a big season for 1916 with this line. In Excelsior sales, 32 new models and 25 second-hand machines were the total for 1915. Johannes Brothers say that they are and will continue to be exclusive motorcycle agents, rumors that they are to handle bicycles being without foundation.

### BERGES FIRM OUTING

Bakersfield, Cal.—The Berges Motor Supply Company, Thor agents for this city and environs, gave a picnic to 300 motorcyclists and bicyclists on October 3. The affair commenced with the guests going fishing and swimming, after which a big feed was enjoyed by all. The Bakersfield band played during the dinner hour and afterward furnished music for dancing. All enjoyed the festivities to the full.

The Berges firm has taken the Indian agency for Kern County for 1916, and have already deposits for nine mounts of that make. The sales of bicycles have surpassed all expectations, the September transactions totalling 157 wheels in all.

### HEINZ IN MINING COLLEGE

St. Louis, Mo.—C. E. Heinz, formerly outside salesman for the Olive Motor & Cycle Company, Harley-Davidson agent, is registered at the Rolla School of Mines, at Rolla, Mo. He resigned from his sales connection recently to study at the mining college.

### KENNY IS RECUPERATING

Lafayette, Ind.—Ross Kenny, local Harley-Davidson dealer, is recuperating from the effects of a broken collar bone and some minor bruises received while riding in a recent race meet. The accident was a mixup when two riders spilled in front of him and was unavoidable. Kenny is congratulating himself that he got off so easily.

**Neat Interior of Ellis Bicycle Company, Handling Pope Motorcycles and Bicycles in Wichita, Kan.—A Complete Stock of Accessories Is Kept at All Times**

### CUTTER SELLS HIS INTEREST

Peoria, Ill.—Wesley Cutter has sold out his interest in the Peoria Motorcycle Supply Company to Holland & Rieker. The new proprietors have changed the name to the Peoria Cycle Supply Company and will sell the Henderson and Thor for 1916. Cutter is to travel in the interests of the Westfield Mfg. Co., makers of Pope bicycles and motorcycles.

### KELLINGTONS HAVE H-D

Decatur, Ill.—N. Kellington and his son, E. N. Kellington, have taken the Harley-Davidson agency for this city and vicinity. They will open a salesroom in a few weeks, and will handle bicycles in addition to the motorcycle line.

### HARLEY-DAVIDSON AT GALESBURG

Galesburg, Ill.—Lee Wright has taken the agency for the Harley-Davidson for Galesburg. Wright prides himself on his shop and salesroom, which is considered one of the best in Central Illinois.

### FREESE & HARRIS TO OPEN

Elgin, Ill.—Freese & Harris have taken the agency for the Harley-Davidson for this section and will open a garage and salesroom on Illinois street, when the most desirable location can be found. They will add a line of bicycles as soon as the shop gets under way.

### ELIJAH SIGNS UP AGAIN

Wawaka, Ind.—Roy Elijah has again contracted to handle the Harley-Davidson for this city and vicinity for 1916. This is his fifth year with this make of motorcycle.

### NOW IN POSTAL SERVICE

Indianapolis, Ind.—Elmer Myerose, formerly manager of the parts department of the G. H. Westing Company, of this city, is in the Indianapolis postal service, having severed his connection with the Westing house a few weeks ago. Myerose was in the post office service prior to his joining the Westing forces. He is succeeded by C. R. Brown, who formerly had charge of the sundries department.

### RETAILERS ORGANIZE $10,000 CONCERN

Cincinnati, Ohio, October 25,—The Park Motor Car Company has been incorporated with a capital of $10,000 to deal in automobiles and motorcycles and to operate a garage. The incorporators are William C. Lang, Christian Lang, Arthur G. Herman and Kate O. Herman.

### AGENCY AT TIVOLI

Tivoli, Ill.—Arthur Opie has taken the local agency for the Harley-Davidson. The contract was signed with Paul Gott, distributor for this section.

### RECENT COMMERCIAL SALE

Rockford, Ill.—Arthur Johnson, who handles the Harley-Davidson in this city, recently sold a truck to Earl Bengston, who conducts a parcel delivery service in Rockford. Bengston will also employ the truck for special delivery of the Rockford *Register Gazette*.

### MOVIE MAN ON THE SIDE

Springfield, Ill.—Rud Blucke, Harley-Davidson representative in this city, is a moving picture operator in such spare moments as his sales of machines allow. He "free lances" with his own apparatus, one of his steady customers being a big Chicago newspaper. It goes without saying that Rud uses a Silent Gray Fellow to take him to and from the scenes of his filming operations.

## THE TWO-STROKE MOTOR—STARTING IT

### Points on Giving Initial Impulses With Some Remarks on Sooting

By D. R. HOBART

**Last of a Series of Three Articles on This Type of Motor**

PREVIOUS installments in this series treated of the operation and of several characteristics of the two-stroke motor, and in particular about its carburetion. It was pointed out that quite a rich mixture was desirable for starting, and that a fine mixture was almost obligatory for running. But before continuing, I should like to say a word or two more about starting.

When the two-stroker is not fitted with pedals or a kick-starter, it is up to the rider to give the initial impulses by means of the feet "slogging" on the ground, or by making the running mount. The low gear should be engaged to get the motor to spin up and, of course, the mixture should be made rich. I guess I've said this several times before, but it is a point that needs driving home. Any pushing off with the feet should be done with vigor, especially if the motor is cold, and a good speed (for the motorcycle) should be attained before shutting the compression release. Personally, I favor the running mount for the two-stroke, as being more of a positive starter," and also making riders expert in what is gradually becoming a lost art. You can easily learn to "foot-slog" or kick-off, according as you like to call the operation, but some day you will need to know how to mount on the run, and you can imagine the results if you don't know how to do it.

**When Starter Is Fitted**

When the mount has a starter, it is best to do the starting of the motor with the gear in neutral or with the rear wheel off the ground. If you should get a back-kick, the shock will be expended in turning the countershaft or the whole transmission over, and as these are comparatively free, there will be no strain put on any working parts. The same thing applies to machines fitted with pedals. Even if a two-stroker has a starter of any kind, it will always purr off with a running start, and what I said before of the starterless mount will be good for the one fitted with the kicker or the pedals. I might go further and say that, with good carburetion, not many riders will use the starter, even if it is fitted, as they grow used to their mounts.

In addition to being nice for starting, the low gear of a two-speed set has another use or two on a light two-stroker. One of these is for hill-climbing and rough road work, as anyone knows, but the other is less known. Two-stroke motors run best at a certain range of speeds, and much economy will result if instead of changing the throttle position the gear is changed. In other words, keep the motor running with its effective speed range by reducing or increasing the gear-ratio, which with a two-speed or three-speed gear will not be a difficult job.

This may sound sort of scientific, but it is worth knowing and practicing. It will be fine in traffic, and when the fuel is not quite what it ought to be, to give two conditions which riders often encounter.

**Clutch-Slamming Unprofitable**

Another point, and this should be memorized by those who have been riding leviathans. You can dump your throttle on a two-stroke, but you can't slam in the clutch. The motor will stall for the clutch-slammer, and he will have another start for his pains. Along with this is the expensive practice of trying to make a quick get-away. A light two-stroker will not leap forward as will an 8 horsepower twin when the clutch goes home, it will very probably stall dead and might injure a bearing in the process, depending of course, upon the brute strength of the rider. That's why I say the expensive practice of slamming, because it does not pay on a husky twin and still less on the little two-stroker.

Since the first article blossomed out in these columns, I have received several letters on carbonizing of two-strokes. Most of the inquirers seem to hold the impression that the two-stroke is a "sooter," but it is no more so than a four-stroke single cylinder, given good carburetion. However, if carbon does collect in the two-stroke, the power will not show such a proportionate falling-off as in the case of a motor having inlet and exhaust valves. The compression will be there and it can't be lost, for the carbon cannot establish a leak as with a sooted valve. It can, however, interfere with the running of the motor by collecting in the exhaust ports and reducing their diameter, thus setting up back-pressure and can reduce the size of the combustion chamber the same as in a four-stroke cylinder. The rider should take off his cylinder every 800 to 1,000 miles with a two-stroke motor and clean out the carbon in order to keep the motor in good trim.

## "SAFETY FIRST" FOR STORAGE BATTERY

By COURIER

WHILE the instruction books accompanying machines fitted with electrical systems are good in their way, it always strikes the writer that much is taken for granted by the battery people and by the authors of the books themselves. The slogan "Let it alone," is a fine one, and except as regards filling regularly with distilled water to make up for evaporation on charging, will satisfy most riders, but there seem to be little things that are not mentioned that some users do to their accumulators and then cry loudly when the latter do not operate properly.

An incident will illustrate one of these things unmentioned in the books. The writer was stopping in an agency to get gasoline, when he saw a rider "testing" his battery by means of a long screwdriver. The battery gave off pretty sparks for awhile, but it's dollars to doughnuts that something went wrong with it when he started out on the road. He was short-circuiting his battery beautifully and making it difficult or impossible to recharge, as the plates might be buckled or the active material loosened. He ran a good chance of putting his generator in poor shape, as his particular machine had to have the battery in working order to perform well on either ignition or lighting circuit. The moral of this is: Use an ammeter to test the charge and keep all metal things away from the cells.

**An Expensive Storage Space**

Then there was another battery-user who figured that spare chain links could be neatly packed away under the sliding lid of his battery box. I towed him in, for the run-down battery put the low tension side of his generator out of commission, and he got no current at all. His little bill was for some $30, while the chain links were worth about 30 cents. Apply the same moral as before.

Digitized by Google

Number 3, uninformed (I almost used another word that is much shorter), I met about three weeks ago. He used a "straight" battery system, one with no generator in circuit. Having had the cells charged at an outside source, he put them back in the carrier and proceeded to make up the connections with iron cement. He got a joint of sorts, which was perfectly good electrically, but, unfortunately, the cement ran along the top of one cell and solidified against the battery carrier whose sides were of sheet metal. After making up the joint he coated the top of the battery with shellac and went out for a ride.

**The Disastrous Results**

That evening when he came to turn on the switch in the back of the lamp, the filament in the lamp glowed a faint pink for about 30 seconds and that was all. He purchased a bicycle lamp and came home. Those cells were a holy sight when we examined them the next day. The iron cement short-circuited the battery nicely, and there were pieces of the active material laying down in the bottom of one cell. The latter had an internal short-circuit and needed all plates renewed. The battery people put in three other new positive plates, in addition to the full set in the one cell, and the user was somewhat peeved. Of course, he condemned the battery and its makers unto the third and fourth generation, right away.

Then there are the trusting individuals who believe what anyone tells them about a storage battery, and those who cannot be told anything. There are more of the latter class than the former, unfortunately. One of them stubbornly insisted that acetic acid and water was better than water alone for the battery, and proceeded to insert the solution in spite of remonstrances from the dealer and a number of riders. He was wrong, as the disabled battery quickly proved. Another "wise guy" added sulphuric acid to a nickel-iron battery and then kicked at the results. It is almost true, as one dealer said, that the woods are full of chaps who won't take advice from the right source.

**Study the Instructions**

It doesn't require much thought to come to the conclusion that it pays to read the battery instruction section of the book pretty carefully, and ask the battery people about anything that you are not sure about. A little time devoted to the page or so pertaining to the storage battery in an outfit instruction manual will save time and cash for the user, so act accordingly.

## POINTERS IN GEAR CHANGING

In changing gears on a solo or sidecar machine, the following procedure will make things easier for both rider and motorcycle. On changing up, draw the clutch and reduce the throttle opening before moving the gear lever. After the change is made and the clutch let in, the throttle can be given again. When changing down make the change as quickly as possible but do not let the motor race unduly during the change; correcting racing with the throttle, but avoid cutting down the motor too much.

Following these directions will reduce wear on the motor, transmission and brakes and keep them dependable in case of emergency as well as ordinarily.

# SPRING FRAME HAS RADIAL MOVEMENT

ONE of the latest additions to the spring frame family is that of E. W. Morley, an English rider, at present located with a despatch-riding contingent in France. This frame is very scientifically designed and can be classed among those in which the rear wheel pivots about a center which coincides with the countershaft center. It has been used with success for a year on the roads of western Europe, and for the last three months over the vile and shell-torn highways of France and Belgium, according to the statement of its inventor. The first photograph shows the frame with a two-cylinder opposed motor fitted, the lines being the same as that of the British-built Douglas 2¾-horsepower model.

The frame is rigid from steering head to rear end, the rear forks and stays joining well back of the rear wheel, and being practically in one piece with the main frame. At C, in the second photograph, is the countershaft, pivotally mounted, and to this are connected tubular members leading to the slider-forks B. There is a curved yoke over the top of the wheel, this yoke attaching to the forks and stays on each side. Spiral springs are fitted between the rear end of the members BC on each side, the upper springs taking the shock and the lower the recoil.

**Driving Members at an Angle**

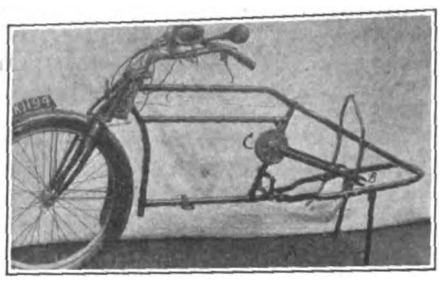
The countershaft is fitted in such a position on this machine as to have the primary chain drive and the final belt drive at an angle to each other instead of being in a straight line. This location is made so that the shock or blow to the wheel on encountering an obstacle is taken by the spiral springs and the motion of the wheel will be a true radial one around C as a center. The wheel is a floating member and is independent of the frame as far as road shocks are concerned. It rises backward and upward for about 6 inches on encountering an obstacle, and this is said to keep the wheel to the road instead of bounding up as in other types of spring frame.

**Completely Equipped Machine**

Arrangements are made for adjusting the tension of both chain and belt on this machine. While spiral springs are fitted to the frame shown, C-springs or leaf springs can be used. It is pointed out that a breakage of a spiral spring will not interfere with the action of the frame, as the spring would keep in position on the curved section of the yoke. Pneumatic tires are fitted, but solid tires have been used on this mount with considerable success, it is stated.

**General Lines of Machine**

The general lines of the fully-equipped machine should be noted. The primary drive is encased, following the best British practice, while the final drive, by V-belt, runs unprotected. The gearset on this machine is in the rear hub, and is apparently an Armstrong-Whitworth with three speeds. The arrangement of the change speed control, by cable leading along the member BC to the center of the countershaft and thence to the lever at the left of the tank is such that the cable is never lengthened or shortened during the motion of the rear wheel. Thus any chance of the gears coming out of mesh by changing the length of the cable is done away with. The mount is fitted with foot-rests, but of course a starting device could be fitted.



**Morley Frame in Detail**

The spring frame is patented in this country and in Great Britain at present, and application has been made for a patent in France. Large quantities of luggage can be carried on it, strapped to the rear part of the frame, or pannier bags of large size can be used on each side of the luggage carrier, following the British army regulation.

## HELPING THE NEW MODEL TO STRIKE ITS GAIT

WHILE a chapter could easily be written on how to treat the new model during the first month or so after it comes into the possession of the owner, there are a few important points which will pay the rider to keep in mind. The first of these is that high speed should not be indulged in for at least the first 500 miles, and the second is that plenty of oil—more than will be used later for a given distance—should be fed to the power plant.

The reason for never exceeding 25 to 30 miles per hour for the first 500 miles is a good one. The motor has not received a thorough road-test (except in a few cases) and the bearing surfaces have not had a chance to wear in nicely. If high speed is indulged in, the surfaces may be improperly worn and the motor will usually run too hot, as there will be plenty of friction due to the surfaces not being worn in.

Copious lubrication is naturally needed during this period in order to get the surfaces into the best of shape. A little point right here is in seeing that the mechanical oiler works right at all times, that it pumps oil and is not air-locked. The hand pump should not be neglected, for a gun of oil every now and then will help matters considerably.

The valve tappets should be looked over to see if the clearance is the right one, and the spark plugs taken out and the points adjusted to a gauge or to half a millimetre gap (about 1/50 of an inch). The brake adjustment is important, as many brakes need wearing in, the same as the bearing surfaces.

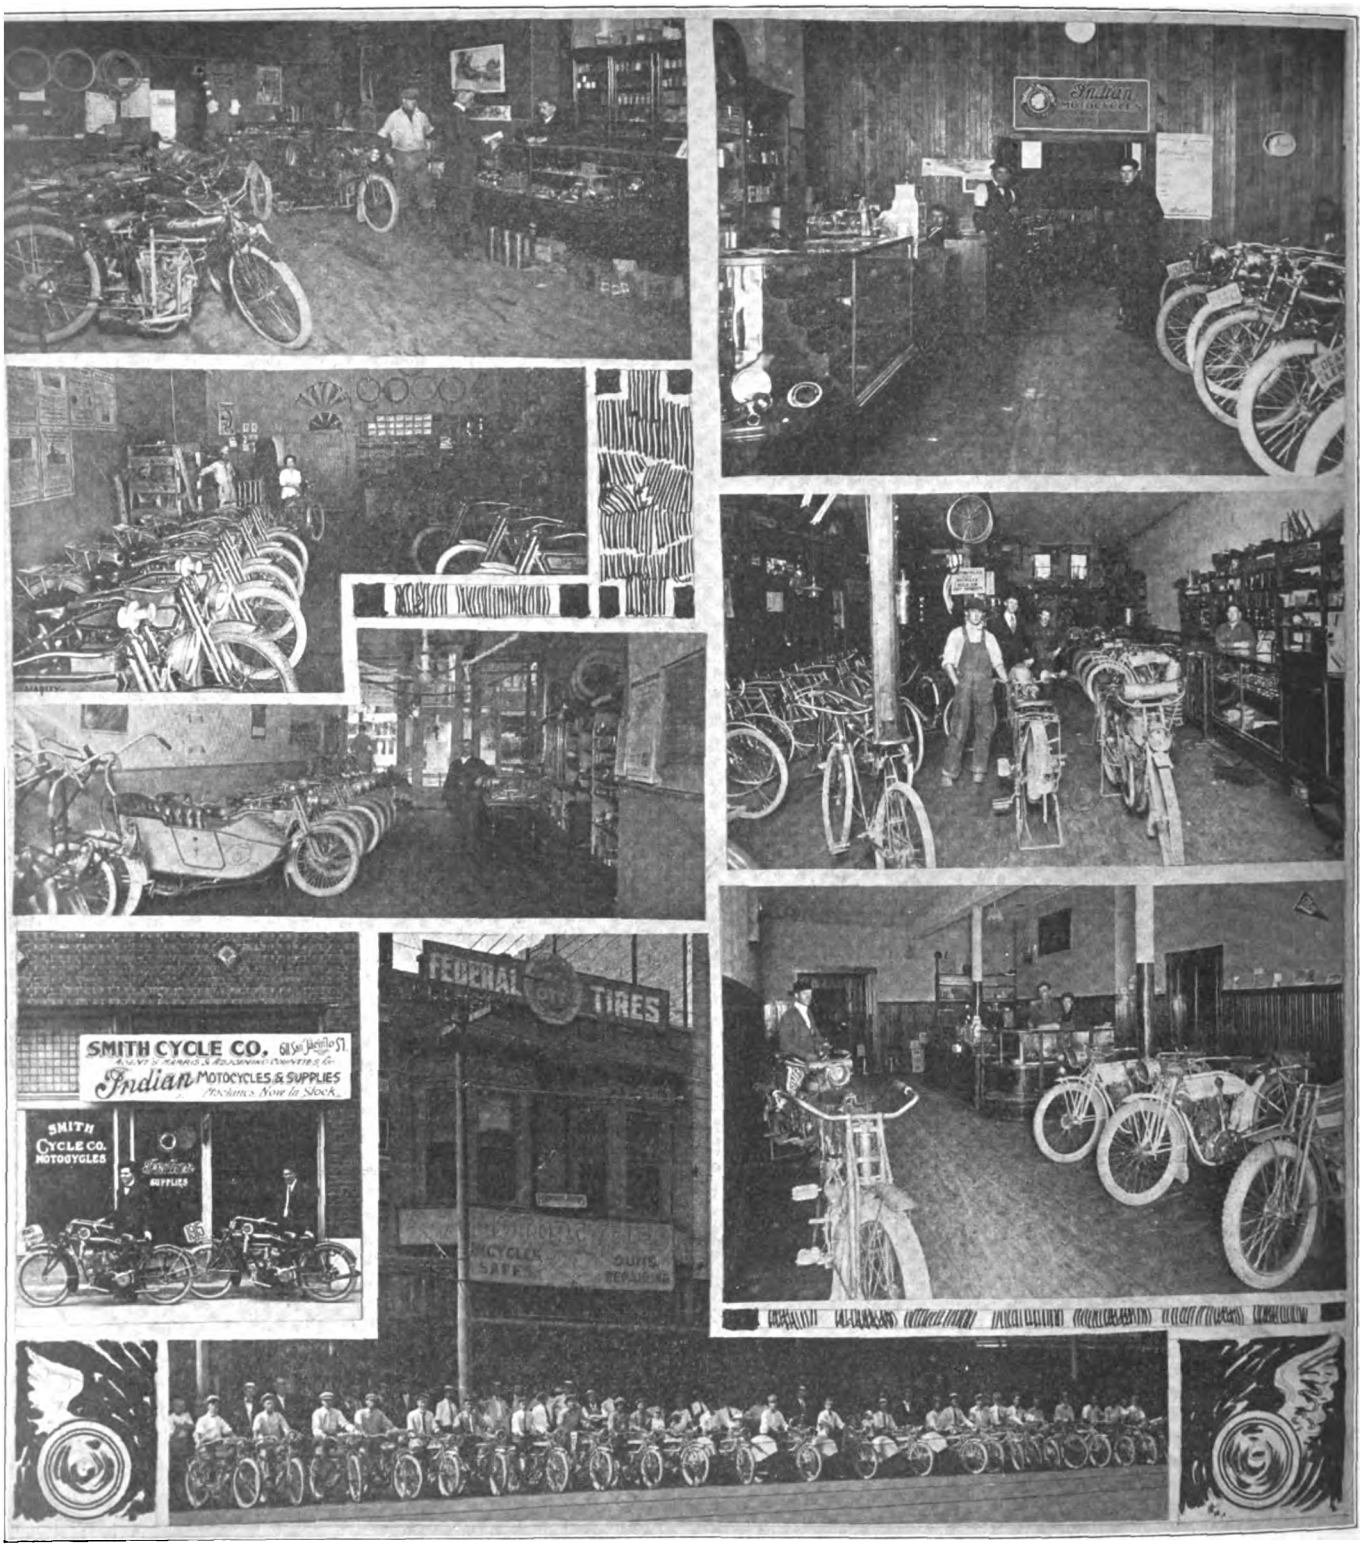
# THRIVING CYCLE AGENCIES HERE AND THERE



UPPER left, Indian agency of E. A. Brunelle, at Troy, N. Y.; upper right, wigwam of H. Systal, at Portland, Me.; second row, left, Harley-Davidson headquarters of Walt Cunningham Motor Co., in Wichita, Kan.; next below, another home of the Silent Gray Fellow, in Burlington, Ia., run by Joe Miller; second row, right, a Thor agency in Southern California; small cut, Smith Cycle Company's establishment in Harris, Cal., where Hendee product is handled; bottom, Charles Ott's Excelsior station at Dallas, Tex.; third row, right, Thor agency in Kansas City, Mo.

..

### SNEED OPENS SHOP

St. Louis, Mo.—H. Sneed has opened a motorcycle and bicycle repair shop at 108 North Twelfth street, under the name of the Supreme Cycle & Motor Co. He will specialize in repairs for all makes.

### TAKE OVER ELECTRICAL SHOP

Vancouver, B. C.—Berry Brothers, who have handled the Cleveland and other Canadian brands of bicycles in this city for the past few years, have acquired the business known as "Taylor Electric" at Ladner, in the Fraser Valley District. They have given up their store in Vancouver and will migrate to Ladner, to conduct the new business as electricians, with the bicycle line on the side.

# Our Canadian Letter

## SMALL CYCLE CORPS HARASSES ENTIRE ARMY

Hamilton, Ontario, Nov. 2.—The practicability of the bicycle in modern warfare has been demonstrated beyond measure by the showing of the Divisional Cyclist Corps of two hundred and eighty-eight officers and men during the gigantic field manoeuvers in Ontario during the past ten days. This small force of cyclists constituted the entire enemy against a division of approximately 12,000 infantry soldiers and two batteries of artillery. Not only did they successfully wage warfare against this army but they were called upon to carry on operations along practically a ninety-mile front.

The scheme, which was the greatest military spectacle ever staged in Canada, consisted of a drive of ten infantry battalions from the Niagara boundary line to Toronto and the small unit of cyclists were given unlimited scope in engaging the main army, which was on the road for nearly two whole weeks. The cyclists pulled off night attacks against camps, harassed whole columns on the march, ambushed transports and otherwise demonstrated their mobility.

When the first battalion fought their way through to Toronto after six days of almost constant marching, the only trophies of war which they exhibited were three bicycles belonging to the "enemy." These they had captured after a skirmish with some of the enemy scouts. The cyclists were here, there and everywhere, and they gave ceaseless worry to the officers of the advancing army.

## TORONTO CLUB IN SPIRITED MEET AT TOTTENHAM, ONT.

Tottenham, Ontario, Nov. 2.—Having found track activities in Toronto rather dull, the Toronto Motorcycle Club conducted a club tour to this town last Saturday for the purpose of introducing speed thrills to the local townspeople on the half mile track here. Only a few hundred Tottenhamites were coaxed to the speed ring, however, but the racing was exceptionally spirited. Six races were staged and the hours were widely distributed, only one emulator of Bob Perry or Don Johns capturing more than one first prize. This was Scott, a newcomer in Toronto, who took two professional dashes with his Excelsior. He defeated Smith, who was aboard an Indian, Moritz, Indian, Jack Knowles of Newmarket, and other celebrities. Scott's time for three miles was 3:50 in one start, while in the second getaway his time was 3:37, which was fast travelling.

A three mile drive for amateurs was won by Morrison on an Excelsior in 4:13, and a five-mile contest for the simon-pures went to Wood, Indian, in 6:35. Morrison fell in the five-mile encounter. Another three mile amateur race resulted in a win for McDonald, Excelsior.

After the racing a sulky was hitched to a three-speed Harley-Davidson and the eight racing men went for a sight-seeing trip up and down the main street. The freedom of the town was extended to the boys by Reeve Totter and they came close to wearing out their welcome by the performance of clownish antics.

## WINNIPEG M. C. ON RUN

Winnipeg, Manitoba, Nov. 2.—The final pleasure run of the season was taken by fifteen members of the Winnipeg Motorcycle Club to Selkirk on October 30. The riders found the road by way of Netley very rough, but the distance, about fifty miles, was covered in two hours. A brief stop was made at Lower Fort Garry for the taking of an official photograph. The tourists experienced a minimum of mechanical trouble and the outing was most pleasant. Although this was the last scheduled run of the year, it is possible that a trip to Portage la Prairie may be taken in the near future if the good weather holds.

## STRIDE AND BARR IN FRISCO

Vancouver, B. C.—Word has been received from Edgar Stride and Robert Barr, both of Edmonds, Burnaby, that they have arrived in San Francisco on their bicycles. The pair covered 1,300 miles in 21 days' actual riding time, leaving here late in September. One spent a week in hospital suffering from malaria en route and the other had to cease riding for a time by reason of a recurrence of cedar poisoning. At Sacramento, Cal., one of the cycles was "lifted" by some light-fingered native.

## MURRAY GETS MEDAL

Vancouver, B. C.—James Murray, formerly of this city and New Westminster, has been awarded the Distinguished Conduct Medal for gallantry in despatch-riding service at the Dardanelles. Murray was an electrical engineer prior to the war, but on volunteering in the Dominion was refused because of varicose veins. He went to London, England, however, and was treated there, afterward joining the naval forces as despatch-rider and signaler.

## TELEPHONE CO. GETS ANOTHER

Vancouver, B. C.—W. H. Morrison, local Indian agent, has just sold the British Columbia Telephone Co. another Indian for trouble-shooting service. This machine is a 7 h. p. twin. It will be put into service at Grand Forks.

## TORONTO DROME AGAIN FAILS; BIKE OVAL FAVORED

Toronto, Ontario, Nov. 2.—The Toronto Motordrome Company has gone to the wall for the second time in two years. A few days ago the reorganized company, which had been operating the bowl this year, went into the hands of receivers and the creditors, of whom there are a fair number, will have to take what they can get.

It is expected that no more motorcycle racing on the boards will be seen in Toronto, or any other place in Canada, but it is probable that an eight or nine lap bicycle oval will be in operation here in 1916. The latter project is already receiving serious consideration and would have good support, it is believed, because Toronto has always been a good bicycle town.

The local motordrome was erected in the spring of 1914 by George I. Kreamer, who has gone into the moving picture business in Chicago. The company went into liquidation in September, 1914, but a reorganization was effected. The Toronto and Buffalo motordromes were the only motorcycle board tracks in operation last summer, and the few riders who persisted in following the game to the last appeared on both tracks on alternate nights. The Buffalo track is said to have experienced some difficulties also.

## CYCLIST CORPS PROMOTIONS

Vancouver, B. C.—Recent promotions in the Cyclist Corps of the Vancouver Volunteer Reserve have been slated as follows: Russell Whitelaw is appointed to the Corps with provisional rank of lieutenant and Lance Corporal H. Pierce has been promoted to corporal in the second platoon. Lance Corporal J. Speer, of the first platoon, has been promoted to corporal, and Privates B. Fryer and H. Crawford have been warranted lance corporals.

## LACROSSE TROPHIES PRESENTED

Vancouver, B. C.—The Indian lacrosse team, winners of the Oppenheimer Cup, and champions of the intermediate division of the league, were presented with the cup on Friday evening, October 29. The Nobleman Cup, for all-around championship, which was likewise won by this team, was presented at the same time.

## FORTY FEET FROM TROLLEY

Sandwich, Ontario, Nov. 1.—The local police have announced that they intend to enforce a regulation prohibiting motorcyclists riding closer than forty feet to a trolley car when passengers are boarding or alighting.

# A MATTER OF TIME

By R. S. SPEARS

(Continued from page 19)

answered. "What I want's a machine that will carry a load up the hill."

Three weeks later the haying began. It was a good hay year, and Mr. Dolen was cutting nearly three tons to the acre on the side hill up which the three-speed motorcycle had climbed. He had cut for three hours and had a team of horses, a hay wagon and three extra men to help him when the drive of his mower broke in two in the middle.

He turned and shouted to his boy 'Gene: "'Gene! Go hitch up Neddie and drive to Middleville and have this rod welded.—And hurry up! I'll bring it down to the barn soon's I can take it out."

### Just a Little Figuring

'Gene knew what his father was thinking. The pay for the team of horses at 35 cents an hour, for the three men at 75 cents an hour, and for their own hired men and his father and himself was going on all the time, and it was wasted if they could not keep the hay cut down and ready for the raking and machine loading.

There was more than two dollars an hour being wasted and it would take at least three hours to go down to Middleville, repair the driving rod and come back with it—and Middleville was right down there under the hill. As he left the rake to one of the hired men and ran down to the barn to hitch up the other drive horse, 'Gene wondered if there was not some quicker way of getting a driving rod up on the hill than by going down with the broken one and having it welded and bringing it up himself.

The line of telephone poles leading down to the valley showed him a way of saving half the time, and instead of going to the horse barn, he went right through the yard to the house. He called up the agent for mowing and harvesting machinery, and in two minutes he had explained the difficulty.

"Now," he said, "There's an agent for motorcycles down there, isn't there? And he's got a three-speed machine, hasn't he?"

"That's so—Kelley; but I don't think there's any machine can climb that Diamond Back road——"

"Oh, yes, they can!" 'Gene exulted. "There was a big fat fellow up here from Rockton on Decoration Day. I saw him! Have Kelley bring it up. You know what time means in haying."

That's right. I'll start him right up!"

Then 'Gene ran out to the barn and began to hitch up Neddie. He found that the light buggy needed greasing, and he greased it well. His father had always taught him to do things the way they ought to be done—that that was the best way.

But Mr. Dolen did not come right down with the broken rod. When it broke, the free end struck a stone, bent and jammed. That delayed him several minutes, and when at last he started down the hayfield to the horse barn, he walked slowly, examining the two pieces of the rod.

As he came into the yard 'Gene was just backing the horse into the thills and he dropped the pieces into the box, remarking:

"I don't think you'd better wait to have this welded, 'Gene; you go around to Popple's and get a new one. It'll save an hour, anyhow. Then we'll have an extra one——"

"All right, father, but you won't lose any time. Here come a new one already."

"What—what's the matter with you, boy?" Mr. Dolen demanded, alarmed. Working in the hot sun does affect people's brains, sometimes.

But 'Gene was dashing out of the barn on the run. Coming up the last grade of the road, with the dust curling from under the drive wheel was a big twin motorcycle, and the rider had a long, yellow and red bar slung from his shoulder by a piece of stout cord.

"Howdy do, Mr. Kelley!" 'Gene grinned, and then in a low voice: "You'd better show that machine to father, soon's he'll listen to you."

'Gene took the new drive rod and handed it to Mr. Dolen, who had come hurrying after 'Gene, not understanding what was the matter.

"What—how—where did this come from?" he demanded, looking from 'Gene to Kelley and then back at the mowing machine drive rod.

"I thought it would save time if I'd telephone and have Mr. Kelley here bring it up; he's the motorcycle agent, you known," 'Gene explained. "It'll save four or five hours' time, you know, getting it here so soon."

"How much do I owe you for bringing it up?" Mr. Dolen demanded.

### Kelley Landed the Sale

"Oh, that's all right," Kelly answered. "I've been laying off to ride up here and show you this three-speed. You see, you need one up here on the hill. Why, you have to send somebody down to town two or three times a week, and that meas a lot to you—two dollars a trip in time. There's a horse's time for three hours, anyhow, and a man's for the same length of time. Now I'll take 'Gene down, and he can have that broken part fixed up, and it'll take about an hour, counting the time to weld the broken part——"

"You can take him down and bring him back in an hour?" Mr. Dolen demanded.

"Do it in less than half an hour if I come right back," Kelley said, confidently.

"How much does a machine like that cost?" Mr. Dolen asked.

"Two-seventy-five. You'll need a light, too; that'll cost about fifteen or twenty dollars, depending on what kind you put on."

"Hard to learn to run one?"

"No, not very. Anyone that's run a gas engine and can ride a bicycle can do it handily—'Gene here could."

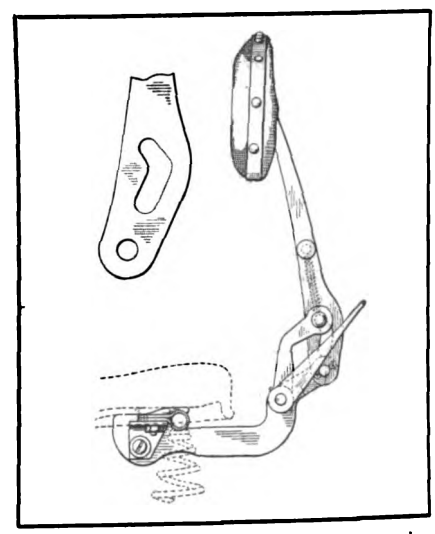
"It's a great time saver," Mr. Dolen admitted and then turned with a smile to 'Gene. "Well, it'll be up to you to run all our errands and pack up everything that weighs less than a hundred pounds."

"I'll put on a luggage carrier that'll do the business," Kelley smilingly interposed. "Your machine'll be here next week, sir!"

And 'Gene simply grinned.

## WEED BACK REST

Patent No. 1,146,675 relates to the well-known Weed Back Rest, produced by the Weed Folding Back Rest Company in Stamford, Conn. It describes a folding back for bicycles and motorcycles, with means to swing the back into the inoperative or horizontal position and also into the upright position. The main arms of the rest carry the padded back and are slotted near the lower ends, and pivoted at their lowest points to a horizontal frame which attaches to the saddle at the cantle. A lever or handle is pivoted on a cross-shaft which carries a second lever on each side, the end of this lever fitting into the slot in the main arm by means of a short horizontal pin. A spring attaches to this lever



and to the arm above the slot, this spring serving to bring the back rest on each side to the vertical position. When in this position, pressure of the handle on either side will lower the rest through the lever ends working in the slots. The patent was issued on July 13, 1915, to Howard W. Weed.

## SCHMIDT SPARK PLUG

Albert Schmidt, one of the best known ignition and motor inventors in the internal combustion field, has been granted a patent on spark plug construction, to the end that leakage between the insulator and the metallic shell shall be prevented. The interior of the metallic shell is cut with a shoulder and on this shoulder is fitted a metallic ring cut with upper and lower surfaces at other than a right angle to the sides.

Above this ring is fitted a compressible gasket, the latter fitting against a shoulder formed on the insulator. The usual means of keeping the insulator in place are provided. The patent is No. 1,147,818 and was assigned by the inventor to the Champion Ignition Company, of Flint, Mich.

# Trade and Sport in England

By OLD RAMBLER

ABOUT this time of the year we get to know something about the internal affairs of some of the big bicycle and motorcycle factories. Some of them have done extremely well in 1914-1915, and among these are the B. S. A. and the New Hudson. The chairman of the latter company commented upon the unprecedented volume of profits. The motorcycle trade, he said, showed an increase of nearly 40 per cent. and there had also been a large and satisfactory turnover in pedal bicycles. "The type of machine called for," said the chairman, "was of a much higher quality and there has been an almost entire cessation of cut-throat competition."

The quoted words in the last paragraph are significant of many things, demonstrating as they do the growing demand for superior cycles and that there is less of that tomfoolery of a few years ago when prices descended to absurdly low levels. Again, the remarks show that there is still existent a healthy demand for the good, old bicycle—and that reminds me of another thing, viz., many of us over here noted with delight the addition of the term *Bicycling World* to **Motor Cycle Illustrated**. It suggested that there was yet in the States an interest in the progenitor of the motorcycle.

### Our Unequalled Roads

Where the croakers and pessimists over here get their ideas from is a mystery to some of us. They can't be men who travel the roads and by-ways of Britain—our unequalled roads. What's that? You want to tell about the Lincoln Highway and the "Old Hickory" Highway from Knoxville to Bristol. Well, these are new; ours are old and lovely. To see them twinkling like fairyland a-nights in autumn as the cyclists are homeward bound makes one realize that the cycling life is a right life, giving joy and sending the good red corpuscles through the arteries of thousands, even as in the boom-days of bicycling in the memorable '90s.

September made its exit in typical blithesome beauty. The woods were aglow with autumn's auriferous colors; the roads as near perfect as they ever have been since Macadam first showed the world a good method of construction; the hills and moors gorgeously empurpled with heather. Yet, amid all these things we cannot and must not forget the war. It has been good to be alive of late and travel amidst the spacious acres of Old England recalling Cowper's well-known lines:

"The morrow was a bright September morn;
There was that nameless splendour in the air,
That wild exhilaration everywhere,
That makes the passers in the street
Congratulate each other as they meet."

### Successful Afternoon's Sport

Just such a morn heralded the last Saturday in September when a fine afternoon's sport of the army and navy type was enjoyed on the Downs within hail of London. Something of a sensation was created by Sergeant Milner getting home first in four contests on a Levis lightweight (198 c.c.), while Sergeant Barker won twice on a Zenith twin (996 c.c.). Douglas lightweights, one of Britain's best, also did well in prize-taking, and the Triumph got first in the sidecar class.

The Hendee Company made a generous offer of a superb cup for the Standard Indian Class; it shows the enormous interest in and use of Indians over here when a class is especially arranged for them. But for some reason the entry was disappointing. P. W. Engelbach, C. P. O. Kingston and H. Oldhams were the prize winners.

### Interesting American Mounts

The rendezvous where the competitors assembled was a charming old country inn, and the collection of machines outside afforded an interesting study. Besides the Red Indians there was another American product of note—an eight horsepower Pope twin, with 1,000 c.c. engine and overhead valves, with a novel design (to us) in rear springs; four plungers with springs extending from the chain stays. The Pope did not get amongst the prizes but it did catch the eye of the critics.

We are greatly interested in the news, notes and pictorial evidence of American models for 1916. It all makes one think how "history repeats itself" once more. A number of lightweights are being offered: machines of about the same horsepower that we had when motorcycles first came out. And let me be candid, some of the new designs are not one iota neater than the pioneer mounts were. When one glances at some of the 1916 propositions, both from American and British factories, one's mind goes back to the earliest motorcycles—the Werner, with its engine in the front wheel; the Raleigh, similarly fitted; the Singer, with power-unit in the rear wheel, and a number of others. We had great times and lively doings with those early-day turnouts; we could learn more about motorcycle mechanics in a month than some fellows get to know in a twelvemonth, these days.

### Big Market for Lightweights

Through the last decade and a half, or thereabouts, I have held an unswerving allegiance to the faith that was and still is in me—that there is a tremendous market for lightweights. There is no need for me to describe the glowing and growing feel that tickles every man doing his first few months of riding—the yearning for a bit more power in his engine, and when he's got it, for still more and more. You all know this irrepressible feeling; it's only human nature; but the safety of other road users had to be considered, or there would have been no limit of speed on the highways. Even now, 40, 50 and more miles per hour are commonly adopted by hustlers, and after all, there is a delirious joy in Speed. We all admit and know this.

But a multitude of wayfarers are not thirsting and hungering for speed all the days of their lives. For that reason, I repeat, there is a huge army of potential motorcyclists who will best be catered for by lightweights, and I prophesy prosperity for the firms who offer good machines, reasonably cheap, whether British or American. Engines, transmission, running parts generally—all these are better than they were a dozen years ago; they are more reliable for the unmechanical Johnny, who is floored by the slightest mishap. We have lots of his type here and you must have some, also.

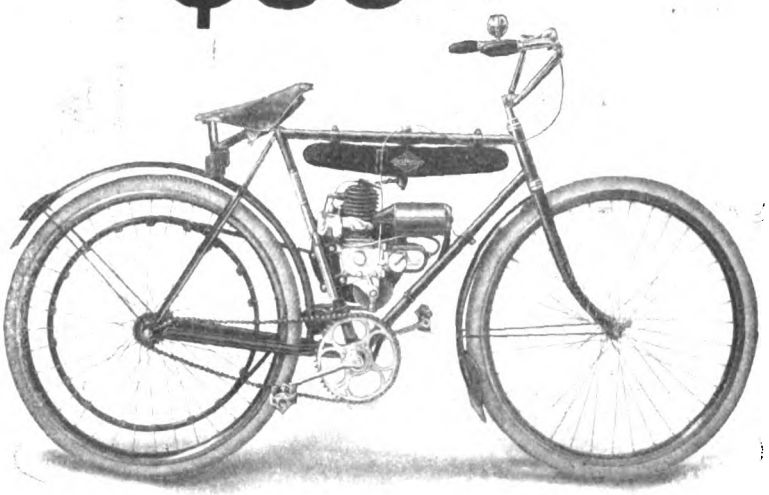
# Cyclemotor

*"Wheeling without work"*

# $55



Fifty-five dollars, f. o. b. Rochester, is the price of the Cyclemotor complete and ready to attach to any diamond frame bicycle. This price is within the reach of every bicycle rider.

Dealers will find this price so reasonable as to be a big help in selling bicycles.

The Cyclemotor will double the number of bicycle sales and you will get twice the amount from each sale, thereby making about four times your former profit without increasing your regular expenses.

Ask for Booklet "J" and information about Local Dealer's territory. Act NOW or your neighbor may beat you to it.

Cyclemotor Corporation

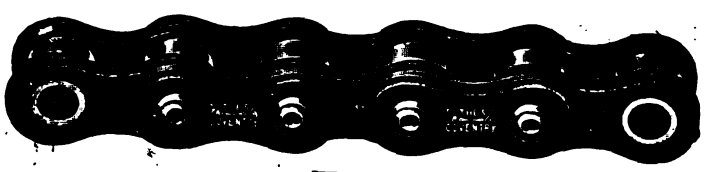
## The Very Latest in BICYCLE TIRES

### Not an Experiment

Thoroughly tested and tried out, and found to be an entirely practical tire.

Notice the cut; it tells the story—Most resilient and easy riding tire made. Be up-to-date and let us send you a section of the latest

KOKOMO RUBBER COMPANY
Kokomo, Indiana



*The Strongest Motorcycle Chain in the World*

The man who uses a chain other than "The Coventry" is not getting all the service, satisfaction and strength in his transmission to which he is entitled. We claim "The Coventry" to be the strongest chain in the world, and we can prove it.

## "The Coventry" Chain

### "The Motor's True Mate"

*5700 lbs. Breaking Strength*

"The Coventry" Chain is the lightest for its strength on the market. Heaviness does not mean strength. The strength of the chain depends upon the diameter of the rivets. Compare the diameter of the rivets in "The Coventry" Chain 28K with those of other makes, and then judge for yourself. The price is $1.00 per foot to the rider.

Get our booklet, "The Motor's True Mate." It's amusing and it's valuable.

# REMY

## Motorcycle Lighting-Ignition System

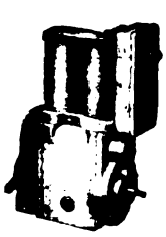
Proof of the complete success of the Remy Electric Lighting-Ignition System for Motorcycles is furnished by thousands upon thousands of Motorcyclists who have used it during the past year.

In every respect it has fulfilled their highest expectations and met their most exacting demands.

## It is not affected by road vibration

Thoroughly protected wiring and a battery that cannot spill make the Remy Electric Lighting-Ignition System trouble-proof.

It furnishes high and low head-lights, tail-light, operates horn, and provides strong, synchronized ignition which increases engine efficiency.



**Remy Ignition-Generator**

See this thoroughly successful equipment on the **HARLEY-DAVIDSON.** It has been an important factor in the winning of some of the biggest road races during the past season.

# TWITCHELL AIR GAUGE

## *Guessing May Cost You Your Life*

## BE SURE

You can't tell how many pounds pressure there is in your tires by pinching them or looking at them, and a difference of a few pounds between what they have and what they should have means the price of a new tire or a broken collar bone, or both.

Inflate your tires to the pressure prescribed by your tire maker and test the pressure in them by means of a Twitchell gauge. There is no other SAFE way of doing it.

Write for table of air pressures recommended by the tire manufacturers.

# "Our Motor Wheel Sales To-day Are Made on Merit and Recommendation Only"

## *Advises a Tennessee Dealer*

"PEOPLE, after consulting riders and hearing nothing but praise, *come and buy*," he continues; "that accounts for the fact that we are now selling a surprisingly great number of Motor Wheels."

Smith Motor Wheel business grows *naturally* day by day. It is a *quick* business; sales follow sales in rapid succession. It is business that is building, yet all the while profits pile up for the dealer—no wait for returns on his investment. His success is immediate. This is simply because the Smith Motor Wheel is perfectly practical in its attachment to the bicycle, and performs without fault—positively proving to others its worth, creating that desire among others to have one. Every Motor Wheel on the street is selling *more* Motor Wheels—there's one of the biggest features of the Motor Wheel in favor of the dealer.

And the Smith Motor Wheel's absolute cleanliness, freedom from mechanical troubles, extreme light weight and ease in riding and operating are the final reasons why folks buy, in addition to the comforts, services, pleasures, conveniences and economy Motorwheeling affords. There is no limit to its market—men and women of all ages, boys and girls, the better class, moneyed people—all are Smith Motor Wheel buyers, and buyers of bicycles and accessories at the same time. It is the only *detachable* bicycle motor on the market. **It has one year's big success behind it. Your market is made.**

YOU have read and you have heard of Smith Motor Wheel successes—you do not know of a failure.

Isn't that enough evidence on which to at least write to us for our 1916 Profit Proposition to Dealers?

# 1,000,000 Bicycles for 1916

## BUT WE MUST *PULL TOGETHER*

Every boy and girl in America is a live prospect for a bicycle.

But these prospects have been sadly neglected. Dealers and manufacturers must awake to the tremendous possibilities before us.

The automobile and the motorcycle have taken only a small part of the former big demand for bicycles.

There is, and always will be, a big market for the bicycle. The bicycle is not dead. It simply needs new blood — new ginger — new enthusiasm.

Talk bicycles. Believe in them. Sell them. Talk to parents. Talk to pedestrians. Talk to the children. Every boy and girl wants one. Every boy and girl should have one.

And they will—if you promote the sale.

Bicycles are better made today than ever in their history.

Roads are better. Tires are better. There are no handicaps today as there were years ago.

There are a thousand winning arguments if you will only use them. Modern selling methods demand greater selling pressure.

What we must use is pressure. There is a waiting market. Now let's get together and put the bicycle back where it belongs. Write us today for the Goodyear plan for increasing bicycle sales.

1,000,000 bicycles for 1916.

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## NEW YORKERS BUY THE DAVIS PLANT

**Business Which Includes Dayton Motorcycles and Bicycles Is Purchased by Blair & Co.—Col. F. T. Huffman Remains Active Head.**

### WILL CONTINUE PRESENT LINES

DAYTON, Ohio, November 5.—The Davis Sewing Machine Company, manufacturer of Dayton motorcycles and bicycles, in addition to the products which figure in its name, has been sold, the new owners and majority stockholders being Blair & Co., one of the best-known bond and brokerage houses in the United States, with headquarters in New York City. The negotiations had been under way only two weeks.

The purchase of the business followed the acquisition of large orders by Blair & Co., which the firm decided could be handled most advantageously with the manufacturing, as well as financial details, under the direction of one company. Large contracts closed by the Davis company recently with the Canadian Car and Foundry Company, attracted country-wide attention to the Dayton plant and demonstrated that the business was one which could readily be broadened in scope.

Col. Frank T. Huffman, president and largest stockholder of the Davis company, has agreed to remain at the head of the organization for at least two and a half years. The other large holders were S. H. Carr and John Stoddard, of Dayton, and Theodore Kunts, of Cleveland. The officers of the company are Col. F. T. Huffman, president; G. H. Gorman, vice-president; J. B. Parmelee, secretary, and J. M. Huffman, treasurer. These four officers, with H. M. Huffman, manager of the motorcycle department, are the five directors who have been actively engaged in the management of the business.

Col. F. T. Huffman

It is the understanding that steps will be taken at once to greatly extend the facilities of the plant, and that all the present lines will be continued, with the addition of several new ones.

All the common stock of the Davis company has been acquired. The company has $540.000 in outstanding bonds, which bear 6 per cent., and $600,000 in preferred stock, which also bears 6 per cent. The preferred stock is retirable. The common stock was purchased at par.

The Davis company was moved to Dayton in 1889 and taken over as a local manufacturing unit by George Huffman, its first president. It was moved from Watertown, N. Y. The company first attracted attention through its sewing machines, which are of international reputation, and later it took up the manufacture of bicycles with great success. Then came the addition of motorcycles to the company's lines, and these machines have added to the company's standing as a maker of high-quality products. It is stated that the company is also equipped for the manufacture of drill presses, screw machines and drop forgings.

While no formal announcement has been made concerning the extent to which Blair & Co. intend to enlarge the manufacturing scope of the company, it has been strongly hinted that the plans call for extensions which will necessitate the employment of 5,000 men in about a year. It is stated that the additional hands will be needed for the enlarging of the present departments, as well as for the new lines which the company is to take up.

### NEW COMPANY TO HANDLE HENDERSON IN SOUTHERN CALIFORNIA

Los Angeles, Cal., November 5.—A new concern, the Henderson Motorcycle Sales Company, has just been incorporated under the California laws to market Henderson motorcycles in Southern California. It is stated that the capitalists behind the General Motorcycles Sales Company, of Boston, Mass., which distributes the Henderson in New England, are also interested in the new California corporation. They are Charles A. Hubbard, former treasurer of the United Fruit Company, and J. T. Lee, of Boston. The new company has taken first-class quarters, for both sales and repair work, in Los Angeles.

Hugh A. Fargo, who was formerly sales manager of the Henderson Motorcycle Company, will remain in California as Pacific Coast manager. President T. W. Henderson, who is on a business tour of California, was present when the new company opened for business in Los Angeles. It is announced that the new headquarters will be in a position to give complete factory service to coast riders.

## ADDITION FOR RACINE RUBBER

**Tire Output of Racine Company Will Be Doubled When Three-Story Building Is Finished February 1; New Machinery to Cost $60,000.**

### NOW EMPLOYING 600 MEN

RACINE, Wis., Nov. 9.—Preparations for doubling the output of the Racine Rubber Company in the manufacture of automobile and motorcycle tires are being made in the erection of a large three-story addition to the present plant in Asylum avenue near the track of the Milwaukee road. The Racine Rubber Company is one of the city's newest industries, and has passed through a gratifying season, that saw the company working overtime in many departments, due to cramped quarters, which would not allow the taking on of any more employes.

The new addition is expected to obviate much of the overtime production, and at the same time pave the way for an anticipated increase in business next year. It is expected that the new building will be ready for occupancy about February 1, and the installation of machinery will be begun shortly thereafter. The new structure will house the mill room and a small portion will be set aside for the storage of crude material. The machinery is expected to cost $60,000. There will follow a reorganization of the entire plant to be in position to take care of added production.

The present working force at the Racine plant is 600 men, but with the new addition in operation it is expected that the number of employes will be increased gradually until the 1,000 mark is reached.

### HESS-BRIGHT FIRM ISSUES FOUR BEARING LICENSES

Philadelphia, Pa.—The Hess-Bright Mfg. Company, of this city, makers of H-B ball-bearings and holders of important patents on ball-bearing construction, has issued licenses to cover the manufacture of these bearings under the Conrad patent to a number of firms. Among the latter are the Standard Roller Bearing Company, of Philadelphia, the New Departure Mfg. Company, of Bristol, Conn.; the U. S. Ball Bearing Co. of Chicago, and the Gurney Ball Bearing Co. of Jamestown, N. Y.

# ELLIS IS AFTER 1,000 MILE MARK

**New York State F. A. M. Commissioner Will Try to Set New World's Record on Empire City Track at Yonkers, N. Y., November 24.**

ON November 24, at the Empire City track at Yonkers, N. Y., beginning at five P. M., George Ellis, New York State Commissioner for the F. A. M., will make an endeavor to break the world's one thousand mile record established by Spencer, at Springfield, Mass., in 1909. Spencer made one thousand miles in twenty-two hours, twenty minutes and fifty-nine seconds. No attempt has since been made to break Spencer's record, and Ellis feels that he has a good chance.

During the afternoon there will be a Marathon race in Yonkers, and the last five miles will be run on the track. As soon as the foot race is finished Ellis will start off on his record-breaking attempt, under F. A. M. sanction, and is expected to make good at it.

### READING ENDURANCE RUN

Reading, Pa., Nov. 8.—The Reading Motorcycle Club is preparing for the 200-mile endurance run to be held from this city on November 14. Thus far 25 entries have been received. The riders will use this city as a starting point and return to it thrice before the race is finished.

The course as being mapped out will be from Reading to Pottstown, to Linfield, back to this city. Then to Hamburg and Shartlesville, and after returning to this city speed through Denver and Ephrata, winding up their course at a point in this city which has as yet not been definitely decided. Medals will be awarded to the first three riders.

### LARGE ECLIPSE EXTENSION

Elmira, N. Y., November 5.—The steadily increasing business of the Eclipse Machine Company has necessitated the erection of a large extension to the present factory which will be occupied by the engineering, drafting and experimental departments. Arrangements have been made to rush the work to completion, so that the facilities can be broadened at an early date in keeping with the volume of business that is coming to the Eclipse folks.

### WILLARD AGENCY IN SEATTLE

Seattle, Wash.—The Storage Battery Service Company, located at 1532 Broadway, is a service station and agency for Willard storage batteries, according to a recent appointment. L. J. Ranney manages the company.

### DECLARES QUARTERLY DIVIDEND

Akron, O.—The B. F. Goodrich Company, of this city, has declared a regular quarterly dividend of 1¼ per cent. on the preferred stock, payable on January 1, to stockholders of record December 21.

### RETURNS FROM RUSSIA

Akron, Ohio.—Roy G. Harris, who has been in Russia for the past ten months as the representative of the Firestone Tire & Rubber Company, reached Akron a few days ago to report to the company regarding business in Russia. He talked interestingly of the war situation, the evidences of which he saw on every hand, and stated that in his opinion the fight will be to a finish.

### BAKER'S EQUIPMENT

Following is the equipment of the Indian motorcycle which E. G. Baker is taking with him on his trip to Australia, Hawaii and other South Pacific points: Dixie magneto, United States Nobby tread tires, Mesinger Air-Cushion saddle, Duckworth chains, Schebler carbureter, Splitdorf spark plugs, Solar lamp, Stewart-Warner speedometer and Witherbee Ignition Co. batteries.

As has already been stated in these columns, Baker is carrying an extra Powerplus Indian motor for emergency service, and is making his tour with the idea of hanging up a number of new speed records, particularly in Australia.

### ELLIS PICKS A HUSTLER

State Commissioner George A. Ellis, of New York, announces that he has appointed Hal Noyes, of Auburn, N. Y., as F. A. M. commissioner at large. Mr. Noyes is very well and favorably known throughout the State, having been a hard F. A. M. worker for years.

### 1500 SPLITDORFS A DAY

An item in a recent issue of **Motor Cycle Illustrated** stated that the present output of the Splitdorf Electrical Company is 315 magnetos a day. This should have read 1,500 magnetos a day. There's many a slip between the typewriter and the linotype and now and then one escapes the Argus-eyed proofreader.

# TURKEY TROT FOR INDIANA RIDERS

**Annual Classic Will Be Staged on Thanksgiving Day Over 65-Mile Course Out of Indianapolis—Pros. and Amateurs to Compete.**

INDIANAPOLIS, Ind., November 8.—The annual "turkey trot" of the motorcyclists of Indianapolis will be held on the morning of Thanksgiving Day over the old road race course, north of the city. The distance is 65 miles and the present record is held by Neson Hodgen, Indian, of this city, and was made three years ago when he covered the distance in the time of 83 minutes.

Hodgen has already announced his intention of entering in an effort to lower his record, while John Merz, Von Staden, Appel, Reinhardt and Otto Summers are expected to enter in the professional class for twins. In the sidecar class, with both rider and driver competing, six starters are expected. The class for amateurs riding twins will be the largest, as most of the clubs' riders who will enter are in this class. The race will be open to all the riders in the state. Cash prizes will be offered for the best time in the professional classes, while medals and merchandise awards will be made to the amateurs.

While the roads as a whole are in good condition, several bad stretches will be encountered on the course. Six towns will be passed through on the run, and permission has been granted to the club by the town official of speed, while going through. The event will be sanctioned by the F. A. M. and will be controlled by its officials. State Referee John Kinney will cover the course in a car in advance of the riders to see that the course is properly guarded at all cross roads. Club members will be stationed at all dangerous points.

## CRUDE RUBBER IMPORTS

The first eight months of the year 1915 show a total of 140,745,276 pounds of crude rubber imported into this country. These figures are considerably in advance of figures for the same periods in 1913 and 1914, when the number of pounds imported were 65,019,592 and 104,480,023, respectively.

The imports of crude rubber during the month of August, 1915, reached 17,060,113 pounds, as compared with 18,659,660 pounds in July, 1915, and 6,654,828 pounds in August, 1914. Practically all the rubber came from the United Kingdom, which shipped 5,254,070 pounds; Brazil shipped 3,039,813 pounds, and the East Indies 7,012,833 pounds.

## BALL BEARING FIGURES

Anti-friction balls and bearings imported into this country during the month of August, 1915, reached a valuation of $96,008, which is slightly in excess of the valuation of August, 1914, which was $83,777. Notwithstanding this increase over last year the month of August shows a decrease when compared with July, 1915, when the valuation was $149,992. The eight months ending August 31, 1915, show balls and bearings to the value of $977,612 imported into this country, as compared with $1,785,294 for the period in 1913, and $1,121,314 for the 1914 period.

Remaining in the warehouse as of August 31, 1915, were balls and bearings valued at $338,300. As of August 31, 1914, the valuation was $425,665.

## CONLISK HUSTLING IN CHICAGO

Joseph J. Conlisk, in charge of the Detroit branch of the Columbia Steel and Shafting Company, of Pittsburgh, Pa., has opened a Chicago office at 1844 Peoples Gas Building. Mr. Conlisk is constantly demonstrating his ability as a friend-maker and is conducting an energetic drive for local business. During the short time he has been in Chicago he has been successful in closing contracts with a number of reputable firms.

## FORCE DOUBLED AT R-S PLANT

Reading, Pa., November 6.—The Reading Standard Company, manufacturer of the Reading Standard motorcycles, has doubled its factory force within the last week or ten days and night work was started on November 4. The company's business has increased at a remarkable rate of late. There are about five times as many orders on the books now for immediate delivery as were shipped last year up to January 1, and at that time the company had filled every order.

# PHOENIX RACE GOES TO JOHNS

**Indian Bacon-Hunter Leads All the Way in 35-Mile Event, with Crandall on Harley-Davidson Second and Berg in Third Place.**

PHOENIX, Ariz., Nov. 5.—Don Johns, mounting his Indian, led all the way in the 35-mile race which opened the Southern Arizona Fair at Tucson yesterday. His time was 31 minutes flat, and the performance was considered remarkable, in view of the dusty and rutted condition of the track. Harry Crandall, Harley-Davidson, was second in 31:40; John Berg, Harley-Davidson, third; Lorenzo Boido, Indian, fourth, and H. Sullivan, Indian, fifth. The feature of the race was the struggle between Crandall and Berg for second place. They were only thirty seconds apart at the finish.

There was some dissatisaction owing to the fact that the Excelsior and Indian riders claimed that it was understood the event was to be at the 100-mile distance, and Bob Perry, of the Excelsior camp, did not enter. Perry argued that he did not care to risk high speed work on the badly rutted track at the 35-mile distance when he had expected the attraction of a 100-mile contest.

"A 100-miler wouldn't have been any safer," said Bob, "but it would have held out greater inducements in the way of honors for the victor."

"Dusty" Rhodes, of Tucson, went out at an early stage with a broken fork, and Russell, mounted on a Cyclone, was retired with a broken spark control. All the riders showed well, Johns' performance being especially meritorious in view of the fact that he averaged 67.8 miles an hour.

## STOCKHOLDERS CONSENT TO NEW FISK STOCK ISSUE

Chicopee Falls, Mass.—Stockholders of the Fisk Rubber Company, of this city, have ratified the proposal to issue 15,000 shares of first preferred stock, as recommended recently by the board of directors. This will bring the preferred stock issue to the $5,000,000 authorized by the charter, less some $225,000 retired last May.

The treasury of the Fisk company will have $1,500,000 when the stock is issued, and this sum will be employed for needful expenses. Stock issues of the company total $14,775,000 at present, of which $4,775,000 is first preferred, $2,000,000 second preferred and $8,000,000 common stock. There are no bonds, but on December 31, 1914, the Fisk firm had $1,745,000 in outstanding notes.

## EISELE A MOSLER SALESMAN

Fred W. Eisele has joined the sales force of the A. R. Mosler Company, of New York City, taking up his new duties November 1, and will cover Ohio, Indiana and Michigan. Joe Fisher is making the rounds with Eisele and introducing him to the trade. Mosler spark plugs in the various sizes will be Eisele's specialty hereafter.

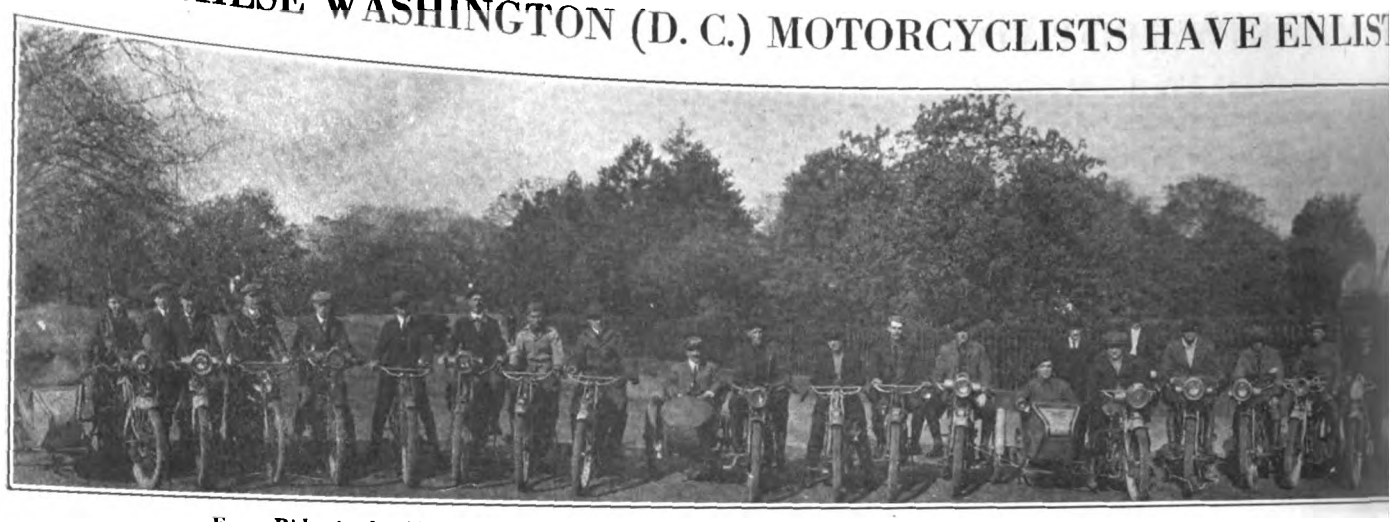
# THESE WASHINGTON (D. C.) MOTORCYCLISTS HAVE ENLIST



Every Rider in the Above Lineup, Excepting the Ladies of Course, Has Signed Up to Drill For Military Service

# MOTORCYCLISTS IN ARMY DRILLS

**New Military Organization in Washington, D. C., Will Participate in Big Program with Various U. S. Army Branches on Thanksgiving.**

WASHINGTON, D. C., November 8.—Consolidation of the new organization of military motorcyclists with the National Capital Motorcycle Club, marked the second stage of the plans to organize a large and efficient corps of motorcyclists to operate in conjunction with the National Guard of the District of Columbia. This step was taken upon the advice of Captain R. A. Sturgeon, the military organizer who is responsible for the new movement.

Plans for the financial support of the organization are being put into shape, the first step along that line being a military tournament to be held on Thanksgiving Day. This affair will include, in addition to motorcycle races, military manoeuvers by detachments from various branches of the United States Army, including infantry, cavalry, artillery, signal corps and aeroplanes. Such military manoeuvers as the new corps of motorcyclists have been able to acquire in the short time at their disposal, under the instruction of an artillery officer detailed from the regular army, will be exhibited.

A committee appointed to effect the consolidation of the two organizations has completed its work and will present their recommendations to the next meeting of the club. This committee consists of Fred M. Mills, F. A. M. commissioner; Harry B. Cohen, treasurer of the club; and Captain Sturgeon. The committee's report includes a recommendation that Captain Sturgeon be appointed as temporary captain of the military division of the club, with C. V. Dessez and P. N. Moulden as first and second lieutenants, respectively. These officers will select the necessary non-commissioned officers, and the completion of the military organization is expected to follow rapidly. Captain Sturgeon has issued a call for the first meeting to receive military instruction.

### SWENSON TO OPEN ANOTHER STORE

B. A. Swenson, the veteran Providence, R. I., dealer, who has done so much to put the Indian on the map in southeastern New England, is preparing to enlarge his activities in the 1916 season by opening a new store in New Britain, Conn. This makes the third or fourth store operated by Mr. Swenson, as he is also directly interested in a store at Pawtucket, R. I., in addition to his big wigwam in Providence, and has sub-agencies at Westerly, R. I., and other places. The new store will be opened right away and will be in charge of Charlie Hadfield, an old Providence rider.

Mr. Swenson will have a big space in the automobile show at the State Armory in Providence, November 12-20, having arranged to have souvenirs and to make the Indian Powerplus and other models as prominent as he so well knows how to do.

### WANT MACHINES FOR DELIVERIES

The Apparel Repairing Company, which was recently organized in New York City, with a capital stock of $250,000, for the purpose of running a large number of apparel repair shops throughout the city, will use motorcycles to make deliveries to its customers. It is stated on good authority that twelve new machines will constitute the delivery system. The secretary-treasurer of the company is J. De Lyon Howth, 21 Park Row Building, New York.

### SUIT FOR DAMAGES

Cincinnati, Ohio.—Suit has been filed in the United States District Court against William E. Richards for $10,180 damages, for injuries alleged to have been caused by him to Harold Kuhling, a minor, who was struck by Richards' automobile while riding his motorcycle. Kuhling declares that the fault was entirely that of the automobilist, and that he suffered injuries, with damage to his machine, entitling him to the substantial amount indicated.

### TO BOOM BRAZILIAN TRADE

An American Chamber of Commerce for Brazil, with twenty-two charter members, has been organized at Rio de Janeiro. The object is to further the development of trade between the United States and Brazil.

# FOREIGN ORDERS STILL GROWING

**Export Figures for August, 1915, Are Far in Advance of Same Period Last Year for Both Motorcycles and Bicycles—Imports Falling Off.**

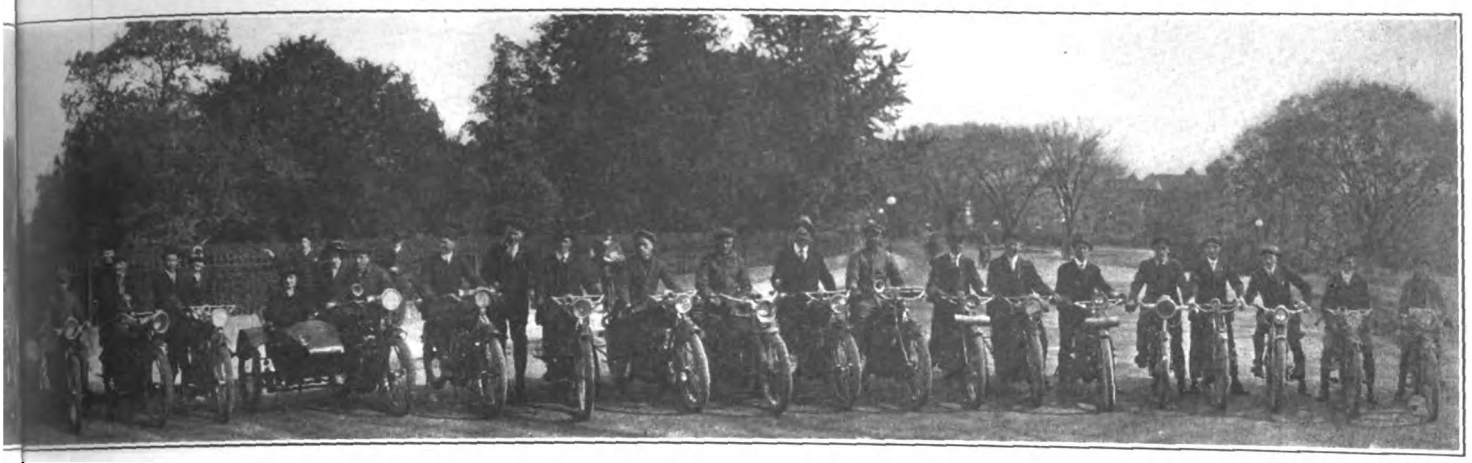
SHIPMENTS of motorcycles and bicycles to foreign countries continue to be encouraging. Exports during the month of August, 1915, are far in advance of shipments during August, 1914, and with the exception of shipments to Porto Rico, a gain is noted in every class of shipment. The increase in the shipments of bicycles is phenomenal, August of 1915 showing a valuation greatly in excess of August, 1914, and July, 1915, combined. The valuation of motorcycles shipped in August, 1915, was nearly eight times the valuation of August, 1914; while July, 1915, showed more motorcycles shipped than August of this year, the valuation for August shows a gain. Imports continue to decrease, the month being below both August, 1914, and July, 1915.

Shipments for the first eight months of 1915 show the year to be considerably in advance of both 1913 and 1914 in the number and valuation of motorcycles, while the valuation of bicycles shipped is but $9,000 less than the valuation set in the period during 1914. Shipments to the Hawaiian Islands, while below the valuation set in July, 1915, are in excess of the shipments made during August of last year. Porto Rico shipments for the month are in excess of those of July, but below the figures set for August of last year. The Philippine Islands show a loss when compared with July, but a substantial gain over August, 1914. The eight-month period shows shipments to all three American possessions to be below the figures set during the years 1913 and 1914.

Motorcycles to the number of 1,744, and valued at $398,792, were shipped to foreign countries during the month of August, 1915. August of 1914 showed

Digitized by Google

# IN THE NEW PROVISIONAL MILITARY ORGANIZATION



**Funds for the New Organization Will Be Raised at a Big Program of Races and Manoeuvres to Be Held on Thanksgiving Day**

but 186 machines, valued at $40,560. July of this year totaled 2,133 machines, valued at $389,964. For the first eight months of 1915 the figures show 10,176 machines shipped with a valuation of $1,905,389. During the eight-month period in 1914 a total of 5,703 machines were shipped, valued at $1,104,599, while in 1913 there were 3,248 machines shipped, with a valuation of $625,494.

Shipments of bicycles were extremely heavy during August of this year, the valuation reaching $82,454, as compared with $19,637 for August, 1914, and $43,735 for July, 1915. The eight-month period shows 1913 leading with a valuation of $493,473, as compared with $372,880 for 1914, and $363,482 for 1915.

Imports for the month of August, 1915, fell below the figures shown for August, 1914, and July, 1915. During August of this year motorcycles and bicycles to the value of $2,053 came into this country, as compared with $3,406 during August, 1914, and $2,712 during July, 1915. During the eight-month period, ending August 31, 1915, the total value of motorcycles and bicycles imported reached but $29,113, as compared with $119,045 during the period in 1913, and $165,057 during 1914.

Shipments to the Hawaiian Islands of motorcycles and bicycles were exceptional during the month of July, 1915, and it is, therefore, not surprising to see August of this year fall behind the figures for July. However, the month of August this year shows up very well when compared with August of last year. During July the valuation of shipments reached the $8,000 mark; in August, 1915, the valuation was $3,593, while in August, 1914, it reached only $2,319. The eight-month period of 1914 leads the period in 1915, the figures being $42,913 for 1914 and $41,156 for 1915, and $83,952 for 1913, the latter being considerably in excess of both the other periods.

Motorcycles and bicycles shipped to the Pihilippine Islands during August, 1915, were valued at $5,622. During July, 1915, the valuation was $8,712. August, 1914, is considerably below both months, showing a valuation of but $729. The eight-month periods show 1913 to lead with a valuation of $49,818, followed by 1914 with $48,116, and 1915 with $33,838.

An increase over the month of July is noted in shipments of motorcycles and bicycles to Porto Rico during August, 1915, but both July and August of 1915 combined do not reach the valuation set in August, 1914. The figures are $2,687 for August of this year, $1,196 for July, and $4,159 for August, 1914. The eight-month periods, ending August 31, show 1913 to have led with a valuation of $32,059, followed by 1914 with $26,648, and 1915 with a valuation of $14,749.

## GIBSON CALLS ATTENTION TO RENEWAL AMENDMENT

Secretary-Treasurer G. B. Gibson, of the F. A. M., calls the attention of members of the Federation to the new arrangement of late renewals as prescribed by a Constitutional Amendment recently sanctioned by the Board of Directors. The wording of this Amendment is as follows:

"If a member renews after date of expiration, he may be issued a card with same number but good for one year from date of renewal."

The secretary further states that he has thought out a recording scheme for such renewals, so that the membership books can be kept clear.

## HOLTON APPOINTS LOCAL COMMISSIONERS IN NEW JERSEY

North Atlantic District Commissioner Elliot B. Holton, announces the following appointments of local New Jersey commissioners: J. B. Werner, of Passaic, for city of Passaic; Martin Siegert, of North Bergen, N. J., for Hudson County; Carl Rockafellow, of Flemington, N. J., for Hunterdon County; Elmer J. Mills, of New Brunswick, N. J., for Middlesex County, and Clyde B. Hay, of Hackensack, N. J., for Bergen County.

## NOTHING BUT FIFTY MILES

Trenton, N. J., October 25.—John A. Johnson, of this city, who has challenged all-comers to a road race at fifty miles, has reecived a communication from Frank Agabiti who wants to race him at a distance of ten miles. Johnson does not seem inclined to enter a race at that distance and has not yet signified his intention to accept the Agabiti proffer.

# PRO. STATUS IS CLEARLY DEFINED

### F. A. M. Directors Adopt Resolution Giving Definite Interpretation of Competitor's Classification — Hess Appeal Is Dismissed.

FINAL decision has been made by the Board of Directors of the F. A. M. upon the interpretation of Section 3 of Article 5 of the Competition Rules and upon the appeal of John Hess in the awarding of the Bosch Trophy at Sacramento, Cal., following the Championship Races. It has been decided by the Board, that the Section which relates to the classification of competitors, shall be interpreted to class as a professional one who has competed on tracks where the public is charged admission, being connected directly or indirectly with the trade. This is in addition to the thoroughly-understood reading that a professional is one who has competed for cash. The Hess appeal is dismissed by the Board.

In the matter of the professional classification the following resolution was adopted:

"RESOLVED:—That the interpretation of Section 3 of Article 5 is: First, a professional is one who has competed for cash; second, or being directly or indirectly connected with the trade competes on tracks where the public is charged admission."

The motion for interpretation of this article was put by Director E. B. Holton, of the North Atlantic District, and was voted on favorably by Directors Ash, Campbell, Holton, Castle, Hunt and Johnson. Directors Daenitz, Donovan and Pixley did not vote.

In the Hess appeal from the referee's decision, the following resolution was passed:

"RESOLVED:—That in view of the fact that no protest in writing against the decision of the referee had been filed, that the Committee finds itself without power or authority to act in the matter of the appeal and the same is therefore dismissed."

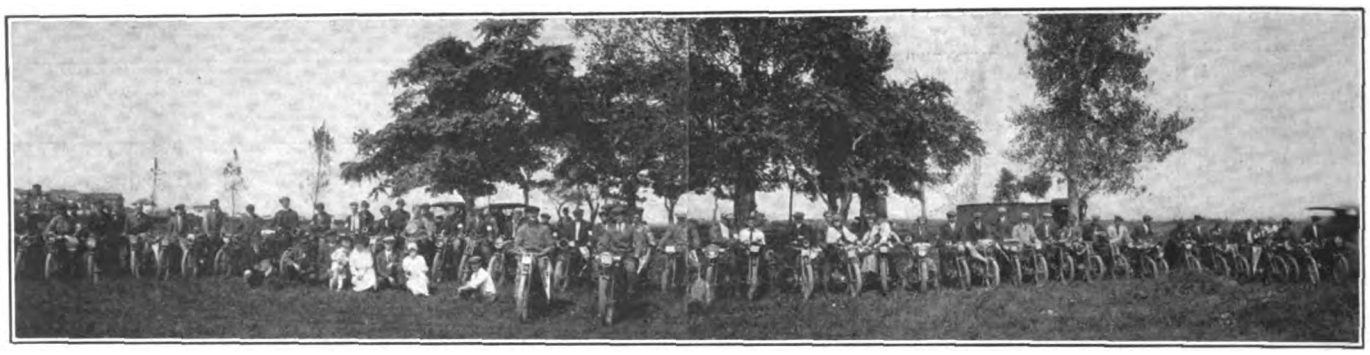
PARTICIPANTS IN DEALER CRESCI'S ANNUAL OUTING AT FORTESCUE, N. J.



**Riders of Vineland, N. J., and Surrounding Towns Who Enjoyed Picnic and Dinner Which Followed Recent Time Run From Harley-Davidson Headquarters in Vineland—Forty-five Solo and Tandem Machines Were Parked at Grounds as Well as Several Autos**

The following voted in favor of the resolution: Ash, Campbell, Holton, Castle, Hunt and Johnson. Directors Donovan, Daenitz and Pixley did not vote.

A third resolution was passed on, in addition. This referred to a dispute concerning the awarding of a cup to J. B. Werner, of Newark, N. J., by Referee Roy Pascal, of New Jersey. It was resolved that the cup be retained by Mr. Werner, Messrs. Holton, Ash, Campbell, Castle, Hunt and Johnson voting in favor of the resolution.

## JOHNSON GIVES VIEWS ON FIRE RECOVERY CASES

LEGAL ACTION CHAIRMAN, W. M. JOHNSON, of the F. A. M., in a recent letter gives his views on recovery for loss or damage done to a motorcycle by fire occurring when filling the tank with the headlight or other lamp burning. He points out that such a case rests upon the principles involved in any negligence case or case for damages. Two facts must concur, says Chairman Johnson, the first being that the rider (or plaintiff) must be without fault on his part, and the second, that the garageman (or defendant) must be negligent or careless on his part.

In two cases in which fire occurred with a motorcycle on the fuel running over and igniting from the lighted headlight, the defense was that the rider could not recover by reason of carelessness in having his tank filled with the headlight burning; in that he, the rider, should have known as well as the garageman or oilman that the vapors of gasoline, or the gasoline itself, brought into contact with the flame would result in an explosion, and that it was required of him as a prudent man to take all steps necessary to avoid the danger.

The letter was written by Chairman Johnson in answer to inquiries on a similar case from a rider in the South. There seems to be no precedent on the subject of putting out lights before filling tanks, the chairman's personal investigations showing that in many gasoline stations no attention to this subject is paid.

### LATEST AFFILIATED CLUB

The Twin City M. C. of Urbana, Ill., is the latest recruit to F. A. M. affiliated club circles, having 15 members and one hundred per cent. F. A. M. membership. C. D. Renfrew, of 307 West High street, is the secretary.

## MASSACHUSETTS ISSUES HEADLIGHT REGULATIONS

BOSTON, Mass., November 5.—The Massachusetts Highway Commission has formulated a State regulation for headlights on motor vehicles, to take effect January 1, 1916. The Commission holds that a State regulation in this matter will prevent any cities or towns making rules which would confuse motor vehicle users, hence the formulation.

The new regulation reads as follows:

Wherever there is not sufficient light, within the limits of the highway location, to make all vehicles, persons, or substantial objects clearly visible within said limits for a distance of at least 150 feet, the white lights which a motor vehicle is required to display by Section 7 of Chapter 534 of the Acts of 1909 shall, when said vehicle is in motion, throw sufficient light ahead to show any person, vehicle, or substantial object upon the roadway straight ahead of the motor vehicle for a distance of at least 150 feet. Any light thrown directly ahead or sidewise shall be so arranged that no dazzling rays from it or from any reflector shall be at any time more than 3½ feet above the ground on a level road at a distance of 50 feet or more ahead of said vehicle, and said light shall be sufficient to enable the operator of the motor vehicle to see any person, vehicle, or substantial object upon the roadway or side thereof, for 10 feet on each side of the motor vehicle 10 feet ahead of said vehicle.

### FOR COMMERCIAL WORK

Vancouver, B. C., November 3.—W. H. Morrison, Vancouver agent for the Indian motorcycle, has just sold eight sidecar chassis, to be used by the British Columbia Telephone Company, for use in their trouble department. Bodies suitable for the purpose will be built in the company's own shop in Vancouver.

### WHERE GASOLINE IS GOING

A total of 8,279,278 gallons of gasoline were shipped during the month of August, 1915, to foreign countries. Of this quantity the United Kingdom received nothing direct, but shipments to British Oceania totaled 1,065,738 gallons, while Canada received 3,935,269 gallons. France received 41,520 gallons, while shipments to other European countries reached 1,622,315 gallons. This may be considered significant when it is shown that shipments to the other European countries reached but 304,337 gallons during August, 1914. It is possible that the warring nations may be receiving a large amount of gasoline through other sources than direct shipments. An increase is also noted in the shipment of gasoline to Argentina, 998,545 gallons being received from the United States during August, 1915, as compared with 224,400 gallons in August, 1914.

## NEW JERSEY M. C. HAS FIRST HALLOWE'EN PARTY

NEWARK, N. J.—With thirty decorated sidecar and solo machines ridden by costumed motorcyclists, and any number of regular riders, the first annual Hallowe'en parade and celebration of the New Jersey M. C. was held on the evening of November 1. Uncle Sams, Indians, Newly Weds, darkies and clowns vied with each other in competing for the prizes offered.

After the parade, the club rooms were occupied by riders and their guests, and games were played. Huge quantities of doughnuts, pumpkin pies and cider were consumed during the course of the evening. The affair broke up in the wee sma' hours, with every participant well satisfied.

Prize winners in the parade were as follows: Sidecar division—P. W. Stevens, dressed in leaves with sidecar outfit correspondingly trimmed, first prize, a silver loving cup donated by Carl Bush; Mr. and Mrs. H. B. Missner, as bride and groom in a rose decorated machine, second prize, pair of fleece-lined mittens, donated by Haverford Cycle Company. In the solo division—Alfred Mowbray, dressed as a farmer, first prize, a speedometer, presented by the F. C. Cornish Estate; George Essbach, as a Moorish chief, second prize, back rest, donated by Walter Goerke. The comic prize was awarded to Otto Dreher, dressed as a tramp. The prize was a rubber poncho. Mrs. Wes. Smith won the first ladies' prize in the comic division. She was attired as a harlequin.

Members of the Arrow M. C. of Jersey City and the Indian M. C. of New Brunswick were present, as was E. A. Robertson, F. A. M. commissioner. The committee in charge consisted of Wilbur Walden, Howard Missner, Arthur Walberg, Henry Sieb and Peter Cunningham. District Commissioner E. B. Holton, who considers this club his favorite, also lent a hand.

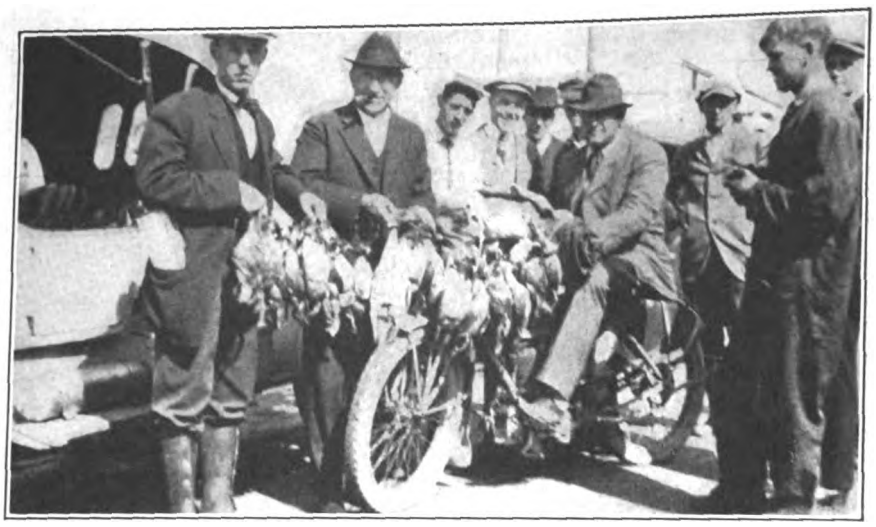
# On the Pacific Coast

## EXCELSIOR DEALER GIRTON ON A GAME DIET

Los Angeles, Cal., November 1.—Tommy Girton, the popular Excelsior distributor in Los Angeles, is living mighty well these days. It's a rare Monday that somebody does not ride up to the store with some trophies of the chase and invite Tom and his partner, Fred Hoffer, to take home a few. Officer Hatch, whose photograph is shown here with 47 ducks, the result of two days' shooting, is keeping up a record which he began earlier in the season by getting one of the finest bucks that was brought down in the brief open season on deer. Harold Frank, the speedster who now works in the Excelsior shop, came in the other day with a bunch of the finest, fattest, firmest-fleshed trout that Girton has ever seen. While a good many of the fellows who depend on the four-wheeler are worrying because they can't seem to find the game and bring it in, the boys on the motorcycles seem to be able to deliver the goods whenever they go out.



**Officer Hatch, of Los Angeles, with String of Ducks Obtained in Day's Shooting—Fred Hoffer Is Feeling Out a Fat Pair for His Dinner—Item at Left**

## THAT NEW LOS ANGELES CLUB

Los Angeles, Cal., Nov. 3.—Over 240 riders pledged themselves to membership in the new Los Angeles motorcycle organization which was started at the dealers' picnic a month ago. Plans are practically complete for the organization, the furnishing of quarters, etc. The motto of the committee in charge having been to "go slow and do it right," the location has not yet been definitely chosen, but will probably be settled upon in a week or so. As soon as this is decided, the work of fitting up the quarters will be taken up.

## MOTORCYCLE DAY AT SAN DIEGO

San Diego, Cal., Nov. 3.—Sunday, November 24, has been officially designated "Motorcycle Day" at the Panama California Exposition, San Diego. On Saturday there will be a race across the desert from San Diego to Tucson, and return Sunday. Large prizes have been donated by the fair management. San Diego riders have been scouring Southern California for local riders of note, and the number of entries for the event and general plans for attendance by large parties of riders promise to make it a notable day.

## McINTIRE HAS THE RIGHT IDEA

Los Angeles, Cal., November 1.—T. C. McIntire, the trombone player in the Pantages Theatre orchestra, Los Angeles, rides about a hundred miles on his Excelsior sidecar combination with his family every day before he goes to work. He does not have to report at the theatre until 3 p. m. He and his family are devoted to each other and to the sport.

## EXPOSITION DRAWS PROSPECTS

San Francisco, Cal., Nov. 5.—P. E. Saumann, manager of the bicycle department of Baker & Hamilton, local dealers in bicycles and motorcycles, is of the opinion that the Panama-Pacific Exposition has not helped to stimulate the cycle trade in California, but that in some instances it has exerted a negative influence. Saumann has just returned from an extensive trip through Northern California and claims to reflect the opinions held by several cycle agents. It is stated by these dealers that a number of their prospects have spent their savings in traveling to the coast metropolis and visiting the exposition. General optimism was shown, however, by the dealers in regard to 1916 prospects.

## MIAMI LIGHTWEIGHT SCORES HIT

Los Angeles, Cal., Nov. 3.—T. E. Berry, Southern California distributor for Flying Merkel motorcycles and the Miami Power Bicycle, received his first shipment of ten of the new machines from the Miami factory on Saturday, and by Tuesday had sold half of them. In about two weeks he expects a shipment of one hundred, among which will be lightweight models with chain drive, two-speed equipment and magneto.

Berry has bought out the interest of his former partner, Harry Sexton, and changed the name of the firm from Sexton & Berry to T. E. Berry. People are constantly crowding the sidewalk in front of Berry's store to see the new lightweight models. Berry says they're a different type of people from those interested in the standard motorcycle. Many of them are middle-aged men, collectors, solicitors and foremen, men able to buy a higher-priced machine if it were adaptable to their work and needs. Their questions are primarily about the light weight machine and "what will the lightweight do"

## A SECOND-HAND SALES RECORD?

Los Angeles, Cal., November 2.—Fletcher & Turner, who opened a place as motorcycle brokers at 925 South Main street, the location formerly occupied by the Miami Bicycle Retail Store, have had remarkable success in handling second-hand motorcycles. Fletcher has been a motorcycle man experienced in selling and buying for five years past, and his partner, Turner, is

## HOW T. C. McINTIRE OPENS HIS DAY TO GOOD ADVANTAGE

**With Wife and Babies in His Excelsior Sidecar Outfit, This Los Angeles Musician Takes Regular Morning Spins Before Taking His Place in Orchestra**

Digitized by Google

an experienced automobile man. Their plan is to buy second-hand machines for cash and sell for cash or installments, also to handle motorcycles on consignment. Some dealers are sending to them riders who have second-hand machines to dispose of. Fletcher & Turner claim to have sold 112 second-hand machines in 89 days, while the previous record was believed to be that of 98 in 158 days, advertised by the operators of the second-hand market on the outdoor lot at Eleventh and Main. Fletcher & Turner also handle accessories and parts, and operate a repair shop at the rear of their store.

### CARLSON RECOVERING FROM HURTS

San Francisco, Nov. 3.—D. A. ("Doc") Carlson, the popular cashier of the Hendee Manufacturing Sales Company of this city, who was seriously injured in an accident at San Jose several weeks ago, has recovered sufficiently to permit of his removal to San Francisco. Manager Anderson, of the local Hendee branch, brought Carlson to the city yesterday. He is able to hobble about on crutches and expects to get back into harness again in a few days.

### INSTALLING FOLLOW-UP SYSTEM

Los Angeles, Cal., November 3.—"The plan of this follow-up system we are installing is to enable us to circularize everybody in Southern California who should ride a motorcycle but does not," says T. C. Girton, of Girton-Hoffer Co., Excelsior distributors. "We are putting in a follow-up system at a cost of several hundred dollars and we are going to keep ater the people whose names are on our list until, as the saying goes, "They die, buy, or say why."

### SOLD OUT TWENTY DAYS AHEAD

Los Angeles, Cal., November 2.—The way the 1916 machines have been taking hold in Los Angeles is remarkable. Passmore & Sayre, who operate the retail store for Harley-Davidsons, have already sold out the car which was due to arrive November 2 and the car to follow, and are promising delivery from the third car due the 20th of the month. It is the first time in many months that a man with cash in his hand could not walk in and ride out on a machine. A few days ago the correspondent of **Motor Cycle Illustrated** saw a man walk in and leave a hat full of California gold, 20 ten-dollar coins, and take away a good second-hand machine, but when it comes to the new ones, right now there are so many after them that it is a case of speak ahead or get left.

### UNION PARADE FEATURE

**Sidecar Rig of T. M. Caldwell, Indian Agent at Amarillo, Texas, Which Was Feature in Labor Day Parade**

### PRACTICE ENDURANCE RUN

Haledon, N. J., November 7.—Members of the Haledon M. C. held a practise endurance run recently, which was staged to show the riders what endurance riding was like. Orie Steele, the local Indian agent, marked out a course of a hundred miles over some of the worst roads through the Pocono mountains. Out of twenty-five entrants, twenty-one finished, the highest score being 886, which was obtained by two riders.

### TWIN IS NECESSARY PART OF BUNGALOW EQUIPMENT

**LeRoy Selby, of Trenton, N. J., Occupies His Cottage This Autumn and Will Use His Faithful Indian During the Winter Months**

### TURKEY RUN FOR CLUB

Atlantic City, N. J., November 2.—A Hallowe'en party was given by the Atlantic City Motorcycle Club on Monday night, which was well attended by members and friends. The club has been bustling with activity during the entire season and will now hold a Turkey Run on Thanksgiving Day. Several large turkeys have been donated as prizes, in addition to other awards including the silver loving cup, to be competed for twice a year, which has been offered by Frank P. Gravatt, the local agent for Indian motorcycles and Pierce bicycles. Plans are now being completed for an endurance run in the near future. Prizes were recently distributed for the secret time run which was held on October 24.

### RACINE CLUB HAS STAG

Racine, Wis., Nov. 9.—Members of the Racine Motorcycle Club held a stag party at the Lakeside Auditorium, and the affair was a big success from the attendance and program standpoint. Roller skating formed part of the entertainment, and refreshments were served.

About 250 motorcycle enthusiasts from Racine attended the race meet held at Russell, Ill., and according to the Racine club boys, it was fortunate that so many Racinites went, or there would not have been enough people on hand to stage the contest at all. Kuball, of Kenosha, cleaned up first place in every event.

### CLUB ENTERS PINOCHLE LEAGUE

Altoona, Pa., November 8.—The Blair County Motorcycle Club, of this city, boasts of having some expert card players among their members and have entered a team to compete in the City Pinochle League which has just been launched.

### BRONX RIDERS TO HOLD SOCIAL RUN

Bronx, N. Y., November 2.—Motorcyclists of the Bronx will hold a social run to Beacon, N. Y. and return on Sunday, November 7. All riders in Greater New York are invited to participate in this affair.

Departure will be made from Januschek's garage at 165th street and Washington avenue, at 8 a. m. sharp. The average speed will be 15 miles per hour, bringing the riders to Beacon at noon. A stop at George Sorenson's agency in that city will be made during lunch hour, and the return trip will commence at 2 p. m.

### TO HOLD ANNUAL DANCE

The Yonkers Motorcycle Touring Club will hold its second annual dance at its club rooms in Hollywood Inn in Yonkers, on Thursday evening November 18th. As was the case last year, this will be an invitation affair. Dancing will begin at 8:30.

### FAREWELL DINNER TO BAKER

On the eve of Erwin G. Baker's departure from Springfield a short time ago to sail for the time trials which he is to make in Australia, New Zealand and the Hawaiian Islands, he was given a farewell dinner at the Worthy Hotel by a party of friends, which included J. H. O'Brien, J. J. O'Connor and Jack Neis of the Splitdorf forces.

# A Fall Invigorator

REPORTS from the factories and dealers the country over indicate that the bugaboo of other years—delayed shipments owing to sudden pressure upon the plants—is likely to cause less anxiety during the coming season than ever before. The problem of giving the market what it wants *when it wants it* has been subjected to keen analysis and both the maker and the salesman are breathing easier. Wideawake dealers are striving to time their schedules for shipments carefully and well in advance, and manufacturers are systematically preparing to meet them halfway.

This is the time of year when the dealer, however progressive he may be, appreciates an invigorator. He could hardly be given a more welcome or efficacious one than the "Prompt Shipments Tonic."

# STEEL MARKET GROWS TIGHTER

## Diamond Chain & Mfg. Co. Tells Trade that Orders for Its Products Must Be Placed Before December 1 to Insure Favorable Deliveries.

INDIANAPOLIS, Ind., November 6.—In connection with an appeal for co-operation on the part of buyers, the Diamond Chain & Mfg. Co., of this city, puts forth an outline of the true state of affairs with regard to deliveries of raw material, steel being mentioned in particular. The Diamond company states in part as follows:

"Steel deliveries, on which we are dependent, are very uncertain and seem to become more so daily. The demand for our chains, both here and abroad, is heavier than anything we expected. The two conditions combine to create a difficult situation which makes it necessary that we appeal to the trade for patient consideration and their hearty co-operation.

"On account of our present commitments we can only accept orders for very limited quantities for immediate delivery. Therefore, we ask definite specifications for January, February and March deliveries be placed before December 1. Until December 1 we can assure delivery as specified, and prices in effect November 1, on orders for delivery during the first quarter of 1916.

"Because of the uncertainty of the steel market we cannot accept at present prices orders for delivery after April 1, 1916, and if the present demand for our product continues we shall not be able to promise favorable deliveries on orders which are placed after the first of December next."

## GUNN BECOMES PRESIDENT OF U. S. TIRE COMPANY

JAMES N. GUNN has been chosen president of the United States Tire Company, of 1790 Broadway, New York. He succeeds E. S. Williams, who resigned in order to devote himself to the mechanical rubber business of the United States Rubber Company.

President Gunn will be in full charge of manufacturing and selling of United States Tire products. He was formerly general manager of the Studebaker Corporation, an automobile concern, and later became the head of Gunn, Richards & Co., business and efficiency engineers in New York. Last June Mr. Gunn was called upon by President Williams to assist the tire company in important efficiency work, and he continued to give his entire time to that firm until recently. Colonel Samuel P. Colt, president of the United States Rubber Company, of which the tire company is a subsidiary, then arranged to have Mr. Gunn become assistant to the president, and when Mr. Williams wished to be relieved to a great extent from the work of directing the United States Tire Company, recommended that Mr. Gunn be made president.

# WITH MISS DELLA CREWE ON HER TRIP

## Interesting Account of the Daring Harley-Davidson Sidecarist's Journey

*THE pictures on both pages were snapped by Miss Della Crewe on her recent trip through the island of Porto Rico. The upper picture shows a group of curious natives that gathered around Miss Crewe's motorcycle. Throughout her trip she found the natives so eager to examine her mount that she sometimes had difficulty in passing through the crowd. The middle picture gives a glimpse of natives washing clothes beside a stream. The lower picture was taken at a point 2300 miles above the sea level; the motorcyclist and pedestrians in the picture challenged Miss Crewe to a ten-mile road race along a mountain highway.*

MY recent sidecar trip to Porto Rico was by far one of the most interesting journeys which I have ever made. Being on American soil I enjoyed more privileges than I did while riding through Jamaica, in the British West Indies. The Porto Ricans seemed to rule the land, and as an American in a United States possession, I felt as though I was a foreigner. But a tourist finds little or no trouble with the natives, and once he starts out from San Juan he soon forgets his oppression in spinning over the fine roads.

### Off on the Ride

The well-known military highway leading from San Juan to Ponce is a well-graded road that winds through beautiful valleys and mountains. Aibonito, the highest place on that road, is 2,100 feet above the sea level and affords a splendid panoramic view of the valleys that stretch out below. From this point one gradually descends and then suddenly encounters a big drop of 1,400 feet within a distance of six miles. Good brakes and compression often work overtime with the caution of the rider when he tries to get safely on level ground again, into the greater Antilles.

Bridges are scarce on the island, and, since there are so many streams that meander through Porto Rico, one soon becomes adept at fording. Mountain streams, falling from altitudes of 1,000 and 1,500 feet to sea level within distances of five to ten miles, frequently make fording impossible. In that portion of the island where streams are most numerous, one must get an early start to escape these mountain torrents, which begin to roll down like thunder from the peaks above at about ten o'clock in the morning.

### "Bad Waters, We Help"

Even shallow pools are dangerous to cross, for the bottoms are generally composed of rough rocks that unbalance the rider, while in many places the sand beds almost swallow up the machine. But I always found the natives, with their trousers rolled up to the knees, standing beside the pools ready to assist me. Most of them would greet me with a "Bad waters; we help"—and help they did.

I remember coming to one stream that was very deep and full of sand holes. Just as I approached it, I saw an automobile being pulled out by four oxen. That made me a little weak-kneed about crossing over on my machine. The natives, who were standing on the bank of the stream, warned me that it would be dangerous to ford it. But I selected four of the darkies and explained to them, after talking for nearly a half hour, that they should keep an eye on me as I was crossing the stream, and come to my assistance if they saw the machine going down. Before starting, I asked one of the autoists to take a snap-shot with my camera when I had gotten mid-stream.

### And Down Went the Machine

Hardly did I reach the middle of the rushing torrent of water, when the machine sank way down into the sand. It required six natives to pull me out. While I was

Digitized by Google

# THROUGH THE ISLAND OF PORTO RICO

## In a Picturesque Island Possession of Many and Varied Beauties

letting the sun dry my clothes, the autoist returned my camera and said;

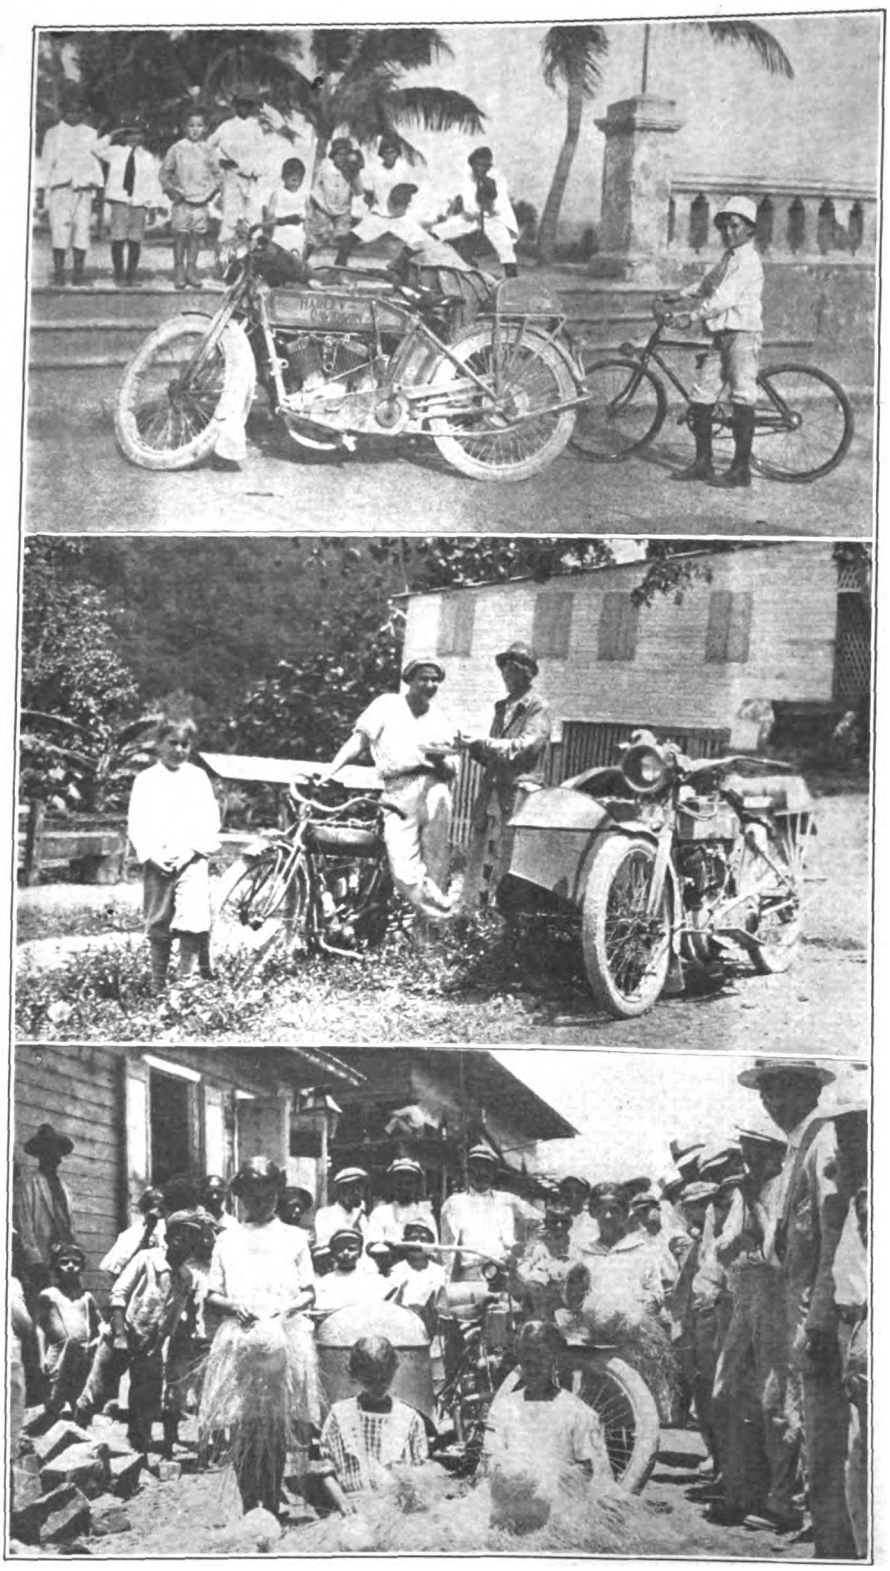
"I beg your pardon, but I was so scared when I saw you sink that I forgot to take the picture."

I had tried every native, both in Jamaica and Porto Rico, who looked at all intelligent, to snap a picture of me as I was crossing a stream, but in each case the amateur photographer got so scared that he invariably dropped the camera. And now that American autoist showed he wasn't much better than the natives! Hence no pictures of the splashes.

### Steep Grades to Arecibo

There are many steep grades encountered over the road from Ponce to Arecibo, which is considered to be the most beautiful and picturesque drive on the island. A short distance out from Ponce is an ascent through sloping foothills that climb at the rate of nearly one hundred feet to the mile. And the ascent becomes still steeper as the tourist progresses, and only fifteen miles from the valley city of Ponce one reaches an elevation of 2,300 feet above sea level.

Everywhere on the island, tropical vegetation grows in profuse abundance. Acres upon acres of coffee and tobacco plantations can be seen stretching out from either side of the mainly traveled roads, while every now and then beautiful and varicolored flowers adorn the wayside. Banana plants are plentiful, and cocoanut trees dot the high mountain peaks, as well as the valleys. Everywhere the most charming scenery breaks into view and leaves a lasting impression on the tourist's memory.



*IN the upper picture is seen one of the many bicycle enthusiasts whom Miss Crewe encountered in Porto Rico. The children in the background were just going to play a game of ball when they were snapped, and Miss Crewe got them to pose like real big league players. In the middle picture Dr. Vives Navarro, a Porto Rican Indian enthusiast, who was host to Miss Crewe at his 5,000-acre coffee and fruit plantation, is helping her to a plate of little sugar bananas grown on his estate. The lower picture shows "Jippa-Jappa" hat weavers at Caba-Rofo. Hat weaving is one of the important industries of the island.*

### ELLIS GETS BANQUET

Louisville, Ky., November 8.—In honor of his fourth anniversary as manager of the Louisville branch of the Goodyear Tire & Rubber Company, the employes of the branch house tendered a surprise banquet to Manager A. W. Ellis on Friday evening, October 29. The banquet, which was held at Klein's restaurant, was attended by about twenty-five people, including the wives and sweethearts of the stockmen, salesmen and other employes. Following a big spread the crowd danced in the private dancing hall until after midnight. Mr. Ellis was taken completely by surprise, as he had not even contemplated such a demonstration on the part of his sales people and employes.

### NEW YORK F. A. M. DINNER

George A. Ellis, F. A. M. Commissioner for New York, announces that a supper will be held in the near future at one of the downtown hotels. It will take the form of an F. A. M. reunion, and also offer F. A. M. members an opportunity to make known their wants.

Joseph Hartig and Joe Dietrich are looking after the Brooklyn riders, Wallace Stewart those of the Bronx and Harry Williams, the riders in Yonkers. Tickets will be $1.25 each, and the supper will be followed by dancing. Further information can be secured from Ellis at Holleywood Inn, Yonkers.

## NEW PULLMAN VAN FOR R. F. D. WORK

MOST important in the line of Pullman sidecar models, made in the factory of the Harry Svensgaard Sales Corporation, of 471 Woodward avenue, Detroit, Mich., is the recent R. F. D. Carrier's Van, which conforms to the regulations of the U. S. Post Office Department. This van has a body 44 inches in length, 24 inches in width and 24 inches in height. It has ample capacity for a 50-mile route.

The Pullman van is of the same high class construction found in the pleasure models and ordinary commercial outfits turned out by the Svensgaard factory. The frame is of wood, with steel reinforcements to give rigidity. The body is covered with rust-proof steel and is absolutely weather-proof. The chassis is the standard Pullman chassis with 13 inches road clearance and a tread of 56 inches. It will fit any make of motorcycle.

**Excellent Drawer Arrangement**

The van is particularly adapted to R. F. D. work, being in no sense of the word a make-shift. There are two drawers, 24 inches long, 17 inches wide and 6 inches deep. Each has a "follow-up board." These drawers the carrier may take into the post office, sort and arrange his mail in them and replace them when ready for the route. There is a window in the front of each drawer so that the next piece of mail can easily be seen. A small drawer, located between the two larger ones, contains a change box and is provided for carrying valuable mail matter, such as registered letters, as well as stamps, change, etc. It is provided with a lock and key. It measures 24 inches by 6 inches by 3½ inches.

**The Parcel Compartment**

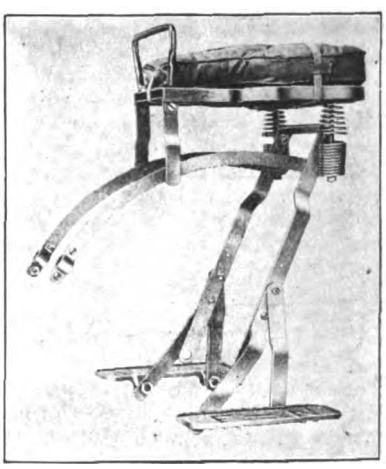
An ample parcel compartment, 44 inches long, 24 inches wide and 16½ inches high, has a drop door at the rear end. The parcel compartment door and the two large drawers are provided with a simple latch which will not loosen by road jars, but which can be easily manipulated with gloves or mittens on. The drawers are all fitted with weather strips at the top. The top of the van overhangs in such a manner as to thoroughly protect the contents from rain.

In developing this van, the Pullman people have considered the essential features of strength, capacity and appearance, and have freely consulted R. F. D. carriers. In every details this van has been constructed with the carrier's convenience in mind. In most cases, deliveries can be made from the drawers without dismounting from the machine.

Above, Testing Strength of New Pullman R. F. D. Van; Left, Drawers and Compartment Open to Show Construction—Note Wide Tread

## FOOTBOARDS NEW FEATURE ON F-N TANDEM

WHILE the F-N tandem attachment has been known to the trade and riding public for a number of seasons in a highly-perfected form, there have been several new features added for the 1916



New F-N Tandem

season, which the makers, the Fentress-Newton Mfg. Co., of 253 Lafayette Boulevard, Detroit, Mich., have found desirable. One and probably the most important one, is in the new "air-floating" springs, as they are called by the makers.

By the use of these springs, an additional range of one and a half inches in the spring action as compared to that of former models, is secured. The tandem is thus extremely comfortable and it is impossible for it to strike bottom over even the roughest roads.

Roomy metal footboards, of the folding type, replace the old style footrests on the new model. The footboards are strong and positive-locking; they are neat in appearance and are quite in harmony with the rest of the tandem. By means of this folding footboard, which gives increased comfort in ordinary tandem riding, it will not be necessary for a lady passenger to use a divided skirt for a short journey on the F-N, as she can mount pillion-fashion, sitting sideways.

The Kantpak cushion is now buttoned to keep it in better shape, the straps being retained as they come in handy for strapping on small parcels in a hurry. The general design of the tandem, which is responsible for the great success of the F-N, has of course been retained. For the new season it retains its light weight and great strength, as well as the excellent fit to the machine on which it is mounted, that has characterized it in the past. The retail price is $10, the same as in 1915, in spite of the increased cost of

Digitized by Google

materials. The folding footboards are made to interchange with the old footrests and riders desiring these attachments for their old tandems can secure them from their local dealer for $1.50 per pair.

## WILLARD BATTERY OPENS SERVICE STATIONS

CLEVELAND, O.—The Willard Storage Battery Company, of this city, has opened branches in Atlanta, Ga., and in San Francisco, Cal. The Atlanta branch is at 8-10 East Cain street, while the 'Frisco quarters are at 1433 Bush street.

Among the service stations recently established by the Willard firm are those of the Wayne Electric Company, Wooster, O.; Citizens Garage, Laredo, Texas; Continental Auto Parts Company, Franklin, Ind.; Shepard Garage, Jerseyville, Ill.; W. L. Clark, Seymour, Ind.; J. E. Rogers, Ft. Morgan, Col.; Hartman Brothers, Montrose. Cal.; Albany Storage Battery Company, Inc., Albany, N. Y.; F. A. Harrison, Ridgewood, N. J., and the Battery & Electric Service Station, Mason City, Iowa.

## VIM BUYS OUT COMPETITOR

Buffalo, N. Y.—John W. Henry, president of the Vim Cycle Hardware Company, has just returned from Erie, Pa., where he closed a deal for taking over the entire stock of bicycles and bicycle accessories of the Erie Rubber Company. This means that the Erie Rubber Company, which started in the jobbing business three or four years ago in Erie, will close up its store and go out of business. When asked what his company intended to do with the stock, Mr. Henry stated that the entire stock would be moved to Buffalo and made a portion of the already complete stock of the Vim Cycle Hardware Company.

## KENDALL IN LOUISVILLE

Louisville, Ky., October 30.—W. K. Kendall, a representative of the Chicago Cycle & Supply Company, of Chicago, Ill., was recently in Louisville, where he called on the bicycle and motorcycle dealers.

## CYCLE TIRES HIS SPECIALTY

C. F. Smith, Special Representative for Firestone Tire & Rubber Company, of Akron, O., in Central States.

## WRIGHT AVIATOR GOGGLE HAS CHEEK PROTECTION

One of the recent additions to the extensive line of goggles put out by the Chicago Eye Shield Company, of 128-134 South Clinton street, Chicago, Ill., is the "Wright" goggle for aviators, shown in the

Wright Aviator Goggle

accompanying illustration. Although designed for flying men it can be used to good effect by riders and drivers. When made without the cheek protection, this same goggle is called the "Macey."

The goggle is a combination of Dimmer and Vision Rain Shield, which protects the eyes from the dazzling rays of the sun and at the same time prevents the goggle from becoming blurred in moist atmosphere. It is thoroughly ventilated to prevent steaming and sets well down over the cheeks to afford protection from cold and cutting blasts of wind. The goggle is made from extra heavy stock to prevent warping from the extreme atmospheric pressure caused by the speed of the aviator.

## HAD NO TROUBLE WITH FIRESTONE TIRES, SAY GEIS

Officials of the Firestone Tire & Rubber Company, of Akron, O., are very naturally pleased with the recommendation of Firestone motorcycle casings and tubes made recently by Walter Geis, of Columbus, O. Geis, with his brother recently finished a 26 days sidecar trip from his home city to Los Angeles, Cal., with a sidecar combination, covering 3,160 miles in all, and states that he experienced no trouble with his Firestones.

"Our rig was fitted with Firestone tires," said Geis, to Los Angeles Branch Manager Smith. "While thousands of people have made the trip to the Coast in automobiles, only a few have done so with a sidecar combination. With such a rig a great deal of dependence has to be put on the tires, especially in precarious mountain passes. We trusted our Firestones implicitly and you will understand with what justification when I tell you that we did not have a puncture."

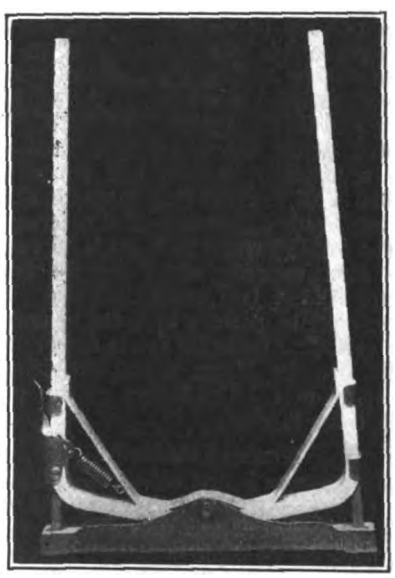
## SLAUSON WAS IMPRESSED

Harold W. Slauson, motor editor of Leslie's Weekly, inspected the Hendee plant at Springfield, Mass., last week. He was astonished at the size and completeness of equipment of the works, and especially at the close working limits employed in the manufacture of motorcycles. It was also news to him to learn how much of the Indian is made from raw materials to start with, and how few parts are purchased. Contrary to the opinion held by the majority of people he satisfied himself that an up-to-date motorcycle approximates the high grade automobile in fineness of fittings much more than it does the cheap motor car. Mr. Slauson had a ride in a sidecar, having an opportunity in this way to learn the ease of three speed handling and wound up his visit very much of an enthusiast over this type of vehicle.

## KEEPS MOUNT UPRIGHT ON ALL KINDS OF SURFACE

HERBERT VERMEER, of 2127 Ellendale avenue, Los Angeles, Cal., has invented a novel type of stand which is adaptable to motorcycles and bicycles of any weight or make. It is adjustable, the lower part or tread being arranged to keep the machine upright no matter what the conformation of the ground upon which it stands.

The tread is pivoted at the lower part of the stand proper and can be loosened to pivot within limits by pressing on a latch at the side of the stand. On operating the latch, the tread adapts itself to the roadway or ground, and on releasing the latch the tread locks in position, holding the machine upright. There is no delay in



Vermeer Adjustable Stand

looking for a level spot in the road with this device and no chance of the motorcycle falling over and damaging its fittings or equipment.

Mr. Vermeer has obtained patents on his stand, these being Nos. 845,071 and 807,356. All communications regarding this accessory should be addressed to him personally at his Los Angeles headquarters.

## WHERE BUSINESS IS GOOD

From C. L. Waters, president of the Motorcycle Equipment Co., of Hammondsport, N. Y., comes the announcement that business for the 1915 season has been far better than for any previous year, even better than expectations, considering general conditions. The business showed an increase of more than 30 per cent. over 1914 from both the Los Angeles branch and the Hammondsport headquarters. During the year from August, 1914, to August, 1915, the company recorded a gain of 1,112 customers.

Digitized by Google

# SIMPLICITY CHARACTERIZES "AOS" TYPE BERLING

## Has Integral Interrupter Cams and Is Very Accessible

DESCRIPTIVE of the "AOS" type of Berling high-tension magneto is a recently-issued book from the Ericsson Manufacturing Company, of Military Road, Buffalo, N. Y. This magneto is the simplest type of Berling machine, and like the other models is of the true high-tension type, secondary current being generated in the armature.

The "AOS" magneto has its entire frame, including the base, top, pole-pieces and driving end bearing in one piece. This construction, with the fitting of ball bearings of the highest class, ensures permanent alignment between the field and the armature, a very important feature where so small an air-gap is necessary. The magneto has the well-known Berling interrupter in which the centrifugal force assists in making the operation more positive instead of hindering its action.

### Integral Interrupter Cams

The cams which operate the interrupter are an integral part of the interrupter housing. The interrupter can be inspected while the magneto is running, so that its operation can be verified. The adjustment is most simple, the loosening of an ordinary screw locking the platinum contact screw enabling the relation of the points to be made to the required standard. The contact screw has a hexagon head and the combination wrench and gauge furnished with each Berling magneto allows of very ready adjustment of this screw.

The "AOS" magneto is made to run in one direction only, which for the Smith Motor Wheel is counter-clockwise. The drive must be positive in order to prevent any variations in timing due to slip or other cause. In the Motor Wheel the drive is by spiral gear. The timing of this magneto is as follows:

### Timing This Model

The magneto is first bolted to its mounting brackets, so that it lines up properly with its driving gear. The gear is to be left loose on its shaft in order to properly time the magneto. The piston of the motor is next brought to the top center on compression stroke and then moved in a direction opposite to that in which the motor normally operates until it is at a point where the extremely advanced spark is to occur. This in the case of the Smith Motor Wheel is 9/64 of an inch.

The magneto armature is next turned in the direction of its rotation until the platinum contacts on the interrupter just begin to open. With the piston down 9/64 of an inch as mentioned above, the magneto should be connected to the motor, taking care that the relative positions of motor, magneto and driving gear are maintained during the process. After locking the gear in place, the magneto is properly timed.

### Grounding the Magneto

If the setting of the magneto has been made according to these instructions and the motor does not, however, give its maximum power, it is because the amount of extreme advance of the piston has not been correctly chosen. It will be necessary to change the setting until the desired maximum of power is obtained, by altering the relation of the magneto with regard to the position of the piston. For grounding the machine, there is a grounding terminal on the interrupter housing, and a cable leading to the grounding switch from this terminal will serve for this purpose. As the current passing along this cable is of low tension, it is not necessary to use a secondary cable.

### High Degree of Efficiency

In common with other types of Berling magneto, the "AOS" has a high degree of efficiency, due to its design, to the careful selection of materials used in its construction and to the balancing of the various parts, such as the condensers, armature windings, magneto, etc., in their relations to each other to give a maximum output. Its reliability is ensured under the most severe service by thorough inspection of all materials used. Only the highest quality of magneto steel is employed; ball bearings are of high standard and the platinum-iridium contacts are the hardest and best the market affords.

One of the features carefully worked out in the design of Berling magnetos has been the accessibility of all parts which might require inspection or adjustment. The interrupter, for example, is easy of access and is so arranged that the contacts can be readily seen at those positions where it is necessary to observe the opening of the contacts for adjustment. The construction of the magnetos is such as to thoroughly protect all working parts from oil, dust or water. The number of screws, particularly in the "AOS" model, is very few, and thus the possibility of loose screws and poor adjustment is very remote. The magnetos all develop a spark equally as strong on retard as on full advance, ensuring easy starting and smooth running.

### Caring for the Magneto

The Ericsson Company issues the following instructions for the care of its magnetos: The magneto, like any other piece of machinery, must occasionally be cleaned and overhauled. No provision is made for oiling the magneto, as the ball bearings are packed with grease when the magnetos are manufactured and this lubrication is sufficient for at least two years normal running. When additional lubrication is necessary, which will not normally occur, nor need be attempted until overhauling the motor after its second season, the magneto must first be removed and the driving gear taken off.

The "AOS" Type Berling

### Dismounting Procedure

First, unscrew the high tension terminal; second, remove the cam housing, which can be slipped off by merely turning aside the cam housing clamp spring; third, remove the interrupter by unscrewing the interrupter hex head mounting screw; fourth, remove the interrupter end bearing by removing the four mounting screws.

The armature can then be slipped out of the magneto through the interrupter end. While the armature is removed, place a piece of iron between the pole pieces, in order to keep the magnetic path closed. Thoroughly clean the ball bearings and ball races with gasoline. Wipe any surplus grease or dust off the armature with a cloth moistened with gasoline. Clean out the inside of the frame, especially the end bearings and the ball races.

### Lubricating and Assembling

Pack around the ball retainers a good quality of heavy automobile grease, using just enough to have the ball retainers level full. First put the armature back in place, fastening the driving end bearing securely and putting back the interrupter, being sure that the locating pin on the interrupter fits accurately in the hole for it in the armature shaft. Carefully tighten the interrupter mounting screw and put back the cam housing, and lastly insert the high tension terminal.

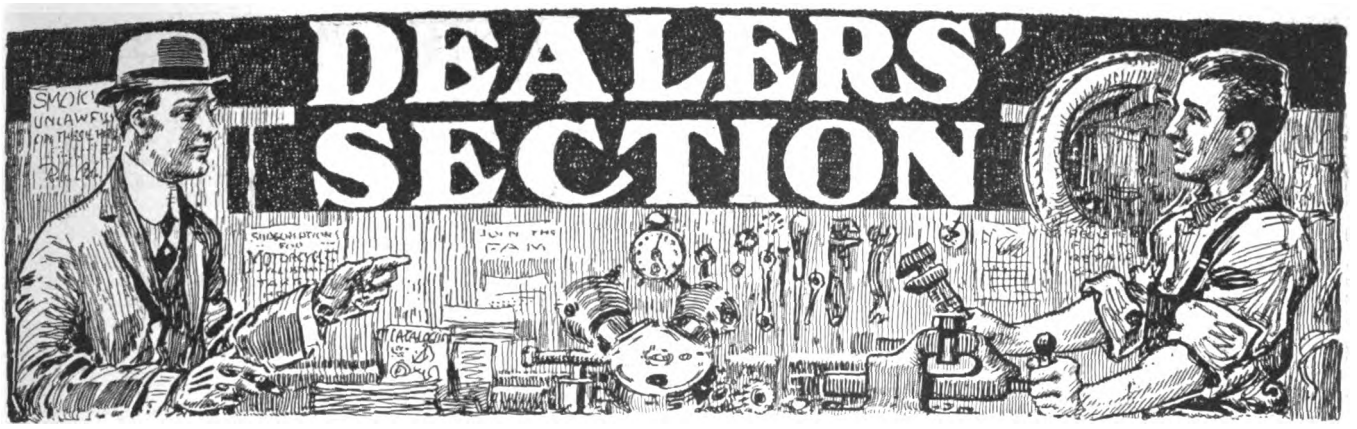
Trouble in the ignition system is indicated by the motor "missing" or stopping entirely. It is safe to assume, to start with, that the trouble is not in the magneto, as it is very rarely that the trouble occurs at this point.

When trouble occurs, the spark plug should be examined carefully, as this is where practically all the trouble occurs. To do this, disconnect the cable and remove the spark plug. Again connect the cable to the spark plug and place the spark plug so that the frame portion of the plug is in metallic connection with the frame of the motor. Then turn over the motor, thus revolving the magneto, and see if a spark is produced at the plug.

### Look at Interrupter

If the trouble remains after the spark plugs have been examined and found in working order, look to the interrupter contacts and see that they break properly when the lever passes over the cam. The gap should be from .018" to .020", and a guage is provided for adjusting it. If the contacts are worn or pitted, they should be filed off slightly with a very fine, smooth, file, being very careful to see that they make positive contact at all points when the lever is off the cam. The contact points must be absolutely free from dust, dirt and oil. The gap between the contacts may be adjusted by loosening the clamp screw and then adjusting the contact screw with the wrench.

Digitized by Google



# MILWAUKEE DEALERS EXPECT THRIVING 1916 SEASON

## Agents Foresee Sales Increases But Do Not Favor Lightweight

By PATHFINDER

MILWAUKEE, Wis., November 9.—Interviews with various motorcycle dealers in this city indicate that there is every reason to believe that the 1916 season will show a healthy growth in sales over last year. Local dealers and enthusiasts are inclined to be skeptical regarding lightweights, arguing that so far as Milwaukee is concerned the time is not yet ripe.

While there has been a gratifying extension in every direction of the concrete roads leading out of the city, Wisconsin roads are generally far from being suitable for the lightweight. The city's system of boulevards do not permit of continued travel for any great length of time. Most Milwaukee riders are of the "get there and back quick" variety, and it is not thought likely that the little fellows of the pop-pop tribe will appeal to the vets.

### Collections Fine, Says Kasten

Emil Kasten, Excelsior dealer, has a 1916 three-speed in the window and reports plenty of new business in sight. "What surprises me is the way collections are coming in," says Emil. "I have no kick coming. War talk might lead a fellow to think that time payments would be interfered with, but I don't find that to be the case. Labor conditions in Milwaukee seem to be better right now than they have been for years. It will be a good year."

Out at the Badger State Motorcycle Company, the new Indian dealer, things are rapidly being whipped into shape in readiness for the new season and new product. An elaborate electric sign over the former Reading-Standard headquarters does ont leave any doubt as to what is handled in "that neat little shop 'round the corner." The new demonstrator has not arrived at the time of this writing, but was expected every day. George Melcher, former head stock clerk with the Wisconsin Motorcycle Company, is temporarily in charge of the stock room at the Badger State establishment.

### New Forces at Mueller's

A lot of new faces at the Mueller Cycle & Supply Company, the Harley-Davidson home, are seen as the result of a big shake-up in Louis Peterik's mechanical office and sales staff. J. E. Butzer, former secretary of the Gas Tank Recharging Company here, is in charge of the books. William E, Spangler, formerly with Harry Dipple at Indianapolis, has been placed in charge of the Mueller repair shop, with W. E. Carroll and Bert Talbert assistants. A. L. Fisher is assisting Manager Peterik on the sales staff.

### Mueller Gives Up Bikes

An announcement that contains a surprise is the one which states that the Mueller Cycle & Supply Company has given up the sale of bicycles and will devote itself entirely to motorcycles in the future. Manager Peterik said that the profit in the bicycle end of the business did not warrant allowing it to interfere with the motorcycle sales. The Mueller sales floor, with its few used machines, tells a story of heavy sales of second-hand machines this fall.

Charles D. Bremer, the Yale man, is undecided about the make of motorcycle which will be sold during the 1916 season at the Muskego avenue shop. Kelm & Burbach Company handled the Emblem last season besides pushing the sale of the Kelm & Burbach motorcycle garage. According to Mr. Burbach his company is undecided about this season's policy and machine.

### Koehler Back Again

Friends of J. J. Koehler, former president of the Milwaukee Sycle & Sales Company, who resigned his position a year ago, will be glad to hear that "J. J." is back on the job as presiding genius of the Milwaukee Sycle sales department. Watson E. Barnhart and Koehler will be partners in the new enterprise which retains the old firm name. The Thor motorcycle will be handled by this concern for 1916, controlling the southeast corner of the state.

The name Merkel has been associated with Leo Lippow in Milwaukee for these many years and it is likely that Lippow will be the local dealer again for 1916. Lippow has no store at the present time, but his friends in the local fraternity, knowing Leo's resourcefulness, anticipate that he will have no trouble getting located when the time comes.

Joe Lantry will continue to handle the Harley-Davidson under the Mueller Cycle & Supply Company as east side dealer.

## BIG DEMAND FOR LIGHTWEIGHT

Los Angeles, Cal., November 3.—"Better than ever," is the way T. C. Girton, of the Girton-Hoffer Company, Excelsior distributors, tersely describes general business conditions in Southern California. He has just been over the entire territory and not only reports a fine demand for the Excelsior, but says a good sign is that "every dealer is asking for the new lightweight," and is anxious to get machines into the store as soon as they can be shipped from the factory.

## NEXT DEALERS' PICNIC NOV. 21.

Los Angeles, Cal., November 3.—With Tom Girton and Fred Hoffer in charge there will surely be one grand old time at the next Los Angeles dealers' picnic, November 21.

"I don't know where we are going nor what we'll do," said Tom Girton, on the first of the month, "but all the boys are trying to tell us those things and we are doing some figuring ourselves. There will be interesting events and good prizes and a whole lot of people, and everybody is going to have just as much fun as he ever pecked into a day."

All the dealers are co-operating to get the crowd out. The local dealers are taking turns in managing the picnics in the series, and each motorcycle establishment will have a chance to jump in and show what it can do in the way of framing up a truly enjoyable outing.

## SUPPLY CO. MOVES

St. Louis, Mo.—The Auto Owners' Supply Company., formerly Yale agent for St. Louis, was removed to Nineteenth street from the old quarters on Twelfth street. They are at present specializing in vulcanizing work of all kinds.

## KENTUCKY OIL DISTRIBUTOR

Louisville, Ky., October 30.—Roy E. Warner, president of the Roy E. Warner Company, Louisville agents for the Firestone Tire Company, has secured the exclusive distribution of White Star motor oil and greases in the State of Kentucky.

## COMMERCIAL SALES INCREASING IN SAN FRANCISCO

San Francisco, Nov. 3.—Motorcycles continue to gain in popularity in commercial service in this city and vicinity. The field is constantly broadening out for the motorcycle van, which is successfully meeting the competition of the automobile. A recent sale of five Dayton 2-speed twins, equipped with special delivery vans, to the Peoples Bread Company, by W. H. and W. E. Jackson, coast distributors for the Dayton line, is an example of the success with which the motorcycle is meeting automobile competition; for, in this particular case, the purchaser utilizes a number of automobiles in its delivery service in this city, but, becoming convinced of the advantage of the motorcycle van, purchased five machines with which to make deliveries of bread in Oakland.

W. H. and W. E. Jackson report a cable order from Australia for twelve Dayton motorcycles, which are to go foward on the first steamer sailing from this port. The business of this company in the Antipodes has shown a material increase during the year, indicating that the American made motorcycle is gaining in popularity in Kangarooland.

## MOTOR WHEEL AGENT

Hannibal, Mo.—The Smith Motor Wheel agency for this town has been placed with Charles Miller, a well-known machinist.

## FIRST 1916 TWIN IS SOLD

Cincinnati, Ohio.—The first and only Excelsior "Sixteen-Three" thus far received by the Brendamour Sporting Goods Company, which was placed on display for the edification of admiring riders for a time, has gone away; it was sold a few days ago, and is now skimming the roads. The company is expecting several additional machines of the various 1916 "X" models shortly, however, and has prospects for them, if the weather holds up. In the meantime, an ancient one-cylinder Excelsior, 1909, is on sale, being one of the very few used machines left in the Brendamour stock.

## RETURN FROM MILWAUKEE

Paterson, N. J., November 6.—E. G. Havenstrite, the local Harley-Davidson dealer, and Louis Weibel, of the Haledon M. C., have returned from their sidecar trip to the H-D factory at Milwaukee, where they stayed two weeks. Despite the rough going and rainy weather the sidecarists got into Milwaukee in forty-six and one-half hours of actual riding time. The homeward journey was made in forty-six and three-quarters hours.

## ARENZ BURNED OUT

North Tonawanda, N. Y., November 6.—E. C. Arenz's, the local Harley-Davidson agent store and shop, was completely destroyed quite recently by fire. The fire, which was caused by an explosion, spread throughout his entire establishment within a few minutes. Mr. Arenz, who was in the store at the time, received serious burns about the head and arms. The loss is estimated at several thousand dollars.

## FRENCH EAGER FOR FEATHERWEIGHT

Baltimore, Md., November 8.—Howard French, the distributor of the Indian for Baltimore and the District of Columbia, is expecting shortly the much-heralded featherweight motorcycle. Assurances have been received that the machine will be shipped early this month.

## RETURNS FROM CALIFORNIA

Altoona, Pa., November 8.—George Roth, local agent for the Pope, and who is perhaps the best known flat track rider in Pennsylvania, has just returned from California, where he has spent the past two months attending the Expositions. Mr. Roth says he will return to California to make it his home this winter. During Mr. Roth's absence his business has been in charge of Dean Finn, his chief mechanician.

## BERGIN BACK ON JOB

Columbus, Ohio.—Manager Bergin, of the Franklin Cycle and Supply Company, 142 East Gay street, Columbus, has returned from a two-weeks' vacation spent in the country. He has just received a large consignment of bicycles which are selling well, despite the lateness of the season.

## HURCK DELIVERS FIVE

St. Louis, Mo.—Five Indians were recently delivered to customers by the Hurck Motor & Cycle Company, Wigwam representatives in this city. The quintette of 1916s was the result of the firm having received its demonstrator about three weeks ago, upon which the orders were booked.

## WANTS LARGER TERRITORY

Louisville, Ky., November 8.—Norbert B. Sandmann, Excelsior dealer of Louisville, reports that he is trying to make arrangements with the factory to secure a larger territory than he has at this time. Just now Mr. Sandmann has Jefferson county, Ky., and New Albany and Jeffersonville, Ind. He states that his territory is too limited to do the business which he wants to handle, and that he is in position to place several branch agencies if he is afforded the opportunity.

## BROWN JOINS WANDERSEE

Detroit, Mich.—W. E. Wandersee, Harley-Davidson agent, 129 Gratiot avenue, has secured the services of R. D. Brown, who was formerly in charge of service and parts department at the Harley-Davidson branch at Boston, Mass.

Paul Garst also joined the repair department of the Wandersee company.

## THOMAS WILL BE HOST

Baltimore, Md., November 8.—Chic Thomas, the speed merchant and former champion of Maryland, will again play host to his innumerable friends among the trade. This time he will give an oyster roast at his store, and, in addition to those invited from this city, a large number of members of the Indian Club, of Washington, will come over for the event. Chic is one of the most popular motorcycle men in this state. He is sales manager for Howard A. French & Co.

# DEALERS' SECTION

## MANY TO SHOW AT DAYTON INDUSTRIAL EXHIBITION

Dayton, Ohio.—Manufacturers of and dealers in motors and motor supplies and accessories of all sorts will participate liberally in the motor section of the Dayton Industrial Exposition, to be held shortly. The big building of the "Delco" company, recently completed, will be the place of the exposition, and it is estimated that not less than 100,000 people will attend. Exhibitors are rapidly taking up the available space, making it certain that the affair will be the largest of the kind ever held in Dayton.

## CORWIN WITH OLIVER

Bronx, N. Y.—Al Corwin, well known in metropolitan motorcycle circles, is now managing Oliver's motorcycle garage, at 993 Washington avenue. He succeeds Vic. Pelezarre, who has gone in business with another firm. Oliver Berckhemer, proprietor of Oliver's garage, is now about again, having recovered from the effects of his accident of last summer. The garage houses the Indian agency for this territory.

## CARL GOUDY NEW EXCELSIOR AGENT

San Diego, Cal., November 3.—San Diego is going to have Carl Goudy as Excelsior agent. Carl came on fresh from his triumphs in the speed game in the East, arriving in Los Angeles October 30 in the morning, and in the afternoon he left with Fred Hoffer, the Southern California distributor, for San Diego to purchase the agency there from Frank Keissig. San Diego is a place where agents go after the business by demonstrating the machine, and as a good many of the thrilling rides out of San Diego are desert stuff, a real demonstrator can create a lot of interest, and Carl Goudy is sure to receive a royal welcome.

## BECOMES SALESMAN

Baltimore, Md., November 8.—Harry C. Lewis, who has been connected with the service department of the Heinz Motor Company, distributors for the Harley-Davidson for two years, has joined the sales force of the company. His duties will include demonstrating and teaching new owners to drive. His thorough knowledge of the machine and his wide experience splendidly qualify him for his new position, and the Heinz boys are confident he will prove a successful salesman.

## FOUR GO TO POLICE

Lousiville, Ky., November 8.—Frank Marshall, manager of the Century Cycle Company, last week made deliveries of four $275 Indians for use by the Louisville police department. The police department now has six Indians, and the board of park commissioners is using five Indian machines with which the park guards patrol the boulevards.

## DEMAND FOR USED MOUNTS

Altoona, Pa.—Ernest Albright, second-hand dealer in automobiles and motorcycles, reports a rather good season for motorcycles, he having disposed of twenty-six second-hand machines of various makes so far this season.

## WARD SIGNS UP AGAIN

Limestone, Me.—W. B. Ward, Jr., who has handled the Excelsior in Aroostook county for the past two seasons, has again signed up for the same make for 1916. He will continue the "Big X" in the same territory.

Ward made but one sale during his first season in business, but was able to show fifteen in 1915, all new models, in addition to several second-hand ones. He has had a stiff fight of it, with farmers who were decidedly prejudiced against motorcycles, but is now coming out in good style. His 1916 prospects look even better than the 1915 ones, he says.

## MASLEN GETS SEAT PATENT

Baltimore, Md., November 8.—George Maslen, of Philadelphia, the Indian distributor for the Quaker City, paid a visit to the local wigwam during the week. He was on his way to Washington to secure a patent for a new style motorcycle seat which is expected to be a big seller.

## DAVIS GETS FIRST LOT

Louisville, Ky., November 8.—R. L. Davis, the local agent for the Pope and Reading-Standard motorcycles, has just received his first 1916 model of the new Pope 4-horsepower lightweight, which is now on display in one of his large Broadway windows. Other Pope models are expected in during this week. The new models of the Reading-Standard, including two three-speed twins and a single are also expected shortly. Repair work is good and bicycle sales better than usual for this time of year.

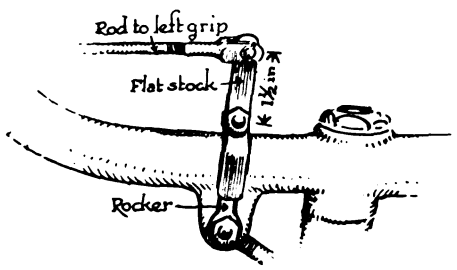
# Along Technical Lines

## IMPROVING CLUTCH OPERATION

WHEN I look back over some of my old journals, where I kept a record of what happened to my various mounts, I see considerable reference to clutch troubles, down to about 1913. I used to be conscientious in those days—in the way of putting down observations about everything that displayed itself on any machine I rode on or by for any distance—but recently, the journals have been mere records of fuel, oil and replacements made, not to leave out tires and their frequently disappointing performances. It goes without saying that the more recent is the model of a machine, the more reliable it is, and what used to be a 3¼-hour job on a clutch is now only a minute or two in setting up screws.

Well, to get back to the clutch, I have been handling a number of mounts this last year and I have found that with heavy loads, such as a sidecar and plump passenger, the friction fabric in each case is inclined to be somewhat harsh if run dry. Now, a chain drive is not as smooth as it might be and it is up to the clutch to "soften down" the harshness. Apparently this has not done on some of the com-



**Cox's Clutch-Easer**

binations which I have driven, at least when I had them in hand, and so I have been experimenting with dressed Raybestos plates. The results have been good, and the clutch action has been silky.

### Glycerine and Castor Oil

Two of these experiments were with the plates dressed with glycerine and with white castor oil, respectively. The glycerine was well rubbed onto the fabric on one plate, while several others were allowed to soak in it for several hours. The plates treated with castor oil were soaked in it for almost a half a day.

When I put the glycerined plates back, I found that from a harsh clutch I had one of nice, silky action. In fact, I could take the hack out with a tandem passenger as well as a sidecar occupant and get along up hills nicely that were formerly taken somewhat jerkily with the clutch in home. I tried out the glycerined clutch for good hard mud work, and found that it stood the gaff as well as the dry Raybestos, and so am using the plates now as "stock" equipment.

### White Oil Is Acid-Free

You will notice that I said white castor oil. The white oil is almost free of acid, while the yellow oil has much acid. I don't really know what effect the ricinic acid in the oil would have on the fabric, but I am not going to use the other kind to find out. Not being able to drive two mounts at once, I let a notorious sidecar butcher take the castor oil clutch rig and dog-wrastle it for 600 to 800 miles. He was enthusiastic over it and the plates seemed to be as good as new the other day when we looked them over.

I am not "cussing out" the fabric mentioned, for it is a good one, but in some cases, the motor men recommend using the fabric bone dry. Well, one good endurance run through quagmires, over stony grades in the mountains and "drops" which necessitated the use of the motor compression to assist the brake, gave me a two-day demonstration of dry fabric clutches. After the run, my buddy and I took a look at the plates and we found unattractive bits of copper wire and lots of fine, fuzzy threads which were once discs. There was enough of the fabric discs left to tool the hack along, but another run would have left us with nothing but copper chips and dust to go on, with of course, the steel members. It was this clutch which set me to experimenting with lubricated fabric plates and I'm mighty glad that I did.

### Making Clutch Operation Easy

Every now and then some rider wants things made a little easier on his mount, and one of these chaps met Johnny Cox, who is boss repairman for one of the metropolitan agencies. He wanted the clutch grip on his Excelsior made more sensitive and he got what he wanted. Cox took off the rod from the little rocker arm on the left side fork and bolted on a piece of flat stock which gave an additional 1½ inches of reach to the arm. He then coupled up the rod and the rider was satisfied. He could regulate the clutch by his thumb and forefinger, a simple palm pressure being all that was required to keep the tension at the desired point. Since fixing up that man's control, Cox has had others want the same thing done. The picture shows how the job looked when finished.

Knowing that I do a lot of sidecar work, it seems to be the desire of every ambitious repairman and rider of local reputation to challenge me to some sidecar trial, for so much to the winner. One shopman even insisted that a sidecar geared less than 8:1 on low would climb hills equal to that of another make whose gearing on low was 10:1. The motors in both cases are of equal power. I did not take him up for the sake of local dealers of both makes.

### Private Matches Breed Trouble

In the first place, private matches of this sort do no real good. A wagon cutting off a competitor on a hill might spell the difference between a successful climb and one that was not satisfactory. No allowance would be made by the other fellow for such a mischance as the wagon cutting off his rival, and the unfortunate rider would naturally have hard feelings in the matter. The dealer might misrepresent things to suit himself, and the old trouble of knocking the other fellow's machine would be given a fresh start. Therefore, since I am not raising strife, I do not indulge in contests of this sort, win or lose.

There is another view about this sort of match. The "slim" dealer will ring in a special machine if he can, pitting it against the other man's stock or rather touring mount. This is considered in some circles as allowable, but is about as fair as doping a racehorse in sporting circles. Since we have no Board of Stewards to rule this kind of "sportsman" off in the motorcycle game, it is best to avoid trouble by not going into private matches, except perhaps among friends.

While stopping at a Canadian motorcycle agency during a recent trip to Toronto, I

**Safeguard Against Theft**

saw a neat little wrinkle or safeguard to prevent stealing of the machine. Like most of the devices it was not a bar to carrying the machine away bodily, but it did prevent starting the motor. As a similar device is cheap and easily made I am showing it in the picture herewith.

# BOSCH

## Gives You the Most for the Money You Pay

THE manufacturer that provides you with a Bosch-Equipt motorcycle gives you the most for your money, not only because he actually pays more for Bosch than he would for any other ignition system he could select, but because the material and workmanship in the Bosch Magneto are such that it is bound to serve longer and better than any other system now being offered—look and judge for yourself. The motorcycle maker pays more—the material is better, the workmanship more exact, the number in use greater—all these facts are the reasons why you get the most for your money when you buy a Bosch-Equipt motorcycle.

Be Satisfied

For that feeling of confidence
For that extra ounce of power
For that vim, vigor and snap

Specify Bosch

BOSCH MAGNETO COMPANY

(Continued from page 32)

The "non-starter" as it may be called, consists of 5 to 7 inches of dog chain, brass or steel, attached to a piece of bent wire or flat brass. The wire or flat piece is bent to a narrow V-shape to embrace the terminal, and has a loop at one end to attach the dog chain. The method of setting the safeguard in action is to put the bent wire over the terminal and then take a half-hitch of the chain around the hexagon section of the plug. The current will not pass to the plug at all, then.

**Action of the Non-Starter**

The half-hitch around the plug will short circuit the plug and further prevent the would-be thief from shaking it off in pedalling, as would be the case if the chain were merely allowed to rest on the cylinder. The chain is nickeled to correspond with the nickel of the plug and the brass wire is practically the same color as the terminal, thus doing a great deal not to attract the attention of the purloiner. If the half-hitch is made nicely, as in the picture, the device can only be removed by undoing the hitch.

Of course, the device can be placed rather more out of sight than it is shown here. It is not guaranteed to prevent a smart man actually getting away with the machine, but it will retard him and will prevent the ordinary sneak-thief from getting away with the rig, unless he carries it away bodily. For sidecar use it is a first-class lock. When detached, the wire and chain can easily be carried in a pocket, ready for use. You can also test cables and plugs with it, putting on the wire and watching the spark pass from the end of the chain to the cylinder. However, wear gloves for this, as otherwise you will get a nice shock. The little jigger costs about five cents to make up.

**Puzzling Tire Situation**

I have been doing some riding with various kinds of treads, using a sidecar rig and a solo mount with each form of tire. One case has got me guessing. The same tire used on all three wheels of the combination during a long distance run seemed to be no better than a smooth tire, while over the same route on the same days, the tires fitted to two solo machines worked AI. Why the tires should not help the sidecar, a noted non-skidding rig, in preventing sideslip and not do the same with the solo mounts, is more than I can figure on.

# CARBURETER ALTERATION IS EXPERT'S JOB

**BY THE DOCTOR**

WHILE it is very true that we owe much of the world's progress to experimenters, only a few of the many who tried out things have succeeded in getting something of value to themselves or to anyone else. In the big swarm of motorcyclists today there are experimenters by the hundred, expending their efforts on the cams of their motors and on the carbureters. Probably only one per cent. really get any useful results, while the big majority do little else but hasten the motor to quick destruction. They are out after speed without counting how much it will cost them if they do get it.

The design and construction of cams for speed is more or less of an unknown art to most riders, and this is very luckily so. To get a quick opening and closing for high speed often means a cam which will eventually break off the valve head from the stem. A motor fitted with such cams will not run under a very high speed, and this unfits it for touring. It causes the motor to be most wasteful of fuel and often renders it a general nuisance to both owner and the public. It really will pay the rider to have the makers fix up his motor for speed, since the designers at the factory know more about cam-construction than the rider ever will.

**Carbureter Alterations**

So much for cams; now for the easier and more generally unsatisfactory means of getting speed: altering the carbureter. With the moving-needle type, like the Schebler, Heitger and Breeze, the usual method is to grind the business end to a longer taper and to channel it in some cases. This will give a greater flow of gasoline for a given throttle position and an increased speed, but at the expense of slow running and fuel economy.

When a rider finds that after altering his needle valve he no longer has the ability to run less than 16-20 miles per hour, his best procedure is to purchase a new needle valve, using it for touring, and have the altered needle valve inserted when speed is desired. The change from one to the other is merely a matter of screwing one out and screwing the other in the threaded aperture in the carbureter body, with readjustment of the air intakes.

**Gouging the Jet**

This interchange is comparatively easy, but such is not the case with the chap who has altered a fixed-jet carbureter. By the latter, I refer to the Hedstrom in particular. To get speed, the rider reams or gouges out the delicate little passages in the rose-jet, and fixes himself up for good unless he uses another jet-top for touring. The exchange of the jet-tops means disassembling the carbureter, which lots of riders are not anxious to do, even considering the ease with which this operation can be performed.

I have been assuming that the gouging of the jet-openings has been done with care and that the rider has got the speed which he looks for. As a matter of fact, this is usually *not* the case. The scraping or gouging is so poorly done that the motor runs very unsatisfactorily and the rider blames the machine, not his botch work. And then he writes to a trade paper for advice, and gets it: put in a new jet. He generally does his experimenting first and is not pleased with the results, instead of asking about things at the start and then going ahead.

**Get Expert Advice**

The same procedure is up to this kind of experimenter as to the one with the adjustable needle carbureter; he should consult the factory about making any changes in jet openings. This applies also to changes in the length of the wires holding the air cone, another source of luckless experimenting on the part of lots of riders. The best way is to leave these alterations to specialists in that line, and the latter include the factory men and a few experienced racing riders. It will pay in the long run to do this, as a comparison of renewal parts and readjustment costs to make good a botch job will demonstrate.

The writer has had lots of reasons to write this article, for he receives numerous letters from riders all over the country who have experimented in these directions, not wisely, but too well. The advice in this article is the same as that sent back to the inquirer: Let the experienced factory men do it, if you don't know of a reliable racing man fit for the work.

## EXPLOSION DAMAGES TIRE SHOP

Akron, Ohio.—The tire-repair shop of Travis & Pemberton, in North Champion street, was considerably damaged on Tuesday by the explosion of a vulcanizing machine, the sides of the building being blown out and the equipment in it damaged.

## SHOWED WELL AT LOCAL MEETS

## RIDERS TAKE UNDUE RISKS, SAYS OHIO CORONER

Cincinnati, Ohio.—In rendering a verdict of death by accident in the case of Daniel Beszborn, a newsboy who was killed a week ago when his motorcycle ran into an automobile, Coroner Foertmeyer took occasion to point out that carelessness is common among motorcyclists, with resulting danger to them and others. He declared that it is common for riders to take undue risks, both in excessive speed and in trying to get through small openings in traffic, by reason of the ease with which their machines can be controlled; and this, he stated, frequently involves them in danger. He urged that greater care be used in these respects, pointing out that the danger of injury in case of collision is greater to the motorcyclist than to other vehicles, on account of the light weight of the motorcycle.

## UNIFORM SIGN-POSTS FOR OHIO

Columbus, Ohio.—The State Highway Department is working out plans for the use of uniform standard sign-posts on all roads in the State, the need of which has been for some time badly felt by motorists. Highway Commissioner Cowen has issued a set of specifications for the use of local authorities in this connection, calling for 2½-inch letters of white on a black background, or vice versa, mounted on wood or iron posts six feet in height.

# Trade and Sport in England

By OLD RAMBLER

HERE in Britain we have had 1½ horsepower motorcycles from the earliest days down to the present, and there have been riders of this type of mount each season. But of course, there is considerable difference in performance in the 1½ horsepower motors of ten years back and those of later manufacture, fortunately for us and for all riders of British-made mounts.

### Comparing the Performances

With the 1½ h. p. motorcycles of the early days, loss of power was common, and really we needed something like 100 per cent. efficiency to get much speed. If things were going bad, one actually got the benefit of one-half or one horsepower. Today, with a 3½ h. p. engine, the loss of one horsepower in efficiency will not cripple the mount and the rider can still get along nicely with the remaining 2½ h. p. But as a matter of fact, most men are clever enough to keep their machines well tuned and the mounts themselves are more reliable than the earlier and lower powered ones.

It's the same with the 1½ h. p. engines of today. They are more trustworthy and maintain something like maximum efficiency better than did the pioneers. For that reason, the low-powered modern motorcycle, whether called a lightweight, motorcyclette or any other name, is likely to have a huge sale amongs the present community of push-pedallers who don't want a high-priced mount.

Some of our writers who have been out-and-out big-power enthusiasts for a long time are now realizing the pleasures and trade possibilities of the cheaper and low-powered machine. They're all "boosting" it now. So it's up to the makers to answer the call.

### A Possible New Departure

Are we going to see a new departure and a new development in the motorcycle market? I refer to agents—retail dealers—buying the parts and assembling them in their own shops; putting on their own transfers or name-plates and introducing all sorts of whims and gadgets according to a customer's fancy. That is exactly what happened in the bicycle world ten or a dozen years ago. It was common practice for a smart mechanical man to build up a "local" name and fame. I have been advocating the idea for some time over here and have hinted at it, I think, in a previous letter to this journal. Whilst the bicycle trade is suffering in some respects and whilst motorcycle supplies are scarce owing to firms being on war work, why should not the agents (seeing that many of them are smart mechanics and used to assemble or build bicycles), begin to purchase motorcycle parts and assemble them?

Hundreds of buyers of motorcycles in the past have wanted their machines rigged up in some way rather different from the standard specifications, and surely a man ought to be able to get what he wants, if he is willing to pay for it. That is just what the "local builder" or assembler sees to.

### Parts Makers Will Benefit

The firm that will specialize in motorcycle parts, good and moderately cheap, will make a new departure and, incidentally, big money. The B. S. A., Eadie, Components Limited, and other firms in this country did enormous trade in the supply of cycle parts to assemblers several seasons back, and the motorcycle trade will probably have a development along similar lines. I have written on this subject in trade columns only recently and it has therefore been interesting to see one of our leading public papers supporting the idea heartily.

A very sensible effort is being made in some quarters to enliven the market for accessory or auxiliary power units. We have a few good ones already. The best known is the Auto Wheel, which is attached to the rear wheel of an ordinary bicycle, so that the mount really becomes a three-wheeler (the extra wheel being smaller than the others and having attached to it a neat little gasoline-propelled engine). The Auto Wheel can be affixed or removed in a few minutes, and in some parts of Britain is fairly numerous. What is more, I have not come upon a single case of a user being disappointed.

### Simple and Effective Device

On the contrary, the thing is so simple and so effective that I could quote so much proof of good service that I would make you think I was an Auto Wheel booster. In the Midlands, where we have such superb roads and comparatively few hills of note, people of all ages can be seen using the little engine attachment, jogging along at 12, 15 or 20 miles per hour, as happy as royalty. In Wales, where you can hardly turn without facing hills, I have seen as many as four tourists in one party, all skipping gaily along with the help of their Auto Wheels. This accessory or auxiliary wheel can be removed when necessary, and the owner has then his (or her) ordinary bicycle left for pedal-pushing exercise.

We don't want any tom-fool auxiliary devices. They must be sensible and practical to a degree. You can get an Auto Wheel for $80 to $100, and it is worth the money. It has been on the market for some years and has therefore proved its potentiality.

### The Orbit Outfit

We have a lot more coming out to appeal for public support, and if they are properly advertised, some will "catch on." One neat auxiliary I have just seen is called the Orbit. The gasoline cylinder is fixed to the down tube of an ordinary bicycle and the power unit to the bottom bracket. The whole weight of the auxiliary is 18 pounds. That is an important detail in all these accessory outfits; they should be kept down to such a weight that, if anything goes wrong, the rider can pedal his or her bicycle in the regular manner.

The auxiliary motor sets are not to be regarded as toys. I look on them as valuable recruiting schools, a medium whereby thousands of pedal-pushing cyclists will get a bit of a taste of motorcycling joys, and then go in for more serious motorcycles, with bigger power.

The Orbit is not driven by a belt to the rear wheel. The Auto is, and so are some others. The result is, that when the power unit is taken off, the rider keeps the belt rim on his bicycle, and when he is pedal-pushing (not riding under motor power) the machine unit isn't improved in appearance. Still, that's a small detail and negligible.

### Carrier Motor Unit

A London firm has revived the neat idea of putting the power unit where the British tourist usually carries his luggage nowadays—on a carrier over the back wheel, below the saddle. This reminds me of a prophetic joke that appeared in a cycling paper, probably ten or a dozen years ago, at a time when the Edison story was having one of its world tours: a compact electric power unit of waistcoat-pocket size. (We are still waiting for that concentrated device!) An artist portrayed a cyclist with a little bag on his luggage carrier. On one side of the bag was a pulley; on the rear wheel an extra rim. The joker told enquirers the following: In the bag he carried a belt, which he slipped over the pulley and extra rim aforesaid when he got tired and used the compact power unit that was in the bag.

### LATE TORONTO NOTES

Toronto, Ontario, November 9.—Toronto prices for 1916 Excelsiors, including duty, will range from $185 for the lightweight, to $320 for Model 16-3, the three-speed twin. Above the light motorcycle is the regular single-speed twin known as 7-C, which will sell in Toronto for $250. This range in prices indicates that the Canadian charges are getting closer to the American scale. The Excelsior lightweight and the lowest-priced regular twin will cost Torontonians only $50 more than what the same machines will be purchased for in the States—in spite of duty and war tax amounting to almost 45 per cent. of wholesale prices.

Percy A. McBride, the Excelsior and Henderson distributor, has engaged E. L. Brand, formerly of the Lyon Sporting Goods Company, as a salesman. Brand looked after Harley-Davidson sales here until the agency was changed.

The Toronto Speedometer Service Station Company, distributors for Stewart-Warner speedometers, have removed to much larger and up-to-date premises at 486 Yonge street.

The Canadian Fairbanks-Morse Company, Limited, with branches in twelve cities, is pushing the sale of Schebler carburetors throughout Canada. Increasing demand for this instrument is reported.

### McBRIDE IS HUSTLING

Toronto, Ontario.—In spite of 35 per cent. import duty, 7½ per cent. war tax, freight, and other uncontrollable expenses, Percy A. McBride, the Eastern Canadian Excelsior distributor, has made arrangements to sell the Excelsior 16-3 model for $320 F. O. B. Toronto, or only $70 more than the same machine retails for at Chicago. Last year's three-speed model sold for $340 here, but the 1916 machine will cost the riders $20 less. McBride has already started his hustling for 1916 and is making a tour of Ontario in order to allot the territory.

Wilfrid Morrison, salesman for Walter Andrews, local Harley-Davidson handler, has secured the first racing machine from the Milwaukee plant to be delivered in Canada.

### FIRST MEET THRILLS WELLANDERS

Welland, Ontario.—Welland citizens experienced their greatest thrill at the recent fall fair here when six speedsters popped around the local dirt oval in the first motorcycle race to be held in this neck of the woods. The winner of the dash, a four mile affair, was Percy Patterson, the Buffalo board track expert, who covered the distance on his specially-painted Indian in 4:42. James Montgomery of Thorold captured second honors, and Charles Burland came home third.

## WAR BOOSTING HAMILTON TRADE

**Plants Kept Busy by War Orders and Employment Is General—Demand for Motorcycles and Bicycles Greater Than Last Year.**

HAMILTON, Ontario, November 9.—The war is helping the motorcycle and bicycle trade of Hamilton. This anomaly is easily explained. Before the outbreak of hostilities the collapse of the Western market (mainly through the bursting of the real estate bubble) brought financial lethargy to Hamilton, for this is a steel and farm implement center. With the war, however, came huge orders for munitions, and all Hamilton is busy, and all Hamilton has spending money. In spite of the fact that 6,000 of Hamilton's sons have joined the colors, out of a total population of slightly more than 100,000, there is a good demand for both motorcycles and bicycles, according to the statements of several dealers.

"I have already secured far more orders for 1916 model Indians than I had one year ago for 1915 models," declared Nelson Chambers, the well-known local dealer, when interviewed by a representative of **Motor Cycle Illustrated.** "Inquiries have also been very numerous, and my prospects appear to be excellent. I have not yet received my first 1916 motorcycle, but it is due to arrive almost immediately. I have been booking orders without the assistance of a new model on the floor.

"The bicycle trade is very firm, although the competition in this city is very keen. There are no less than seventeen bicycle dealers for the 100,000 people here, but all of them are doing very nicely."

Chambers also declared that he is glad to see the arrival of the lightweight motorcycle on this continent, as it means the broadening of the field. The Indian featherweight will seen in Hamilton for $195, or $45 more than the retail price in the States. The next model, the three-speed Powerplus twin with regular frame, will sell for $300 here, or $50 more than in the States. Chambers anticipates that the featherweight model will sell quickly.

A local bicycle dealer who beams prosperity is Dan Allen, who has handled Cleveland bicycles for years. He owns a big automobile, has a son at college and takes occasional trips to the West Indies. He has made his money out of bicycles, and is still in the ring. He carries a large stock of both bicycles and accessories, but his taste has never run to motorcycles.

### LONDON M. C. PLANS BUSY SEASON

London, Ontario, November 9.—The London Motorcycle Club is looking well into the future. At a recent meeting of the organization, which was well attended, the decision was reached to hold a picnic each year on July 1—Dominion Day in Canada.

The members are also looking forward to the annual election of officers on Friday, December 17. The new leaders will be installed at a social to be held on the third Friday in January. Recently the club held a church parade to the Memorial Church, the pastor of which, Rev. R. W. Norwood, is a member of the club. Mr. Norwood made a trip to New York City last summer. He acts as chaplain to the London club.

E. A. Heard, a local tobacconist, apparently has an eye for business. Not long ago he gave permission to the local club to place a bulletin board in his store upon which notices of meetings and other news could be posted. As a result of this convenience the secretary, William Charles Keen, has found it unnecessary to send out meeting notices except to out-of-town members.

The London organization, one of the oldest motorcycle clubs in Canada, claims to be the livest in any part of the country, and it is true that the membership is steadily increasing. Runs have been held at every opportunity this year, and the members are now thinking of the many social features to come.

### GOOD HALF-HOUR'S WORK

Vancouver, B. C.—One new machine and three second-hand ones were sold in 30 minutes on October 16 by Fred Deeley, B. S. A. distributor for British Columbia, from his headquarters in this city. The transactions netted Fred some $60, and the sum is considered a first-class haul, considering the scarceness of real dry cash these days.

### CORPS LOSES ARDENT WORKER

Vancouver, B. C.—The Cyclist Corps of Vancouver Volunteer Reserve has lost a most valuable member in the person of Sergeant Berry, who has removed to Ladner. The Sergeant has always been an indefatigable worker in the corps, doing much work as armorer-sergeant in addition to drilling and other routine work. He takes the best wishes of the members for success in his new sphere.

### SMITH NOW IN DETROIT

Tommy Smith, one of Toronto's noted motorcycle racers, has chosen Detroit as his future home.

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## LABELLING AMERICAN GOODS

By reason of the restrictions of certain of the governments engaged in the European War, says a report from the U. S. Consul at Shanghai, China, local firms have in some cases found it necessary to certify to the country of origin or manufacture of foreign merchandise which they desire to re-export from China to other countries.

For the general purpose of simplifying commercial relations in this particular, it has been suggested by local merchants that so far as possible manufacturers in the United States appropriately mark or label their goods so they may readily be distinguished as of American origin or manufacture. It is thought that such marking might tend to protect American firms to some extent against trade-mark infringements, and it would apparently constitute an adidtional and effective form of advertising. Some firms have already adopted the slogan "Made in U. S. A.," which seems to have met with general approval by American commercial representatives in Shanghai.

## BUSINESS WITH ITALY GROWING

Imports into Italy from the United States were $47,240,000 for the first three months of 1915, as against $23,910,000 for the first three months of 1914. In other words, imports from the United States doubled this year as compared with last, although the total imports into Italy were slightly less. The United States has captured millions of dollars' worth of Italian business which was formerly done by Austria, England, France and Germany.

## SIAM SLOWING UP

Both the imports and exports of Siam show a material reduction during the fiscal year 1914-1915, as compared with 1913-1914. Motorcycles dropped from $9,640 to $4,626, and bicycles and parts from $64,494 to $24,931.

## INCREASE IN NEW SOUTH WALES

According to the *Australian Motorist*, there was an increase of 88 motorcycles in the colony of New South Wales during the six months ending June 30, 1915, as compared with the last six months in 1914. On June 30 of this year there registered 10,750 automobiles and 6,461 motorcycles.

## BRITISH MACHINES TOO EXPENSIVE

C. P. Putt, of Omata, Taranaki, New Zealand, writes that "since the war British motorcycles are too expensive, and too hard to procure in New Zealand."

## FEDERAL TRADE BODY TO SEND OUT INQUIRY LETTERS

WASHINGTON, D. C., November 4.—The Federal Trade Commission announces that it will shortly send out 30,000 letters of inquiry, followed up by a brief schedule, as a part of the investigation of conditions which affect American foreign trade. Congress has empowered the Commission to make the investigation and report the facts with such recommendation as it deems possible.

Up to the present, the Commission has been gathering facts and information at public hearings and by other means, in various parts of the country, as a basis for its report to Congress. It now wishes to get information from a large number of men who were unable to be present at the hearings. For this purpose, the letters and schedules will be sent out.

Of the 30,000 letters, about 20,000 will go to American manufacturers and producers, and the remainder will be sent to export commission merchants, manufacturers export agents, importers, domestic merchants, engineers, bankers, etc. Through these letters, the Commission expects to get facts from many different points of view and from all sides of controverted questions. The schedules were prepared after careful consideration of the facts thus far developed in the investigation. In drafting the inquiries, the Commission has consulted noted economists and experts, leading business men in many important lines and representatives of Chambers of Commerce in the United States, the National Association of Manufacturers, the American Manufacturers Export Association, the National Foreign Trade Council and other bodies interested in foreign trade.

The schedules are brief and have been prepared to facilitate convenience in replying.

## ENGLAND'S POSITION

Says the *Motor Export Trader*, of London:

"The whole of our productive facilities, if at all suitable for the work, are engaged night and day in producing the munitions of war required to carry our armies to final and inevitable victory. The result is that so far as concerns the engineering trade in particular, and other trades to a lesser extent, there has been an unavoidable reduction of our export trade. It is not that the world is less ready to buy from us; *it is simply that we cannot supply it.* On the other hand, we find ourselves compelled to import a greater volume of commodities than ever before, these commodities including goods required for carrying on the war and goods required for home consumption as a result of decreased production."

## JAPAN AS A COMPETITOR

According to an English journal, the extraordinary efficiency of the Japanese consulates in India has resulted in cycle dealers being flooded with offers of cycles, accessories and tires from Japan. Japanese sizes in tires are 28 by 1⅜ inches, and other accessories are not quite standard. American accessories have not yet been coming direct, but they are already filtering through Japanese houses. There are no direct steamship lines between America and India, and formerly goods were transhipped at Liverpool or Hamburg, and orders used to go via England or Germany. Now they will go through Japan via Yokohama. So far Japan has little or no manufacturing facilities except in tires, but a large and growing market may enable her to start factories and become a formidable rival, unless American manufacturers take advantage of their present big opportunities for developing business in India.

## MOTORCYCLES AND POTATOES

A business man in New York writes that he has received an order for nine motorcycles and has established an agency in the Netherlands as a result of foreign trade opportunity No. 17615, which was published in *Commerce Reports* on July 26,1915. He also states that as a result of another foreign trade opportunity he sold 5,000 barrels of potatoes and formed a valuable connection in Buenos Aires, Argentina.—*Commerce Reports, November 4.*

## THE SWISS OUTLOOK

"As to the opportunities existing in this district," writes the American Consul at Zurich, Switzerland, "for the sale of American-made cycles, I can say that motorcycling is quite popular in Switzerland, as is also bicycling. The chief difficulty in introducing bicycles and motorcycles here is that of keen competition, due to the fact that the surrounding countries produce machines of excellent quality which are introduced and sold by active salesmen.

"There is no doubt better opportunities at present for the sale of American-made cycles than in times of peace, and in order to make the best of present circumstances, American manufacturers would do well to redouble their efforts in the foreign field."

## A WEEK'S TRADE BALANCE

Exports for the week ending October 30 at thirteen principal custom districts of the United States were as follows: Exports, $74,670,952; imports $32,334,043. This shows a favorable trade balance for the week of more than $42,000,000.

# MR. SCHOOLBOY, SALESMAN — By Frank Hardy

SO many lines of business are using the American boy to their good advantage—and to his advantage—that one is inclined to believe that the bicycle dealer who overlooks the youngster as a business getter is closing his eyes to an opportunity that affords manifold possibilities.

A Pennsylvania dealer has already started a staff of schoolboy salesmen and is getting good results. He figured that the majority of his sales had been made to boys who attended the local grammar and high schools; and that the best way to get at these porspects was to have a boy representative right on the ground—one who knew the fellows, had their confidence and was himself a bicycle enthusiast.

This dealer realized that bicycling was one of the best forms of recreation. He also knew that the athletic directors of the various schools were always eager to boost that form of recreation which would make the strongest appeal to the boys in their charge. So the Pennsylvania agent paid a visit to the instructors and discussed the possibility and advantages of starting bicycle clubs in the schools. He offered his services in planning trips and getting up racemeets. In most cases he found that the athletic directors were not only willing, but enthusiastic about launching cycle clubs. All of the schools had a nucleus of bicycle riders and they were easily persuaded to join the clubs.

IN each of these clubs the dealer had a few live young boosters who made it their point to gather new members—especially fellows who did not know how to ride a wheel, but who, seeing what a lot of good sport the members of the bicycle club were enjoying, were "aching" to learn how to control a mount and participate in club activities. The dealer's representatives acted as a sort of membership committee and constantly were on the alert for the right kind of prospects—lads who were interested in bicycling and could afford to buy wheels.

The local agent co-operated with the boys and permitted them to use a number of his second-hand machines in order to teach the non-riders. Whenever the schoolboy salesman landed a live prospect he took him around to the dealer's establishment, got an extra wheel and initiated the club candidate to the fine art of cycling. When the novice became sufficiently skilled in riding he was eligible to membership in the school's organization.

OF course the novice had to have a bicycle. Each time the schoolboy salesman brought him around to the dealer's store the agent always showed himself willing to discuss the machines he had in stock, and explain the many strong points of his line. His representative was also on the job and got the boy's family interested in bicycling, taking from his own experience arguments which made a hit with the parents. It was quite natural that since the bicycle club candidate was under many obligations to the dealer, that he should buy a bicycle and accessories at his store.

By stimulating competition among the school bicycle clubs a big interest was aroused among the boys, and the dealer's representatives were able to swing a lot of business his way. On whatever sales these lads were instrumental in making, the dealer allowed a reasonable commission, or gave each boy, if he so desired, a new bicycle after a certain number of sales had been rung up. It is interesting to note also that this Pennsylvania agent was soon able to form a club of his own, which he entered in the school competitions, and that he built up one of the largest and most active followings in his city.

THIS dealer's case is only one example of what a live man, who uses his imagination in his business, can accomplish by focussing his thoughts on new ways of landing first rate prospects. An agent in another state hit upon the idea of starting a bicycle organization in the local Y. M. C. A. He was himself a member of the association and found no difficulty in forming a club. Road races and week-end runs were frequently staged with the result that accounts of these events in the Y. M. C. A. bulletin created an astonishing interest among non-riders. In connection with the regular club, he established a riding class which proved to be a big success, the novices invariably buying their mounts from him.

This same agent used boys to scout around their neighborhoods for prospects. The boy salesmen, of course, knew the fellows who were most likely to want two-wheelers, and easily found ways of steering the prospects into the dealer's store. By constantly keeping on the prospective cyclist's trail, the "boy scouts" were successful in "turning time into money"—setting a pace that beat the records made by their friends who solicited subscriptions for national magazines.

# PULLING TOGETHER FOR THE INDUSTRY

## *Broad Co-operation on Standardizing Bicycle Parts Essential —A Plea for Individuality in Each Manufacturer's Machines*

By E. J. LONN
President, Great Western Mfg. Co.

AT the Atlantic City convention, it was decided by the bicycle manufacturers and jobbers that standardization of cycle parts was absolutely essential to the progress of the industry. To further the objects sought by this standardization it seems to me that a greater degree of co-operation should be shown. If the right kind of co-operation is displayed by the manufacturer, the distributor and the jobber, it will only be a matter of time—a very short time, in my opinion—before the dealers will join hands with them and work hard toward the common goal.

### Standardizing Rims

While on the matter of standardization, it occurs to me that special consideration should be given to rims, chains and sprockets, because of the several manufacturers interested in the production of these parts. If all juvenile bicycle rims were standardized at twenty-eight holes, and other machine rims at thirty-six holes, the requirements of the rim stock would be reduced one-half and the rim business would certainly not suffer thereby.

The question of hubs is of great importance, because the coaster brake is an expensive article. By the standardization outlined above it would be possible to make all juvenile bicycle hubs drilled with twenty-eight holes, and other hubs drilled with thirty-six holes. I am sure that the coaster brake manufacturers would welcome this standardization, for it would enable them to give the service and deliveries that are not possible under other conditions. And hubs might be standardized to a one and five-eighth inch chain line, as well as the crank sets. If possible, the coaster brake and hub makers should use one standard size of sprockets as far as the center holes and threads are concerned.

### Pitch of Sprockets

Another important feature: Sprockets in my opinion should be standardized at 3/16 inch by 1 inch pitch, eliminating other sizes entirely. Whenever a customer specifies a ½ inch pitch by ⅛ inch chain, he compels the coaster brake manufacturer to make special rear sprockets, with the result that a big—and useless—expense has been entailed The economical and other advantages that would accrue would more than justify the standardization of sprockets and chains at 3/16 inch by 1 inch pitch.

As far as tires are concerned I believe that a standard which would adequately fill every requirement would be a tire of 1¼ inch diameter, especially on all 28 inch size. Even on juveniles at 24 inches and 26 inches the 1½ inch would be advisable, because of the fact that younger folk generally "punish" their mounts more than older riders. If they have 1½ inch tires, the additional air resistance afforded would prevent more than one broken rim. If this matter of standardization of tires were followed to a logical conclusion it would naturally lead to the uniformity of rims as far as width is concerned.

Now in order to achieve these ends the immediate co-operation of all those concerned in the manufacture and sale of bicycles is essential. Let all jobbers at their yearly conferences with their salesmen discuss this matter fully, and arrive at some definite conclusion.

President E. J. Lonn

I would call the attention of jobbers and dealers to another matter of vital importance, which is naturally suggested by a discussion of standardization—and that is the subject of individuality in each maker's machines. Every manufacturer of bicycles should be permitted to follow out his ideas in regard to the style, tone, etc., of his products, as for instance, the automobile makers do. Each automobile manufacturer has his distinctive style of car which can be broadly advertised to the public with resulting benefit to the dealer.

### Individuality in Bicycles

Every bicycle should bear the "ear marks" of the factory from which it comes; and every manufacturer ought to refuse to let his salesmen call on the trade and agree to duplicate someone else's models. Let us individualize and specialize the bicycles which each manufacturer makes, so that machines can get a national reputation and the distributor, jobber and dealer will find it easier to sell them, for they will then be widely recognized as standard products that have been tested and found up to the mark. Present conditions tend to create confusion in the trade, and the average bicycle prospect does not really know what he is buying, for he may never have heard of the particular make of machine which the dealer is trying to sell him.

I am sure that co-operation along these lines by all the manufacturers will be most beneficial. I do not believe in that kind of co-operation which appeals only to a limited portion of the industry, but in the sort of pulling together that will tend toward the general up-building of the trade.

## FOREIGN BUYERS ARE BUSY

Representatives of firms in Holland, Denmark, England, France, Italy and Russia have visited the plant of the Great Western Manufacturing Company, in Laporte, Ind., during the last three weeks, with a view of obtaining bicycles and various bicycle parts. Some of the visitors were in the market for stripped machines, and for fittings, crankhangers, sprockets and tubing, in addition to the complete mounts. These goods were not wanted for war service, but to meet the demand of the regular cycle fields in the countries mentioned, and the Great Western company looks forward to an increasing amount of business of this character during the coming year.

## CLASSIC CLUB IN LEGAL TROUBLE

Toronto, Ontario, November 9.—The Classic Athletic Club, whose many bicycle riders have captured numerous honors this year, are in legal difficulties, owing to the fact that they have several billiard and pool tables in their club quarters on Queen street East. The organization possesses a charter, issued by the Ontario Government, authorizing it to carry on the activities of a club, yet the Toronto police have seen fit to prosecute the Classic officials on the ground that they are only conducting a pool room—and without a pool room license.

# EMPIRE CITY TEAM WINS THRILLING BICYCLE RACE

1—Start of the Twenty-five Mile Team Race at Celtic Park, L. I., on Sunday, Nov. 7. 2—Riders Coming Along the South Turn of the Track. 3—Bello, Krushel and Jensen Passing the Grand Stand, Finishing the Twentieth Mile Sprint for Points. 4—Nearly Half the Crowd That Witnessed the Race Came on Bicycles, Some of Which Are Seen Stacked Along the Fence

THOMAS BELLO and Jerry Nunziata, of the Empire City Wheelmen, on Sunday, November 7, won the twenty-five mile team bicycle race which featured the annual fall games of the Monument Athletic Club, at Celtic Park, L. I. City, N. Y. The race was conducted under similar rules which govern the six-day contests in Madison Square Garden, with the exception that the victors were decided on a point system.

Bello and Nunziata were credited with fifty-three points at the conclusion of the race, while Smith and Krushel, the Englewood-Buffalo combination, finished second with a score of thirty-three points. Lester and George Bowker of the Glencoe A. C., were third with twenty points. Three points were credited to the leading team at every mile up to the twenty-fourth, while two went to the second and one to the third. On the final mile the victor received fifteen, second team ten, and third, six points.

The race drews as many spectators on bicycles as there were without; the grandstands were thronged and the field had to be cleared often to allow the inside of the track to be seen at all times.

So great was the enthusiasm displayed by the racing amateurs that seventeen teams were started at exactly 3:38:30 p. m., when Daniel M. Adee, the president of the National Cycling Association, blew the whistle, starting off the big "push." At the end of five miles the team of Bello and Nunziata lead with 10 points, while Al Krushel and Chester Smith had 7 points, the time being 13 minutes, 15⅗ seconds for the distance. At the ten mile sprint the leaders were still Bello-Nunziata with 19 points and the Krushel-Smith team had 14 points, time 27 minutes, 18⅗ seconds.

**Tom Bello and Jerry Nunziata Victors of the 25-Mile Team Race**

A bad spill occurred on the back stretch when rounding the turn half a dozen riders crashed in a heap sending the others in several directions.

After the accident the Hiban-Hoffman team gained half a lap on the field with the result that they led for the next three miles. Later they were caught by the Pfister-Laux team; and soon the big field came on, but not, however, before the former team had put a serious dent into the score.

The ending of the fifteenth mile showed the Bello-Nunziata team yet in the lead with 26 points, the Krushel-Smith team coming along with 12 points. The time was 41 minutes 14⅗ seconds. Up to the fifteenth mile the others scoring were the Jensen-Johnson team with 6 points, Pfister-Laux team and the Gutoff-Platt team with five points each, while the Aron-Garbade, Bowker-Bowker teams had 3 points each.

The twentieth mile showed that the Bello-Nunziata team was still in the lead, by gaining three first and two seconds in the last five miles, bringing their points up to 39, with Krushel-Smith in second place with 30 points. Time, 55 minutes, 42⅖ seconds. At the end of the twenty-fourth mile all the teams were called off the track, and for the last mile one rider from each team still in the race, contested for the extra points.

Seventeen teams were in the race at the start; but accidents on the sharp turns were frequent, and there were left eight combinations to battle in the last mile. In the final dash Nunziata, Lester Bowker, Smith, Gaffney, Gutoff, Laux, Hoffman and Johnson faced the starter.

Nunziata, riding the final mile for his team, was beaten by less than half a wheel's length by Lester Bowker, after

Digitized by Google

a quarter-mile spurt that roused the 5,000 spectators to highest pitch of excitement. The final mile was ridden by Bowker in 2:43, and the time for the twenty-five miles was 1:09:03.

At the conclusion of the race, first prizes were awarded to Thomas Bello and Jerry Nunziata, having scored as it was announced, 53 points, while Al Krushel and Chester Smith got second prizes having made 33 points, and the Bowker Brothers team third prizes with 20 points. Time for the 25 miles, 1 hour, 9 minutes, 3 seconds.

Much credit must be given to the contestants for their excellent performances in contending on what was to the majority a strange track; and the strong wind that blew the dust into their eyes made the going hard.

The following was the order of the lineup of the teams:

Thomas Bello and Jerry Nunziata, Empire City, 53 points.

Alfred Krushel, Buffalo, N. Y., and Chester Smith, Baldwin, L. I., 33 points.

George and Lester Bowker, Glencoe A. C., 20 points.

Edwin Jensen and Nelson Johnson, C. A. C.

L. Hiban and George Hoffman, Big Mac A. C.

Edwin Jensen and Nelson Johnson, C. R. C. Assn.

Edward Gaffney and John O'Shea, Empire City.

J. Pfister and George Laux, Empire City.

N. Gutoff and H. Platt, Empire City.

A. Attardi, Empire City, and Trickey Skillington, Big Mac A. C.

Harry Aron and Henry Garbade, Glunz Wheelmen.

Fred Woisin and Paul Reinike, Acme Wheelmen.

Joseph Schafer and J. Miller, Acme Wheelmen.

## DE LACKSO ON TRIP AROUND THE WORLD

SAN FRANCISCO, Nov. 6.—Undaunted by his thrilling experiences and narrow escapes from death, Francis De Lackso, who recently completed a trip across the continent from New York to San Francisco on a Columbia bicycle, to which he was handcuffed, has started out on another hazardous undertaking. This time he purposes making a circle of the globe on a Cleveland bicycle, equipped with Goodrich black safety tread tires.

The trip recently concluded was undertaken by De Lackso in competition for the $1,000 prize offered by the Panama-Pacific Exposition for the person who crossed the continent in the most novel way. He left New York City on February 26 of this year, but met with two serious accidents that laid him up in hospitals for several weeks and put him out of the running for the exposition prize, he being unable to finish his journey within the time specified by the exposition management. He pluckily finished the journey, though he realized that he could not possibly win the thousand dollars.

De Lackso has just left San Francisco for New York, going via Los Angeles and the Santa Fe trail to Kansas City. He is making his way by singing and selling souvenirs. He plans to work for his passage across the Atlantic and, in spite of the European conflict, expects to pedal across Europe and continue on around the world, finishing his journey in Frisco.

# SALEM BI-CLUB HOLDS ROAD RACE

### Annual Twenty-Mile Classic at Toronto Captured by Louis Scarletto —Thirty Riders Face the Starter and Twenty-four Finish.

TORONTO, Ontario, November 9.—The Salem Bicycle Club held its fourth annual handicap road race on Saturday, November 6, when thirty cyclists tried conclusions over the course of twenty miles of Vaughan road. Twenty-four riders endured the test and the winner was Louis Scarletto, a prominent member of the Salem family who enjoyed a 5½ minute start. Scarletto took the Salem trophy, but the chief time prize was won by Norman Webster of the Classic Club, who pedalled the twenty miles from scratch in 49:35. Herb MacDonald, also a scratch man, rode the second fastest race, his time being 50:05.

Two young cyclers of the MacDonald Bicycle Club who have been showing up well in every road race around Toronto this year also made splendid attempts in this latest contest. They are F. Jones and W. McNamara, and they finished second and third respectively. McNamara sprang into fame when he won the Dunlop Trophy grind last month.

A feature of the Salem fixture was the starting of the four Bingley brothers on the five minute mark. Bert and Fred, two of the family, sprang leaks in their tires, and Walter Bingley was the first of the quartette to finish—in fourteenth place.

The twenty-four finishers included: 1—L. Scarletto, Salem B. C., 5½ min. handicap; 2—F. Jones, H. M. B. C., 3½ min.; 3—W. McNamara, H. M. B. C., 2 min.; 4—W. Bulger, H. M. B. C., 3 min.; 5—Norman Webster, Classic Club, scratch; 6—Herb MacDonald, H. M. B. C.; 7—P. Brown, H. M. B. C., 2 min.; 8—F. Terry, H. M. B. C., 3½ min.; 9—J. Goldsmith, Salem Club, 1½ min.; 10—L. Bounsall, Classic Club, 1½ min.; 11—Fred McCarthy, H. M. B. C., ½ min.; 12—J. Ruelins, Salems, one min.; 13—H. Martin, Salems, 2½ min.

## $10,000 BONUS MONEY PAID RIDERS BY C. R. A.

NEWARK, N. J., November 5.—More than $10,000 was paid out by the Cycle Racing Association this week to the profesional bike riders who were under contract to ride at the Newark Velodrome the past season. This remuneration was given as a final payment on their bonuses and the sums ranged from $500 to $1,500. The season was not as successful financially as the promoters had hoped it to be, but they were not forced to dig down in their jeans to make up the final payments as was the case last year, when the treasury of the Cycle Racing Association was depleted by about $5,000 in order to reimburse the cyclists. No mention was made by Messrs. Mihlon and Uppercu, or the riders, in reference to contracts for the next season's campaign on the saucer, and the cyclists have probably reached the conclusion that they have drawn the last bonus money that will ever be paid by the Cycle Racing Association.

When Bob Spears was handed his check he looked at it, and then informed the promoters that it was $200 shy of the amount due. After drawing his contract from his pocket he pointed to a paragraph which had been added, and which stated that in the event of Spears winning a majority of his match races he would receive $200 over the amount stipulated in the body of the contract. Manager Chapman had never seen that clause and jokingly remarked that if he had he would have given him a run for his money by piling up match races.

Spears won four out of seven events, and one more defeat would have cost him $200. With a broad smile, Spears said that he had a hunch that the clause had been overlooked, and he therefore had not drawn Chapman's attention to it.

### OHRT RETURNS TO FRISCO

Newark, N. J., November 8.—Hans Ohrt, the national and world's amateur champion, left here last week for his home in San Francisco, Cal. A big reception awaits the title holder upon his arrival in his home town. Ohrt rides under the colors of the Olympic Club, of San Francisco, and is one of the most popular simon pures.

# BOSTON SIX-DAY BICYCLE RACE IS ON—RECORD BROKEN

**Some of the Top-Notch Riders Who Are Participating in the Tenth Annual Boston Six-Day Grind**

BOSTON, Mass., Tuesday, November 9.—At six o'clock this evening all the teams which were entered in the tenth annual Boston Six Day Race were tied at 299 miles and five laps, except the Sullivan-Holbrook combination, which is one lap behind. The former record for this time—twelve hours—was 288 miles and seven laps. Verri failed to appear on the track today, but Corry, his teammate, stuck to the bunch alone until 6:20.

Eleven teams faced the starter yesterday (Monday) at 4 o'clock in the afternoon to plunge into the tenth annual six day race which the Bostonians are witnessing. The Boston Arena is the scene of the annual classic. The field of riders is the best that Boston has yet seen in any six day race, and the crowds are packing the arena.

The teams starting were as follows: Alf Grenda, of Australia, and Fred Hill, of Boston; Reggie McNamara, of Australia, and Bob Spears, of Australia; Francisco Verri, of Italy, and Frank Corry, of Australia; Tom Grimm, of Newark, who was put in at the last minute in place of George Wiley, and Victor Linart, of Belgium; Menus Bedell, of Long Island, and Jake Magin of Newark; George Cameron, of New York, and Harry Kaiser, of Bronx; Eddy Root, of Boston, and Willie Hanley, of Newark; Bobbie Walthour, of Atlanta, and Clarence Carman, of Syracuse; Marcel Dupuy, of France, and J. F. Moran, of Chelsea; Ray Eaton, of Elizabeth, and Edward Madden, of Newark; Tim Sullivan, of New Haven, and Warren Holbrook, of South Boston.

### Exciting from Start

Right after the starting gun was fired excitement began, the pace being a good one and many unsuccessful attempts being made to lap the field. At the end of the first hour 26 miles and 5 laps had been registered.

By the end of the third hour, the riders bunched, accidents began to happen, and both members of the Sullivan-Holbrook team received nasty falls; Holbrook for the rest of the night seemed to be almost groggy, every sprint finding him lacking. This team was finally lapped in the fourth hour, despite the frantic efforts of Tim Sullivan, who repeatedly took his partner's place. Three times in the sixth hour Sullivan was called on to catch the field, after Holbrook had been almost lapped.

The pace continued hot with little lagging, and at 10 o'clock, when the riders were taken off and a motorcycle race run off, the cyclists were 3 miles 4 laps ahead of last year's record, the sixth hour's new record being put up to one hundred and forty-six miles flat.

Punctures repeatedly marred the racing, as many as six occurring in the sixth hour, three of them resulting in spills, which, luckily, were not serious.

As usual, whenever Moran was on the track things were stirring, this rider going out after a lap repeatedly, but being brought back again by quick following.

The greatest excitement of the first day's racing came just before 1 A. M., when Frank Corry, of Australia, who is paired up with Francisco Verri, started after a lap. He jumped his wheel ahead and before the field could wake up he had 25 yards to the good.

Seven relief men came on to take the other riders' places, and after many laps succeeded in pulling him back.

A queer sight for the old fans is that of Frank Kramer, the American sprint

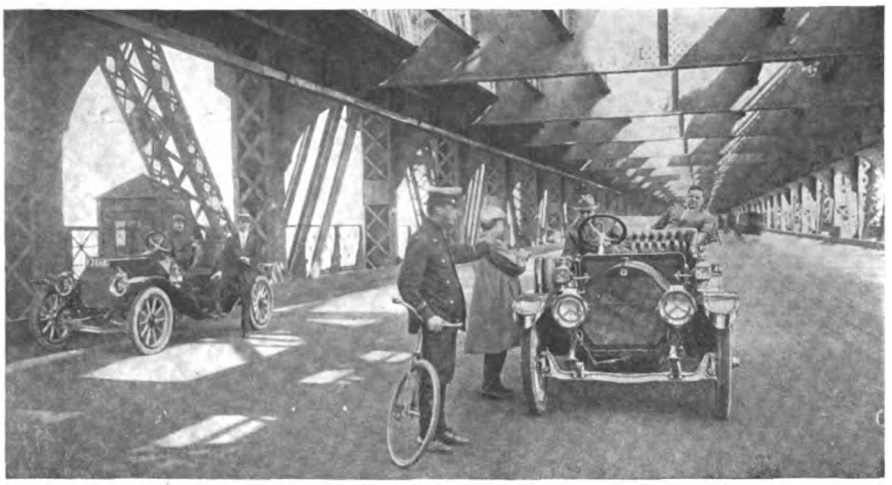
# ON AND ABOUT QUEENSBORO BRIDGE

***How Time Can Be Saved by Using This Modern New York Structure in Crossing Over to Long Island***

By ROBERT BRUCE

THE accompanying photograph will easily be identified by any cyclist who does much riding in the vicinity of New York City, and will convey to others some idea of the roadway over Queensboro Bridge, the main thoroughfare between the center of Manhattan and Long Island City. It probably carries today as much road traffic as the three lower bridges combined, and has done more than anything else to take this form of travel almost entirely from the East River ferries. Even when the distance from one's start to destination is greater via the bridge than via the East Thirty-fourth street ferry, the uninterrupted crossing invariably saves time; and there is an entire absence of that "bunching" of trucks, automobiles, cycles, etc., that is inevitable in running on and off boats.



**Bicycle Policeman Patroling the Queensboro Bridge**

### Bicycle Police on the Job

Queensboro Bridge is, for all practical purposes, a huge elevated street, with the usual rules of the road. Bicycle police patrol it, especially to look after speeding automobiles, many of whom are "taken in" during a season. But considerable observation leads to the belief that motor cars are watched, not so much for technical violations of speed as for reckless driving, which, of course, is the better method. Once in a while a "speeder" attempts to get away, but this is seldom successful; and the bicycle "cops" have a good memory for registration numbers, frequently "spotting" those who might have once tried to give them the slip.

Of the many possible connections from the middle of the city to the bridge, by far the best is through East Fifty-seventh street—asphalted and unusually wide—to Second avenue; take care not to pass beyond the Second Avenue Elevated, but turn sharp left under it and next right to the bridge entrance. Fifty-ninth street is more direct from Columbus Circle, or Central Park South, but it has double car tracks and the pavement is mostly rough stone blocks. There is no objection to Fifty-eighth street, except that it is only the usual width, and it pays to go one block below in order to use Fifty-seventh street, which is wider and also good. Sixtieth street cannot be used eastbound, on account of the traffic regulations, and anyone who might follow that street to Second avenue would not be allowed to ride into the bridge that way, but would be obliged to go back and enter it from below.

### 1¼ Miles Long

The bridge is 1¼ miles long and road traffic uses the only driveway through the structure; however, this is as wide as the average New York City street, and has so far been kept in first-class condition. At the entrances only, there is a division between the eastbound and westbound travel, entering and leaving on either side of the elevated structure in the center, but in each case still inside the promenades; the latter gradually rise and leave the one wide roadway next to the trolleys. The stranger will be impressed with the enormous size and strentgh of the bridge, and if riding over it by night, one will be agreeably surprised to see how well it is lighted—practically the same as a city street.

From the middle of the structure one may glance down in passing upon Blackwell's Island prison—a cold-appearing institution, as many offenders have undoubtedly found it to be. Access to it has always been only by boat, but now there is some talk of cutting an elevator shaft from the floor of the bridge to the island and giving up the ferry. Looking over to the right, one can see the Williamsburg, Manhattan and old Brooklyn bridges—seeming like spider webs strung from high towers over the busy river. Almost before you know it comes the slight descent into Long Island City.

The bridge is so long and so large that its approaches extend a considerable distance onto the mainland at either end. All the East River bridges are now free from toll, by action of the late Mayor Gaynor, especially to facilitate the movement of traffic by saving the former holdups at each end.

### Can Go Direct to Jamaica

It was not until the summer of 1911 that the present viaduct over the Long Island Railroad tracks was completed, enabling one to go straight ahead from the bridge into Queens Boulevard, the direct road to Jamaica. During the past year this route has been greatly improved, and road travel has correspondingly increased, as it will continue to do while the Long Island suburbs keep growing, and especially if the speedway near Garden City is built as expected.

Returning to New York from Jamaica or points beyond, the "one best way" is to retrace the outbound route through Long Island City and across the Queensboro Bridge; but at the Manhattan exit nearly all the traffic bears right onto Sixtieth street. Going to the upper part of the city, cyclists can continue on Sixtieth street to Fifth avenue, and up along the east side of Central Park. But those bound for the cycle district around Columbus Circle, or going downtown, had better turn left to Fifty-seventh street as soon as convenient, and thence west on that street to Madison avenue, Fifth avenue, Seventh avenue, Broadway or Eighth avenue, the principal north-and-south thoroughfares in the central part of the city.

## FRED SANBORN WINS CRESCENT CHAMP. RACE

BALTIMORE, Md., November 9.—History repeated itself on Sunday last when Fred M. Sanborn for the second time won the fifty-mile club championship race of the Crescent Bicycle Club, breaking the winning streak of Welby Sherman, who had previously won four championship races in a row, and duplicating his performance of 1913, when he defeated August Leimbach, who had won seven races in succession in the club championship series of that year. But his task was made easier in Sunday's race by the fact that Sherman, who had been riding neck and neck with Sanborn, punctured at the fifteenth-mile point and was compelled to ride flat until a wheel could be secured for him.

Eight riders started in the race, but a sprint begun by Sanborn, a mile from the start on the grade on the North Point road, shook off all but Sherman, and after the latter punctured, Sanborn rode the remaining thirty-five miles alone, finishing in two hours and forty-six minutes. Sherman attempted to make time on a flat tire and broke his rim as a result; but after running with his wheel some little distance was met by a club mate with a spare wheel, on which he finished the race. Langdon M. Sanborn also had trouble, stripping the threads on his front axle. Borrowing a wheel he rode into second place, thirty-one minutes behind the winner and nine minutes ahead of Sherman, who finished third. As a result of Sunday's race the contest for the club championship has tightened up, only five points separating Sherman from L. M. Sanborn, who is second and one point ahead of F. M. Sanborn, with four more races still to be run.

### CUBAN AND PHILIPPINE ORDERS

Laporte, Ind., November 6.—The Great Western Manufacturing Company, of Laporte, has just sent out another shipment of 120 bicycles to the Philippine Islands. Since the completion of the Panama Canal the firm has been sending its products by that route to the Pacific, but owing to the recent disastrous slide in the Big Ditch the Great Western folks have been shipping via San Francisco.

From its Cuban distributor, located in Havana, the Great Western Manufacturing Company has just received a gratifying order for 1916 bicycles, all the various models of the Great Western and the Crown lines being included in the specifications.

### LARSON IN LARGER STORE

Dallas, Tex., November 6.—The Larson Cycle Company, formerly located at 213 North Akard street, has removed to larger quarters at 308 North Akard street, and will continue to handle a complete line of Miami bicycles and accessories. This enterprising firm is preparing to do a heavy winter business.

### BROWN CO. HAS R-S AGENCY

St. Louis, Mo.—The E. S. Brown Cycle Company has opened an up-to-date repair shop and bicycle salesroom at 1000 North Grand street, this city. The firm is pushing the R-S brand of cycles and has adopted the slogan "Real Service," which they derived from the initial letters of the bicycle line name.

### SUTER, SWISS CYCLIST, ARRIVES

Newark, N. J., November 8.—Paul Suter, a Swiss long distance cyclist, who competed in the New York six-day race in 1912, arrived in Newark last week from Amsterdam, Holland. Suter is here for an engagement in the New York six-day race, and will probably be one of the starters. Back in 1912 Suter rode with his brother Frank, who was killed in Paris a year ago last May.

### DISTRIBUTOR DIERUFF HUSTLING

Louisville, Ky., November 8.—Billy Dieruff, manager of the bicycle and Smith motor wheel department of the Sutcliffe Company, is busy out in the state just now, fixing up the retail dealers with bicycles and supplies for the Christmas trade. The company handles the entire state for the Smith people, and did a nice volume of business last season.

### GRENDA & GOULLET, DEALERS

Newark, N. J., November 8.—Alfred Goullet and Alfred Grenda are going into the rubber tire business here in the city in an effort to increase their bankrolls. They have arranged to handle a well-known automobile, and will also become the agents for a bicycle tire. Business, of course, will not interfere with their riding.

### FROM SPANISH AGENCY

Six months ago the Great Western Manufacturing Company, of Laporte, Ind., established a connection in Madrid, Spain, and another order has just been received from the Spanish house for a shipment of the Laporte company's bicycles.

# REPAIRING OF SINGLE-TUBE TIRES

## *General Procedure for Preparing Different Forms of Construction for Vulcanization*

By REPAIRMAN

WHILE the repair of double tube tires is very generally familiar to all bicycle and motorcycle dealers, there are often newcomers in the bicycle field who have never had work on single tube tires, and lacking an experienced man are often at a loss how to proceed properly. In vulcanizing, especially, the rather extensive kit frequently leaves the beginner at a loss as to just what to do in the case of a big puncture or cut, for in addition to the roller, stitcher, knife and the sectional molds, the outfit has cement, friction fabric, raw stock, patches and perhaps repair cots.

However, the operation of vulcanizing is not a difficult one, the work being mostly in preparing the damaged tire for the heat treatment or curing, as it is called. The following directions will be an aid, therefore, to the preparation of the tire should the workman lack an instruction book:

### Preliminary Work on Tire

The rubber should be removed from the outside of the tire for about half an inch on either side of the puncture, in a lengthwise direction and about two-thirds of the way around the cross-section of the tire. A coarse file can be used, or a fine grinding wheel (emery wheel), but care should be taken not to injure the fabric of the tire. Next a hole as small as possible should be cut, this hole being for the necessary cleaning.

The inner surface of the tire should then be cleansed with benzine or gasoline in a thorough manner. All bloom and rubber cement must be removed from the inside of the tire or the repair will fail. Next cover the inner surface where the patch is to go with the vulcanizing cement and cement the outside of the tire where the rubber has been removed, taking care to have the edges of the old rubber thoroughly covered. Hang up the tire to let the cement dry; this will take from 15 to 30 minutes, depending upon the thickness of the cement laid on and the dryness of the atmosphere. When the cement is dry, make ready the patch.

### Preparing the Patch

Preparing the patch is performed as follows: Cut a piece of patching rubber and clean it off; then apply vulcanizing cement on one side. Next roll a piece of raw stock on it and moisten the exposed side of the raw stock with gasoline or benzine. Fold the patch in the pliers and insert it through the hole, using the pliers to locate the patch centrally in the hole. The cured rubber on the back of the patch causes it to open on the inside of the tire and also prevents sticking to the opposite wall of the tire.

Let the gasoline evaporate for a few minutes, then press the tire together and pick up the patch. Fill in the hole with raw stock and take a small strip of friction cloth of the width of the hole in the tire and draw it across the hole and around the cross-section of the tire, reducing the diameter of the tire slightly at this point. Next take another piece of friction cloth, cut it to nearly the size of the place from which the rubber has been removed and put it in place, rolling it down hard. Run a second coat of vulcanizing cement over the outside, let it dry for a few minutes and then cover the entire space with rubber and roll it down firmly. Trim the exposed edges to make a good union with the old rubber, roll down the edges, then inflate the tire slightly and look for any air-leaks.

### Ready for Vulcanizing

Should the tire not leak, sprinkle it with talc and place it in the mold, inflate it very hard and vulcanize it. The vulcanizer should be kept at 265 degrees during the cure. It will take from 15 to 18 minutes, as a rule, depending upon the vulcanizer, of course; but if the tire is

**Chas. J. O'Neil's Bicycle Establishment in Savannah, Ga. Pope Line Featured**

Digitized by Google

thick a longer time will be necessary.

So much for tires which do not have thread fabric. These are often met with on old machines, and many a garageman has been confronted with one such repair without knowing just how to go about it. With the thread fabric tire, the manner of applying the cement and drying it is the same as that given above, but makers of thread fabric tires do not recommend cutting the hole unless the punctures are very large, advising a plug repair whenever possible.

### THREE RIDERS STILL WAITING TO BE TEAMED IN CHICAGO 6-DAY RACE

Chicago, Ill., November 9.—At the present writing the following teams will be entered in the Chicago Six Day Race: Lawson-Root, Mitten-Grimm, E. Ohrt-Miller, Thomas-Ryan, Lawrence-Hanley, R. Eaton-Maddon, Kaiser-Cameron, Dupuy-Linart, Piercey-Menus Bedell, Hanson-Anderson, Kopsky-Wohlrab, Carman-Corry, Rudi-Russe. The riders Sandersuyft, Walthour and Young Sullivan have not yet been teamed.

The Chicago Six Day Race will start at ten o'clock on the night of November 19 and wind up on November 25. Preceding the big classic there will be a number of sprint races held on November 18. On the schedule at present are a five-mile open and a one-mile handicap for professionals, a motor-paced race in which Walthour, Carman and Linart will participate, an amateur half-mile handicap and three-mile open. The amateurs will again be seen in a five-mile open and a mile handicap just before the start of the six day race.

### SPRINT CYCLE RACES AT GARDEN

The "sprint race," scheduled for December 4 at Madison Square Garden, New York, will give every rider who participates in the big six-day race, which starts on December 6, an opportunity to limber up for the long grind. This year's race will have more starters than any six-day event of previous years. There are several foreign riders who two months ago were fighting in the European war, but since then they have secured short furloughs to ride in the annual six-day race. The "sprint race" on Saturday, December 4, will show a new and novel idea in the way of lap premiums.

### BOSTON SIX-DAY RACE

(Continued from page 47.)

champion, up in the press stand reporting the race for a Newark newspaper.

The standing at 2 A. M. Tuesday, the end of the first day's grind, was as follows:

| | Miles | Laps |
|---|---|---|
| Grenda and Hill | 250 | 1 |
| McNamara and Spears | 250 | 1 |
| Verri and Corry | 250 | 1 |
| Grimm and Linart | 250 | 1 |
| Bedell and Magin | 250 | 1 |
| Cameron and Kaiser | 250 | 1 |
| Root and Hanley | 250 | 1 |
| Walthour and Carman | 250 | 1 |
| Dupuy and Moran | 250 | 1 |
| Eaton and Madden | 250 | 1 |
| Sullivan and Holbrook | 250 | 0 |

# SAN JOSE RIDERS WIN FROM N. C. W.

## Garden City Riders Capture Inter-Club Team Race—New Century Wheelmen Score Highest Points for Season and Retain Title.

SAN JOSE, Cal., November 6.—The Garden City Wheelmen's six-man relay team had little trouble on Sunday, October 31, in disposing of the New Century line-up of San Francisco in the 30-mile point race, the feature of an afternoon of cycle races at the San Jose driving park. The point race was somewhat long-drawn-out and lacked the spectacular which added thrills to the quarter-mile sprints and the three-mile handicap, which were staged later.

Cooper started the Garden City lead in the point race by leading at the wire at the end of each lap of his five-mile heat. He was riding strong and opened up an eighth of a mile lead on his opponent—Morgan of the New Century club. Debrie, a new star being developed by the New Century club, outsprinted Flint five times in the second heat and the score was then evened up.

The veteran Hammitt of the New Century club then placed his team in the lead by walking away from Humburg. Plummer of Garden City evened up the score by winning five sprints from Sangali.

Simondi, of Garden City, won his five sprints with ease in the fifth heat, then Nick Eisentraut came through in the last heat with five wins over Welch of New Century and the home boys won by a wide margin, the total score being Garden City 130 points and New Century Wheelmen 110 points.

The riding of Simondi of Garden City in the second heat of the class A quarter-mile sprint, when he defeated his teammate, Nick Eisentraut, in a close finish, was one of the most interesting of the quarter-mile events.

The prettiest event of the day was the three-mile handicap. The riders at half distance were grinding away in two separate bunches. The scratch men were apparently going just strong enough to close the gap in time for an even break in the sprint, but a quarrel over pace making developed This slowed the back markers just long enough to keep them out of the running, although Hoffman of the Olympic club by a great effort managed to overtake some of the straggling first bunch in the stretch and sneak in for a fourth. Calabro of Garden City, with a 300-yard handicap, won with quite a margin to spare from Cooper, Garden City. Spence of New Century was third.

In spite of its defeat by the Garden City Wheelmen, the New Century Wheelmen, by winning the majority of the Inter-Club team races this season, still retains the championship of the Pacific coast. The points scored by the club throughout the season are as follows: New Century, 5; Garden City, 3; Acme Wheelmen, 1; Olympic Wheelmen, 0; Fresno Wheelmen, 0; Sacramento Wheelmen, 0.

### CYCLE CORPS RAPIDLY FORMED

Toronto, Ontario, November 9.—When the call was issued by Major W. S. Dinnick, commanding officer of the 109th Regiment, for members for a cyclist corps, practically every racing man in Toronto responded. About forty of the pedallists enlisted in a body, and the organization of the corps is proceeding. It is understood that G. L. McKay, Racing Board Chairman of the Canadian Wheelmen's Association, will be given a commission and will be placed in command of the corps.

The men will be provided with regulation uniforms, and it is expected that military bicycles will also be issued without delay. The call came unexpectedly, but the local racers came forward with considerable enthusiasm.

### BETTER DEMAND FOR LOWER PRICED BICYCLES EVIDENT

Los Angeles, Cal., Nov. 6.—John T. Bill, the Southern California bicycle and motorcycle distributor, finds trade conditions improving slightly this fall, and notes especially a demand for second-hand and low-priced bicycle. Of course young men with speed ambitions are strongly attracted to the Pierce, which he carries. The $35 model Pierce, which has been available this year for the first time, has developed a good trade in this locality. Mr. Bill is looking forward to the receipt of the Emblem lightweight which was exhibited at the New York and Chicago shows.

### PACIFIC RIDERS WILL APPEAR AT NEWARK NEXT SEASON

San Francisco, Cal., Nov. 7.—It has been announced by the Garden City Wheelmen that two of its best sprinters, M. Burger and N. Eisentraut, will appear at the Newark (N. J.) Velodrome next season to compete in the amateur events. At the time of this announcement, the Olympic Club issued a statement that Harry Hoffman and Ed Carroll, who sport the winged O, will also make their debut at Newark in 1916.

### HUDSON WHEELMEN RACE

Jersey City, N. J., November 6.—The annual pleasure run and races of the Hudson County Wheelmen were held on Sunday, October 31, a fair sized entry being received from Newark, Elizabeth and New York. The riders paraded on their machines from this city to Rahway, where they sat down to dinner at Weber's hotel, after which they continued on to Woodbridge where the races were staged. G. Knoss won the mile open with Tom Flanagan second and George Kaetz third. The time was 3:08. N. Johnson accounted for the two-mile handicap in 5:56, while A. Matthall captured the interesting novelty race.

### DRILLS POLICE CYCLE SQUAD

Fort Worth, Tex., November 6.—For the purpose of bringing their efficiency up to the highest standard, Captain J. M. Loughry is drilling the police bicycle squad daily in manoeuvers and speed. The drills are making each man expert in handling his mount.

# THE BICYCLE FOR YOUR PARTICULAR CUSTOMERS

Eighteen years ago we began making Chainless Bicycles.

We had in mind the needs of the rider who demands the very highest in bicycle construction and is willing to pay for it.

## The Pope Chainless Bicycles

made an instant hit.

Today the chainless is more popular than ever with those who want a bicycle that's different—the best.

The superiorities of the construction of our chainless, combined with the years of experience in making these bicycles, work together for your profit when you carry a full line of these quick-sellers.

A Pope Two-Speed can be attached to our chainless bicycles at a slight extra charge. It is an easily worked device that gives the rider a high gear for level roads and a low gear for hill work. By its use your customer is saved exertion at the same time that his pleasure is increased.

Write for Our Interesting Dealer's Proposition.

*"The Motor's True Mate"*

"It's the strongest motorcycle chain in the world." Can *you* truthfully say this about the chains you sell to your customers, Mr. Dealer? Can you assure them of a troubleless transmission?

Our 26K Motorcycle chain can withstand a strain that would snap the ordinary motorcycle chain like a pack-thread—5700 lbs. breaking strain! Think of the satisfaction the knowledge of this enormous surplus strength gives the rider. The price is higher—and the chain is worth it. It costs the rider $1.00 a foot.

Our Booklet "The Motor's True Mate" tells the story and also gives some helpful hints on the care of chains. Write for it.

# REMY

## Motorcycle Lighting-Ignition

Proof of the complete suitability of Remy Electric Lighting - Ignition for Motorcycles is furnished by the fact that upon thousands of Motorcycles in use, riders have used it during the past season. In every respect it has fulfilled the highest expectations and met the most exacting demands.

## It is not affected by vibration

Thoroughly protected wiring and a battery that cannot spill make the Remy Electric Lighting - Ignition System trouble - proof.

It furnishes high and low head - lights, tail - light, operates horn, and provides strong, synchronized ignition which increases engine efficiency.

Remy Ignition-Generator

See this thoroughly successful equipment on the **HARLEY-DAVIDSON.** It has been an important factor in the winning of some of the biggest road races during the past season.

# Every Ma

Blue Streak racing tires hold every wor
speed and endurance.

But the Blue Streak road tire now breaks
record of all.

Blue Streaks have been adopted for 1916 by eve
cycle manufacturer in America.

Blue Streak is the classy motorcycle tire. It is big
sturdy. It is easy riding. It is safe and sure.

Never was a motorcycle tire more resilient. Never was a
tire better adapted to lessen road trouble, give unusual mileage,
increase speed and save power.

And no motorcycle tire has an anti-skid tread so wide as the Blue
Streak "All-Weather." It is safe and sure on slippery, sharp curves
and wet pavements.

Blue Streaks give you protection, freedom, joy. Look at this tire,
then you'll admit it's the swellest tire that's built.

Any dealer can give you Blue Streaks if you ask him for them.

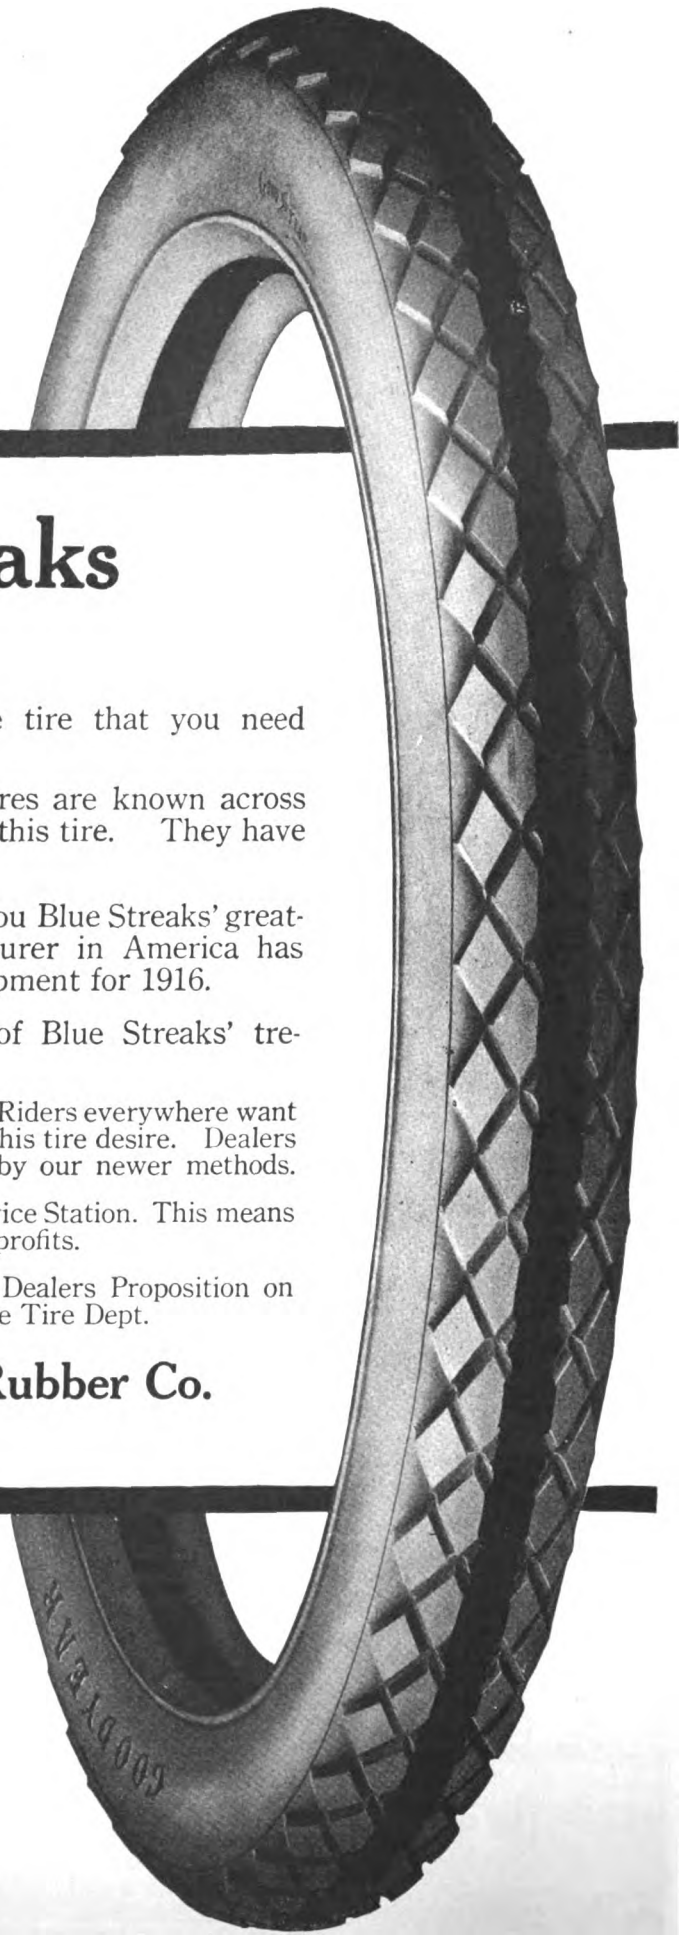
STREAK



# Adopts Blue Streaks 916

Dealers: This is the motorcycle tire that you need never defend.

The records of Blue Streak racing tires are known across the continent. Motorcyclists too, know this tire. They have read of these famous victories.

But motorcycle manufacturers give you Blue Streaks' greatest selling argument. Every manufacturer in America has chosen the Blue Streak road tires as equipment for 1916.

This speaks stronger than words of Blue Streaks' tremendous popularity.

There is a big demand for this classy tire. Riders everywhere want only Blue Streaks. We tell you ways to meet this tire desire. Dealers already have sold thousands of Blue Streaks by our newer methods.

You can make your store a Goodyear Service Station. This means valuable sales assistance that brings you extra profits.

A request from you places our complete Dealers Proposition on your desk. Write us now. Address Motorcycle Tire Dept.

# "I Never Felt More Enthusiastic Over Anything Never More Sure of the Success of Anything Than I Feel Toward the Smith Motor Wheel

Detachable

## "The Bicycle Booster"

100 Miles On A Gallon Of Gasoline
Speed Up To 25 Miles An Hour

**List Price $60 F. O. B. Milwaukee**

### *Says the Oldest and Largest Cycle Dealer in America*

THERE you have the strongest possible dealer endorsement for the Smith Motor Wheel, and the most convincing recommendation to take the Smith Motor Wheel agency in your locality.

The same dealer closes his letter saying: "I am looking forward to results unusual in the bicycle field, due to the Smith Motor Wheel." Those results, however, *you* cannot take part in unless you handle the Smith Motor Wheel, because it means bicycle sales that the Smith Motor Wheel makes—forty to sixty per cent of Motor Wheel buyers buying bicycles at the same time, *from the same dealer.*

That's the big success dealers all over the country are talking about, taking part in and profiting by—the Smith Motor Wheel *sales* success and the increased bicycle and accessory sales it is creating. These are more of the reasons why you ought to write for our 1916 Profit Proposition To Dealers. Will you?

YOU will be entirely alone and without competition in your territory with the Smith Motor Wheel. It is the only bicycle motor on the market that is *detachable* as well as attachable, making it changeable immediately from one bicycle to another. It is the only bicycle motor that is perfectly practical and thoroughly satisfactory. It is absolutely free from mechanical troubles, clean and vibrationless, light in weight, easy to ride and operate. All these features, in addition to the pleasures, conveniences and economy Motor-Wheeling affords, appeal to an unlimited market, to the better class, to the moneyed class—both boys and girls, men and women of all ages. Can't you see the broad extent of profit possibilities before you? Write in and get by return mail our 1916 Profit Proposition To Dealers. Tell us the lines you handle and the size of your business. # DURABILITY
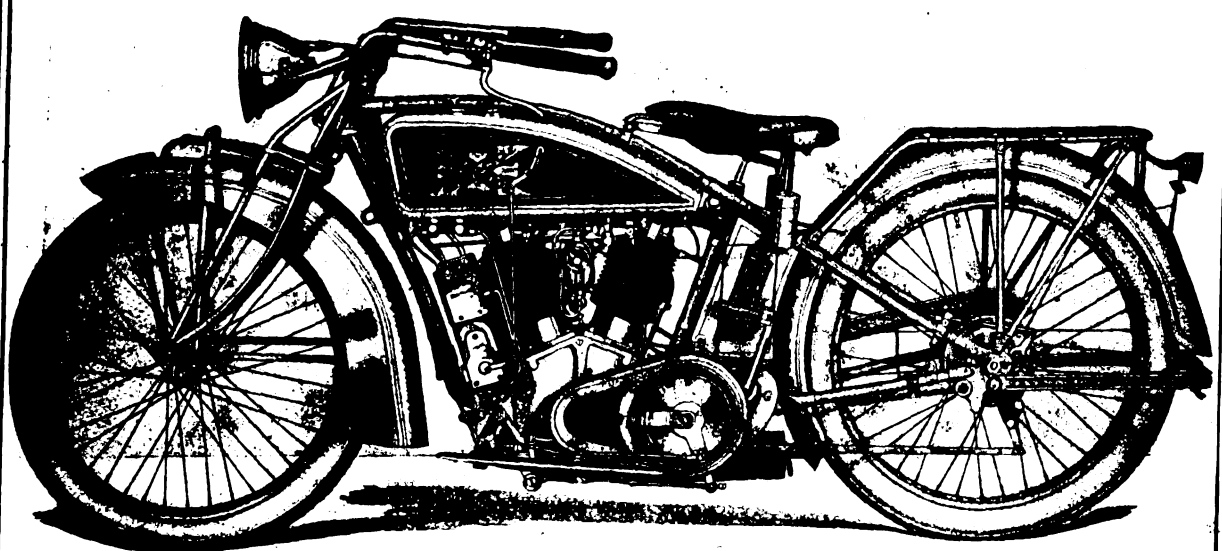
## IS A MATTER OF MATERIAL

No matter how handsome the finish, how pleasing the design or how good the workmanship, the Durability and Staying Quality of any mechanism are primarily dependent upon the material, which is the real foundation of any structure.



**Model 16-3, the Ultra Power "X"**

The wonderful record of

**EXCELSIOR Durability**

is the natural result of

**EXCELSIOR Construction**

which comprises Nickel Steel Drop Forgings, the best of Seamless Steel Tubing and the Finest Tool Steel that can be obtained.

In the EXCELSIOR AUTOCYCLE there are no castings, stampings or other low priced but undependable material. Every piece is made of the best material that can be obtained for its specific requirements, and machined and finished in the best way to give maximum efficiency.

It is this perfect construction that gives every EXCELSIOR owner the feeling of absolute confidence that can only be placed in mechanically perfect construction.

There are six models of EXCELSIORS differing in Style, Price and Equipment, but only one Quality.

**The Nearest Possible Approach to Mechanical Perfection**

### Why don't you sell Harley-Davidson motorcycles?

**The Harley-Davidson line is the fastest selling line today. It is the most sought for. It is the most profitable to the dealer because the most easily sold, and because the service cost is the lowest.**

**We want the best dealer in each town to sell our line.**

**In a selling organization the size of the Harley-Davidson, composed as it is of thousands of dealers, some are satisfied with one-third the business they might secure. Each year at the opening of the new season we are compelled to replace some of the inactive ones.**

**A number of splendid opportunities are now open for the right men to hook up with the most progressive sales organization in the business.**

**Possibly we have not closed a contract for your town. Find out. Write us today.**

ECLIPSE

# Clutch—Brake—Two Speed

The Eclipse Clutch, the Brake and the Two Speed, when fitted to a motorcycle permanently assure its rider that the three essential control factors on his machine are RIGHT. A prospective buyer need look no further if there is ECLIPSE EQUIPMENT on the machine he intends to purchase. That is sufficient assurance that the motorcycle is perfect in every particular. No manufacturer can afford ***not*** to live up to the high ECLIPSE standard in every other essential.

## THE CLUTCH

In the dark ages of the sport, when to ride a motorcycle was considered, in insurance terms, as "double-extra-hazardous," there arose an imperative, an urgent cry "Give us a free engine!" ECLIPSE heard that cry and answered it by producing the FREE ENGINE CLUTCH, for which the Eclipse Machine Company holds basic and original patents. Discs running in oil, never slipping, for either belt or chain drive, engine or countershaft.

## THE BRAKE

Then came the call for a really reliable coaster brake. Again ECLIPSE service came to the rescue, and there was evolved the ECLIPSE brake, which now stands as the premier safety device on the market.

It has 103 square inches of braking surface amply powerful to stop a machine of twice the weight of the heaviest motorcycle and sidecar combination.

## THE TWO SPEED

Finally, with ears ever attuned to the demand, Eclipse engineers, after ten years of patient research, experiment and rigid practical tests, brought out the ECLIPSE TWO SPEED, for either belt or chain drive models.

This trio of fitments for a motorcycle is the most valuable collection, the most effective and practical ever devised. They stand as a fitting example of what can be accomplished by men impelled by a sincere desire to be of *real service* to the industry, whose one aim is to increase the practical utility of the motorcycle, believing that the reward of their efforts will come naturally, and as a matter of course.

Have you ECLIPSE literature?

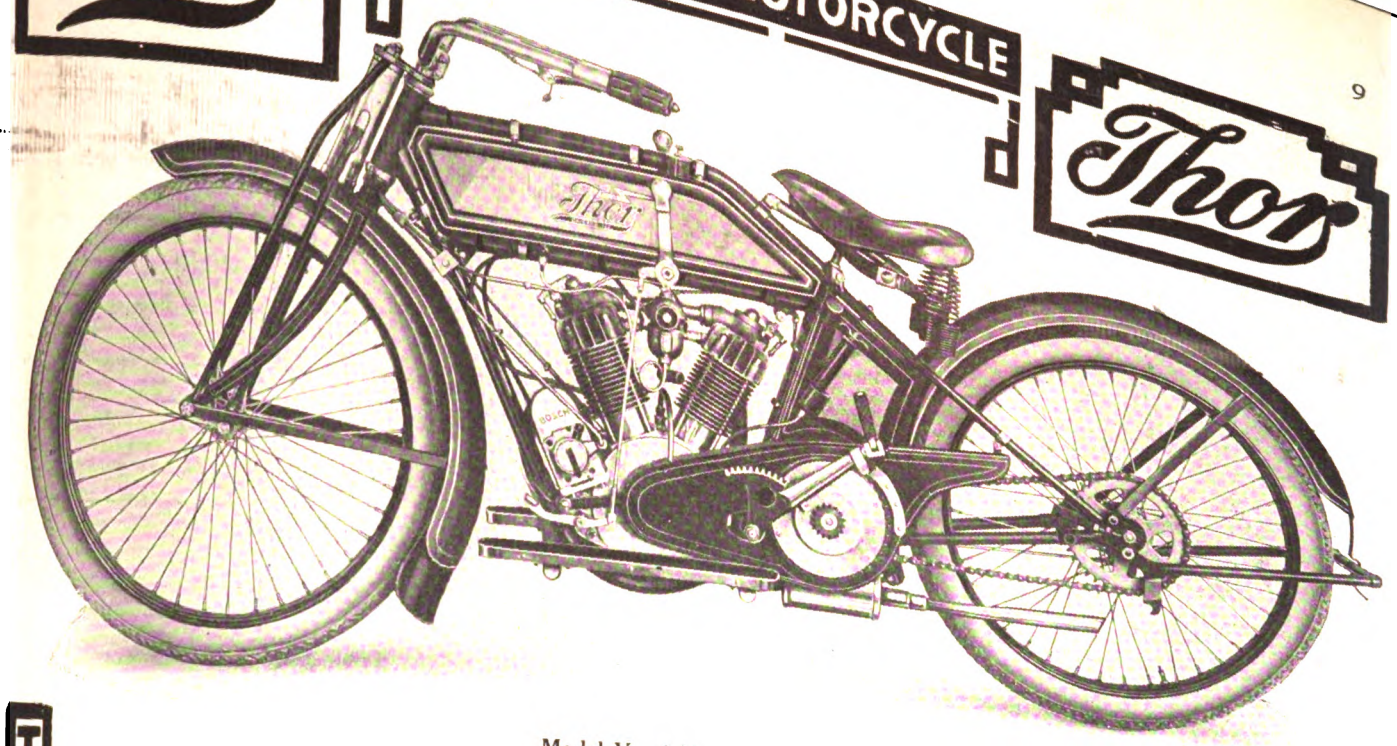
Thor

THE QUALITY MOTORCYCLE

Thor



Model V—6 Horse Power

# The new Thor control is one of the great advantages of the 1916 Thor—easy to operate—simple in construction and always effective—it never fails.

**The transmission clutch and brake are one unit—they work together and both operate with one foot. To apply the brake automatically disengages the motor.**

**The positive locking device in the various speeds means no accidental shift from one speed to another—it means no stripping of gears—it means safety.**

**The Thor control is positively the safest, easiest and the most dependable on the market.**

RELIABILITY

CONSISTENCY

***It is one of the many features that make the Thor the always reliable and consistent machine***

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## TUCSON-PHOENIX RACE IS BOIDO'S

### Wigwam Youngster Covers 132 Miles in 3:21:10; Berg, Harley-Davidson, Second, and Edgar Orr of Same Camp Third; Perry is Jinxed.

PHOENIX, Ariz., November 15.—Although he did not succeed in lowering the record for the course, Lorenzo Boido, winner of today's race from Tucson to Phoenix, made a surprisingly good showing and was clocked at 3:21:10 for the distance of 132 miles. Boido mounted a 1915 Indian and stopped his motor only once on the trip, while taking on gasoline and oil at the Florence checking station. Considering the character of the course and the consistently good speed maintained, Boido's performance and the behavior of his motor occasioned much comment.

John Berg, Harley-Davidson agent at Tucson, finished in second place, his time being 3:33:15; Edgar Orr, Harley-Davidson, was third in 3:36:40, and Jack Dodds, Indian, crossed the tape in fourth place, being timed at 3:39:20. There were twelve starters but only five finished. All the machines to complete the race were in excellent condition excepting Berg's Harley-Davidson, which had a damaged rear rim. It was otherwise O. K.

Boido's Indian carried a Dixie magneto and the Harley-Davidson machines ridden by Berg and Orr, the second and third place men, were Bosch-equipped.

Bob Perry and Harry Crandall, the only factory riders to start had bad luck. Crandall spilled near Florence and sustained minor but painful injuries, which compelled him to strike a slow pace. Perry's Excelsior went into a ditch and smashed the front fork. The 70 miles from Tucson to Florence afforded fair going, but the remainder of the route was poor.

## BIG SAVANNAH PROGRAM

SAVANNAH, Ga., November 15.—Final preparations have been made for the dirt track meet to be held here on Thanksgiving Day by the Savannah M. C. The program includes a 25, 10, a 15 and a five mile race, among others, all being open to club members only.

There have been eight entries received to date and more are expected. The meet will undoubtedly bring out the best riders in the city, as well as the champ. riders who are members of the club. The proceeds are to go towards the mile dirt track which the club members are striving to get and upon which they expect to hold several big meets during 1916.

The Savannah M. C. recently held a field day, in which over eighty riders participated. Twenty-five new members were taken in, thus bringing the total membership well over the century mark.

## MOTORCYCLES CROWDED OUT

### No Space Is Provided for Them in Baltimore Auto Show and Dealers May Have Independent Exhibition in January

BALTIMORE, Md., November 14.—The motorcycle dealers of this city will have to hold a separate show next January if they care to display the new models outside of their stores. The auto show date has been fixed and the cars will be exhibited in the Fifth Regiment Armory, as usual. The demand for space has been so great that the committee has been compelled to set aside the gymnasium as the place for the dealers in accessories to exhibit. The motorcycle dealers have always occupied that large room, and as there is no other available space the show committee decided to drop the motorcycles. At present the dealers have no plans in view, but they may get together and hold an exclusive motorcycle show, following in the footsteps of New York and Chicago.

### TUCSON-PHOENIX WINNER

**Lorenzo Boido, the Young Speedster Who Covered Severe 132-Mile Course, with Only One Stop, in 3:21:10.**

## WESTFIELD CO. TO GET HUGE ORDER

### No Details Are Announced, But Extensive Arrangements Are Under Way to Handle $1,500,000 War Contract; Present Lines Not Affected.

WESTFIELD, Mass., November 14.—While refusing to go into details, the officials of the Westfield Mfg. Co., formerly the Pope Mfg. Co., do not deny that plans are about complete for handling a large war order. It is understood that the contract will call for the machining of shells to be shipped to the Allies, and that its total value will be somewhere in the neighborhood of $1,500,000.

At any rate, the order is of such magnitude that a great deal of new machinery will be needed and it will also be necessary to build a considerable extension to the power-plant unless power can be bought from the Westfield Municipal Gas and Electric Works. The Westfield company applied to the Gas and Electric Works a few days ago for 200 electric horsepower and for a tremendous increase in the amount of gas, the latter being used chiefly in the tempering ovens.

So sanguine are the members of the Municipal Light Commission that the well-known cycle manufacturers are assured of landing a huge contract that there has been a discussion relative to securing an appropriation for the erection of a new electric line to the factory and for the laying of a new six-inch gas main from the lighting plant to the Westfield Manufacturing Company's headquarters.

Emphasis has been placed upon the fact that the present lines of the Westfield company will in no way be affected if the concern closes the war contract referred to, and that a policy of consistent expansion will be followed in all departments—even those that have no bearing at all upon the big contract.

The company has been at work for some time on a comparatively small war order, footing up to about $60.000, and the success with which it carried through this contract paved the way to the present opportunity.

# TO CONFER UPON 1917 SHOW DATES

**Cycle Parts President Appoints Committee to Meet Makers and Jobbers' Representatives to Consider Time and Place of Exhibitions.**

READING, Pa., November 15.—President Daniel F. Printz, of the Cycle Parts & Accessories Association, has appointed a committee of three to confer with a similar committee from the Motorcycle Manufacturers' Association and Cycle Jobbers' Association on the time and place for the 1917 motorcycle shows. The committees will meet at the Hotel Astor in New York during the week of the automobile show, December 30 to January 5, 1916.

At the meeting will be settled the question whether or not there will be two shows and whether the early or the late date best serves the interest of the cycle trades. The committee appointed by President Printz consists of Louis Schwab, of Stevens & Co., New York; Frank Chase, of the Frank Mossberg Co., Attleboro, Mass., and John Ferguson, of the Eclipse Machine Co., of Elmira, N. Y.

### MILWAUKEEANS HEAR HEGEMAN

Milwaukee, Wis., November 16.—J. J. Hegeman, manager of the local Firestone branch, spoke to the members of the Milwaukee M. C., last week, on the manufacture of motorcycle tires. But what Hegeman did not say about tires would fill a book. He gave the boys a rattling good talk on co-operation in club life, urged them to boost with every effort for the organization, and injected pepper generally into the club's membership. Then he passed around some of the famous special brand Firestone cigars, all done up in tinfoil and tissue paper.

### AN ABANDONED MOTORCYCLE

Announcement is made that a Monarch twin which was left in a Brooklyn, N. Y., garage over a month ago has not been called for. It is taken for granted that the machine was stolen and that the thief decided to abandon it. For obvious reasons it is impossible to give the machine's specifications, but anyone interested in the matter can obtain further information by addressing the Editor of **Motor Cycle Illustrated.**

### NEW YEAR'S RUN FOR GRAND RAPIDS

Grand Rapids, Mich.—Plans have been completed for a New Year's Day run by the Grand Rapids M. C. of this city. The run will be to Payne Lake, a distance of 30 miles from this city, where a turkey dinner will be partaken of. The dinner will be held in an old hunting cabin, loaned for the purpose by Local F. A. M. Commissioner Tom Martin.

Present indications are that there will be a record number in this run. There are many hardy, all-winter riders in and around Grand Rapids, and most of these are eager for the time to arrive. While this run will be the first ever attempted by the club, the members feel confident that its success will be assured.

*Jack Prince (in derby) on judge's stand at St. Joseph, Mo., track in No. 1; George S. Maslen and Harry Klebes, of Philadelphia, in No. 2; Larry Fleckenstein and his Cyclone in No. 3, while Mrs. Marble, of Schenectady, N. Y., is in No. 4. Picture No. 5 shows E. Robinette, of Emporia, Kans., who has ridden his Excelsior for 6,000 miles with only 35 cents for repairs. No. 6 is C. H. Slankard, of Phoenix, Ariz.*

# 8,000 PER DAY IS U. S. TIRE OUTPUT

**Present Production Figures Will Soon Be Increased to 14,000, Says President Colt, of United States Rubber Co.; Crude Rubber Prices High.**

OVER 8,000 tires per day is the present output of the United States Tire Company, according to a statement made recently by Samuel P. Colt, president of the United States Rubber Company, of which the tire firm is a subsidiary. The output will be raised to between 13,000 and 14,000 tires daily in the near future, the president states.

Owing to recent increases in cost of crude rubber and fabric materials, the cost of tire manufacture has risen almost ten per cent. Rubber from the firm's plantation in Sumatra is coming through in small quantities, but it will not be until about 1921 that large supplies of plantation rubber will be available, Mr. Colt says. Rubber will then cost 25 cents a pound, whereas the present price is 60 cents.

### WILMINGTON SHOW JAN. 17-22

Wilmington, Del., November 16.—The Wilmington Automobile Show Association was organized in this city last week to further the interests of motor vehicle dealers in Wilmington. It is planned to stage a show at the Hotel Du Pont during the third week in January. The exhibits will be on view from Monday night, January 17, until the Saturday of the same week. There will be three motorcycle exhibits, according to present indications.

# FROLICKING IN NORTHERN JERSEY WITH THE N. J. M. C.

By GOSLIN

THEY say that "Time and tide wait for no man." Mebbe so, but motorcycle club runs do—every one of those who ride gets a special wait! That's why we pulled out of Newark on our last Sunday trip at 9:07 a. m. instead of 8:30. "Curley" was largely to blame. He insisted upon taking a lady in his sidecar, and everybody knows how long it takes a female to doll up.

Well, we got rolling at last, with Washington (N. J., not D. C.) as our destination. We totalled five solo riders, three sidecars and two tandems. It was a bit cold bucking the west wind as we beat it across the Seven-Bridge road and up the Morris Pike to Morristown. Somewhere along this stretch Wintsch had ignition troubles, and his face was seen no more that day.

Just because the run had been laid out to pass through Mendham to Chester, everyone decided that the road via Bernardsville and Pepack was better (can you beat it?) and the change was made instanter. We were decorated with those red bandanas the Pullman folks handed out at the New York show, and consequently made a gorgeous spectacle for admiring villagers as we rolled along. But we could stand being a little conspicuous where nobody knew us.

Halfway up Schooley's Mount we stopped and took a photo, the elevation being about 500 feet. Of course, that is nothing when you think of Pike's Peak or such, but when you consider that New Jersey's highest point is but 1,840 feet up, you will see how that 500 feet must loom up to our eyes.

Coming back home we stopped and took some more pictures near Glen Gardner, for this section of Jersey is no slouch for scenery. Of course it does not stick up into the air much but it is spread out nicely.

No one could resist that new stretch of road beyond Lebanon and a fine brush was enjoyed. Who won? I don't know. Some one hollered "State Inspector" and we all quit cold. A trip to Trenton and a possibility of paying $15.65 to the State Treasury was everyone's idea of not a good way to spend money.

A stop in Somerville to light up, another in Plainfield for supper and then back to Newark. One more sociable run to store up in our memories for the days when we ride no more and the bunch is scattered to the four winds.

## TAKES OVER FLANDERS STOCK

The Gotham Sporting Goods Company, of 57 Warren street, New York, has bought out the Flanders factory stock, taking 37 new machines in all. These will be listed at $128.50 each, complete, with F-N tandem attachment.

## HEADS SOUTH AFRICAN BRANCH

G. H. Stonestreet, who has been with the British Goodyear interests for several seasons, will shortly take up the managership of the South African branch of the Goodyear Tire & Rubber Company, of Akron, O. He will have headquarters in Cape Town.

## CROTONA M. C. BALL DATE SET

Bronx, N. Y.—The annual ball of the Crotona M. C. will be held on January 15, 1916, at Burling's Casino, Westchester and Prospect avenues, this city. There were 150 riders and their friends at the last annual ball, and it is expected that this number will be exceeded for the 1916 affair.

Two orchestras will furnish music during the evening. One of these will be the regular dance orchestra and the other will be a colored string orchestra of high reputation. Professional talent will be had for the affair. All motorcycle clubs and unattached riders are invited to participate.

# CYCLE BRIGADE OFFICERS NAMED

### Captain Sturgeon of New Washington Motorcycle Corps Announces List of Non-Coms.; to Drill in 3rd Regiment; Second Corps Promised.

WASHINGTON, November 15.—Captain R. A. Sturgeon, of the military division of the National Capital Motorcycle Club, has issued a call for a meeting of the officers of the new organization, to be held this week, at which the duties of the commissioned and non-commissioned officers will be outlined and a non-commissioned officers' school established, which is expected to form a groundwork of a system of military instruction to be transmitted to all members of the new company. Sessions of this school will be continued twice each week until the company officers are pronounced proficient, when the members of the organization will be divided into squads of eight men each, seven privates and a corporal, and general military instruction begun.

Captain Sturgeon has announced his appointment of non-commissioned officers, as follows: First lieutenant, C. V. Dessez; second lieutenant, P. N. Moulden; first sergeant, J. R. Jones; quartermaster sergeant, W. F. Throop; duty sergeants, A. Zimmerman, J. McL. Seabrook, E. J. Barron; duty corporals, A. Y. Dreisenstok, E. M. Dodson, T. N. Mudd, Jr., Karl Schuerger, D. A. Darroch, D. S. Herzog; artificer corporals, J. S. Berryman and T. W. Oetzel.

The company is being organized on the basis of three commissioned officers, 13 non-commissioned officers and 48 enlisted men, a total of 64 members of the company. More than that number of enlistment papers being in the hands of the company officers, a second company, to be known as Company B, will be organized as soon as Company A has been whipped into shape.

Manuals of arms and other text-books have been secured from the War College and War Department, and the actual drilling of Company A will be begun as soon as possible. The armory of the 3rd Regiment, National Guard, will be used, the men being put through the movements on foot until they have become familiar with the various formations. The same formations will be observed in the foot movements as will be followed later when the members are mounted on their machines, particular attention being paid to spacing in order that each rider may have ample room in which to maneuver his machine. The American League baseball park will be secured as a maneuver ground for the company when the motorcycles are put into use, the hard turf, closely cropped grass and large, level field being well adapted for the purpose.

The manual of arms will be included in the early instructions of the company, as well as a special course in field signal work. These branches will be taught by army officers, while the company corporals will have the benefit of instruction and advice by officers of the National Guard.

# PROVIDENCE SHOW DRAWS BIG CROWD

**B. A. Swenson Has Top-Notch Exhibit at the Annual Motor Classic, Showing Complete Indian Line—Accessories Also Displayed.**

PROVIDENCE, R. I., November 15.—The annual automobile and motorcycle show of Rhode Island, which opened November 12, is being held at the State Armory here. It will end November 20. The largest number of exhibits ever recorded features the event.

The chief motorcycle display is that of B. A. Swenson, the Indian agent for the State. For the first time in the history of the show the Harley-Davidson company is not one of the exhibitors, while the new Excelsior agency opened here last week, was too busy to display its mounts.

Swenson's exhibit consists of seven machines, one sidecar, one delivery van, complete cut-out motor showing all working parts, cut-out three speed, cut-out one clutch and section of frame and fork, while he is also showing the new large piston rods of the Powerplus motor. The machines shown are five of the big Powerplus in the various models and equipments. One Featherweight and one 8-valve racer are among the lot. One of the machines shown was fitted with the new 1916 F-N tandem, also Solar head lamp.

The exhibit occupies two spaces in the center of the basement, directly in front of the entrance to the department where accessories and motorcycles were displayed. In the front displayed on a heavy and finely made display stand of solid oak was one electric equipped Powerplus, and in the rear of the display was a six-foot high heavy glass case showing 35 cups and shields, and 60 medals won by Mr. Swenson on the Indian.

M. Toepel, the Splitdorf veteran, was assistant to Mr. Swenson and was kept busy at all times explaining the mysteries of the new Dixie magneto.

### SUES MIAMI CYCLE & MFG. CO. ON COASTER BRAKE PATENT

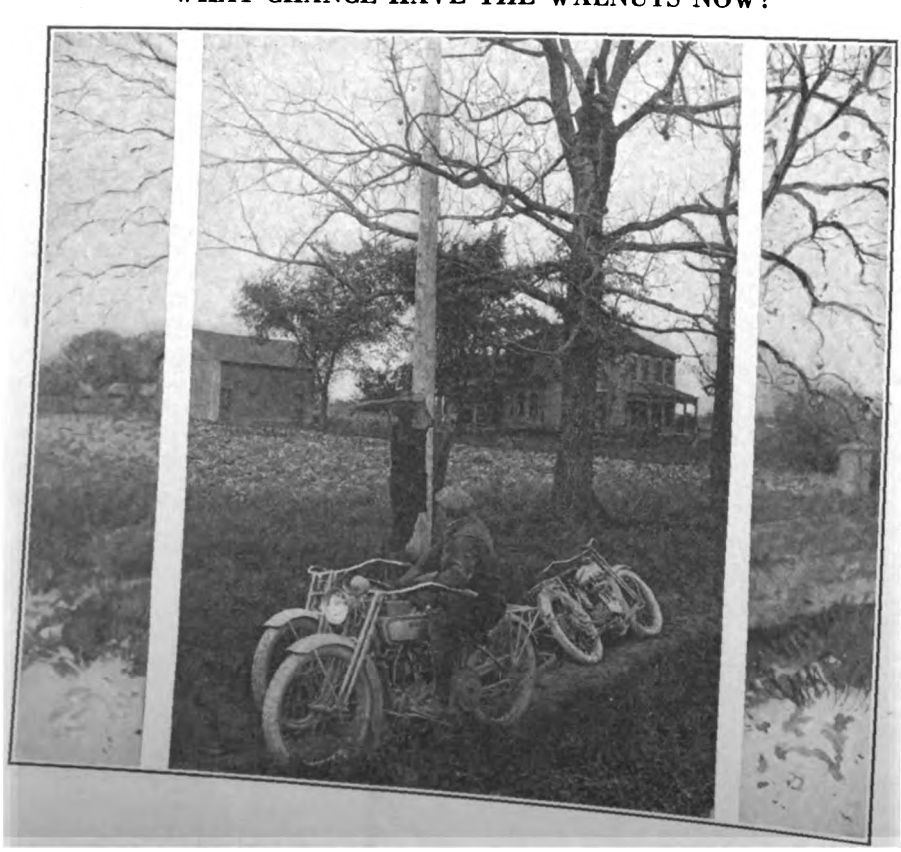
Cincinnati, Ohio.—Michael J. Wald, of Lane Co., Oregon, has filed in the District Court here a suit asking an injunction against the Miami Cycle & Mfg. Co., of Dayton, to prevent it from infringing what he claims to be his patent covering improvements to coaster brakes on bicycles. He also asks for an accounting of profits and damages.

A telegram to the Miami Cycle and Mfg. Co. requesting details brought the reply that no one in the factory at the time knew the particulars of the suit.

### ON WAY TO FLORIDA

Louisville, Ky., November 15.—On last Tuesday Mr. and Mrs. J. M. Shympler, of Chicago, passed through Louisville on a 1915 three-speed Harley-Davidson on their way to Florida. Mr. Shympler stated that he expected to spend a short time in Florida, after which he would cross the continent to San Francisco. A complete camping equipment is carried, and in case the travelers do not reach a city, a camp is pitched on the roadside. The visitors stated that if the war was declared off in Europe during the next few weeks it was their intention of shipping the machine and touring Germany.

### WHAT CHANCE HAVE THE WALNUTS NOW?



# ELLIS TO RIDE WITH CLUBMATES

**Yonkers Speedster Abandons Dash Against Time and Decides Upon Three-Cornered Grind for 24 Hours; Records Still May Fall.**

INSTEAD of riding against time in an effort to hang up a new record for twenty-four hours, State F. A. M. Commissioner George Ellis, of Yonkers, N. Y., has decided to compete against two clubmates in a twenty-four hour grind at the Empire City track in Yonkers, November 24-25. Ellis found that it would cost him $75 to have the F. A. M. sanction and supervise an attempt at a world's record, and while he does not lack sporting blood he felt that the proposition was hardly worth a personal expenditure of $75.

William Holt and Joseph Wasko, two Harley-Davidson riders of the Yonkers Motorcycle Touring Club, will be Ellis' competitors in the round-the-clock contest. The three riders will start at 5 p. m. on Wednesday, November 24, and it is expected that a big crowd will be on hand to see them get under way. They will compete under F. A. M. sanction, and while the world's record idea has been abandoned, at least so far as the $75 sanction fee is concerned, the Yonkers trio will still make a desperate effort to improve upon Spencer's record. Spencer hung up his world's mark at Springfield, Mass., in 1909 on an Indian, reeling off 1,000 miles in 22 hours. 20 minutes and 59 seconds. While Holt and Wasko will mount Harley-Davidsons in the coming contest, Ellis will use a 1916 Powerplus Indian.

### "TURKEY" RACE ENTRIES COMING IN WELL

INDIANAPOLIS, Ind., November 15.—Plans for the annual "turkey" race of the Consolidated Motorcycle Club on Thanksgiving Day are beginning to shape themselves and the entries are coming in as good as might be expected at this time. Twenty-seven riders have sent in their entries and several more are expected from over the state. This race is held each year over the same course and is probably the most important competitive event on the Indianapolis sport calendar.

The course covers sixty-five miles and starts from in front of the state fair grounds entrance. From there the contestants go north to Noblesville, about twenty-two miles over good roads. From Noblesville, where the riders must sign a checking sheet, they will go west through Westfield to Lebanon. The riders will not enter the city of Lebanon, but will sign the checking sheet at the city limits. From Lebanon the riders will turn south again towards Indianapolis, and will enter the city over the Dixie Air Line road. A great deal of gravel has been placed on the road this fall and the time of the riders is expected to be materially reduced.

Cash prizes have been offered to the professionals in the race, together with merchandise awards.

# On the Pacific Coast

## NEW FIRM ORDERS CARLOADS OF HENDERSON MODELS

Los Angeles, Cal.—Hugh A. Fargo, in charge of Henderson motorcycle interests on the Pacific Coast, states that several carloads of the 1916 models have been ordered by the new Henderson Motorcycle Sales Co., which will handle the southern California distribution, and that some of the new machines are now in transit. "The headquarters of the new company will be well stocked," said Mr. Fargo, in discussing the outlook for business, "and nothing will be left undone to insure the same kind of service that buyers within a hundred miles of Detroit are getting. This applies not only to initial sales, of course, but to the supplying of parts and to repairs, etc."

When questioned regarding the arrangement by which he is to remain in California as Pacific Coast manager, Mr. Fargo stated that he has always yearned to make his home permanently in California and that both business opportunities and his personal inclinations have led up to the present decision.

Work has been started on the headquarters of the new Henderson Motorcycle Sales Co. In the meantime the Henderson will be handled in temporary quarters at 916 So. Main street. All inquiries concerning agencies in Pacific Coast territory will receive prompt attention if addressed to Manager Fargo at the above address.

## NEWLY OPENED HIGHWAY HAS FINE SCENIC FEATURES

Tacoma, Wash.—Northwestern riders are interested in the location of a new road in Washington, through the 26 miles of the McClellan Pass Highway on the western slope of the Cascades. This road has just been finished. The most important feature is that the maximum grade on the last lap of the highway will be but seven per cent., making riding very easy. For the first two miles west of the summit, the highway will give a panoramic view of half of Mt. Tacoma. Other scenery visible from the highway includes the Muir Glacier and Gibraltar Rock.

## INSURANCE PROPORTION TO BE COLLECTED

Tacoma, Wash.—Dealers in the state of Washington who operate power machinery in connection with their shops are going to be watched closely after January 1, 1916, to see that they have paid their proportion to the State Industrial Insurance Commission. This amounts to two per cent. of the earnings of the shop. This takes care of any shop man in the establishment who is injured during the course of his work, the state paying the insurance.

## "GRIF" ON PACIFIC COAST

Los Angeles, Cal., November 5.—A. E. Griffith, of The New Departure Manufacturing Co., familiarly known as Grif from coast to coast, came out to the Pacific states immediately after the Chicago Show and has been enjoying himself and boosting New Departure coaster brakes to the front with his usual vigorous and effective enthusiasm. "Grif" has been encouraging the California boys with facts about good business conditions in the Middle West, and he believes that California, with all the fundamentals and the California spirit, will not show up behind the rest of the country when the returns for the 1916 season are all in.

## MOIST IS A WINNER ON BOTH DUCKS AND HILLS

Long Beach, Cal.—Twenty-five ducks, the limit under the California game laws, is reason enough for the cheerful countenance worn by Charles Moist, Indian motorcycle dealer here, in the upper photograph. Moist is a member of a duck club of twelve, and was consistently high gun all of last year. His experience shows that the man with a motorcycle can go where the game-getting is good and always bring back the "limit."

The lower photograph shows Moist giving a climbing demonstration on Signal Hill, a well-known local grade. This climb tries out the sand-plugging qualities of the

machine in addition to imposing a severe climbing test upon it, and Moist never fails to have an interested audience when he tackles the job.

## THOR LIGHTWEIGHT ON DECK

Los Angeles, Cal., November 8.—Manager E. Lebell, of the Pacific Motor Supply Company, doesn't believe in "making two bites of a cherry." When the Thor factory shipped him two models of 1916 machines, the regular and the lightweight, he simply said: "Come on, George; come on, Plank, just jump on these machines and show them to the folks around all the boulevard country and let them see that we have a regular and a lightweight." So George Rubsch and T. R. Plank beat it out the day after the machines arrived. Rubsch will do a few of his famous hill-climbing stunts to try out the lightweight thoroughly on the grades. They will cover some thirty towns and 600 miles of road, and go as far south as San Diego and back by the coast route.

## USED MACHINE TO GOOD EFFECT

Tacoma, Wash.—Chad Bennett, of this city, has used his Harley-Davidson to good advantage and incidentally saved much railroad fare during the past summer. He went out to work in the apple district of the Yakima Valley, crossing the Cascade range early in the summer, and after the harvest rode back to Tacoma via Snoqualmie Pass, as the roads were open. He considers that three speeds are an absolute necessity, considering the deep mud he encountered, particularly on his return trip late in October.

## BAILEY WINS MERCED CUP

Los Angeles, Cal., November 6.—William Bailey carried away the silver loving cup offered by the Merchants' Association of Merced, Cal., making the 10½ mile road course in 34 minutes.

Henry Stay, the hustling manager of the local Harley-Davidson agency, won the motorcycle event over the same course, in 17 minutes, 30 seconds, with Bailey second and R. G. Taylor third.

## MACHINES FOR SIGNAL CORPS

Washington, November 15.—Osborn & Leishear, Indian agents in this city, last week delivered three Indian motorcycles to the Signal Corps division of the United States Army. These machines were of the cradle-spring type, three-speed, and were enameled the regulation army olive drab. They will be used in and about this city by the official photographers of the Signal Corps. Six Indian machines are now in use by the Signal Corps, three having been delivered last year.

## ADDRESS WANTED

The address of P. Brown, c/o M. Readler, is desired by the Editorial Department. Mr. Brown asked a question on muffler pipes, but he did not send his address with the letter. He is requested to communicate with the Technical Editor, giving his full address.

H. N. CONDICT, Secretary J. H. DONEHUE, Editor

## "Where are yours, Sam?"

WHILE reports of motorcycle accomplishments on the European battle-fronts are as rigorously censored as all other news of the war, it is admitted in authoritative circles that not even the omnipresent aeroplane has given more striking demonstrations of its utility than the powered two-wheeler. None of the contending nations could dispense with motorcycles. None would try to. Military experts who were scoffers a year ago are motorcycle enthusiasts now. They have seen the goods delivered.

So they have set Uncle Sam to thinking. And it is the purpose of these lines to suggest that American motorcycledom keep him thinking. Washington D. C., has a first-class new motorcycle military corps under way and every other large city should have one. Motorcyclists and patriotism go together and both are plentiful. What are you doing in your city to convince Uncle Sam that his National Preparedness campaign must include the motorcycle on a liberal scale?

## FRED WILLIS NO LONGER WITH HEARSEY

### Well-Known Cycle Man Withdraws from Company After 22 Years and Institutes Court Proceedings

THE cycle trades will be surprised to learn that Fred I. Willis, president of the Indianapolis Chamber of Commerce, and at one time president of the Federation of American Motorcyclists, is no longer identified with the Hearsey-Willis Company, jobbers, of Indianapolis. Mr. Willis has been with the company for twenty-two years as secretary-treasurer. Mr. C. A. Oldham, who was sales manager of the company, is also out of the company. Neither Mr. Willis or Mr. Oldham have as yet announced their plans for the future.

Coincident with Mr. Willis's withdrawal from the company, comes the announcement that he has commenced suit in the Superior Court of Marion County, Indiana, seeking the appointment of a receiver of the company. It appears that this suit is a result of a disagreement between Messrs. Willis and Hearsey. According to the latter, the company is entirely solvent. The annual statement of its condition at the close of the fiscal year on September 1 shows that it has assets in excess of $77,000, and that its outstanding liabilities are less than $41,000. Mr. Hearsey adds that the company is prepared to meet and will promptly pay all of its liabilities as they mature, and will discount all bills subject to discount. Mr. Hearsey will continue in active management of the company.

Referring to the above, Mr. Willis declined to make any statement, at least for the present. He said simply: "I have been associated with the company for the past twenty-two years, and at the stockholders' meeting, being a minority holder, I was dropped from the directorate. I prefer not to enter into a public controversy in the matter. I have not yet decided just what I shall do, but I am considering several propositions to again become identified with the trade."

## TO DISTRIBUTE U. S. TIRES

ST. LOUIS, Mo.—What is said to be one of the largest tire deals closed in this country is that recently made between the Simmons Hardware Company and the United States Tire Company, in St. Louis. The transaction is reported to have involved tires to the value of $1,000,000. The Simmons firm will distribute United States tires from its branches at Philadelphia, Toledo, Memphis, Wichita, Kan., and Sioux City, Iowa, in addition to its headquarters in this city.

## KELLY BACK HOME AGAIN

Akron, Ohio.—J. H. Kelly, second vice-president and sales manager of the Republic Rubber Company, arrived home from a trip abroad recently, and held a conference with other officers of the company on the situation. He secured a large number of handsome orders on the trip, in addition to securing first-hand knowledge of conditions abroad which will be of great help to the company in handling foreign business in the immediate future.

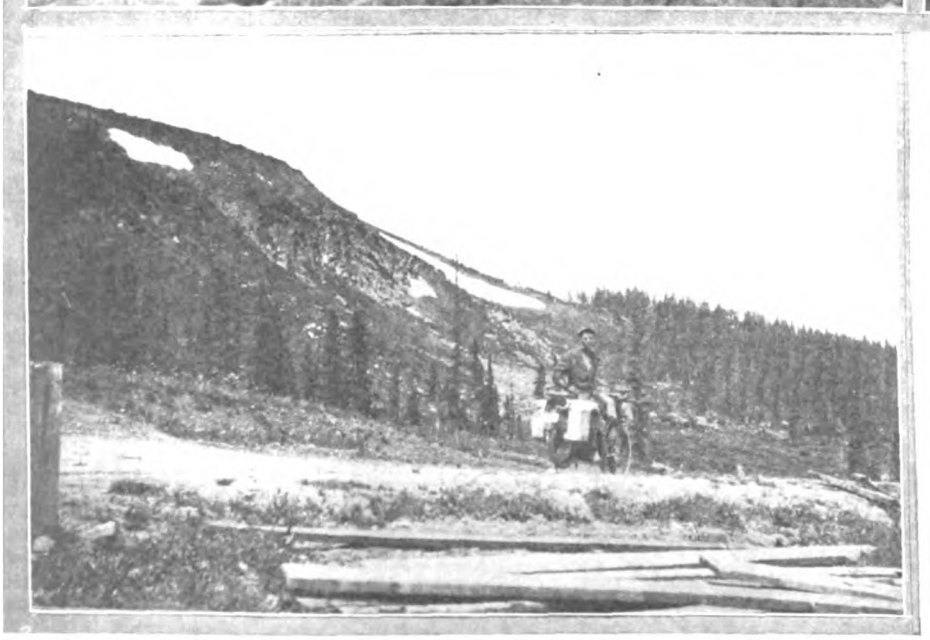
# SCENIC SPLENDORS OFFSET HARDSHIPS ON 1,000-M



*Upper Left, Road Ascending Berthoud Pass, Showing Average Surface; Above, The Grand Canyon Near Glenwood Springs Where the Water Rolls and Moves Ever Onward; At Left, Road Near Timber Line.*

ROUGHING it through the Rockies on a motorcycle has always been one of my ambitions; but I never cared much to try it alone. So when a friend of mine, a fellow motorcyclist, himself proposed a trip over the rugged roads that sweep up and down through this great American mountain range, it didn't take long for me to fall in line. We started out on our trip last summer, fully equipped for a journey that would take us more than a thousand miles through the widest and most primitive sort of country in any part of America.

One bright morning in July we "set sail" from Pierce, Colo., with our two-speed machine almost burried in the equipment we carried, consisting of blankets, a wagon cover that was to be used as a tent, fishing tackles, a rifle, extra clothing, cooking utensils and a supply of food. The entire outfit, including ourselves, weighed six hundred and seventy-five pounds.

The first day's ride took us from Pierce to Idaho Springs, where we were forced to spend the night because of a severe rain storm. It was out from Golden that we had our first taste of the mountain riding ahead of us, but we got into the Springs in fine shape, taking hill after hill with very little trouble. The next day we only got as far as Georgetown, where we decided to wait until the arrival of a 43 tooth sprocket that had been ordered from Denver, for my chum and I realized that we would never be able to make the passes that lay beyond without the use of a large sprocket. After waiting a day and a half we finally got under way again, going first over Empire Pass and then up Berthoud Pass. The climb was more than eight miles, with plenty of steep grades and hair-pin turns.

### Much Muddy Riding

From the top of Berthoud Pass to Fraser, the roads were very muddy, my friend being obliged to walk part of the way, while I tried to keep the machine from skidding. That night we stayed at a ranch house four miles out from Fraser. Another hospitable rancher welcomed us the next evening, after we had covered more than eighty-three miles and had attained a point five miles west of

# MOTORCYCLE TOUR OF ROCKY MOUNTAINS—By R. C. Hiatt

*Above, Picturesque Fishcreek Falls, Near Steamboat Springs, a Scenic Feature of Trip; Upper Right, Looking Down on the Trail from Rock Formation Near State Bridge; At Right, A Washed-Out Canyon.*

Parshall. On the following morning we got into the mountain proper and hit a steep grade which wound along a precipice and soon afforded a splendid view of Gorge Canyon about 2,000 feet below. Coming down the other side of the mountain we had six miles of easy coasting, and finally reached Yampa where my friend and I put up for the night. The next few days found us riding through country that greatly resembled Wyoming in that the ground was covered with nothing but sage brush.

### Arriving at Rifle

After riding miles over such barren country we got into Rifle where we were detained at a local road house because of a bad rain storm. Leaving Rifle plenty of washouts and slimy mud roads were encountered, and we only rode as far as Glenwood when my seat spring broke, the result of riding over rock slides. After making repairs we continued on through the Grand River Canyon and travelled over almost impassable roads through Wolcott, Minturn, Leadville, the last named town being reached by riding over Battle Mountain and through Tennessee Pass. We had many hair-raising escapes getting into Leadville, when the machine skidded on the roads and nearly pitched us into the canyon below. And the roads leading into Leadville, which is 10,000 feet above sea level, were so badly rutted that our footboards folded up frequently.

Buena Vista was the next day's objective, and it was only after the most gruelling mountain riding, which included eight miles of grinding after dark without any light at all, that we finally reached the little town. Leaving Buena Vista early the next morning we soon found ourselves on a road which had been washed away the night before by a cloudburst. We came to a very bad slide on which reformatory boys from the State Industrial School were working under the supervision of a sheriff. The sheriff and some of the boys helped carry the machine over the slide. Along the rest of the way to Trout Creek Pass we had to remove logs and rocks from the road to ride through. We only covered fourteen miles in four hours. At

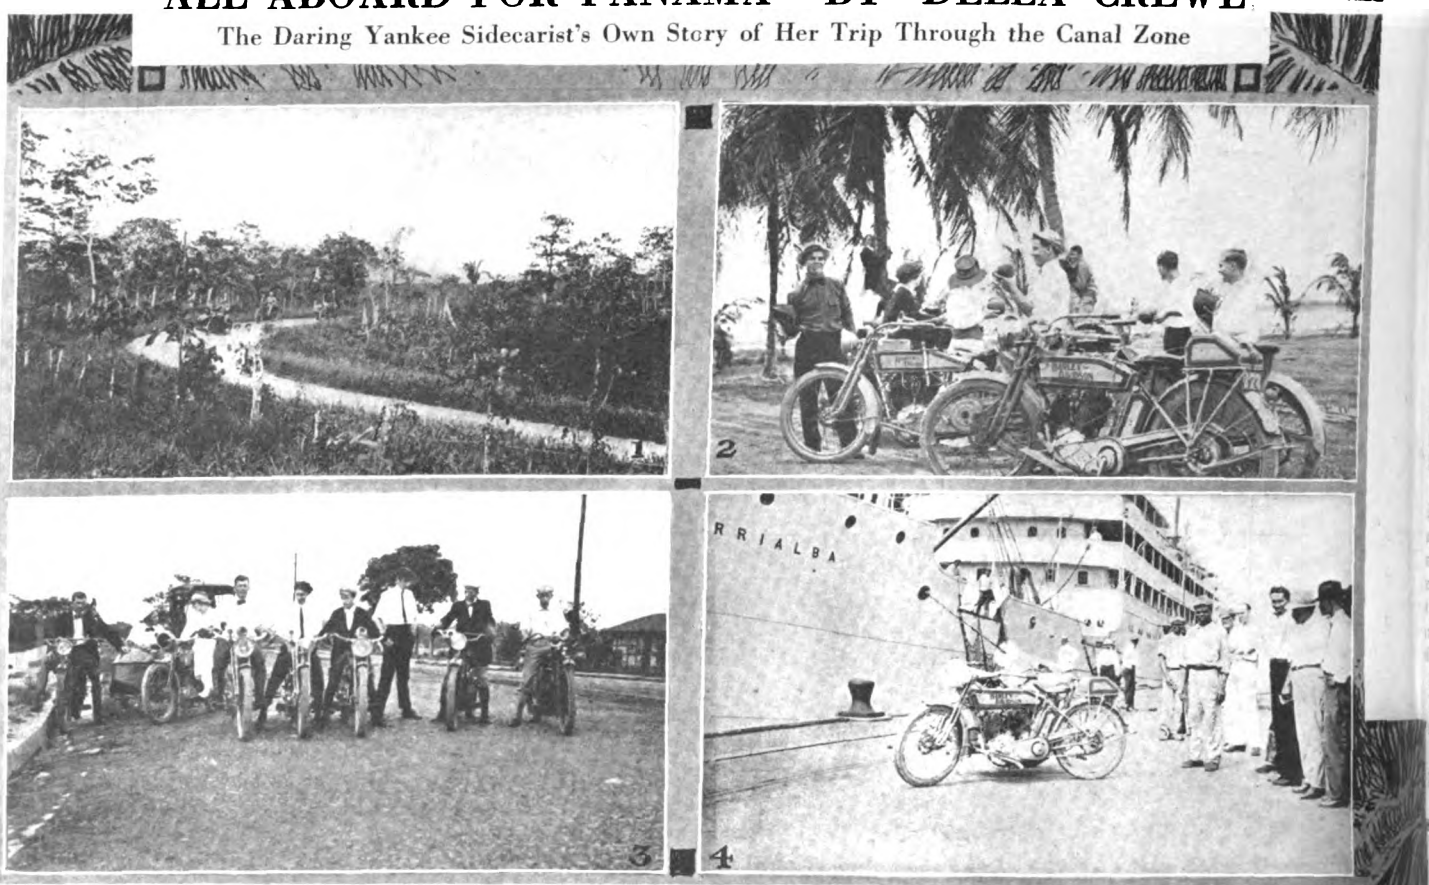
# ALL ABOARD FOR PANAMA—BY DELLA CREWE

## The Daring Yankee Sidecarist's Own Story of Her Trip Through the Canal Zone



*1—Typical Panama road passing through stretches of flowering and fruited jungle. 2—At one of the "Cocoanut Outings" in which Miss Crewe participated. The two riders of the party created a lot of fun by clumsily clambering up the trees for cocoanuts. 3—Members of the Canal Zone Motorcycle Club ready to escort Miss Crewe over nine miles of splendid highway leading into Gatun. 4—Waiting for release from the customs at Colon, Panama. In the background is the United Fruit* ***steamer, "Turrialba," on which Miss Crewe sailed from Havana, Cuba, to Colon, Panama.***

IF you want to have a real good time and lots of fun awheel, just take a trip down to the Canal Zone on the Isthmus of Panama, where that great and wonderful canal unfolds its mysterious methods of transporting the biggest ships afloat as easily as your motorcycle can carry you over the best paved street of your town.

Should you have previously announced the fact of your coming, the moment you land at Colon a great crowd of splendid fellows will welcome you with open arms. To be sure it will seem like a sudden welcome; but then Uncle Sam's motorcycle boys and girls stage everything down there with footlight brilliancy. Just as soon as I got out of quarantine—everybody's got to pass through quarantine who comes in by way of Cuba, as I did—the boys were there with the glad hand and cordially welcomed me to this part of the beautiful tropics.

### Stopped at Quarantine Hospital

A special permit was granted me to ride my machine up to the quarantine hospital. I came up to the door of the hospital unannounced and when the doctor heard the whur of my motor he hurried out and exclaimed: "Don't you know that this is a quarantine station?"

"I know it only too well, doctor," I replied, "but my two-wheeler and I have just come in from Havana, so I am forced to accept most graciously whatever hospitality you have to offer."

Thereupon the doctor led me inside, took my temperature and declared that I would have to remain in the hospital for four days, during which time I would be allowed on the grounds of the station to ride my motorcycle. He also permitted me to take a ducking in the Carribean Sea, which was right near the hospital, whenever I wanted to. Believe me, my motorcycle seemed glad to get back to terra firma, and we showed the doctor some speed.

### Tour Through Tropics Planned

When the days of my internment were finally over, Mr. Hugh Thomas, the Harley-Davidson dealer at Gatun, came up to see me and brought along one of the members of the Canal Zone Motorcycle Club, who arranged for my tour through the Isthmus. The club initiated me at once to a tropical run over nine miles of fine roads leading into Gatun, where we spent the night at the comfy home of good friends.

On the following morning we loaded our machines on the train for Peter Miguil, where the first ridable roads begin on the western side of the Isthmus. After leaving Gatun, we saw some wonderful sights from the cars, for most of the way the train runs parallel to the big canal. Huge steamers were seen riding serenely through the waterway, and all along the canal big dredges were at work bringing up large shovelfuls of mire. The railroad meanders in and out of a picturesque jungle of ferns and flowers. Large game animals were seen now and then. The never ending mountain landscape in the distance, seen from the windowless cars, seemed to lend a majestic protection to the smaller wonders of nature near at hand. I was deeply absorbed in musing over the wonders that I beheld, when a husky voice cried: "All off for Peter Miguil!"

I had pictured this Irish sounding name with a fascinating masculine countenance, welcoming me as did all the other fellows whom I had thus far met in Panama. Well, I didn't see anyone named Peter Miguil, but as I alighted from the train I beheld flaming red Indians, sober-toned Harley-Davidsons, cross-sticked Excelsiors, impressive looking Popes, modest Yales and pretty blue Thors; and on each of the machines was seated a red-blooded motorcyclist whose countenance lighted up with a cordial welcome. And they were all eager for a day's outing. I was introduced to the boys and girls—but all names were alike to me, except Peter Miguil. And Peter Miguil isn't a man at all, you know—it's just the name of a town where everything that's worth while in the

Digitized by Google

November 18, 1915.

Panama motorcycle sport seems to begin and end.

**Arrested on the Plaza**

But while I was still thinking of Peter Miguil, the leader of the party started his motor and we were off on the trip. No sooner had we proceeded on a very delightful ride around the Plaza, when the party was brought to a sudden halt and the president of the Canal Zone Club, Mr. Poole, told me that I was "pinched" because I hadn't a license. A "cop," about the size of a ten-year-old school boy, frowned up at me with a look of great authority and invited the crowd to the police station. When the chief heard my story he decided not to put me in the "cooler," but allowed me to ride without a license until ten o'clock the following morning, when I would have to appear before the mayor.

So we left the chief of police, more light-hearted than we had expected to, and continued our journey over a picturesque drive ten miles in length, at the terminus of which we found the reliques of old "warrior" days attractively set in a moss and vine frame that was centuries old overlooking the Carribean Sea.

From that point we journeyed to Juan Diaz, over good roads that ramble through scenic beauty.

We passed hundreds of typical thatched roofed huts in which the natives dwell, and saw many soft-eyed maidens standing in the doorways pounding corn for the morrow's meal. Goats, large and small, were everywhere to be seen, scampering over the fields and nibbling at the green grass. And then we came upon the sight of convicts making the modern Panama roads. The roads are made mostly of crushed stone graded with heavy rollers. The highways were constructed in such a way as to carry off rapidly the heavy rains that frequent the Canal Zone. It is nothing extraordinary in Panama to see a three inch rain fall in fifteen minutes. But when the rain has ceased the government-built roads invariably dry quickly.

**Brought Before His Honor**

Our pleasant day's outing terminated at Balboa Heights, a short distance from Panama City, where I could readily meet the mayor before whom I had to appear and also my F. A. M. defenders. Taking my hostess with me the following morning, I went to the chief of police, whom we found munching a handful of Spanish bread and sipping a cup of coffee. They were pretty slow in bringing my case before the mayor. I am sure that if I had brought some needle work with me that I would have completed it long before I was finally summoned before his honor. The chief of police took us through an imposing corridor, led us along mysterious, winding passages and then presented us to the mayor. When I saw the judge I found myself saying: "He doesn't look so fierce after all."

And neither was he "fierce." We soon found that all our worrying had been in vain. The mayor just wanted to know how many days I wanted to ride in Panama, and when I told him that one day would be quite enough, he promptly extended the time to two days and gave me a permit to ride without a license for that time. As we left the mayor he wished us a most pleasant journey and hoped to see us again. But you can bet that I didn't hope to see him again, even if he didn't look so fierce. I had expected that the motorcyclists who had accompanied me on the ride of the previous day would appear with me before the judge. No one showed up. But we never found them, and I am afraid that this was just a little trick which they wanted to play on me. Well, it was some trick—and I just laughed.

But in closing this story, I want to say that I never really met a better set of boys and girls than the members of the Canal Zone Motorcycle Club. They show a great deal of enthusiasm for the sport, and are mighty good boosters.

## GIRL RIDERS BOOST Y. M. C. A.

Vincennes, Ind.—The ladies' auxiliary of the local Y. M. C. A. has discovered that the motorcycle offers an excellent means of increasing the membership to the 500 mark. Two teams, each of ten girl riders, are now canvassing the city in search of new members, and they have till the end of November to raise the membership from 174 up to 500.

*5—The Canal Zone motorcycle riders formally welcomed Miss Crewe at Mount Hope, where, before the statue of a "Big Chief," an Indian rider is seen shaking hands with the Yankee tourist. 6—A little corner of tropical beauty overlooking the Carribean Sea. 7—On a "fruit" ride through the jungles. Miss Crewe's sidecar is loaded with bananas gathered on the ride. The negroes on the fruit wagon escorted the party through the jungles. 8—Snapped at Cristobal where the motorcyclists turned out to meet Miss Crewe.*

## STRONG LANGUAGE FOR PRICE-CUTTERS

***Writer in Standard Oil Bulletin Handles the Problem Without Gloves***

**ARGUES THAT PRICE-CUTTER HITS BELOW THE BELT**

HERBERT N. CASSON, writing in a recent number of the *Standard Oil Bulletin,* uses strong language in denouncing the price-cutter, and as the price-cutting habit is one which still exerts an evil influence in some branches of the cycle trades, the Casson article is given in toto for what it is worth.

"The price-cutter is worse than a criminal.

"He is a fool.

"He not only pulls down the standing of his goods; he not only pulls down his competitors; he pulls down himself and his whole trade. He scuttles the ship in which he himself is afloat.

"Nothing is so easy as to cut prices; and nothing is so hard as to get them back when once they have been pulled down.

"Any child can throw a glass of water on the floor, but the wisest scientists in the world can't pick that water up.

"Who gets the benefit of price-cutting?

"Nobody.

"The man who sells makes no net profit; and the man who buys soon finds himself getting an inferior article.

"No manufacturer can permanently keep up the standard of his goods if the price is persistently cut. Pretty soon he is compelled to use cheaper materials, and to cut down the wages of his workers.

"The man who cuts prices puts up the sign: 'This way to the junk heap!'

"He admits his own failure as a salesman. He admits he has been defeated according to the Marquis of Queensbury rules of business. He admits he can not win by fighting fair.

"He brands himself as a hitter-below-the belt.

"If the business world were dominated by price-cutting, there would be no business at all.

"Price-cutting, in fact, is not business any more than smallpox is health.

"Whenever you see this sign on a price-cutter's store—'Going Out of Business'—you may be sure it is a lie. How can he go out of business when he never was in?"

## MISCELLANEOUS NEWS WHICH OVERFLOWED FROM REGULAR DEPARTMENTS

### MANSFIELD AND KAYS RETURN FROM LONG TRIP

Stanhope, N. J., November 13.—Harry Mansfield on a 1913 two-speed Thor and Leyon and Edwin Kay on a tandem-fitted 1915 Harley-Davidson, have just returned from a 2,200 mile trip through Pennsylvania, West Virginia, Virginia, Maryland and Tennessee. They completed the trip in three weeks, and were so enthusiastic over it that they are planning a similar one next Fall.

The first day's run was to Chambersburg, Pa., and on the second the trio reached Morgantown, W. Va. Wet clay roads made them stop at noon of the third day in Mannington, and they returned to Hagerstown, Md., then progressed southward to Staunton, Va., Bristol and thence to Knoxville, Tenn. During the run from Staunton to Knoxville, the tourists claim that they paid enough toll to have purchased the road they traversed. They ascended Lookout Mountain and visited Natural Bridge during their trip to Knoxville.

While in Roanoke, the trio were the guests of the Dixie M. C. The return trip was made via Hagerstown, Chambersburg, Harrisburg, Reading and Easton.

### NO 1915 LICENSE TAGS LEFT

Louisville, Ky., November 15.—Motorists of Louisville and of the entire state are placed at a disadvantage just now through the failure of the authorities at Frankfort, Ky. to secure a large enough number of motor license plates in 1915. The state authorities have returned orders for license plates, and stated that the present supply is exhausted, and that no more 1915 tags can be secured, due to the unprecedented condition in the steel industry. The 1916 automobile and motorcycle plates due to arrive in Frankfort today have been delayed, and will probably not be delivered for several weeks. In the meantime the motorists without licenses will be subject to arrest and the indignities of the magisterial courts. According to Eugene Stuart, secretary of the Louisville Automobile Club, the commissioner of motor vehicles, at Frankfort, has promised to issue 1916 plates as soon as he can get them, in order to give protection to motorists without license plates.

### CHIEF WANTS MORE MACHINES

Norfolk, Va., November 16.—On the ground that the local motorcycle police squad is more than self-sustaining, Chief of Police Kiser has asked the Norfolk Board of Control for the addition of at least two more machines. Fines from arrests made by motorcycle officers for the four months ending October 30, the chief of police reports, aggregated $1,206, while the salaries of the officers and the cost of upkeep of the machines amounted to $1,-120.48, leaving a balance in the city treasury of $85.52. There are at present three men on the motorcycle squad.

### FISK BUYS LAND IN BOSTON

Boston, Mass.—The Fisk Rubber Company, of Chicopee Falls, Mass., has purchased two plots of ground on Beacon street and Commonwealth avenue. The first piece of property, measuring 17,000 square feet, will have constructed on it a building which will house the general offices and salesrooms, while the second piece, measuring 14,000 square feet, will have a service station erected upon it. The sales price for the two pieces of ground is stated to have been $200,000.

### MILE TRACK FOR RACINE

Racine, Wis., November 16.—There is happiness in the local motorcycle fraternity over the announcement that in all probabilities next year will see a mile track in this city. Members of the Racine Motorcycle Club state that they have a practical promise from Ernest Klinkert, owner of the grounds known as Klinkert's Park, which now contains a half-mile track, that he will look into the advisability of having a mile oval laid out around the half-mile track and if the proposition looks feasible will go ahead with the work.

### RIDERS ADVERTISE ATLANTA

Atlanta, Ga.—As a means of assisting to spread the "Atlanta spirit," 250 motorcyclists of this city have bought several thousand attractive pennants and distributed them throughout the State of Georgia. The riders have visited practically every city and town in the State and have demonstrated that they, as motorcyclists, take as much interest in the welfare of the city as do the automobilists and others.

### SIMMS MAGNETO TO ADD

East Orange, N. J.—The Simms Magneto Company, of this city, is to build two additions to its plant. The first will cost $10,000 and the second $5,000.

# With the Manufacturers

## WAS BEST GOODYEAR SEASON, SAYS SIEBERLING

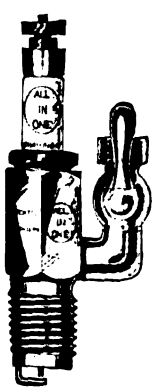
AKRON, O.—That 1915 was the most satisfactory year in the history of the Goodyear Tire & Rubber Company is made plain in a recent statement by President F. A. Sieberling. The Goodyear firm did business in excess of $36,000,000 during the fiscal year ending October 31 and is looking for still greater things for 1916.

"As evidence of our belief in the future," said Mr. Sieberling, "we are now adding eight new buildings, with floor space approximating ten acres, to our Akron factory, and a ninth addition will be made in the spring. We are thus increasing our tire capacity more than 50 per cent. As it is, we have been making from 12,000 to 13,000 tires a day for the past three months and over 2,000,000 during the fiscal year. As our new floor space becomes available, we will steadily increase production until 20,000 tires a day is attained.

"Goodyear product has been kept up to the highest standard of quality and will so continue. We anticipate no difficulty in maintaining our title of the largest tire manufacturers in the world."

## ALL-IN-ONE CHAMPION PRIMING PLUG A NEW OFFERING

From the Champion Spark Plug Company, of Toledo, Ohio, comes the announcement of a new type of Champion plug which is called the "All-In-One." The All-In-One spark plug is the original petcock type formerly manufactured by the Frontier Specialty Company, of Buffalo. The spark plug patents and business of the latter firm were bought out during the past summer by the Champion folks.



The new product is made of specially-treated materials and is tooled, fitted, cushioned and adjusted according to Champion standards. The manufacturers claim that this type of priming plug will start any motor on a single turn. It retails for $1.25. There are eight different types of the All-In-One Champion priming plugs, a type for every form of motor. It can be had in the regular threads.

## OPENS MINNEAPOLIS BRANCH

Minneapolis, Minn.—The Ahlberg Bearing Company, of Chicago, Ill., has opened a branch at 926 Marquette avenue, this city.

## HYDRAULIC PRESSED STEEL ADDS THREE BUILDINGS

Cleveland, Ohio.—The Hydraulic Pressed Steel Company, of this city, is to add three new brick and steel buildings to its plant, the total cost of which will be $50,000. One of these additions will measure 60 x 120 feet, a second will be 200 x 80 feet, while the third will be 360 x 76 feet. Although the company recently completed a large addition, this has been found insufficient to take advantage of its increased business, hence the three new buildings are being prepared.

## VICTORY FOR INDIANA RUBBER AND INSULATED WIRE CO.

Indianapolis, Ind.—The Appellate Court recently upheld the Indiana Rubber and Insulated Wire Co., of Jonesboro, in a suit brought against it by the Buffalo Specialty Co., the latter firm seeking an injunction to prevent the use by the Jonesboro company of a patent fluid in bicycle tires by which the tire is claimed to seal any puncture automatically.

The Buffalo company had contended that it had made a shop license agreement whereby it was to have the exclusive sale of the patent fluid and the Jonesboro company was not to manufacture it for sale except "in a local way." The Buffalo company contended that through a mutual mistake the written contract entered into was not the same as a verbal contract to which they had agreed. The Buffalo company, after losing its action in the Grant County court, appealed.

The Appellate Court declared that the injunctive relief which the Buffalo company sought could not now be granted because the letters patent on the "self healing" fluid have expired, but it also stated that even though the letters patent still were in force that it would have to affirm the judgment of the Grant Circuit court.

## PLUG PRICES REDUCED

Mt. Vernon, N. Y.—A. R. Mosler & Company, spark plug manufacturers of this city, announce that the price of the Vesuvius plug to the dealer will be 55 cents instead of 75 cents as formerly. This is a 20 per cent. increase in profit, as the plug still retails at $1. The jobbers' price has at the same time been reduced from 60 to 40 cents.

## HOUSE WITH VACUUM OIL

C. M. House is now on the engineering staff of the Vacuum Oil Company, of Rochester, N. Y. Mr. House was formerly chief engineer of an automobile firm in Detroit and will continue in that city with the Vacuum staff.

## VANDERLIP ON S. K. F. CO. BOARD OF DIRECTORS

HARTFORD, Conn.—Frank A. Vanderlip, of the National City Bank of New York, has joined the Board of Directors of the S. K. F. Ball Bearing Company, of this city. He will be associated with B. M. W. Hanson, vice-president of the Pratt & Whitney Company, of this city; Franklin B. Kirkbride, of New York; A. Carlander and S. Winquist, of the Swedish S. K. F Company and B. G. Prytz on the Board. Mr. Prytz will act as president of the new firm.

The S. K. F. Ball Bearing Company, recently incorporated under the laws of Connecticut, has taken over the business of the S. K. F. Ball Bearing Company, of New York, a house importing ball bearings from Sweden, and has acquired the right to manufacture S. K. F. bearings in America. A factory for this purpose will be erected in this city. The company has a paid up capital of $2,000,000.

## SCHRADER'S SONS ARE ENLARGING

Brooklyn, N. Y.—A considerable addition to the already large plant of A. Schrader's Sons, Inc., of this city, is now being rushed to completion. The new building, which is of reinforced concrete, will allow of a 60 per cent. enlargement of the firm's facilities, and it will be very welcome when completed, as extra space is vitally needed for expansion in the manufacture of Schrader valves and other products of the company.

## BIG LIST OF STOLEN MACHINES

With a view of assisting Harley-Davidson riders who have had machines stolen, the Harley-Davidson Motor Co., has started to issue lists of the missing machines to dealers and garagemen. The first list sent out refers to 82 Harley-Davidson motorcycles which have been stolen of late. In many cases the owner has offered a reward for the recovery of his machine in addition to the $25 reward regularly offered by the F. A. M. for recovery of a machine stolen from a member.

## ARROW COMPANY TO ADD

Toledo, Ohio.—The Arrow Manufacturing Company has broken ground for a new factory located at Broadway and Emerald avenue, to be 60 by 120 feet, three stories high, and to cost $20,000. The concern makes electrical apparatus of all kinds.

## MOTOR WHEEL FOR EGYPT

Milwaukee, Wis., November 8.—The motor wheel has found its way to Egypt. A shipment has recently been made to C. Bell at Alexandria, and the attachment will be used in the American mission service.

Digitized by Google

## HARDEN STARTS ANNUAL TRIP TO VISIT LEADING DEALERS

SALES MANAGER L. D. HARDEN, of the Westfield Mfg. Co., started on Sunday night, November 7, for an eight weeks' trip through the Northwest and to the Pacific Coast. He will travel as far

L. D. Harden

north as Vancouver, B. C., thence southward to San Francisco and to Los Angeles. He will return home by the southern route.

This is Mr. Harden's annual business trip, which provides for visiting all the dealers along the line. In addition to closing contracts and passing out tips for gingering up sales campaigns, he is gathering a lot of direct orders for both motorcycles and bicycles.

### POOR HAS HIS OWN OFFICE

Frederic H. Poor, who, since the incorporation in December, 1909, of the SKF Ball Bearing Company of New York, has been its General Manager, has recently severed his connection with that organization, and opened an office of his own at 30 Church street, New York City.

Heretofore the company's product has been entirely imported from Sweden; but as was recently announced a new organization, the SKF Ball Bearing Co. of Connecticut, has been incorporated to manufacture SKF ball bearings at Hartford, Conn. It is planned that the New York corporation will be absorbed by the newly-formed company after the first of the year.

### BAD ROADS MEAN GOOD TIRES

"The first thing that impresses me, of course, is what all visitors to your country talk about—your vast distances," said H. E. Smith, of John Haddon & Co., London, Eng., who was visiting the factory of the Firestone Tire & Rubber Co. after a trip across country to the San Francisco Exposition. "I am quite ready to believe that the quality of your tires must have much to do with the success of all motor trips in America," Mr. Smith continued, "owing to the great variety of roads you have to traverse and the long tours you undertake. One need only consider the types of roads and the long journeys made to understand that Firestone tires have arrived at their present standing on a basis of pure merit. In no other way could they meet the road tests to which they are subjected in the United States."

### ENGLISH GOODYEAR MANAGER VISITS THE AKRON HEADQUARTERS

"We have been getting big shipments of Goodyears in England but even these have not permitted us to fill all our orders" says P. D. Saylor, managing director of the Goodyear Tire & Rubber Co. of Great Britain, who has just arrived from London and is spending a few days at the Akron headquarters in the interest of Goodyear's European trade. "Business is tranquil in London, and contrary to the general opinion there is no shortage of tires. It is true that the government has taken and is receiving now great quantities of tires from the manufacturers, but they have equipped themselves to take care of the increased business, and are able to fill the government orders and at the same time supply the trade. The tire manufacturers are pleased to get the government business and seek it.

"On account of the departure of so many thousands of men for the front, there is an enormous demand for female labor. In our own office we have had to replace our men who have joined the army, with women.

"The advent of so many women into the trades formerly occupied solely by men at first occasioned not a little apprehension on the part of the trade unions, but this was amicably dispelled by the granting of men's wages to the women. All of the rubber companies are making up the difference between their men's present pay as soldiers, and their former salaries, forwarding the money to the families left behind. Consequently there is little distress among the families of the men at the front.

### BENSON WITH MIDGLEY

E. S. Benson, recently with the Hartford Rubber Works, of Hartford, Conn., is now managing the New York branch of the Midgley Tire & Rubber Co., of Lancaster, O. He succeeds E. L. Duffee, who joins the home office of the Midgley firm.

### DID NOT CHANGE SIDECAR TIRE

"Jimmy" Walker, the Weed Chain Tire Grip Company's missionary, who recently completed a few months' business trip through fourteen states with his Indian machine and sidecar, made five tire changes in all. These were on the rear wheel of the motorcycle. The sidecar wheel which was shod with a Diamond non-skid tire made the entire tour without a puncture or a change. Walker's mileage was 12,418.

### LOGAN WITH McGRAW TIRES

W. V. Logan, until recently manager of the manufacturers' department of the Goodyear Tire & Rubber Company, of Akron, O., is now associated with the McGraw Tire & Rubber Company, at East Palestine, O., in the capacity of assistant sales manager.

## DIXIE PROVES ABILITY IN KEUKA LAKE FLIGHT

AN eight-cylinder Dixie magneto, made by the Splitdorf Electrical Company, of Newark, N. J., had a record-breaking demonstration of its ability during the contest for the Curtiss Marine Flying Trophy over Lake Keuka, N. Y. The flight was under the supervision of the Aero Club of America and David H. McCullogh, of Newport, Pa., was representing the club with a 100 horsepower Curtiss hydro-aeroplane on which the Dixie magneto was fitted. The trophy was offered for the greatest distance flown in a ten-hour day.

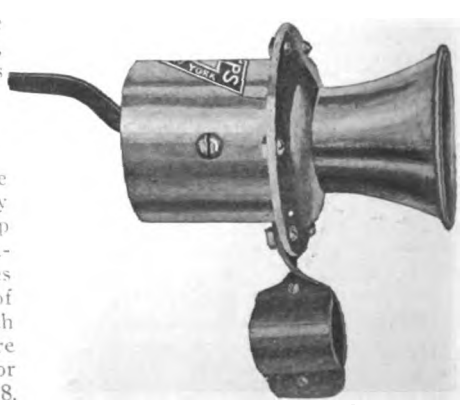
McCullogh had flown around the lake for five hours, without trouble, when the motor suddenly stopped and he was forced to volplane toward the land. On working the throttle, he found that the motor took up its pace again before he had reached a low level, and mounting in the air he continued his long flight. On descending for fuel and water, later, McCullogh discovered that the stoppage was due to a clogged jet, and that the magneto was by no means at fault.

The Dixie magneto delivered its powerful spark about 5,000,000 times during McCullogh's flight of 7 hours, 40 minutes. McCullogh made ten rounds of Lake Keuka, from Hammondsport to Pen Yan, a distance of 480 miles in that time. Outside of the motor stoppage mentioned, which was not the fault of the magneto, there was no falter of the motor during the entire period, a tribute to the consistency of working of the Dixie.

## REEPS HORN FOR BICYCLES AND MOTORCYCLES

TO meet the increasing demand for a good, medium-priced mechanical warning signal for the motorcycle and bicycle, the Reeps Manufacturing Company, of 50 Church street, New York, has brought out the Reeps mechanical horn, listing at $1.50. It is constructed along the general lines of the popular automobile horns, but is smaller and weighs but 11 ounces. Its size and weight fit it for the uses mentioned above.

The Reps horn is operated by pressing a small lever or handle at the back of the



Reeps Mechanical Horn

body of the horn. This handle in turn rotates a saw-toothed wheel against a steel diaphragm. A loud and distinctive sound is produced, placing this horn in a class by itself as an adequate signal for the two-wheeler, whether power or man-driven.

### SENTER LOCATES IN DODGE CITY

Dodge City, Kan., November 13.—Orens Senter, formerly the Excelsior dealer at Lyons, Kan., has moved his store to Dodge City, where he will continue to handle the X, under the style of the Excelsior Cycle & Supply Company. Excelsior bicycles will be handled, in addition to the full line of motorcycles. A well-equipped repair department will be maintained. Senter's partner, Mr. Coats, is an experienced motorcycle rider, while Carl J. Turner, formerly the X agent in Dodge City, is also connected with the firm.

### JOHNSON SOLD FOURTEEN

Perth Amboy, N. J.—Chris Johnson, who handles the Silent Gray Fellow in this city, has sold 14 motorcycles this season and is grooming himself for a bigger 1916 sales total. Perth Amboy industries were somewhat hard hit by the war, but munition orders have caused business to boom once more. Johnson has his 1916 electric model now, and is pretty busy showing its paces.

### HANDLING HENDERSON TOO

Baltimore, Md.—The Excelsior Motor and Supply Company, 2632 West North avenue, has also taken on a contract for the exclusive agency of the Henderson in this section. The papers were signed a few days ago and the new models are now on display at the showrooms of the firm.

### NEWBY BOYS LOSE FATHER

Kansas City, Mo.—Albert S. Newby, father of Clarence and Orville Newby, the Henderson, Thor and Merkle agents at Kansas City, died at his home November 2. Mr. Newby was 68 years old and well known in the hardware business in Kansas City. Mr. Newby is survived by three sons and a daughter and his wife. W. F. Newby, his third son, is now with Clarence and Orville, the motorcycle agents.

### LIPPOW FORMES NEW COMPANY

Milwaukee, Wis., November 15.—L. Lippow has sold out his interest in the Milwaukee Cycle Supply and Sales Company, and has formed a new company to retail and wholesale motorcycles, bicycles and supplies, which will be known as the Lippow Cycle Company. The new concern will be located in a building now under construction, which will be completed by December 1. L. Lippow has been in the cycle field for the past twelve years.

### OPENING FOR LIVE DEALERS IN PENN'S GROVE

PENN'S GROVE, N. J., November 11.—Although this town has increased from 2,000 to 17,000 population in the past six months by reason of the enlarging of the DuPont powder works, and in spite of the fact that the average wage is $4 a day with a bi-monthly payroll of $500,000, but two bicycle dealers and no motorcycle agents have opened up in town.

"Before the boom, the bike business was better," said James Workman, the oldest dealer in Penn's Grove, "for then there were no jitneys nor railroad service between the town and the powder works. Everyone rode a bicycle for the two miles to and from the powder plant then, but now there are 150 licensed jitneys operating and the railroad runs three or four trains a day charging five cents fare."

In spite of this there seems to be quite an opening for a bicycle and motorcycle shop in the city. Men earning more money in a week than ever before naturally feel the desire to spend it. Payday finds a stream of human vultures crossing the Delaware River from Wilmington with all sorts of contrivances for luring the dollar from the powder-worker's jeans, and they are successful.

A man must be prepared to withstand discomforts here. There are no water or sewage systems in Penn's Grove and board and rooms are way up in price. With a line of cheap bicycles and extending but little credit to the kind of workers at the plant, a dealer should be able to secure some of the business that is being thrown away uselessly.

George Snellbacker, an agent in Salem, has begun to look up prospects in the motorcycle line and feels confident that there is a field here.

### LOUIS PETERIK MARRIED

Milwaukee, Wis., November 16.—The culmination of a romance that started back last June comes in the announcement of the marriage of Louis J. Peterik, manager of the Mueller Cycle & Supply Company, to Miss Pearl Kendrick, a Milwaukee girl. Friends of Louie suspected from the amount of time that he spent in the company of Miss Kendrick that things were getting serious, so the announcement of the wedding does not cause undue surprise. Mr. and Mrs. Peterik are on a honeymoon that started Chicago-ward and will wind up at Manitowoc, Wis., where Peterik's relatives live.

### CHIC'S OYSTER ROAST

Baltimore, Md.—Chic Thomas, former champion of Maryland and sales manager for Howard A. French & Co., has set Sunday, November 21, as the day for his promised oyster roast. He will play host to about 500 riders at the Cliff Side Shore on Back River. Several score of Washington riders will come over to enjoy Chic's hospitality and get their fill of the succulent bivalve served up in the inimitable Maryland style.

### HENDERSON SUB AGENTS APPOINTED

Boston, Mass., November 16.—During the past week, Mr. Kibbe and Mr. Smith, of the General Motorcycle Sales Company, New England Henderson distributors, has closed sub-agency contracts with the following concerns: Dame Brothers, Concord, N. H.; Lanes Motorcycle Company, Burlington, Vt.; L. T. Dubey, Berlin, N. H.; J. P. Poulin, Nashua, N. H.; I. E. Bigelow, Worcester, Mass.

### TWO SIDECARS AMONG HIS SALES

Wildwood, N. J.—Walter J. Shivers, the Excelsior agent for Cape May county, closed up his season recently, with no 1915 models on hand and a 1916 demonstrator on the floor. His sales book showed that 75 per cent. of Excelsiors going to his customers were three-speed twins and there were two sidecar outfits sold completely equipped. The boom in munitions-making has taken a number of Shivers' old riders over to Penn's Grove, the big powder town.

### SCHUETTE AND SHOMO ON THE ROAD

Dallas, Tex., November 15.—Harry C. Schuette, local Indian dealer, and F. D. Shomo, southwestern district manager of the Hendee Manufacturing Company, are covering Kauffman, Rockwall, Collins, Ellis and Dallas counties, exhibiting the new model Indian and taking orders for motorcycles and bicycles. A big supply of the 1916 models has been forwarded to the Harry Schuette Company, and the demand for these counties will be filled from Dallas.

### CRANMER SOLD EIGHTEEN

Mayetta, N. J.—M. L. Cranmer, who handles the Harley-Davidson in Ocean county, disposed of 18 machines during the 1915 season. Four of these were three-speed sidecar combinations. His 1916 demonstrator has been kept on the road for several weeks and has already done more than 600 miles. Cranmer has handled this make since 1913.

# SOME LIVE DEALER

*1, W. H. Enell, who has associated himself with H. Raoul, Indian agent, at 4192 Broadway, New York; 2, Thor Agency of T. Paulson, at Tacoma, Wash.; 3, Harley - Davidson Agency of Allen Motor Co., at Chewkee, Okla.; 4, Part of Shop of Irving Kibbee in Keene, N. H.*

## MUCH ACTIVITY AT NEW YORK HENDERSON BRANCH

FELIX LEWIN, who is in charge of the factory branch of the Henderson Motorcycle Company, at 227 West 106th street, New York, is now around again, after a severe strain which caused him to take an enforced holiday early in October. He missed a great part of the New York show from this cause, but has made up for the time lost by selling over 30 new Hendersons up to November 3. Of these the majority were two-speed models.

Harry Immel, of the Henderson factory forces is visiting Lewin for a while, along with Mrs. Immel. The factory man has been demonstrating the speed of the new Henderson on the Long Island Motor Parkway on several occasions for the benefit of riders who fancied that their mounts were exceedingly fast.

One of Lewin's most recent sales was a two-speed model to Alfred P. Lane, the international pistol and revolver champion. Lane has been riding for over eleven years and has had his present and his recently-owned mounts fitted with electric lighting outfits. He was the first motorcyclist in the United States to use the nitrogen bulb, having fitted one to his headlight long before they were introduced into the automobile and industrial systems.

## RICHTER GETS FIRST 1916 RECEIVED BY KLINE BROTHERS

Louisville, Ky., November 15.—The first 1916 Harley-Davidson delivered in Louisville was delivered last week to Edward G. Richter, a specialty hardware man, who will use the machine in calling on his trade through the state. Mr. Richter has been using the Harley-Davidson for several years in handling his Kentucky business, and states that he couldn't get over his territory without the aid of the two-wheeler. Kline Brothers, the local agents, report that they have sold two more machines during the week, making six sold, of which only one has been delivered.

## OPEN PROVIDENCE BRANCH

Providence, R. I.—The Hub Motorcycle Co., Inc., has opened an Excelsior agency in this city, this store being a branch of the firm's headquarters at 258 Columbus avenue, Boston, Mass. The local branch will handle the "Big X" exclusively through Stanley Kellog, eastern distributor. J. Linnell is in charge of the Providence store.

## DAYTON AGENT IN WASHINGTON

Washington, D. C.—The District of Columbia representation for Dayton motorcycles and the firm's Motor Bicycle is held by the Neutral Cycle Garage, located at 709 H street, N. W. Sam McPherson, who has been connected with the motorcycle business for over 13 years is managing the garage.

The Neutral establishment is one of the largest firms in this line in the city. It does a large repair business as a regular thing. Three men are constantly employed in the shop. The garage has an excellent gasoline system installed, and Manager McPherson considers gasoline handling as one of his best drawing cards. The Dayton Motor Bicycle has been on show during the past two weeks at McPherson's.

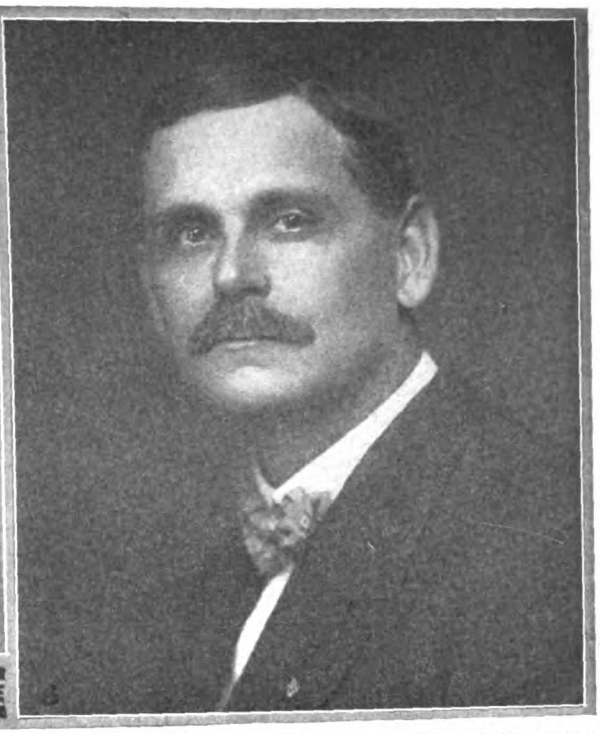
## BRAZENOR INCORPORATES

Brooklyn, N. Y., November 15.—The "Bob" Brazenor Company has been incorporated here with a capital of $1,000, to carry on a general motorcycle and bicycle business. The incorporators are Robert Brazenor and Agnes Brazenor, of 594 Jamaica avenue, Brooklyn, and George Barnes, of 881 Myrtle avenue, Brooklyn, all formerly connected with Brazenor's store.

Brazenor handles the Harley-Davidson motorcycles and has been one of the most active dealers in the Metropolitan district for years past.

Digitized by Google

# THEIR STORES



*5, Attractive interior of store of Charles H. Legget at Evansville, Ind.; 6, W. S. Cranmer, of Cedar Run, N. J., handling Excelsiors and Motor Wheels and own bicycles; 7, Excelsior agency of Schneiter Sporting Goods Co. at St. Joseph, Mo.; 8, Yale motorcycle agency of Butler & Romano at Louisville, Ky.*

## NO REST FOR CRESCI

Vineland, N. J.—With 32 of the 1915 Harley-Davidsons rolling along the South Jersey roads, Anthony Cresci, Jr., thought he could take things easy until next Spring, but the early shows made him change his mind and get hard at it. He has three 1916 models already in the hands of users and there are four more on the way from Milwaukee at present. Cresci is kept on the jump seven days a week now, showing the new Silent Gray Fellows to prospects from all over his territory.

## HANDLES DAYTON IN CAMDEN

Camden, N. J.—A. L. Hilaman, one of the best-known motorcycle dealers of this city, has taken the agency for the Dayton Motor Bicycle for Camden county. His shop is at 313 Market street. Hilaman's first order to the Davis factory called for a large part of his original allotment.

## HUB FIRM TAKES ON INDIAN

Boston, Mass.—The Hub Motorcycle Co., Inc., of 258 Columbus avenue, this city, has taken an agency for the Indian from George N. Holden, local Hendee distributor. The De Long brothers will push Indian sales in this establishment.

## MERZ SELLS FIRST 1916 "EX"

Indianapolis, Ind.—Johnny Merz, local Excelsior dealer, has sold the first 1916 motorcycle to reach his agency from the factory. One of the salesmen connected with the Hauger clothing system took it, along with a Dunham sidecar, after looking over practically all other models displayed in the city.

## BAKER LOCATES HIS AGENCY IN BROOKLYN

Brooklyn, N. Y.—Frank P. Baker, formerly manager of the motorcycle department of the N. Y. Sporting Goods Company, of New York, has opened his Indian agency at 1038 Bedford avenue, near Lafayette avenue. Mr. Baker was appointed Long Island distributor for the Hendee products for 1916 early in October, but had been unable to find a satisfactory location for his headquarters until very recently. W. Goetz is in charge of the Baker repair department.

## LANTZ TAKES A BRIDE

Jersey City, N. J.—Morton D. Lantz, Harley-Davidson agent in this city, was married last week and left on a honeymoon trip to the mountains. William H. Bergfels is in charge of his place while Lantz is away. Members of the Arrow M. C. and Walter N. Koch, Harley-Davidson traveller, represented the trade at the wedding.

## COMPLETES "TURKEY RUN" PLANS

Providence, R. I., November 15.—B. A. Swenson has completed plans for a "turkey run" on Thanksgiving day, the trip to cover over 100 miles. At least 25 local riders are expected to enter the event, and appropriate prizes, as well as a trophy, will be presented the winners, one of the prizes including a big Rhode Island turkey.

The party will leave the city and ride to Westerly, a city near the Connecticut border, and return, each man running on a secret schedule, there being seven different checking places on the route.

## TAKES ON HENDERSON

New Albany, Ind., November 16.—Glen Wright has signed up a contract for the delivery of a demonstrator model of the Henderson. Mr. Wright also handles the Harley-Davidson and does a general bicycle and sporting goods business.

# NEWS AND VIEWS OF F. A. M. DOINGS

By GOSLIN

WHILE talking over F. A. M. benefits the other day with a rider who has a fancied grievance, he remarked that his club could do just as well if each of the fifty-odd members put their dollar into a sinking fund, instead of sending it up to "Doc" Gibson for dues. The sinking fund was for emergency calls, such as accidents or adverse legislation.

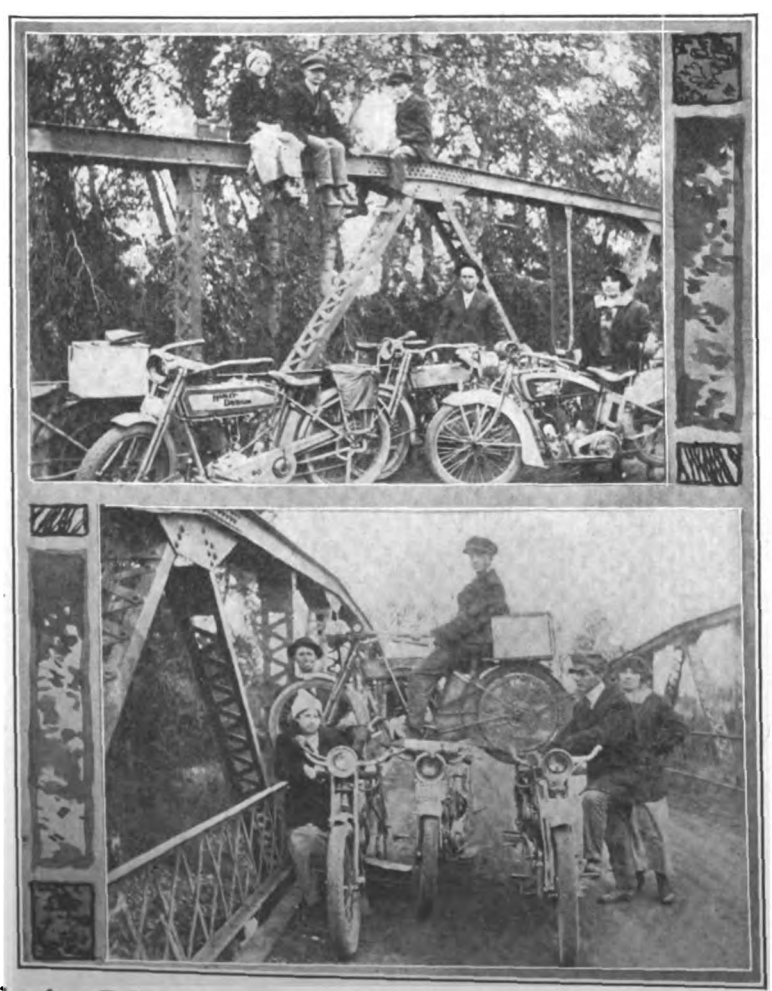
The scheme is possible, but not probable. Put on your thinking cap, Mr. Rider, and conjure up your thoughts: Have you ever seen a big, successful motorcycle club that has remained out of the F. A. M.? Why, every club with a reputation for doing things known the whole country over is an affiliated body. There's the National Capital M. C. of Washington, D. C.; the New Jersey M. C. of Newark, N. J., and the Los Angeles M. C., just to name a few of them offhand. They are all F. A. M. clubs, all wideawake and all progressive.

What is the subtle, undefinable something that goes with the Federation members that makes for more sociability, less clannishness among riders of the same make and more red-blooded sportsmanship for runs of all sorts? The same disgruntled rider referred to before belongs to a motorcycle club that has won four cups in the past two years simply because of its F. A. M. affiliation. What reputation and publicity they have gained has been through this same Federation.

To the writer's knowledge, one large and active club that dropped out of the Federation after a misunderstanding died of dry-rot. From a membership of 125 with fine quarters, the club has dwindled away until its name is but a memory. Another club attempted to run off an unsanctioned road contest. The idea of deciding the winner was unique and without precedent either here or abroad; still the contest had no support from the factories or riders, as it was an outlaw event. Ten riders competed, seven being F. A. M. members who jeopardized their Federation standing. But the point is this—the very fact of being an unsanctioned contest kept a score or more of F. A. M. riders out, and the contest did not attract that large field of riders who remain outside of the Federation, either.

Undoubtedly, the National body is not all that it could be and it probably will never suit all motorcyclists in the United States, but surely it is better than no organization at all.

## IN SPORTIVE MOOD NEAR WALLA WALLA, WASH.



Riders [illegible] L. R. Liggett's Motorcycle Shop on Bridge Crossing Walla River, Near Oregon State Line—Liggett's Place Is in the Washington City

## 1,000-MILE TOUR OF ROCKY MTS.

(Continued from page 19)

the top of the pass we cooked dinner and had a cow puncher for guest.

Coming down from the pass my chum and I were forced to ford a creek and made good time going into Hartsell, considering the fact that some of the roads were little more than primitive trails. A place called Summit, about twenty-four miles from Colorado Springs, was reached late that evening. The following morning we reached Colorado Springs and visited some friends, remaining there the entire day. Only seventy-five miles separated us from Denver, which were easily covered the next forenoon. After eating dinner at Denver, we hit up a good clip for home and arrived at Pierce, a distance of seventy-six miles, at five o'clock in the evening.

We were certainly glad to get home, though we had enjoyed our two weeks' trip immensely, in spite of the hardships. Of mechanical trouble we had very little—not even a puncture. In covering the thousand miles we used up sixteen gallons of gasoline and eight gallons of oil.

## TO CO-OPERATE WITH F. A. M.

Owensboro, Ky., November 15.—The Owensboro Motorcycle Club, Henry F. Pardon, the Indian dealer, and Frank Barkhaus, a well-known rider, are starting a movement whereby it is hoped that every rider in the district will become a member of the F. A. M., so that the Kentucky riders will be in position to co-operate with the F. A. M. in knocking out the unjustly high motorcycle license in Kentucky. The F. A. M. has agreed to aid the Kentucky members in making a fight against the law at the 1916 session of the legislature.

## YONKERS SUPPER POSTPONED

The Yonkers Motorcycle Touring Club announces that the supper which was originally slated for November 27, has been postponed to December 4. The committee asked for more time in which to complete the arrangements.

## TO BALK MOTORCYCLE THIEVES

President A. B. Coffman, of the F. A. M., suggests as a means of reducing the number of motorcycle thefts that "wherever a dealer or distributor offers a second-hand machine for sale he should make known the model and serial motor number in addition to the name and the year." This would apply to advertisements carried in the trade journals and elsewhere, and President Coffman argues that such publicity given to second-hand motorcycles would enable the original owners in many cases to locate and identify their property.

## TWO REGISTER WITH F. A. M.

Shops in Huntington, L. I., and Klamath Falls, Ore., have registered with the F. A. M. The shop of Sol Elkins is the one in Huntington, while the Klamath Sportsman's Store, at 727 Main street, is the other.

W. E. McUmber, of Jackson, Mich., has been appointed local F. A. M. commissioner for Jackson County.

# GRENDA-HILL CAPTURE BOSTON SIX-DAY RACE

## Leaders Cover 1,409 Miles and 1 Lap; Former Record Broken By 25 Miles and 6 Laps

BOSTON, November 14.—Alf Grenda and Freddie Hill, the betting favorites, won Boston's 10th annual six-day race in a sprint-point system finish that was marked by such foul riding that three of the teams, among them the winners were heavily penalized.

The total distance covered in the race was 1,409 miles, 1 lap, 25 miles and 6 laps ahead of the record for the Boston grind.

Up to the last hour, when the special sprints were started, eight teams were in a tie, Grenda-Hill, McNamara-Spears, Bedell-Magin, Root-Hanley, Walthour-Carman, Cameron-Kaiser, Dupuy-Moran and Eaton-Madden. The Sullivan-Linart combination, which had been formed after the injury, Thursday night, of Tom Grimm, who was originally teamed up with Linart, and Holbrook, who had been with Sullivan, was one lap behind, despite frantic efforts on Sullivan's part to sprint away from the bunch and regain the lap. The distance up to the last hour was 1,382 miles, 6 laps.

### Penalties Meted Out

During the deciding sprints, Bobby Walthour, the veteran, was spilled twice but managed to keep going even through the last sprint. Magin received a five-point penalty for elbowing Bobby in the thirteenth sprint. McNamara and Spears were penalized five points for an illegal pickup and Cameron likewise was put back five points for riding Grenda high during one of the last sprints.

Grenda was unpopular with the crowd, for he rode foul in the eighth heat, forcing little Dupuy of the Dupuy-Moran team, to shove him up several times. Finally Grenda rode so high that he forced Eaton through the fence and spilt Bobby Walthour into the enclosure. Grenda was penalized five points for this, but this penalty was not enough to prevent his team from winning. The final standing:

Grenda and Hill, 99; McNamara and Spears, 97; Bedell and Magin, 86; Root and Hanley, 78; Walthour and Carman, 64; Cameron and Kaiser, 55; Moran and Dupuy, 53, and Eaton and Madden, 52.

### The Race Day by Day

From the start of the race, Monday at 4 o'clock, the pace was gruelling, and never during the entire six days were the riders behind the record. There were many punctures and spills during the first night, and the Holbrook-Sullivan combination dropped back a lap in the standing, despite the heroic efforts of the latter to keep his partner up with the bunch. Holbrook was noticeably soft and showed his lack of experience. Tom Grimm, who at the last minute had been secured as a partner for Linart in place of Wiley, was several times seasick from the wave motion of the small track, but managed to hang on in the pinches. The mileage for the first ten hours was 250 miles 1 lap.

On Tuesday Verri, the Italian, who had been teamed up with Corry, failed to appear, and after his partner had hung onto the bunch for two hours and twenty minutes, he was forced to drop out, leaving 10 teams in the race. There was one lively sprint in the evening, and later Moran set things going several times by his famous jumps. There was no change in the standing, however. The record for the twentieth hour: 490 miles, 7 laps.

Alfred Grenda (on Bicycle) of Australia and Freddie Hill of Boston

Tom Grimm had a lap tied onto his team Wednesday by being shaken by a swift change of pace which caught him napping, snapping him off from the end of the line. The bunch lapped him in three minutes. It became apparent that there were three strong combinations, consisting of the Grenda, McNamara and Root teams, and the others were unable to head the aggregation. McNamara was always starting trouble, Grenda took it as his share to go after any aspirants for lap honors and Root sat tight and tended strictly to business. The night's racing ended with the leaders at 724 miles, 5 laps, with Linart and Grimm one lap and Sullivan and Holbrook two laps behind.

### Bad Spill on Thursday

Early Thursday evening there was a spill on one of the stretches, Grimm being thrown into the fence, Holbrook on his face, and Walthour upon the track. Grimm had to be taken to the hospital, and Holbrook had to receive first aid. Walthour got a few bruises. This spill resulted in the forced withdrawal of both Grimm and Holbrook, and Linart and Sullivan teamed up, taking a two-lap penalty. On the return of these two riders to the track at 11 o'clock, Sullivan at once started doing things, and he and Linart, by fast riding and clever team work, made up one of the laps. Eaton and Madden tried a live-lap steal, but after they had half a lap, the leaders went after them and brought the stray ones back to the fold. Record for the fortieth hour: 954 miles, 9 laps.

The arena was well packed Friday night, with rooters from Watertown, Mass., the former home of Freddie Hill of the Grenda-Hill team; and their cheer-

**Distance of race, 1409 miles 1 lap; ahead of record 25 miles 6 laps.**

*** Grenda caused a fall and penalized. † McNamara was ninth, but disqualified for "picking up."**

ing nerved the riders to many sprints. At one time Sullivan and Linart had back one of their penalty laps and were even with the field, but the repeated Moran jumps and the break-neck sprints shook them off again and at the end of the evening they were once more a lap behind the bunch. Record for the fiftieth hour: 1,184 miles, 1 lap.

Up to the final sprints, the nine hours of riding Saturday resulted in little excitement, although Sullivan was continually sprinting to get his team up with the bunch in order to get into the final hour of sprints. Sullivan and Linart were unable to get the distance, however, and were called off at the beginning of the finals.

### MORE BOY SCOUTS USING BICYCLES

La Crosse, Wis., November 16.—Bicycles are playing an important part in the maneuvers of the local patrol of the Boy Scouts. Under the leadership of Scout Master Prof. Harry Spence, the members of the scout body take frequent trips out of the city, stopping along the road for practice in the outdoor rituals of the scout.

Last week nine members of the troop rode to West Salem and back. The party left at 2 o'clock and returned home shortly after supper time. The scouts who made the trip were Lloyd Spence, Alfred Ziel, Roy Smith, Leonard and George Jenks, Delber Wiles, Oscar Melbo, R. Redpath and Tim Reynolds. Roy Davidson and Melvin Knutson accompanied the scouts.

### AFFILIATE WITH U. S. BOY SCOUTS

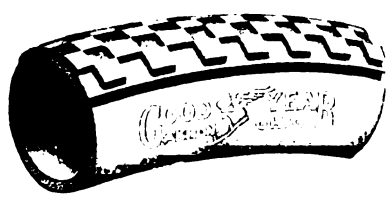
The National Bicycle Scouts of America have become affiliated with the United States Boy Scouts, according to an announcement recently made from their headquarters, at 33 Maiden Lane, New York City, where all inquiries regarding the formation of companies throughout the country can be addressed. That bicyclists are interested in the formation of local companies is evidenced by the fact that inquiries have been received from a number of cities, among which are Birmingham, Ala., Ellis, Kan., Brooklyn, N. Y., and Philadelphia, Pa.

### JUVENILE DEMAND IS BIG

Woodstown, N. J.—George M. Andrews & Sons sell the Iver Johnson in this city. They find a big demand for juvenile bicycles on account of the distance to schools in the surrounding country section. Ladies' wheels, also, are often called for.

## GOODYEAR ANNOUNCES NEW BICYCLE TIRE

AKRON, Ohio, November 15.—Announcement is made by the Goodyear Tire & Rubber Company of a new bicycle tire which will be known as the Goodyear-Akron Blue Streak Bicycle Tire. This new tire supersedes one having the same tread design, but it is different in color, has fifteen per cent. more rubber, and is made tougher. The color is now a creamy white, while a blue streak appears on each side of the new tire, just above the tread. In speaking of the newcomer in the Goodyear line, E. R. Stilwell, manager of the bicycle tire department of the company, said:



**New Goodyear Tire**

"About two years ago when we offered direct to the dealers a quality Goodyear-Akron Bicycle Tire at the moderate price named, it was predicted that we would not be able to put it over. But we had based our profits on quantity sales and soon demonstrated that we had a trade winner for the dealer. Since this offer our number of dealers has trebled and nearly 10,000 of them are now cashing in on the popularity of Goodyear-Akrons. In the past eighteen months we have made three price reductions totaling 33⅓ per cent. or $2.50 a yair. Yet our business more than doubled last year. But with a feeling that this performance can be passed in 1916, we are now offering the new Goodyear-Akron Blue Streak Bicycle Tire. This bicycle tire is made by the same expert methods which have been used in manufacturing its big brother, the Blue Streak Motorcycle Tire.

"The tread of the new tire is the same as the former Goodyear-Akron tire. The tread stock, however, is cream white in color and is more wear-resisting, being much tougher and 15 per cent. heavier. Instead of placing the blue streak in the center of the tread as on our motorcycle tire, we have put a blue streak on each side of the tire just above the tread, which means that these streaks stay in the tire as long as it is in use, instead of disappearing with the tread stock when it becomes worn down. We have left nothing out of this new tire to make it a leader."

### IRBY AND YOUNTS TO OPEN

Dallas, Tex., November 16.—R. F. Irby and John Younts, both of Temple, Tex., will open a bicycle and motorcycle store in that city as soon as they can get the stock which has been ordered. Mr. Irby was in Dallas placing an order for a big consignment of Pierce bicycles and accessories with the Cortines Supply Company. The new firm will also handle Pope motorcycles and bicycles.

Mr. Irby has a thorough knowledge of the cycle business, having been employed as mechanician by M. I. Mitchell, the Harley-Davidson dealer, of Temple, for nine years.

### BICYCLE RACE AT SCHENECTADY

Schenectady, N. Y., November 14.—A five-mile bicycle race was held here last Sunday afternoon which attracted a large number of spectators. Eric Friborg took first prize with A. Haber second.

A two-mile handicap followed which was a closer race than the preceding. The winners of the first race were set back 22 yards. The contestants were closely bunched until near the finish when Friborg and Haber pulled ahead for first and second, respectively.

# JENSEN-STYLES WIN C.R.C.A. RACE

## By Piling Up 22 Points They Capture One-Hour Team Race at Sheepshead Bay — Naphtal-Sattler One Point Behind Winners.

EDWIN JENSEN and Stanton A. Styles, as team mates, won the one-hour track team race of the New York Division of the Century Road Club Association, held at the Sheepshead Bay Velodrome, New York, on Sunday morning, November 14. Joseph Naphtal, teamed with Louis Sattler accounted for second prizes with 21 points, only one point behind the winners. Nelson Johnson and Ernest Kuno were third, while George Harvey with Louis Zemo made up the fourth team.

This event was run on the six-day race style, with a sprint for points at the end of each mile during the last fifteen minutes of the hour. Teams were selected by placing a class "A" rider with a class "B" rider, and thus there was no "best bet" team to start.

The riders started at a fast pace, with the Welton-Winquist team leading at the end of the first mile. The amateurs changed partners in true professional style and no accidents of any serious nature occurred, excepting two small spills.

At ten miles the Welton-Winquist combination still was in the lead, the time being 25 minutes, 32 seconds, and at fifteen miles the Marquart-Lipsett pair started a jam and managed to secure a quarter-lap lead when one of the two spills occurred, compelling the abandoning of the attempt. The excitement of the attendants and the spectators was immense when all the nine teams were on the track at one time.

At 45 minutes, when the sprints for points were started, the racers had covered 17½ miles, and thereafter the riders grew cautious, and watched lest some one try to steal a lap.

The first sprint was won by Jensen; the second was taken by Marquart; the third by Johnson, and then Jensen, by a sudden jump, got away from the field and after riding over a mile, during which time he was relieved, came back and closed the gap which netted him a stolen lap.

Johnson tried the same stunt immediately afterwards, but the field did not permit him to get very far. By taking the first sprint and the last three sprints of the six in the final quarter-hour, and a fourth place at the third mile sprint, the Jensen-Styles combination scored 22 points, just barely leading the Naphtal-Sattler team.

The total distance traveled was 24 miles 7¾ laps, which is considered good for amateurs in this style of riding. The summaries:

| Place | Name of team | Distance traveled |
|---|---|---|
| 1— | Edwin Jensen, Stanton A. Styles | 24 miles 2 laps |
| 2— | Joseph Naphtal, Louis Sattler | 24 miles 1 lap |
| 3— | Nelson Johnson, Ernest Kuno | 24 miles 1 lap |
| 4— | George Harvey, Louis Zemo | 24 miles 1 lap |
| 5— | John Marquart, Robert Lipsett | 24 miles 1 lap |
| 6— | Raymond Caldwell, Howard Carroll | 24 miles 1 lap |
| 7— | Edward Mullin, George Steppello | 24 miles 0 laps |
| 8— | Isadore Taub, Joseph Caldwell | 23 miles 7 laps |
| 9— | John Welton, William Winquist | 23 miles 7 laps |

Points won in final quarter-hour, in each mile sprint:

| Place | Team | Points by Miles 1st | 2nd | 3rd | 4th | 5th | 6th | Tl |
|---|---|---|---|---|---|---|---|---|
| 1— | E. Jensen, S. A. Styles | 5 | 0 | 2 | 5 | 5 | 5 | — 22 |
| 2— | J. Naphtal, L. Sattler | 4 | 3 | 3 | 4 | 3 | 4 | — 21 |
| 3— | N. Johnson, E. Kuno | 3 | 4 | 5 | 2 | 2 | 1 | — 17 |
| 4— | G. Harvey, L. Zemo | 0 | 1 | 1 | 1 | 4 | 3 | — 10 |
| 5— | J. Marquart, R. Lipsett | 1 | 5 | 4 | 0 | 0 | 0 | — 10 |
| 6— | R. Caldwell, H. Carroll | 0 | 2 | 0 | 3 | 1 | 2 | — 8 |

### ENTERPRISING WOMAN DEALER

El Paso, Tex.—One of the most enterprising bicycle establishments of this city is operated by a woman. This firm, styled Mrs. Anna Krome, is conducted along the lines of the strictest and most modern business principles, Mrs. Krome herself doing all the executive work. She has just placed an order for a big shipment of bicycles with the Westfield Manufacturing Company.

### MOTOR WHEEL AGENTS IN PARIS

Paris, Ky., November 15.—Dougherty Brothers, dealers in bicycles, supplies and other specialty lines, have taken on the agency for the Smith Motor Wheel.

Digitized by Google

# CHOICE BITS OF BICYCLE GOSSIP

By WALTER BARDGETT

WHEN John M. Chapman, who, when not managing his farm in Georgia, manages bicycle tracks and bicycle riders, heard that Verri, the Italian, had quit the six-day race in Boston as a result of too much banquet and spaghetti at the hands of his friends, he declared that he was going to insert a clause in the contracts of all the Italian riders to the effect that if they attended a banquet they would be summarily released.

Riding to the scene of six-day races awheel seems to be the habit nowadays. It has even struck the trainers, and Bobby Walthour's trainer, who goes under the euphonious title of "Fritz from the Walthour," is now wheeling to the scene of the Chicago six-day race. He was reported in Buffalo, where he stopped at the Pierce factory to have a brake fixed, on Thursday last, and he is expected to reach the windy city in time for the sprint races.

Get this one while it is good. A bicycle club has been formed by women in Evanston, Ill., and the beauty of it is the club was formed because they tired of horseback riding and autos. The club has thirty members and among them are some of the "400" of that busy little burg. The touring department of the newly formed club is busy mapping out a schedule for next season.

Despite the aches and also the pains that go with a six-day race and the peeves, too, it is a hard matter to keep the riders out of these grinds. Tommy Grimm, the Newarker, was badly marred in the Boston race last week, but that did not deter him from wiring John M. Chapman in Chicago that he would be all right for the Coliseum race in that city.

With the abandonment of the Atlanta track proposition some of the cyclists are making great efforts to replenish the bank account so that hard work will not be their lot for the winter. With the Boston race out of their systems—or perhaps still in their systems—the Chicago and New York six-day races appear to be about the only events on the calendar before the little blue birds start to whistle in the gentle Spring. And in the Chicago race there will be many efforts to make a good showing so that the favorable mention may be sent on to the management of the New York race and a contract submitted to them for the race under Diana's famous statue.

The six-day riders who are entered in the Windy City race are finishing up their training on the boulevards and roads in the vicinity of Chicago. The Riverview Park people, who took over the Velodrome later in the season, nailed up the club quarters of the Riverview Cycling Club and put the Yale six-lever onto the track. The riders who came here to prepare for the Coliseum race might just as well have staid in Newark as far as accommodations go.

Louis Kuehl, the Chicago amateur, has branched out as a salesman for the Excelsior Cycle Company, of Chicago. Louis dashes about the city in his calls on the trade on a two-wheeler. Recently Louis acted as "the man from Cooks'" in a tour to Crown Point, the Gretna Green of Chicago.

Joe Kopsky and Company are still entertaining the Chicago natives on the home trainers, having been engaged for two weeks by local theatrical houses. Last week they played in the southern portion of Chicago, and this week they are booked for the northern section of the city. Charles Piercey, Rudi-Russe, Norman Anderson, Gus Wohlrab and Miss Jessie Stalter are the other members of the company.

# NEWS FROM ABROAD

## ETERNAL TRIANGLE IN SPY CASE

The Italian sporting paper, *La Gazzetta Dello Sport*, in its latest issue carries a story to the effect that the eternal triangle figured in the recent escapade of Emil Doerflinger, the Swiss cyclist, who was condemned to death by the German military authorities for being a spy, but pardoned by order of the Kaiser after intervention by the Swiss government. Ingold, a Swiss-German, who is in the German aviation corps, Ingold's sweetheart and Doerflinger figured in the case. Ingold was jealous of Doerflinger, informed the German authorities that the Swiss champion was a spy, Doerflinger was arrested, tried and sentenced to death, but was freed after Ingold's story was investigated. The way the situation now stands Doerflinger is free, and Ingold is in "Dutch," so to speak, with his girl.

## VETS RACE FOR RED CROSS

At a recent meeting in London for the benefit of the Red Cross, two veterans rode in a match race. Montaigne Holbein, second on the Bordeaux-Paris road race in 1891, and W. G. George, one of the vets of the English track about 1886, were the principals. Holbein is 51 years of age and George 55.

## STARS IN TOUR OF LOMBARDY

In the recent tour of Lombardy, one of the Italian road classics, Amedeo Polledri, the Italian champion; Henry Pelissier, the French road king, and Giradengo, the fast Italian, participated, Pelissier, receiving a sanction from the French military authorities to do so.

## GOODYEAR CO. LAUNCHES "ONE MILLION" CAMPAIGN

AKRON, Ohio, November 15.—The Goodyear Tire & Rubber Company has joined the ranks of the accessory manufacturers who have adopted for their new season slogan: "One Million Bicycles for 1916." This slogan is now being translated into action by the Goodyear company; its publicity department is asking the cooperation of all the bicycle and parts manufacturers and is formulating plans that, if backed up by the manufacturers, will, it believes, bring the 1916 bicycle output near the million mark. Already advertisements of the Goodyear company have appeared in the trade journals calling attention to the necessity of every one pulling together for the common goal. Letters will soon be sent to all dealers, and the first of a series of communications that are being mailed to the manufacturers is in part as follows:

"There are infinitely more bicycle prospects now than in even those boom years.

"What the bicycle needs most now is additional popularity. It needs boosting. Of late years the automobile has been in the limelight. But plenty of light is still available for the bicycle, just the same.

"Let's all get together now and put the industry back on its proper footing. It will require some work, some unselfishness, of all of us. But the possible rewards are dazzling."

## GIRTON-HOFFER ADD BICYCLES TO THEIR STOCK OF EXCELSIORS

Los Angeles, Cal., November 8.—Score another victory for the bicycle in Los Angeles. Girton-Hoffer, Excelsior distributors, have decided to handle bikes, and, in addition, to their impressive line-up of new Excelsior models they are showing samples of the Columbia, Tribune and other bicycle lines carried by Edwin F. Merry, distributor. The Girton-Hoffer firm will carry only new bicycles, from the lines mentioned, and a few sundries. They found that there was a demand for bicycles among the folks who visited their store, and as usual they made arrangements to "deliver the goods."

## JUVENILES FOR OTT CO.

Dallas, Tex., November 15.—The Charles Ott Company, of this city, has just received a consignment of 52 juvenile bicycles which were ordered through the Simmons Hardware Company.

An order of 55 Excelsior motor bikes have also arrived.

## BUTLER COUNTY DANCE NOV. 19

Hamilton, Ohio.—The Butler County Cycle Club's dance will be held on the evening of November 19, instead of on Thanksgiving, as originally planned. A committee, consisting of George Kendall, Ed. Brannon and William Stump, has charge of the affair.

### TWO TORONTO "COMERS"

Toronto, Canada, November 15.—Harold Bounsall and Norman Webster, shown in the accompanying illustration, are two prominent cyclists of the Classic Club of Toronto. Both have won many prizes, although neither is yet out of his 'teens. Bounsall is the son of a noted racer who

**H. Bounsall and N. Webster**

rode fifteen years ago, while Norman Webster has just concluded his first year of racing, which he started by winning his novice. Webster finished second to Ohrt, the world's champion, in two open races later in the season, and is running Art Spencer, the Canadian champion, closely for honors. Webster also won the time prize in three road races this fall.

### CRESCENT MILEAGE REPORT

Baltimore, Md., November 16.—The century mileage report of the Crescent Bicycle Club up to the end of October shows that several changes have taken place among the first ten men, several newer members of the club having taken the places of some of the older members. William T. Wright, who has led since early in the spring, is still first, with Jno. G. Stricker holding second place and Fred. M. Sanborn in the bronze medal position. Further down the line Walter Doersch has moved into sixth place and Lester Nickles, Walter Iglehart and Ernest Nitz have moved into seventh, eighth and ninth positions respectively. Thirty-six thousand three hundred and seventy-eight miles have been ridden by the entire club from the first of the year to the end of October, including 75 centuries and one double century.

The standing of the first ten men follows: 1, Wm. T. Wright; 2, Jno. G. Stricker; 3, Fred. M. Sanborn; 4, Welby Sherman; 5, Langdon M. Sanborn; 6, Walter Doersch; 7, Lester Nickles; 8, Walter Iglehart; 9, Ernest Nitz; 10, August Leimbach.

### CRESCENT CHAMP. RACE POSTPONED

Baltimore, Md., November 16.—There was a good turnout of the members of the Crescent Bicycle Club for the annual 100 mile club championship race, but only three lined up to face the starter. The dauntless trio were the three leaders in the club championship series, Welby Sherman, Langdon M. Sanborn and Fred. M. Sanborn. Starter Nitz sent them away on their long grind at 11:10 a. m. Rain started to fall soon after the start, but the riders continued to the finish of the first lap of twenty-five miles, when the race was called off. Fast time was made for the first twenty-five miles, the cyclers turning the distance in one hour and twenty minutes.

### PIONEER CYCLISTS CELEBRATE

Cincinnati, Ohio.—An organization which recalls the palmy days of wheeling in the nineties, is the Queen Cycling Club, of this city, the first bicycle club for women in Cincinnati. It celebrated its twenty-fifth anniversary last week at the residence of Mrs. Bernard Wisenall, wife of a prominent architect. The club started with a membership of seven in November, 1890, and soon grew to sixty members. It has maintained its organization ever since, though of course many of the members have long since given up riding.

### SWAIN BUILDS "SMITH MOBILE"

La. Junita, Colo., November 15.—C. L. Swain, the motor wheel dealer of this city, is taking out a patent on the vehicle shown in the accompanying illustration, which he calls the "Smith Mobile." This machine will seat two men and carry them about the streets of the city at a speed of seven miles per hour. In constructing the vehicle

**The "Smith Mobile"**

ordinary bicycle wheels were used, while the body was built up from parts of bicycle frames. Motorcycle tandem cushions are used for the seats, and a hand brake is attached by chain to a coaster on one of the rear wheels. As shown by the photo, a Smith Motor Wheel propels Swain's outfit.

### STAR HARNESS CLOSING OUT

Dallas, Tex., November 16.—The Star Harness Company, at 1015 Elm street, which has been handling a stock of Norvell & Shapleigh bicycles for the past three years, is closing out the entire stock to devote all their space to the harness and saddlery business.

### CROPS AFFECT BICYCLE SALES

Los Angeles, Cal., November 12.—Stanley Wilson, secretary of the D. P. Harris Hardware Company, of New York City, has been making an extended trip through the West boosting Rollfast bicycles and Roll fast tires. He finds that the increasing prices of barley and alfalfa hay are likely to have an important bearing on the bicycle market in the near future. Owing to the diminished acreage and the heavy export demand, more of the hay will be handled from outlying districts, and the demand for bicycles is expected to grow in direct proportion to the need for labor at distances of from four to ten miles from the thickly-settled sections.

### BICYCLE NEWS FROM FRISCO

San Francisco, Cal., November 14.—Hans Ohrt, the national and world's amateur bicycle champion, arrived in Frisco this week and was given a royal reception by the local bicycle fans at the Olympic club house. Ohrt has announced his intention of remaining on the coast for the winter and will return to Newark next spring.

The Pacific Coast Bicycle Championship races, which were stated to be held on November 7, have been postponed until November 21, on account of rain.

The New Century Wheelmen will hold a six-man team race on rollers at the Cort Theatre, in San Francisco, on Sunday, November 28. This bicycle event is one of the items on the program that is being staged for the benefit of the San Francisco Newsboys' Association. The New Century Wheelmen gratuitously gave their talent last year for a similar occasion, and made such a big hit with the crowd that the management was eager to "put on" the team race again this season.

Maggini & Perkins, Frisco Harley-Davidson dealers, will on the first of the year put in a complete line of bicycles. They have not yet announced what particular line they will handle.

### USE BIKE VAN FOR DELIVERIES

Dallas, Tex., November 15.—The Hans Johnsen Company of this city does a heavy mail order business in bicycle and motorcycle parts and accessories. For the purpose of quickly transporting parcel post and special express packages a rear van was attached to a bicycle, which furnishes a light vehicle admirably adapted to this purpose.

**Makes Deliveries in Dallas**

## FITTING KICK-STARTER TO A PEDAL MODEL

### Describing a Simple Device Adaptable to Any Machine

By L. E. FOWLER

HAVING had excellent service from my nine-horsepower Thor during the 1914, I wished to continue using it for another year. Being graduated from the solo into the sidecar class since first purchasing the mount, I was much averse to jacking the rig on the stand every time that I wanted to start the motor, so I developed the kick-starter shown in the photograph, and have been using it to good effect ever since.

I don't mean to say that I arrived at this design right off, for such was not the case. It was only after much thought and experimentation that the form shown was finally adopted and put into service. From the photograph, you will see that the starter is of the gear and segment type, acting directly on the motor shaft. It is semi-automatic in its action; that is, it has to be set for each kick, but returns to an inoperative position the instant that the motor begins to fire.

#### Applicable to Any Model

A kick-starter of this type is applicable to almost any type of motorcycle, regardless of its age or model. It is simple, powerful and compact, and if the proper proportions between the gear and segment are attained, it will prove very efficient. In the starter I use, there are 12 teeth on the pinion located in the boss screwed to the gear case, and 30 teeth on the starter segment. This turns the motor over 2½ times per stroke of the starter.

In designing such a starter, I would impress upon the reader the fact that the greater the number of revolutions that the motor is to be turned over, the more force will be required on the starter lever. Less than two complete revolutions of the flywheels should not be arranged for, three or 3¼ being better.

In the starter shown, the hexagon nut on the end of the motor shaft was replaced by a round nut, on the face of which was a 6-tooth dog-clutch. Into the gear-case cover was screwed a hollow boss, the center of which was on an exact line with the center of the motor shaft. This boss contained a spindle which revolved freely within. A small 12-tooth pinion was screwed on the spindle, while the top of the boss was milled out to allow the gear segment to engage with the pinion. On the inner end of the spindle was a 6-tooth

L. E. Fowler with Mrs. Fowler in Sidecar Starting Off on 2,000 Mile Trip

dog-clutch which engaged the face of the round nut on the end of the motor shaft.

Normally, the clutch is out of engagement, being held out by a spring and pin seating in a groove. By forcing the outer end of the spindle in with the foot and lifting up the segment lever by hand, the device is set ready for starting. Naturally, a spring could be arranged to pull the lever up after each kick. As shown in the photograph, the center about which the segment swings is screwed into a casting firmly secured by two of the cylinder bolts and two of the gearcase screws. The segment was forged out by a local blacksmith. The foot-piece folds and turns out of the way.

#### Novel Foot-Board Design

There are other things on this Thor of mine besides the kick-starter. I refer in particular to the foot-boards. These are a radical departure from the accepted type and are a distinct gain in comfort. They are made from pressed steel (aluminum would be lighter and amply stiff), and covered with pyramid rubber. The front ends oscillate about a ¾-inch bar which is fastened rigidly to the motorcycle frame. The rear ends are hung directly from the saddle plate. Thus it will be seen that the body moves as a whole and enables the rider to keep his feet on the boards while traversing the roughest cobblestone street. In the form shown, these spring footboards are more applicable for use on a motorcycle fitted with a sidecar, as they are non-folding, but on my next mount they will be made to fold, in addition, to the present features.

Both pictures give a good idea of the large front mudguard so necessary for touring. There is also shown a foot-control for the clutch, another wrinkle of mine. It is combined with the hand-lever, of course. The above features were used during much of 1915, over 4,000 miles having been covered. Of this, 2,000 was a single trip.

# WILLIAMS MACHINE HAS MOTOR IN REAR WHEEL

ONE of the latest products of inventive genius in the motorcycle field is that of J. H. Williams, a New York man who has been noted for his work in the typewriter field and in that of aviation, for he spent several years with Glenn Curtiss at Hammondsport, N. Y., during the development of the aeroplane. Mr. Williams' invention is a motorcycle with a three-cylinder rotating motor in the rear wheel, as in the photograph herewith.

The motor is mounted within the rear wheel and concentric with it, so that the cylinders revolve in the same plane as the wheel. It is geared to the wheel through a spur gear train, the gear ratio being 4:1. In common with aeroplane motors of the same type, the carbureter supplies the mixture directly to the crankcase through a hollow shaft, from whence it is admitted to the proper cylinder through an inlet valve in the piston. This inlet valve is actuated by a cam on the upper end of the connecting rod.

### Novel Exhaust Arrangement

The exhaust valve in each cylinder is in the head, being operated by a stationary cam through tappets and tappet rods which rotate with the motor. Instead of being permitted to pass from the valve chamber to the air, the exhaust passes out through a series of small holes, and thus its velocity is decreased and silence obtained. Ignition is by battery and coil with a high tension distributor.

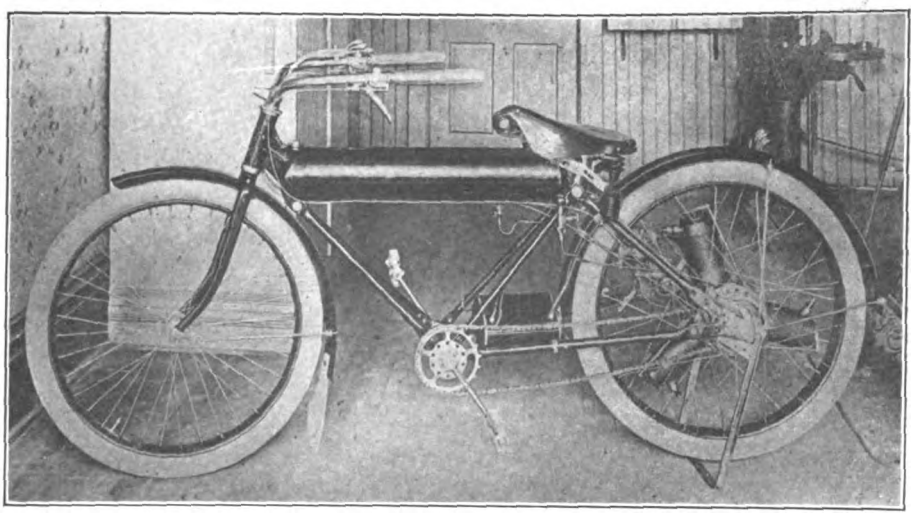
The maker claims that with a motor of this type it is perfectly possible to lubricate all parts by injection-oiling, as in two-stroke motors, but at present this system is not adopted. Oil is fed from the crankcase by means of a drip feed with sight-glass, and is distributed to the respective parts by centrifugal force. A cone clutch serves to connect the motor with the wheel. This clutch is operated by a lever on the handlebar.

The motorcycle shown is but the successor of an older model in which the same principles were employed. The first model was given a very long and thorough tryout by the inventor before being even publicly demonstrated.

### Features of Construction

The advantages claimed for the construction are manifold. Chief among them is light weight. The motor, which develops nine horsepower when run at normal speed, weighs but 31 pounds, and it is said that the model shown weighs fully a third less than any twin motorcycle now on the market. Another big feature is the total absence of vibration, for the three radiating cylinders are perfectly balanced and there are no reciprocating parts with relation to the frame of the machine; hence the motor is perfectly balanced.

In this connection it is well to add that since the intervals between the firing of the cylinders being equal, another reason for smooth operation and reduced vibration is evident. By the same token, the torque being greater and more even, the machine can be throttled down lower and run at slower speed than the twin-cylinder mount. Other features claimed are certainty of cooling, for the cylinders constantly cut the air whether the machine is moving or not, and the elimination of drive chains and their accompanying dirt and noise. The placing of the motor in such an out-of-the way place opens the way for the adoption of the open frame for the accommodation of women riders.



**The Williams Motorcycle with Revolving Motor in Wheel and Novel Frame Design**

In its latest development, the Williams machine is fitted with a high-tension magneto and with a two-speed gear of the planetary type formed as an integral part of the power plant. The frame design has also been altered somewhat and a very effective spring fork fitted to take care of the road shocks.

While neither they, nor Mr. Williams are free to admit it, rumor has it that one of the Eastern motorcycle makers has taken an uncommon interest in the Williams machine, and it may so happen that among 1917's motorcycle offerings there will not only be singles, twins and fours, but also a "triplet."

## EMERGENCY CABLE TERMINAL

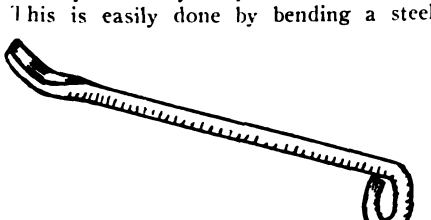
Occasionally, the terminal on the high-tension cable becomes broken or unreplaceable and a quick substitute must be had. One such can easily be made from springy wire, brass stock being preferable to steel. The wire should be about 18 gauge to give fine results, and is to be wrapped into a coil that is somewhat smaller than the high-tension cable.

A nail or other round object can be used as a mandrel for the wrapping. The insulated end of the cable should be scraped bare for about half an inch and then laid back on the insulation. One end of the wire is then bent to form a loop for the sparkplug terminal, while the other end can be bent into a short hook and forced into the insulation, preventing any chance of the wire getting loose.

## EASILY-MADE TIRE IRON

The larger motorcycle tires now being used require more effective tools for their removal than those formerly supplied. Three tools are desirable for expeditious tire work, but as the rider has only two hands, it is necessary to make the irons so that they will stay in place.

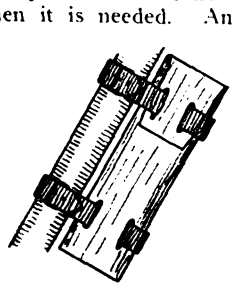
This is easily done by bending a steel rod in the form of a hook, as in the illustration, this hook to encircle a spoke, while the rider manipulates the other tire irons. The outer end of the rod is to be flattened and bent to a slight curve, so that the bead of the tire will not slip off it.



**Tire Iron with Hooped End**

## SIMPLE INNER TUBE CASE

Since butt-end tubes have come into general use, the most effective method of dealing with tire troubles on the road is to substitute a good tube for one that is punctured. If the emergency tube is not properly carried it may not be in condition to hold air when it is needed. An excellent bag of heavy oil-cloth or other water-proof material forms a good carrier, and it can be fastened to the machine as in the illustration.



There is a flap to cover the open end, this flap being held closed by the upper carrying strap, which secures the case to the motorcycle. The slots cut in the case and through which the straps pass keep the straps from slipping. Two good places for the spare tube and its case are to the front forks or under the luggage carrier.

## AMONG THE MISSING

E. J. Crawford, Crown Point, Ind., reports the theft of his Indian, No. 72F834; 1914 two-speed with 1915 kick-starter; Old Sol lamp; carrier and cushion; folding footrests (right one broken); Aermore exhaust whistle; $25 reward.

# Trade and Sport in England

By OLD RAMBLER

ONE of the troubles in getting out a light-weight motorcycle, and particularly one of the accessory or auxiliary media referred to, is that magnetos are so heavy. And that reminds one of the greatest problems that has beset the motor world over here since the war broke out and German supplies were cut off. What firm can be truly said to have filled the breach adequately? Some factories may promptly claim the distinction; but I beg of them not to be in such a mighty hurry with their claims. Come into some of the motorcycle and motor car factories, or into the garages and workshops, where an agent is wrestling with repairs, and you'll find that despair is generally prevalent over this magneto business. There are plenty of vague and cheerful rumors that some genius or other is going to overcome the magneto problem—its manufacture and plentiful supply. Well, let's hope that the goods will soon be visible, and certainly not be as long in materializing as the long-talked-of Edison battery that would be no bigger than a match-box.

This time of year we are generally in the throes of show work and flooded with news of all sorts of inventions which are going to cheapen and simplify motoring. Just now the topics of the hour are such thrilling subjects as whether the motorcyclist ought to wear his cap-peak at the front or the back.

### Machine-Gun Sidecars

At one of the leading works where I usually make an afternoon call, to get a scoop about coming changes for the new season, I found all hands engaged last week on work that has kept them going most of the war-time, i.e., making sidecars for machine-guns. The mobility of these death-dealers has been one of the features of the campaign.

An old trade friend told me the other day about his trip to Russia with some hundreds of motorcycles for the Russian army, a few months ago. He had an inspiring time, and found the Allies as keen and clever as our own riders over motorcycles. It isn't advisable to say much about these affairs just now, so I'll quit the subject with his closing observation—"I came back across the North Sea and never so much as saw a periscope."

Lighting restrictions over here are perplexing beyond all understanding. I was in some of our eastern counties recently, and experiences at night-time are simply sensational. There is no standard of candlepower in most places where the restrictions exist, and one wag has suggested that he could do with a variable gear for his lamp.

I have fought shy of gossip upon the new import duties for the simple reason that you have probably read and said enough and to spare already; so I'll be content with one or two observations. Don't run away with the silly idea that these imposts affect America only. It's very funny how some writers have totally ignored the effect upon other countries that have found Great Britain to be a good market when its ports offered an open door. Anyway, America only needs to make motorcycles good enough, and they will sell here. Do you think fewer Indians will be bought by Britishers because of the tax? I trow not.

### British Prices to Rise

Many British motorcycles are catalogued with M. A. G. engines. These are made in Switzerland—they must now pay tax. The Britisher will have to pay that; it will lift up the price of English-made motorcycles. And the same with certain other goods. Therefore, British motorcycles will not remain at their *old* prices, and there won't be as big a difference between British and American prices as some scare-mongers imagine.

It is reported that a proportion of duty is to be added by the Harley-Davidson, Indian, Pope and Thor firms; the whole of it by the makers of the American Excelsior and Motosacoche (made in Switzerland). On the other hand, Henderson will not add duty until the present stock is exhausted.

It is now November, when we should be talking of shows and novelties for the next season and rushing from one works to another trying to get "scoops" for our various papers. (How we used to anathematize the shows for one reason or another!) The advertisement managers (and their publications) used to wax fat and jolly looking in November. Now you never appreciate a thing at its full value till you have tried to be without it, and that's just how we are about the shows. Speed the end of the war, and the coming-again of the hurly-burly and whirligig of the show-fever.

What Britain could do with is a two-stroke light-weight motorcycle which wouldn't four-stroke *under any circumstances.* Note the last clause; it refers particularly to running at slow speeds. By the way, that's a lovely Hibernianism, we use in motoring at "slow" speed. The Clyno firm, whose machines have more than once been paid the pretty compliment of being called the Climb-O, has a two-stroke 2¼ h. p. model which seems to fill the bill as nearly to perfection as anything ever yet brought out. I know one that has been used with a sidecar and 26-stone load and despite having only a single gear it has pulled remarkably well up hills. It might have impressed the onlooker on the hills if a variable gear had been fitted, but anyway the little Clyno performed heroics. One might be forgiven for asking, "What is a lightweight?" The mount under discussion is by no means a featherweight, but it is handier to control than most or all of the 3½ h. p. machines that may be described as the standard power of British productions.

The engine is inclined forward and the fact that this Junior Clyno has a long wheelbase contributes to reduce the vibration nuisance. As to the four-stroking inclinations of this engine, they are not as noticeable as on a lot of two-strokers, for one can get down to seven miles an hour without the four-stroking being observed. For any slower crawling than that—and it is necessary in some of our cities with their swarms of traffic and people who suicidally cross the road as if the earth were untenanted except for their important selves—the best trick seems to be to throttle down for a few yards, then open up for a few yards and so on, until one gets a pretty clear course for touching 7 miles per hour or more.

The single cylinder two-stroke is unquestionably a type of machine that will "take"; it has so many commendable features. With two-speed or three-speed gear-sets, it would apparently meet the requirements of thousands who are on the verge of graduating from "push-pedalling" to "fire-engines."

We are getting some striking novelties in two-stroke engines and if times had been normal, with the show near at hand, they would have been the talking point of the autumn. One firm has developed a horizontally-opposed two-stroke engine with rigid piston rods, automatic inlet valves and cylinders closed at both ends so that the gas mixture is not drawn into the crank case.

### The Doughty Douglas

The horizontally-opposed Douglas, unconventional as it was, had to fight through the storm of criticism that was not always fair and very often not at all practical. Today, it is in a class by itself and pretty near the top class, too. The name of Douglas is respected throughout the Empire. As a lightweight, it is probably unsurpassed and you can read of our courageous men at the front who would plump for a Douglas lightweight before many of the higher-powered machines that are being used. Despite their lightweight features, they are put through some most gruelling work.

Some of the despatch-riders and other motorcyclists on war duty look more like chaps who are setting out on a tour of the world, carrying each his kit and his "home" on his back or on the machine. At first blush, you would say some of the loads put an outrageous tax on the doughty little Douglas, but it is going through the war with flying colors and providing a towering tribute to its magnificent qualities.

### REGISTRATIONS SHOW LESS THAN NORMAL INCREASE

Columbus, Ohio.—The Ohio Automobile Department, which has charge of the registration of motorcycles in the Buckeye State, had registered 22,112 machines up to November 10. Last year the total registration of motorcycles was a little more than 21,000, showing less than the normal increase in registrations.

Motorcycle chauffeurs to the number of 104 have been registered by the department, under the provision of the Ohio law. The law requires the registration of all operators of motorcycles used for delivery purposes and by public service corporations.

Registrar W. H. Walker, of the department, has received the first consignment of 1916 tags for motorcycles. They are on a black background and the figures and letters "1916" and "Ohio" are in white.

### BAY STATE REGISTRATIONS 9,437

Boston, Mass., November 16.—Motorcycle registrations this year up to the first of November have reached 9,437. For the same period last year there were registered 8,095 motorcycles.

### FAVOR DIXIE HIGHWAY

Cincinnati, Ohio.—A big delegation of Cincinnatians, including members of the Chamber of Commerce, Business Men's Club, Rotary Club, Automobile Club, Hotel Men's Association, and other business and civic organizations, went down to Knoxville, Tenn., on Sunday night, to attend a meeting of the people of the counties in southeastern Kentucky and northeastern Tennessee in the interest of the Dixie Highway. Cincinnati people are determined to do all in their power to insure a clear road through the South.

# Our Canadian Letter

## NO CHAMPIONSHIPS THIS YEAR IN CANADA

TORONTO, Ont.—President Jack Scott of the Canada Motorcyclists' Association has announced that no motorcycle championships of any kind were held in Canada this year, and that no titular races will now be staged because of the lateness in the season. In other words, the year 1915 has been passed over by the governing body without a single championship race. Two or three months ago negotiations were started for the holding of the Canadian meet at Windsor, where there is a fine mile track, and later at Galt, Ontario, but the preparations never came to a head. Snow has already fallen in Manitoba, so that no more races can be held in the Middle West.

Alderman Louis Rubenstein of Montreal, president of the Canadian Wheelmen's Association, recently visited Toronto to confer with local officials of the bicycle organization. All but one of the Canadian titles for 1915 were decided, the exception being the ten mile event which should have been staged on the Toronto saucer. The cyclists quit this track, however, before this race could be staged.

The latest bicycle star to join the colors is Joe Harris of the Classic Athletic Club, who has enlisted as a mechanical transport driver in the Imperial forces.

Two prominent local bicycle racers, Norman Webster and C. Coleclough, enjoyed their first taste of military despatch riding when they were ordered to ride twenty miles over a rough road at dead of night in order to deliver an important message. These men are attached to the new bicycle corps of the 109th Regiment.

## 4 MILES PER HOUR LIMIT

Brantford, Ontario, Nov. 1.—The local authorities recently took the Provincial law into their own hands by enacting a by law with respect to the speed of motor vehicles contrary to the Ontario code. This was bad enough, but the regulation passed was ridiculous inasmuch as the local speed limit was placed at four miles per hour. Thirty-five motorists, including a number of motorcyclists, were summoned to appear in court but the magistrate dismissed every case. The law has been declared ultra vires and the Brantford city fathers will have to see the automobiles and motorcycles travelling at the rate of 15 miles per hour through the local streets.

## RUFFLE GIVES UP BUSINESS

Vancouver, B. C., November 12.—R. A. Ruffle, who but a few months ago opened up a fine cycle store on Granville street, Vancouver, has now deserted the Terminal City and migrated to Victoria, having bought out a cycle business already established there.

## LOOK FORWARD TO BIG SEASON

### Sales Are Already Moving Well in Toronto and Dealers Agree That Prospects Have Rarely Been Brighter; Some Trade Brevities.

TORONTO, Ontario.—Almost every feature of the motorcycle trade in Canada already indicates that rip-snorting business is to be enjoyed during 1916—in fact the 1916 season has already arrived. Judging by the prospects for 1916, it is apparent that a number of good openings for agents in Toronto and elsewhere are available, especially as several prominent American makes of motorcycles are not now represented. These include the Thor, Pope, Dayton, Reading Standard and other agencies for the city of Toronto.

None of the new lightweight models has yet been seen in this center, but a fairly large number of the regular 1916 models have already passed over to "consumers." Last Saturday afternoon, Percy A. McBride, the Excelsior and Henderson distributor, sold six new machines. H. M. Kipp is doing very well with the Indian, while Walter Andrews is finding himself overworked in demonstrating the Harley-Davidson and Merkels. McBride also reports a boom in Hendersons, this make having become popular since the short-coupled model and the low prices were introduced.

Herb Kipp is on the road through Ontario for the Hendee interests, while Harold Pratt is travelling the country to stir up the Excelsior trade.

Mr. L. D. Hardin, general manager of the Westfield Manufacturing Company, Westfield, Mass., recently made a business tour through Eastern Canada for the purpose of looking over the field for the Pope. He spent several days in both Montreal and Toronto in order to call upon the whole trade.

Another prominent visitor in Toronto is Fred St. Onge, the former vaudeville star, who is now travelling for the A. O. Smith Company, Milwaukee. He is here to make agency arrangements for the Smith Motor Wheel for 1916.

A sign of the times is that Sturgess Bros., of Hamilton, who formerly handled English motorcycles, including the Matchless, have contracted with McBride to sell the Henderson in Hamilton and vicinity.

An important local change is that Douglas E. MacVannel, advertising manager of the Canada Cycle & Motor Company, Limited, has left that firm to go into the poster business.

## HAMILTON HAS A VETERAN CYCLIST

HAMILTON, Ont.—This city boasts of a real bicycle veteran who is still very much in the ring in spite of his advanced years. This man is J. Marshall, who lives on the mountain near Hamilton, and who has been riding a bicycle almost every day in the year for the past two decades. Marshall is considered to be very wealthy, inasmuch as he is the sole owner of several valuable fruit farms, market gardens and oil fields, yet he uses nothing but a bicycle for transportation purposes, although he is well over the half-century mark in age.

During the past twelve months Marshall has ridden his bike in all kinds of weather for a total of over 9,000 miles. One day, very recently, he pedalled from Hamilton to Bowmanville, Ontario, a distance of 80 odd miles, and he came home two or three days later in the same way. Not long ago a friend invited him to ride a few miles in an automobile to transact some business, but Marshall refused the invitation and used his bicycle to get to the offices where his presence was necessary. He is a familiar figure on the streets of Hamilton—in fact he has almost become one of the features of the city.

Another well-known bicyclist of Hamilton is W. Armstrong, the contractor, who looks after the installation of sewers here. He gets from place to place on his bicycle in order to inspect the civic work. He, too, is a fairly old man and in good circumstances.

## MILITAIRE IN CANADA

Chatham, Ont.—This city is all agog over the recent visit of representatives of a motorcycle manufacturing company in the States for the purpose of inspecting a local factory building in which to make the machine for the Canadian and British trade. The visitors were shown this plant, as well as several other sites, by President Westman of the Board of Trade and Aldermen Briscoe and Lowe. A definite announcement is expected in a few days. It is understood locally that the motorcycle in question is the new Militaire.

## HAMILTON RUN NOV. 20

Hamilton, Ont.—The Hamilton Motorcycle Club has arranged to hold its annual fall endurance run to Guelph and return on Saturday, November 20. The distance is very short, but the competitors will have to keep their eyes glued on speedometers and watches, because two secret controls have been arranged. The road between Hamilton and Guelph is good, and the distance is only about thirty miles, making the total run only sixty miles, therefore it will not be a real physical test for rider or an endurance grind for the machines.

# "You Sold My Friend A Pope-made Bicycle. I Want One Too."

That's what a customer said recently to a Pope dealer.

Pope
Bicycles and Motorcycles

It's just this sort of friend-to-friend recommendation that makes the handling of a full line of famous Pope-made bicycles so invariably profitable for the dealer.

A great bicycle year is ahead. The verdict of those who know is unanimous that 1916 will see unprecedented bicycle sales. You are not going to let the other fellow beat you to the profits.

Columbia—Crescent
Rambler—Tribune
Cleveland—Pope

You will carry bicycles that are known the world over for the quality of their workmanship—superb endurance, durable satisfaction—the bicycles that carry with them Pope reputation and all that this reputation means to dealer and customer alike. There's much to interest you in our dealer proposition. Write for it. It's easier to sell bicycles with a reputation than—the other kind.

We have a good proposition on motorcycles, too. Enough models and so wide a range of prices that everybody must be pleased.

Now is the time to stock up for the big Christmas trade which is bound to come and to get all the business in sight you must include our Juvenile Bicycles. Order early so as to have your stock on hand in plenty of time.

# IMPORTANT

## Every Dealer Should Read This Advertisement

With over one million bicycle riders in the United States alone and practically each one a Lightweight Motorcycle prospect, besides enormous prospects of people from every stage of life who are not yet riding "Two Wheelers."

Mr. Dealer, your volume of sales must come from these sources and to assure a share of this immense present and future business, it is necessary to handle Lightweight Motorcycles that are made right and with best equipment.

We are directing these remarks to you, Dealers, who handle Belt-driven Lightweight Motorcycles. *You* know and have known that SPARTAN MOTORCYCLE BELTS have been standard equipment for the past 6 years—over 90% of the Belt-drive Motorcycles using SPARTAN BELTS.

Most of the Lightweight Motorcycle Manufacturers recognize the SPARTAN quality, which means best service in all weather conditions and maximum of mileage.

WE POSITIVELY GUARANTEE GREATER MILEAGE WITH *SPARTAN* OVER ANY OTHER MAKE OF MOTORCYCLE BELTS.

***Mr. Dealer, it is to your business interest to specify and insist on SPARTAN equipment on your Lightweight Motorcycles.***

Belt Drive advantages—greater mileage and less wear on motor and tires—a cleaner, smoother, and noiseless transmission.

# The Lights of a Motor Car On Your Motorcycle

All the light you can want, steady and brilliant as an automobile headlight, that makes riding at night as pleasurable as in the daytime, and removes all possibility of danger from unseen obstructions.

Turn a key and be on your way as carefree as if speeding along a boulevard at noon.

# REMY

## Motorcycle Lighting-Ignition System

is built and guaranteed by the same company that has for years built ignition and lighting equipment for a number of the country's leading automobiles. The success of the Remy system, proven by tests on thousands of thousands cars, is inherited by the motorcycle equipment and proven by thousands of riders.

Every rut in the roughest road shows clearly as in the daylight, and the system is unaffected by the severest jolts and jars; the battery cannot spill and the bulk of the machine is actually reduced.

Operates head and rear lights, horn, and insures strong reliable ignition, no matter how unfavorable are the conditions.

A demonstration on a Harley-Davidson will convince you.

# Cleveland

## 2 STROKE 2

# Easiest To Sell

You don't have to look farther than this page to understand fully just why the Cleveland should be the easiest motorcycle to sell.

Our big production, made possible by unlimited manufacturing facilities and financial resources, have enabled us to build a sturdy, substantial motorcycle of an advanced type and yet sell it at the remarkably low price of $140.

The price alone is a real selling point.

But the one big fact that you can't get away from is this:

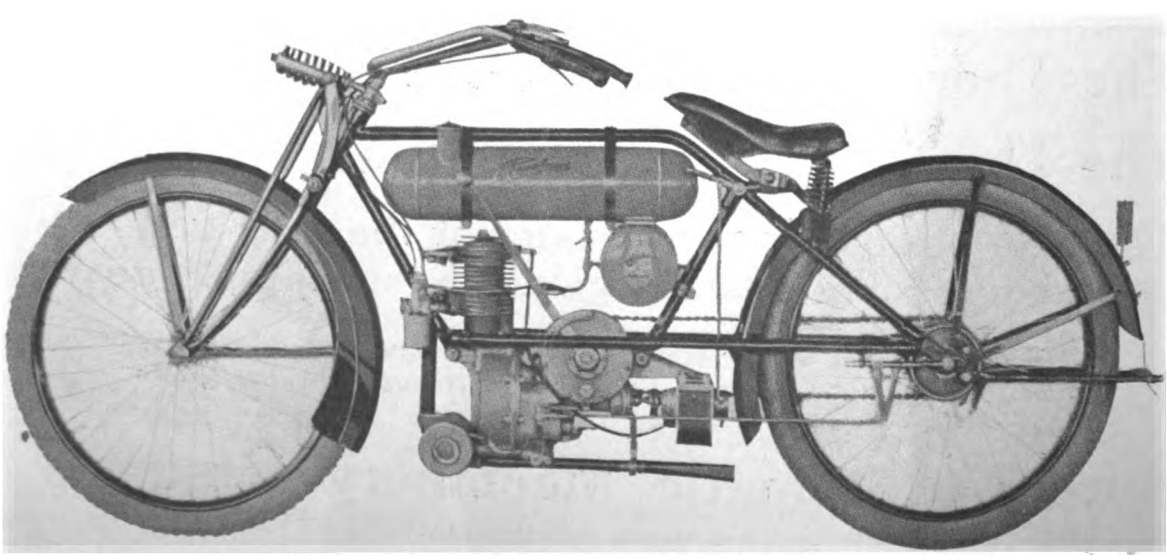
***The Cleveland is a real high grade motorcycle in every sense of the word.***

In design and construction it is not equalled.

In equipment it is absolutely complete.

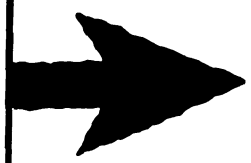
Read over the following accessories found in the Cleveland:

Eclipse Multiple Disc Clutch (optional)
Brown Barlow Carburetor
Coventry Chain
Drop Forged Frame Fittings
Bosch Magneto
Troxel Truform Saddle
Full Ball Bearings
Aluminum Castings



Mention of MOTOR CYCLE ILLUSTRATED is always appreciated by advertisers.

Digitized by Google



**$140** With Sliding Jaw Clutch

**With Multiple Disc Clutch $10 Extra**

# You Keep The Profits

And, once sold, the Cleveland stays sold.

You don't have to use up your profits in service and free repair work.

Real performance on the road has proved beyond doubt that the Cleveland has the strength, power and endurance to withstand good, hard use under all conditions.

Dealers, jobbers and riders who rode the Cleveland demonstrator at the Chicago and New York Shows pronounce it to be ***fully a year ahead of anything else in the field.***

Here are some of the advantages found combined only in the Cleveland.

**Two-Stroke Valveless Motor**
Explosion at every revolution. Smooth — silent — economical. Runs like a "twin."

**Direct Drive Magneto**
Also eliminates set of sprockets and chains. Positively the highest type of motorcycle ignition.

**Worm-Driven Countershaft**
Eliminates set of sprockets and chains. Adds much to smoothness of operation.

**Unit Power Plant**
All moving parts enclosed in dust-proof casings. Clean—simple—accessible.

**Two-Speed Transmission**
Makes the Cleveland easy to handle in dense traffic. Enables it to climb steepest grades with ease.

Write today for catalog and complete particulars.

SKF Ball Bearings Reduce Friction

No matter at what speed—uphill or down dale — over rugged roads or smooth macadam — SKF Ball Bearing-equipped motorcycles give efficient service. The double row of Swedish crucible steel balls, solid piece retainer, and more important than all, the self-aligning feature, is an efficient sales clincher every time. Look for SKF Ball Bearings on the crank-shaft, on the three-speed gear and on the wheels. Their presence is a sign of quality.

# "Six Inches of Snow Don't Hinder The Smith Motor Wheel or Motor Wheel Sales"

THAT'S what a far off dealer wrote in during the winter of 1914. And this winter, with the Smith Motor Wheel thoroughly established, after a most wonderfully successful first year, winter sales will be more than doubled. Right now we are filling orders for ten, twenty and even forty and fifty machines. Dealers are selling Motor Wheels in the cold of winter, and at the same time developing early Spring Trade, which promises to be enormous.

**Smith Motor Wheel**

Detachable

*"The Bicycle Booster"*

100 Miles On A Gallon Of Gasoline
Speed Up To 25 Miles An Hour

**List Price $60 F. O. B. Milwaukee**

The cold, ice, snow and sleet know no terrors for the strength, power and durability of the Smith Motor Wheel—and its wonderful performances on winter laid streets positively prove to prospects its worth and worthiness. Get started now on your Smith Motor Wheel business. Introduce the Motor Wheel in your locality now. Bridge that gap of an otherwise dead season with Motor Wheel sales, bicycle and accessory sales that go along. Make this winter a profitable one for you, not a loss. Take on the Smith Motor Wheel now. Christmas is coming, and the Smith Motor Wheel with a bicycle is this year's Christmas gift. There is no stop to the present possibilities of the Smith Motor Wheel business—and now is the right time to get started for spring.

WRITE to us for the 1916 Profit Proposition to Dealers. It will obligate you in no way —and will let you know all about our 1916 offer. Tell us the lines you handle and the size of your business. Address

# T THIS!

# BECAUSE we backed up the early show with early delivery, Harley-Davidson dealers have been able to increase their early season business beyond all expectations.

## We are now making immediate deliveries on all models and also on side cars and side vans.

**Harley-Davidson Motor Co.**
**Milwaukee, Wis., U. S. A.**

Harrisburg, Pa., Nov. 8th, 1915.

Harley-Davidson Motor Co.,
Milwaukee, Wis.

Gentlemen:—

Referring to the enclosed orders, wish to have you note the following on same:

No. 11 for C. E. Early, 16-tooth engine sprocket.
No. 12 for C. G. Sollers, 16-tooth engine sprocket.
No. 13 for P. Currey, 14-tooth engine sprocket, sidecar motor.
No. 14 for R. Swails, standard motor.
No. 15 for E. Yost, 16-tooth engine sprocket.
No. 16 for Mr. Paul Brinton, 16-tooth sprocket.

This we find shows that last year we had one order in at this time against 15 this year, and eight sidecars this year against one last year (1915).

As the above shows, we are doing some sailing here in Harrisburg, but find that we are in need of machine and sidecar order blanks, at once.

Well, just landed No. 16, and still sailing.

Yours truly,
HEAGY BROS.
R. W. Heagy.

GEORGE T. DENCE
18 North Main St.,
Gloversville, New York.

Nov. 10, 1915.

Harley-Davidson Motor Co.,
Milwaukee, Wis.

Gentlemen:

Next year is sure to be a hummer as you can see that I have 17 machine orders and 11 sidecar orders in to date and last year by this time I had one machine and one sidecar order. My orders are all secured by substantial deposits.

Yours very truly,
(Signed) Geo. T. Dence.

# 1,000,000 Bicycles for 1916

## *It CAN Be Done*

How many bicycles could you sell in your neighborhood, if you really got out and *pushed* them?

Many, probably. Then why don't you get these sales?

You have simply let the automobile and motorcycle business scare you out. As a matter of fact, the automobile and motorcycle have taken only a small part of the former big demand for bicycles.

There is a bigger market for bicycles today than ever before existed. But dealers have refused to meet this growing need.

Bicycles are better made today. Prices are better. Roads are better. Tires are better. The bicycle business will thrive if we all get together and *pull.*

Display bicycles in your store. Talk bicycles. Believe in the future of the bicycle. Then watch your bicycle sales increase.

Bicycle sales used to walk into your store. Now you must get them back again. You can—we all can—if we simply get out and hustle.

Think this bicycle question over. Consider the sales you may be losing—and the profits. Write us today for the Goodyear plan for increasing bicycle sales. 1,000,000 bicycles can be sold in 1916—if we all help sell them.

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## PUTTING BAN ON OPEN MUFFLERS

### Sales Manager Arthur Davidson Is Waging Campaign for Silent Riding and Making Many Converts During Visit to Pacific Coast Dealers.

PORTLAND, Ore., November 18.—That his company is launching a national movement to eliminate from the ranks of motorcyclists the rider who likes to hear his exhaust bang-banging all day long was announced in Portland a few days ago by no less a personage than Arthur Davidson, vice-president and sales manager of the Harley-Davidson Motor Co. Mr. Davidson visited Portland on his annual coast tour and while here conferred with Perry Abbott, chief of the Motorcycle Supply Co., who stands sponsor for Harley-Davidson machines in this city.

"There is no doubt that one of the greatest problems confronting the genuine motorcyclist today is the elimination of the open-muffler fiend," said Mr. Davidson with vehemence. "The noisy rider is responsible for all of the prejudice that still exists against the motorcycle in the public mind, and stringent action should be taken everywhere to reform him. The incessant pop-pop of the exhaust is not only disagreeable to the ear, but it serves to give the erroneous impression that the motorcycle is shaking to pieces with vibration. Motorcyclists know that this is not true, but the non-rider is guided largely by first impressions, and he can hardly be blamed for believing that the machine is necessarily noisy when he sees and hears so many of them being handled in that way. About all we can do to correct this difficulty is to use moral suasion, and our company is systematically bringing pressure to bear—chiefly through dealers—to improve the situation.

"The argument that an open muffler is justified on the grounds that more power is obtained is hardly worth while," said Mr. Davidson; "for while a little more power is acquired through reducing back pressure in the muffler, the difference is so slight that it does not excuse the motorcyclist for creating annoyance."

"Are there any grounds for the argument sometimes heard that motorcycle riding injures a person's health because of the vibration?" Mr. Davidson was asked.

"None in the world," responded the Harley-Davidson official promptly. "It is possible that excessive riding might fatigue a person, but that is equally true of automobile driving, and more so of horseback riding. We know, to the contrary, that hundreds of motorcycle riders who are on the roads today would be in tuberculosis sanitariums or similar distasteful places but for the opportunity afforded by the motorcycle to get out in open air with a very small outlay. There are persons who will abuse any sport, but I am willing to place a wager that no motorcyclist can be brought to say that his machine has done anything but improve his health. Look at the wiry, athletic, sun-tanned men and women, boys and girls on the roads with their motorcycles and sidecars the country over and you will have the strongest kind of an answer to your question."

## 37 NEW INDIANS FOR LOS ANGELES POLICE

LOS ANGELES, Cal., November 20.—C. Will Risden, Indian distributor, has sold 37 Indian motorcycles to the local police department, C. Will being assisted in engineering the deal by Manager Butler, of the Risden store. Twenty-one of these machines will be Powerplus models for the speed squad, and 16 will be 4 h. p. Service machines. They will all be equipped with ABC generators and hand Klaxonets. The speed machines will have Warner speedometers.

Los Angeles has the greatest boulevard mileage, the fewest cops proportionately and the greatest number of motor speeders of any city in the country and the heavy purchase of motorcycles therefore comes as a notable triumph for the power two-wheeler.

## PLAN 200-MILE RACE AT PANAMA EXPOSITION

SAN FRANCISCO, Cal., Novembber 19.—A strenuous effort is being made to stage a two hundred mile motorcycle race on the mile track of the Panama-Pacific Exposition. Walter Collins, of the United States Tire Company's sales force, has started the ball rolling, while most of the jobbers and dealers in this city are favorable to the proposition. But at the same time they feel that the risk incident to the uncertainty of the weather at this time of the year should be carefully considered before any definite action is taken.

## PERRY SETS UP A NEW RECORD

### Excelsiorite Wins 100-Mile Race at Phoenix in 1:22:46 1-5; Don Johns Makes Spectacular Showing; 22,000 People Witness the Event.

PHOENIX, Ariz., Nov. 20.—Bob Perry, mounting his Excelsior, won the 100-mile race which closed the Arizona State Fair here today, and set a new record for the century on a circular flat track. The event was witnessed by about 22,000 speed fans, who divided their cheers almost equally between Perry and Don Johns, of the Indian camp, the latter leading till the 63d mile. At that point Johns stopped for gasoline, started again in fourth place, worked up to second and was making a sensational spurt after Perry when he fell on the last turn of the last mile. Johns was uninjured, but the spill put him out of the running.

Perry covered the 100 miles in 1:22:46⅕, thus lowering the record for the distance on a flat track, which was established at Detroit recently by Morty Graves on his Indian. Graves' time at Detroit for the 100 miles was 1:24:41⅗.

Dave Kinney, Cyclone, was in second place, with Bill Goudy, Excelsior, third. The riders named were the only ones out of eight starters to finish. Lorenzo Boido, Indian, was in fourth place when he stopped in the 98th mile for gasoline. Harry Crandall, Harley-Davidson, the only other Phoenix rider entered, did not start because of injuries sustained in the road race on Monday.

Don Johns took the lead at the start and made the first mile in 49 seconds. That was his average for the first 60 miles. In the 21st mile Johns and Ray Creviston were far in the lead when Crevy's fuel pipe broke and his Indian caught fire. Frank Montgomery, Excelsior, went out with a leaky gasoline tank in the 33rd mile. Morty Graves was well in the rear owing to the fact that he did not succeed in getting his 8-valve Indian to hit right at any stage of the game. He was flagged down after the finish.

Perry's Excelsior was equipped with Bosch magneto, Schebler carbureter, Renold chains and Goodyear tires.

# FIRM TO BOOM FOREIGN TRADE

### Company with $50,000,000 Capitalization Will Develop Overseas Market—F. A. Vanderlip, of S. K. F. Company, Is Chief Organizer.

A $50,000,000 company has been formed to develop the foreign trade of the United States, according to an announcement which was made on Tuesday, November 23, by the National City Bank, of New York, whose president, Frank A. Vanderlip, a director of the S. K. F. Ball Bearing Co., is the organizer of the new company. Back of it are said to be the most powerful banking interests of the country, and men who have made a success in foreign fields. The purpose of the company, which has not yet been given a name, will be to carry American capital into foreign countries and to open the markets of the world to American products. Charles A. Stone, of Stone & Webster, Boston, Mass., will be president of the corporation.

### READY FOR TRADE LUNCHEON

Chairman W. J. Surre announces that arrangements have been practically completed for the luncheon to be given at the Hotel Astor, New York City, January 6, in connection with the meeting of the accessory and parts men and the motorcycle manufacturers. At this meeting a committee will be appointed to take charge of plans for the annual summer convention of the Cycle Parts Industries.

### FIRST THREE BOSCH-EQUIPPED

The original telegraphic report on the recent Tucson-Phoenix road race stated that Lorenzo Boido, the winner, had used a Dixie magneto on his Indian, but a later statement brought out the fact that Boido's machine was Bosch-equipped. Under these conditions, the first three places go to Bosch-equipped machines.

### GOODRICH BRANCH MOVES

Nashville, Tenn., November 22.—Manager Fornof, of the local branch of the B. F. Goodrich Company, has announced that the sales and stock rooms will be moved from 908 Broadway to 902 Broadway on January first.

### TO INCREASE CAPITAL

Newark, N. J.—The Hyatt Roller Bearing Company, of this city, will shortly increase its capital from $400,000 to $600,000. Extension of the firm's business has made this necessary.

# BID BON VOYAGE TO ERWIN BAKER

### Friends Give "Cannon Ball" a Royal Send-off as He Departs for Australia on the Sonoma—What Baker Hopes to Do in the Antipodes.

SAN FRANCISCO, Cal., November 19.—Waving a cheery goodby to a party of admirers who had assembled on the dock, last Tuesday, to bid him bon voyage, Erwin G. Baker, the "Iron Man" of the motorcycle world, departed at 2 o'clock that afternoon on the liner *Sonoma* for Australia, seeking new laurels as annihilator of time and distance.

Before climbing the gang-plank of the steamer which is to take him half way round the world, Baker made this statement to a representative of **Motor Cycle Illustrated:**

"I am making no rash prophecies regarding what I expect to do in the Antipodes. Of course, I don't know what sort of a game I am going up against as regards road and weather conditions at this time of the year. Indeed, I really don't know much about what Mr. H. Rhoades, the Hendee representative in Australia, has mapped

OUR CANADIAN LETTER ON PAGE 36 IS BULGING WITH FRESH TRADE NEWS

Digitized by Google

ut for me, except that I've been informed hat I am first to try to beat the best time nade by train between Sydney and Mel-)ourne. I don't even know what the dis-ance is between the two cities, but I have )een told that a fast train makes it in 17 iours, so I judge that the distance is be-tween 600 and 700 miles, allowing for the same rate of speed as is made by railroads in this country.

"I am due to arrive in Sydney on December 6 and from there I will go by train to Melbourne. I shall want to get my land legs after the long ocean voyage and become a bit accustomed to the climate before I go after any records, so it will be about Christmas before I make the try for the Sydney-Melbourne record.

"My next undertaking will be a run of 1,200 to 1,500 miles, following which I shall try other records. I am to ride in North and South Australia and New Zealand, but aside from the two events referred to, I am not familiar with the details of the other rides I am to make.

"As I said before, I am taking no chances on not having equipment or parts enough to carry me through. I am taking along extra parts, an extra motor, 12 U. S. tires—nobby and corrugated—and 20 inner tubes. Besides that I have with me 30 dozen films for my kodak, which I expect to make good use of.

"Of course, you know, I am to ride a 1916 3-speed Indian, using the Powerplus motor I made the three-flag record with; and if anything goes wrong with it I will have the extra motor to fall back on.

"I figure that when I get back to Springfield, Mass., again, which I expect will be some time next April, I shall have traveled between 30,000 and 35,000 miles, taking into account all my travels, including rail trip from Springfield to San Francisco and return, the round trip across the ocean and my mileage rolled up on the two-wheeler. That will be going some, won't it?

"I haven't decided just what I will attempt to do in the Hawaiian Islands, where I will stop on my way home from Australia. I expect to lay over in the islands for about a week and probably will attempt some record-breaking stunt there. I plan to live at the Hawaiian Islands about March 15 next."

# 10-DAY WELCOME IN CANADA NOW

**Ottawa Customs Officials Pass Amendment for Reciprocal Treatment of Visiting Motorcyclists; No Charge for a Ten-Day Tour in Dominion.**

OTTAWA, Ontario.—The Customs Department at Ottawa has just granted to the United States motorcycle tourists who desire to enter Canada a privilege hitherto denied them, although Canadian riders have enjoyed the privilege in the States for years past.

By an amendment to the rule governing the admission of motorcycles into the country, temporarily, it is provided that a non-resident owner of a motorcycle manufactured outside of the country may be granted a permit for a stay of not more than ten days. plication and file a bond, costing $5, with the Government officials at the border.

The abolishment of this red tape is expected to have the effect of encouraging far more international touring by residents of the United States. The change in the rule came very unexpectedly.

## TO LOWER GEORGIA TAX

ATLANTA, Ga., November 22.—That the tax on motorcycles in the State of Georgia will be reduced from $5 to 2 seems assured by the action taken by Governor Harris in calling an extra session of the legislature, that has convened to consider a number of bills among which is the Automobile Tax Bill, incorporating a clause relative to this reduction in the motorcycle license. A canvass of the members of the legislature now in session showed that the majority were in favor of lowering the motorcycle license fee to $2. The Governor is also very much in favor of the measure, having already assured Mr. Gus. Castle, the F. A. M. Southern Director, that he would affix his signature to the bill as soon as it passed through the senate.

## READING PRIZES AWARDED

READING, Pa., November 22.—Prizes were awarded last week for the high scorers in the recent 182 mile "Clover Run" which was held by the Reading Motorcycle Club. The list of prize winners is as follows: James Dunkle, 958 points, first, speedometer, offered by Keyser Fry; Alfred Eisenberg, 944 points, second, tire; Paul Maurer, 880, third, tire, Robert DeHart, donor; Ellis Landis, 710, fourth, tire, Penn Motorcycle Company, donor; A. Hettinger, 475, fifth, coat sweater, John G. Nuebling, donor; George Dengler, 228, sixth, horn, William Buel, donor; William Buel, 191, seventh, $5 in cash, Perkiomen Motor Company, donor; Raymond Fritz, 177, eighth, inner tube, William Buel, donor; Harry Souders, 149, ninth, dollar bill.

### AFTER SHORT MEASURE MEN

Columbus, O.—Vigorous steps are being taken by T. L. Calvert, chief of the dairy and food department of the Ohio Agricultural Commission, to stop the practice of giving short measure in the sale of gasoline. The steps are being taken in answer to complaints of users who claim that many small garages and store keepers are not giving full quantities in their measuring devices. The penalty for such practice is $500 fine and six months in jail on conviction.

### WILL SOON BE IN NEW GARAGE

Manistee, Mich.—Henry C. Sells, local Harley-Davidson dealer, will soon be installed in his new garage. The building measures 60 by 140 feet and will be completely equipped to care for automobiles as well as for motorcycles, as Sells holds the representation for several makes of four-wheelers, also. A specialty will be made of complete overhauling jobs as well as of general repairing.

### HOLD THANKSGIVING TOUR

Sheboygan, Wis., November 23.—The motorcyclists of this city planned on spending Thanksgiving day in a tour of the surrounding cities. The trip was arranged by Elmer Herman, Albert Goedecke and Fred Schmidt.

Digitized by Google

# On the Pacific Coast

## FRISCO CLUB ON RUN

SAN FRANCISCO, Cal., November 19.—The members of the San Francisco Motorcycle Club held a run to Moss Beach last week, which was enjoyed by a big turnout of riders. The course led out to Mission and Colma, thence via the new Point Pedro Boulevard to the beach. Scenery of surprising beauty was met almost as soon as the city streets were left behind. The road took the Frisco club riders over hills and down dales, through long winding valleys, around lakes and finally to Moss Beach, where the fellows went in for a swim. After lunch the party broke up into two groups, each following a different course home.

## SHOW FOR SACRAMENTO

SACRAMENTO, Cal., November 19.—This city is to have a separate motorcycle and bicycle show. F. M. Woodson, state referee for the F. A. M., with headquarters here, was in San Francisco recently to see jobbers for the purpose of enlisting their support in the project. It is Woodson's plan to make the show a three-day proposition, beginning on a Friday and ending on a Sunday night. The middle of December is favored as the best time to hold a show. According to the plans now formulated, the Travelers' Hotel will be the scene of the exhibits, and a grand ball will be given on Saturday night in the ballroom of the hotel.

## AGREE ON CLOSING HOURS

SAN FRANCISCO, Cal., November 19.—San Francisco motorcycle and bicycle dealers have come to an agreement on the subject of closing hours for their establishments. All the salesrooms and the repairshops are to be closed hereafter at 6:30 p. m. on weekdays, except Saturdays, when the closing hour will be ten o'clock. Stores will be closed the entire day on Sunday. The agreement has already gone into effect and everyone seems to be satisfied.

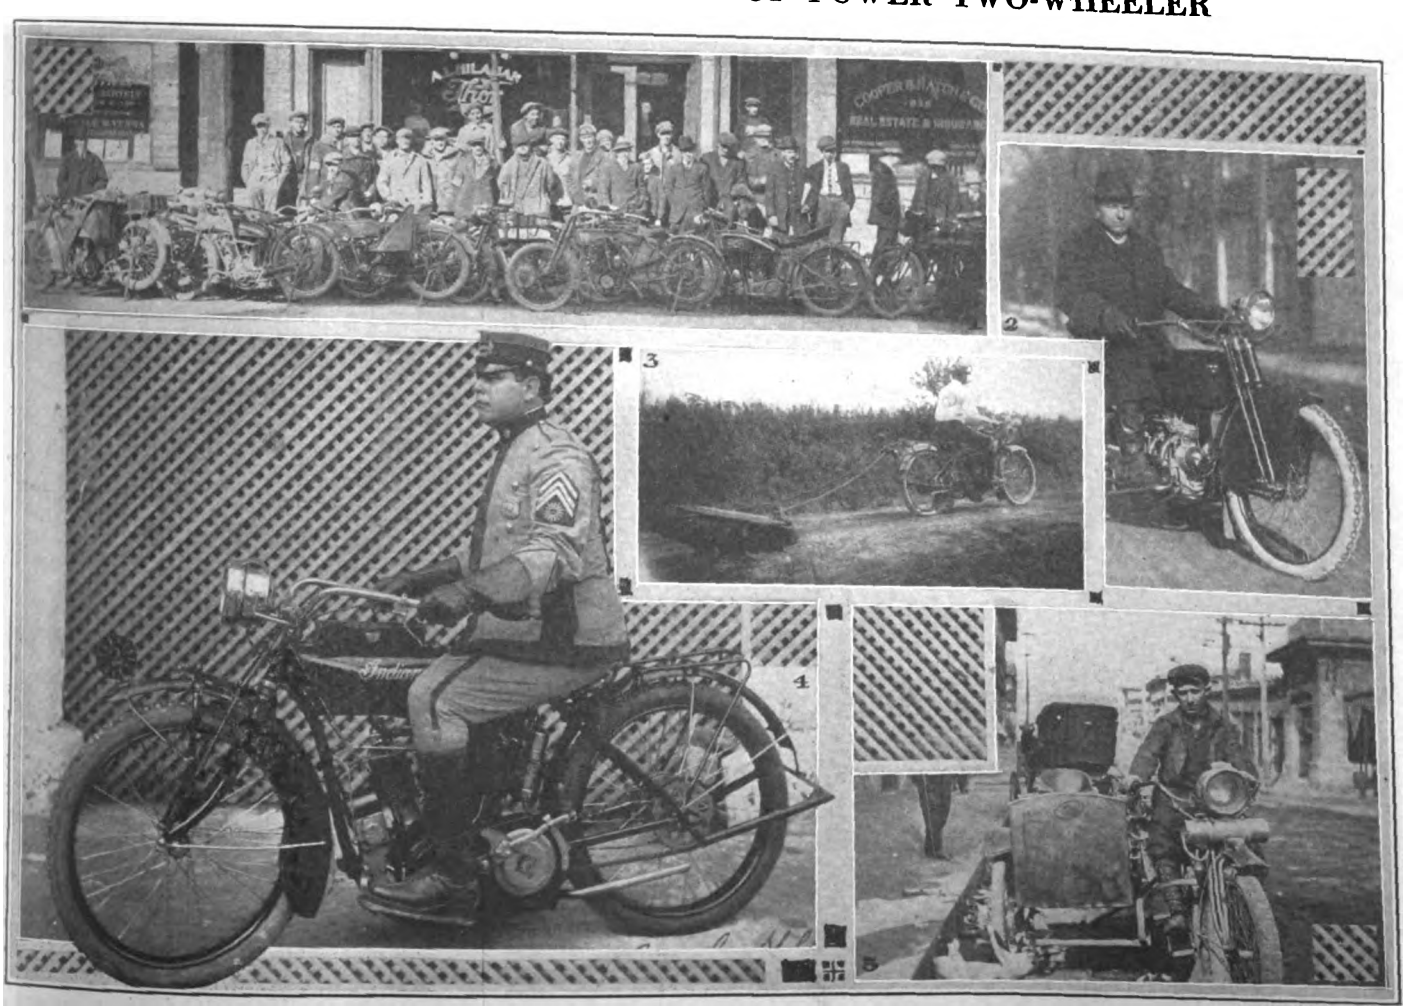
## HANDLING FIRESTONE LINES

Los Angeles, Cal., November 15.—Firestone bicycle tires will hereafter be handled on an exclusive basis in California and Arizona by the Appeal Mfg. & Jobbing Co., of Los Angeles, with a branch in San Francisco. Manager E. E. Welborn states that the company has handled Firestone motorcycle tires for some time past and will continue to do so, but not exclusively. The Appeal company will not handle any special brand tires in future; it feels that it gives the dealers better returns by selling a staple line of products that are backed by a solid organization and well advertised.

## THEY EARNED SUCCESS

Los Angeles, Cal., November 15.—Improvements which have been made in their establishment by Minyard & Boon, of Anaheim, show what a money-maker the motorcycle is for bright young fellows who are willing to get out and hustle. Two years ago, when Arthur Davidson was in California, he found them plugging along with a little repair shop and sized them up as comers, but at that time they could not take on the Harley-Davidson agency. A year later E. E. Welborn, of the Appeal Manufacturing & Jobbing Co., made it possible for them to get a start and carry a limited stock of 1915 machines. They

## DEMONSTRATING VARIED USES OF POWER TWO-WHEELER



**1, Riders in Front of Headquarters of A. L. Hilaman, Thor Agent, at Camden, N. J.; 2, Father Depeu, of Belgian Catholic Church in Detroit, Who Makes Parochial Calls on His Henderson; 3, Emblem Rider Aiding in Good Roads Work; 4, Sergeant Alvarez, Police Traffic Chief of Havana, Cuba; 5, Sidevan Outfit Used by Roanoke Railway Co., of Roanoke, Va.**

Digitized by Google

burned up the roads on the demonstrators chasing prospects, and the result was they put in 18 machines and now have a store that is in good shape, a nice stock of merchandise screened off from the shop, a beautiful cabinet for accessories, and a flourishing trade drawn from territory for quite a number of miles around.

### SWANSONS MAY TAKE AGENCY

Livermore, Cal., November 20.—Swanson Brothers, who have just opened a motorcycle and bicycle repairshop here, have been visiting the San Francisco jobbers for the purpose of purchasing a general line of supplies. They will conduct a cycle repair business here and may later decide to take the agency for some leading line of motorcycle and bicycle.

### LOUDENLOS TAKES R-S AGENCY

San Francisco, Cal., November 19.—Ed. Loudenlos, the hustling young motorcycle dealer who a few months ago came from Pasadena to start a distributing agency for the Cyclone, has taken a new partner, E. J. Angwin, and the name of the company has been changed to the Motorcycle Sales Company. An agency has recently been taken for the Reading-Standard motorcycle. The salesroom and repairshop will be maintained at the present quarters, 1506 Market street.

### MOTOR WHEEL IS ECONOMICAL

Los Angeles, Cal.—The Pacific States Telephone & Telegraph Company have had Smith Motor Wheels in service five months. Each month a report of maintenance cost for each machine is rendered. For the last month the following report covered one of the machines: Gasoline, 95 cents; lubricants, 75 cents. Total, $1.70; number of days in use, 24; average daily mileage, 40; cost per mile, gasoline, $.0078; cost per mile, lubricant, $.0078; miles per gallon gasoline, 96; miles per gallon lubricant, 548.5. Lubricating oil on the coast costs 42½ cents per gallon; gasoline costs 9½ cents per gallon.

**Upper Picture Shows Jose Reina, Who Took Third Place, Ready to Start from San Sebastian; Lower Picture, Agent Antonio Vildosola, Winner, in Saddle**

## SPECIAL JOBBING CONDITIONS IN LOS ANGELES

LOS ANGELES, Cal., November 15.—"The volume of our sundry business is very large, in fact almost abnormal, but I don't mind saying that prices are all shot to thunder," said the sales manager of a big jobbing house in Los Angeles to the correspondent of **Motor Cycle Illustrated**.

Jobbers who have been in the field for some time are out meeting the competition of newcomers in the field who attempt to gain a market by cutting prices. Retailers have passed along the cuts to the public and the situation became so serious that one or two retailers, who refused to come down on their prices, were forced out of business in outlying towns. People who are most experienced in the trade, including representatives of manufacturers, who visit the city, are criticising the situation unfavorably. At the same time some of the jobbers have information which leads them to believe that some representatives of manufacturers are secretly encouraging the situation in unseemly haste to get the present volume of business, whatever the burden it puts upon the jobber, who is obliged to sell it without profit. As they "have the goods" on some of these men, when the situation is cleared up it is likely that their firms will have to do some explaining or send new faces into this territory.

### GETS CARLOAD OF BICYCLES FOR CHRISTMAS TRADE

San Francisco, Cal., November 19.—A carload of bicycles—357 machines, to be exact—has just been received by Edwin F. Merry, the local distributor of the Excelsior line of motorcycles and bicycles, and another carload is expected within ten days. These silent two-wheelers are intended for the Christmas trade, which, according to Mr. Merry, promises to be very satisfactory. Samples of the entire "X" line have been received here and the first carload of powered machines is expected by December 1.

### GLASGOW'S STOCK COMPLETE

Tacoma, Wash.—W. P. Glasgow, local Harley-Davidson distributor, now has a complete stock of supplies and accessories, having been able to purchase in quantities from Eastern manufacturers. He has issued a six-page folder on supplies and accessories, and has mailed a copy to each rider in Pierce county, along with a 1916 Harley-Davidson catalog.

### FRISCO M. C. TO DANCE

San Francisco, Cal., November 19.—Two big events are planned by the San Francisco Motorcycle Club for the first week of December. A social night will be held on December 2, and a monster dance on December 4. A "blind" run is also on the club's schedule for the near future.

### DAY NOW HAS INDIAN

Tacoma, Wash.—Ray Day, long known as Flying Merkel distributor for this section, has secured the distribution for the Indian for 1916. He held the record of having sold more Flying Merkels than anyone in the Northwest during the last four years.

## LINE FORMS AT THE RIGHT!

THERE are strong indications that the steaming gobbler depicted above will prove to be one of the fattest and most toothsome birds ever carved for American motorcycle dealers, but it stands to reason that those who come first will receive the most appetizing cuts. This is simply another way of saying that dealers who canvass their districts early and file their orders with the factories at once will get the quickest returns and therefore be enabled to obtain the greatest possible percentage of 1916 business.

Don't lose time in responding to the bell. The 1916 bird is a big one and frilled up to tickle the palate of a king, so it will pay every dealer to sit in without delay and make the most of the season. It goes without saying, too, that every diner will get just what his energy and initiative entitle him to.

## ST. LOUIS GASOLINE RATES GO AEROPLANING

ST. LOUIS, Mo.—Three one-cent increases in the retail price of gasoline within eight days have established a new record in this city. On November 15 the Standard Oil folks raised the price of Red Crown gasoline from 11.9 to 12.9 cents. Next day the independents boosted the price of No. 3 gasoline to 12.9 cents and the tank wagon price was raised from 13 to 14 cents. On November 22 the filling stations raised the price to 13.9 cents and the independents went one better by putting the price up to 15 cents. About the same time the filling stations put some of the better grades of gasoline up to 15.9 and No. 1 gasoline up to 17.4 cents a gallon. All prices apply to 10-gallon lots. Four months ago gasoline sold here for 8.9 cents a gallon. The present juggling with the market has brought on a Federal investigation.

### WALKER'S SIDECAR TIRE

It was erroneously stated in a recent issue that Walter F. Walker, the Weed Chain Tire Grip Company's traveler, had used a Diamond non-skid tire on his sidecar during his recent business trip through fourteen states. Walker's sidecar tire was a smooth-tread Diamond. He did not use non-skid tires at any time during his trip.

### HENRY—HASSETT

Buffalo, November 24.—Mary Cecelia Hassett, daughter of John and Mrs. Hassett, of this city, today became the wife of John William Henry, of the Vim Cycle & Hardware Company. The wedding ceremony was performed this morning at St. Stephen's church.

### WESTFIELD COMPANY'S INCREASE

Advertising Manager Starr, of the Westfield Manufacturing Company, reports that the company is doing a very much larger business in both motorcycles and bicycles than was experienced for the same period last season.

### ROTH TO RETIRE

Altoona, Pa.—George Roth, local agent for the Pope and well-known dirt track rider, is going to give up his motorcycle business in this city, owing to his approaching removal to California. Roth was record-holder for the local track for years and also won every motor-sled race in this section of the State. His many friends will be sorry to hear of his departure.

### "LIKE A STRETCH OF AMESITE"

**"I have left the motorcycle business (Indian Motors Co., in Perth Amboy, N. J.) and taken up the study of medicine, but I like to get my Motor Cycle Illustrated anyway. It's like a stretch of amesite boulevard in the course of the day's work to have it come."**

# MOTORING IN THE PICTURESQUE REALM OF THE MIKADO

## What a Tourist Saw from the Saddle of a Motorcycle

By Major George H. R. Gosman, U.S. Army

A TRIP of many miles in Japan on a trusty motorcycle is like whirling through an enchanted land. Especially is this true when one has made a study of the history and customs of the wonderful little Japanese, for the tourist in his travels finds everywhere places of peculiar interest which link the present with a majestic and mystic past. I rode through nearly the whole of the old Tokkaido on my Indian last year, and haunted the historic reliques of the old days of feudalism and the Daimyos, as the feudal lords were called, though I did not neglect the splendid opportunity I had of becoming well acquainted with the courteous and kindly Japanese of the rural sections.

### His Honorable Self Starts Out

Having already walked through a greater part of the beautiful district where my machine was about to carry me, I realized that the early days of November were ideal for the trip both as regards weather and the scenery. So after overhauling my motor, and getting my Jap servant to strap on the luggage carrier all the necessary equipment, I set out from Tokyo, with the city of Kyoto as my destination. My little Jap valet bowed me out of the garage with a very humble, "Be careful of your honorable self and come back to your worthless servant safely," and I was off.

Experience had shown me that it was most wise to start out early in the morning in order to avoid the traffic. In most parts of the city of Tokyo there are no sidewalks, with the result that the women and children use the middle of the thoroughfares to the great discomfort of motorists. Indeed, to ride from Tokyo to Yokohama without getting into some sort of trouble would be a veritable miracle; everyone seems to get right in front of your machine, and though you toot your horn and shout at the top of your lungs they will remain right in your way as if rooted to the ground. I once asked an intelligent-looking old Jap why some of the children, instead of staying at the side of the road when they saw me coming along, always insisted upon rushing past the two-wheeler, and he told me that the kids became frightened at hearing my horn and wanted to flee home to their mothers for safety.

### The Historic Tokkaido

I sped on through the outskirts of Yokohama by way of Kanagawa without any delay, and soon reached the first part of the Tokkaido, when the roads became a bit rough, but being accustomed to such going I was nevertheless able to open my throttle and go sailing past Hodogays, Totsuka and other places of special interest. Now the roads became like boulevards and all the way from Kodzu, delightful scenery broke into view on either side of the road. Riding on the Tokkaido recalls vividly to the tourist's mind the history of bygone days, when this thoroughfare was one of the mainly traveled routes that led from Kyoto, which was formerly the capital of Japan, along the sea shore in an easterly direction to Tokyo, the present capital. Back in the seventeenth century this highway was

Major Gosman's Little Japanese Servant

traversed twice a year by the serfs and followers of the feudal lords, the Daimyos, these occasions being the great events of the year when much pomp and ceremony were in evidence. Thus you can understand that the Tokkaido must have been a very busy thoroughfare with its many pedestrians, palanquins and their attendants, to say nothing of the hundreds of conveyances of the poorer classes. What a wonderful scene of bustling activity it must have presented then—but now it was deserted, and I sped along the road with no company other than the stern old pine trees, which stood, tall and erect, like sentinels of the feudal days, seeming to keep a jealous watch over the historic highway.

Along by Fijisawa the scenery became very beautiful, and since the world was still fast asleep, I met only an occasional rumbling old cart that seemed to be a part of the landscape. The horses and even the bulls were frightened at the whir of the motor, but more often it was the driver. I found the Japanese peasants very friendly, and quite frequently when a driver inadvertently got in my way he was profuse in his apology, berating the horses or the bulls for their stupidity and making use of the word "honorable" in referring to me and my machine, just about as often as he could. The city people of Japan, on the other hand, are not nearly as courteous in their attitude toward foreigners.

### Stopping at Oiso

Having a friend living in Oiso, a small town along the route, I decided to stop at his pretty villa for a cup of coffee and a bite to eat. About eight o'clock I ran up to his house and received a cordial welcome. Oiso is a sort of highly restricted town like some of the suburbs near New York City, for it is located right on the coast and is well protected from the winter winds. The air is mild and pleasing, bearing the aroma of the many pine trees which grow along the coast. After remaining but a half hour, I bid farewell to my host and continued on my way, when I heard something in the lower part of my engine race free. My first thought was that the clutch had broken off, and you can imagine my feelings, for I have only covered about sixty miles of a journey which I had planned would see me roll off many more miles than that.

However, I was still near my friend's place and pushed my machine back to the villa, where upon examination I discovered to my dismay that the chain was missing. Where was the chain? Evidently it had dropped somewhere on the road as I was pushing the two-wheeler along. I searched everywhere for it but failed to find the chain; I even went so far as to notify the police. Then I finally telegraphed to Tokyo for a new one and returned to the villa to await its arrival. I was still pondering over my ill-luck, when a little street urchin came running up the porch with the lost chain in his hand. You can imagine my surprise, my joy. I made the little gamin happy with a small coin, and then hurried to my ma-

Digitized by Google

chine to repair the chain and place it in position.

Again I said goodby to my friend and hurried on. It was three o'clock in the afternoon; I counted on riding until twelve at night. Getting as far as Kodzu, I knew that the military road immediately beyond was not yet passable, so I decided to cover the distance by train. I attended personally to the loading of the machine and then stepped aboard the passenger car, and rode as far as Gotemba, a distance of twenty miles. It is interesting to watch the willing Japanese load the machine; they take hold of it as though it were very light, and when they find out how heavy it really is a look of great surprise spreads all over their faces.

**Passing Fuji Mountain**

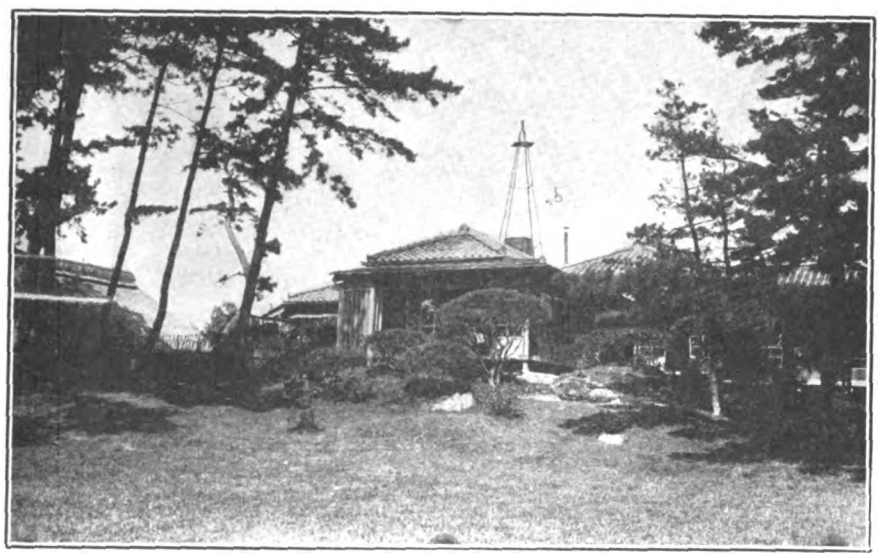
By the time I reached Gotemba it was dark, but the yellow moon was coming up, and knowing the road well I was off in a jiffy. The country on from Gotemba, which was the seat of a hunting lodge maintained by one of the great lords in the feudal days, is a flat fertile expanse and nothing interrupts the pretty view of a mountain nearby, known as the Fuji. It has been my good fortune to have seen this mountain many times, but never have I seen her appear more majestic than she did on that cold, crisp night in the pale yellow moonlight, covered with snow from the base to the summit like a hugh cone perfect in form and outline.

It began to get colder, and as I was traveling at a rate of about thirty miles an hour, it became necessary at times for me to warm my hands and feet. The former I did by putting one hand at a time over the motor, and the latter by stamping on the long foot rests. The roads continued good so I flew on at a fast clip passing through a number of small towns and finally reaching Shizuoka without a mishap, a little after midnight. Here I put up at the first hotel I struck. After a good hot bath and a comforting cup of equally hot tea, the Nesan tucked me into a big futon, and I was soon dreaming of lost chains and beautiful Japanese scenery shimmering under the mellow moonlight.

Six o'clock the following morning I was out on the road again, after buying a supply of gasoline and oil. Gasoline, by the way, can be bought in almost any sort of store in Japan. For instance, I once filled my gas tank at a notions shop. One must be careful, however, about purchasing gasoline at such establishment, for often it is found to be very dirty or an extremely inferior grade. As for oil, it is much more difficult to obtain, and on several of my trips I eliminated all chances by having cans of it sent ahead from Tokyo.

**Crossing Rivers in Japan**

From Shizuoka to Nagoya is about one hundred and twenty miles, and I laid this out for my second day's run. For the most part the road skirts the sea—the Tottomo Sea—and runs through a flat country of pretty rice fields with low hills in the distance on either side. Just outside of Shizuoka I crossed a river called the Abegawa, and while shooting over the bridge I again caught a glimpse of the sea sparkling under the rays of the rising sun. Continuing on I came to a second river, the Oigawa, which was difficult to cross. It is impossible to maintain any but steel bridges over streams of this character, for during flood times the swollen waters of the river rush along at such a terrific speed that they leave destruction in their wake. Though the Oigawa, when I saw it on this trip, was but fifty feet wide, the bed of the stream was at least a hundred feet in width. Thus, to reach a rowboat in which to ferry my machine across—there being no bridge at all here—it was necessary to pass over the exposed gravel bed of both sides of the stream.



Pretty Villa at Oiso, Which Is Owned by One of the Major's Friends

**Inquiring About Road**

Riding on I was soon in the town of Kanawaya, where I stopped to inquire about road directions from a group of jinrikisha men who were assembled, as usual, before a railroad station, waiting to carry passengers about in their "rikishas"—these being the two-wheeled vehicles which one frequently sees on Japanese post cards. The jinriksha, like cab drivers in some of the larger cities in America, are not always truthful about what they say, and one must, therefore, accept their advise with some hesitancy. So when they told me that the road which crossed the mountain pass nearby was in first rate condition. I favored the other.

Leaving the little town I struck a good pace for the mountain pass and soon came to a steep ascent where the going was fair on the straight stretch; but suddenly I struck a sharp turn and came on a lot of newly broken stones, when whiz! yours truly found himself in a ditch. Fortunately I was not thrown with any great force, and except for the fact that I was a bit shaken up, I was none the worse off for the little mishap. As I was looking around for help, an old Japanese peasant came out from a cottage nearby and seeing my predicament asked, with an encouraging smile, whether he could assist me in any way. I invited him to help push the motorcycle up the summit of the pass and he readily assented. We tried to coax the machine up, sometimes by pushing, then starting the motor and running alongside, or, if the road became better I jumped into the saddle only to be forced off again by the loose stones that were strewn over the highway. The old peasant, though often left far behind, would, just as I thought he had deserted me, bob up from some short cut in the road, and still smiling he would ask if he could be of further assistance. He stuck to me to the very top of the pass.

I stopped at a quaint little tea house on the summit of the pass, where I was glad to sit down for a cup of tea and a sandwich. There were several others who had tarried at the tea house and they made an interesting audience for my recital of the trials and tribulations which I had passed through since leaving Tokyo. They were almost dumfounded upon learning that a mere motorcycle had taken me over the entire distance and that the machine could travel at the rate of fifty miles an hour. I have always enjoyed my talks with these simple and very courteous country folk of Japan, and I believe that it has been from contact with these peasants, their life, their love of nature, and all things beautiful that I have become so fond of the little island empire. And among these peasants, too, I would often find one who had read of his country's history, who was perhaps the town scholar. It would delight him if I would ask about the history of the locality in which I happened to be, and you could see his eyes glisten when he related the valorous deeds of some ancient warrior. Nothing pleased these good Japanese peasants more than to hear me talk in their native tongue about their picturesque history, and I always made it a point to do so. It was from such talks with people that I acquired whatever knowledge I have of Japan.

After spending a pleasant half hour in this manner, I started off down the other

Digitized by Google

side of the pass. It was pretty steep at times, and I was frequently compelled to dismount in order to keep the machine from rolling down the slope. Back on level ground once more, I rode only a few miles when I reached a river named the Tenryugawa, over which for once a well-constructed bridge crossed. The scenery of the Tenryu is very beautiful and impressive; there is almost a continuous series of rapids and races as the stream twists and turns around among the great high walls of the mountains.

**At the Tenryu River**

The next town was Hammamatsu, a big, thriving place of very peculiar houses, which have extremely long eaves that give the structures the appearance of toppling over. Leaving the town from the road I was traveling I could see the Pacific, which naturally recalled memories of home; and I stopped by the roadside for a few minutes and looked forth on this vast expanse of water. The boats sailing serenely on the bosom of the ocean and the tall mountains which reared their snow covered heads above me, formed a very pretty picture. Just on the outskirts of Futagawa I found a high rock which supported a bronze image of Kwannon, the goddess of good fortune. The natives called her Iwaya and tell you that the

**Before the Quaint Tea House at Which Major Gosman Stopped**

image has real gold eyes and is more than one hundred years old. That day I rode as far as a place called Toyohashi, where I decided to put up for the night.

This turned out to be a wise decision as the next day was rainy, and I was glad that I was in a fairly good-sized town. Taking it all in all, I can say that I had been through a hard day's riding. One may start out early in the morning, fresh and filled with ambition to burn up the miles, but a few spills and an occasional river without any bridge will rob even an ardent motorcyclist of some of his zest.

*(To be continued.)*

## CARELESSNESS CAUSES 90 PER CENT OF ACCIDENTS

FROM an analysis of traffic accident records made by the New York Police Department, it has been found that 90 per cent. were due to careless or other fault of the injured. In the month of August, out of a total of 1,033 accidents, 903 were due to the fault of the injured, 51 to the fault of the driver, 34 due to skidding and 42 to other causes.

Falls from vehicles accounted for 224 accidents, 137 persons were killed or injured while playing in the streets, 90 ran into or in front of vehicles and 58 were stealing rides.

**The Next Installment of Major Gosman's Article Will Tell of the Completion of His Tour to Kyoto, the Ancient Capital**

# KEEPING BRACKETS FROM BREAKING

MANY riders will not pass the 1916 season without one or more breakages of lamp brackets. This is not necessarily because of poor quality in the metal used in the brackets, but by reason of excessive vibration. This vibration tends to crystallize the metal of the brackets and they weaken; the weight of the lamp does the rest.

Now, if we can check this vibration, we won't have brackets break. One of the best means of doing this is to use rubber washers or fillers where the bracket attaches to the motorcycle—nice, thick washers being better than thin ones. Something can be done in the way of placing washers under the lamp ears, where they rest on the shoulders of the bracket ends, and while this is not so effective as when the washers are fitted under the clamps, it will help matters. If you are afraid that the rubber will slip on the plated handlebars, put a strip of tire tape on first and cement the washers to the strip. But in most cases the tire tape won't be needed.

**For Tail Lamps Also**

While the washers are very useful for headlight brackets, they are more so for tail light and sidecar light carriers. When riding over bumpy roads, it is no uncommon thing for the rider to find that his tail lamp has quit work, due to the jouncing, and this may leave him the prey to some motorcycle cop who has been sent out to "get someone" in order to make good with his superiors. The washers will go a long way toward keeping the tail lamp on the job.

Cutting rubber is not a dry-knife job at all, and you can't use a drill on it. A knife kept moist with water or gasoline (the former by choice, will enable a hole to be made to pass the bolt through, but a better way to form the hole is by meanss of a cutter. This can be made of a section of brass tube, about ⅛ of an inch larger inside than the bolt, sharpened at the end and revolved into the rubber and kept constantly wetted with water. The operation will take a little patience if the rubber is thick, but the holes made will be clean.

If you are using an electric headlight where the circuit has to be completed through the brackets, put one end of a piece of copper wire under the rubber washer next to the handlebar and the other under the nut on the bolt of the clamp. Otherwise the circuit will not be complete and the lamp will not light up.

## TRANSCONTINENTALISTS MEET IN WESTERN NEVADA

Robert W. Wengatz, who is crossing the continent in a Dayton sidecar combination with trailer attachment, from Albany, N. Y., met Harold N. Baker, of Boston, en route for San Francisco on a Dayton bicycle. The meeting place was in the wilds of Nevada, and a pow wow of several hours was the result.

Baker broke an axle in the desert and had to walk 55 miles through knee-deep sand to get a new one. This journey took him two days and nights and he slept out in the desert far away from any habitation. On getting started again he punctured a tire and had to spend another night in the wilds. Baker reports his Dayton bicycle in good condition except for the axle and a broken rim, the latter being quickly repaired at a shop on the way west.

Wengatz reported many chuck holes all through Nevada and said that it was an easy matter to get off the highway as there were numerous side roads leading to mines and ranches as much as 100 miles away. Both he and Baker expect to arrive in San Francisco by Thanksgiving and will celebrate together.

## MAUGAN ON WAY HOME

Milwaukee, Wis., November 16.—"Billy" Maugan, the midget who motorwheeled from Columbus, O., to the Chicago show and afterward to Milwaukee to get a job with the A. O. Smith Co., has left this city en route for Columbus once more. He is travelling via La Porte, Waterloo, Akron, Toledo and Cleveland, totalling 550 miles, on the same motor wheel-equipped bicycle on which he came to Milwaukee.

Maugan is writing a daily letter to the Smith factory, and these letters will be incorporated in a forthcoming motor wheel booklet.

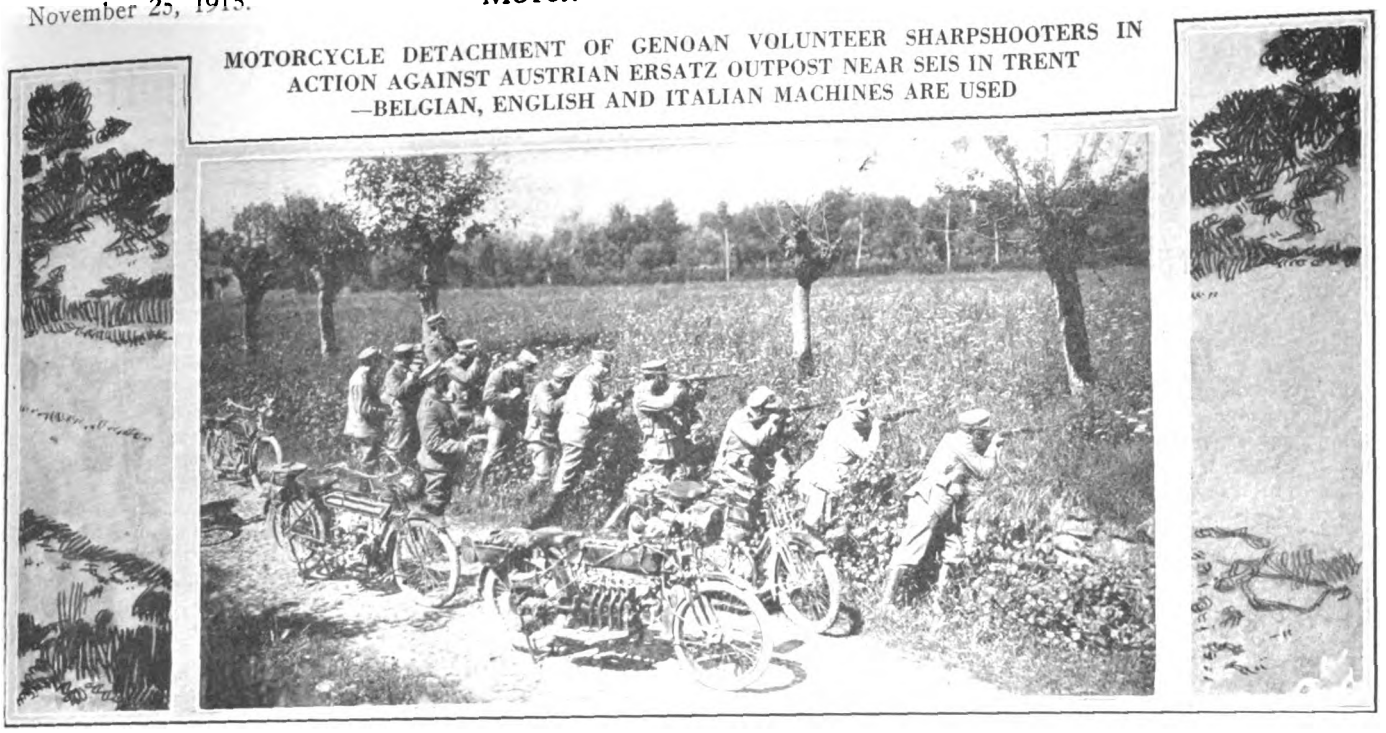
MOTORCYCLE DETACHMENT OF GENOAN VOLUNTEER SHARPSHOOTERS IN ACTION AGAINST AUSTRIAN ERSATZ OUTPOST NEAR SEIS IN TRENT —BELGIAN, ENGLISH AND ITALIAN MACHINES ARE USED



## CYCLING BREVITIES FROM HAVANA

HAVANA, Cuba.—The motorcycle races for the title of 1915 champion of Cuba have been postponed owing to a lack of enthusiasm on the part of those who have helped the sport in the past. Plans are already being laid, however, to hold the 100-kilometer event in another province in 1916.

Motorcyclists of Havana have been bothered a great deal of late through the seemingly unreasonable activities of the local police authorities. One of the latest riders to be arrested is Senor Pepe Vence, Havana dealer in Harley-Davidson machines. He was taken into custody for driving without an operator's license and his machine was sent to the Municipal Storage Hall.

The winter season opened in Havana with the inauguration of a brand new traffic squad, 12 men, all mounted on 7 h. p. Indians of the 1915 model. While riders expect to be annoyed considerably until the motor cops came down a bit, it is generally believed that they will in time do very effective work. The squad was created by General Sanchez Agramonte, chief of police who has plenty of good ideas about regulating traffic.

Owing to the unexpectedly rapid development of the sport of motorcycling in Havana, the mayor of the city, General and Doctor Freyre de Andrade, has issued an order calling for a conductor's license for motorcyclists and a tax of $18.75. It is also necessary to have lights and numbers on both front and rear of the machine. Riders are up in arms, and it is predicted that the motorcycle will be thrown into the background very soon if there is not a modification of the stringent regulations. The Union Motociclista de Cuba has appointed Sr. Fervienza and Senores Ruiloba, Pedroso and Gonzalez as a committee to fight the new law.

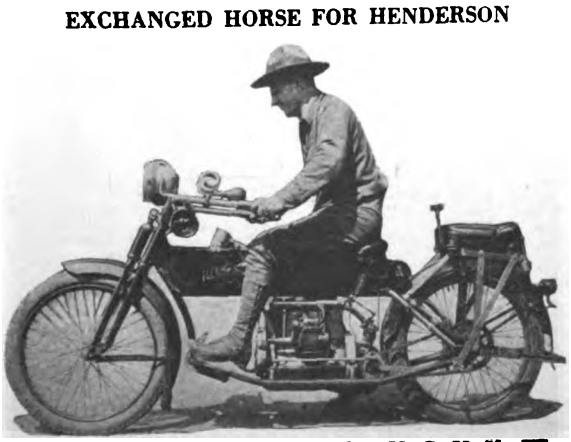
General Hevia, who has just returned to Cuba after a visit to the United States, has submitted an interesting report on the part played by motorcycles and bicycles in recent maneuvers at Van Cortlandt Park, New York. He was so favorably impressed with the work of cyclists in the New York maneuvers that he has appointed twenty bicyclists to act as headquarters' orderlies here. Folding bicycles will be used by these riders, and the Senores Grana y Compania, bicycle dealers in Havana, who have taken the contract to supply the machines, wish to get in touch with manufacturers who can provide the folding type of cycles. They are ready to give further information on request.

## NEWS AND VIEWS OF F. A. M. DOINGS

By GOSLIN

WHEN the F. A. M. refused to sanction races between 61 cubic inch twins on half-mile tracks it was not an idle whim on the part of some one in charge. It was plain, ordinary horse-sense, and every accident caused by big twins on small tracks adds further proof to the wisdom of this prohibition. Every time riders and dealers have contests on small tracks with these banned motors, they show no forethought and little regard for the future of the business that is their bread and butter.

### EXCHANGED HORSE FOR HENDERSON



**Trooper James Lowe of 1st Cavalry, N. G. N. Y., Who Uses Four-Cylinder Mount in Army Drills**

### The Veteran Pin Idea

This new idea of "Doc" Gibson's in making every five-year member of the F. A. M. in good standing eligible to wear a veteran's pin is most excellent. In these days of cheap new and second-hand automobiles, any motorcyclist who can resist the lure and false glamor of being an automobilist for five years is entitled to be a veteran, with a capital V. Me for a pin next year, Doc!

### Need of Clubs in Country

Only too true and much to be lamented is the fact that the average country-town rider gets little benefit from his motorcycle on the sociability side. Time and again the writer has asked a successful town dealer about a local motorcycle club, only to hear that his bunch lack interest and have no club spirit.

Instead of a score of country district riders making up a party and going off in a bbody on a 100-mile run every Saturday and holiday, they hang around the agency and take numerous five and ten-mile spins up and down the same road, calling this a day's sport. You country dealers, get your crowd together and take 'em out on a trip next Sunday. Show 'em some of the country beyond the hills over there.

# WORLD CYCLE MARKETS OPEN TO U. S. MANUFACTURERS

## Expert Points Out Wonderful Opportunities for Bicycle Makers Who Will Adapt Their Models to Foreign Requirements

"WHEN American bicycle manufacturers prove their willingness to make certain changes in their models in order to meet the special demands of foreign buyers they will be in a position to go after not only the cycle business of England and her colonies but of practically the whole world," said Mr. O. Ling, export manager for the Herbert F. L. Funke Co., of New York, in an interview a few days ago. Mr. Ling formerly was export manager for the Birmingham Small Arms Co., of Birmingham, England, which has suspended the manufacture of B. S. A. motorcycles to produce munitions of war. He has just joined the Funke company, and is keenly interested in the opportunities presented to cycle makers in the United States as a result of the world conflagration.

### Heavy Sales Assured

"American cycle manufacturers who confine their efforts solely to supplying the home field are certainly on the wrong track," continued Mr. Ling, "because by making a few comparatively simple changes they could extend their scope to a wonderful degree. The American bicycle is a laudable product, but it cannot be expected to meet with approval where the British, German and Italian bicycles have formerly held the market. Buyers in foreign countries have become accustomed to certain outstanding features of design, and must have them. It is a serious mistake to attempt the policy of forcing on them the standard American bicycle, however satisfactory it may be from the United States viewpoint. The foreign business is well worth the effort needed to adapt bicycles to it, and the manufacturer who first works along that line will obtain truly remarkable results.

"I am convinced that the business to be derived from the sales of Overseas models would total more than $200,000 in the first year, provided the foreign agents were given what they want, and when this business was once acquired it could be held indefinitely. Before the warring countries can adjust their affairs and begin to think of the cycle trade again after the war, the American manufacturer can be so firmly established that he will not be readily driven out. But let it be understood that no such result can be hoped for unless the bicycles are changed to meet the specific demands of the foreign markets; that's the big point.

### Why Trade Was Lost

"In the bicycle 'boom' days America enjoyed a great export business, and it was lost not through any fault of the American wheel but simply because the manufacturers did not see fit to cater to the idiosyncrasies of the average foreign buyer. One thing that contributed largely to the loss of this business was that American bicycles were shipped in large numbers complete in themselves, and without ever a repair part included. When parts were worn out or broken after long usage the foreign dealer could not make repairs or replacements except at high cost, because the manufacturer had not supplied the parts; and thus the American wheel lost prestige.

"The bicycle that will sell Overseas must be distinctly different from the type which finds favor here. In place of the one or two-piece crankhanger, for example, the four-piece hanger similar to the British design must be adopted. Wood rims, or steel-lined wood rims, are absolutely tabooed. The full steel rim is a necessity, not only to obviate warping, but to accommodate the front and rear brakes which the foreigners demand. In place of the coaster, which is universally used here, a simple 'free wheel' device, with these front and rear rim brakes, finds favor. The frames should be made of weldless steel tubing in preference to tubing of any other kind, although it is not unlikely that the foreign trade can be educated up to the point where it will accept the meritorious welded tubing in time to come. The screw threads throughout must be B. S. A. standard, for that standard is in universal use throughout the world's cycle markets.

"Some bicycle fitments which we never see here are in demand on the other side. For instance, the pumpmaker who produces a very light tire pump with a celluloid barrel or cylinder, and the manufacturer who offers celluloid grips will make friends rapidly. The celluloid pump and celluloid grip are almost universal in the foreign trade. If they can be produced at the right price, there is $100,000 worth of business in them alone in England and her colonies during the year subsequent to their introduction."

The information given by Mr. Ling is invaluable, in view of the fact that it is based upon years of experience in handling the B. S. A. bicycles in foreign markets. He has traveled all over Europe and through all of the English colonies, and knows to a nicety the requirements of foreign buyers. Mr. Ling is desirous of going into the export proposition with American bicycle manufacturers, and has full samples of just what is needed in addition to unlimited data bearing upon the present opportunities abroad. His address is 110 Broad street, New York, the Funke Co. headquarters.

# THE MOTORCYCLE OUTLOOK IN MEXICO

## Visitor from Mexico City Believes Good Cycle Business Is Coming

MILWAUKEE, Wis., November 16.—That Mexico is ripe for the invasion of American motorcycle manufacturers is the assertion of Albert Zoeller, who came here for the purpose of establishing business relations with the Harley-Davidson factory as its dealer.

Anyone expecting to find in Albert Zoeller the typical chili con carne Mexican is due for disappointment. His card reads "Mexico City," and states that he is in the banking business. Zoeller is a Texan and, like other Americans that have invaded the commercial world of our turbulent Southern neighbor, gives as a reason for his being there that no other country offers the possibilities for American capital that are found in Mexico.

Albert Zoeller

"Mexico looks to Carranza for amicable settlement of her factional troubles," said Mr. Zoeller. "The states of Morelos and Sonora, together with Zapata's adherents in scattered other sections of the country, responsible for the present revolution, are not expected to make a prolonged fight, and with the settlement of the difficulties that harass Mexico on this account there will come peace and prosperity such as Mexico has never seen. There will be an unprecedented boom in every line of trade."

Before the present world war began, English and French exporters had a strong hold on Mexican buying. Now that the European market is closed, Mexico is looking to the United States for greater portion of its needs, according to Mr. Zoeller. "The fact that hundreds of United States citizens are going into Mexico to make their homes at the present is indication that there is an outlook for prosperity. The fact that paper money is being put into circulation as fast as it can be printed does not seem to affect its value as legal tender. Fifteen Mexican pesos make an American dollar.

"The native Mexican is quick to learn. Price has no consideration in his buying. If an article looks good to him he wants it, regardless of whether there is a similar article in the same line that is cheaper. Heretofore English and French motorcycles have been the big sellers in Mexico.

"English enterprise accounts in large measure for the predominance of that make of motorcycle in Mexico before the beginning of the war. American makers are beginning to get wise with the result that machines familiar to you Americans now are beginning to be popular in Mexico also."

# News of the Clubs

### HENDERSON CLUB'S INITIAL RUN

Quincy, Ill., November 15. The Henderson Motorcycle Club, a new motorcycle organization in this city, held its initial run to Mendon and Keokuk recently. Henry Maching, the local Henderson dealer, entertained the riders with a chicken dinner at Mendon, and also pulled off a few stunts with his sidecar outfit that made a hit. Among those who participated in the affair were Mr. and Mrs. Henry Maching, Mr. and Mrs. John Bernard, Mr. and Mrs. Frank Stolze, Mr. and Mrs. Samuel Strauss and Henry Lange. Other runs are on the club's schedule which will be staged in the near future.

### HILL CLIMB FOR WHEELING CLUB

Wheeling, W. Va., November 15.—At the regular meeting of the Wheeling Motorcycle Club, held last week, with President J. Landon Bier in the chair, it was reported that all arrangements had been completed for the Thanksgiving Day hill climb. The Wheeling Register has donated a large silver cup for the first prize.

### RACINE ADEPT AT POLO

Racine, Wis., November 23.—The Racine Motorcycle Club signalized its entry into the Racine Polo League by winning its first game against the Big Chiefs in Lakeside Auditorium by a score of 3 to 1. Van Valkenberg made all of the goals caged by the motorcyclists, slamming the first one into the goal in eight minutes of play. The lineup of the Racine Motorcycle club team is: Bulletts, Van Valkenberg, Evenson, rushes; H. Moorman, center; Korzelius, half back, and Peters, goal.

### OPEN MEMBERSHIP CONTEST

Wheeling, W. Va.—The Wheeling M. C., of this city, held a banquet on November 16 to celebrate the opening of a big membership campaign. The club members were divided into two teams and will seek to get new members. The team getting the most will be either treated to dinner or to a bowling party by the other.

### ASSOCIATION TO GIVE BALL

Chicago, Ill.—The Chicago Excelsior Motorcycle Benevolent Association will give an entertainment and ball at the West Chicago clubhouse, 121 Throop street, on December 11. The proceeds are to go toward equipping the clubrooms and increasing the membership.

### PEERLESS M. C. ELECTS

The Peerless Motorcycle Club, of 1895 Washington avenue, Bronx, N. Y., has affiliated with the Federation of American Motorcyclists and elected the following officers: President, E. Martine; vice-president, Jack Byron; treasurer, Sam Burticale; secretary, T. Besio; sergeant-at-arms, Fred Huron.

The club came into existence June 22, of this year, and now has a membership of twenty-five. It is the intention of the officers of the club to hold a dance in the near future.

### READING CLUB GETS DAMAGES

Reading, Pa.—The Reading M. C. has been awarded $180 damages for loss by fire in its old club headquarters in Penn Square, from the Metropolitan Electric Company of that city. An appeal from the finding of the jury in the case was denied by the trial judge last week. Defective insulation in the wiring in the club building is alleged to have caused the fire.

### TUCSON CLUB RACE

Tucson, Ariz., November.—The Tucson Motorcycle Club is promoting a race to Oracle, 35 miles distant, and return, on New Year's day.

**Members of Wheeling (W. Va.) M. C. at Their Membership Boosting Banquet on November 16—Item Above**

Digitized by Google

## MILWAUKEE MEMBERSHIP CAMPAIGN

MILWAUKEE, Wis.—November 23.—Milwaukee motorcyclists are deep in the work of a booster membership campaign that finishes during Milwaukee show time. J. J. Hegeman, manager of the local Firestone branch, started things by donating three Non-Skid casing and two inner tubes and he was seconded by Louis Peterik, manager of the Mueller Cycle & Supply Co., local Harley-Davidson dealer, with five more prizes.

The local club proposes adding 150 new members in this campaign and has waived its initiation fee as inducement for the 2,000 motorcyclists of this city to begin thinking seriously about getting in with the live motorcycle club here. The Milwaukee club was largely instrumental in having averted the proposed increase of license fees on motorcycles during the last legislative session at Madison.

By a sweeping campaign through the State clubs and State newspapers the local club waged a fight for arousing sentiment against the $3 license fee with the result that it was indefinitely postponed. The club feels that it is entitled therefore to the support of the local motorcyclists with their memberships. They never know when some more fool legislation will pop up.

## RACE MEET CLOSES SEASON

Trenton, N. J., November 13.—The Trenton M. C. closed its season here today with a "booster" race on the Ewingville race track. Two amateur, one novice and one free-for-all event completed the card, although a match race between Ray Forst and Christopher Carson was on the list. Forst, however, spilled during a special contest between Joe Miller and himself, to settle a dispute between two local dealers and his match with Carson did not come off, much to the disappointment of the spectators.

Elmer Ansley, Indian, took the ten mile free-for-all, in 12:11⅕, with Joe Miller, Excelsior, second. E. G. Applegate, Thor, won the ten mile amateur single cylinder race, even though he spilled during the third lap. Applegate beat Ray Forst, Harley-Davidson, by nearly a quarter lap. Time, 14:11⅗.

The five mile novice race went to Earl Ely on an Excelsior, with R. S. Woods, local Harley-Davidson dealer, second. The time was 6:36. Christopher Carson, Indian, carried off the five-mile amateur twin race with Ansley, Indian, second. Carson's time was 5:43⅗.

## MILWAUKEE'S BOOSTER BANQUET

Milwaukee, Wis., November 23.—The Milwaukee Motorcycle Club is making arrangements for a monster booster banquet to be held in the club rooms Friday evening, December 3, for the purpose of arousing enthusiasm in building up a stronger local organization. The club is heavily in debt at the present time due to the losses sustained in this summer's race meets and the booster banquet is expected to get something started toward reducing the club's debt. President Coffman of the F. A. M. will be asked to attend and there will be numerous other motorcycle lights present.

## HALEDON TEAM WINNERS

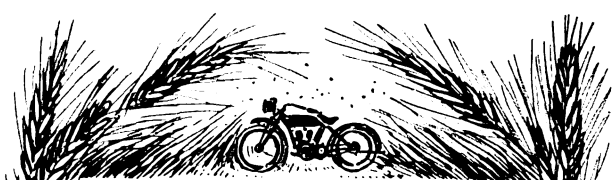
Haledon, N. J.—The Haledon M. C. basketball team opened its season with a victory over the Paterson Superiors, a semi-professional five of high class in this city. Games have been booked with several other teams in the near future. Manager Scott, of the Haledons, is anxious to meet basketball teams of any strength, and can be addressed care of the Haledon Club, Haledon, N. J., by managers desirous of arranging for games.

## MAY REVIVE CLUB

Columbus, O.—Steps are being taken to revive the Franklin County M. C. of this city. A meeting will probably be called soon for the purpose of discussing the reorganization. The project of consolidating this club with the Capital City M. C. has been dropped, as the latter organization is practically dead.

## CANAL ZONE MOTORCYCLE CLUB

A recent report from the Panama Canal Zone states that motorcycling interest there is on the boom, due chiefly to the recent organization of the Canal Zone Motorcycle Club, with headquarters at Ancon, C. Z. This club is reported to be growing rapidly. Canal employees get their merchandise in free of duty and at greatly reduced freight rates, so that the motorcyclists all order their machines from the United States.



## TWELVE REASONS WHY THE FARMER IS ABLE AND READY TO BUY MOTORCYCLES

| 1915 CROPS. | AMOUNT. | VALUE. |
|---|---|---|
| Corn | 3,090,509,000 bu. | $1,913,025,071 |
| Wheat | 1,002,029,000 bu. | 932,888,999 |
| Oats | 1,517,478,000 bu. | 532,599,822 |
| Hay | 101,276,000 tons | 877,054,890 |
| Cotton | 5,250,000,000 lbs. | 609,000,000 |
| Potatoes | 425,903,000 bu. | 260,881,874 |
| Apples | 76,670,000 bbls. | 164,380,480 |
| Barley | 236,682,000 bu. | 118,577,682 |
| Tobacco | 1,050,025,000 lbs. | 105,002,500 |
| Peaches | 64,218,000 baskets | 60,613,736 |
| Rye | 44,179,000 bu. | 37,861,403 |
| Flaxseed | 18,446,000 bu. | 30,050,534 |
| TOTAL VALUE ..... | | $5,641,956,991 |

## CONSOLIDATED CLUB HOLDS LAST RUN OF SEASON

INDIANAPOLIS, Ind.—The Consolidated M. C. of this city, held the last tour of the season to Flat Rock Cave, near Shelbyville recently. The club was joined at Shelbyville by members of the Indianapolis M. C. under the leadership of Johnny Merz, and the two bodies rode together to the cave and park. About 50 riders in all made the trip.

Dinner was had at Shelbyville, as the park was closed for the season. On arriving at the cave, the riders and their fair guests made a tour of inspection after one of their number had seen that the passages were dry enough for the ladies to travel over. Pocket flashlights were used during the inspection. The many slides and swings in the park were kept constantly in use after the cave was explored, and these in connection with boating on Flat Rock creek, served to pass the afternoon pleasantly.

## FUND GIVEN TO CHELINI

TO the Chelini Fine Fund has been contributed the total of $38.50 which has been turned over to A. Chelini in an endeavor to reimburse the California rider for the fine he had to pay as a result of speeding, while covering the last leg of the recent Transcontinental Motorcycle Relay. **Motor Cycle Illustrated,** originator of the fund, has given ten dollars, and has also been able to secure the following contributions: C. H. Minto, assistant sales manager, the United States Tire Company of California, $1; San Francisco Branch of the Goodyear Tire & Rubber Company, $1; San Francisco Branch of the Hendee Manufacturing Company, $1; Fred M. Mills, F. A. M. Commissioner of Washington, D. C., $1; Dr. G. B. Gibson, secretary-treasurer F. A. M., $1; A. B. Croft, Indian dealer at Ouray, Colo., $1. The Westfield Manufacturing Company, of Westfield, Mass., has given $10 through F. A. M. Competition Committee Chairman Johnson. *Motorcycling & Bicycling* has contributed $10 and received $2.60 from the employes of C. Will Risden, Indian distributor, Los Angeles, Cal.

## OPEN WINTER SEASON

Baltimore, Md.—The Maryland M. C. inaugurated its winter social season last Tuesday evening at the club house on Hamilton Terrace. Monthly dances will be the feature, a new dance floor having been laid. Moving picture entertainments will also be given and lectures on various topics from time to time. Captain Ernest Wood and Theodore Krug have charge of the programs.

## BUY TREMPER'S STOCK

Seattle Wash.—Vernon & Son have purchased the stock and supplies of Theodore P. Tremper, former Thor agent in this city. While the Tremper firm will not handle the Thor, they will continue to stock the parts.

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## COMPARATIVE EXPORTS FOR 1914 AND 1915

A COMPARISON of American export figures for the nine months ending with September of 1914 and 1915, respectively, show a tremendous increase this year. The increase is largest in the amount of business done with such countries as France, Italy, the Netherlands, Norway, Russia, Sweden and the United Kingdom. At the same time, the United States is also doing more business than ever before with most of the South American countries, as well as with Asia, Oceania and Africa.

A comparison of the figures will dispel a rather general impression that the increase in American foreign business is due almost entirely to unprecedented shipments of war munitions. While it is quite true that our business with European countries has increased from $873,000,000 during the nine months ending September, 1914, to $1,845,000,000 for the nine months ending September, 1915, in every other grand division of the world, also, the 1915 figures are higher, as follows:

| | 1914 | 1915 |
|---|---|---|
| North America | $374,000,000 | $386,000,000 |
| South America | 73,000,000 | 103,500,000 |
| Asia | 68,800,000 | 100,194,000 |
| Oceania | 57,410,400 | 70,640,000 |
| Africa | 19,310,000 | 25,400,000 |

Exports for the week ending November 6 at the thirteen principal custom ports of th United States were $64,286,785, and imports $30,273,913, leaving a favorable trade balance for the week of more than $34,000,000.

## PANAMA CLUB BOOSTS TRADE

We are informed by Consul-General Alban G. Snyder, stationed at Panama City, that up to a short time ago little motorcycling was done and there were only a few motorcycles on the Isthmus of Panama. Added interest was given to this form of recreation a few months ago by the organization of the Canal Zone Motorcycle Club, with headquarters at Ancon. The club is growing quite rapidly. As employees of the Panama Canal get their merchandise in free of duty and at greatly reduced freight rates, all the Panama riders have purchased American-made machines.

## UNSATISFACTORY BUSINESS LETTERS

Unsigned business letters from American firms do not find favor among foreign tradesmen, and their criticisms have been confirmed by the increasing proportion of letters coming to the various consulate generals without signatures.

The comments that have been heard apply to three classes—letters asking for information, letters of acknowledgment, and those making business offers. It is unlikely that a letter of the third class, unsigned, would inspire much confidence, as the conclusion would naturally be drawn that it had received purely perfunctory attention on the part of the writer, or had been written by some one who had no authority to sign it.

An unsigned offer of sale creates an impression similar to that which was produced several years ago, when numerous letters were sent out by business houses in the United States conspicuously stamped "Dictated, but not reread."

## RHODESIA IMPORTS

According to American Consul E. Gunsaulus, of Johannesburg, imports of motorcycles and bicycles into Rhodesia, British South Africa, in 1913 and 1914, respectively, were as follows:

Bicycles, 1913, $98,060; 1914, $66,442.

Motorcycles and parts 1913, $36,289; 1914, $44,879.

Imports into Rhodesia from the United States, of motorcycles and parts, increased from $3,733 in 1913 to $4,253 in 1914.

## NEW EXPORT RECORDS

Figures just made public by the Bureau of Foreign & Domestic Commerce reveal new records in American export trade and export balance. Exports for last month totaled $297,766,750, and exceeded by nearly $80,000,000 the total for September, 1913, and by $141,000,000 that of September, 1914. Nine months' exports this year totaled $2,529,575,095, compared with $1,467,401,989 last year and $1,733,422,158 two years ago. The nine months ending in September show an export balance of $1,227,293,504, an increase of $1,170,000,000 over that for the corresponding period of 1914 and $821,256,417 over that of 1913.

## FAVOR AMERICAN GOODS

We are in receipt of a letter from the editor of *Motor*, of Copenhagen, Denmark, in which he says:

"It is of the greatest importance for the Danish motorists to be able to follow the progress of American sport and industry because public inclination here in Denmark becomes more and more favorable to American goods."

## GAIN OF MORE THAN BILLION

For the nine months ending September, 1915, exports out of the United States totaled $2,532,485,167, as against $1,467,401,989 for the first nine months ending September, 1914. This represents a gain for the first nine months of this year of more than one billion dollars.

## COLOMBIA FAVORS AMERICAN BUILT CYCLES

ADVERSE street and road conditions, as well as the high cost of gasoline and lubricating oil, are factors which have greatly retarded the sales of bicycles and motor-driven vehicles in the Cartagena district, in Colombia, according to a recent consular report. The city streets are narrow and generally in poor condition, while the roads are very bad in most cases.

Gasoline sells at 40 cents a gallon, retail, and 36 cents wholesale. Lubricating oil, which is like the gasoline manufactured locally, sells at the same figures. In spite of these factors, continues the report, the importations of bicycles, motorcycles and accessories through the port of Cartagena during the last calendar year were valued at $15,359, as against $6,472 during the fiscal year ending June 30, 1914. In the calendar year, American goods passing through the port were valued at $11,533, or about two-thirds of the total importation.

The import duty adds a relatively small amount to the original cost. According to item No. 855 of the import tariff schedule, the duty on bicycles, tricycles and velocipedes, with or without motors, is five cents per kilogram (2.2 pounds), levy being made on the gross weight. Including the surtax of two per cent., of the duty, the total duty is equal to $2.31 per 100 pounds. Thus, the duty on a bicycle amounts approximately to $1.25, if packed lightly, while the duty on a motorcycle is $7.50 to $8.

Bicycles, continues the report, are usually sold by dealers for cash, while motorcycles are purchased on monthly installments. Bicycles for this district should be fully equipped with lamp, bell, coaster brake, mudguards on both wheels, and a complete tool kit. Motorcycles should be quoted with extra parts.

There are only four motorcycles in Cartagena and only one active agency. Three of the machines are American made and the fourth of Italian construction. Correspondence and advertising matter should be in Spanish, and weights quoted, gross and net, in kilogrammes. Prices may be given in American currency.

## OPENINGS IN CALCUTTA

According to the American Consul at Calcutta, India, "opportunities for the sale of American-made cycles, parts and accessories are excellent. There are already a great many motorcycles in use in Calcutta. The roads are good and the country is flat. There is a particularly good chance for selling low price machines, but their quality must be good."

# Of a Personal Flavor

FRED M. RANDALL has just formed the Fred M. Randall Co., advertising agents, at 605 Ford Building, Detroit, Mich. Mr. Randall was formerly with the Taylor Critchfield-Clague Advertising Agency, but resigned to form his own firm.

S. M. Beatty is now with the sales promotion department of the Goodyear Tire & Rubber Company, at Akron, O. He was formerly manager of the Providence, R. I., branch. Mr. Beatty is succeeded at the Rhode Island capital by E. J. Smith, formerly of the Hartford, Conn., branch.

W. H. Schwab, formerly sales manager for the Gemco Mfg. Company, of Milwaukee, Wis., and C. W. Beckler, advertising manager of the same concern, have become interested in the Auto Parts Mfg. Company, of 528 Broadway, Miuwaukee, Wis. Messrs. Schwab and Beckler severed all connection with the Gemco firm recently.

F. I. Reynolds is now manager of the Automobile Tire Department of the United States Tire Company, of 1790 Broadway, New York. He was formerly tire sales manager for the B. F. Goodrich Company, of Akron, O.

M. I. Husted, formerly with the United States Tire forces, is now affiliated with the Ellason Brothers Motor Car Company, of Baltimore, Md.

R. P. Hinckley has joined the sales forces of the Connecticut Telephone & Electric Company, of Meridan, Conn. He will handle jobbing trade east of Chicago.

Frederick H. Poor, who since the incorporation of the S. K. F. Ball Bearing Company, in December, 1909, has been its general manager, has resigned. He will open an office of his own at 30 Church street, New York.

A. E. Schaefer, formerly with the Packard Motor Car Company, is now affiliated with the Goodyear Tire & Rubber Company, at Akron, O.

Professor Vivian B. Lewes, one of the foremost English authorities on fuels and acetylene, has just died. He was professor of Chemistry at the Royal Naval College, at Greenwich.

Boston, Mass.—F. Shirley Boyd, a pioneer in the motor accessory trade and in the bicycle industry, died in this city of appendicitis on November 12. Mr. Boyd had been president of one of the leading accessory houses in New England for several years prior to his decease.

H. R. Curtiss has been appointed manager and treasurer of the Excelsior General Supplies Company, of Chicago, Ill. He was formerly manager and treasurer of the Boston, Mass., branch of the Splitdorf Electrical Company, of Newark, N. J.

R. M. Ellis is now in charge of the Boston, Mass., branch of the Splitdorf Electrical Company, of Newark, N. J. He left his position as export manager for the Splitdorf interests recently to take up his new work.

Mr. K. R. Jacoby, formerly identified with the Miami Cycle & Manufacturing Company, announces that after the first of December he will be connected with the Willys-Overland Company, automobile manufacturers of Toledo.

Louisville, Ky.—H. N. Kirk, sales manager for the Aurora Automatic Machine Company, of Chicago, Ill., was recently in Louisville to confer with some of the dealers concerning a new Thor agency in Louisville.

Columbus, O.—Newspaper men of this city recently tendered a farewell dinner to D. A. Donovan, formerly of the staff of the *Columbus Dispatch,* who is now editor of the house organ of the B. F. Goodrich Company, of Akron, O.

## BREGENT TAKES SEVERAL DISTRIBUTING RIGHTS

MONTREAL, Quebec.—The wave of activity throughout Canadian cycle circles is being felt in Montreal, as well as business. A number of new connections for the coming trade year have been definitely arranged and these industrial ties will affect business relations in the whole of Eastern Canada.

An announcement of importance is that A. E. Bregent, 206-208 St. Catherine street East, the local distributor, has obtained the sales privileges for Pope bicycles for the whole of Eastern Canada. Fred St. Onge, the travelling salesman representing Bregent, visited the plant of the Westfield Mfg. Company, at Westfield, Mass., and later L. D. Harden of that company called upon the local trade with the result that Bregent was selected to handle Pope bicycle sales in the East.

Negotiations have also been concluded whereby Bregent will handle the new Regent line of studded tread, white rubber, bicycle tires made by the Canadian Consolidated Rubber Company of Montreal, a sister organization to the United States Tire Company in the States. A new tube, of extreme thickness, also made by this company, will be sold by Bregent in Eastern Canada as well.

Bregent has secured the Canadian distributing rights for the Worksman delivery van, made by M. Worksman, 14-16 Vesey street, New York. This is a commercial tricycle to which can be easily attached a Smith Motor Wheel if desired.

The sale of the Smith Motor Wheel is being boosted all through Quebec and Ontario by Bregent's representatives, including St. Onge, who is a former vaudeville cyclist. The latter sold a great many Smith Motor Wheels at the fall fairs at Quebec, Sherbrooke and other places, where he pulled off a number of his old bicycle tricks by way of introducing the motor attachment. St. Onge is placing agencies for Smith Motor Wheels, Regent bicycle tires, Pope bicycles and other lines in all the cities, large and small, in both of the Provinces named.

Montreal was visited, briefly, by sixteen of the professional bicycle racers who have been engaged in the six-day race at Chicago as they were proceeding from Boston to Chicago by way of the Canadian route.

S. E. Rochelle, of Corcoran & Parrish streets, Durham, N. C., has registered his shop with the F. A. M.

**WHEN SIX CONGENIAL SPIRITS MET AT CHARLOTTE, N. C.**

**Back Row, Left to Right, E. C. Briggeman, Iver Johnson; E. C. Recknagel and R. J. Smith, Corbin Screw Corp.; Bottom Row, A. E. Lonn, Great Western; J. Pickard, and T. N. Biddle, the Morrow Brake Man**

# With the Manufacturers

## TULLY JOINS SCHICKEL

W. B. TULLY, formerly Southern traveler for the Great Western Manufacturing Company, has become affiliated with the Schickel Motor Company and will travel South for it. The territory covered by Mr. Tully will comprise Florida, Georgia, Alabama and the Carolinas.

The Schickel Lightweight is receiving enthusiastic endorsement by the many dealers who have contracted for selling the machine, as evidenced by the following letter received from the Barber Bicycle Company, of Sandusky, Ohio. They say: "We have received our machines and we are very much pleased with the 'Little Bug'; it has plenty of speed and ample power."

## INDIAN SETS NEW RECORD

JOHANNESBURG, South Africa.—P. E. Hunt, local Indian agent, using a 7 h.p. big twin sidecar combination, covered the distance between this city and Durban in 18 hours, 29 minutes, on September 18. Hunt's time betters that of the mail train by 5 hours, 9 minutes. The road to Durban is boulder-strewn and in parts deep in dust, while there are steep gradients and over 50 gates to be opened on the way. Hunt's was the first sidecar to cover the distance in better than the train time.

## THREE ADDITIONS FOR HYATT

TOLEDO, O.—The Hyatt Roller Bearing Company is so rushed with orders that three large additions to the plant have become necessary. Work on them is being rushed and the three will be completed by the first of the year. Two of the buildings are 200 x 50 feet, eight stories high, while the third is 110 x 90 and six stories high.

## NO DUCKWORTH SLACK-UP

Although this season of the year usually permits the Duckworth Chain & Manufacturing Company, of Springfield, to catch up with their orders on hand, it is, however, not true of the present season. The factory is running full capacity, and even at that are unable to catch up with the demand.

## RUNNING FULL CAPACITY

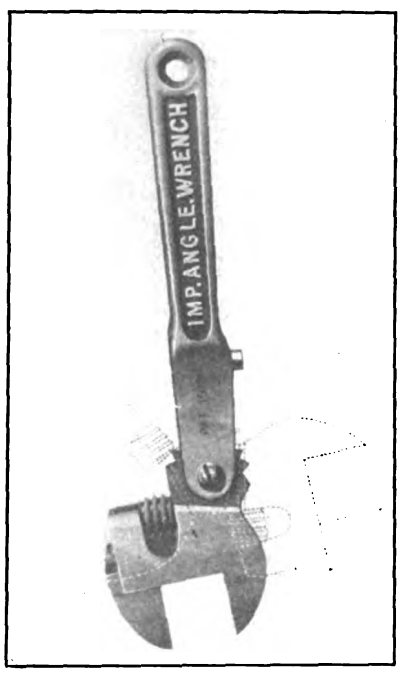
Sales Manager Jones, of the Majestic Manufacturing Company, states that business has been exceptionally good and that at present they are running full capacity. This big volume of business is especially true of their pedal line.

## ALLWON EYESHIELD AGENT

The Herbert F. L. Funke Company, of 110 Broad street, New York, has taken over the distribution of the motorcycle and export trade of the Allwon eyeshield, made by Strauss & Buegeleisen, of 489 Fifth avenue, New York.

## IMPERIAL ANGLE WRENCH HAS ADJUSTABLE HANDLE

USEFUL to both rider and repairman is the adjustable handle angle wrench recently brought out by the Imperial Tool Company, of Bloomington, Ill. This wrench has an adjustable jaw which will take



Imperial Angle Wrench

any tap up to 1¼ inches at eight different angles, or the tap can be turned in very close quarters by ratcheting the handle one or more notches at a time in either direction by merely operating the ratchet button.

The handle is locked rigidly when the ratchet button is released. The wrench is not a novelty tool, but a practical one, made of the best material possible and capable of withstanding the hardest service. It will take the place of a variety of different styles of wrenches, as it can be easily operated in positions and angles where special wrenches are ordinarily needed, and also in places where no other wrench can be used. The Imperial Tool Company gives a first-class guarantee with each wrench.

## SEIBERLING TALKS TO SAN FRANCISCO CONFERENCE FROM AKRON

Akron, Ohio, November 23.—President F. A. Seiberling, of the Goodyear Tire & Rubber Company addressed a conference of Goodyear men at San Francisco from his office at Akron last week, when for the first time telephone connection was established between the factory and the western coast, a distance of three thousand miles. The western men were assembled in the telephone exhibit theatre at the Panama-Pacific Exposition at a pre-arranged hour for the talk with Akron. Sixty-five of the Goodyear men sat with telephone receivers clapped to their ears at 'Frisco, while a party of men sat at the Akron office similarly equipped for "listening in." "Greetings from the factory from across the continent" were the first words spoken by President Seiberling, which were distinctly heard at the other end. "Thank you, how are you?" came instantly and clearly the voice of A. F. Osterlich, assistant secretary of the company. Then followed for half an hour a conversation which was clearly heard at either end of the three thousand miles.

## SMITH EMPLOYES GIVE VAUDEVILLE SHOW

MILWAUKEE, Wis.—A vaudeville show of eight acts was given in the Auditorium, the city's largest hall, by employes of the A. O. Smith Company, manufacturers of the Smith motor wheel. The performers were all amateurs and employed by the company in various departments of the factory and office. President L. R. Smith made a very pleasing address preceding the performance, which was followed by dancing. The plant was closed down for the night.

## YATES WITH WESTFIELD CO.

Boston, Mass., November 23.—J. A. Yates, of this city, better known to the trade as "Jack" Yates, has joined the traveling forces of the Westfield Mfg. Co., and will cover the Northwest as the Pope bicycle and motorcycle traveler, with headquarters at Minneapolis, Minn. Mr. Yates is of the clean-cut, hustling type of salesmen, who is very popular with those in the trade who know him, and has many friends in the Northwest.

## BOIDO USED FIRESTONES

Announcement is made that the Indian on which Lorenzo Boido won the Tucson-Phoenix race on November 16 was equipped with Firestone tires, and that John Berg, who finished second on a Harley-Davidson, also used Firestones. Of the six machines to complete the course, 132 miles, including good, bad and indifferent roads, two others were also Firestone-shod. Tire troubles were conspicuous by their absence despite the severity of the route.

## WESCHLER ON WAY TO COAST

Springfield, Mass.—Frank J. Weschler, treasurer and sales manager of the Hendee Mfg. Co., is on his way to the Pacific Coast for a general tour of Indian dealers in that section. He will stop over in Denver and Salt Lake City en route.

Digitized by Google

## MOTOR WHEEL EXPORT SHIPMENTS ARE GROWING

MILWAUKEE, Wis.—One hundred and eleven Smith motor wheels were shipped to foreign parts of the world during the month of October, and thus far this month the number is more than equalled. The A. O. Smith Company is enjoying a splendid export business, each month showing increases, and it is expected that the year just starting will bring foreign motor wheel business far into the thousands. "Although export shipments and foreign trade are said to be difficult to handle, we find little trouble aside from our regular routine," said Manager W. V. C. Jackson. "The thing to keep uppermost in mind on foreign business, I believe, is pack securely and route the most rapid way, thus avoiding the two things obnoxious to foreign buyers; delays in receiving shipments and receiving the same in injured condition. We have been complimented repeatedly on the method of packing, and I believe it is a long way toward setting us right with foreign buyers. We are experiencing no difficulties with foreign collections and are treating our foreign trade liberally in that respect, which the buyers in other countries, particularly Spanish-speaking countries, are accustomed to."

## FIRESTONE DAY AT DES MOINES

DES MOINES, Iowa.—H. S. Firestone, president of the Firestone Tire & Rubber Company, of Akron, O., conducted the proceedings during the celebration of "Firestone Day" in this city on November 10. The affair was attended by over 200 Iowa tire men, and consisted of an entire day of festivities, being terminated by a banquet in the evening. President Firestone, R. H. Firestone, general sales manager of the company, and prominent newspaperman of the city, made addresses at the banquet.

## BOWSER TO ADD

Fort Wayne, Ind.—The S. F. Bowser Mfg. Co., of this city, will soon add a three-story building to its present plant. The building will measure 25 by 40 feet and will be of fireproof construction, as all valuable papers belonging to the company will be stored in it. The foundations for this structure are already laid.

## SCENES IN PROGRESSIVE STANDARD WELDING FACTORY

# SENTIMENT PROPERLY APPLIED MAKES FOR SUCCESS IN AN AGENCY

## As Usually Considered It Causes Loss—Business Must Come First

By PATHFINDER

"IT is interesting to go into a town and analyze the various factors which go to make up the success or failure of the motorcycle dealer. Some surprising facts come to light. Commonplace circumstances that ordinarily could be calculated to work to the dealer's advantage in many instances have just the opposite effect."

This statement comes from a sales correspondent of one of the largest motorcycle factories. Having supervision over eastern territory that embraces a retail motorcycle field where competition is strongest he has had occasion many times to make personal investigation of conditions surrounding a dealer's business in the effort to ascertain the cause of sales slumps and to try and put his finger on the one thing that is causing the dealer to lose his grip.

The trouble with most dealers that feel themselves slipping is that they persistently refuse to recognize the objectionable condition in their business affairs that is causing the slowup. It is the hardest thing to get a dealer to see the fact that there must be a reform, if things are to go right, regardless of the sentiment between himself and his riders that seems to stand in the way.

THERE was a time when sentiment played an important part in the relations between factories and dealers. That was in the early days when there were ten orders for every machine made. Two or three years ago sentiment in the motorcycle industry began to find itself taking a back seat.

### What Competition Did

Competition froze out sentiment. Dealers who had influence with the factory sales department largely because they were one of the first dealers of that make of machine, suddenly woke up with a bump when they were let out of the fold.

They had been taking the path of least resistance in motorcycle selling. They could not shake off the old habits. The industry grew too fast for them. Their inability to keep abreast of the times caused them to drop out in favor of the younger and more enterprising man who had motorcycle enthusiasm combined with up-to-date merchant methods of conducting his business.

### At Home with Dealers

When sentiment lost its steady job with the manufacturers, it became the regular boarder in the retail trade. In a surprisingly large portion of the retail trade Mr. Sentiment is supreme dictator of the way the business should be conducted. But the old enemy, competition, is beginning to make things uncomfortable for Mr. Sentiment just as he did in the manufacturing end of the business.

Friendship is being eliminated in favor of good business dealings by the motorcycle dealer. He has found it an ephemeral asset in the building up and maintenance of his solid business structure. The dealer who allows sentiment to sway his better judgment has no come-back when his riders boldly take privileges that in the aggregate eat a heavy percentage of the profits which should rightfully accrue.

"You're a Good Fellow, Bill, but in This Repair Shop Business Comes Before Sentiment"

I have in mind a well-known New York State dealer who is selling his share of motorcycles in his territory, as compared with the sales of his competitors. Yet he cannot say that he is making money. He is a sentimentalist. This man started in business by selling one or two machines. Gradually his sales increased. The riders would come back for adjustments and repairs. He had to have some place to do this kind of work so he had erected a little shed in his backyard for their better accommodation.

"Open house" prevailed all the time in the little shed. Riders were allowed free range in the place. Tools and machinery were theirs even without the formality of asking. The shed took on greater size. The riders found even better facilities at their disposal.

### Moved to Larger Quarters

Suddenly our dealer friend became obsessed with an idea that moved him to seek a location in a downtown store. The plans called for the usual arrangement of salesroom in front and repair shop in the rear. Now he complains that his riders don't like the new arrangement a little bit. He still allows them to make themselves at home in the repair shop, but they find when they are in this part of the store that they can't hear what is going on out in the salesroom. A sad and deplorable state of affairs! The dealer fears that he is

Digitized by Google

DEALERS' SECTION

going to lose business. If he keeps on the way he is going he surely will. It is time he started a reorganization.

He is afraid that his riders may go over to a competitor. What if they do? Does he suppose for half a minute that his competitors are allowing the same state of affairs that sentiment is creating in his shop? When the riders go to his competitors' stores they will find their presence in the repair shop is undesirable—to put it mildly. They'll have to pay for what they get. The competitors are selling a commodity that might be labeled "Motorcycles-Accessories-Repairs." It is a strictly business proposition with them. They are merchants, not sentimentalists.

**Business vs. Sentiment**

Every rider is treated alike, which means that they get the best that the service of the store can give. There is no favoritism there. The competitors never have to meet the accusation that they are giving one rider preference over another. The store is conducted on a business principle that automatically gives maximum and uniform service to motorcycle riders with the minimum of overhead expense.

The difference between conducting a motorcycle business on sentiment, and conducting it as a butcher shop or grocery store is conducted, is strongly contrasted in the case of two dealers that have come under the observation of our friend the sales correspondent.

One sold 50 machines last season. The other disposed of 250. The verbal distinction tells the story.

**On the Downward Path**

The dealer who made the big number of sales is not a price-cutter. The sales supervisor investigated that phase of the matter to his fullest satisfaction. He is a sentimentalist. That covers the whole story.

He allows his riders to run his business for him. He has no backbone when it comes to setting a price on "trade-in" sales. The rider can get just about what he wants for his old machine. This dealer's repair shop is far from being a paying proposition. His bill for new tools is enormous. They disappear mysteriously. He knows where they go, yet he is afraid to put into effect a policy that will keep tools where they belong and only in the hands of his own repair men. Sentiment is ruining that dealer. And the deplorable part of the whole matter is that he sees trouble coming and refuses to recognize the evil which is creating it.

**A Contrast in Policies**

The dealer who sold the 50 machines made more money than our friend with 250 sales to his credit. That is almost obvious when we take into consideration the business principles that the 50-machine merchant applied to each sale. He made a profit on every machine traded in.

He calls his repair shop his service station. He makes money on his service yet never has been accused of exorbitant repair charges. He treats the riders right; and his prices on accessories are right.

**Making Sentiment Bring Business**

It cannot be said that he lacks sentiment either. He makes sentiment work for him, but always to a profit. But he does not let sentiment run his business. He does that himself and does it according to the same sound, tried-out business principles that characterize the other successful merchants in his city.

# KEEP CLEAN AND MAKE MOTORCYCLE CONVERTS

## Carelessness in Appearance Keeps Many Out of Sport

BY GEORGE M. JOHNSON

MY friend, the dealer, was busy with a consignment of motorcycle clothing that had lately come in. "Now, this is a good hunch," he commented, unfolding a neat garment somewhat like a duster. "You see it goes like this." Thereupon he draped the coat about his graceful form. The tails folded about his legs and the ends buttoned into place, thus forming what amounted to an extension above the tops of his leggings.

"As I look at it," went on the dealer, taking the coat off after his demonstration, "the thing we're all after, or should be after, is to be equipped for the road so as to accumulate a minimum of dirt from riding."

"Amen!" I agreed. "You put that very well."

"And with this coat," he proceeded, "a fellow can wear his best togs and no matter how dusty the roads, they won't be any the worse for it. I hope you noticed how the collar can be turned up and buttoned into place. Do I get your order?"

"Wait till the dust begins to fly a little thicker," I protested. "Then I'll probably fall."

It is unfortunate that more dealers are not alive to the importance of cleanliness on the part of users of motorcycles. The day when the average rider went around looking like a second class plumber's assistant is happily of the past. But it is none the less true that some of us, perhaps many, could easily be more careful as to appearance.

THE fact that motorcycle riders are not more careful has doubtless kept many people out of the sport. For example, I know a man in the insurance business who formerly used a motorcycle for making his numerous calls. Finally he gave it up and bought a young auto. The explanation he gave me was as follows:

"The machine always ran like a charm; never gave me a bit of trouble; but I couldn't keep clean. My clothes were always so dirty that I felt I wasn't doing justice to myself in a business way."

There are several things to be said about this. In the first place the machine he used was an old model, with very narrow and inefficient mudguards. Of course he couldn't keep mud and dirt away with such equipment. Then, too, he never took pains to dress himself so as to protect his clothes and shoes.

Here was a man who would be regarded by a large number of observers as having given the motorcycle a good test, a test in which it failed to make good. But the test was not a fair one. I have seen this man riding about the streets of the city with absolutely nothing on to protect his trousers but a pair of bicycle pant-clips. No wonder his legs became dirty! Furthermore his motor and crankcase were never cleaned, and showed a coating of oil and dust a good quarter-inch thick; of course it was next to impossible for his unprotected pant-legs not to come in contact with the filthy engine.

There is the matter of neatness as regards the leggings, for example. When new a pair of leather leggings or puttees will look very fine indeed, but as dust and the grease from the engine get in their work the original beauty fades quickly. It is simple enough to clean such articles, whether tan or black, and a little rubbing with shoe polish will make them as bright as ever. Gasoline sparingly applied will remove the oil spots and dirt.

I have demonstrated a number of times that it is easily possible to ride and keep perfectly clean, even under the most unfavorable weather conditions. As an illustration, I once had an invitation to a party in a town twenty miles away. It was necessary to go by motorcycle as there were no late trains back. But the day before, and part of that same day, it rained *hard!* The roads were in fine shape for a ride in one's best clothes! Instead of leggings I wore a pair of hip boots, sporting model, and stuffed a pair of dancing pumps into the pockets of my raincoat. A large handkerchief about my collar protected that from any stray splashes of muddy water. And I defy anyone to guess, from my appearance that night, that I had just mud-plugged it for twenty miles.

# DEALERS' SECTION

## SWENSON'S NEW BRITAIN SHOP

PROVIDENCE, R. I., November 22.—The Swenson-Hadfield Company, of which B. A. Swenson is principal owner, has leased a new store in the Hotel Grand building, 21 Myrtle street, New Britain, Conn., which will be opened about December 15, under the managership of Charles E. Hadfield.

Mr. Swenson today said that a large line of Indian motorcycles and side cars will be carried with a very complete stock of Indian parts, as well as accessories and supplies for every known make of car. As an added feature of the store, sporting goods and a general line of automobile tires, tubes and supplies also the Pierce and Indian bicycles and bicycle supplies will be handled.

Mr. Swenson also announced that Taunton, Mass., has been added to his distributing territory and that Alfred Beauvain has been appointed as the Indian agent there. This store will carry a complete line of motorcycles of the Indian make, parts and supplies.

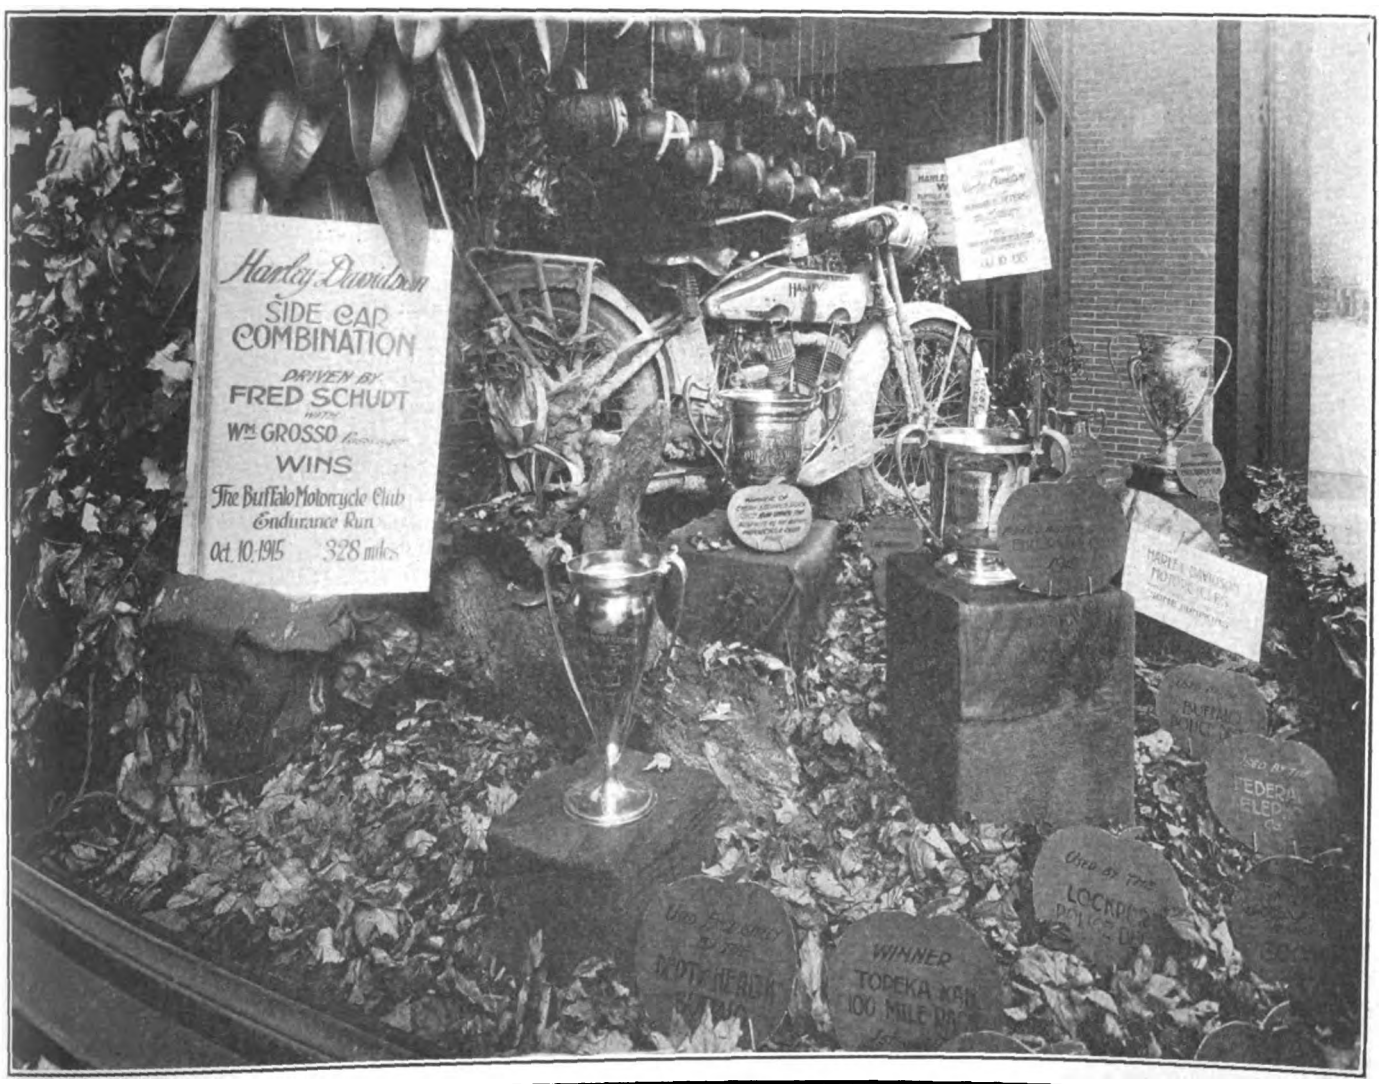
## CYR HAS IVER JOHNSON

Keegan, Me.—Dona P. Cyr has signed up for the Iver Johnson motorcycle for 1916. He sold five of this make during 1915. Cyr handles the Smith Motor Wheel for Aroostook County, also, for the new season.

## COUGHLIN SELLS SEVEN

The Bronx, N. Y., November 22.—Gene Coughlin, manager of the Bronx branch of the Harley-Davidson Sales Company of New York, with headquarters at 992 Washington avenue, has disposed of seven of his first shipment of 1916 models. All of these were three-speed twins.

Coughlin's place fills a long-felt want in this borough, as it carries an extensive stock of accessories on the shelves and can supply any demand in this line on short notice. Until it was opened, Bronx riders had to go to Manhattan to get most of the goods they desired right away.



THIS neat, inexpensive and timely display occupies the window of H. L. Peters, Harley-Davidson distributor at Buffalo, N. Y. It is a genuine harvest scene, with maple leaves covering the floor to a depth of about three inches and with bundles of cornstalks, pumpkins and branches of tamerack and maple trees as trimming. There are several rotted logs on the floor of the display, also. In the upper part are twenty-three small pumpkins, each carved with a letter. In the foreground are a number of cardboards cut in pumpkin form and bearing appropriate titles. The machine exhibited was that ridden by Howard Peters, of the firm, in the recent Buffalo endurance run. The trophies are also his. The boxes are covered with green crepe paper.

The cost of the display is amazingly cheap, being about $5. The 25 small pumpkins cost five cents each, one large pumpkin cost sixty cents, and the thirty cardboard pumpkins cost ten cents each. The maple branches, leaves and logs were gathered in the woods.

## TORONTO TRADE CIRCLES ARE BEGINNING TO HUM

### Many Changes and New Appointments Indicate Banner Cycle Season

TORONTO, Ontario.—Important announcements, appointments, transfers and visits of trade moguls have followed upon each other in tumultuous fashion in the Canadian motorcycle and bicycle fields during the past week, with the result that a general reawakening is now apparent. Most everybody is remarking how good the general situation is in spite of the war, and with so many important changes taking place in the cycle trades it looks as if 1916 will be chalked down as one of the banner years.

**Big Deal Affects Motorcycles**

One of the biggest deals ever put over in Canada has been the purchase of the Russell Motor Car Company, Limited, Toronto, by the Willys-Overland Company of Toledo and the result has been the organization of a $6,000,000 concern in Canada to manufacture Overland cars. At first sight this looks like a straight automobile news item, but it is not, for the simple reason that the Canada Cycle & Motor Company, Limited, has been under the same roof with the Russell Motor Car Company and the directorates have been very similar. It is announced that the "C. C. M." business will not be affected in any way for the present, but a brand new plant may be built to provide for the manufacture of bicycles and for the wholesale distribution of the many accessory lines handled by the company. J. W. Gibson, well known throughout the American, as well as the Canadian, trade, is to remain as general manager of the Canada Cycle & Motor Company, while President T. A. Russell of that company has been made vice-president of the new Overland firm. It is a significant feature that C. A. Earl, formerly one of the officers of the Hendee Mfg. Company, has been made a director of the Canadian Overland Company.

**Handling Hawthorne Products**

That the Canada Cycle Company intends to "carry on" as usual, however, is indicated in the announcement that papers have been signed whereby the big Toronto concern has been granted the sole rights for the whole of Canada for the distribution and sale to the trade of all lamps and fittings made by the Hawthorne Mfg. Company, Bridgeport, Conn. Old Sol lamps were formerly handled in Canada by the Pollock Mfg. Company of Berlin, Ont. Negotiations were opened at the Chicago show.

Another big arrangement that has set the trade on edge is described in the announcement that the T. Eaton Company, Limited, of Toronto, a large department store, has decided to go into the manufacture of bicycles. Already orders have been placed by H. O'Neill, of this concern, for parts based on an output of not less than 5,000 bicycles during 1916. It is understood that the frames will be imported from the States, but hubs, brakes, rims, tires and other parts will be made right in Toronto. An order has been placed with the Persons Mfg. Company, of Worcester, Mass., it is said, for 5,000 saddles and a large quantity of pedals. Among other things, the T. Eaton Company is planning to hold a private bicycle show in Toronto early in the new year. The sales of the company during 1915 amounted to over 2,000 bicycles, it is announced.

**New Schickel Agent**

The Fairn-Cooke Company, Limited, Foy Bldg., Toronto, have been appointed Canadian representatives for the Schickel Motor Company and already two Toronto dealers are dickering for the sale of the Schickel lightweight in the local territory. One of these dealers is J. A. Varley, formerly the Harley-Davidson sales representative. W. H. Cooke, of the Fairn-Cooke Company, who has just returned from a business trip to the Persons plant at Worcester, announces that he turned over Persons products to the value of $20,000 in 1915. He will shortly make a trade trip through to the Pacific Coast.

**Buffum Scents Big Business**

Ed Buffum, manager of the Canadian branch factory of the Hendee Mfg. Company, has returned from an important trip to the Springfield headquarters, where he made arrangements for an increased 1916 business. The new Indian Featherweight is awaited with interest in the Dominion and a fairly large number of orders have already been booked at the Toronto factory.

J. Madden, one of the officials of the John T. Wilson Company, Limited, Canadian makers of the Cyclemotor, has joined the engineering force of the Cyclemotor Corporation, Rochester, N. Y. The production of the Cyclometer is being carried through on a large scale at the Rochester works. It is announced at the local headquarters that D. M. Anderson, President and General Manager of the Cyclemotor Corporation, will go to the Pacific Coast soon to place agencies in all of the large centers. A distributor for the Coast may be appointed. The first deliveries of completed motors will probably be made from the Rochester plant in December. The local factory is handicapped through inability to secure large quantities of steel.

H. Davy of the Planet Bicycle Works, Toronto, points out that prices on British-made parts and accessories are soaring beyond sight. Steel tubing has advanced 55 per cent. and is practically impossible to get. The Humber people have advised the Planet company that bicycle prices have been advanced 15 per cent. while the wholesale price of Humber motorcycles has been raised 30 per cent. Lycett's, the English leather-goods manufacturer, has also notified the local concern regarding still further advances in leather accessories. Very little stuff is being imported from the Old Country. The Planet company is fortunate in having so much steel tubing on hand that their factory is almost bulging. This will be used in the manufacture of bicycles for next year. One small shipment was lost on the Hesperian when that vessel was sunk by a torpedo.

**Three Motor Wheel Agents**

The Dunlop Tire & Rubber Goods Company, Limited, Toronto, is making arrangements to bring out some new motorcycle and bicycle rubber sundries. The Dunlop motorcycle casing, 28 x 3, is now being sold to consumers in Canada at a very low price.

A recent visitor was P. D. Saylor, manager of the London, England, branch of the Goodyear Tire & Rubber Company, who was formerly in charge of the fine Canadian offices here of the Goodyear. He met many old friends.

After surveying the local field, Fred St. Onge, travelling representative of A. E. Bregent, Montreal, has decided that Toronto is too large a city for one agency of the Smith Motor Wheel and he is making arrangements for the division of this Canadian metropolis into three districts. At time of writing he had not yet signed up with any dealer here for the "Bicycle Booster" for 1916.

## TELEPHONE CO. HAS TWENTY INDIAN TWINS

VANCOUVER, B. C., November 19.—In addition to the Indian sold to the B. C. Telephone Company a few weeks ago, W. H. Morrison, local Indian dealer, has just sold a 1915 model 5½ h. p. twin to the same company for use by the trouble shooting department in the Cloverdale district of the province. The telephone company have now a fleet of about a score of Indians, all of the machines being used in the endeavors of the company to maintain an efficient and uninterrupted service so far as this is possible.

If there are two things a tourist remembers about Los Angeles it's movies and police. The moving picture industry in and around that city is a whale of a thing. They create films out there just like Italy turns out spaghetti. Almost any day you can motor out to a movie plant and see 'em burning Rome or chasing outlaws or acting out a peach of a love story—for the screen o' course.

Then on top o' that Los Angeles is one o' those live, tingly cities that's up on its toes all the time shootin' radium right and left. Logically the police boys have to be snappy chaps—not because Los Angeles folks don't behave but just because there's a lot o' law and order detail to look after like there is in all big cities where the red corpuscle predominates.

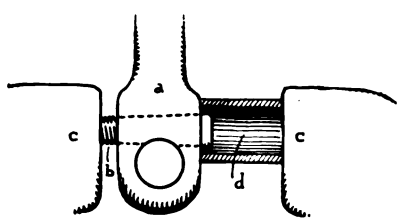
## USEFUL WRINKLES FOR THE SHOPMAN

### Removing Keys in a Vise and Constructing a Leather Hammer for Light Work

BY COURIER

IN traveling about the country one can aften come across little labor-saving devices which utilize the garage equipment as it is, without the need of making special fittings. One that the writer has in mind is quite well known among machinists, but has not been seen in many shops in the motorcycle line. It is the use of the vise in seating or removing keys.

The last time seen was in a small town where a motorcycle dealer had an emergency bicycle repair to make. The rider of the bicycle was a cross-country cyclists and his mount bore the same trademark as the motorcycle that the dealer represented. The cyclist had broken his pedal crank and had no means of putting on the spare crank which he carried.



Drawing the Crank Key

#### How Key Was Drawn

The garageman placed the crank and axle in the vise, after removing the key nut and placed behind it a short piece of pipe, as shown in the first figure. He then set up the vise until the key was started enough to pull it out with the pliers. The crank was then removed and the spare one substituted, after which the vise and a lead hammer set back the key. The threads on the key were spared by this method, which would not have been the case had the key been driven out by a hammer.

There is really nothing new in this idea as far as the bike shopmen are concerned. It will come in mighty handy for the motorcycle man in lots of cases, such as getting a stubborn sprocket from a hub or countershaft. In such cases, the piece of pipe can be put over the shaft or hub with an end butting against the stationery vise jaw. The shaft end is butted against the other jaw and the handle is operated. The pipe should of course be longer than the shaft.

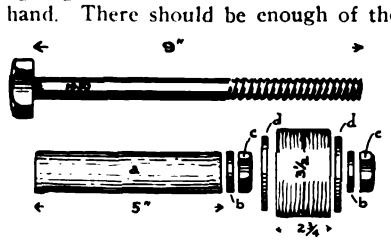
#### Lead and Leather Hammers

Speaking of lead hammers, isn't it strange that these hammers are so scarce in motorcycle places? Unless they are absent in many instances they are in such poor shape that their "soft-thumping" ability is badly crippled and one might as well use the pipe handle. The lead hammer is too popular an institution where the dealer has a crowd of riders who fix their own machines, and when they use it at all, they use it for things that need an even softer "swat," such as plated or enameled parts. A leather hammer is just the thing for such work and one can be made up pretty cheaply with a little ingenuity. Such a hammer is constructed as follows:

The handle is a ⅜-inch bolt about nine inches in length. The thread should be run down for at least 4¼ inches from the end on the bolt. The grip is made from a cylindrical piece of wood, the inside hole being slightly over ⅜-inch in diameter. This piece should be five inches long. It is shown at A in the second figure. It should be about 1¼ to 1½ inches outside diameter. The other parts are two washers the same diameter as the grip A (shown as B,B), two nuts threaded to fit the handle (C,C) and two iron discs D.D. The latter should be bored to slide on the handle and should have an outside diameter of three inches.

#### Building Leather Hammer

The "swatter" portion of the hammer, shown at E, consists of a series of leather or rawhide discs 3½ inches in diameter and having ⅜-inch holes in their centers. A shoemaker or saddler can cut these out for the garageman, if he has not washer-cutter at hand. There should be enough of these discs to make a pile 2¾ inches high when pressed down. The hammer is now ready for building up.



Construction of Hammer

Put grip A on the handle, following it by one washer B. Then screw down a nut C until the grip is locked in place. Slip on a washer D and follow it by the leather discs E. The second washer D now goes on, and the second washer B. Finally the second nut C is put on and set up very tightly. Hold this nut in the vise jaws and turn the hexagon head of the handle. You now have a leather hammer for light work and one that will not chip enamel or mar the nickel-plating. The parts as they fit on the iron bolt or handle are seen in the figure just below the bolt.

#### The Chilly Passenger

While up north, near the international boundary a few days since, I came across an example of an uncomfortable sidecar passenger. I have seen very few of these in my rambles here and there, but this one—a girl passenger—certainly looked far from happy. The day was cold, and the fair one had all the symptoms of that discomfort which comes from chilliness.

As the combination was going my way we rode alongside for quite a distance, until a town was reached and the driver and girl dismounted to take a stretch. The secret was out then—a thin robe for the sidecar and thin shoes for the passenger. The sidecar, I ought to say right here, was a wicker one. Finally, I asked her if her feet were not cold and she said yes.

#### Arctics Are Purchased

The little town had no elaborate layout of feminine apparel and the driver was not desirous of purchasing blankets, so a compromise was made on a pair of arctics for the passenger, along with some newspapers. We then continued our journey until the pair turned off a side road and said goodbye. The uncomfortable expression had vanished a few miles after the arctics were put on.

There is good meat in this arctic idea for the cold weather. For a man passenger who is not equipped with leggins, they work finely, the trousers being tucked in the tops. They are particularly useful for tandem work, in addition. For the fair sidecar passenger, the combination of a heavy robe and the rubber footwear is first class. You never can tell when the passenger may have to dismount while repairs are being made. The arctics cost very little in comparison to a set of riding leggins.

### PERRY'S EXPLANATION

In a recent paragraph relating to the race meet at the Southern Arizona Fair in Tucson on November 4, it was stated that Bob Perry, Excelsior rider, would not start in the 35-mile event when he had expected the attraction of a 100-mile contest. As a matter of fact, Perry did not arrive in Tucson until after the race had been finished, due to the fact that the race was advertised for a later date. Perry states that he would undoubtedly have started had he been at the track in time.

# Lowering Records in Chicago Six Day Race

## Gruelling Grind is Fast Telling on the Riders; Teams Drop Out, Several Are Lapped

CHICAGO, Ill., November 23.—Up to the fiftieth hour two of the fifteen teams that started in the Chicago six-day grind, which began on Friday night, had dropped out and five teams were behind the leaders, who had covered 1,053 miles and 6 laps, the previous record being 1,050 miles flat. The world's record for the fiftieth hour has, therefore, been broken by three miles and six laps.

The fifteen teams that shot from the mark at the crack of the starter's gun were as follows: Lawson-Root, Lawrence-Hanley, Piercey-Bedell, Wohlrab-Kopsky, Dupuy-Anderson, Comeron-Kaiser, Ryan-Thomas, Carman-Corry, Young-Rudi Russe, Walthour-Walker, Mitten-Hansen, Grimm-Sullivan, Madden-Eaton, Miller-Ohrt, Madonna-Vandersuyft. Linart was originally teamed with Walthour, but refused to appear in the six-day grind after an event in which he participated on Friday had been declared no race by Manager Chapman.

### Fast Pace Begins to Tell

The fast pace set by the riders during the early hours of the race soon began to tell on them with the result that at three o'clock in the afternoon on Saturday the seventeenth, the leaders finished 365 miles and three laps, which was 22 miles behind the record. In the third hour of the grind the Miller-Ohrt and the Madonna-Vandersuyft combinations each lost one lap. Miller started a jam early on Saturday afternoon in an effort to regain the lost ground. He managed to open a wide gap, but the field put on more speed and brought back the ambitious rider.

Toward evening the cyclists started to cut down, Norman Hansen setting the pace. The team of Root and Lawson seemed to be the favorites with the crowd, though Carman, Corry, Hansen and Mitten are fast becoming popular because of the hot pace they set. Sprinting was stimulated in the evening by the primes which were set up by the management.

### Two Teams Drop Out

Early Sunday morning saw two teams drop out of the race. Tom Grimm, the Newark boy, who is making his debut, was all battered and patched up, and decided to quit. His teammate, Tim Sullivan, of New Haven, then left the track. Vandersuyft, teamed with Madonna, also knocked off, followed by Clarence Miller, of Atlanta, who was riding with Ernie Ohrt, of San Francisco. Ohrt and Madonna, the survivors, then established a new combination and forfeited the customary three laps. By eleven o'clock on Sunday night the new team had recovered one lap.

Two very sensational sprints occurred on Sunday evening. Hansen and Mitten were tied with Cameron and Kaiser. Then Eaton and Madden stepped out and caught up with the two leaders. The pacemakers tried in vain to retain their advantage, but could not deny the strength of their pursuers. The four teams who caught up were Walker-Walthour, Wohlrab-Kopsky, Corry-Carman and Piercey-Bedell. Ten minutes later Dupuy-Anderson caught up with the van and there were eight teams in the lead.

Early in the evening it seemed that Rudi Russe would withdraw, for his strenuous efforts in the afternoon were telling on him and he was wobbling. He recovered, however, and Tim Sullivan, who was waiting for a chance to take Rudi Russe's partner, gave up all hope of being teamed within the time limit.

### Big Crowd Attends

Sunday night's crowd was an agreeable surprise to the management. The local fans turned out in large numbers and cheered the riders to an echo. The strain of the grind is telling on the riders; deep lines show on their faces, while most of them haven't been annoyed by a barber since the start.

Early on Monday morning eight teams were in the lead, these being Piercey-Bedell, Wohlrab-Kopsky, Dupuy-Anderson, Cameron-Kaiser, Corry-Carman, Walthour-Walker, Hansen-Mitten, and Madden-Eaton. Lawson-Root and Lawrence-Hanley were both one lap behind the field, Ryan-Thomas and Madonna-Ohrt were two laps behind, while Rudi Russe-Young had lost three laps.

### DAYTON CLUB'S HOUSEWARMING

Dayton, Ohio.—The Dayton Bicycle Club held a house-warming in its new quarters on Third street on Saturday, November 13. Appropriate autumn decorations made the house very attractive, and equally appropriate refreshments were served. Elmer Redell was chairman of the committee. The club has made a hit by its recent entertainments. A booster meeting and lobster dinner were held on the last Saturday in October.

### WILLIAMS OPENS A SHOP

Mesa, Ariz., November.—Sam Williams has opened a bicycle repair shop at Main and Macdonald streets, Mesa. He expects to handle some standard line of bikes, but has not signed up any agency.

In Recent Maneuvers at Ontario: Body of Cyclists Drawn up Beside a Road for Rest

# The Cyclist With the Colors

By Louis Hall

UNTIL a few years ago the military cyclist was unknown. The bicycle arm of the service has, however, been developed as rapidly as the aviation wing in many countries, so that practically every nation now engaged in the present war has its bicycle battalions, divisional cyclist corps, bicycle dispatch riders, bicycle scouts and cycle engineers.

### Military Duties Dangerous

The work of these wheelmounted soldiers has become both varied and dangerous; yet, in this almost horseless war, there is the same charm to the bike brigades as was formerly evident in the cavalry. Although the duties of a military cyclist are mainly hazardous, there are so many opportunities for interesting adventures and individuality that the cycling branch of an army has become exceedingly attractive to prospective warriors who can qualify. So apparent is the danger feature for the cyclists in the conflict now raging that the wheel corps have been nicknamed "Suicide Clubs."

On the other hand, although the work appears dangerous, the casualty lists so far published contain but few names of members of the bicycle units, which is an indication that the mobility of the wheelmen forms an actual safeguard. Moreover, the value of these wheeled "hornets" in warfare is becoming more and more evident for the same reason—the ability to perform many swift offensive and defensive movements.

The idea of utilizing the bicycle for army purposes was first urged, according to military authorities, by G. S. Lyles, who was one time the amateur cycling champion of England, and afterwards became major of the 26th Middlesex cyclist battalion of the Imperial forces. The suggestion aroused a certain amount of caustic comment, but after a few trials the bicycle was readily adopted, until now even Canada has been raising and sending forward various bicycle units. It was accepted by the Dominion military authorities only after the European war began, however.

### Work of the Cyclist-Soldier

Officially, a bicycle corps is considered a force of mobile infantry which can be used for swift and silent flanking movements or to act as mobile reserves to speedily reinforce a weak point in a battle line. At the same time each cyclist is taught to act individually as a despatch carrier, scout or signaller. Small details of cyclists are also used in reconnaissance work during big drives or invasions into hostile country. The whole bicycle force, generally a divisional corps composed of about two hundred officers and men, may be used to rush ahead in order to seize a strategical position, or the "flying squadron" may become an elusive body of fighting men to puzzle and harass the enemy. Bicyclists have already been used in this war to repel cavalry attacks on side or flanking roads. In this connection the wheelmen pile their machines across the highway and the horses can not get through. When the cavalry reach this obstacle they came under the direct fire of the riders in ambush, and must perforce retire or be wiped out.

Among the many advantages gained through the use of bicycles are that the riders have to pay a minimum of attention to their mount, while they are in action. With cavalry, every fourth man is detailed to hold horses so that one fourth of a horse unit is practically valueless, as far as actual fighting is concerned, during an engagement. The bicycles are the most noiseless vehicles available; and a rider can travel apace with cavalry, can go greater distances in one day and forms a smaller target than a horse-mounted soldier, yet he can also go at infantry pace of three to four miles per hour. The cyclists can even act as infantry in support of cavalry while the latter is on the offensive. That cavalry needs a good supporting force of some kind is a military axiom.

### Why They Are Called "Suicide Club"

Among other things cyclists have already been used to draw the fire of a hostile force—hence the title "Suicide Club." Yet the riders have a comparatively easy time of it. They seldom have to make long route marches on foot, and it is known that riding a wheel is always less hard than tramping except when an exceptionally steep grade is met. Bicycles do not have to be fed. They are easily repaired; they can be carried across small streams and over the usual obstacles. The ma-

**Officers and Men of a Canadian Divisional Cyclist Corps Drawn Up in Ceremonial Order at Exhibition Camp, Toronto**

Digitized by Google

chines are not expensive and more can be picked up most anywhere when a shortage or loss occurs.

The soldiers carry little equipment themselves. Nearly all of the accessories of war, including the rifle, are fixed to the bicycle and the riders are not hampered. The bicycle equipment includes two luggage carriers, a small oil lamp, bell, pump and fittings to carry the rifle. Officers carry automatic revolvers and the men take rifles and bayonets.

In order to conform with the scenery as much as possible, all military bicycles are "done" in green paint. The whole machine, with the exception of tires, chain and saddle, is covered with this war shade and there is not a glistening spot on the bicycle. Where night manoeuvers are necessary, however, it is customary to attach white paper to the rear mudguards so that the rider to the rear can see the position of the man ahead and thus avoid collisions. The extreme quietness possible with wheels at dead of night enables a bicycle corps to make quick night attacks, which, on account of their speedy delivery, carry considerable weight with them. No actual charges are made on the bicycles, however, the cyclists advancing on foot when the time for striking arrives.

Members of a Canadian Divisional Cyclist Corps in Line for Parade

### Carry Munitions and Rations

At times, the bicycles are employed to carry small quantities of rations or ammunition to hard-pressed soldiers in the fire trenches, in which case the fighting men are reached in the usual way—through communicating trenches and not overland. At other times the luggage carriers are loaded with medical supplies for Red Cross purposes. Already cyclists have been thrown out as a "screen" of scouts to advance along all roads and paths to feel for the enemy's location and, in this, they frequently act in conjunction with the aeroplane. Because of the latter, however, sudden movements of comparatively large bodies of troops are now necessary, more than ever, and sometimes bicycle reserves are rushed to fill gaps in a line. The cyclists, according to reports, seldom are called upon to take a turn in the trenches, and their duties give them far more freedom and exercise. In practically all cyclist corps raised in the countries of the Entente Allies, at least, the majority of the members are athletic and able-bodied—to meet their great variety of tasks.

One of the most unique uses to which the bicycle has been adapted in modern warfare has been the employment of the wheels to carry engineers, including bridge builders, sappers and miners, ahead of a column for the purpose of erecting bridges or fortifications. In like manner, cyclists are now used to follow a retreating army for the purpose of destroying military facilities in front of them.

### In Recent Field Maneuvers

A striking example of the value of cyclists was seen in recent large field maneuvers extending over a line of ninety miles in Ontario, Canada, when 12,000 troops, consisting of infantry and artillery, were kept busy for more than two weeks by two hundred bicycle soldiers who constituted the sole hostile force. On this occasion, the bicyclists made repeated night attacks in unexpected places, surprised transport columns which were carrying food supplies to the main army and prepared many daring ambushes. The manner in which the small number of cyclists harried and worried the great opposing force caused wide-spread comment and demonstrated the great value of this mobile militia.

When the United States takes up the silent two-wheeler as a military adjunct, it will be the last great power to adopt the bicycle for this purpose. American army officials are undoubtedly being deeply impressed by the important role which the bicycle is playing in the present war, and it would seem that the day is not far distant when they will call for cyclist-soldiers to help protect the country.

---

## WINS POINT TROPHY

The concluding point race for the season of the New England Wheelmen of New York City was contested on Sunday, Nov. 21, over the Bronx Boulevard and resulted in a victory for C. J. H. Tonjes, who had a handicap of one minute. He was followed across the finish line by C. Spiomer, with forty-five seconds allowance. J. Mass, handicapped at 1:15, and G. Polercy, who had 1:30 start. Twenty men started in the race. As a result of the season's competition E. Aickelin gains possession of the point trophy.

# KUEHL KILLED IN WINDY CITY RACE

## Chicago Amateur Meets with Fatal Accident in Preliminary Races at Coliseum—Kockler Stars in Three Amateur Events.

CHICAGO, November 20.—The start of the six-day bicycle race at the Coliseum last night was marred by a fatal accident to Louis H. Kuehl, one of the local amateur stars. The accident came in one of the preliminary races arranged by the management, and the race in which the fatality occurred was the six-lap (3-5 mile) handicap. Kuehl, who was riding in the first heat, either became confused or tried to avoid running into another rider when he was seen to fly up the track, hit the fence and fall headlong to the bottom of the cement floor.

The injured amateur was rushed into the office of the building where he died in less than ten minutes, without regaining consciousness. The sad part of the accident was the fact that Kuehl's mother, sister and cousin were at the races and saw the accident.

The dead cyclist, who had just accepted a position with the Excelsior Cycle Co., as a salesman, was one of the most popular of the local contingent of amateurs. He was instrumental in maintaining the Chicago Cycling Club, of which he was an officer, and he organized many club runs and road races.

After the accident to Kuehl the amateurs rode in a listless way and seemed to feel keenly the death of their friend and fellow competitor. Ernest Kockler won both races that were on the program for that class, and Arthur Van Der Palt, the Belgian-American C. C. star, finished second in each event. Ralph Schepens finished third in the handicap, and that place in the five-mile open was taken by Herman Hoffman. Jimmy Hunter gave a mile exhibition on his motorcycle to help amuse the crowd until the start of the six-day race at 10 o'clock. Summary:

Six-lap handicap (3½ mile), amateur—Won by Ernest Kockler, Chicago C. C., scratch; second, Arthur Van Der Palt, Belgian-American C. C., 75 yards; third, Ralph Schepens, Chicago C. C., 40 yards; fourth, Andrew Andresen, Conquer A. C., 30 yards. Time, 1:13.

Five-mile open, amateur—Won by Ernest Kockler, Chicago C. C.; second, Arthur Van Der Palt, Belgian-American C. C.; third, Herman Hoffman, Chicago C. C.; fourth, Andrew Andresen, Conquer A. C. Time, 11:43.

One-mile motorcycle exhibition by Jimmy Hunter, Newark. Time, 1:31⅘.

### Sprint Races on Thursday

Chicago, November 19.—At the preliminary meet to the six-day race at the Coliseum last night Ernest Kockler, among the amateurs, and Frank Corry and Joe Kopsky, among the professionals, carried off the large end of the purses in their respective classes.

Kockler captured the final heat of the three-mile open and finished second to Arthur Van Der Palt in the half-mile handicap for the simon pures; and from the demonstration he received there was no doubt about his being the popular favorite with the crowd. Louis Kuehl finished second in the three-mile open, beating out Andrew Andresen and Willie Wohlrab in the rush for the tape. In the handicap, Van Der Palt took advantage of his lead and won by a safe margin from Kockler, while Willie Wohlrab took third place and George Klasen fourth.

Frank Corry shone in the five-mile open for the cash chasers, and he defeated Eddie Root, Worth Mitten, Eddie Madden and Norman Hansen in a great finish after a two-lap sprint. Joe Kopsky, an 85-yard mark man, won the professional handicap at a mile. Lloyd Thomas, 35 yards, ran second, and Ray Eaton, 30 yards, third.

The professional paced race, billed to run in two heats at ten miles each, was somewhat of a disappointment. In the first heat, at ten miles, both Bobby Walthour and Victor Linart punctured and they mounted sprint wheels to finish, most of the time Clarence Carman, the ultimate winner, being on the track alone. In the second heat, cut to five miles, it appeared as though both Linart and Walthour did not care whether they won or not, and Carman again won. Manager Chapman declared the event no race, and all three of the riders threatened to withdraw from the six-day race. Linart refused to ride and the N. C. A. has been asked to suspend him. Gordon Walker, the Australian, took Linart's place with Walthour in the big race: Summary:

Half-mile handicap, amateur—Won by Arthur Van Der Palt, Belgian-American C. C., 45 yards; second, Ernest Kockler, Chicago C. C., scratch; third, Willie Wohlrab, Jersey City, 45 yards; fourth, George Klasen, Danish-American A. C., 20 yards. Time, 59 seconds.

Three-mile open, amateur—Won by Ernest Kockler, Chicago C. C.; second, Louis Kuehl, Chicago C. C.; third, Andrew Andresen, Conquer A. C.; fourth, Willie Wohlrab, Jersey City. Time, 7:11.

One-mile handicap, professional—Won by Joe Kopsky, New York, 85 yards; second, Lloyd Thomas, San Francisco, 35 yards; third, Ray Eaton, Newark, 30 yards; fourth, Eddie Madden, Newark, 50 yards.

Five-mile open, professional—Won by Frank Corry, Australia; second, Eddie Root, Boston; third, Worth Mitten, Davenport; fourth, Eddie Madden, Newark. Time, 10:42.

Motor-paced race, professional—Won by Clarence Carman, Jamaica; second, Bobby Walthour, Atlanta; third, Victor Linart, Belgium. Run in ten and five-mile heats. Riders finished the same in each heat. Times, 19:42 and 9:31⅘. Declared no race.

### SECOND SCHENECTADY RACE

Schenectady, N. Y.—There were seven starters in the second of a series of bicycle road races that are being held under the auspices of A. Haber, a local bicycle dealer, whose store is at 408 Smith street. The distance of the race was at ten miles. A. Strube, with an eight-minute allowance, was first; E. Friborg, scratch, second; and C. Strube, third. The fastest time was made by E. Friborg, who covered the distance in thirty-three minutes. The starters were: A. Strube, C. Strube, I. Metz, L. Leffler, S. Calkins, A. Haber, E. Friborg.

The Schenectady cyclists have not yet organized into a club, but contemplate doing so next spring.

### AN EFFECTIVE DEMONSTRATION

Burlington, Kansas.—Mosher & Son, Smith Motor Wheel dealer, had a unique and very effective feature in connection with their exhibit at the recent county fair here. A board track, four feet wide and about twenty feet in diameter was erected at the side of the exhibit. On this track a motor wheel attached to a bicycle was ridden constantly every day of the fair from 11:30 a. m. to 5 and 6 o'clock at night. The feature attracted crowds and served as a splendid demonstrator for Mosher salesmen when talking to prospects.

### BICYCLE SALES WERE BIG

Tacoma, Wash.—The Washington Cycle & Supply Company, wholesale distributor of the Dayton line of bicycles, reports the sale of more bicycles during September, 1915, than the total during the previous 18 months. The firm recently established a branch warehouse in Portland, Ore., to facilitate delivery of machines. Over 200 bicycles of 1916 model have been ordered so far.

### BICYCLE RACE FOR BOWL

Tacoma, Wash.—Plans are being made to hold a bicycle race at the stadium in this city. The big bowl has an excellent cinder track in it. It is believed that a number of crack Pacific Coast riders can be secured for the meet.

# REELING OFF CENTURIES—By Fred M. Sanborn

THE most common experience of the century rider, which is very amusing or annoying—depending upon the humor of the cyclist, a very fickle thing—is the trouble he frequently encounters in getting his century blank signed in order to comply with the rules requiring a signature every twenty miles. It happens at times that he finds himself in some obscure spot, miles from any town or village where he can easily get a "John Hancock," and is compelled to ask laborers working in the fields or a passerby to place his name on the blank. The questions asked under these conditions are often exasperating, requiring, as they do, a long and detailed explanation as to why the signature is requested. From the doubtful attitude shown by some of the people in these out-of-the-way places, one would imagine that they were signing their death warrants or mortgaging the old homestead to a stranger.

### Old Darky Asked the Favor

An incident of this kind occurred to me several years ago, when by force of circumstances I had to request an old darky to put down his name and address. After asking the usual question and listening to my long-winded explanation, he turned the blank over, carefully examined each side, and then calmly announced that he could not write! By a superhuman effort I restrained myself from committing something akin to murder—but it was an awful strain. I certainly was bloodthirsty. On another occasion I asked one of our dusky skinned brothers to confer the same honor on me, and before I could warn him he thrust into his mouth the indelible pencil that I had handed him. But he sure did snatch it out in a hurry—and he was indignant! No, sir! he wouldn't sign that blank, and he didn't.

Of course the century plugger has other experiences, minor mishaps, such as punctures, etc.; but these are things to be expected, and are all in the day's work, so to speak. There is one exception, however, and that is the puncture that you cannot fix when you are many miles from home, short of funds and far away from a railroad station. I remember well the time when I had a flat tire on my rear wheel, and Baltimore, my home town, was twenty-five miles away. And to make matters worse, I had no money with me. That twenty-five miles was one of the longest stretches I had ever covered. It was bumpidy, bumpidy, bump, bump, bump, uphill and downhill. Talk about horse back riding being good for the liver! I had never had any trouble with my liver since. And talk about push! I developed enough horsepower pushing that flat tire up those hills to roll up a thirty per cent grade without the slightest effort.

### Left His Money Home

Riding without funds is likely to prove embarrassing, to say the least, at almost any time—especially when not expected. I can recall an instance of this kind which happened in my early cycling days. I broke my crank hanger at a place called Chase Station, twenty miles out from Baltimore, and as luck would have it, I hadn't a penny with me, having forgotten to take out my bankroll (?), when I changed to my cycling costume. Well, it was some walk. I coasted downhill whenever possible, but as the road was rough in places and fairly well congested with traffic, I was not able to do much coasting. However, I did the Edward Payson Weston stunt for twenty miles—and I think that I hung up a record that the old veteran never even approximated! I certainly walked at a fast clip.

I have in mind another occasion when lack of "filthy lucre" put me in an awkward position. I had been making a tour of the Shenandoah Valley, in Virginia, with the Natural Bridge as my destination. I reached a little town called Lexington, fifteen miles from Natural Bridge, and stopped there for supper, it being still rather early in the evening. Inquiring about the road to the bridge, I found that reports were everything but encouraging. The hotel clerk told me that there were good roads for about five miles out, but that beyond the highway was so rough and hilly that a buggy could hardly be driven over it—not very encouraging news to a chap who had already put eighty-five hard miles behind him and was beginning to feel tired out.

I considered the matter for a while and finally came to the conclusion that since I had come all this way to see the place, I was going to see it or "bust." My money had dwindled to such an extent that I did not have enough left to carry me for another day, so I determined to push on and see Natural Bridge that evening. I got there all right, but found that it would set me back a dollar to view the Bridge and that hotel accommodations would cost four dollars. However, I just had to see it, so I came across with my little dollar, took a good look at the bridge, and then decided to ride back by moonlight to Lexington and spend the night there.

"He Turned the Blank Over, and Carefully Examined Each Side"

Hardly had I covered but a few miles of the mountainous foothills, than I became fully convinced that I was badly in need of a rest. I, therefore, sat down by the roadside and in a few minutes was fast asleep, and it was one o'clock in the morning when I awoke. It was certainly too late to return to Lexington, and of course I wasn't going to remain awake all night. So I fixed a couch of wheat sheaves in a neighboring field and placing a couple over me in lieu of blankets, I slept peacefully until morning. I was still two days' journey from Baltimore and had to have more cash. I telegraphed home to have some money wired me at Winchester, but when I got there I found that, since it was a holiday, no money could be gotten by wire.

### There Were no Pawnshops

I was desperately hungry. I had a gold watch and fob, but there were no pawnshops. Some of the Baltimore boys whom I had expected to meet at Winchester did not arrive. As a last resort I decided to hunt up the police headquarters and lay my case before some tender hearted chief. I found the headquarters all right; but the chief informed me that no funds were provided to take care of such cases as mine. I touched him for a personal loan, and he surprised me by handing over five good dollars. Some luck!

Digitized by Google

Another incident that is still very vivid in my mind is the experience I had this summer on my vacation trip when the bottom cup on the front fork of my bicycle broke while crossing the Allegheny Mountains, sixteen miles from the nearest town. The wheel became almost unmanageable as regards to steering, and I tried to get a lift from some of the passing autos, but there was nothing doing. I guess I hailed a dozen of them, but not one would help me—some had weak valves, or they were afraid of scratching the enamel off their machines, while others feared they could not make the grades with the added load. Finally I cursed the whole race of automobilists from A to Z, the man who invented them, the men who ran them, the men who made them and everything connected with them, and then I walked. But there certainly was a blue haze hanging over those mountains for a few minutes.

**A Century in December**

Coming to the subject of weather reminds me of a very unusual experience I had last December, when four of us rode a century to Frederick, or I should say, attempted to ride a century to Frederick. The morning was cold, gray and threatening, but we started out, and at Ridgeville, thirty miles from Baltimore, the snow commenced to come down, slowly at first, and then harder and faster. We stopped, got something to eat and held council. We were fourteen miles from our destination, but the snow did not seem to be coming too hard and we finally decided to push on. Well, we pushed on and it snowed: and the harder we pushed the harder it snowed until by the time we reached Frederick the snow had become pretty deep.

We walked into the lunchroom, covered with snow and looking like four imitation Santa Claus', removed our coats and had a good dinner. By the time we had finished our meal the snowfall had become quite heavy, and passersby looked at us and our wheels with natural and pardonable curiosity. It was then about one o'clock in the afternoon, and as there was no train home till eight or nine o'clock we decided to try to beat it back on the bikes, figuring that we could get in four or five hours ahead of the train easily. I got a fall from a car track hidden by the snow before we got out of Frederick. That, however, was the least of our troubles. Though the road we were traveling was very hilly and the deep snow made it heartbreaking work indeed, we pushed on till finally two of our party started to walk the biggest hills, and to make matters worse, the road became very slippery so that we had to fairly creep downhill and uphill.

**Good Samaritan Comes Along**

To make things still more unpleasant, two hours after we left Frederick a mixture of rain and hail came down, cutting our faces like knives and freezing on us as it fell. We were still struggling slowly along, twenty miles from home, wet and chilled to the bone, when a good Samaritan in a big touring car hailed us and asked us if we did not want a lift. Did we want a lift? I should say! We were tickled to death. We piled into the machine, all four of us, bicycles and all, and he took us all the way into the city, leaving my brother and myself a square from home. But, believe me, gentle reader, those good Samaritans traveling in automobiles are few and far between.

Getting directions is also rather awkward at times, as the reader will know if he has ever had the experience I had on one occasion, when I reached a fork in a strange road, with but one house in sight for several miles and a pack of loud-mouthed hounds in the yard in front of the house. I didn't want to go back three or four miles to inquire the way, so I opened the gate and walked unconcernedly toward the door. The dogs were completely taken in by my bluff, greatly to my relief, and beyond a little yapping at my heels did not bother me. I got the necessary information without any trouble. Incidents of different kinds fall to the lot of all who ride bicycles, and I have no doubt that every rider who has strung the centuries behind him can relate them by the score. They help to give the sport its fascination, and we would not change matters if we could.

## PROS. WILL USE SPEEEDWAY

Sheepshead Bay, N. Y., Nov. 23.—Arrangements have been made with the management of the Sheepshead Bay Speedway to allow the foreign riders who will compete in the six-day bicycle race, which opens at Madison Square Garden December 6, to do most of their training work on this big outdoor automobile racetrack. Jimmie Moran, the veteran six-day bicycle rider, will look after the American contingent. All of the riders have signified their willingness to train on this open-air track, feeling that it will strengthen them. The management of Madison Square Garden has requested the riders to inform their trainers to have a tank of oxygen at the side of the track for instant use during the long grind. All of the foreign riders of former years carried their own tanks with them, but this year the riders will have them furnished by the management of Madison Square Garden.

## MANY CYCLES IN DAWSON

From a recent arrival from Dawson, Y. T., Alaska, it is learned that upwards of 100 bicycles are to be seen on the streets of that city. There are many Smith motor wheels in use also.

## SELLING STADIUM WHEELS

Tacoma, Wash.—The Washington Hardware & Tool Company, of this city, is selling the Stadium bicycle, its own brand, in addition to the Rambler line.

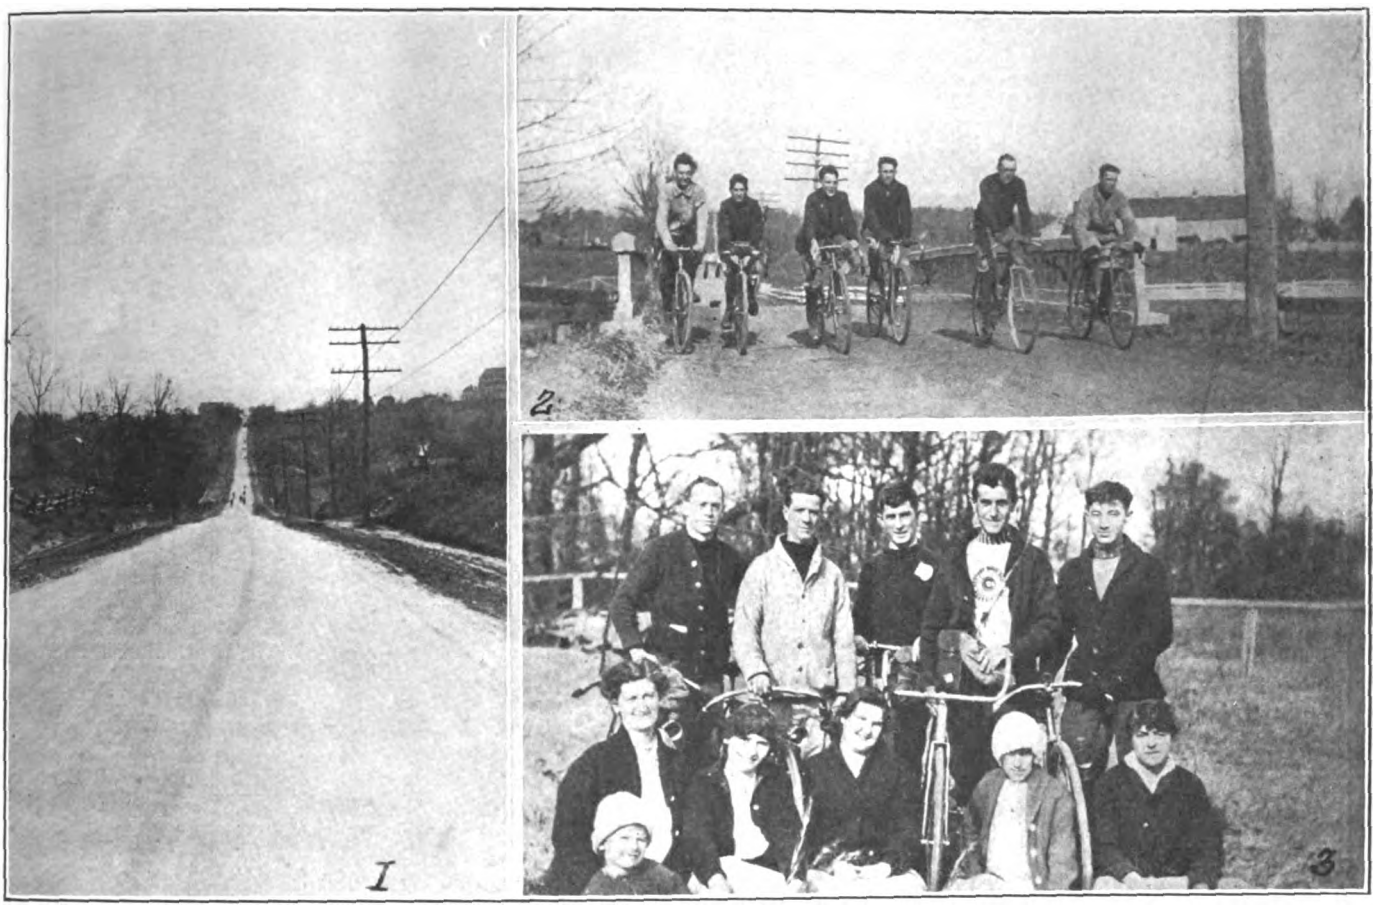
# CRESCENT BICYCLE CLUB RIDERS OUT FOR A GOOD DAY'S SPORT



1, One of the Steep Hills Near Baltimore. The Cyclists Can Be Seen at the Foot of the Hill; 2, On Last Sunday's Run Through the Green Spring Valley; 3, After the Oyster Roast, Given on Sunday at "The Shore"

BALTIMORE, Md., November 22.—Sunday was a big day for members of the Crescent Bicycle Club. The regular Sunday run of the club was held, the destination being Towson, via the Green Spring Valley, and following the run the members journeyed to Curtis Bay, several miles below Brooklyn, where the annual oyster roast was held at the shore of William Leimbach. Two short sprint races were held during the progress of the run for Class E riders, both being won by Wilbur Wright, Lester Nickles finishing second and Ernest Nitz third each time. Interest was added to the run by the presence of Sylvain Segal, the well known Century Road Club Association rider, who was in Baltimore as the guest of Fred. M. Sanborn, of the Crescents, who is also a member of the C. R. C. A.

### Out on a Launch

Segal made the trip through the Green Spring Valley with the Crescent and then proceeded on with the cyclist to the oyster roast. These affairs are very popular with Baltimoreans and are peculiar to this part of the country. After surrounding most of the oysters in sight a party of the cyclists went out for a ride in the launch owned by one of then. Segal took the helm, a position of honor, but also of dampness, as the helmsman got most of the spray thrown up by the rough water.

The next event on the program was riding on the bicycle boat, a contrivance rigged up by Will Leimbach and geared to two bicycles mounted on a float, which is propelled by pedalling in the usual way. Bill Wright and Fred Sanborn made the first attempt, and after riding up and down alongside the pier gained confidence and pushed out into the bay for quite a distance. Segal also mounted the affair and rode it around for a good while by himself.

More eats followed, oyster stew this time, and after that dancing and singing. The Crescents who had ridden down on their wheels started for home at 3.45 P. M. The trip home was a hard one, due to strong head winds, but Segal and Sanborn got home in time to greet Bob Lawson, the transcontinental tourist, who was stopping in Baltimore for the night. Here the party broke up, Segal catching a train home for New York and the rest of the riders scattering. Lawson will leave Baltimore on Monday morning on his way to Florida.

## BAILEY SIGNS AGAIN

Tacoma, Wash.—F. M. Bailey recently signed his sixteenth annual contract to handle the Pierce bicycle in this city. During 1915 he disposed of four times the number of cycles as in the five preceding seasons. Most of these were purchased by juveniles, but many went to employes of the Northern Pacific R. R.

## BICYCLE THIEF SENTENCED

Marietta, Ohio.—A sentence of one to seven years in the reformatory, with a recommendation to parol after one year, was imposed on Robert Murphy for the theft of a bicycle recently

## REPORT OF DE LACKSO'S ARREST CAUSED BIG STIR

SAN FRANCISCO, November 19.—Officials of the local branch of the B. F. Goodrich Company were shocked one morning recently to read an account in one of the morning papers of the arrest of Francis De Lackso, who traveled across the continent on a bicycle to which he was handcuffed, on a charge of stealing bread and milk from door-steps in one of the residential districts of this city. They were loath to believe that the plucky little Frenchman could be guilty of such a charge, so one of the department heads hastened to the city prison to ascertain if it were really true that Francis De Lackso was in the toils, for he had departed from San Francisco several days previously on his tour around the world by bicycle.

Happily, it was discovered that the man under arrest was not De Lackso, but a deserter from the navy, who had stolen some of De Lackso's postcards and who resorted to the use of his name when arrested.

The publication of the story of the arrest of De Lackso, however, brought no end of trouble to the latter, for it was flashed on him in the very first town he entered the day after it was printed. He determined to return to San Francisco to clear the mystery up. Upon reaching 'Frisco, De Lackso called at the B. F. Goodrich Company's offices, and with the assistance of Mr. Barnum, the advertising man, secured the publication of a corrected story in the newspaper.

## BICYCLE RIDERS OF HAVANA, CUBA, WHO TAKE A KEEN INTEREST IN CLUB RUNS AND RACES

**Strong Line Up of the Members of the "Club Azul," Which Is One of the Most Active Bicycle Organizations on the Island of Cuba. Photo Reproduced by Courtesy of Mr. Villalobos, Pierce Bicycle Agent in Havana**

## BICYCLE OUTLOOK IS GOOD IN BROOKLYN

BROOKLYN, N. Y.—Motorcycle dealers in this city have awakened to the fact that bicycles ought not to be overlooked as money-makers during the season just opened. Accordingly, a number of the more prominent have added various makes of pedal-two-wheelers to their motor lines, and among these is A. H. Patterson, who is Reading Standard and Pullman sidecar agent. "Pat," as he is familiarly called, is pushing his own brand of cycles in Brooklyn and Kings county.

George Uniss, Pope dealer, is handling the Westfield brands of bicycles, while Henry Heyer is continuing the Pierce line which he has handled for a number of years. Ben Ruderman, Thor distributor, is putting in a large stock of bicycles and is figuring on a good holiday business. Bob Brazenor, Harley-Davidson man, is handling the Miami line, and intends to enlarge at his Bedford avenue branch and have a special man in charge of the bicycle department there. Emblem bicycles as well as motorcycles are being handled at Otto Sohofer's agency on Bedford avenue.

### CONVICT HIGHWAYS FOR KENTUCKY

Louisville, Ky., November 22.—Motorcyclists and automobilists of Louisville are considerably interested in a proposed bill which will probably be introduced at the 1916 session of the legislature, which convenes in January, relative to the prison labor of the State. At present this labor is used in the manufacture of prison goods such as brooms, shoes, etc. It is proposed that as such labor is let out at very low rates it would be of considerable advantage to the State as a whole if this labor was used on improving the public highways. The good roads movement is now at its zenith in Kentucky, and strong influences will probably be brought to bear in favor of the proposed bill.

### TAKES INDIAN BIKE AGENCY

Kansas City, Mo., November 22.—C. Hanson, the local Indian dealer, has received his first shipment of Indian bicycles. Hanson states that there has been a very brisk demand for the silent two-wheeler, and that he was doing his utmost to get a good slice of the Christmas business.

### ADD HENDEE BICYCLES

Seattle, Wash.—Mercer & Munsell, Indian agents, have added the Hendee line of bicycles to their stock, as well as juvenile models. They intend going after the schoolboy and schoolgirl trade in particular.

### DEALER'S HELP DEPARTMENT

The Goodyear Tire & Rubber Company, of Akron, O., has a Dealer's Help Department for the purpose of educating dealers to market its product. The department is now furnishing cuts showing the complete lines of the firm's products, the cuts being suitable for catalog, newspaper, poster or program advertising.

### SUTCLIFFES RENEW CONTRACT

Louisville, Ky.—The Sutcliffe Company has renewed its contract to handle the Smith motor wheel for 1916, and anticipates at least one hundred sales in Louisville alone. The Sutcliffe company has the best store in Louisville, handling sporting goods, athletic goods and bicycles, being State distributors for the Dayton. A local Motor Wheel Club has been organized and has conducted a number of club runs during the summer.

### Y. M. C. A. BICYCLE CLUB

Janesville, Wis., November 23.—At a recent meeting attended by all of the junior members of the local Young Men's Christian Association plans were perfected for the organization of a bicycle club. Officers will be elected and arrangements completed for conducting the club. A large number of boys joined.

### BURKE HAS MOTOR WHEEL

Lexington, Ky., November 21.—T. B. Burke has taken over the local agency for the Smith Motor Wheel which was handled this year by C. D. Calloway & Co., the Indian agents.

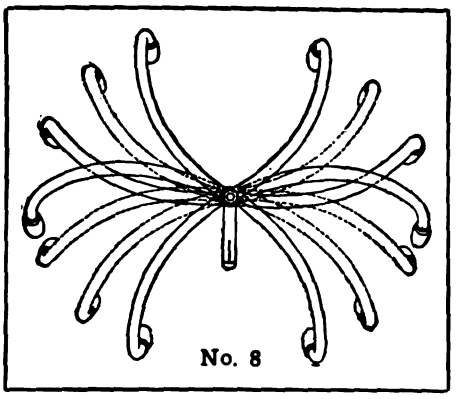
# Kelly Handlebars



No. 8

## Jobbers and Manufacturers Who Seek Standardization

should invariably equip with KELLY HANDLEBARS—the standard of the world. No high-grade bicycle is complete without KELLY ADJUSTABLE HANDLEBARS. With these handlebars, 25 different riding positions are possible. No other bar made allows anywhere near this number of different positions. KELLY HANDLEBARS ARE THE STRONGEST SELLING POINT A BICYCLE CAN HAVE.

They are the ideal bars for racing, distance work, boulevard riding, etc. Adjustable to ANY position.

**KELLY HANDLEBAR DEPT.**
**5017 Perkins Ave. Cleveland, Ohio**

# Positive Grip

due to the generous design and construction—we think it is the best and strongest rat-trap pedal you ever put your foot on.

## The No. 4 Standard

is a big, substantial, motorcycle-type pedal. It stands for the utmost mechanical value.

With a pair of these pedals on your wheel you are equipped with correct, up-to-date foot-holds, fairly representative of our business in the cycle industry.

**Our products comprise:**

**Diamond E Spokes and Nipples for bicycles, motorcycles, tricycles, velocipedes, invalid chairs, sulkies, carriages, cyclecars and automobiles. Pedals for bicycles, tricycles, velocipedes and motorcycles. Toe clips for bicycle pedals. Emergency axles for pedals.**

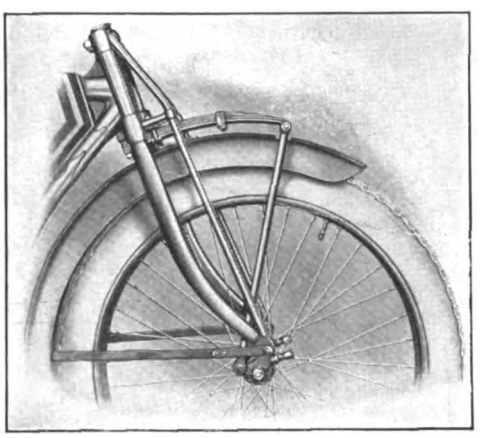
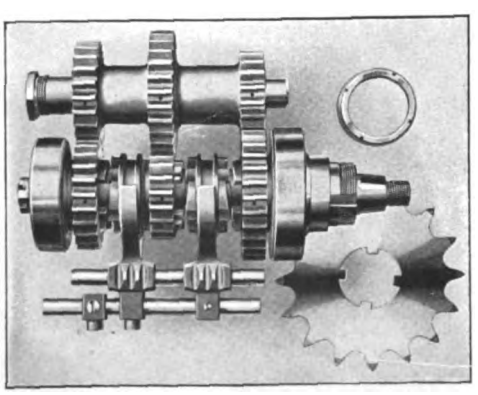
Pope Rear Suspension



Pope Spring Fork



Pope 3-Speed Parts

# A Pope Engineering Triumph

The new Pope THREE SPEED TWIN CYLINDER MOTORCYCLE is the motorcycle sensation of the year. It represents the very top-notch of motorcycle construction. Those who have followed the steady progress of Pope improvements have been waiting for this machine. Will they find it in your store or will you let them spend their money elsewhere?

Here are three of the mechanical superiorities of this speedy, comfortable, powerful "Champion of the Hills"—

## Pope Rear Suspension

Greater comfort for the rider and longer life for wheel and tire are the results of the Pope Rear Spring Suspension that expands and absorbs every shock and prevents the wheel from being thrown out of alignment.

## Pope Spring Fork

To keep all the road shocks away from both rider and machine is the task that's admirably performed by the efficient Pope Spring Fork. Its ample bearings make the motorcycle easy to guide.

## Pope 3-Speed

All gears are constantly in mesh and can be immediately and correctly changed by the Pope 3-Speed mechanism. Simply operated, original Pope features make it impossible to engage one set of gears before the other set is disengaged and there is no chance to strip the gear teeth. The large bearings insure easy running of the parts.

You can offer to your customer such unique features of motorcycling engineering only when you carry motorcycles made under this famous name—

Posed on a **Bosch-Equipt** Harley-Davidson

# BOSCH

## FOR YOUR PARTICULAR BENEFIT

IT IS advisable to fix the name Bosch firmly in your mind and to make the salesman show you that name on the magneto of the motorcycle you intend to buy. If he can't show you that name, if he won't fit the Bosch Magneto, don't argue, walk out and try The Progressive Agent of your town—he's selling Bosch-Equipt Motorcycles, of course.

The ignition system of your motorcycle is the most important factor of its entire makeup. Safeguard yourself against puzzling ignition trouble and additional expense by insisting that your motorcycle have a Bosch Magneto, the most popular ignition system, the predominating system ever since motorcycling was in its infancy.

Insist if you must, but insist on having Bosch. It costs the motorcycle maker more, but the extra cost does not appear in the price you pay—it's "Plus Service" the maker is giving you.

**Be Satisfied**

**For that feeling of confidence**
**For that extra ounce of power**
**For that vim, vigor and snap**

**"The Coventry" Chain**

*"The Motor's True Mate"*

"It's the strongest motorcycle chain in the world." Can *you* truthfully say this about the chains you sell to your customers, Mr. Dealer? Can you assure them of a troubleless transmission?

Our 26K Motorcycle chain can withstand a strain that would snap the ordinary motorcycle chain like a pack-thread—5700 lbs. breaking strain! Think of the satisfaction the knowledge of this enormous surplus strength gives the rider. The price is higher—and the chain is worth it. It costs the rider $1.00 a foot.

Our Booklet "The Motor's True Mate" tells the story and also gives some helpful hints on the care of chains. Write for it.

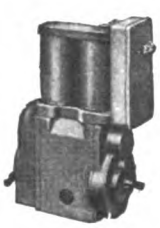
# *The Exhilirating Pleasure of Limitless Speed-plus Safety*

can only be secured by a brilliant steady light in riding at night.

The road may be long and smooth, over hill and valley that your mount takes you like an express train—still there is the constant danger of the sudden turn, the gravel patch, the unexpected ruts, or the ponderous farm wagon. Danger may add zest to the ride—but not too much danger.



# REMY

## *Motorcycle Lighting-Ignition System*

is always dependable, adapted from the motor car system which is used on some of the leading automobiles in the country, and absolutely *guaranteed*.

Compact, completely protected wiring, easier cranking, proof against road vibration. Operates head, tail lights, horn, and insures perfectly timed ignition at every speed—under every condition.

Ask the owner of a Harley-Davidson—it's on his machine.

*Service stations in all motoring centers*

# PRESTO-LITE Users

# Attention!

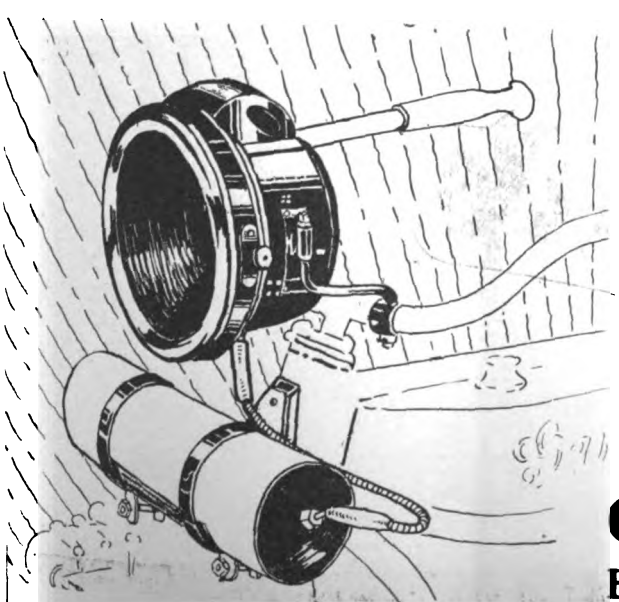
Are you willing to spend—no, invest—a dollar to permanently put your PRESTO-LITE TANK in its proper place? To know that it is safest there, that it adds to the appearance of your machine, that it helps to steady your front wheel? Isn't it worth a dollar to have your tank in a place that seems to have specially been designed for it?

## *Some Reasons*

1. Places your Presto Tank in front, where it belongs.
2. Takes away danger of striking tank, if thrown.
3. No long tubes to break or clog.
4. Betters appearance of your machine 100%.
5. Betters light by its direct connection.
6. Permits gas adjustment while lighting.
7. Makes riding easier, because of added weight over front wheel.
8. Tank is removed easier and quicker.
9. Removes all interference with filling gasoline tank and operating machine.
10. Because of its reasonable cost.
11. Because it is the best Presto-Lite Bracket you can buy.

# LEONARD'S PREST-O BRACKET

The "Leonard" clamps to the fork place directly under the headlight and is held rigidly in place by means of bolts. It is light, weighing but 16 ounces, of nickel plated steel, and adds materially to the appearance of your machine.



## Price $1.00

### Dealers

Here is one motorcycle fitment that has an assured demand. Don't take our word for it. Ask some of your customers what they think of the "LEONARD." We are sure you will stock the LEONARD PRESTO BRACKET to good advantage. Write today for prices.

# Don't Overlook Christmas Sales

There should be no dull months for the Smith Motor Wheel dealer. In checking over our records we find that Forty-five thousand dollars' worth of Smith Motor Wheels were sold around Christmas time last season and a number of live dealers tell us that in addition to sales made, the work they did during the winter months paid big dividends in the way of spring sales this year.

**Smith**

**Motor Wheel**

(Detachable)

***"The Bicycle Booster"***

Attaches to and detaches from any bicycle in five minutes—speeds up to 25 miles an hour—runs 100 to 125 miles on one gallon of gasoline and is fully controlled by a small thumb lever attached to the handle bar of the bicycle. Weight, about 50 pounds. High tension Magneto—Float feed Carburetor—Non-skid double tube clincher tire. Fully protected by U. S. and Foreign Patents.

LIST PRICE, $60.00 F. O. B. Milwaukee.

Every Motor Wheel you sell now will work for you all winter in an advertising way and when our big advertising campaign opens early next year, you will be there to cash in on your winter's work.

## GEORGIA TAX IS REDUCED TO $2

**State Legislature Passes New Motor Law Abolishing Former Fee of $5 and Preventing Local Assessments; Motorcyclists Rejoice.**

ATLANTA, Ga., November 26.—The Georgia Legislature, in extra session passed the Motor Tax Law, and the tag tax on motorcycles will be reduced from $5 to $2 as a result. The passage of this law will affect about 3,000 riders in the State of Georgia, and figuring at the rate of saving of $3 each, will practically amount to $9,000.

For nearly three years the motor vehicle law of the State required a tax of $5 for motorcycles, and Gus Castle, South Atlantic F. A. M. Director, opposed the measure in the interests of the Federation and of Georgia motorcyclists. The measure also put no bar to the levying of local taxes on motor vehicles, and quite a number of cities had planned extra or local assessments as a result. The new law prohibits all this, hence there has been effected an additional but uncalculable, saving to riders. Only the $2 tax can be levied an the tag issued is good all over the State.

Phillip Cook, Secretary of State, was one of the best friends of the motorcyclists during the long fight for the repeal of the measure charging a $5 tax and he contributed valuable assistance to Gus Castle. As regards the R. F. D. carriers, some two years ago a resolution was passed asking the Legislature to make a reduction of tax for them, but nothing was done. The R. F. D. users of motor vehicles are now greatly pleased with the new law. The fees collected for the tax go to a fund for road improvement.

### CRUDE RUBBER BOUNDING

Prices of November 23 showed that crude rubber was again on the bounce. High-grade up-river Para was quoted at 75 cents a pound and Ceylon at 83 cents. Both these grades have been advancing for several weeks, but the latest jump was the most startling, the price a few days ago for Para rubber being 65 cents and for Ceylon, 69 cents.

### MANY ORDERS FOR PULLMANS

Detroit, Mich.—The way orders are coming in from the field, it looks as if the factory of the Pullman sidecar at Ionia will be kept up to full capacity for weeks to come. W. D. Rumsay, of the Harry Svensgaard Sales Corporation, maker of the Pullman, is now on a business trip throughout the country and is shooting in reorders and opening new accounts daily. The orders are for sidecars for machines of all makes with finish to correspond to the particular make in each case.

## TO SHOW CYCLES IN BIG EXHIBIT

MONTREAL, Que.—Definite arrangements are already being made for the National Motor Show of Eastern Canada for 1916, which is to be held in Almy's Building, Bleury and St. Catherine streets, Montreal, from January 22 to 29 inclusive. A number of motorcycle, bicycle and accessory lines will be exhibited, including a comprehensive display by A. E. Bregent of Montreal, Eastern Canadian distributor for Smith Motor Wheels, Pope bicycles, Dominion bicycle tires and Worksman's bicycle delivery vans.

It is understood that the Smith Motor Wheel exhibit at the New York and Chicago shows will be duplicated here, and Mr. Jackson of the Smith factory is expected. Fred St. Onge, the actor-salesman, who is worth a few demonstrators, and others will man the exhibit in addition to Bregent. Six Pope bicycle models will be seen.

Other exhibitors assured include the Hendee Mfg. Company, Canada Cycle & Motor Company, Cyclemotor Corporation, P. A. McBride, of Toronto, Excelsior and Henderson distributor, Dunlop and Goodyear Tire Companies and other accessory houses.

### DRUDE WITH LEWIN

Charles Drude, of the Henderson factory forces, arrived in New York on November 29. He has taken charge of the repair department of the Henderson Motorcycle Company, 227 West 106th street, under Manager Felix Lewin. Drude is well known as a hardy competition rider in addition to being a first-class mechanic and "tuner-up" of motorcycles. It is needless to state that Manager Lewin is enthusiastic at having Drude with him and the latter will be warmly welcomed by Henderson riders throughout the hustling Metropolitan district.

## JINX BUTTS IN ON ELLIS' TRIAL

**Much Tire and Chain Trouble Prevents Yonkerite from Completing 1,000 Miles at Empire City Track But He Did Cover 666 Miles.**

YONKERS, N. Y., November 26.—The Jinx was out after George Ellis, State F. A. M. Commissioner, and president of the Yonkers M. T. C., on his plucky attempt to set a new 1,000 miles record at the Empire City track here yesterday. A series of chain breakages, tire punctures and finally a flooded back-stretch and the disablement of his riding-mate, Jimmie Coote, caused him to abandon the attempt after finishing the 666th mile. Ellis' riding time was 16 hours, 40 minutes, making his average speed 40 miles an hour. The elapsed time was 19 hours, 39 1-2 minutes.

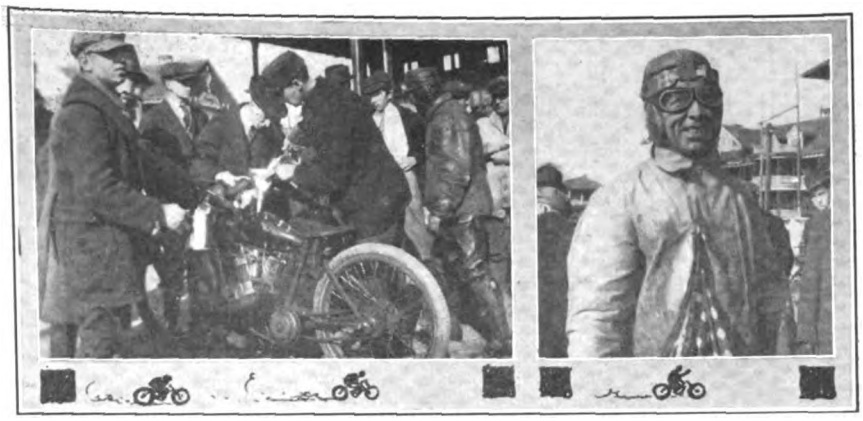
The start was made at 5:05 p. m. on Wednesday, November 24, Ellis and Coote on their Indians getting off together. Coote, who merely rode as a companion to Ellis, soon set up a good pace, and the pair were lapping the Empire oval at 1:03 and 1:01. But hardly had the two been riding for one hour, before Ellis' chain went, and he had to push in from the back stretch and make repairs at the paddock. Coote meanwhile kept on riding.

Shortly after dark, Cooté rode into a pile of turf near the rear turn, and came off hard, damaging his front forks and twisting his frame out of shape. The staff of mechanics and helpers at the track worked like beavers to get the mount back into shape and finally succeeded after nearly an hour's work. Coote was shaken up, but mounted and continued as soon as his machine was ready once more.

In the wee sma' hours, Ellis got more punctures and chain breakages. Riders who came to the track were enlisted in a nail-hunting brigade with the first streaks of daylight, and their efforts were rewarded before noon by eight heaping handfuls of nails, spikes and bits of metal.

The score mounted higher and higher, but shortly after noon on Thursday, some one turned on a valve controlling the sprinkling-wagon standpipe and in ten minutes the back-stretch was a miniature lake. In spite of straw and dirt laid on,

Digitized by Google



**Taken During Ellis' Attempt to Beat 1,000-Mile Record—Left, Filling Tanks on Coote's Machine; Right, George Ellis Still Smiling After 600 Miles**

Ellis and Coote were obliged to ride at reduced pace through the flooded section, and at 12:45 Coote came off, injuring his nose and shaking him up so that he had to cease riding. Ellis, with 334 miles to make in four hours, decided to stop riding. He had lost one minute short of three hours with chain and tire troubles, had his riding mate spill twice, and lost his chance of making up time by the flooded track. Ellis' average is lower than that made by Charles Spencer, the holder of the official 1,000 mile record, for the corresponding distance.

# BOON IS WINNER OF NOVELTY RUN

## Excelsior Side-Seat Rider Makes Best Score in Atlantic City M. C. Event — Sidecar Driver Gets Second Place and Thor Soloist Is Third.

ATLANTIC CITY, N. J., November 26.—H. (Bert) Boon, Excelsior side-seater, is the winner of the novelty race of the Atlantic City M. C. on November 21, according to the official announcement. His score was 992. W. Van Saun, Excelsior sidecar combination, is awarded second place, with a score of 990, while R. J. Willard, Thor, is third, with 985 points. A tie for fourth place is declared between D. M. Freas, Harley-Davidson, and E. P. Gravatt, Indian, both having 983 points.

The course of 138 miles, followed through English Creek, Mays Landing, Tuckahoe, Mauricetown, Millville, Malaga and again to Mays Landing for lunch. The afternoon's route was from Mays Landing through Egg Harbor, Green Bank, Wading River, over the Mullica River Meadow, through Port Republic, Absecon and Pleasantville to Atlantic City. The start was made at 8 a. m., and the first rider came in at 3:45 p. m. There was plenty of mud and water all along and spills were pretty frequent.

The contestants had to obey different signs along the route, under pain of penalization. One such was a command to stop and dismount, then push the machine until the sign mount and proceed was reached. All but one of the entrants followed this sign, but each man who did so thought that the 300 yards between signs was like a mile. Only 12 out of 20 entrants started, as the sky was overcast in the morning.

Following is a list of finishers and their scores:

H. (Bert) Boon, Excelsior side-seater, 992; W. Van Saun, Excelsior sidecar, 990; R. J. Willard, Thor, 985; D. M. Freas, Harley-Davidson, 983; E. P. Gravatt, Indian, 983; D. C. Freas, Thor, 979; C. Clifford, Harley-Davidson, 977; E. Willis, Excelsior side-seat, 972; F. Brunot, Excelsior side-seat, 972; H. Miller, Harley-Davidson, 970; W. Long, Excelsior 4 h. p., 945. E. Paul Jones, Harley-Davidson 5 h. p., did not finish.

### GOODYEAR N. Y. BRANCH

The Goodyear Tire & Rubber Company, of Akron, O., has leased a store at 10 Central Park West, New York, together with the basement and a second floor as a branch. The offices are on the second story.

### CLUB GETS TRACK

Houston, Texas.—The Houston Speedway Club, composed of motorcyclists and a few automobile owners, has just located an unused one-mile oval dirt track, and has started in to grade it and otherwise put it in shape. The motorcycle crowd will hold races every Sunday, and several large meets have been planned for the coming winter. The track is on the Westheimer road, about one mile from the city limits.

# DENHAM WINNER AT LAUREL MEET

## Emblem Rider Captures Feature Match Race at Interclub Track Affair, and Makes Best Time of Day—Dessez Scores Twice.

WASHINGTON, D. C., November 26.—Members of the National Capital M. C. of this city and the Maryland M. C. of Baltimore, Md., united in holding a race meet and Thanksgiving celebration at Laurel, Md., yesterday. The place of meeting was the race track, practically half way between Baltimore and Washington.

The feature event of the meet was a match between Freddy Tiemeyer, Pope, and Billy Denham, Emblem, for a $100 purse. The distance was ten miles; Denham won easily in 9:40 and made the fastest mile record of the day, 53 seconds. Tiemeyer, riding a Harley-Davidson, captured the 15-mile open in 14:13, with Dessez, Excelsior, second, and White, Emblem, third. Dessez won the five mile event for racing machines in 4:45, with Wallis, Harley-Davidson, second, and Schenuit, Harley-Davidson, third. A ten mile sidecar event was captured by Heinz, Harley-Davidson, with Denham, on a Thor, second, and Stalling, Harley-Davidson, third. The time was 13:04.

The track was in good condition, but was not banked, so that the times made were considered very fast. About 1,000 people attended. The summaries:

Three mile, single cylinder—Durham, Indian, first; Denham, Emblem, second. Time, 4:17.

Ten mile match race between Denham, Emblem, and Tiemeyer, Indian—Won by Denham, in 9:40. Denham made best mile in second lap, time 53 seconds.

Five mile, racing machines—Dessez, Excelsior, first; Wallis, Harley-Davidson, second; Schenuit, Harley-Davidson, third. Time, 4:45.

Ten mile, sidecars—Heinz, Harley-Davidson, first; Denham, Thor, second; Stallings, Harley-Davidson, third. Time, 13:04.

Ten miles, stock—Dessez, Harley-Davidson, first; Gebhart, Harley-Davidson, second; Durham, Indian, third. Time, 9:52.

Fifteen miles open—Tiemeyer, Harley-Davidson, first; Dessez Excelsior, second; White, Emblem, third. Time, 14:13.

### GALE REJOINS EMBLEM

M. E. Gale, the well-known endurance rider, has re-entered the employ of the Emblem Manufacturing Company, of Angola, N. Y. Gale will have general supervision and custody of the stock at the Emblem factory.

# EDDIE SWENSON WINS THE TURK

## And Also Gets Cup for Best Score in Providence M. C. Turkey Run on Secret Time Schedule; Loftes and Hendrickson Tied for Second Place.

PROVIDENCE, R. I., November 29.—The annual Turkey Run, held under the auspices of the Providence M. C., on Thanksgiving Day, was won by Edward A. Swenson, 15 year old son of B. A. Swenson, on an Indian machine. The run was from Providence to Westerly to Providence, a distance of 102 miles. There were checking stations at Providence, Washington, Hope Valley, Westerly, Wakefield and East Greenwich. The trip was made on a secret time basis, the official schedule being determined by drawing from among six different schedules at the close of the run.

Chieftain B. A. Swenson doped out a running schedule for Eddie and proved to be the best guesser by four points. The youngster carried off a 22-pound turkey and a bronze cup. He sacrificed only 50 points on the trip, thus finishing with a score of 950.

Clarence Loftes and H. Henrickson were tied for second place, both having lost 54 points. They flipped a coin to dispose of the tie and Loftes won. He used a Harley-Davidson in the contest.

The other finishers were as follows: W. Halladay, 944; W. Burnett, 935; F. Williams, 927; P. Fratantuone, 917; Clarence Brown, 917 (in a toss-off Brown won); D. W. Grabell, 906; E. B. Hadfield, 901; A. V. Howe, 901; A. J. Lacoture, 892; A. Carlson, 885; C. Litterio, 872; Gus Lundin, 869; John Kay, 860.

A. J. Kenahan was disqualified for being towed and for changing his machine later, so that he did not finish on the machine with which he started. C. A. Anderson was out with punctures, and the same kind of trouble retired Sam Litterio. C. A. Hadfield lost his checking card and was thus deprived of his score. George De Morris was retired and Dan De Morris suffered the same fate.

In addition to the turkey and the bronze cup, won by Eddie Swenson, the following prizes were awarded: Clarence Loftes, silver cup; H. Henrickson, silver cup; W. Halladay, head lamp; W. Burnett, electric horn; F. Williams, tail-lamp; P. Fratantuone, Yale motorcycle lock; Clarence Brown, handlebar mirror.

A big crowd saw the riders get under way and was on hand to see them check out. The starting point and final check were at B. A. Swenson's Indian headquarters, 522 Broad street.

### MOTORCYCLES SCARED SPEEDERS

Phoenix, Ariz.—The two motorcycle policemen of this city have been obliged to abandon their Indians for part-time each day in order to check speeding in the city streets. Automobile "road-burners" long ago got into the habit of slowing down at the sight of a motorcycle, so the cops had recourse to light automobiles of a well-known make belonging to the city water department. Speeders soon looked at every auto of this make to see if it had a city number plate, and the situation was the same as before.

Eddie Swenson and the Turkey He Won

### SHOW FOR DAYTON

Dayton, Ohio, November 27.—There will be a motorcycle show held in the new Delco Building, Dayton, January 14 to 22, in conjunction with the Dayton Industrial Exposition, which is under the auspices of the various civil and business organizations of the city. A portion of one floor in the building will be devoted to the showing of 1916 models.

### 6,000 MILES WITH SLIGHT REPAIRS

Kansas City, Mo., November 15.—Ernie Robinette, who rides a motorcycle delivery van for Allingham Meat and Grocery Company at Emporia, Kan., has made a very remarkable record with his twin Excelsior, 1915 model. The machine has run more than 6,000 miles and the only expense, besides the gas and oil, has been thirty-five cents for repairs.

### LATE NEWS FROM WHEELING

Wheeling, W. Va., November 26.—Bob Bowman, the local Thor dealer, and Chevy Herrold, the Indian speedster, have formed a partnership and will handle the Thor and Excelsior machines.

The first instance of a motorcycle dealer becoming a lightweight specialist came to light when Earl Braunlich announced that for the 1916 season he would handle the Excelsior and Cleveland lightweights exclusively. The Cleveland lightweight made a big hit here with the local riders when the machine was seen for the first time in this town, on the occasion of the recent F. A. M. reliability run from Dayton, Ohio, to New York City.

J. P. Wasmuth, a Wheeling Indian racer, is now looking after the Flexible sidecar interests in this section.

### EXIDE BATTERY DEALER

Seattle, Wash.—The Sunset Electric Company, of this city, has been named sales agent for Exide storage batteries.

# WHEELING CLUB HAS HILL-CLIMB

## Thanksgiving Program Brings Out a Capable Field and Sidecars Make Strong Showing; Fast Time in Club Trial and Still Better in Free-for-all.

WHEELING, W. Va., November 26.—The Thanksgiving hill-climb held here was a success, quite a few out-of-town riders being present. Three events were staged: one for sidecar combinations, another for club members, and the third a free-for-all.

The results of the sidecar climb, for which a silver cup was offered, were as follows: O. Lipstrew, of Cleveland, with Thor combination, first; time, 42½ seconds; L. Crist, of Pittsburgh, with Harley-Davidson combination, second; time, 44 seconds; Ed. Sailor, of Wheeling, with Harley-Davidson, third; time, 50 seconds.

The second event was for members only, using their own machines. Otto Ritz, Harley-Davidson, first; time, 35 seconds; Charles Liphart, Harley-Davidson, second; time, 37 seconds; Andy Pastors, Harley-Davidson, third; time, 37½ seconds.

In the free-for-all, for which another cup was awarded, the results were as follows: Emmory Herrold, Indian, first; time, 29 seconds; Don Marks, Thor, of Akron, and L. Bacon, Harley-Davidson, Pittsburgh, were tied for second place, their time being 30½ seconds. P. Gearinger, Harley-Davidson, of Pittsburgh, was third.

In the morning, prior to the races, Harvey Bernard was engaged in tuning up his Indian machine so enthusiastically that he was arrested for creating unnecessary noise.

### PACIFIC MOTORCYCLIST SOLD

Los Angeles, Cal.—L. J. Berger has sold *Pacific Motorcyclist*, the coast trade journal, to R. B. Whitmarsh, who has been business manager of the journal since its introduction. Mr. Berger, who has been the owner and editor of the publication for about three years, has not announced his plans for the future.

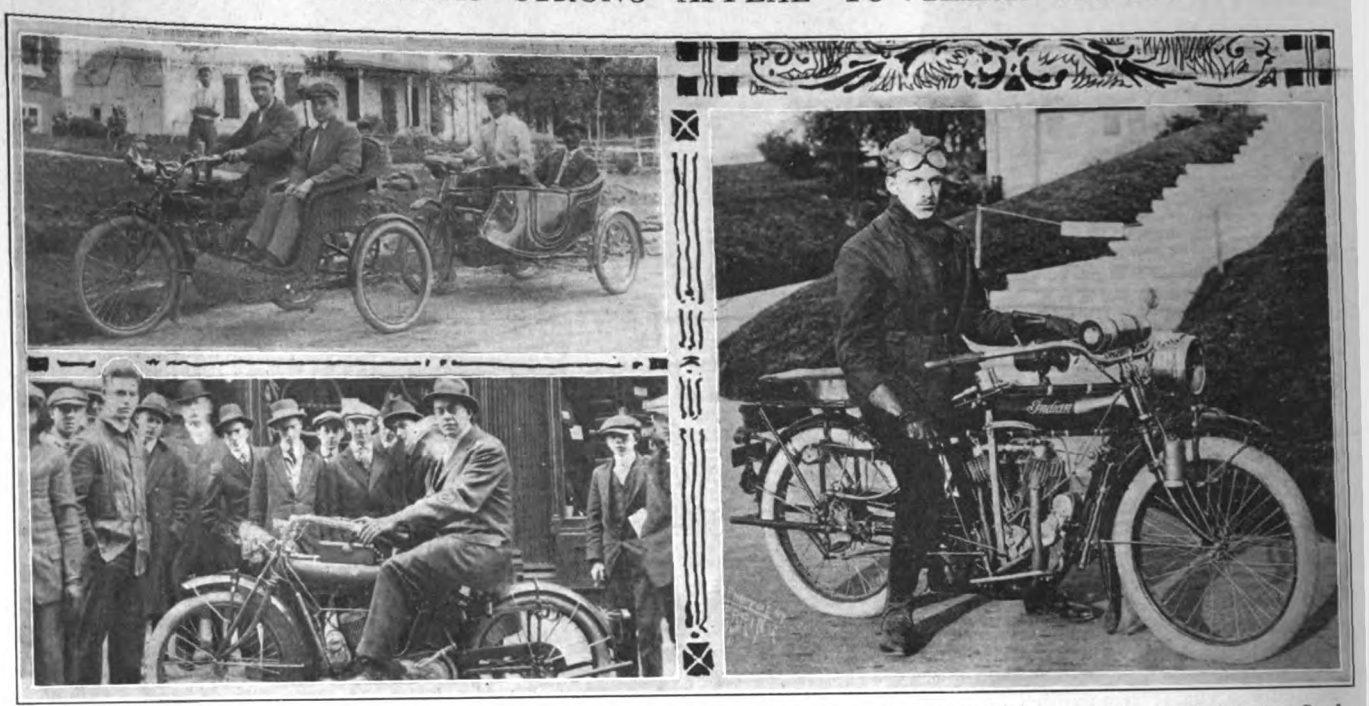
## NEATNESS MAKES STRONG APPEAL TO THESE RIDERS



Upper Left, R. S. Fairgrieve, Indian, and George Kenechal, R-S, of Montreal, Que.; Below, C. R. Webber, of New York Sporting Goods Co., New York; Right, Louis Timmerman, of New York, Who Made Excellent Showing in Recent Jamaica M. C. Run

# SCHRODER SHOWS WAY FOUR TIMES

### Mounting Single-Cylinder Thor He Wins Every Event in Savannah M. C. Program—Place Men Split $100 in Gold and Carry Off Loving Cups.

SAVANNAH, Ga., November 27.—Between 2,500 and 3,000 speed fans saw Martin Schroder, astride a single-cylinder Thor, win first in each of the four races staged here under the auspices of the Savannah M. C. on Thanksgiving Day.

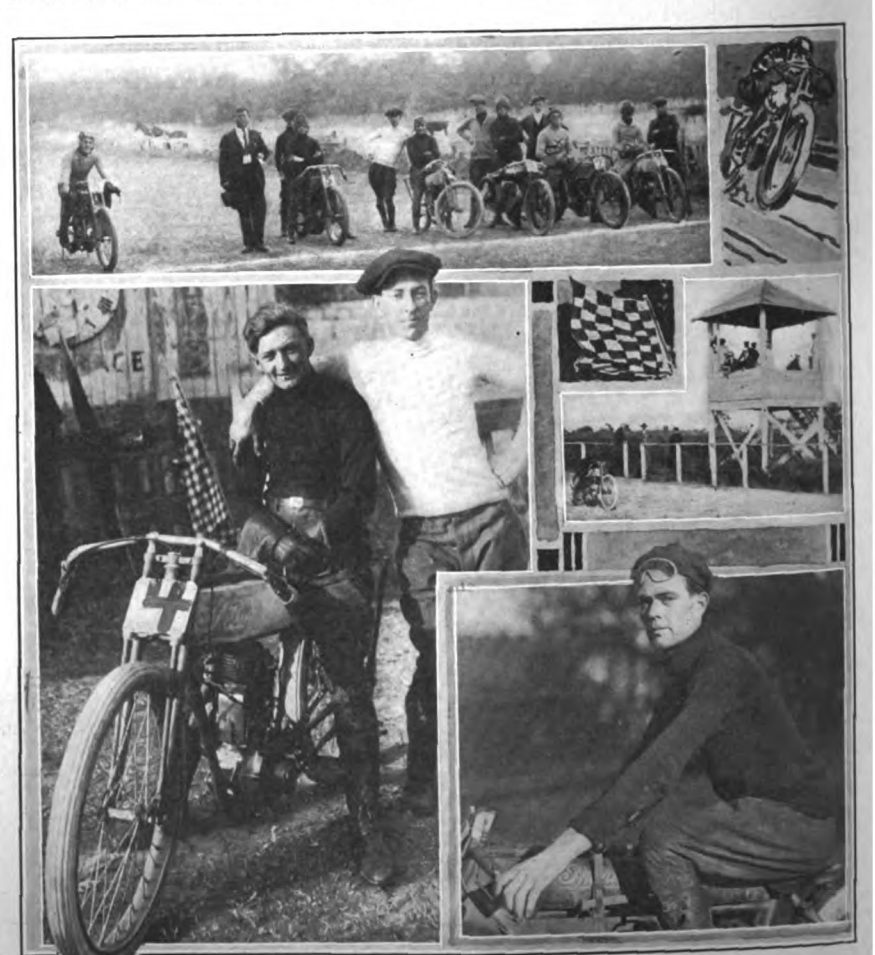
The first event of the day was at five miles and there were six starters. Schroeder and Gould mounted Thors, Cafiero and Meyer used Harley-Davidsons, Downing was on an Excelsior and Harn was the Indian entrant. Harn quickly took the lead, followed by Schroder and Cafiero, but the latter soon made a dash which gave him the premier position. On the back turn, however, his inside pedal struck the ground and spilled him. He was not seriously hurt, but was out of the running. In this lap Schroder took the lead from Harn and held it. Harn was second and Gould third.

In the elimination event Schroder and Harn finished in the order named. They then rode two miles to decide the winner. Schroder won by 60 feet, covering the two miles in 2:07.

The feature of the day was the 10-mile event, in which the same six riders participated, Harn, on his Indian, Schroder with his Thor and Cafiero astride his Harley-Davidson, furnished the thrills. Cafiero had another spill which retired him and the race narrowed down to Schroder, Harn and Gould. In the 17th lap Schroder went to the fore and was never headed again. Harn, second, Gould third.

The last event was the pursuit race. Five riders started. After traveling seven miles Schroder won out. Harn was again a good second and Gould was in third place.

Schroder's Thor carried a Pittsfield spark plug, Bosch magneto, United States tires and Duckworth chains; Cafiero's Harley-Davidson, Rex plug and Bosch magneto.



Upper Left, Lined Up for Ten-Mile Race; Below, Martin Schroder, Thor, Who Captured All Events of Day; Right, Roscoe Harn, Second in Every Race

# IRISH WINS AT INDIANAPOLIS

**Leads with Indian Over Rough Course of Annual Turkey Trot—Spangler and Hughes on Harley-Davidsons Are Second and Third.**

INDIANAPOLIS, Ind., November 25.—Frank Irish, riding a 1916 Powerplus Indian, which was taken from the crate four hours before the start of the race, won the annual Thanksgiving Day "turkey trot" of the Consolidated M. C., covering the 63.1 mile course in 1:16:29. He averaged 49½ miles an hour over the roughest route the club has ever followed in such an event. Irish had never before mounted a three-speed machine and did not know how to use the new starter. Accordingly, when he spilled on a turn he had to be pushed off by spectators and checkmen. At one railroad crossing which he took at high speed Irish made a jump of 25 feet before striking the road again.

George Spangler, Harley-Davidson, ran Irish a close race at all times and finished only two minutes behind the winner. Spangler was delayed when his gasoline line choked. Ernest Hughes, on a 1916 Harley-Davidson, followed Spangler across the finish line.

Lew Harnish, riding an Indian, won first place in the amateur twin class. Leo Wiltse, who was the favorite in this class, took second place, while Roy Martin came in third. Both rode Indian machines. Harry Silcox and Emmett Tolle, on Harley-Davidsons, had trouble on the course and did not finish in the money. Paul Catterson, also on a Grey Fellow, took a spill a few miles from the start and was unable to finish.

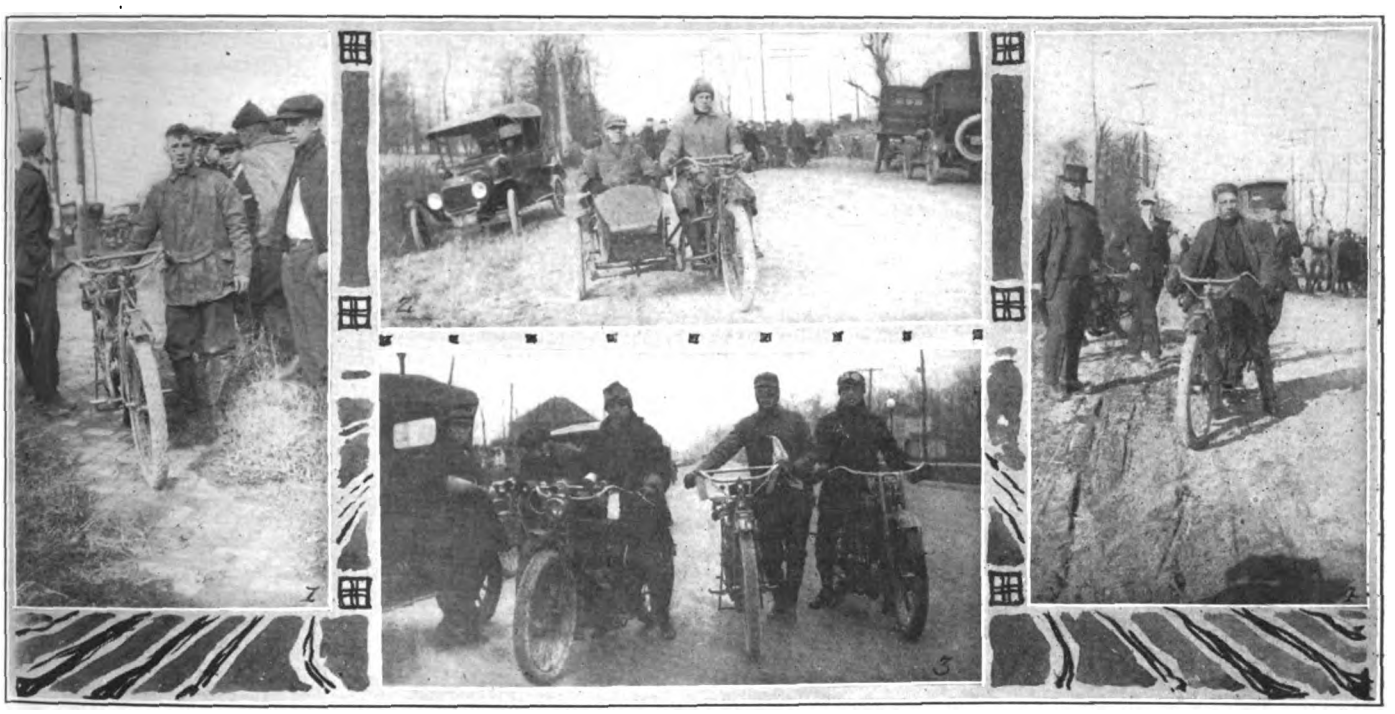
Edward Woodkey, riding a single-cylinder Indian, led the class for one-lungers in good time considering the rough course. His time was 1:49:29. He was followed a few minutes later by Ralph Mayers on a De Luxe, with Earl Mowe, on a Harley-Davidson, taking third place. Fred Dyer, on an Indian, came to grief near Noblesville and did not finish. Tire trouble put him out.

Everett Chandler, driving an Indian and sidecar, won the event for the three-wheelers with ten minutes to spare. Jentle, with a cut down sidecar attached to a Harley-Davidson, showed his heels to the crowd for most of the way but ran out of gasoline near the finish. He was able to fill up and take second place from O'Bannon with an Indian. Heine Speckman, on a Harley-Davidson, who was first man to start, suffered the only mishap of the race when his sidecar body broke loose from the machine.

Frank Phillips who was holding down second position in the sidecar event took a turn at high speed and blew out a tube and when unable to make a repair attempted to run the forty remaining miles on a rim with the result that it collapsed near the finish and put him out of the running. The winner in his class drove a very consistent race and averaged 38 miles an hour. His time for the course was 1:43:25.

The officials of the race were: John Kinney, referee; Davis, Wheeler and Weinings, judges; Capshaw, Holmes and Baldridge, timers; K. F. Bill, starter.

The equipment on the winning Indian machine consisted of Splitdorf plugs, Goodyear Blue Streak tires and Dixie magneto.



**No. 1, Frank Irish, Just After Winning Indianapolis "Turkey Trot" Run; 2, Everett Chandler, Winner in Sidecar Class; 3, Von Staden, Irish and Hughes Before the Run; 4, Edward Woodkey, 18-Year-Old Winner in Single-Cylinder Class**

### F. A. M. SUPPER IN JANUARY

George Ellis, New York State F. A. M. Commissioner, states that after obtaining the opinions of a great many riders and dealers he has decided to call off the much talked of F. A. M. supper until after the holidays. It will probably be held about the middle of January when both riders and trade men have more time to spare.

# EMPFIELD GETS 75-MILE EVENT

**Rides Excelsior to Victory on Belmont Track, Philadelphia; Craddock, Excelsior, Finishes Second and Miller with Another "X" Third.**

PHILADELPHIA, Pa., November 26.—John Empfield, astride a 1916 stock Excelsior, won the 75-mile professional motorcycle race at Belmont track Thanksgiving day. Thirty-one riders faced the starter. The race was cut from 100 miles to 75 miles because the get away was made too late to permit of going the full distance.

Empfield led for 30 miles. Then Theodore Craddock, Excelsior, set the pace for 25 miles and Empfield took it again when Craddock stopped to refill his tanks. John Miller, also on an Excelsior, made a good third, although he was forced to make two stop for minor troubles. Joe Pancoast, mounting a Dayton, finished in fourth place, and Franklin Craddock was fifth. The time for the 75 miles was 1:08:10.

Lewis A. Thompson earned the plaudits of the crowd when he won the 5-mile race for singles. He got a poor start but took the lead at four miles and won in 6:05. Fred Elmer, of Trenton, was second, and Edward Doer, of Philadelphia, third.

The 15-mile event for amateurs on twins brought out 20 starters. Lewis A. Thompson enlivened things in the eighth mile by going down when his chain broke. He escaped serious injury. Up to the eighth mile the riders had been pretty well bunched. A short time later Fred Elmer, of Trenton, took the lead and won in 14:16.

Harry Friedman won the 2-mile Smith Motor Wheel race in 5:06. He had only one opponent.

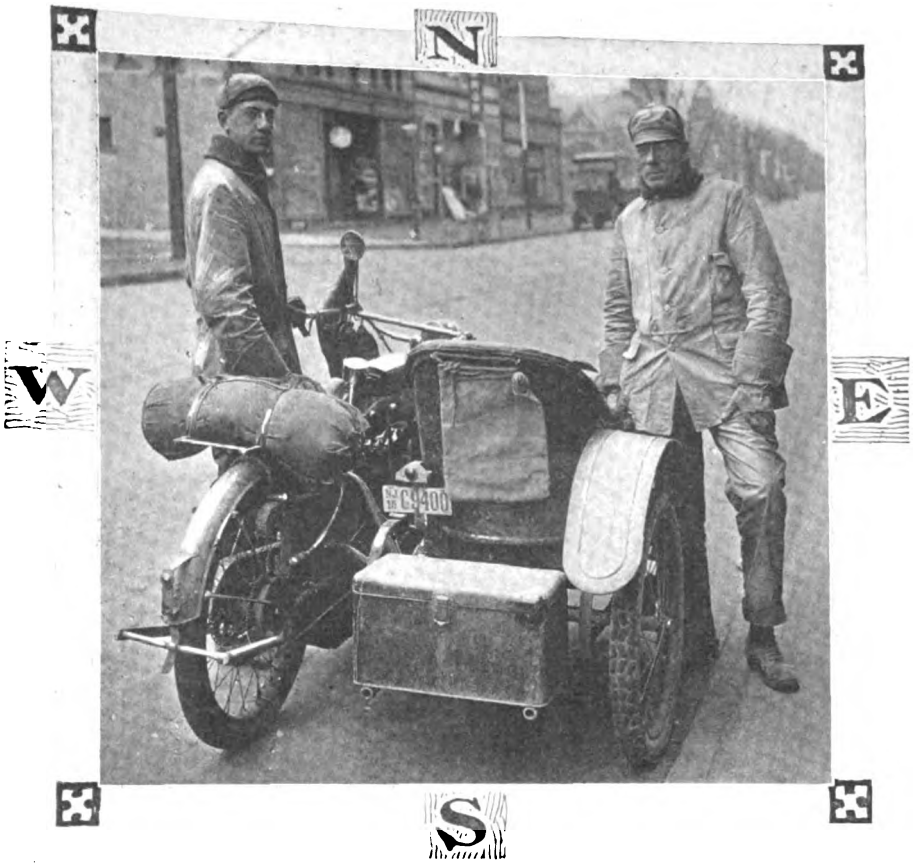
# KELLOGGS COMPLETE 10,900 MILE TRIP



William Kellogg and His Son, Walter, Finishing Journey at Middletown

MIDDLETOWN, N. Y., November 30.—William Kellogg and his son, Walter D., returned to this city, their home town, on November 22, from their transcontinental sidecar tour which took them out west through twenty-three different states and into Mexico. They had left this city on June 11, and covered, during the five and one-half months that they were gone, more than 10,900 miles.

The 1915 Indian that was used was driven by Walter Kellogg, an electrical engineering student, while his father rode as passenger. They carried a tent, ponchos, blankets and complete camping equipment. The entire outfit, including the Kelloggs, weighed 1,300 pounds. They were offered much assistance by the people they met in traveling across the country to the Pacific Coast; and when they reached the coast they ran down to Tia Juana, Mexico, then north to Washington and home by way of the northerly lakes route.

Their actual running time to Los Angeles was about fifteen days, while stopovers took up considerable time. At Cripple Creek they went down one thousand feet into the earth to inspect the Abe Lincoln Mine, and by way of contrast the tourists climbed a mountain 11,000 feet in height. One of the features of the Rocky Mountain West was the large number of deserted towns which were started by railroad builders and miners, and abandoned when the railroads sought new routes and the mines gave out. Sometimes they camped with Indians and more than one night they heard the coyotes yelping out on the plains. Several times they almost perished with thirst. Coming into California the pioneer flavor of their adventure abated somewhat, as they found such beautiful spots as Bouquet Canyon.

While on the coast the Kelloggs visited the Expositions at San Diego and San Francisco, and also saw the movies in the making at Los Angeles.

Turning the prow of the "boat" East again, the Kelloggs touched northern Idaho, the table lands in Montana which are famous for wheat growing, and struck into the Yellowstone Park Trail to Minneapolis. At Marmouth, N. D., they plunged down the river bank of the Little Missouri and drove the machine 150 feet across the stream with the water over the carbureter. They were seasoned travelers by now and one day seemed much like another. When they got as far East as Cleveland, as Mr. Kellogg senior, says, they breakfasted in Ohio, had lunch in Pennsylvania and supper in New York. After reaching the Metropolis they visited the Hendee factory in Springfield and then returned to Middletown.

Among the interesting facts concerning the trip are: The entire living expenses were $300; total expenses, $500. When camping out the tent was illuminated by electric light, current being supplied by a Splitdorf magneto generator. The actual running time was 38½ days. The gasoline consumed amounted to 305 gallons, costing $55.46; 135 quarts of oil were used, which cost $28.15. Ten tires were needed. Only automobile oil could be procured at times which was consumed at the rate of one quart per twenty miles. And last, but not least, the elder Mr. Kellogg gained ten pounds, and both he and his son are enthusiastic over the outcome of the journey.

## "ZIM" A CANDIDATE FOR F. A. M. PRESIDENCY

P. E. ZIMMERMAN, of Lindsburg, Kan., traveling representative for the Excelsior in Kansas, Nebraska, North Dakota and South Dakota, Short Grass tour booster, seasoned roadster and F. A. M. Commissioner-at-large, announces that he is in the field for the F. A. M. presidency. He steps into the limelight with a characteristic statement in a letter received a few days ago, as follows: "The next F. A. M. National Convention will be confronted with the unpleasant duty of discriminating between the writer and some other patriot or patriots in selecting its president for the ensuing year.

"No, I am not taking this step at the 'urgent request of all my friends,' it is done without their knowledge or consent. Simply getting in early to avoid the rush. That's all."

"Zim" explains that his announcement

P. E. Zimmerman

is subject to withdrawal "the moment Jess Campbell shows that he has the good of the F. A. M. at heart by making a similar announcement."

## ALBRIGHT BUILDING NOVEL MOTOR SLED

ALTOONA, Pa.—Ernest Albright, one of this city's most enthusiastic riders, is now constructing a unique motor-sled to carry two passengers. It is to have a light steel frame, with 40-inch tread and will be twelve feet in length. There will be a single propelling wheel, of motorcycle type, mounted on springs in the center of the sled. The power plant is a seven-horsepower Indian motor, located at the front end of the sled.

The driver and passenger are seated in tandem, with the steering wheel convenient for the driver. A double countershaft is mounted on steel braces and connected to the driving wheel by an ordinary motorcycle chain. Gasoline and oil are carried in a tank directly over the motor, with supply pipes having automatic stopcocks running to the carbureter and oil cups. Albright has fitted his sled with an Eclipse clutch, which is controlled from the driver's seat.

## FINE SALES ARE DUE SAYS LILLIE

**Harley-Davidson Traveler Reports After Three Weeks' Trip That All Conditions Point to an Unusually Brisk 1916 Season.**

FRESNO, Cal.—"Business conditions in the San Joaquin valley are better than they have been since 1913, and I think motorcycle dealers are sure to do a record-breaking business during the coming season," says H. A. Lillie after a three weeks' missionary trip.

Lillie hit the high spots up the Coast route, to Santa Barbara, San Luis Obispo, Paso Robles, Hot Springs, and then over the triple range to Coalinga, the hot little oil town nestling in the rim of the mighty San Joaquin valley. After bad roads from Coalinga to Fresno Lillie was glad to spend a few days showing Ben Bresee's prospects what the '16 Harley-Davidson three-speed could do. The raisin crop around Fresno has been one of the finest in the history of the industry, and Ben Bresee has been booking orders in a way that speaks well for this territory.

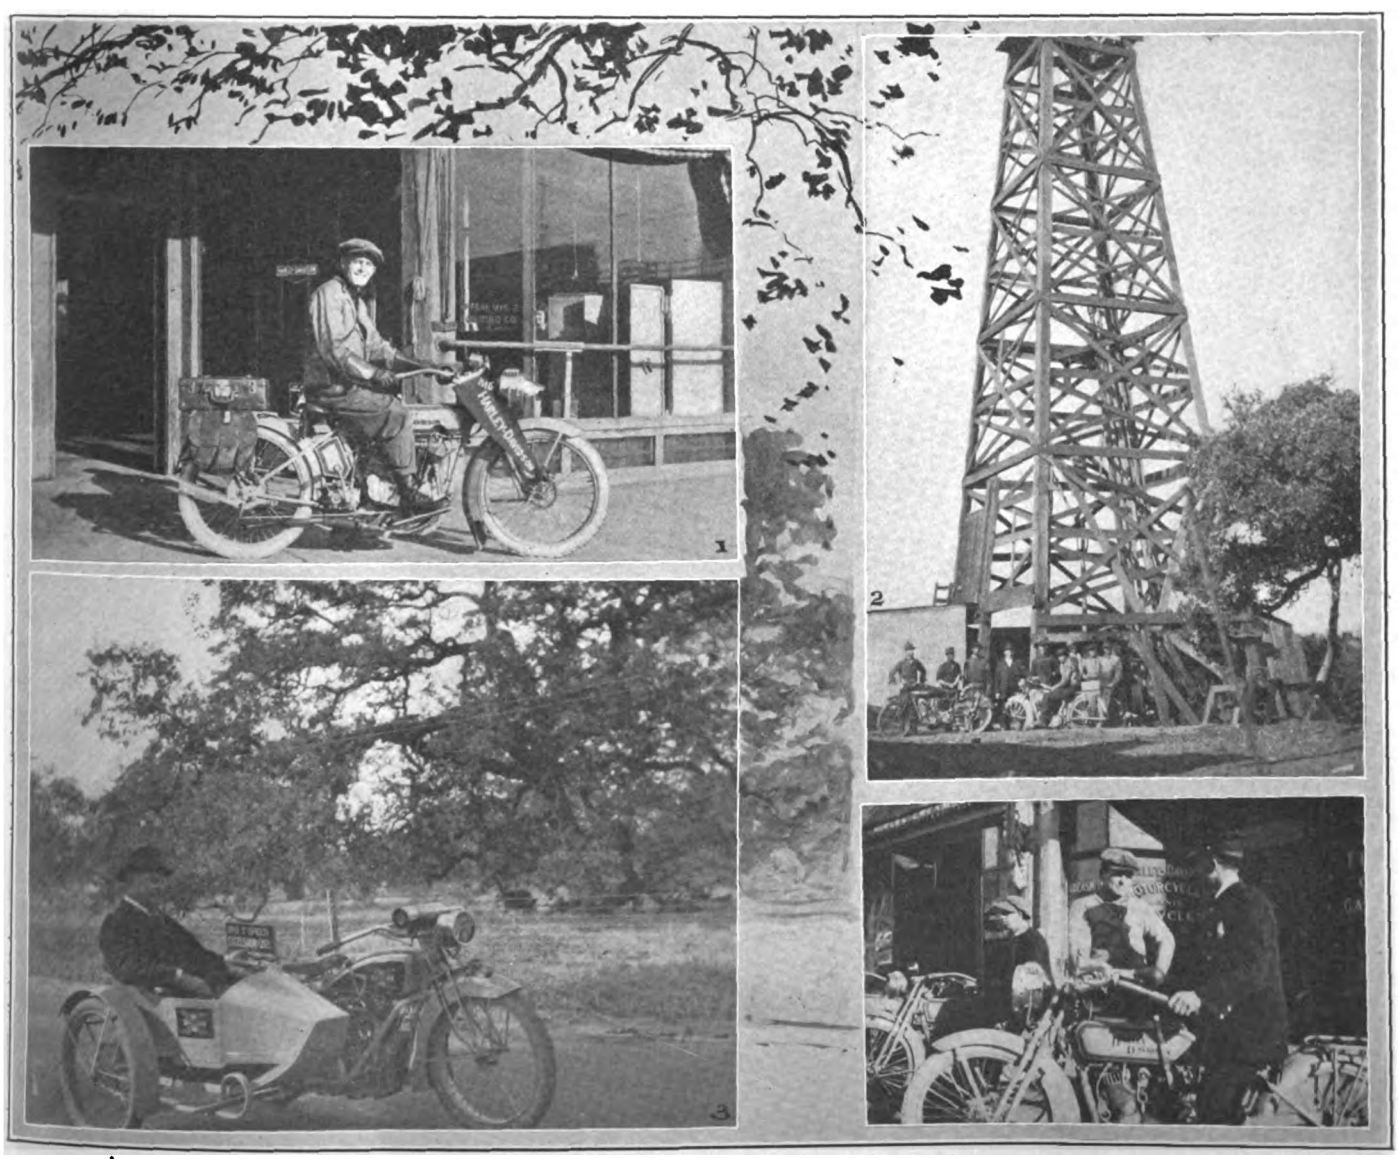
Down at Bakersfield agent George L. Snider and Lillie went out into the wilderness of Kern River Canyon, deep in the Sierras, and after some of the toughest kind of demonstrating sold two machines to men employed at a power project. It was like a release from jail to those boys to get something that would take them a hundred miles through mountain and desert into civilization in a few hours. Snider had sold all his first lot of machines, and had orders stacked up against future deliveries.

Lillie found that the dealers are putting more "pep" into their selling methods than ever before.

## DEALERS ENJOY A BIG PROGRAM

**Second Picnic of Los Angeles Association at Long Beach Had no Dull Moments; Novelty Contests Brought Spirited Competition.**

LOS ANGELES, Cal.—Those who attended the second Los Angeles dealers' picnic at Long Beach said they never had a better time in their lives. T. C. Girton and Fred Hoffer and the boys in the Girton-Hoffer outfit were the managers of the day, by agreement among all the dealers, and to say they made good is putting it mildly. The events were interesting all the way through, and the way the accessory prizes, to the value of a couple of hundred dollars, were passed around among the athletes



1, H. A. Lillie with First 1916 Harley-Davidson in Los Angeles; 2, Fred Hoffer at the Palmer Union Oil Wells near Santa Maria, After a Hard Drive with His Excelsior Sidecar Outfit; 3, Hoffer's Tidy Combination Snapped During the Demonstrating Tour; Jim Slaybaugh, Harley-Davidson Agent in Santa Barbara, Turning Over a 1916 Model to Motor Cop Randolph

THEY LIVE ON THEIR MACHINE—EVERYBODY KNOWS 'EM

**"Al" and Mrs. Rhoades, of Los Angeles, Out for a Daily Spin with the Kiddies. All the Riders in Southern California Say "Howdy" When They Pass**

made the competition the real thing all the way through.

The get-away contest, first heat, was won by Roy Du Granute, Merkel, with Al Rhodes, Harley-Davidson, second. The second heat was won by Al Hart, Indian, with Cooper, Thor, second; final, Du Granute, Rhodes, Hart, and Miller, Harley-Davidson, in the order named. The three-leg race places went to Cooper, Rhodes and Du Granute, who also carried off the honors in the human wheelbarrow comedy speed contest, with "Blick" Walters in fourth place. In the lightweight contest, "Johnny," with a half-distance start on the Cyclemotor which has been on exhibition at Risden's store, got first; Du Granute, Miami Power Bicycle, second; Sammy Hamilton, Miami Power Bicycle, third; and fourth went to the rider of a 2¼ h. p. Indian.

One of the best contests of the day was the two-mile speed race won by Freddy Ludlow on his Indian; Miller and Rhodes, on Harley-Davidsons, were second and third; Du Granute, Flying Merkle, fifth. The jump on a motorcycle went to a Henderson rider; second, Du Granute; third, Ludlow; fourth, Cooper; fifth, Rhodes. Trouble race, Rhodes, Ludlow, Woodward and Cooper. The splendid condition of the hard sand on the water front, where the events were held back of the outgoing tide, the reception by the Long Beach band, which led the procession across the business district, and the fine policing at the events all helped to make the riders feel that the big program was a success from end to end.

## WELBORN TOOK HOLIDAY

Los Angeles, Cal.—E. E. Welborn, sales manager for the Appeal Mfg. & Jobbing Company, took a few days off recently, "between carloads of Harley-Davidsons," as he expressed it. He packed up and traveled to San Francisco to take a look around the Exposition, but will be back again before December 1.

"If I don't get my short vacation in before the autumn orange picking starts, I will lose it altogether," said Welborn. "The first carload of Harley-Davidsons has come and gone, and each dealer in Southern California has a demonstrator out of it. The second carload and the third are on the way from Milwaukee, while the fourth is due to start on November 24. The fifth is to leave before December 1. We have orders for practically every machine in these carloads."

The Smith Motor Wheel is benefiting from a change in local sales policy since the Appeal firm took the distribution for it. Los Angeles has been made open territory and all dealers have a chance to participate in the sale of this cycle booster. At the end of the second week in November, the Appeal Co. had sold 40, and had a shipment of 44 coming and nearly all sold. This department of the company is under charge of J. A. Benson.

## INTEREST IN LIGHTWEIGHT

Los Angeles, Cal.—Excelsior dealers are finding unusual interest these days in the new lightweight. T. C. Girton found this condition very noticeable in his trip by sidecar around the "Kite" and south to San Diego, and Fred Hoffer, his partner, reports the same kind of talk from the coast country north of Los Angeles. Hoffer is now making a long trip through Arizona, New Mexico and Western Texas, covering the balance of the big territory handled by the Girton-Hoffer company as Southwestern distributors of the Excelsior.

## FISK OFFICIALS ON COAST

Seattle, Wash.—A party of executive officials of the Fisk Rubber Company, of Chicopee Falls, Mass., spent a week on a tour of inspection in this city recently. The visitors were R. M. McGraw, assistant superintendent; E. M. Bogardus, comptroller, B. H. Pratt, Pacific Coast manager, and G. A. Malcolm, district manager. Their trip will include stops at Portland, San Francisco and Los Angeles.

## HENDERSONS FOR POLICE

Los Angeles, Cal.—The entire Los Angeles County police squad will use Henderson motorcycles for their 1916 mounts. The sheriff's office and speed squad will use 21 machines. Among Henderson police repeat orders are those from Santa Ana, Orange, Pomona, and Long Beach.

## NEW HEADQUARTERS

Los Angeles, Cal.—The Henderson Motorcycle Sales Co. of California, state distributor for the popular four-cylinder mount has fixed up large and businesslike quarters in the Marsh-Strong Building, next to the rooms of the Continental National Bank at 907-9 South Main street, Los Angeles. The new store offers exceptional opportunities in the way of window display, and the layout features new machines at the right hand side of the entrance with the rebuilt models at the left and somewhat in the rear. The repair shop runs clear across the building at the rear.

In the front of the store on the left hand side is a clubroom for riders, and Messrs. Hubbard and Lee, the financial sponsors and managing directors of the new company, with Hugh A. Fargo, factory manager for the Pacific Coast, have some ideas up their sleeves which will no doubt make riders appreciate the many service features of the establishment.

## SPEEDSTERS IN WINTER QUARTERS

Los Angeles, Cal. — Thanksgiving reminded one of the good old times in Motorcycle Row, Los Angeles. Don Johns and Bob Perry didn't need any turkey. They sure have got to be the plump and rosy-cheeked lads in their tour of the eastern pleasure resorts. And some other old-timers have blown in from Phoenix to see how the climate is going to use them this winter. Among those present just now are Carl Goudy, Don Johns, Bob Perry, Ray Creviston, Dave Kenny, Morty Graves, Bill Goudy, Larry Fleckenstein and Frank Montgomery. "We won't work at all—just enjoy the climate," they all say, and a few minutes later they are talking about a little meet at Ascot the middle of December and another in Bakersfield the first of the year.

## BILL GOUDY JOINS CARL

San Diego, Cal.—Bill Goudy, after winning third at Phoenix, hustled over to Los Angeles, and from there came back with Carl, the new Excelsior agent at San Diego. With his brother's assistance Carl is working to build up one of the finest motorcycle stores in the country. Fred Hoffer, the Southern California distributor, says, "San Diego and the Goudy boys and that 1916 Excelsior look like a good combination."

## BUY OUT TREMPER

Seattle, Wash.—Vernon & Son have purchased the stock and supplies of Theodore P. Tremper, former Thor agent in this city. While the Tremper firm will not handle the Thor, they will continue to stock the parts.

## LOOKING FOR AGENCY

Portland, Ore.—George J. Stonehouse, formerly of Vancouver, is now located at 707 Washington street. He has a well-equipped repair shop and is looking for the agency for some motorcycle to go with it.

## AGREE ON TIME SALES TERMS

Seattle, Wash.—The Seattle Dealers Co-operative Association, which was formed recently, has agreed that in the future, a deposit of $125 must be made on "time" sales, if the machines are equipped, and $2 added each month for deferred payments.

## DELIVERING THE GOODS

UNDER existing conditions it requires no great stretch of the imagination to picture Uncle Sam as supplying the world with cycles. He is practically without competition at present and all the choicest markets will be his for a long time to come. But successful export business naturally entails consideration of many points not involved in home trade. The foreign buyer must be thoroughly posted as to what the American field has to offer him; he must be enabled to obtain his machines in perfect condition and without annoyance; he must be imbued with confidence.

**Motor Cycle Illustrated** is conducting an Export Bureau for the benefit of motorcycle and bicycle manufacturers. It tells why and how. Pertinent information from all parts of the world is tabulated for ready reference. And the service is free to the trade. Manufacturers who are interested in the possibilities of foreign markets and the best methods of approaching them are invited to use this service early and often.

# STEVENS BILL TO HELP RETAILERS

### New Measure Will Aid Cycle Dealers With All Others Who Suffer from Unfair Competition; Ask Your Congressman to Vote for it.

WASHINGTON, D. C., November 26.—The motorcycle dealer, and in fact any other merchant who is looking to give the "cut price" specialist a knock-out blow, will do well to back the Stevens Bill. This bill, which is known as H. R. 13305, has been introduced in Congress by Representative Stevens of New Hampshire and aims to provide a remedy for unfair competition of trading monopolies with the independent merchants of the country. In a nutshell, it is a bill for the elimination of unfair competition.

Unfair advertising, and unfair selling by trade stores and large trade monopolies work infinite harm to honest dealers who maintain prices and sell legitimately, and the Stevens bill is to protect the dealer against dishonest selling methods. The Stevens Bill would prevent the unfair and dishonest use of well-known goods as advertising bait, and guarantee a uniform price to all customers—thus insuring a uniform profit to all dealers handling such goods.

The Stevens Bill requires goods to stand on their own merits. For the cycle dealer as well as all other retailers, it promises relief from one of the most aggravating and dangerous of trade abuses.

Every cycle dealer should let his Congressman know that he wants the Stevens Bill passed. All that is necessary is to write a letter to your State Senator or Congressman from your district urging them to support the Stevens Bill (H. R. 13305), and to use their influence to secure its enactment.

### SNUBBING THE PRICE-CUTTER

The price-cutting evil received a wallop in New York at the hands of the United States Court of Appeals a few days ago when it upheld the decision of Judge Hough that a manufacturer has the right to refuse to deal with a price-cutter. The precedent was established in the case of the Great Atlantic & Pacific Tea Company against the Cream of Wheat Company, but the case is recognized as being of wide import inasmuch as it legally establishes the chief principles which advocates of price maintenance in all lines have been trying to have the courts recognize.

"CAN'T BE WITHOUT IT."

"Enclosed find check for two dollars for subscription to your **Motor Cycle Illustrated.** We have been taking this journal for several years and cannot be without it in the motorcycle business.

# OPENING AMERICA'S WONDERLAND

## How the Goodrich Touring Bureau Is Helping Motorcyclists to See the Great Northwest

By C. E. COOK
Pacific Coast Manager, The B. F. Goodrich Co.

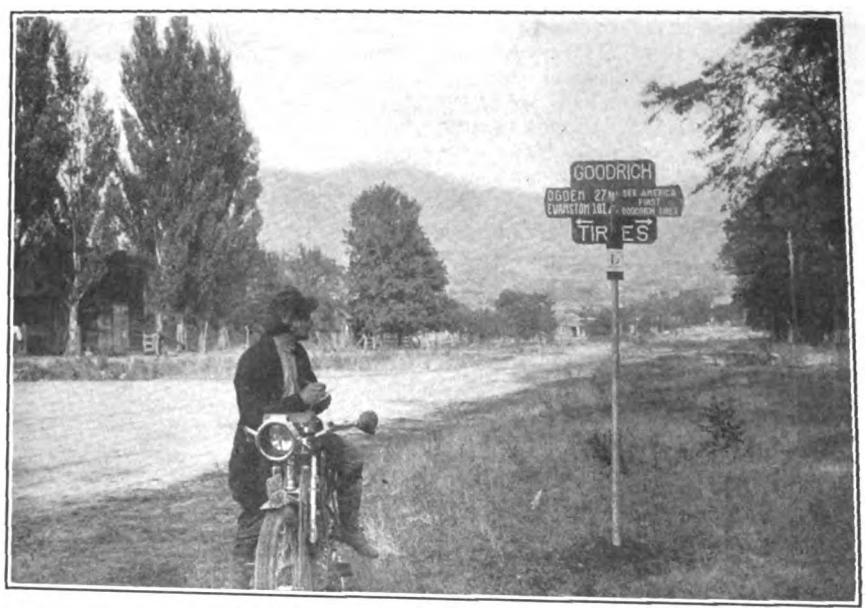
THE great Northwest is the Wonderland of America. Not so many years ago it was almost inaccessible to tourists, but the good roads movement has opened up to the motorcyclist this section which is so rich in scenic splendors, and the work of our Goodrich National Touring Bureau has contributed in no small measure to the fact that hundreds of motorists are seeing each day wonders of nature which they never thought to exist in their own country.

When it came to giving the various tours that our bureau had mapped out a fitting name, the words which spontaneously suggested themselves were "The Wonderland Tours." This was indeed fitting for the glorious Northwest, bounded on the South from Cheyenne to San Francisco by the Lincoln Highway, on the West from San Francisco to Portland and Seattle by the Pacific Highway and on the North and East from Seattle and Spokane and back to Cheyenne by the "Goodrich Wonderland Trail."

It might well have been called the National Parks Tour with Mount Rainier, the Glacier and the Yellowstone National Parks, not to forget California's Yosemite Valley, all embraced in this territory. In no other part of the United States, no, not even in all the world, are there mountains so majestic, valleys so alluring, forests so fitted for a race of Titans, as in our Pacific Northwest.

### Western American Wonder

Americans, who, in other years, have spent their summers abroad, to roam through the Swiss Alps, cross the Mère de Glace, and perchance scale the Matterhorn, thought there were no other wonders worth while, until led by our Northern Wonderland Trail they saw sixty living glaciers creeping down the mountain sides—mountains that rear their heads some two miles into the sky. Many a blasé globe trotter also has stood with open-eyed astonishment



**Chester Lamb, of Goodrich Road Crew, Checking Sign Near Salt Lake City**

before the glories revealed in the Yellowstone Park.

Those who have never been to the Yellowstone cannot appreciate what they have missed. The landscape is a riot of colors: blues, yellows, greens, reds and purples mingle in attractive confusion—a Garden of the Gods untouched by man except for roadways which make it accessible to the motorcyclist.

### Posting Yellowstone Park

Mr. Raymond Beck, chief of the Goodrich Touring Bureau, learned early this year that the Yellowstone National Park was to be thrown open to the public. With characteristic energy, he immediately started one of our official road marking trucks on the job to sign-post adequately the roads leading through these wonderlands. It was a huge undertaking and yet so ably was the matter handled by our road marking crew that already the "Wonderland Tours" have been guide-posted from Seattle to Cheyenne and back again to San Francisco through Salt Lake City and Reno.

The balance of the highway from here to Portland and Seattle had previously been guide-posted by us, but owing to the action of the weather and other causes a good many of these signs will have to be replaced. This will be taken care of before the opening of the 1916 riding season so that the principal routes through this entire territory will be well guide-posted.

### Good Roads Movement

The good roads movement has made it possible to locate guide posts and thus render even more accessible these glorious national parks. It has spread from Seattle and Portland East and from San Francisco, Cheyenne, Denver and Salt Lake City North. We are happy to say that California is one of the leaders in this movement which has opened up thousands of miles of good roads to the motorcyclist.

In connection with the opening up of the Yellowstone National Park on the first of August, it was no more than fitting that the Goodrich road marker crew, in charge of Mr. Chester Lamb, should have been present and help celebrate the occasion by entering our truck in the Opening Day Parade at Cody.

### Forbidden on Reservation

At present, motorcyclists are allowed in the Yellowstone National Park, but they are not allowed in the Yosemite Reservation. We hope that through the good offices of the F. A. M. the Federal government may be induced to let down the bars for the 1916 season.

Mention of the "Wonderland Tours" would be incomplete without a word about

**General Map of Wonderland Tours from Denver to Seattle and San Francisco**

Digitized by Google

the Columbia Highway which has been made possible by the tireless energy of the Portland Chamber of Commerce and civic organizations of the other cities and towns of the Columbia River Counties. They formed the Columbia Highway Association and have worked to such good purpose that this highway is now fast becoming one of the most famous in the country on account of its scenic splendors. Furthermore, connecting as it does The Dalles and Pendleton through Boise City, Twin Falls and Pocatello with Salt Lake City, Denver and other Eastern points, it forms a pleasing and optional route from the Lincoln Highway, particularly to those tourists wishing to visit Portland and Seattle.

**Columbia Highway Route**

The Goodrich Touring Bureau is at present preparing a route book covering such a trip from Denver through Pendleton, The Dalles and Portland along the Columbia Highway. This will be ready for the 1916 touring season and by that time also they hope to have this additional distance adequately guide-posted.

This guide-posting is but one phase of their nation-wide touring bureau work. In addition, they are in a position to supply road maps and route books covering, not only the "Wonderful Tours," but the entire United States as well.

Whether he goes from Chicago to New York, or from New York to Florida, or from New Orleans North to St. Louis and Omaha, in other words, from Sandy Hook to the Golden Gate, or from the Gulf of Mexico to the home of the White Sox, the motorcyclist may proceed on his way with the assurance that Goodrich guide-posts and Goodrich Guide Books will carry him safely to his destination.

## WASHINGTON REGISTRATIONS

Up to October 27, Washington motorcycle registrations totalled 4,940. Motorcycle fees at $2.50 per machine totalled $12,331.

## LONGEST STRETCH FINISHED

Columbus, Ohio.—The longest stretch of roadway ever improved under the direction of the Ohio Highway Commission has been completed by Contractor H. E. Culbertson and accepted by the State. It consists of 24 miles of the old National Highway in Licking and Muskingum counties. The new road is constructed of concrete. A special railway was built along the line in order to get materials on the ground. The excessive rain during the summer delayed the work to a large degree.

## ROAD BUILDERS' CONVENTION

Pittsburgh, Pa.—The American Road Builders' Association has decided to accept the invitation of the city authorities and hold its 1916 convention here. The dates set are February 22 to 25 inclusive. The city has appropriated ample funds to put Mechanical Hall of the Exposition Building in good shape for the convention.

# MOTORING IN THE PICTURESQUE REALM OF THE MIKADO

## What a Tourist Saw from the Saddle of a Motorcycle

By Major George H.R.Gosman, U.S.Army

Part II

AS the rain came drizzling down steadily the next morning and did not give any sign of letting up, I decided to spend the day in Toyohashi, though I did so with great reluctance: this little town had few attractions and I wanted to speed my motorcycle journey from Tokyo to Kyoto, for I had hardly covered very much ground in two days. After cleaning up my Indian, I wandered down to the railroad station and watched the bustling activity of the place.

### A Motley Crowd of Japs

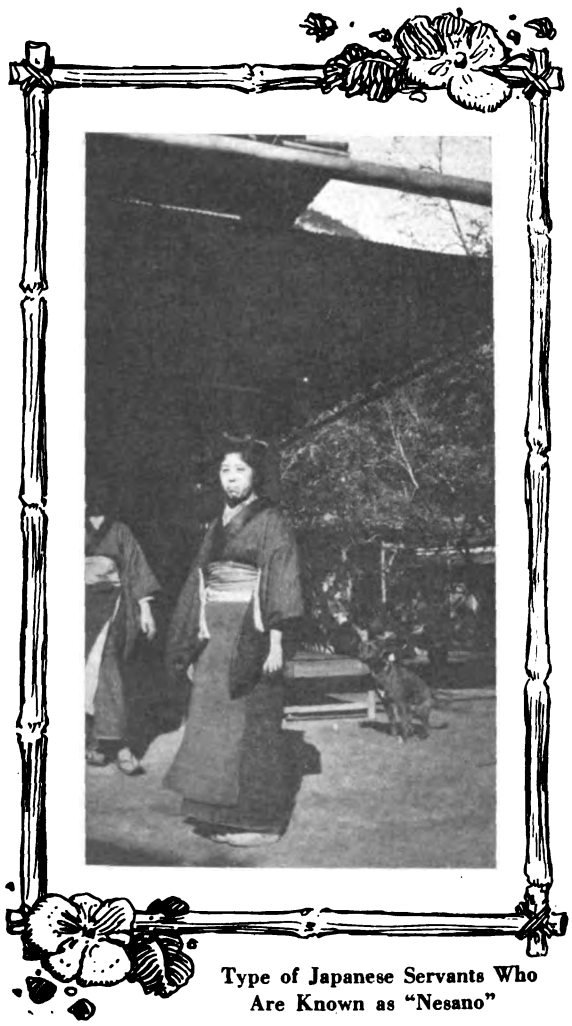
The grand maneuvers of the year were being held in this section and the country folk were pouring into the station in large numbers. The women were especially interesting, all dressed up in a confusing variety of colors; some were carrying babies strapped on their backs, and with baggage in both hands were chattering like a lot of magpies and pushing toward the ticket office. While thus idling away my time at the station, a lady and her son entered, whom I immediately spotted as Americans. I could readily surmise that they were not tourists but had lived in Japan for several years. Somehow you can always tell an American in a foreign land—and you can easily pick out the tourist.

Foreigners in a strange land are usually more democratic than at home and I soon found myself talking to my fellow American. She was the wife of a missionary who was working in Toyohashi, and was going to take a trip with her boy to Nagoya. Would her husband be glad to see me? Why, of course; an American was always welcome. After seeing the missionary's wife off on the train, I wended my way through the muddy streets and soon found the house in which he dwelt.

### At the Missionary's Home

My host was a very genial person. He insisted upon my staying to dinner and sleeping at his house that night. The day was spent more pleasantly than I thought it would be, for I found that the missionary was a very entertaining conversationalist and had some interesting stories to tell of his work. During the course of our conversation I was very much surprised to learn that, though he had been in Japan for more than twenty years, he could not read the Japanese language and could speak only a little. How can a man accomplish much among the Japanese when through ignorance of their language he has but a scant knowledge of their real life? But this missionary was not the only one thus handicapped, for I met others in the same plight.

Perhaps it would seem ungrateful of me to criticize my host in this way, for he was one of the most genial Americans whom I had come across in Japan. Whatever his shortcomings as an efficient missionary were, he certainly knew how to make a traveler feel at home. It wasn't until late that night that I retired to a soft feather bed in my host's spare room. Yes, sir! It was really and truly a feather bed — and what a contrast to the awful things that are used as beds in Japanese inns. It is an indisputable fact that we never appreciate a thing until forced to do without it.



Type of Japanese Servants Who Are Known as "Nesano"

The next morning just as the sun was coming over the horizon I waved a farewell to the missionary. Hopping on my machine, I was soon in Okazaki, from which point all the way to Nagoya I was virtually in the midst of the grand maneuvres and encountered a huge crowd of spectators who almost blocked the road and compelled me to stop many times. However, I did not linger long as I wanted to make sure of crossing two or three large rivers that I knew were ahead of me on the other side of Nagoya. In a few moments I was on the outskirts of the city and then on the main street. I did not stop but went on through, at least I tried to, for it was a pretty difficult problem to drive through a big city whose streets one is not familiar with. In Japan the streets are confusing and when one is caught in the meshes of a city like Nagoya it is doubtful if he will get out by nightfall. I made more than one wrong turn, but finally succeeded in working my way through a maize of carts and people, and was greatly relieved when I saw the open highway again.

On I sped towards Maibara, the place where I now decided to stay that night. It was now Saturday afternoon and I was really one whole day behind my figuring, but this made no difference and as I looked forward to a lovely day on the shores of lake Biwa it was best, I thought, to stop this side of Kyoto. Soon I arrived at the first of the great rivers that I have mentioned, and happily it had a good bridge, so there was no delay. The next river was also easily crossed on a queer-looking flat boat. When I was crossing this river, I had quite a talk with two of the fishermen in the boat. They proved to be good hearted fellows and took a great interest in my machine. As usual they asked the two questions: "How fast will it go?" and "How much did it cost?" These questions had become so frequent that I used a stock answer, saying eighty miles and 800 yen. Their eyes almost popped out in amazement.

### The Battlefield of Seki-ga-Hara

The country was now becoming of especial interest to me as I was approaching the great battlefield of Seki-ga-Hara. I had read many times of this battle and heard the Japanese young men say so much of it, but had never seen it before. And now, here I was all alone with plenty of time to go over the whole place and to conjure up in my imagination the great hosts of armoured warriors dashing at each other in all the brilliancy of centuries ago. It was only three o'clock, and knowing that I had still two hours to reach Maibara, only 15 miles away, I made a detour towards the battlefield. I stopped, put my machine safely away on the side of the road, and taking out my history of Japan spent a delightful hour amidst those historic surroundings. The sun was just in the right position to make the field look attractive, and the distant scenery, too, seemed to fit in with my mood. It was on this field that in 1600 the great Ieyasu gained a decisive victory which changed the whole future of Japan.

I was reluctant to leave this very interest-

Digitized by Google

ing place, but it was getting late and so once more I started and in an hour was in Maibara. I passed through a narrow valley, which opening out on a small plain is devoted to the cultivation of mulberry. Pine clad hills were off at the distance, and still further away on my right was the Ibuki mountain which is about 4,300 feet high.

It was just dusk when I arrived at Maibara and I put up at a little inn in front of the railroad station. It was an attractive little place and the garden in front of my room was as artistic as could be. I had my dinner and breakfast there, and the charge including the room was the large sum of one yen eighty sen—ninety cents. Of course as I was travelling Japanese style I gave a fair sized "Cha Dai," about a yen in this case, and so that made the total bill one dollar and forty cents, and in return I received an extra hearty goodbye and a little gift thrown in. "Cha Dai" means tea money and is like a tip in other countries; one does not pay it to any servant but at the desk, and gets a regular receipt for it. The number of bows you are the recipient of on leaving will in a measure depend on the size of the "Cha Dai" you have given. This is a strange custom, and as a matter of fact has become quite an evil in Japan. It is said of a cabinet minister, whose bill was three yen, that he gave twenty-five for "Cha Dai." This class of Japanese feel constrained to give these large amounts because, they claim, they will lose caste otherwise.

### Skirting Lake Biwa

It was quite cool and brisk at five-thirty the next morning and when I left it was hardly daylight. I lighted the lamp on my Indian and soon was skirting along the shores of the lovely lake Biwa.

The maples bordering the lake had taken on their glorious autumnal shades of red. The whole country seemed afire and the blending of the soft browns and light and dark reds was very beautiful. For miles and miles I rode over a fine road, with the maples on either side and in the distance, too. Quite near the lake is a range of hills and far away to the right, at this time to be dimly seen, were a range of blue mountains.

In a little village nearby called Zeze, lived a friend of mine, and it was towards that point that I was now headed. Previously I had sent him word that I was coming. Soon I was in the main street of the Zeze and located the house of my friend. This young man had been my constant companion on many of my rambles and we had worked together for many an hour on the Japanese language. And after hard study he became a teacher in the middle school in Zeze and enjoyed his work greatly.

As we had not seen each other in some months, we met at the Nakamoto hotel. This hotel is located on the Southwestern end of lake Biwa and its little garden is right on the shore so one has the benefit of the lake scenery as well as the flowers and the maples. The sleeping rooms, too, are in little detached buildings, and altogether it is a very picturesque and well laid out place. The room that we were now in, however, was in the main building, and gase us an opportunity to view the lake in all its splendor, shimmering under the red autumn moon.

### And the "Nesan" Came in

We wiled away an hour or so viewing the fascinating scene and drank cup after cup of tea. (It is strange how one grows to like this Japanese tea and how many cups one can drink.) Shortly the "Nesan" came to call us to dinner. The room we had was unusually pretty, so when this young woman came in I asked her about the cost, and she replied that "as it was an exalted American gentleman that they were entertaining this day, they had been so bold as to offer to his 'honorable' use the very best room they had and she felt very much ashamed that it was not good enough to suit his honorable taste." She also showed by her manner that she was very much worried, and kept shifting her gaze towards my companion as much as if to say, "please help me out." She also said that the proprietor was very very much concerned as to my food, as it was so seldom that they had the honor of an honorable foreigner's visit and they had not been prepared for my coming. All the while she was talking to me she was on her knees. Throughout this story I have laid stress on the great courtesy of the Japanese country folk, and purposely so because I honestly believe that those of us who have been fortunate enough to know them are bound to get a good impression of the Japanese people.

After the "Nesan" left us, I took off my dusty clothes and was soon in my "yukata," which is furnished by the hotel and consists of two garments, one a light one and the other of padded material. It is given you for your bath, but it is customary to sleep in the under one. You can wander at your pleasure all around the hotel in this garment, even discarding the outer one in warm weather. When the honorable bath was ready it was announced to me by the bath attendant, and I took my "honorable" self across the garden to the bath house. After the proper preliminary scrubbing I enjoyed the hot water, despite the fact that there were at the time several lady occupants in the same large square pool. By this stage of my sojourn in Japan I had long since ceased to mind such a small thing as a few ladies in one's bath. Hence I boiled myself to my heart's content and then feeling like a new man I went back to the little hotel to find awaiting me a fine supper of raw fish and other delicacies such as sea weed and hot sake.

My friend had dinner with me, and when it was over we sat around, talked a while and then listened to a party of Japanese merry-making in an adjoining house. These people were drinking plenty of sake and I suppose they kept it up all night, but I did not hear their celebrating because I was soon in the land of slumbers and only awoke the next morning when the bath-man told me that my "honorable bath" was again

### Visit Shinto Temple

It was Sunday and as my companion had no school, we decided to take a walk somewhere on the shore of the lake. We took a small boat to a little place called Sakamoto and then walked up into the woods to a temple located among the maples. It is a great Shinto shrine, called Sanno, and it is located on the slope of Hiei mountain. As it was the maple season, and Sunday, too, the people were out in force. In the woods around the temple and on the banks of two pretty streams nearby were many resting places where tea was served for a small sum to hundreds of people, for with their lunch baskets the Japanese will make excursions to a place like this, often coming for miles to see the maples and to worship at the shrine. They certainly seem to have a good time and to enjoy the gifts of nature.

We had planned to spend the whole day at sight-seeing, because I felt that I would not come to these places again, at least not for some years. Hence, we had lunch here and then went on to the Miidera, one of the many famous temples in and around Kyoto. It is located on a high hill from which the view is very fine.

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## HOW TO CONSTRUCT A SAFE PACKING CASE

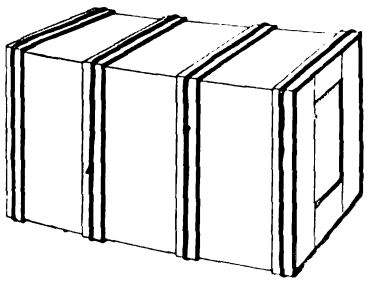
FURTHER evidence that the packing of goods is one of the most important points to be considered by the American exporter is contained in a statement from Consul General L. J. Keena, at Valparaiso, Chile. Consul Keena's report:

"The present widening of miscellaneous exports from the United States to Chile has given rise to repeated complaints in regard to American packing.

"It should be remembered, in packing goods for shipment to Valparaiso, that all merchandise has to be unloaded in slings from ship to lighter in practically an open roadstead and again hoisted in a sling from the lighter to the wharf, and that the water is rougher at the wharf, to the extent of the backwash, than the more open water at the ship anchorage. Packing for Valparaiso, therefore, can not be done on the basis of what would be considered satisfactory strength for shipments to Rio de Janeiro or Buenos Aires, where ships are unloaded in still water and ordinarily discharge directly onto the docks.

"If merchandise coming from the United States to Valparaiso without transshipment is subject to severe handling because of the methods of unloading at this port, merchandise transshipped at Panama undergoes almost twice the risk of breakage. There further seems to be so steady a percentage of loss of merchandise out of cases which are transshipped at Panama and arrive here in a broken condition that it would appear that a part of the rough handling en route is intentional.

"At present it is customary for local importers of general merchandise to insure against theft as well as against breakage on merchandise from the United States, because improper packing allows the ends to be unstrapped, lifted and set back without defacing the case. The accompanying illustration shows an English packing case which is stated by an importer to be so well constructed and so well covered that it requires no insurance against theft.



**Recommended Packing Case**

"It will be noticed from the illustration that the end blocking and the end battens entirely cover the joinings of the side with the top and bottom of the case and give the case great rigidity. This type of case is used for general merchandise, shoes, shirts, collars, haberdashery, etc.

"The case is zinc lined. It is 3 feet 4 inches long by 2 feet 4 inches in height and width. The ends are 1¼-inch boards, the sides 1-inch, and the battens are made of strips ¾ by 3½ inches. It is strongly iron-hooped right around the battens, and well nailed. For a case of this type the importer pays an extra charge of 25 to 30 shillings ($6 to $7.25) to the British exporter."

## BECK AFTER EXPORT SALES

Irving Beck, manager of the New York headquarters of the Rogers Manufacturing Company, and representative of the Fentress-Newton Manufacturing Company, has returned to New York City after another business trip and announces that he will devote much of his time for the next month or so to drumming up export sales. Mr. Beck is convinced that this line will justify all the attention he can give it for some time to come and he will remain in New York at least until January 1. He has attractive export propositions to make in connection with Rogers sidecars and F-N tandems, and can be reached at 1493 Fifth avenue, New York.

## DUTCH RUBBER PRODUCTION

According to a report published in the Amsterdam Press, the rubber production of the Amsterdam-Tapanoeli Rubber-Culture Company was 50,156 pounds during the first nine months of this year against 26,686 pounds during the whole of the year of 1914. That of the Belgium-Netherlands Culture Company was 407,950 pounds during the first nine months of this year against 366,700 pounds during all of 1914.

## WANT SOLE AGENCY RIGHTS

Representation for a good American motorcycle is desired by a large Dutch firm. Sole agency rights must be granted. Those interested should address "W. Z. D." care of Nijgh & Van Ditmar's General Advertising Agency, Ltd., at Rotterdam, Holland.

## EXPORTS GREATER

Exports during the week ending November 13, at thirteen principal custom districts of the United States, totalled in value $81,242,927, as against $32,640,772 worth of imports.

## SYDNEY TRADE IS GROWING

There has been a very decided increase in both the tonnage and number of vessels from the United States to Sydney, Australia, during the nine months of this year, as compared with the same period in 1914, as shown by the following comparative figures:

| | Tons. |
|---|---|
| 3 months ending March, 1914 | 17,318 |
| 3 months ending March, 1915 | 20,671 |
| Increase | 3,353 |
| 3 months ending June, 1914 | 14,850 |
| 3 months ending June, 1915 | 27,095 |
| Increase | 12,245 |
| 3 months ending September, 1914 | 12,751 |
| 3 months ending September, 1915 | 34,501 |
| Increase | 21,750 |

The total increase for the nine months is 37,348 tons, which is almost equal to the total tonnage for the first nine months of 1914. In other words, our business with Australia has practically doubled this year.

## PORTO RICO WILL ASSIST

The Insular Government of Porto Rico announces that it will gladly give information to the manufacturers and merchants in the United States who wish to extend their trade to Porto Rico. Communications should be addressed to G. F. Correa, Chief of Insular Government Bureau of Information, San Juan, Porto Rico. In connection with these efforts to extend existing commercial relations, it may be noted that Porto Rico already enjoys a considerable volume of trade with the United States. For the year ending June 30, 1915, the Island shipped to the United States domestic merchandise valued at more than $42,000,000. It received in return from the United States domestic goods worth approximately $30,000,000.

## CYCLE AGENCY WANTED

Ch. Meister, of 6 boulevard Pont-Noyelles, Amiens, France, is desirous of becoming agent for American motorcycles, bicycles and accessories for both. M. Meister has been established in Amiens for a number of seasons, and until the outbreak of the war handled British goods in the lines mentioned.

## TAHITIANS NEED BICYCLES

According to the American Consul Thomas B. Layton, at Tahiti, Society Islands, "while the bicycle is very popular in these islands, the motorcycle is not. Only a few of the latter have been sold in the colony. But there are favorable openings for the introduction of American-made bicycles."

## SPRING-SUPPORTED TANDEM

SPRING supported at both front and rear is the tandem seat for which Edward F. Pawsat, of Sheboygan, Wis., has been granted Patent No. 1,158,551. An apron at the rear protects the clothing of the passenger from getting caught in the gap at the rear end of the seat between the seat frame and the load frame. The coil springs at the rear are underhung, encircling roads which extend upward and attach to the seat. The patent has been assigned to the Wald Manufacturing Company, of Sheboygan, Wis. This tandem is shown in illustration No. 1 of the layout.

## CYCLE STAND AND CARRIER

A BICYCLE stand which fits on the front wheel and which combined a package-carrying attachment has been patented by Herman W. Walk, of Chicago, Ill., the number of the patent being 1,159,139. The stand is pivoted to the front axle, and has means for holding it in the inoperative position either at the front or rear of the wheel. When down, it takes the weight of the package-carrying device from the wheel itself, by means of suitable linkage coming into action only when in this position. (See illustration No. 2.)

## COMBINED LAMP AND HORN

PATENT No. 1,157,744 has been issued to Perrin B. Whitney of New York for a combined electric headlight and horn. The body of the lamp is parabolic and contains the reflector and two bulbs, that at the focus being the main bulb, while that at the top being a pilot bulb. At the lower ex-

Digitized by Google

terior of the body is fitted an electric horn of the vibrating diaphragm type, but without bell or other resonator. Separate leads are made for the horn, while the usual twin lead with bayonet switch is used for both bulbs in the lamp. The patent has been assigned to the Mesinger-Whitney Electric Company, of New York. (Illustration No. 3.)

## BICYCLE CONVERSION SET

THE conversion of a bicycle to a motor vehicle by attaching a motor to drive by friction on the rear tire is the subject of a patent granted to George S. Schunk, of West Allis, Wis. The motor set in the specifications consists of a horizontal single-cylinder air-cooled motor with grooved pulley, a gasoline tank attached to the crankcase of the motor, a prolongation of the cylinder head to flexibly suspend the motor from the seat-post tube, a tension device and the carbureter and means for ignition.

The bracket from the cylinder head is clamped to the seat-post close to the cluster and the motor is fitted so that its grooved pulley will fit over the tread of the tire. The fuel tank will then be directly over the tire. Attached to a low point of the motor is a coil spring with turnbuckle designed to affix to the axle and regulate the tension of the grooved pulley upon the bicycle tire. The carbureter is arranged below the motor in a horizontal position and the muffling device above. Means for controlling the carbureter are provided as in the illustration. Coil and battery ignition are shown, but magneto ignition is also provided for. The patent is No. 1,158,311. (Shown in illustration No. 4.)

## CARRIER ATTACHMENT

PROVIDING a simple and cheap attachment for a bicycle, whereby a parcel carrier can be fitted at the front is the subject of Patent No. 1,155,324, granted to A. D. Meiselbach, of Chicago, Ill. The attachment consists of tubular shaft, and extension tube and a short tube, the shaft having means for carrying a bicycle wheel of less diameter than that ordinarily used. The short tube is inserted in the lower part of the bicycle steering head at the top and into the extension tube at the bottom, and the tubular shaft with its wheel is inserted and clamped in position. Provision is made for ball-bearings at the proper places. The carrier is then attached to lugs on the upper part of the steering head, to knobs on the fork-crown of the tubular shaft and to the axle ends of the small wheel, by suitable flat members. The patent is assigned to the Handy Bicycle Company, of Chicago, Ill. (Illustration No. 5.)

## SADDLE SPRING CONSTRUCTION

IN order to avoid the use of single coil springs at the rear of a motorcycle or bicycle saddle, Miller M. Deem, of Reading, Pa., has designed and received a patent for a duplex arrangement of springs, one set nesting within the other. The seat rests on the upper coils of the compression springs, while the inner pair are normally under tension but are adapted, upon depression of the seat, to serve as compression springs also. (Shown at No. 6.)

## UNIT POWER-PLANT

WILFRED G. JOHNSON, of Elyria, O., has been granted a patent upon a unit-power plant construction for motorcycles as well as a frame to support the same. This construction is that used in the Cleveland two-stroke lightweight, the motor being in the forward part and the magneto, mounted upside down, being the rearmost member. Intermediate is a cross-shaft construction from which the final drive is taken.

The motor is a two-stroke side-crank type, with inside flywheel fitted to a longitudinal shaft of considerable length. From in rear of the flywheel this shaft carries consecutively the slider for the two-speed dog-clutch gearset, a worm for driving the cross-shaft and part of a coupling for driving the magneto, the latter at the extreme rear end. The crankcase of the motor included the gearset casing and that for the cross-shaft. A rearwardly-extending arm carries the magneto. The cross-shaft has a worm wheel meshing with the worm on the main longitudinal shaft.

The frame referred to in the patent specifications is a tubular one with U-shaped lower member incorporating the chain stays at the rear. The rear forks and seat post form a vertical triangle, and there is a top tube leading to the steering head. A single diagonal member is used to connect the latter to the U-shaped lower member. The patent is No. 1,157,547 and has been assigned to W. B. D. Alexander, of Cleveland, an official of the Cleveland Motorcycle Company. (Shown in section at No. 5.)

## ALTERABLE POSITION SADDLE

FREDERICK MESINGER, of New York, who has had many patents on saddles issued to him, has been granted another whereby the dip or inclination of the saddle may be altered to suit the convenience of the user. The construction which is obviously applicable in particular to an Excelsior motorcycle, incorporates a rocker bar for attaching to the end of the seat-post member, a hinge joint with corrugated faces at the rear of this bar and means of attaching a yoke carrying the rear portion of a Mesinger saddle to the bar. The main frame of the saddle pivots at the front on the rocker bar. Adjustment is made for dip of the saddle by a change in the angular relation of the rocker bar and the yoke attaching to the rear of the saddle, separating the corrugated-faced hinge joint for the purpose, and resetting it. The patent number is 1,157,711. It has been assigned to the H. & F. Mesinger Mfg. Co., of New York. (Shown at No. 8.)

# MODERNIZING OLD CROCKS PAYS

### Such Work Keeps Shop Busy in Winter and Increases Profits

By TRADESMAN

TAKE it from Bob Brazenor, who handles the Harley-Davidson on Long Island, there is many a good, live prospect lost to the motorcycle dealer, simply because the latter could not induce him to trade in his old crock for a brand new up-to-the-minute model. "Just about this time," says Bob, "with the new models just out and the demonstrators just uncrated and on the floor, the dealers begin to go over their list of prospects for new machines. The most progressive of them send out invitations to bring the boys in to examine the fine points of the new mounts; others rely on their customers' natural curiosity to get them into their stores.

"Then the dealer gets in his fine work and bends his efforts towards getting the boys to trade in their old models for the new ones. Those who display any sort of willingness to make the deal are put down as future prospects, or are induced to close the transaction on the spot, and the others are forgotten. That's the way the average dealer does it, and by forgetting the fellow who could not be induced to trade in his old machine, they are pasing up many a dollar.

**A Question of Price**

"In most cases it is simply the price that keeps these fellows from making the trade, yet there is not one rider among them who would not be glad to ride a machine with all the latest fitments, provided he could get it at a price he could afford.

"Those riders I cannot land on a trade-in proposition I go after in this way: I show them the new features of the latest models; perhaps the kick-starter, or electric lighting equipment, or something of that sort, which has been added, and I suggest that they bring their machines right up-to-the-minute by having this new device fitted in my shop.

**Converting Is Profitable**

"A good many of the boys are riding very old machines, machines without the clutch, two-speed, foot boards, or any of the modern fitments. Now, each and every one of these devices can be bought to fit practically any make of motorcycle, and the dealer who passes up the opportunity of converting "old crocks" into modern machines by fitting these devices is losing money. Work of this sort keeps the repair shop busy during the winter months, and tends to equalize the profits the year round. I go atfer this business strong, and find that it pays handsomely."

## HEADLIGHT TEST FOR GLARE

St. Louis, Mo.—In order to determine what is a glaring headlight, motorists in this city are required to test their lights by a method devised by the city authorities. The motorcycle or automobile is run into a dark alley and its light turned on. If at a distance of 75 feet the lights show higher than three feet on a black screen they are too glaring and the driver must get them fixed.

## TWO CLUBS AFFILIATE

The Bronx M. C., of 346 East 134th street, New York, N. Y., and the Owensboro M. C., of 111 West Third street, Owensboro, Ky., have affiliated with the F. A. M.

# MANUFACTURERS DISCUSS THE FOREIGN CYCLE MARKET

## Consensus of Opinion Is That Re-Designing of American Bicycles for Overseas Trade Is Not Justified, Considering the High Standing of Present Models Here

THAT foreign bicycle markets are worthy the most serious consideration of American manufacturers, although considerable trouble would be entailed in meeting the precise demands of the foreign buyers, is the opinion of a number of the foremost bicycle producers in this country after reading the article by Mr. O. Ling in the November 25 issue of **Motor Cycle Illustrated**. Several of the manufacturers frankly state that the difficulties involved in re-designing a model or models in keeping with foreign cycle ideas would be out of proportion to the returns, and that the efforts of the American trade should be directed to working up appreciation overseas for the machines at present turned out in this country. The disinclination to make numerous changes by way of catering to the foreign buyers is heightened by the fact that manufacturers here have contracted in full for their supplies for the regular models, which they believe, by the way, will give perfect satisfaction abroad if the riders once become accustomed to using them.

In short, the American manufacturer of bicycles is convinced that he is making machines fit to stand with the world's finest and that he can best serve the foreign market by continuing to produce on a quality basis the models which he is fitted by experience and by factory facilities to turn out most satisfactorily.

### President Lonn's Views

E. J. Lonn, president of the Great Western Manufacturing Company, manufacturer of Crown cycles, and Fauber crank hangers, used the strongest language in sizing up the cycle export situation which the European war has created. Mr. Lonn writes as follows:

"I do not doubt but what Mr. Ling's statement is correct, but our English and German friends insist on an English model bicycle.

"Stop and think it over; you could not get a manufacturer in the United States to consider it. We are being handicapped by the war over here as well. Nearly all the plants in this country are making more or less war material. Forging plants would not make the new dies to make the old style three-piece cotter pin cranks at any price. You could not get any forgings—neither could you get any fittings, such as the English require. The only thing that is left for our friends over there is to learn to buy bicycles as they are made here now. why is their prejudice everlasting? It is not so in this country. Because some contemptible manufacturer in the past sent some rotten bicycles over there, are they going to condemn everybody else? Suppose we looked at their goods the same way! It is not fair. There are better bicycles made in this country than any place in the world, including England. It will be necessary for them to come across and buy goods as we make them in this country; we cannot make them their way because we could not get the tools or the material to do it at this late date."

That the Westfield Manufacturing Company, maker of the Pope, Columbia, Cleveland, Tribune, Rambler and Crescent bicycles as well as the Fay Juveniles, is in a mood to make a bid for foreign trade, provided no re-designing is expected, is indicated by a statement made by Secretary J. B. Fogarty in discussing Mr. Ling's article on foreign opportunities. Mr. Fogarty calls attention to the fact that the obtaining of material is somewhat difficult and that it would be practically out of the question to get the new layout of tools needed for manufacturing an English type of bicycle at this time—even if such a course were considered necessary.

By way of showing that it is not necessary, Mr. Fogarty refers to the "Export Model" bicycle which is now being turned out at the Westfield plant. It is suggestive of foreign types in its general makeup and the company has already received orders for considerable shipments from abroad. Some of these shipments are now on their way.

### American Ideas Growing in Favor

Mr. S. B. Bugbee, assistant sales manager of the Iver Johnson Arms & Cycle Works, strikes a chord in sympathy with Mr. Lonn's expression. He has this to say:

"We think very likely that there may be just such possibilities as Mr. Ling has described, for we are finding it easier to sell our regular models in foreign countries since the outbreak of war curtailed the supply from British sources. On the other hand, it seems to us for the last few years that the European bicycle manufacturers, including the British, have been coming around to the American ideas of design as well as construction features, and we are very sure that eventually this movement will be even more pronounced than at present.

"Under separate cover we are mailing a copy of our new catalog which we should thank you to hand to Mr. Ling. If the latter is willing to look over the same and suggest what changes he has in mind we will, of course, be glad to hear from him."

### The Pierce Attitude

If there is business to be done in foreign lands as Mr. Ling suggests, the Pierce Cycle Company, of Buffalo, is going to go after it in their usual aggressive manner, take it from the following communication from Sales Manager Fred L. Brown:

"Regarding Mr. Ling and export bicycles, wish to state that the writer has been doing a great deal of figuring on a bicycle of English type, but so far we have not been able to get a sample through our factory.

"There is no doubt in the world but what there is a wide chance for an American manufacturer who will make up what is wanted and if we go into this at all, we will make up the best bicycle on earth, only using the foreign design."

J. C. Meyers, of the Gendron Wheel Company, of Toledo, states that his company is interested in Mr. Ling's promise of great things for the American manufacturer who will meet the exact requirements of the foreign trade, and that the Gendron company is prepared to co-operate to any reasonable extent in the campaign for overseas bicycle business.

All of which elicits the following further communication on the subject from Mr. Ling, who can be reached, care of Herbert F. L. Funke Company, Inc., 116 Broad street, New York City. Mr. Ling writes:

"The prevailing idea seems to be that because there is a shortage of English pattern machines people must buy American pattern machines, and while this to some extent is perhaps true, yet any thinking man should realize that foreign customers will probably only buy American pattern machines until such time as English and German makers can again give deliveries.

### Do Not Work to Standard

"Another difficulty with American machines is that the various manufacturers do not work to a given standard. This is one of the main pillars on which English firms have built up their export business. All the parts of the cheaper grade machines are screwed B. S. A. thread and the various parts of machines manufactured by various manufacturers are thus interchangeable. Another point is that owing to prohibitive duty, there are many countries to which complete machines cannot be imported and such countries buy the fittings and the machines are put together by local assemblers. This explains why England and Germany, in addition to their complete machine business, have always done an even larger business in parts.

"I quite realize that to set up for an English machine will mean considerable expense in tools and will probably also take some time, but nevertheless I am still of the opinion that the maker who has sufficient pluck to spend some money on the proposition will be more than sufficiently rewarded by the additional amount of business which he will be able to obtain and which would not only last for the period of the war, but probably for all time."

## PAID FOR PUBLICITY

London, Ont.—Not many days ago F. T. Kerr, the local motorcycle salesman who handles the Smith Motor Wheel, tried a novel advertising stunt with considerable success and some trouble. A bicycle with motor wheel attached was hitched between the shafts of a carriage which was drawn through the downtown streets. The little Smith pulled well in spite of a human load in the rig. All went well until a policeman halted the excursion because the outfit was on a prohibited heavy-traffic street. At least the corner cop declared that no advertising wagons were allowed to use the street in question and Kerr had offended, because a big sign was on the carriage.

The result was that Kerr had to pay "one and costs" at court next day, but he also sold a number of Smiths as a consequence of the publicity feat.

## FIRST IN SASKATOON

Saskatoon, Sask.—The first 1916 motorcycle to arrive in the Canadian West was the new model Harley-Davidson which was received recently by the Walters Cycle Company.

# BIG CROWD SEES AMATEUR EVENT

**Weickt and Klug Win Two-Hour Team Race Held by the Bay View Wheelmen, Ringing Up 22 Points—4,000 Fans Cheer Cyclists.**

NEWARK, N. J., November 28.—Charles Weickt and Fred Klug took first place in the two-hour team bicycle race held at the Weequahic Park track here on Thanksgiving Day. The race was conducted by the Bay View wheelmen, and was decided on the Berlin point system, with a sprint every two miles during the last half hour. Klug and Weickt almost lapped the field and hung up 22 points. Walter White and John Martin took second place with 16 points. Twenty-three teams started in the race, but only nine counted in the point scoring.

### Take 4 out of 6 Sprints

In the last half hour there were just six sprints, with Weickt and Klug winning four of them; each boy copped first place twice. After the third sprint, Weickt jumped away and got a commanding lead, none of the other cyclists trying to overtake him. About 4,000 spectators turned out to see the amateurs ride and gave them a big ovation after winning.

Klug and Weickt both rode a heady race and at the conclusion of the grind were carried off the track on the shoulders of admiring friends. The fight for second honors developed into a tussle between three teams. Walter White did all the sprinting for his team, and rolled up sixteen points. This popular amateur won one sprint, was second in another, third twice, and finished fifth once. His partner, Martin, relieved him between sprints. William Purdue and Chris. Dotterweick and Fred Taylor along with Al Krushel tied for third honors, with fourteen points each. Purdue and Dotterweick won third place on the toss of a coin.

### First Two Sprints Close

In the first two sprints the finish was exceptionally close. White took the lead at the bell for the first sprint and held it all the way to the finish. The first five riders over the line were closely bunched. The second sprint furnished the best finish of the day, with Freddy Taylor copping first place. Taylor came with a great burst of speed in the homestretch and just nipped White and Byron. Weickt got the third sprint and instead of slowing up, he continued to push the pedals hard and was soon far ahead of the field. By changing off with Klug at every lap, this pair soon had a commanding lead and took all the interest out of the race as far as first place was concerned.

The official scorer stated that the riders covered forty-six miles, twenty-two and one-half miles being ridden in the first hour. At the twenty-mile mark, Lanky Bob Spears offered a "prime" for a sprint and it was won by White. Reggie McNamara was the only other professional rider on hand to see the amateur boys battle for prizes.

The Bay View officials were so well pleased with the race that they decided to make it an annual affair. The boys on the first two teams received gold watches, while the youths finishing third, fourth and fifth were given scarf pins. The officials were: Referee, John F. Dreher; starter, Robert Henderson; clerk of course, Howard Henderson; timers, Oakley, Hanse and Conrad Miller; judges, Charles Rein, Richard Schlee, Alfred Anderson, Herbst Yarnold, Peter Slagle and Peter Rau.

### BICYCLE RACE AT TUCSON

Tucson, Ariz., November 29.—William Grabe, who has won many bicycle races around Tucson, again came out victor in the Walter Reid Thanksgiving Day race from Reid's shop to Pastime Park and return, 7.8 miles. Grabe covered the distance in 25 minutes, which included a handicap of a minute and 20 seconds. At that he finished five city blocks ahead of Raymond Burgess, his nearest competitor. Hugh Lee finished third. Nine riders started.

### BIKE BUSINESS BOOMING

Los Angeles, Cal.—Putting on a man to give his entire time to the bicycle repair business of the Pacific Motor Supply Co., in Los Angeles, forced Edward Lebell to recognize that trade was better in that line than ever before. This is the first time he has had to do this, and he now has a bicycle specialist in addition to his seasoned staff of motorcycle repair men.

### ASHLEY TO HANDLE PREMIER

Brooklyn, N. Y., Nov. 30.—Mr. George A. Ashley, the veteran bicycle dealer of 1213 Bedford avenue, Brooklyn, has taken on the agency for the Premier Bicycles in Brooklyn. He is very enthusiastic over the Chicago product and has sold quite a number of bicycles to his prospects. He expects to have a favorable season and is doing all to boost bicycling in his section. Ashley also handles the Schickel motorcycle, the power two-wheeler department being in charge of Manager Van Name.

# ALL READY FOR NEW YORK RACE

**Seventeen Teams Will Start in Six-Day Classic at Madison Square Garden on Sunday Night—Several "Debutantes" Will Appear.**

JUST as promptly as the seasons of the year come and go the annual six-day bicycle race at Madison Square Garden, in old Manhattan, is again in our midst. The bicycle riders are in for their annual cutting of the promoter's melon and they give promise of cutting just as big a slice as they have in former years. Unless some last-minute changes are made, seventeen teams will start in the big race, and they are made up of representative riders from every country of any size, speaking "cyclelogically," and the pairings as made up by both riders and Manager John M. Chapman has produced a number of strong combinations.

### And Some Will Be Missing

Some of the old favorites will be missing from among the starters this year, the reasons being many and varied. Jackie Clark, the always popular Australian, who is now a citizen of these United States, will not appear because he has been unable to secure suitable terms from the management on the financial end. Alfred Goullet may be said to have the same conditions obtaining in his case, but Goullet is, in a way, dodging the hard races, for he says he wants to be in tip-top form for the American sprint title contest next season.

Iver Lawson, Eddie Root, George Cameron and Harry Kaiser, having been suspended for their actions in the Chicago six-day race last week, will also be among those missing, both at the start and when the ghost walks for the riders after the contest is in the hands of the historians. Quitting the race in the last hour and attempting to foment a strike the day before the Windy City race terminated, was the cause of the quartet's suspension. After their return from the scene of the "battle of Chicago," they tried to persuade Manager Chapman to forgive and forget, but the latter was deaf to the pleadings of the penalized cyclists.

### Several "Debutantes"

Most of the entrants in the coming race, the twenty-third of its kind to be run in the famous building, have seen action in the "trenches" in former grinds. As usual the New York public will have a chance to see some new faces. Among the riders that are

# CHICAGO SIX DAY RACE A SLOW GRIND

## Lawrence-Hanley Team Wins—Riders Far Behind the Record—Four Cyclists Strike

CHICAGO, Ill., November 25.—Percy Lawrence and Willie Hanley, both hailing from Frisco, copped the Chicago Six Day Race which ended in the Coliseum last night with an exciting series of sprints that had the crowd on its feet cheering wildly. Thomas-Ryan were second; Walthour-Walker, third; Mitten-Hansen, fourth.

### Berlin System Muddled Up

The total mileage for the 144 hours was 2,582 miles, which is far behind the world's record for that time. The record is 2,792, this mark having been hung up at Brussels. The scorers tried to use the Berlin system of finish, which consists of a series of sprints during the final hour of the race, the leaders up to the last hour being the only riders to participate in the sprints, which are run at the end of every fifteen laps. There were six teams leading at Chicago, and according to the Berlin finish, the rider leading for his combination at the end of each sprint should have received six points for his team, the second placer five points, the third man four points, and so down to the last man who should have received one point.

But at Chicago the scorers worked the Berlin system backwards. They gave sprint winners one point, second man, two points, etc. The result was that the victorious combination, Lawrence-Hanley, scored 32 points; Thomas-Ryan, 33 points; Walthour-Walker, 45 points; Hansen-Mitten, 54 points. In other words, according to the Chicago way of running a six-day race finish, the team with the largest score loses the race!

### Six Teams in Lead

At 8:55 the six leading teams were called off the track and the three trailers had to run a special one-mile race to decide seventh, eighth and ninth places. Ohrt-Madonna were hopelessly behind and retired being consoled with tenth position. The order of the finish in the special race gave the cyclists the following rank in the six-day grind: Piercey-Bedell, seventh; Eaton-Madden, eighth; Dupuy-Anderson, ninth.

Root-Lawson and Cameron-Kaiser, who quit the race during the final hour and were suspended therefore by the National Cycling Association, were placed in fifth and sixth positions by the officials.

### Say Root Fouled Them

Eddie Root won the first of the final hour sprints for his team, with Cameron second and Mitten third. Three of the contestants claimed that they were fouled by Root who forced them to ride high on the south turn. Lawson relieved Root in the second sprint and won. Kaiser was second. Root again returned in the third sprint and tucked it away. It was at the end of the fourth sprint that Root-Lawson and Cameron-Kaiser dropped out of the grind, giving as their reason the fact that they had been unjustly penalized one lap on Wednesday. Then the scorers became confused and bedlam broke loose in the great amphitheatre.

During the sixth sprint Worth Mitten had a bad spill. He was severely bruised and sprained and withdrew for ten minutes. Then the plucky rider returned to the track but he was too dazed to continue the grind and was carried off to his camp. Walthour also had a spill in the final hour, but he quickly picked himself up.

### Fifteen Teams Start

Fifteen teams started off on the 144-hour race, Lawson and Root being the favorites. Ohrt-Miller soon lost a lap, followed by Madonna-Vandersuyft. Miller and Vandersuyft were the weak members of their teams. These two teams were again lapped on Saturday night, when Lawson started a red hot sprint; throughout the sprint Miller-Ohrt lost lap after lap. Rudi Russe-Young dropped behind two laps, while the Sullivan-Grimm combination fell one lap in the rear. Ohrt, who had been on the track pretty steadily, showed signs of weakening, but he stayed in the trenches. At the end of the twenty-fourth hour eleven teams were in the lead, 527 miles and 5 laps having been covered, which was ten laps behind the record.

On Sunday morning, Corry, of the Corry-

## ATTRACTIVE CYCLE HEADQUARTERS IN REEDLEY, CAL.

Well-Ordered Establishment of Pipkin Brothers, Handling Pope and Indian Bicycles, as Well as the Indian Motorcycle. The Pipkins Are Experienced Repairmen and First-Class Cyclists and Very Popular in the Trade Throughout Southern California—Photo Sent by Frank Reed, of Los Angeles.

Carman team, uncorked a sprint, but every rider was wideawake, except the Ryan-Thomas combination, which lost a lap by a poor pick-up. Vandersuyft was forced to leave Madonna to his own fate when he became so sick that the doctors called him off the saucer. Miller then struggled off the track; Ohrt teamed with Madonna, the pair reappearing on early Sunday afternoon.

### Taking An Advantage

At noon, the riders were slowly circling the track, apparently resting up by a common understanding among the cyclists. But before the fatigued pluggers could realize it, the track members of the Mitten-Hansen team and Cameron-Kaiser combination were rushing in the lead. On they flew and made the best of their advantage, until they had lapped the entire field. Heated arguments took place in the pits, and the dumbfounded riders swore vengeance. But by midnight eight teams were again in the lead, being three miles and six laps ahead of the world's record for fifty hours.

Thomas Grimm was seized with an attack of appendicitis shortly after midnight and was obliged to withdraw, leaving Sullivan to find another partner. After four hours nothing developed and Sullivan was out of the race. Monday was a slow affair and it was not until late at night that Lawson started things humming, but got no advantage. Wohlrab had a bad spill on Tuesday morning and was advised to quit the grind, leaving his teammate, Kopsky, to hook up with Young, whose partner, Rudi Russe, had also abandoned the classic. They were seven laps behind the leaders. There were then eleven teams still in the race.

### Ryan Steals Two Laps

Ryan caused a big sensation during the eighty-first hour, when, having been penalized for leaving the track without official permission, he returned to the saucer and copped a lap on the field. The bunch was caught unawares and made no attempt to folow Ryan because he had already been one lap behind at the time of being penalized. But the Irishman was not satisfied with just one stolen lap, and went out for another. And he got it, too.

Wednesday morning Kopsky-Young were so far behind that they decided to say farewell, while a few hours later Carman-Corry also made their exit. It was after Ryan had finished his sprint that the penalization which caused one of the cyclists to desert later occurred. Ryan again went off the track without notifying the officials and so did Carman and Piercey. When they returned they were informed that they had each been penalized one lap. Root claimed that he could not adjust his handlebar, Carman said he had sustained a puncture and Piercey put in the same claim. But the referee gave a deaf ear to their excuses and let his ruling stand.

Nothing spectacular happened on the last day, for the riders were saving up their energy for the sprints of the final hour.

## READY FOR NEW YORK RACE

(Continued from page 33)

making their premier bow to the blase Manhattanites can be found Eddie Madden and Ray Eaton, the Newark youngsters! Tim Sullivan, the former New Haven champion, Bob Spears, the fast-finishing Australian, and Leon Vanderstuyft, a native of King Albert's battle-scarred country, Belgium. Eaton and Madden went through the Chicago six-day race in great shape, but Sullivan and Vanderstuyft were eliminated before the finish. Bob Spears, who claims to prefer working in a nice cool sewer to riding in six-day races, is having his first siege of the continuous variety of six-daying. He competed well in shorter races, and no doubt will prove to be equal to the aches and pains that always go with a six-day event.

Unless some changes are made, or other teams entered, the starter will send the following field away at a minute or so after midnight, Sunday, December 5:

### The New York Field

Fred Hill, Boston, and Alfred Grenda, Australia.

Reggie McNamara and Bobbie Spears, Australia.

Oscar Egg, Switzerland, and Marcel Dupuy, France.

Percy Lawrence, San Francisco, and Jake Magin, Newark, N. J.

Ray Eaton and Eddie Madden, Newark, N. J.

Jimmy Moran, Chelsea, Mass., and Bobbie Walthour, Atlanta, Ga.

Rudolph Rudi-Russe, Austria, and Leon Vanderstuyft, Belgium.

Norman Hansen, Denmark, and Worth Mitten, Davenport, Ia.

Vincenzo Madonna, Italy, and Paul Suter, Switzerland.

Charles Piercey and Gordon Walker, Australia.

Martin Ryan, Newark, N. J., and Lloyd Thomas, San Francisco, Cal.

Tim Sullivan, New Haven, Conn., and Norman Anderson, Denmark.

Peter Dorbach, South Boston, Mass., and Frank Corry, Australia.

Clarence Carman, Jamaica, L. I., and Joe Fogler, Boston.

Gus Wohlrab, Jersey City, N. J., and Joe Kopsky, New York.

Willie Hanley, San Francisco, Cal., and Alfred Halstead, Sacramento, Cal.

Georges Seres, France, and Victor Linart, Belgium.

## BIG MELLON CUT UP

CHICAGO, Ill., November 30.—The promoters of the Chicago Six Day Race are said to have cleaned up a neat little profit of between $5,000 and $6,000. So pleased were they with the financial results that they may stage another 144-hour event next spring. One of the promoters contemplates having the Windy City grind rival the annual Paris affair, by holding a dansant on the infield, where turkey trotters can whirl around while the riders circle the saucer.

The riders in the Chicago race had a big melon cut up for them. Following are the size of the slices received by the teams: Lawrence-Hanley, $1,000; Thomas-Ryan, $750; Walthour-Walker, $700; Mitten-Hansen, $600; Root-Lawson, $500; Cameron-Kaiser, $400; Piercey-Bedell, $350; Eaton-Madden, $300; Du Puy-Anderson, $250; Ohrt-Madonna, $200.

Besides the above prizes most of the riders drew special bonus money from the corporation which promotes six-day grinds.

## TIRES USED IN CHICAGO RACE

Chicago, Ill., Nov. 27.—Immediately after the Chicago six day grind the Cycle Mfg. & Supply Company, formally announced that the winners of the first eight places had Pye-Musselman cord tires on their wheels. These tires, the company stated, went through the grind without a single blowout or puncture, in spite of the fact that some of them had been used previously in the recent Boston six day race. More than one of the tires that traveled the boards in the Coliseum covered, therefore, more than 4,000 miles. In the New York six day race, the greatest cycling classic of the year, all the competitiors will use Pye-Musselman tires and will pay for them at the full retail price.

# JOHNSON-LIPSETT TAKE TEAM RACE

## Cover 39 Miles in Annual C. R. C. A. Two-Hour Team Race; Mullin-Steppello Capture Second Place; Berlin System Used.

THE annual two-hour bicycle team race, promoted by the New York division of the Century Road Club Association, over the Fordham Road course, Bronx, N. Y., Thanksgiving Day, was won by the team composed of Nelson Johnson and Robert Lipsett, who scored a total of thirty-three points, against twenty-seven points made by the second team of Edward Mullin and George Steppello. The third team, Raymond Caldwell and Harry Naphtal, finished with twenty-five points, leaving the fourth team, Joseph Caldwell and George Harvey, with a total of fourteen points.

The total distance covered was 39 miles, while the exact time was two hours, no minutes, and 45 3-5 seconds. This is but a trifle less than the distance covered in last year's race, which was won by Edward Schuber and Alexander Palma, who rode 39 miles and 528 yards.

This race was run on the Berlin system of professional six-day racing, sprinting for points occurring at the end of each mile during the final half-hour of the race.

The race started with the riders all primed up to the topnotch, and the strong east wind did not prevent the seven teams from making good time in covering the first ten miles (Ray Caldwell leading) in 30 minutes 18 seconds, while at twenty miles (Robert Lipsett leading) the time was 58 minutes 40 seconds, and at thirty miles (George Steppello in the lead), one hour, 27 minutes, 38 seconds.

But this pace proved too strong for the Marquart-Palma team, and after they, as well as the Welton-Winquist combination, dragged behind for over five miles, both teams gave up the chase, but later rejoined the field with one lap lost. The Joseph Naphtal-Ernest Kuno team dropped out of the race at the twenty-sixth milestone.

Only four teams were left to fight out the sprints for points during the final half hour; and it was anyone's race, until the last third of the nine sprints, when the Johnson-Lipsett team got real active.

The summaries of the mile sprints in the final half-hour of the race follow:

| Place. | Riders. | Sprints 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | P'nts |
|---|---|---|---|---|---|---|---|---|---|---|---|
| 1— | N. Johnson / R. Lipsett | 3 | 5 | 3 | 2 | 5 | 3 | 5 | 2 | 5 | — 33 |
| 2— | E. Mullin / G. Steppello | 5 | 3 | 5 | 3 | 3 | 1 | 3 | 1 | 3 | — 27 |
| 3— | R. Caldwell / H. Naphtal | 1 | 2 | 2 | 5 | 2 | 5 | 1 | 5 | 2 | — 25 |
| 4— | J. Caldwell / G. Harvey | 2 | 1 | 1 | 1 | 1 | 2 | 2 | 3 | 1 | — 14 |

## DEALER HOLDS 25-MILE RACE

PROVIDENCE, R. I., November 29.—Antonio Lancellotti, Rhode Island amateur champion bicycle rider, won the time prize and finished second in a 25-mile road race held here on Thanksgiving Day. The race was given under the auspices of John Montecalvo, 129 Spruce street, a dealer in bicycles and accessories, who runs a general repair shop.

Lancellotti succeeded in tying the record made in 1913 by Vincent Madonna, over the same course in the time of one hour and 12 minutes. The winner of the race, John Jones, given a handicap of ten minutes, made the time in one hour and 14 minutes. There were ten entrants in the event.

The third prize was won by Osvaldo E. Colonna, a young man of whom much is expected in the next year, and the fourth by T. Marciano, his time being ten seconds slower than the winner's.

## BECOMES PIERCE DISTRIBUTOR

Kansas City, Mo., November 27.—Mr. E. Saufley, of the Saufley Supply Company, agents for the Excelsior motorcycle and bicycle, has formally announced that his concern has taken the distributing rights for the Pierce bicycle in Western Missouri, Kansas and part of Oklahoma. He is visiting most of this territory personally, and has already secured a number of large orders. Saufley believes in the future of the bicycle and sees an unprecedented demand for the new season. Catalogues describing Pierce models are now being printed.

# GEORGE WILEY IS PACED CHAMPION

## Syracuse Cyclist Scores 109 Points and Captures American Title—Victor Linart, of Belgium, Is Second with 102 Points.

ACCORDING to figures just compiled by the board of control of the National Cycling Association, George Wiley, the Syracuse cyclist, is champion paced rider of America, and not Victor Linart, the Belgian, as was reported. The paced championship of America is decided on the points system, the rider scoring the greatest number of points during the season being the champion. Wiley has a total of 109 points, scored by twelve wins, ten seconds, nine thirds and one fourth. Linart is credited with 102 points for having taken sixteen races and finishing second in three, third in six and fourth in one.

Third place in the titular race goes to Clarence Carman, a former holder of the championship. Carman scored 99 points, while Bobby Walthour and Peter Drobach each scored 55 points. Twenty-four riders figured in the championship.

The various places and the points scored by the riders in the paced races run during the season of 1915 is as follows:

| Rider. | 1st | 2d | 3d | 4th | Pts. |
|---|---|---|---|---|---|
| George Wiley | 12 | 10 | 9 | 1 | 109 |
| Victor Linart | 16 | 3 | 6 | 1 | 102 |
| Clarence Carman | 12 | 9 | 4 | 4 | 99 |
| Robert Walthour | 4 | 8 | 4 | 3 | 55 |
| Peter Drobach | 8 | 3 | 3 | 0 | 55 |
| George Seres | 2 | 9 | 7 | 2 | 53 |
| Leon Didier | 5 | 7 | 2 | 0 | 50 |
| Percy Lawrence | 5 | 5 | 2 | 2 | 46 |
| Elmer Collins | 2 | 6 | 8 | 2 | 46 |
| Eddie Root | 5 | 5 | 0 | 2 | 42 |
| Menus Bedell | 5 | 2 | 3 | 4 | 41 |
| Martin Ryan | 4 | 5 | 2 | 0 | 39 |
| Worth Mitten | 3 | 4 | 3 | 2 | 35 |
| Vincent Madonna | 2 | 3 | 5 | 2 | 31 |
| Geo. Colombatto | 3 | 3 | 1 | 2 | 28 |
| John Bedell | 3 | 3 | 2 | 0 | 28 |
| Frank Corry | 4 | 0 | 2 | 1 | 25 |
| James Moran | 0 | 3 | 5 | 4 | 23 |
| Joe Kopsky | 2 | 2 | 2 | 0 | 20 |
| Norman Anderson | 0 | 5 | 0 | 0 | 15 |
| Norman Hansen | 1 | 1 | 3 | 1 | 15 |
| Oscar Egg | 2 | 0 | 0 | 0 | 10 |
| Al Halstead | 0 | 1 | 3 | 0 | 9 |
| Steve Senhouse | 0 | 0 | 0 | 0 | 1 |

Firsts count five points; seconds, three points; thirds, two points, and fourths, one point.

# CHOICE BITS OF BICYCLE GOSSIP

By WALTER BARDGETT

AFTER Lawson, Root, Cameron and Kaiser had been suspended for their work in the Chicago six-day race, Jimmy Hunter, the motorcyclist, suggested that they be shot at sunrise, but, Jimmy, remembering that they do not get up that early, changed the sentence to electrocution at high noon. 'Tis said that the only place the quartet will find sympathy will be in Webster's famous unabridged.

Although it was rumored around that a number of the best riders would not be seen on the firing line in the Madison Square Garden race, it only took Johnny Chapman a short time to sign up Alfred Grenda, Fred Hill, Bob Spears and Peter Drobach for the annual fest. Bicycle riders have a perfect right to change their minds.

The trainers were the busiest individuals the past week. They were marshalling their forces for the annual onslaught in Diana's palace of aches and pains. Jack Neville will have charge of a large American camp at the race, while Charlie Turville will be master of ceremonies in the foreign camp. Other trainers will be placed over single and combined camps.

When Worth Mitten, the Davenporter, who was badly used up at the finish of the Chicago race, landed in Newark he remarked: "Well, we are only on a furlough and we will be back in the trenches in another week." Life to a cyclist is just one six-day race after another.

Willie Bolles, one of the best trainers that ever handled a rider, has sworn, with both hands in the air, that his only duties at the coming race will be that of a spectator. Willie says that handling peeved bicycle riders in a six-day race is his idea of a hard job. Bitter experience has shown him that.

When President Wilson issued his Thanksgiving Day proclamation he might have added that the six-day riders who competed in the Chicago race would have an extra reason to be thankful. The Coliseum race ended that night at 10 o'clock and one and all said: "We are thankful that the grind is finished."

Salt Lake City may again see the racing cyclists. If present plans of the Salt Lake promoters do not miscarry the pedal artists will again be dashing around a new track in the former stamping ground of our friend, Brigham Young. J. E. Langford, one of the luminaries of the Majestic Park, formerly the Salt Lalace grounds, is at the present time in New York, and states that the park was going to improve the grounds with new attractions, among them being a new eight-lap bicycle track. The old track was the scene of many a hard race and record-breaking feat; among the performers at that track in years gone by could be found most of the world's best riders. It will be welcome news to the Utah fans if the deal goes through.

Nat Butler, at one time one of the best cyclists in America, and at the present time one of the cycling impresarios of this country, is very enthusiastic over the possibilities of the new track that will be erected in Providence. Butler says that with the small jump from Boston to Providence in their favor the paced riders will have an opportunity to get plenty of work without spending most of their time on the trains. It is expected that a resident manager will be appointed about the time that the Madison Square Garden grind is on.

When the French Line steamer *La Touraine* docked at its pier in New York last week, two of Europe's speedy cyclists stepped off her deck—and glad indeed were they to land. The two who arrived from scrapping Europe were Oscar Egg, the Swiss unpaced champion, and the greatest unpaced rider in the world, and George Seres, the best of the French motor-paced riders. The two cyclists come for the annual six-day race at Madison Square Garden. Immediately after disembarking the pair hied themselves to Newark, where they will put the finishing touches to their training for the strenuous grind under Diana's famous statue.

Oscar Egg brought the news that Eugene Engel, a brother of Emil, who lost his life in the first month of the great war, had also met his death recently in the Champagne district of France. Louis, a younger brother of the dead riders, is also at the front and his father has implored the French military authorities to grant the youngster leave to return to his home, as he is the sole support of the family.

### A ROCHESTER (N. Y.) STAR

**Harry Di Tomosco, the Champion Cyclist of His District**

Late exchanges from Australia give an account of a meeting held late in October for the benefit of the Red Cross Society. The races were named after scenes and other catchy phrases of the war. The "Dardanelles Wheel Race" was won by A. R. White, and the "Recruiting Handicap" went to the same rider, while a race called the "Allies Scratch Race," at five miles, was also captured by White. The "Red Cross Society Handicap," a half-mile affair, went to J. Giffen, with White running second.

"Jumbo" Wells, the erratic New Zealander, is also mentioned in the account of a Sydney race meet. Wells, who is well known in this country, was entered in two handicaps at the meeting and drew down a handicap of 25 yards in the mile race. The amateur cyclists in the State of Victoria now receive war certificates in lieu of prizes, the amount of money necessary to purchase prizes being turned over to the various patriotic funds in the Antipodes.

The beans were spilled at the finish of the Chicago six-day race, so to speak, and the outsiders got all the money. Lawson and Root, who were looked upon as the most likely winners, fell down toward the closing of the race. Percy Lawrence and Willie Hanley, the two San Francisco riders, copped the large end of the purse. Martin Ryan and Lloyd Thomas ran second; Bobby Walthour and Gordon Walker, third, while Worth Mitten and Norman Hansen finished fourth. Six-day racing upsets the dope in most every event.

The coming of Seres occasioned surprise among his countrymen until he explained. It appears that while participating in a squadron air raid Seres was attacked with vertigo and had difficulty in reaching a point behind the French lines to make a landing. Several times afterward he suffered similar attacks in trial flights, and finally was detached from active service to work as an aeroplane mechanician. His illness continued, and physicians declared it was due to gasoline fumes. Then Seres was sent home on sick leave. Seres is in perfect condition as long as he keeps away from gasoline engines, so he made the unusual request to have his furlough extended so he might take a trip to America for the six-day race. The bicycles and fittings of both Seres and Egg were brought in duty free on an exhibition bond, which binds the riders to take them away from America immediately after the six day grind.

### HALL WINS CONSOLATION RACE

The first of the two consolation races for non-point winners in the races held by the New England Wheelmen during the past season was contested on Sunday over the Eastern Boulevard course in the Bronx, N. Y. W. H. Hall, Jr., won the five-mile event, with C. Sprauer second and William Maas third. The time was 15:16⅖. C. Hilsky was first in the trials for the Kopsky Trophy, with B. Boyes second and E. Schneider third. The time of the winner was 15:29⅘.

# With the Manufacturers

## FOREIGN ORDERS FOR R-S

READING, Pa.—In addition to a gratifying volume of domestic business, the Reading Standard Company, of 540 Water street, this city, has just received an order for 500 machines from its London representative, and two carloads of samples have been shipped to Australia. Two other carloads have been also sent to The Netherlands. The entire organization of the R-S factory is being kept busy for full time and much overtime work has been found necessary.

## FIRESTONE TIRE CAMPAIGN

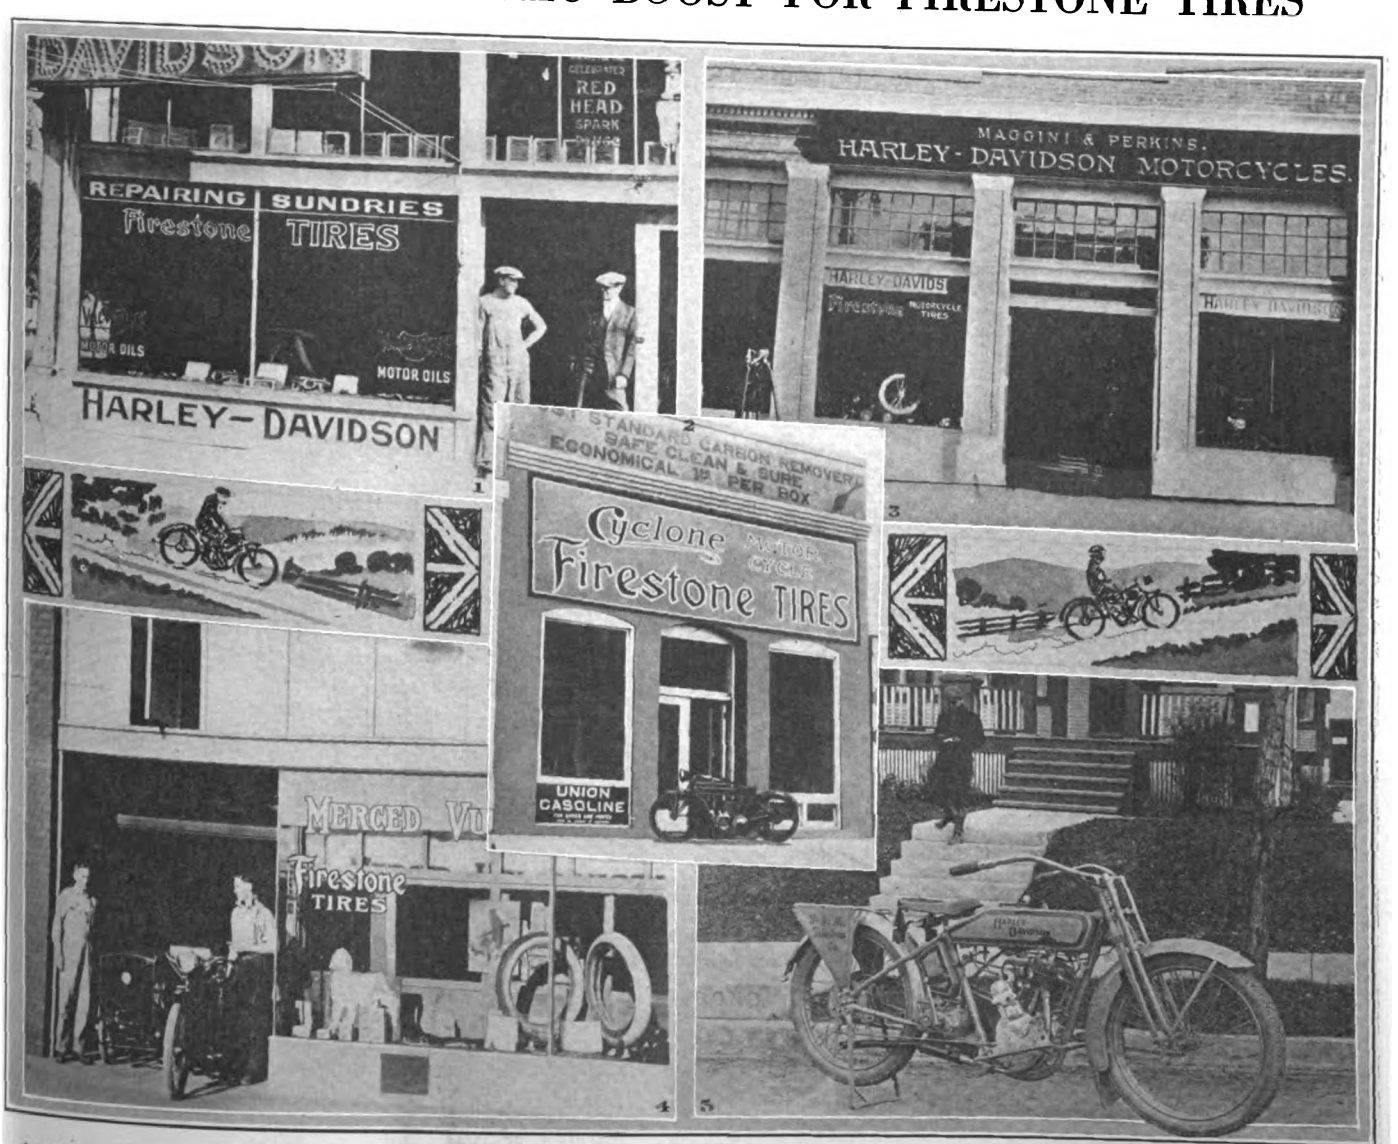
Firestone tire dealers are now profiting by an unusually strong "follow-up" campaign which is being waged by the Akron company. Included in the material which is being distributed are circular letters to tire users and imprinted literature, stationery, signs, lantern slides, newspaper electrotypes, etc., for the dealers themselves.

## HAVERFORD MANAGERS MEET

PHILADELPHIA, Pa., November 29.—During the past week, the managers of the various branches of the Haverford Cycle Company met at the home office, Market and Fifth street, this city, for a sales conference. Each manager reported a splendid outlook for the new year in his individual territory and outlined the methods he would use to go after big business.

Various plans and suggestions were advanced for the betterment of the organization and the business policy was discussed.

## SOME DEALERS WHO BOOST FOR FIRESTONE TIRES



1. Establishment of G. A. Faulkner, at 246 Twelfth street, Oakland, Cal; both the proprietor and Frank Karslake (in doorway at left), his chief mechanic, are firm Firestone booster. 2. New store of Maggini & Perkins, San Francisco, Cal., with window given over to tire display. 3. How Loudenclos & Henry boost their pet make of tires at 1508 Market street, San Francisco. 4. A feature in window of A. W. Kissell at Merced, Cal. 5. Firestone-shod Harley-Davidson in service of Pittsburgh and Allegheny Telephone Company, at Pittsburgh, Pa.; this company keeps careful track of mileage expenses and that it has adopted Firestone speaks volumes for their efficiency. Many other public service organizations are similarly equipped.

## PRESIDENT DUNN HEADS A "TOTAL ECLIPSE"

ELMIRA, N. Y.—Prominent members of the organization of the Elmira Machine Company, of this city, headed by President E. J. Dunn and Secretary-Treasurer L. S. Whittier, were called together for a photograph last week, in order that Eclipse dealers and representatives everywhere could get an idea of the strong forces standing back of them in the executive and production lines. In the reproduction herewith, reading from left to right in the top row are G. S. Bush, sales department; C. H. MacPherson, factory manager; J. C. Ferguson, general manager; President Dunn; Secretary-Treasurer Whittier, and W. C. Warner, cashier.

In the bottom row, left to right, are K. H. Matanle, general foreman; F. S. Ellett, chief engineer; A. C. Rice, sales manager, cycle division, and H. E. Van Ness, factory superintendent. It is proposed to picture the complete sales force at a suitable period in the future.

## SPECIALISTS FOR FEDERAL RUBBER COMPANY

Milwaukee, Wis.—As a result of the very rapid growth in business and the enlargemen of facilities to correspond, the Federal Rubber Company, of this city, is placing its executive and production departments on a broader working basis than heretofore. Among other things to the executive staff has been added a comptroller, the function of this official being to relieve the other executive officials of the burden of accounting and other details pertaining thereto.

In order that other departments might be rearranged to fit the requirements of the company for many years to come, the Federal officials engaged a staff of specialists from the Price, Waterhouse Company, of New York and London, a firm having employees who are widely experienced in the rubber making industry. These specialists have taken charge of the work, and are under the direction of C. C. Robinson, of the New York office of the company, who is acting as comptroller. When the work is completed, the office of comptroller will be filled by a permanent appointment.

## PREMIER VULCANIZER HAS AUTOMATIC CONTROL

SIMPLE in operation and light in weight is the Premier automatic electric vulcanizer, produced by the Premier Electric Company, of 4030 Ravenswood avenue, Chicago, Ill. The automatic feature lies in the temperature control, making it impossible to overcure or burn a repair, a thermostatic cut-out opening the circuit when the temperature reaches the proper point.

The Premier vulcanizer will operate from storage battery current or from 110-volt lighting current. It eliminates the danger from fire resulting from the use of highly-inflammable spirits as fuel. It is very small and compact, weighing but two pounds. It is always ready to put a patch on an inner tube or to heal a cut in a casing, thus saving blowouts and tire expense. After the tube or casing is prepared and the vulcanizer clamped on, a button is pressed, and when the repair is completed, the current is automatically cut off and the vulcanizer cools.

The Premier vulcanizer is but part of an outfit, retailing at $3.50. This outfit, in addition to the vulcanizer, includes a tire tool for holding open a cut during cleaning

Premier Electric Vulcanizer

and repairing, a pair of scissors for cutting patches, tube of quick-curing cement, emery cloth, repair gum and wax papers to place over the repair to keep the vulcanizer from sticking.

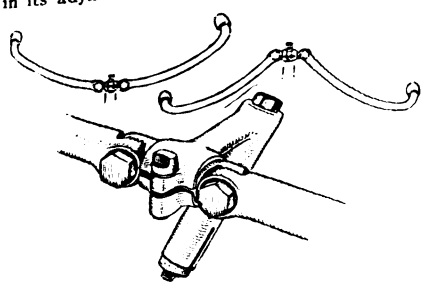
## ROLLFAST ADJUSTABLE BAR A NEW OFFERING

AMONG the most recent additions to the extensive line of products of the D. P. Harris Hardware Company, of 48 Warren street, New York, is the Rollfast handlebar for bicycles. The bar is universal in its adjustment and is simple in its construction. It is furthermore adaptable to any bicycle.



**Rollfast Adjustable Bar**

The universal feature in the Rollfast bar lies in the construction of its drop-forged center piece. This piece is cylindrical for the center third of its length, where it fits within the head clamp and is corrugated, the clamp inside being grooved to correspond. This allows for adjustment of swing. The outer thirds of the center pieec are corrugated on the face and tapped for a large set screw, which is to connect with the corrugated end of each bar. These corrugations allow for the positioning of the bars through a range from the very lowest for speed work, to the extreme highest for leisurely going. The independent adjustment also permits of regulating the width between the grips to suit any individual rider.

The Rollfast bar is made with forward extension, the stem being of the expander type. There are but six pieces entering into its construction, exclusive of the stem and expander. When once set in the desired position, any changes can be made only by the use of the wrench, it being impossible for shock or a violent blow to move the bars out of adjustment. Communications regarding this bar should be addressed to the firm at its New York headquarters.

## BIG BERLING INCREASE

BUFFALO, N. Y., November 27.—"Our business is booming because, while we have no war orders, we are making articles formerly imported from Europe." said William C. Berling, vice-president of the Ericsson Manufacturing Company. "Ninety per cent. of our output now is magnetos. Where we employed seventy-five men a year ago, we have 500 now and wages average ten per cent. higher than before the war. Realizing that this is our opportunity, we are concentrating our energies on organization and quality of output and we believe we will hold the business after the war is over."

## EMBLEMS GOING ABROAD

ANGOLA, N. Y.—Emblem activities are by no means confined to the United States as is evidenced by the report from General Manager W. G. Schack. Two hundred Emblem bicycles are now on their way to India, with 1,200 more to follow as fast as they can be turned out. Shipments of heavy-weight Emblem motorcycles have also been made to Holland, Norway, Great Britain and Australia, and rush orders are being regularly received by cable.

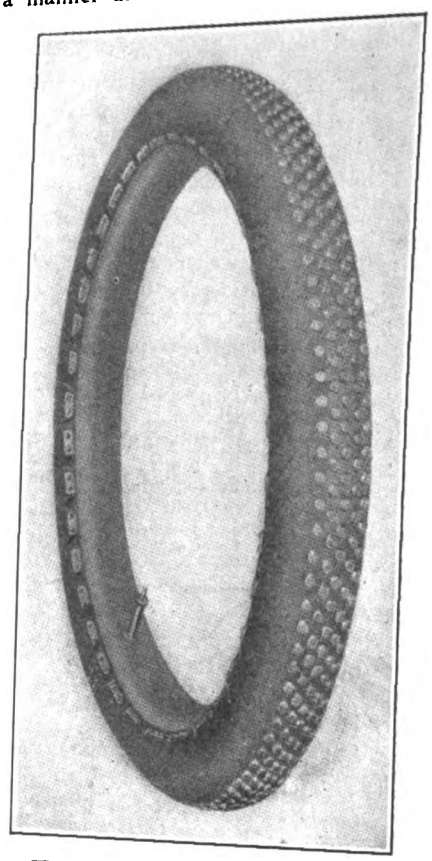
As was anticipated from its enthusiastic reception at the New York and Chicago shows, the Emblem lightweight is gaining rapid popularity.

## NEW WOODWORTH OVERSHOE

WOODWORTH leather overshoes in a new line for motorcycle tires are being produced by the Leather Tire Goods Company, of Niagara Falls, N. Y. These overshoes are made of waterproof chrome leather, with steel studs on the tread. They fasten under the clinches on the rim by a series of hooks and are retained in place by the tire beads when the tire is inflated. By this means, creeping of the overshoe is eliminated.

By the use of the Woodworth overshoe, the tire is completely enclosed and practically puncture-proof. The steel studs act as an effective non-skid traction device on wet or muddy roads. The leather of the overshoe protects the tire from road wear and prevents blowouts. It can be used to good effect over old tires.

The chrome leather employed is so waterproofed as to make it non-stretchable, even when run in water for many miles at a time. The leather on the inside is finished in such a manner as to cause it to adhere to the tread of the tire and thus prevent any friction or wear between it and the overshoe.



**Woodworth Motorcycle Overshoe**

The company also makes two sizes of motorcycle boots, on the Woodworth principle of attachment. These are held to the rim by small hooks under the clinches, and their treads are studded with flat head rivets. The material used is chrome leather.

## NEW GOODYEAR AWARD

AKRON, O.—Salesmen of the Goodyear Tire & Rubber Company who obtained orders through unusual methods are decorated by the "Order of the Hearse," a new form of award adopted by the big tire firm. The insignia of the order is a round medal upon which is engraved a salesman washing down a hearse with sponge, hose and chamois. Around the border is a Latin motto meaning "To the stars through difficulties," intended to remind the wearer of the kind of path traveled in establishing himself in the Goodyear hall of fame. A bar pin labelled "The Order of the Hearse" fastens the medal to the clothing.

The order was inaugurated as the result of a Goodyear salesman's action in Illinois some time back. He called on the only prospect in town, but could not interview the latter (who was an undertaker as well as an auto agent) as he had to wash a hearse after finishing assembling a motor. The Goodyear man volunteered to wash the hearse if he could get an audience, and did so, landing a large order as a result.

## ATTRACTIVE CATALOG

A. B. COFFMAN, 345 Ohio Building, Toledo, O., has just issued his 1916 catalog illustrating and describing the line of motorcycle and bicycle goods for which he is manufacturers' agent. The Lobdell rims, manufactured by the American Wood Rim Company, of Onoway, Mich., the Morrow coaster brake, the Wald line of mudguards, braces, carriers, stands and repair tools are among the bicycle goods represented, while the Eclipse clutches and hubs, the Wald tandems and carriers, and Bean chain tools are motorcycle goods. Inclosed in the catalog is a neat little folder entitled 'Coffman's Help to Salesmen," and consisting of a number of excellent stories regarding price-maintenance and salesmanship.

## RED HEAD PLUGS IN GIFT SETS

RED HEAD spark plugs in gift packages are being offered by the Emil Grossman Manufacturing Company, of Bush Terminal, Brooklyn, N. Y., as suitable for useful Christmas and other holiday presents for motorcyclists and other plug users. In each case, the plugs are packed in a beautifully decorated box, wrapped in waterproof silk paper and securely sealed. They come in sets of two to eight plugs, and cost from $3 to $8.

The motorcycle sets consist of two platinum Red Head plugs in metric threads. Sets of four for four-cylinder models can also be obtained. The platinum plugs are wrapped individually in neat cone-ended casings and the pair fit into the box or package. Each plug is the exact size for snug, gas-tight fits in the plug aperture, and the greatest care has been taken in its manufacture. It is to be understood that the plugs are in every way of the regular Grossman quality, there being nothing special in their finish or construction, although they are packed in the decorated boxes.

The range of gift packages of Grossman spark plugs takes in every make of automobile as well as motorcycle, and the specially long-reached plugs for certain makes of four-wheeler are included in the list, as well as the different eight-cylinder models. The gift packages are an excellent innovation in appropriate giving and will be highly appreciated by all who receive them.

## MOTT WHEEL IS ADDING

UTICA, N. Y.—The rapidly-increasing business of the Mott Wheel Works of this city has necessitated the addition of a building to the firm's Hickory street plant, and work has been pushed to such an extent that the new structure will be ready for occupancy about January 1. The addition measures 100 x 45 feet and will be of reinforced concrete construction. The major portion is to be used for storage purposes, and special machinery will be installed in the remaining space.

## NOVEMBER BOSCH NEWS

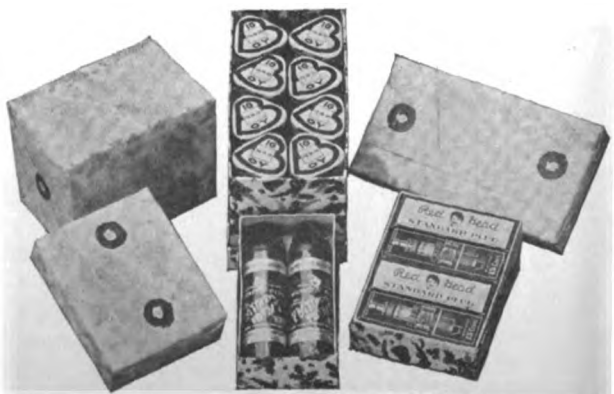
Twenty-five important automobile victories won by Bosch ignited machines are listed in the November number of *Bosch News*, the house organ of the Bosch Magneto Company, of 223 West 46th street, New York. The Bosch standard lighting system for automobiles and motor boats is fully described, as is the Ignition-Lighting generator, Type GEIV, for motorcycle service. The issue is illustrated by excellent views of the mechanical apparatus and action photographs from the various races in which Bosch products figured so well.

## TUNNEL TO CLUB HOUSE

Akron, O.—In order to avoid congestion on South Main street, the Firestone Tire & Rubber Company, of this city, will have a tunnel dug to connect the main building with the new $80,000 club house now under construction. The tunnel will run under Main street, and employes will use it to reach the club house without crossing the thoroughfare.

## ERECTING NEW BOILER HOUSE

Milwaukee, Wis.—The A. O. Smith Company, maker of the Smith Motor Wheel, is about to erect a new boiler house to care for the increased demand for its plant. The building will be 70 x 40 feet in ground dimensions, and 50 feet high. It will carry a battery of three boilers of 300 horsepower. The total cost is calculated at $35,000.



**Gift Sets of Red Head Spark Plugs**

## THE PERSONAL ANGLE

C. F. U. KELLY, of the Kelly-Field Company, New York, is recovering from an operation for appendicitis, which he underwent on November 23. He is expected to be back in harness within two weeks.

Philip W. Pratt, well-known as a bicycle and automobile tire inventor, died in Boston on November 23, aged 75 years. His latest addition to the tire field was during 1915 when he obtained a patent on a non-skid casing with fibre plugs in the tread.

Herbert Everett has joined the copy department of the George B. Van Cleve Company, of 1790 Broadway, New York, as assistant to Robert John, director of the department. Mr. Everett was formerly in charge of the advertising at the New York store of John Wanamaker.

Buffalo, N. Y.—At a recent meeting of the directors of the E. P. Remington Advertising Agency, W. Osborne was promoted to be business manager. Mr. Osborne's executive ability has placed the firm among the leaders in its line, and his promotion is well merited.

B G. Work, president of the B. F. Goodrich Company, of Akron, O., sailed from New York on November 22, on the *Philadelphia*, en route for France. His trip is being made in the interests of the French subsidiary of the Goodrich company.

F. P. Fentress, of the Fentress-Newton Manufacturing Company, of Detroit, Mich., maker of the F-N tandems, paid a visit to his old home in Tacoma, Wash., recently. He looked over trade interests and paid a number of visits to old friends.

## BALK AT LIGHTING LAW

Toronto, Ont.—In spite of pleas from the Toronto Motorcycle Club and other bodies, the Toronto city fathers refused at a recent council meeting, to pass a by-law requiring all vehicles, horse-drawn and otherwise, to display lights at night. It is declared that the Aldermen were afraid to adopt such a law because the civic elections are soon to be held and each office holder felt that he needed the support of his teamster friends. The entire press was in favor of the proposal.

A by-law prohibiting the use of the muffler cut-out has been accepted by the Toronto council, however, and, in addition, all vehicles carrying overhanging loads must display red flags on the end of the projection. The measure has been received with great satisfaction by other users of the road, in addition to riders.

## NEW DELIVERY SYSTEM

Ottawa, Ont.—Anderson & McFarlane, 190 Queen street, Ottawa, have established a motorcycle messenger service and parcel delivery, for which Harley-Davidson motorcycles are employed. The firm is making good, thanks to the carefully arranged system of management and operation.

# STANDARDIZING CHARGES FOR REPAIRS

## Fair and Equitable Prices Give Confidence in Dealer and Bring in Business

By MURRAY FAHNESTOCK

WHAT prices to charge on repairs is a question which has vexed many a dealer, and while this question has been solved in a variety of ways, it has not often been so in a perfectly satisfactory manner. If the dealer has had much experience in repairs he can often give an estimate that is satisfactory to the rider, but this necessitates the dealer giving his attention to every repair job, a thing which is not always possible if much business is transacted.

The practice of charging for repair work at a certain rate per hour will do in the case of work that the rider must have done, but there are many smaller repair jobs in which the rider has the choice of having them done at the repair shop or of doing them himself. If the rider can find out definitely just what a certain repair is going to cost he is much more likely to have the work done at the shop than if he has to face the possibility of an unknown bill for repairs.

### Inspires Confidence in Dealer

Then, too, the rider will have more respect and confidence in the dealer, for he will feel that the latter knows more about the business when he can tell the rider just how much the job will cost. A fair price, and the same price to all, lifts the repairman out of the class of tinkerers into that of the merchant.

It will not be necessary for the dealer to publish his repair charges if he feels that they would be used as a basis for price cutting by other dealers, but even if charges are not made until the work is done, the dealer cannot prevent the riders from comparing the prices that they have paid for certain repairs at different shops. If a rival wishes to know the prices charged, he has only to keep his ears open, for these prices are of common interest and general conversation.

### Simple and Effective System

One company has worked out a general system for its repair agencies that is worthy of the attention of every dealer. It is simple and yet can be made as complete as possible. As is well known, when a motor is taken down it may be found that new rings and pistons are often necessary. But in any case, the same amount of labor is involved in the operation whether the new parts are needed or not. With the motor apart, it is just about as easy for the shopman to put in new parts as to replace the old ones, so when the motor has been taken down it is better to replace worn bushings than to wait for them to fail completely, for example.

The labor charges on any particular make of motorcycle is always about the same, therefore, although the value of the materials may vary widely. The price of the various materials is given in the maker's parts catalog which every dealer and nearly every rider has in his possession, so the dealer can make his repair charges on the following basis: A certain labor charge on each job plus the cost of material used. Such a list can be made out by each dealer to suit his individual requirements and the make of motorcycle handled, and given to each employee who may be required to make estimates on work to customers.

### Eliminates Complaints

Giving the price beforehand, leaves the rider no chance for complaints, and makes friends instead of enemies, as repair bills often do. It also makes it possible for the dealer to collect in cash as soon as the work is done and at a time when the rider most feels like paying for the work.

The dealer or repairman should be able to make most motorcycle repairs better and more cheaply than the rider, for two good and sufficient reasons. One is that the dealer has more knowledge, because he has made a study of, and has had more experience in, repairing that particular make of motorcycle. The second is that the dealer is, or should be, provided with such tools and fixtures as greatly help in the work. A third, but less important reason, is that when repairs are made at the dealer's if an extra gasket or bushing is needed it can be quickly obtained and no time is lost in fussing with defective parts that should really be replaced.

Following is the system referred to above. The figures at the head of each job are the operation numbers. The system has been satisfactorily used for over a year. Each dealer will have to copy and make such changes as are necessary in the list, as the make of motorcycle which he handles calls for. He will also have to set his prices to give him a fair margin of profit:

### Motor Division

1, overhaul motor and transmission; 2, overhaul motor only; 3, overhaul transmission; 4, repair burned out bearing; 5, repair main bearing knock (extra charge for labor on motors equipped with electric lighting systems); 6, put in two pistons; 7, repair cylinder knock; 8, put in two connecting rods; 9, put in one new piston; 10, repair oil leak in crankcase; 11, put in one connecting rod; 12, grind valves, clean carbon; 13, rebore cylinders; 14, repair stripped cylinder head bolts; 15, overhaul carburetor; 16, tighten motor to frame; 17, repair magneto, removing from motor; 18, change carburetor; 19, repair leaky carburetor; 20, minor repairs, ½ hour, or less.

### Rear System

21, overhaul rear wheel, or install new hub; 22, replace rear springs or springs in seatpost; 23, rebush spring frame; 24 reline brake, or install new brake shoe; 25, rebush brake rod clevises; 26, repair chain, one link; 27, repair chain, each additional link; 28, put on new chain; 29, put on new rim; 30, put in new spokes, each.

### Front System

31, overhaul front wheel or install new hub; 32, replace front spring or springs in forks; 33, rebush spring forks; 34, put on new rim; 35, put in new spokes, each.

### Frame

41, minor repairs, lining up wheels, adjusting chains, or tightening small parts, one hour or less; 42, replace front mudguard; 43, replace rear mudguard; 44, replace luggage carrier; 45, overhaul steering head; 46, change muffler, including overhaul; 47, change foot boards; 48, repair starting crank; 49, adjust clutch; 50, overhaul clutch; 51, gasoline feed pipe; 52, lubricating entire motorcycle; 53, tightening entire motorcycle; 54, overhaul spring seatpost; 55, change saddles; 56, overhaul saddle; 57, repair gasoline tank on motorcycle; 58, repair gasoline tank or change tanks; 59, repair oil tank on motorcycle; 60, repair oil tank or change tanks; 61, change tool box; 62, install new headlight.

### Painting

75, enamel complete motorcycle including nickel plating; 76, nickel plating all bright work; 77 nickel plating handlebars; 78, repainting gasoline tank; 79, repainting frame only; 80, repainting wheels, each.

### Sidecars

81, painting and varnishing; 82, replace mudguard; 83, adjust wheel; 84, install new

(Continued on page 48.)

# DEALERS' SECTION

## NEW R-S AGENTS IN NEW YORK

LOU H. GUTERMAN, traveller for the Reading Standard Company, of Reading, Pa., has signed up a number of new agents in New York State for the R-S. In the Bronx, J. Janesco, of Washington avenue, is sub-agent, while in New Rochelle and Mt. Vernon, Frank Bruno will represent this make. Guterman has also arranged with George Denton to be agent for Ossining and Tarrytown. In Guttenberg, N. J., the Alert Repair Company has signed for Hudson County representation.

### NEW DEMONSTRATING STUNT

Kansas City, Mo.—Newby Brothers now have their little Kewpie car all ready to demonstrate the Henderson engine and are waiting for the new Henderson to arrive from the factory. They are now working on another Kewpie car which is to contain a twin-cylinder Merkel engine. This machine they will use to demonstrate just what the Merkel engine can do. They find that this kind of demonstration has won them many customers.

### NOW BRONX DISTRIBUTOR

The Bronx, N. Y., November 26.—Oliver C. Berckhemer, proprietor of Oliver's Motorcycle & Bicycle Shop, at 993 Washington avenue, has signed up as distributor for the Indian in this borough for 1916.

Berckhemer has obtained a verdict for $7,500 from the Empire Carrying Corporation, a large mail contracting firm in New York, for injuries sustained by him in a collision with one of the firm's mail trucks early this season. His injured thigh and leg are coming along in good shape.

### SALES CO. REMOVES

Dallas, Tex., November 26.—M. C. Cameron, president of the Harley-Davidson Sales Company, has renewed the contract for 1916 and has removed from 1916 Commerce street to 2016 Commerce street, taking much larger quarters than the old location.

A full line of the latest models in motorcycles and vans are on display in the new store. An order amounting to nearly one thousand dollars has been placed for parts.

### HOFF TO OPEN OWN PLACE

Salem, N. J.—Thomas A. W. Hoff has handled the Indian line in this city for the past three years, utilizing part of a garage as his headquarters. He has come to the conclusion that he needs a place of his own for 1916 and will open up within a few weeks in a fine new brick building, now in course of construction. Hoff will take J. Louellard as a partner for the new season.

Hoff has disposed of 60 Indians since he took the agency and with an up-to-date repair shop and line of accessories, he hopes to double this number in 1916. He is a firm believer in the sociability end of motorcycling and will take steps toward forming a motorcycle club early next season. On Hallowe'en, he attracted considerable attention by towing a seven-passenger automobile with his Indian twin in the Industrial Parade in this city.

### BRAZENOR TO ENLARGE

Brooklyn, N. Y.—Bob Brazenor, proprietor of "Bob" Brazenor, Inc., of 594 Jamaica avenue, this city, has received 27 sidecars and 31 motorcycles, all 1916 models, so far. He is going to enlarge his branch at 1157 Bedford avenue and will handle the Miami bicycle, as well as a line of cycle accessories. Bicycle repairs are also to be provided for.

### FIRE CAUSES SLIGHT DAMAGE

Louisville, Ky.—One of the buildings occupied by Stratton & Terstegge, enameling experts of Louisville, was slightly damaged by fire a few days ago as a result of boys playing with matches. This company specializes on baking enamel on old motorcycle and bicycle frames.

### TO CONTINUE AGENCY ALONE

Hackensack, N. J.—J. W. Terhune, of 193 Main street, this city, will continue his Harley-Davidson agency alone, following the recent death of his brother, E. J. Terhune. The late Mr. Terhune was his brother's right-hand man and his loss is felt keenly.

### TAKES ON DAYTON

Scranton, Pa.—The Motorcycle Sales Company, of 617 Spruce street, this city, has taken on the agency for the Dayton motor bicycle, in addition to its Harley-Davidson representation. The firm has Lackawanna, Wayne and Wyoming counties for its Dayton territory.

### SALES CO. INCORPORATES

The Harley-Davidson Sales Company, Inc., has been formed to conduct a motorcycle business in New York City. Capital, $10,000. Incorporators, Russell H. Ford, of White Plains; George E. Wood and E. M. Mueller, of New York. Messrs. Ford and Wood are Harley-Davidson dealers in White Plains and New York respectively, Wood being distributor in the metropolis.

### STARTS REX PLUG CONTEST

Paterson, N. J.—Fred L. Joffee, of 184 Market street, local Excelsior distributor, has started his Rex spark plug contest. With every Rex spark plug purchased from him, the buyer is given a check, the stub of which is thrown into an iron box. On Christmas Eve the sheriff of Passaic County will draw the number of the winner from the box. Joffee has already disposed of 200 Rex plugs.

### MASLEN TO MOVE

Philadelphia, Pa.—George S. Maslen, Indian distributor for Philadelphia and vicinity, will move to new quarters on Broad street sometime in September. From his present location at 509-511 Market street. Maslen has not definitely fixed on his new location, but has several places under advisement. His increasing business necessitates the seeking of larger quarters on a more prominent thoroughfare, hence the move.

### DAYTON CO. TO TAKE ON THOR

Louisville, Ky.—The Dayton Motorcycle Sales Company may shortly take on the Thor agency, in addition to those already handled. The Thor was formerly handled by Clarence Fisher, at Preston street and Broadway, but Mr. Fisher decided to give his full attention to motorcycle and bicycle repair work. The Dayton Motorcycle Sales Company also handles the Dayton, Henderson and Yale machines.

## GRADY'S NEW AGENTS

WORCESTER, Mass., November 30.—J. W. Grady & Co., distributors for the Dayton motorcycles, bicycles and motor bicycles in New England and New York, reports that it is well pleased with the business already secured for the new season model and that prospects were never better.

Among the agents appointed recently for these products are: C. V. Pendleton, of New London and Norwich, Conn.; W. D. Wilmot, Fall River, Mass.; H. B. Vesper & Co., Rockland, Mass.; Herman Ulrich, Lawrence, Mass.; George W. Stevens, Attleboro, Mass.; G. W. Jocelyn, Holyoke, Mass.; John B. Varick Co., Manchester, N. H.; and the Standard Cycle & Supply Co., of Pawtucket, R. I.

### NEW DAYTON AGENT IN PHILLIE

Philadelphia, Pa., November 28.—The Uncle Sam Motor & Cycle Co., of 2520 N. Broad street, Philadelphia, has announced that it will be the exclusive Dayton agents in this city during the 1916 season. Mr. Flamm, the genial proprietor of the Dayton agency, is very popular in the Quaker City, holding at the present time the treasurership of the Philadelphia Motorcycle Trades Association. Being an expert electrician, Mr. Flamm maintains his own electric lighting and charging plant and takes an especial interest in his repair department which keeps three men busy the year round. He features the gasoline trade and sells more than one thousand gallons of gas each week and two barrels of oil.

### COLUMBUS DEALERS OPTIMISTIC

Columbus, Ohio, November 27.—Keen interest is being shown by the local motorcycle fans in the new models that are being displayed by the various dealers in this city. Inquiries regarding the trading of old models for 1916 machines are numerous. On the whole the agents believe that the riders are more enthusiastic and that the 1916 prospects are brighter than those of last year.

### DAYTON IN NEW JERSEY

Passaic, N. J., November 30.—The Brown Sporting Goods Company has taken on the Dayton Motor Bicycle for Passaic county and will shortly establish an agency in Paterson to assist in distributing them throughout their territory. Their contract also covers a portion of Bergen county, the remainder of Bergen county being handled by Conrad Richter of Englewood.

Richter is a new name in motorcycle affairs in this part of the State. He is a successful business man in other lines and has associated with him a number of live young men who will promote the Dayton lines throughout this district.

### GLEN LYON AGENCY

Glen Lyon, Pa.—Joseph Matusavage will represent the Dayton motorcycle for this portion of Luzerne county during 1916.

### HAS DELIVERED FOUR

Houston, Texas.—The Houston Motorcycle & Supply Company, Harley-Davidson distributor, has delivered four 1916 models so far and has orders for three more for Christmas delivery. The store is at 1314 Preston avenue. Proprietor H. L. Flake and his aids are kept busy there in demonstrating the merits of the Silent Gray Fellows.

### NEW OFFICERS OF COMPANY

Milwaukee, Wis., Nov. 30.—When the Milwaukee Sycle Supply & Sales Co., wholesale and retail cycle dealers, reorganized recently, J. J. Koehler was chosen president, Watson E. Barnhart, vice-president and treasurer and A. P. Koehler, secretary. President Koehler, who for the past ten years has represented the Simmons Hardware Company in Wisconsin, will assume the active management of the concern, which will represent the Thor in Milwaukee and do a general jobbing business in bicycles and sundries in and around the city.

### BELMONT CYCLE MOVES

Newark, N. J.—The Belmont Cycle Company, of which Harry Schnell is manager, has moved across Broad street, to its new brick building, a structure measuring 33x65 feet. Provision has been made in this building for a two-story addition when business requires it. The company has a sub-agency for the Indian, from Walter Goerke.

Schnell handles the Pierce, Iver Johnson and Tribune bicycles, in addition to the Indian motorcycle.

### WESTERN CO. TO MOVE

Kansas City, Mo., November 27.—The Western Motorcycle Company announces that it will move to larger and better lighted quarters about the middle of December. The new store will be located at 914 East Fifteenth street. The company is advertising the Harley-Davidson, for which it is agent, very extensively in the local papers, and has met with good results.

### OUT FOR HOUSTON SUPPLY

Houston, Texas.—C. R. McClanahan, well known in the motorcycle field in this city, has left the employ of George W. Beardsley, former Excelsior agent, and identified himself with the Houston Motorcycle & Supply Company, Harley-Davidson distributor, at 1314 Preston avenue. He will travel seven counties in the firm's interest.

### NEW INDIAN AGENT

Houston, Texas.—The Indian motorcycle and bicycle line will be distributed during 1916 by the Texas Cycle Supply Company, of 611 San Jacinto street. This is a new firm consisting of George E. Tryon and L. V. Kennedy. The pair have taken over the interests of the Smith Cycle Company, former Hendee representatives.

### DAYTON IN ESSEX COUNTY

Newark, N. J.—The Superior Welding Company, of 25 Sixteenth street, this city, is Essex county representative for Dayton motorcycles and motor bicycles. Julius P. Glor, the manager, has charge of the motorcycle department.

# Where the Cyclemotor "Wheeling without work" is made

When selecting your line for next season, it will be well to consider carefully the dependability of the establishment behind the product you will sell, and their ability to make prompt shipments and fully supply the demand you will create, without costly delays and disappointments.

The wide awake dealers who have lined up with the Cyclemotor for 1916 have received signed contracts from the factory guaranteeing exact deliveries covering any period desired during the entire year.

The dealer is consequently better able to prepare for his requirements, positively knowing he can fill his retail orders without offering any excuses and foregoing his profits because of the inability of the factory to back his word.

Furthermore, the Cyclemotor is manufactured and assembled in a plant which is one of the largest and most completely equipped factories of its kind in the world and you are therefore assured of receiving the very highest degree in **workmanship, quality** and **service** which it is humanly possible to render.

Isn't it better business to line up at once with a tested article of high standard, backed by a corporation of repute, than to take chances on new "freaks" and "novelties" which lack the construction to prove practical or resources to insure permanency and success?

Write at once for our attractive proposition, stating line of bicycles handled and territory you would wish to cover. Ask for Booklet E.

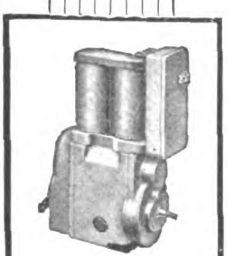
# The difference between a bicycle and a motorcycle, a kerosine lantern and a tungsten lamp, is just as great as the old undependable lights and the

# REMY

## Motorcycle Lighting-Ignition System



Remy Ignition-Generator

**Each do what they are intended to do**—but the modern invention is such a greater improvement that the old are gradually being discarded for many purposes.

Today electric lights are standard equipment on practically every automobile. People refuse to buy cars otherwise equipped because electric lights are so much better.

You are now offered electric lights for your motorcycle, just as efficient, just as powerful, just as desirable as on a motor car. The Remy system is built by the same company that makes lighting and ignition systems for some of the country's foremost automobiles, by engineers and workmen who know what are the requirements for motorcycles and guaranteed by this company.

No matter how full of ruts and bumps is the road, the lights throw a brilliant path far ahead into the uncertain blackness, disclosing every obstruction and make *night riding absolutely safe.*

High and low powered headlight, rear light, horn, and strong, reliable synchronized ignition. Easier cranking. Protected wiring.

A demonstration on the Harley-Davidson will convince you.

# THOR

# THOR WINS 5 OUT OF 5!

*First race, five miles—First, Thor; time, 7:02. Second race, two miles—First, Thor; time, 2:07. Third race, ten miles—First, Thor; time, 14:08. Pursuit race, seven miles—First, Thor. Rider in all races, on Thor, Martin Schroeder.*

## On Last Thanksgiving Day the Savannah Motorcycle Club of Savannah, Ga., held a motorcycle meet full of Southern "pep." My! how those boys did ride. There was all kinds of competition in the five races.

The Thor that was entered was a stock machine—Single Cylinder—and of an old vintage. But it was a cinch for Martin Schroeder and his trusty old Thor to romp in FIRST in every one of the five races.

Such consistent performance only goes to prove our contention that the Thor is the most reliable mount on the market. You can always depend on a Thor—all the time—anywhere.

Morrow

*"The Brake That Cancels Danger"*

***Just Say "It's A Morrow" and the Sale Is Made***

THE DIFFERENCE BETWEEN selling an article with a national reputation of years' standing and an article that has its reputation yet to make **is a difference of dollars and cents to you,** Mr. Dealer.

FOR THE VERY MENTION of the name "MORROW" conjures up a host of recollections in the prospect's mind—memories of enthusiastic riders' praises of their coaster brake—of its absolute reliability—its positive forward drive—of its marvellously free coasting—these qualities are automatically associated in his mind with the name "MORROW."

AND SO WHEN THE DEALER says "MORROW," in connection with the bicycle which he intends buying, it is a direct influence in his desiring **that wheel—and no other—and the sale is made.**

NO OTHER BRAKE has the reputation the MORROW enjoys—where it is present on the wheel the dealer can use it as a final sales argument that gets the business.

# We Want M

## An Advertisement to

The 1916 selling season is going to be a hummer.

Nearly 100 new dealers have been added to the Harley-Davidson sales organization during the first three months of the 1916 season.

Harley-Davidson shipments are two months ahead of shipments last year.

### We Want Another 100 Dealers

We have the production facilities to handle this increase and we can make it worth while for any live dealer to take on the Harley-Davidson selling proposition. A number of important changes have been made in our representation, and more are being made from day to day. We have three or four excellent openings in large cities, to say nothing of the smaller towns.

## 62 Miles in 68 Minutes

A stock 1916 Harley-Davidson three speed twin won the 62 mile Cheyenne Thanksgiving Day road race from Cheyenne, Wyoming, to Dover, Colorado, and return in 68 minutes.

The winning Harley-Davidson was a new machine which was uncrated November 20th.

# The Goodyear Square Deal Bicycle Tire Policy

## *One Tire—One Quality—One Price—One Guarantee*

This is a tire selling policy—long hoped for by Dealers—a policy long demanded by riders.

It means regeneration of the entire bicycle industry. It means that riders can now get a known tire, of known quality, at a known price.

It means Dealers can sell a tire guaranteed to give satisfaction. It means Dealers can make quicker tire sales and more of them. And it means for Dealers increased sales in bicycles and sundries.

It means to Manufacturers a nearer attainment of their goal—1,000,000 new bicycles for 1916. For this policy eliminates excessive expense, thereby encouraging more people to ride.

The Goodyear Tire & Rubber Company makes one single tube bicycle tire—the "Blue Streak." All Goodyear skilled workmanship and material go into that one tire. Efficiency and effort are not scattered in producing hundreds of unknown, untried "branded" tires.

Every Blue Streak tire will be tested eight times before it leaves the factory. It will be filled with air and kept under observation one whole week. Goodyear takes this unusual precaution to give you a perfect tire.

That's why Blue Streaks can be guaranteed for material and workmanship. Should any defect develop, the Goodyear Guarantee stands solidly back of them.

The Goodyear Tire & Rubber Company does not sell direct to consumers. The advertised Blue Streak price and Blue Streak quality enable Dealers to use this tire against mail order competition.

In concentrating on one tire—the "Blue Streak"—the manufacturing cost is cut down to the minimum. Hence the "Blue Streak" price is low. Blue Streaks are made in the world's largest tire plant, where up to 15,000 pneumatic tires are made per day.

The Blue Streak price is the same to all Dealers. We don't attempt to "force" the trade by offering various discounts. We have one price to Dealers, whether 10 pairs or 100 pairs are ordered. This prevents disastrous price cutting, a vital protection to Dealers.

We keep Blue Streaks moving, constantly multiplying the demand. The one dealer price makes it unnecessary for you to overstock in an effort to earn a quantity discount. New stocks are quickly obtained from the nearby Goodyear Branch.

Dealers: In one short year Blue Streak sales have increased 119 per cent. For here is a quality tire at just about half the usual price of high grade tires. And it is the easiest selling tire on the market—a beautiful tire, thoroughly inspected, tested and guaranted to the limit. Blue Streaks win and hold trade for thousands of Dealers.

Write us today for complete Dealers' proposition.

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## ONLY ONE MODEL FROM MIAMI CO.

### Middletown Factory Will Concentrate on Production of Power Bicycle at Reduced Price for 1916 and Discontinue Making Models 14 and 16.

MIDDLETOWN, O.—The Miami Cycle & Manufacturing Company announces that it has reduced the retail price on its Model 15, Power Bicycle from $125 to $115. The net price to the dealer, of course, is reduced in the same proportion.

In connection with this statement it is also explained that the company will hereafter devote all its attention to the one model, and will discontinue building Models 14 and 16. This decision has been arrived at because of the difficulty experienced in getting material and because of the remarkable demand for the Power Bicycle. With the company's full attention devoted to the one model, it is pointed out, quantity production will justify the lower price.

The Miami company is convinced that the new arrangement will be as satisfactory to the dealer as to the factory and the rider, in view of the fact that a sales campaign can be concentrated on one model at small cost and with certain results. As for the attitude of the factory, the company sums it up in few words: "This leaves us only one model to push—and watch us push it!"

The Miami company now has revised literature fully describing Model 15 and announces its willingness to send it anywhere upon request. When questioned concerning open territory a few days ago one of the plant officials stated that some desirable districts are still uncovered and that live dealers who file applications will receive rapid-fire attention.

About January 1 the company will send an interesting circular letter to the trade announcing its advertising and dealers' cooperation plans for the spring. In addition to getting substantial orders for Model 15 from all parts of the United States the Miami folks state that they are building up an excellent export business.

## CEASE MAKING YALES

TOLEDO, O.—Announcement has been made by the Consolidated Manufacturing Company, of this city, that no more Yale bicycles or motorcycles will be hereafter constructed. The factory is to be devoted to turning out shrapnel and other war munitions and the manufacturing of parts for other companies. At present the company has several large shrapnel contracts for the Allies.

The stock of motorcycles, bicycles, tires and accessories held by the Consolidated company has been purchased by H. D. Capron, manager of the Toledo store.

## R-S OFFICERS CHOSEN AT BUSY ANNUAL MEETING

READING, Pa., Dec. 7.—At the annual meeting of stockholders of the Reading Standard Company, which was held today, the following officers were elected for the coming term: A. S. Deysher, president; Randolph Stauffer, vice-president; G. Jahn, treasurer; W. F. Remppis, secretary. In addition to the above-named officers the following are on the board of directors: J. C. Ferguson, F. R. Wilhelmy, Charles Glover, H. Mesinger and W. G. Schaeffer.

The report covering the company's operations for the past year was approved. It showed a consistent advance along conservative lines and was considered the most satisfactory statement of the kind that has been submitted in a number of years.

## NEWS JOTTINGS OF TRADE AND CLUBS IN TORONTO

TORONTO, Ont., December 7.—A recent visitor along the Canadian trade firing line was B. A. Edgar, of the Westfield Mfg. Co., who interviewed a number of leading Canadian dealers with a view to placing the Ontario distributing privileges for Pope motorcycles.

Percy A. McBride has been appointed the Eastern Canadian distributor for the Rogers Mfg. Co., Chicago, makers of sidecars.

Wilfrid Morrison, traveler for Walter Andrews, Harley-Davidson distributor in Ontario, has left Toronto for an extensive tour of the province.

Harold Pratt has been traveling the country for the purpose of placing agencies for Excelsior and Henderson motorcycles through Percy A. McBride.

Country touring is practically at an end, in Ontario, for the season because of the miserable state of the roads. Riding will be resumed by many motorcyclists, however, as soon as the highways become packed with snow.

## CHRISTMAS PARTY FOR INDIANA CLUB

### Monster Celebration Will be Held by the Consolidated Club, of Indianapolis; Membership Nearing 150; Hare and Hound Chase Planned.

INDIANAPOLIS, Ind., December 7.—The Consolidated Motorcycle Club of this city will hold a big Christmas celebration, in which a huge fir tree will form one of the chief attractions. This tree will be set up in the general assembly hall of the club, and will be trimmed with many decorations. Many fine presents will be donated to the club by the local dealers and jobbers which will be strung on this tree and given to all the club members and families on the evening of the celebration. Entertainment will be furnished by club members, local singers of note and an orchestra.

The road race just promoted by the club proved to be one of the best propositions the club has yet handled, as about thirty new members were enrolled in the club and a great deal of favorable publicity secured in the local papers. The club is fast approaching the 150 mark in its membership.

A hare and hound race is being planned now for the New Year's day contest, in which at least fifty members of the club are expected to take part. While the plans for the race, which is novel for this part of the country, have not been entirely completed, it is expected that the club will choose two sets of riders, one to act as hounds and the other as the hares. Should the hounds succeed in catching all the hares in a set time the hares will be forced to give the club a big feed at their expense.

## TO USE ELKHART FOR 1916

MONROE, Mich.—Elkhart magnetos will be used on 1916 models of the Smith Motor Wheel and Dayton Motor Bicycles, according to a recent announcement made by the Elkhart Manufacturing Company, the makers of this magneto. Contracts have been signed with the A. O. Smith Company, of Milwaukee, and the Davis Sewing Machine Company, of Dayton, to equip their respective outputs with this alternating-current machine. The type of Elkhart magneto to be used by these firms is the A-O, which is nicely adapted for such service.

# MAGNETO SUITS ARE TERMINATED

**Splitdorf and Bosch Companies Come to Understanding in Protracted Litigation Involving Motorcycle and Automobile Ignition Patents.**

NEW YORK, N. Y., December 4.—Suits for infringement of magneto patents which were instituted some two years ago between the Bosch Magneto Company and the Splitdorf Electrical Company, have had a friendly termination. Of the three suits which were tried in the United States District Court in this city, the Splitdorf firm recognized the validity of the Bosch patents in two, while in the third (Splitdorf vs. Bosch) an agreement has been arrived at. In the case of the third suit, both companies have some time since discontinued the manufacture of the alleged infringing constructions.

In one suit, Bosch Magneto Company vs. Frederick A. Baker (who sold Splitdorf-equipped motorcycles), the patent involved was Bosch patent No. 974,967, for a magneto for V-shaped twin motors. In the other suit, Bosch vs. Baker, the Gottlieb Honold patent No. 900,542, was involved. This covers a construction giving a prolonged high-tension spark with a high-tension magneto. These suits were decided in favor of Bosch. The third suit related to the old Duplex construction of the Bosch magneto, employed on automobiles.

### WERLE A MOVIE ACTOR

MILWAUKEE, Wis., December 7.—Theodore J. Werle, field lecturer for the Wisconsin Anti-Tuberculosis Association, whose work has been featured in a series of stories in these columns, plays an important role in the film story of the association's activities which is being shown in the city and vicinity for the benefit of the sale of Christmas seals. Werle and his Harley-Davidson form the introductory chapter of the four reels of fascinating educational pictures.

The story tells how a young doctor and his sweetheart become active in the work against the spread of tuberculosis. It is when their horse becomes scared at the sound of an approaching two-wheeler that Werle enters into the curtain's range, offering apologies, telling who he is, handing out literature, that they first learn of the Wisconsin Anti-Tuberculosis Association.

### DINNER TO SECRETARY OF STATE

NEW YORK, Dec. 9.—Secretary of State Francis M. Hugo will be tendered a dinner at the Waldorf-Astoria on Wednesday evening, December 15, by the automobile trade and special inspectors, and a table to accommodate ten persons has been set aside for those interested in the motorcycle field. Tickets are ten dollars apiece—yes, ten is right—and those who wish to avoid the rush for them are invited to communicate with J. A. Hall, 322 East 32nd street, Brooklyn, N. Y.

### TO MOVE UPTOWN

NEW YORK, N. Y.—The Motor Car Equipment Co., of 55 Warren street, will move to 19-21 West Sixty-second street, this city, by January 1. The new location has 55,000 square feet of floor space, and has been altered to suit the company. The move will bring the firm, which has been ten years in the Warren street location, closer to the automobile trade. The Motor Car Equipment Company does a strictly wholesale business in supplies.

# NEW TIRE FIRM ON HUGE SCALE

**International India Rubber Corp. Has Been Launched at South Bend, Ind., with Capital of $1,000,000; Well-Known Tradesters as Officers.**

SOUTH BEND, IND., Dec. 3.—A charter to manufacture tires has been granted to the International India Rubber Corp., with a capital of $1,000,000. P. E. Studebaker, son of the late Henry Studebaker, is to be president; E. H. Schwab, of the Silvex Company, manufacturer of Bethlehem spark plugs, will be vice-president, and G. W. Odell, formerly with the Toledo Ford Tire Co., of Findlay, O., is to be secretary and general manager; J. R. Nobile will be treasurer.

The new corporation has opened temporary offices in the Union Trust building and has taken option on real estate in South Bend for a factory site.

The company, aside from the fact that it is to produce tires, has a unique and original selling plan. A part of the 7 per

cent. cumulative and protected preferred stock will be distributed at par for the purpose of establishing selling branches. These selling branches will be widely distributed and will be devoted to advertising and selling the product. It is the intention of the company to have, by the time its buildings are erected and its plant is equipped, at least 500 branch establishments.

### TO OPEN BROOKLYN BRANCH

BROOKLYN, N. Y.—The Firestone Tire & Rubber Company, of Akron, O., has purchased the building at Bedford avenue and Sterling place, this city, for use as a local branch. It will be opened officially on January 1.

### TO MARKET FOWLER FOOTBOARDS

PITTSBURGH, PA.—Announcement is made that the spring footboards designed by L. E. Fowler, of Pittsburgh and described in the November 18 issue of **Motor Cycle Illustrated,** will soon be placed on the market by the Flxible Sidecar Co. The commercial product will be of the folding type, and applicable to all makes of motorcycles. As was explained in the article referred to, the Fowler footboards afford the user a good deal of spring-frame comfort with a rigid-frame machine.

### SUN LITE CO. ENJOINED

LOUISVILLE, Ky.—Judge Walter Evans in the Federal Court has signed a restraining order against the Sun Lite Co., of this city, in connection with a suit brought by the Prest-O-Lite Co., of Indianapolis, Ind. The order or injunction restrains the Sun Lite people from taking Prest-O tanks and filling them with Sun gas, pending a hearing of the case in full.

The Sun company has been exchanging tanks with local motorcyclists and other riders and later filling them with its own gas. The Prest-O firm did not claim that the Sun firm was deceiving its customers, but that they did not properly obliterate the Prest-O name and trademark before remarketing the tanks.

### ROAD RACE AT NEW CASTLE

NEW CASTLE, IND.—Motorcyclists of this place held a road race on Thanksgiving Day. Ed Ackerly, Harley-Davidson agent, and H. Myers managed it. Fifteen started and five finished the 24.8 mile course. Fred Lambertson, Excelsior, was first; B. Lambertson, Indian, second. Time, 25:50.

# MOTORCYCLES IN ARMORED TRAIN

**Detachment of Two-Wheelers Will Be Included in New Motor Equipment of New York National Guard; Motors to Cost About $100,000.**

ALBANY, N. Y., Dec. 7.—A motorcycle detachment will be included in the armored motor car train with which the New York National Guard is to be equipped during the coming year. The train is now assured and its maintenance has been provided for. At the request of Adjutant General Stotesbury, Governor Whitman has approved the plan to appropriate $10,000 for supplies and general upkeep of the train during the coming fiscal term, and it is the intention to make the equipment rank with any now operating on the European battlefields.

The armored train will cost about $100,000 and the entire expense will be defrayed by a group of patriotic citizens who are anxious to see New York's National Guard in possession of the finest lineup of armored motor cars that money can buy.

A huge battle car, heavily armored and carrying two three-pound guns and two or more machine guns, will be the principal feature of the train. This battle car will be carried on a specially constructed truck equipped with motor apparatus and steering gear at either end, so that it can be run in any direction by direct control instead of reverse.

This car will carry nine or ten men, all of them behind armor plate, and will have space for considerable ammunition. It will operate on highways and be capable of withstanding a heavy enemy fire. Such a car could engage and destroy an enemy train carrying troops or supplies. Battle cars of this description have done very effective work in Belgium and Northern France during the present war.

There will also be six or seven lightly armored fast motor cars capable of carrying machine guns and suitable for fast scout work or the bringing up of ammunition from the supply trains.

It is impossible to state at present how many motorcycles will be provided in the first detachment, but owing to the excellent showing made by the two-wheelers at the recent military maneuvers in Van Cortlandt Park, New York, it is believed that the officers in charge will strain a point to have the motorcycle division a very strong one.

# POOR ROADS ELIMINATED ALL BUT SIX OF THESE RIDERS

**Contestants in 104-Mile Run of Harley-Davidson M. C. of Detroit, of Whom 36 Fell by the Wayside**

DETROIT, Mich.—Only six riders finished out of 42 starters in the recent run of the Harley-Davidson M. C. of Detroit. The total distance was 104 miles, but the roads traversed were some of the worst in the State, hence the elimination of most of the field. Of the six who came through, J. B. Gault, three-speed Harley-Davidson, and A. E. Sonnanburg, special Excelsior, finished together and are tied for first place. Elmer Stevens, Harley-Davidson, came in third, followed by Adolph Lemeign, three-speed Harley-Davidson. R. Yohey, on a machine of the same make, came in fifth while George Ward, three-speed Harley-Davidson, was sixth.

Lemeign, who came in but eleven minutes behind the leaders, is a Belgian youth, 16 years of age, and great credit is given him for his pluck. Yohey is well known as a track and road racer hereabouts. R. D. Brown, of the club, acted as starter, while Foster Walker, F. Friedman and F. Limerick were checkers at the three controls. Walker and Brown, who planned this contest, are perfecting arrangements for an endurance contest to be run about January 1.

## THE WAR STORY TOLD IN GASOLINE FIGURES

AN indication of the important part that gasoline played in preparations for the European war and in the transportation of troops is given in the figures covering exports from this country during the months of September, 1914, and September of this year. During September, 1914, the necessity of rushing troops to the firing line was strongly emphasized. It is not surprising, therefore, to note that gasoline shipments during September, 1914, were considerably higher than during September of this year.

France, for example, received 2,456,239 gallons during September, 1914, as compared with 23,345 gallons for September, 1915. The United Kingdom received 2,678,040 last year, as against nothing for September of this year. Italy, while not actually engaged in the war in September, 1914, no doubt was preparing for it and the fact that this country received 4,559,465 gallons in September, 1914, and nothing in September, 1915, indicates this preparedness.

The total number of gallons shipped during September, 1914, was 17,687,084. During September, 1915, a total of 4,612,832 gallons was shipped. During the first nine months of the year, ending September 30, the figures show 84,344,863 gallons for 1913; 122,167,107 for 1914, and 91,830,807 gallons for 1915.

## TWO PERFECT IN DENVER RUN

DENVER, Colo., November 30.—E. Lytle, Harley-Davidson solo, and Mrs. Vanderhoof, Harley-Davidson sidecar, were the only perfect score entrants according to official classification in the Thanksgiving Day endurance run of the Western M. C. of this city, held November 25. Lytle won in the solo class in which there were 24 entrants, while Mrs. Vanderhoof, with Miss Bowes as passenger, made the best score in the sidecar class in which there were five starters. In all, seven solo mounts and three sidecar combinations completed the 162 mile course from Denver to Greeley via Ft. Collins.

Second place in the solo class was obtained by E. Goldstone, Reading Standard, with 994½ points. H. Egander, Thor 9 twin, came third, with 994 points, while W. Beason, Excelsior, was fourth, his score being 989. In the sidecar class, J. Johnson, Harley-Davidson, came second with 981 points, and H. Haflinger, Reading Standard, was third, with 975. The weather was quite nippy, with a little snow in spots. Roads were good for the most part. The solo schedule was 30 miles per hour and the sidecar schedule 20 miles per hour. The summaries:

Solo Class—E. Lytle, Harley-Davidson, 1,000; E. Goldstone, Reading Standard, 994½; H. Egander, Thor 9, 994; H. Beason, Excelsior, 989; W. Keyes, Excelsior, 985; W. W. Whiting, Harley-Davidson, 983; Al. Sharp, Indian, 979.

Sidecar Class—Mrs. Vanderhoof, Harley-Davidson, 1,000; J. Johnson, Harley-Davidson, 981; H. Haflinger, Reading Standard, 975.

## READING CLUB NOMINATIONS

READING, Pa., December 7.—A lively contest is in progress for the presidency of the Reading Motorcycle Club, there being four nominations: Webster Schlott, Frank Neidig, W. L. Rhode and Harry Becker. There are contests for practically every other office.

A card party will be held by the club on Friday, December 10. Dancing and a luncheon will be features. A club run is being arranged on January 1, weather permitting, place and details to be arranged later. A turkey dinner will wind up the run.

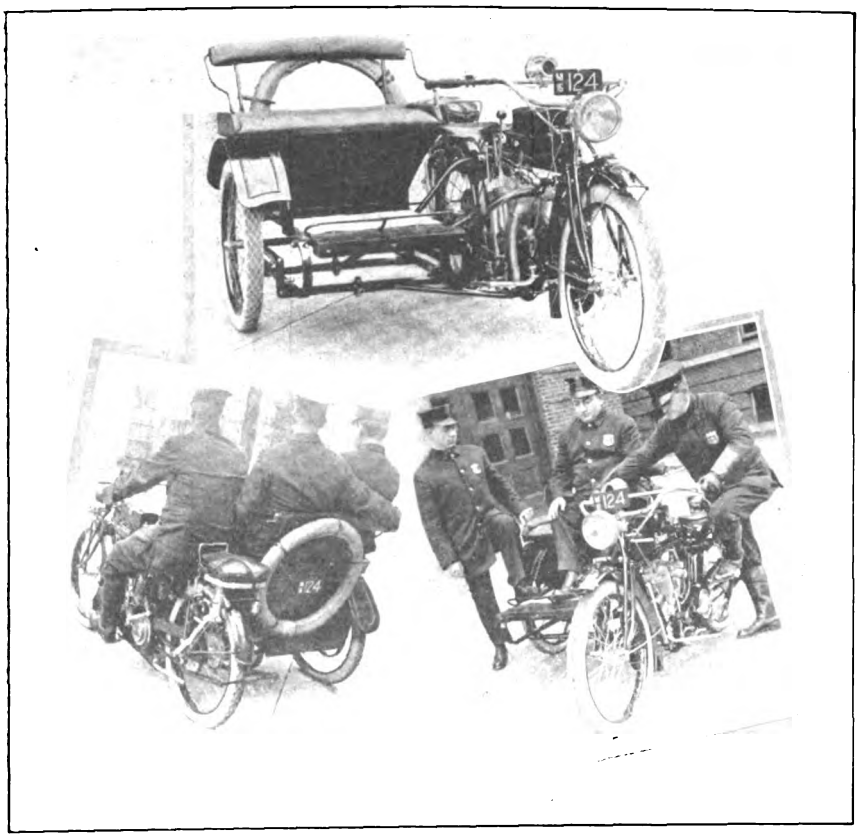
## "RIOT BUS" IS LATEST INDIAN OFFERING



**Top, Front View of New Carrier Attached to Twin; Below, Combination in Police Service, Showing Ease in Mounting and Transporting Patrolmen**

SPRINGFIELD, MASS.—A "hurry-up wagon" is the latest attachment to an Indian motorcycle for municipal service brought out by the Hendee Manufacturing Company, of this city. This wagon is a sidecar of special design with a seating capacity for two, built with low platform to enable policemen to mount or dismount instantly. It is designed for emergency service for police departments, such as answering riot calls, speeding reserves to fires, etc.

The wagon has a comfortable lazy-back seat and broad mudguard, to render travel as comfortable as possible. A spare tire is carried on the back of the seat. The chassis is along the general Indian sidecar lines, but the tread is naturally greater to take the increased width of seat. A tandem attachment is fitted to the machine to enable a fourth man to be carried if desired. The whole combination is able to get through traffic which would delay a motorcar, and has the speed of a motorcycle to boot. It can be stored in less room than a patrol wagon of any type. There is, of course, no comparison as regards cost of upkeep.

### THIS OUGHT TO SETTLE IT

"Editor: Your first information regarding the magneto equipment of Boido's machine in the Tucson-Phoenix road race was correct. Boido says he used a Dixie, the local Indian dealer says he used a Dixie, and I'm ready to take oath on a stack of red chips that his Indian carried a Dixie at the finish.

"Yours truly,

"ERNEST DOUGLAS,

"Correspondent."

## WHERE WILLIS' FRIENDS WILL FIND HIM NOW

INDIANAPOLIS, Ind.—The announcement that Fred I. Willis, formerly of the Hearsey-Willis Company, has joined the Central Rubber & Supply Company, of this city, is supplemented by the news that he will have charge of the firm's automobile and bicycle accessory departments. These departments, the Central company states, will be enlarged under Mr. Willis' supervision. As time permits, Mr. Willis will make personal calls on the trade, but will have his headquarters at 120 South Meridian street, the headquarters of the company.

For twenty-two years, Fred Willis has been one of the strongest factors in the cycle trade of this country, and at one time was president of the F. A. M. He is president of the Chamber of Commerce in Indianapolis and one of the most popular business men in this city. During his years of service in the cycle industry, he has made hundreds of strong friends who have stood by him for season after season, and he is sure to have the ready support of the trade in his new undertaking.

Mr. Willis announces that he will have installed a special service department at once to take care of the increased volume of business which he forsees for the 1916 season.

**Fred I. Willis**

## MILWAUKEE CLUB HAS LIVELY BOOSTER BANQUET

MILWAUKEE, Wis., December 7.—"This affair has been a veritable pulmotor for the Milwaukee Motorcycle Club," said Hugh Sharp, secretary, at the big booster banquet held in the clubrooms, Thirty-fifth street, at Wells. The banquet was attended by some stellar lights of the industry, among them Walter Davidson, president, and William Harley, chief engineer Harley-Davidson factory; J. Robertson Brown, of the Harley-Davidson London distributing company; H. E. Baldwin, State referee, and J. J. Lantry, State commissioner, both of the F. A. M.; Emil Kasten, the local Excelsior dealer, and Fred Clark and Adolph Waech, Badger State Motorcycle Company, Indian dealer.

**Favor at Booster Banquet**

The value of frequent booster meetings like the banquet was emphasized by Frank B. Rodger, the club patriarch. Other speakers were Don Stevens and Harry Hull, of the local Firestone tire branch, who pledged the support of their company in whatever project the club attempted; Paul Bruess, Charles Buff, Albert E. Becker, Messrs. Baldwin and Lantry and Hugh Sharp.

The feature of the banquet was the presentation to Treasurer Clarence Martin of a gold mounted fountain pen in recognition of his services to the club. Charles Grier, the club president, was toastmaster. Favors in the shape of a miniature Non-Skid tire were distributed by the Firestone fellows, who also provided foil encircled smokes to go with the coffee.

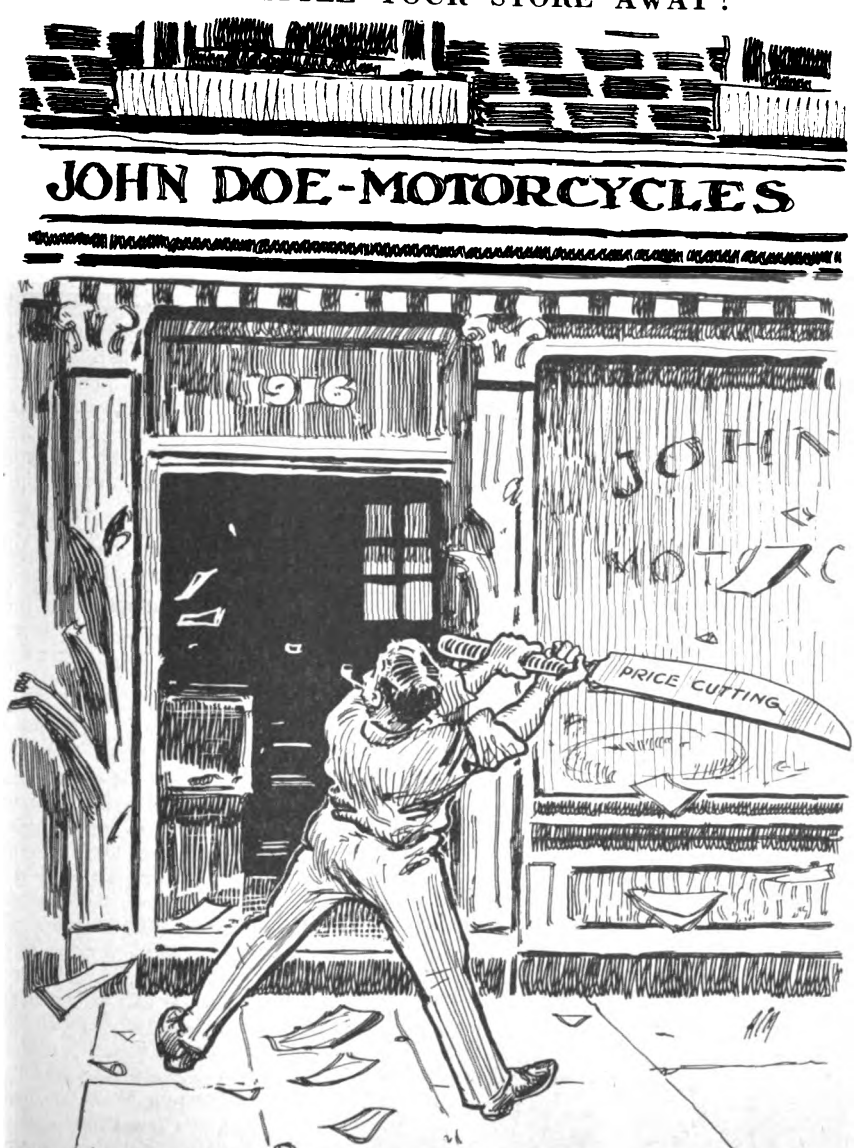
## DON'T WHITTLE YOUR STORE AWAY!



"WE often wonder," writes the manager of a progressive California cycle and accessory house, "if the dealer who cuts prices understands that he is simply whittling away his own opportunities. He might as well grasp a huge cheeseknife and start to hack the front out of his store. The unpleasant results would be no surer."

This is a striking presentation of the price-cutting problem. It is literally true that the price-cutter whittles his establishment out of existence, paring here and slicing there until nothing is left. And when the crash comes the price-cutter receives no sympathy. Fellow tradesmen heave a sigh of relief; former patrons smile as they pass the barred door. It's an evil game, and the finish is hard. A wise dealer will fight shy of it.

## TRUE CHRISTMAS SPIRIT

EDITOR: Last year I suggested to the clubs in Greater New York that they show the true Christmas spirit by trying to help the poor in their immediate vicinities. I asked the fellows to show a true spirit of fraternity by thinking beyond the circle of their happy friends and family and trying to realize the hardships which less fortunate people were facing at a time when others were enjoying the great holiday festivities.

The result was that many a poor family in a dreary and cold home was rendered happier than they would have been, through the big-hearted generosity of cycling clubs. The boys got together and sent out Christmas dinners and bought little presents for the kiddies, who would otherwise have awakened on Christmas morning with their threadbare stockings as empty as they were on the night before when the children hopefully hung them up for Santa Claus' convenience.

Let every club in the United States follow the example of the organized cyclists of New York. Let them add to the happiness of Christmas by doing their bit toward lifting the burden and the distress of poverty.

There are various ways that this can be done. An appropriation can be made from the club treasury, or each member can be asked to give a personal contribution to a Christmas fund. Still another way is to run some sort of social affair, charging admission, the proceeds to go for Christmas dinners and little presents for poor. A package party would be a good idea: admission to the entertainment would be secured by giving packages of eatables or toys. Then select a number of poor families in the club's neighborhood, and have the members bring the dinners and gifts to them on Christmas eve or morning. Supplying fuel and perhaps a little Christmas tree would greatly add to the joy of the poor.

For these unaffiliated with clubs and who may not be able to get five or six friends to work this plan may be found newspapers in various parts of the country which are raising funds for Christmas dinners. Any amount is acceptable to these funds. But by far the greatest happiness will come if a fellow will go out and deliver the dinners himself.

JOHN A. HALL.

Brooklyn, N. Y.

## A LETTER FROM CHELINI

EDITOR, **Motor Cycle Illustrated**:—I wish to acknowledge receipt of your very kind favor enclosing the two checks, $12.50 and $15; also favor enclosing the $1 contribution towards reimbursing my fine, and I thank you very much for your kind consideration in the matter. I would appreciate it, also, if you would extend my sincere thanks to Mr. Joseph Esler, Mr. Fred M. Mills and Mr. G. B. Gibson for their kindness in assisting to cover the fine. I assure you that my appreciation is sincere in this, and I can't help but have a kindly feeling for the different gentlemen who have come to the front like true sportsmen, and makes me take a much brighter view of the unfortunate circumstance.

A. CHELINI.

San Francisco, Cal.

# On the Pacific Coast

## FRASER IN HONOLULU

SAN FRANCISCO, November 28.—J. D. Fraser, manager of the local branch of the Appeal Manufacturing Company, California and Arizona distributors of the Harley-Davidson line of motorcycles and a large line of popular bicycles, slipped out of San Francisco very quietly recently, and the first thing any of his friends heard from him was that he was in Honolulu.

The explanation for his sudden departure is simply this—the Appeal Manufacturing Company, having taken over the Hawaiian territory for the Harley-Davidson, needed a representative in the islands to look after its business. Mr. Fraser needed, and was entitled to, a vacation, which he did not get last summer, so he was designated to make the trip. He took with him generous-sized lines of bicycles and tires and was prepared to "talk turkey to the right man for the job of representing the Appeal Company in the paradise of the Pacific.

During Mr. Fraser's absence, the San Francisco branch has been in charge of W. E. Reed, who travels for the company out of the San Francisco house. Mr. Reed says that his latest trip over his territory, which lies south of this city, convinced him that his company is destined to do a very good business during the coming year. Already, Mr. Reed says, the Los Angeles house of the Appeal Company has received three carloads of the new model Harley-Davidsons, while San Francisco has disposed of one carload, and another is expected daily.

## HOT AFTER LIGHTWEIGHT

SAN FRANCISCO, Nov. 28.—Accordcording to W. H. and W. E. Jackson, Pacific Coast distributors of the Dayton line of motorcycles and bicycles, dealers in this territory are becoming impatient over the non-arrival of the new Dayton Motor Bicycle, a sample of which, according to factory advices, was due to arrive here about November 1.

Both city and country dealers from Denver west are clamoring for news of the new machine, and many dealers in the territory tributary to San Francisco, have come to this city since the first of the month expecting to have a view of the new product.

The Messrs. Jackson are kept busy answering long-distance 'phone calls, telegrams, letters and personal calls from dealers who are anxious to learn when the Motor Bicycle will be here. They are told that when the demonstrating machine arrives, due notice will be given to all agents.

## HOFFER IS SIDECAR BOOSTER

LOS ANGELES, Cal.—Fred Hoffer, of the Girton-Hoffer Company, Southern California distributor for the Excelsior, says there is nothing to beat a sidecar combination as a demonstrator and a means of comfortable transportation. He has become a full-fledged sidecar enthusiast, following a trip of 800 miles with Wells Bennett to San Luis Obispo and return recently.

Hoffer and Bennett started out with a 1916 Excelsior combination to call on dealers. They traversed the famous Gaviota and San Marcos passes in the coast route north, riding over the rutted and dusty roads and ascending the long and steep grades for which these passes are noted. Gaviota was not even "open" as road-repairs nearby necessitated long detours. In spite of rough going and heavy climbing, Bennett stuck to it and elicited the admiration of Hoffer and all whom the pair met.

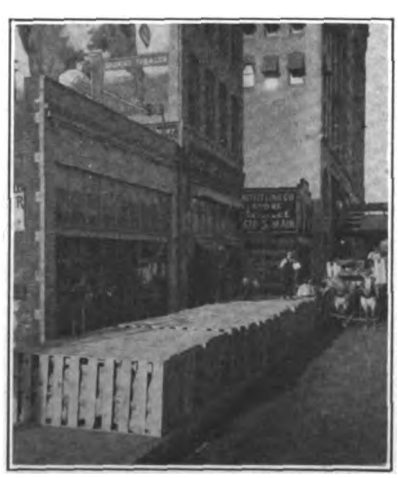
While visiting the dealers Hoffer was surprised to find people in many towns had never seen a sidecar before. The pair had to pass over the sandy roads of the Coast Range to Santa Maria as part of their journey. "I never had so much pleasure on a business trip in my life," said Hoffer.

## ROBINSON BAGS BIG GAME

LOS ANGELES, Cal.—All the big fellows in the motorcycle and bicycle world are in southern California now or planning to be before the winter is over—or at least wishing they could come. One of the most successful in developing the sporting resources of the region is Powhatan Robinson, president of the New York Sporting Goods Company, who with Harry Anderson recently spent three weeks hunting big game in lower California. The semi-desert, mountainous region along the Mexican line requires some "go-getter" to bring in the game. Robinson's friends are all looking forward to hearing the yarns about his sport at the camp fire this winter.

## THIRD CARLOAD COMES AND GOES

LOS ANGELES, Cal.—Look closely at the crates of 69 Harley-Davidson machines stacked in front of the Appeal Company's offices in Los Angeles, and you will see that they are separated into lots of one to nine machines. This is Sales Manager Welborn's system of arranging them ready to check up and see that every dealer gets



his consignment. Welborn is on the stack. This is the third carload received and either ridden out by dealers or shipped out the same day they came in.

## EXCELSIORITES CROSS SIERRAS

LOS ANGELES, Cal.—C. F. Gloystein, Excelsior dealer in Twin Falls, Idaho, with his chum, H. A. Chambers, arrived in this city on November 22 after crossing the Sierras. They left Twin Falls on their Excelsior three-speed models on October 21, covering 1,365 miles in all.

Their route lay through Nevada, and as there had been no rain since last March, the going was rutty and sandy and the mounts frequently sank to the hubs in the desert. The railroad had to be used as a riding-path numerous times and in places the State Highway was so cut up by summer travel that recourse for all motor vehicles had to be had to long and mountainous detours.

At Reno, Gloystein and Chambers inquired the best road over the Sierras, and on each getting a different route outlined, they separated. Gloystein took the Tahoe route and the sand and hard going which accompanied it, while Chambers did better on the Truckee road. The roads on the west side of the mountains were being graded and both riders had to proceed downhill using the intermediate gear, so soft was the going. Gloystein arrived in Sacramento alone but had hardly got to his hotel when Chambers came along.

The going south was all velvet, as the pair expressed it, over the fine roads to San Francisco and Los Angeles. Chambers said that the chief danger on the trip was from coyotes afflicted with hydrophobia, who were terrifying the ranchers and biting stock. Otherwise, the trip was without remarkable incident, for both Excelsiorites were used to desert and mountain riding. It is probable that Gloystein and Chambers will be the last to cross the Sierras before the snows arrive.

## BAKERSFIELD XMAS RUN

BAKERSFIELD, Cal.—At the last meeting of the Bakersfield M. C. plans were discussed for holding the club's big endurance run on Christmas Day. The riders will be started from Bakersfield on Friday, Decemeber 24, and the first day's run will be to Paso Robles, where they will check for the night. On the second day the participants will be required to make San Francisco. It was at first intended that the route should follow the coast line of the Southern Pacific, but it was finally decided to make a detour which will bring the riders through Hollister instead of Salinas. From this point the route will lead to Gilroy, San Jose and over the peninsula road into San Francisco.

The Bakersfield boys will be the guests of the San Francisco M. C. on Saturday night. On the third day of the run the route will extend from Oakland through the towns of Modesto, Merced, Fresno, Porterville and Bakersfield, most of the distance being over state highway.

The committee in charge of the run is made up of Frank Lightner, F. A. M., Commissioner for Kern County; G. L. Ingham and Charles Townley.

Digitized by Google

## SEPARATE USED MACHINES

LOS ANGELES, Cal., December 4.—The Girton-Hoffer Company, the Los Angeles Excelsior distributors, has recently moved all its second-hand machines into a new store adjacent to its regular quarters, which will hereafter be used exclusively for rebuilt models. Wells Bennett has charge of this end of the business and is giving very careful attention to the machines that have seen service. Not only is his department at all times in spic and span condition, but the machines are also in trim shape ready for the road. The Girton-Hoffer company had found it greatly to its advantage to thus separate used from brand new mounts, in that it leaves the main quarters free to concentrate on the handling of the 1916 machines and very favorably impresses prospects.

## POWERPLUS INDIANS IN LOS ANGELES

LOS ANGELES, Cal., December 4.—The Los Angeles boys have discovered what is the matter with the 1916 Powerplus Indian, thereby going Cannonball Baker one better. The trouble is they won't stay in the salesroom long enough for a fellow who is slow in making up his mind to see a bunch of 1916 red ones together and gloat over their magnificence. The riders grabbed that first carload that came to Risden's so quick that the only slow fellows to get a look at them were those who happened to be out along the lonesome spots of the county highways.

## PORTLAND'S SHOW IN FEBRUARY

PORTLAND, Ore., Dec. 3.—Portland's motor show this year will be held in February, this action being decided upon at a meeting of the Automobile Dealers' Association a few days ago. The show will probably be staged in the Multnomah Hotel, and at least three motorcycle exhibits are counted upon.

## TO STAGE RACE MEET

LOS ANGELES, Cal., December 4.—A committee will report to the Los Angeles Motorcycle Club at the first meeting in December on plans for a race meet at Ascot Park. There are now nearly a dozen speedsters of national fame in Southern California for the winter, and with more coming a lively meet is the prospect. The committee, consisting of George Rubsch, chairman; "Attorney" Brown and Perry Backus will recommend a one hour affair, 10-mile open, 10-mile stock, mile time trial and some novelty race which has not yet been determined.

## MIDWINTER RUN INTERESTS

TACOMA, Wash.—Riders in the Northwest are now interested in the midwinter endurance run over Snoqualmie Pass. In the event that it is decided to make the run to Seattle through the Pass and return, a large number have signified their intention of making the difficult trip.

## SHEPHERD ON HONEYMOON

LOS ANGELES, Cal.—Just disappeared, did Richard Shepherd, stayed away the three weeks he said he would be gone—and then some—with not a word to the fellows in the trade. Shepherd has been covering southern California for the Appeal Manufacturing & Jobbing Co. for the past eight years, and has friends in the trade in all the big towns and lots of little places that are not named on the map. And now Shepherd has married and actually taken a real, prolonged honeymoon.

## WHERE EXCELSIORS ARE HANDLED IN SAN LUIS OBISPO, CAL.

**Garage of Childers & Hampton, Which Also Boosts For Firestone Tires; Fred. Hoffer, of Girton-Hoffer Co., Excelsior Distributors, at Right of Entrance**

## TOO FAST FOR THE SCRIBE

SAN FRANCISCO, November 28.—Arthur Davidson, sales manager for the Harley-Davidson Motor Company, in company with R. W. Sayre, manager of the Los Angeles house of the Appeal Manufacturing Company, has been visiting in this city during the past week. Mr. Davidson came to this city to view the Exposition, and incidentally to take a close-range slant at conditions affecting his company in this territory. Mr. Sayre came north to meet him and will accompany him to Los Angeles, whither he goes next week.

Mr. Davidson is some speed-burner when it comes to getting around and seeing things, and all efforts to induce him to stand still long enough to be formally interviewed for the benefit of **Motor Cycle Illustrated** readers failed, for the reason that he always succeeded in keeping a lap ahead of the scribe, which handicap could not be overcome, even in a six-days' race, which this chase developed into.

## HUNSAKER MAKING MONEY

LOS ANGELES, Cal., December 4.—S. P. Hunsaker is one of the happiest dealers in the country. Instead of having that sinking feeling, which is known to a dealer who calls on the distributor to hold down his assignment to the smallest number of machines that will keep an agency, he called on E. E. Welborn, sales manager of the Appeal Manufacturing & Jobbing Company, just to say how good he was finding the motorcycle business at Pomona. He mentioned to Welborn that on November 30 he had delivered three of the '16 Harley-Davidsons, and had two more orders for machines to go out before December 20. Last year he did not get his first 1915 machine sold until the middle of January, too late to give the family a Christmas present on the profit.

The service given by the police machine is waking the Pomona people up. This machine, which Hunsaker sold on July 28, has been running continuously twenty-four hours a day, under day and night men, and on December 1 the total cost of repairs was just "two bits" for changing the adjustment of a chain. The chief of police likes the machine so well that a few days ago he took the mayor of Pomona for a ride to Riverside on it.

## WELBORN APPOINTS NEW AGENTS

LOS ANGELES, Cal.—December 4.—Buck and Buck have just taken over the Harley-Davidson agency at Santa Ana. They are known as hustler,s and are expected to build up a big list of riders of the 1916 three-speed. At Fullerton, Sales Manager E. E. Welborn, of the Appeal Mfg. & Jobbing Co., has closed an agency with B. Averit. C. H. Danforth, who continues as the agent at Whittier, is another agent, who like Hunsaker of Pomona, is full of enthusiasm created by a flying start on sales of the 1916 machine. In 1915 he took the Harley-Davidson and sold four machines. This year he took the delivery of his fourth 1916 machine on November 30, and says he has just begun.

## TAKES MERKEL AGENCY

TACOMA, Wash., December 6.—Elmer Bergstrom, who has participated with some success in quite a number of road and track events in the Northwest, has taken on the agency for the Merkel, which was recently held by Ray Day. The latter now has the Indian agency.

# TOURING THROUGH JAMAICA—THE GEM OF THE CARIBBEAN

## The Motorcyclist Must Do a Lot of Climbing, But Roads Are Fairly Good and the Scenery Usually Worth While—*By Della Crewe*

AFTER I said goodbye to my friends in Panama, I boarded the United Fruit steamer and within twenty-four short hours I landed at Kingston, the largest city on the beautiful island of Jamaica. Though you feel "queer" when you get on English territory, that feeling is quickly dispelled when you run into King Georgie's courteous officials who nail you almost as soon as you step off the gang plank.

The customs officials inspected my Harley-Davidson and Rogers sidecar, and then passed me on to other pleasant looking representatives of his majesty. They are very lenient with motorists in Jamaica. The officials made me pay a bond of fifteen dollars and asked two dollars and a half for a motorcycle license, all of which permitted me to travel through the island—the "gem" of the Caribbean Sea, as it is called—for six months.

### Hard to Describe Island

"And, madam," said one of the authorities, "if at the end of that time, you should wish to remain longer in Jamaica, you will be permitted to do so, provided you have conformed to all of our regulations."

Bully for John Bull!

It's not an easy matter to give a good description of Jamaica. But to give the reader at least some idea as to what the island is like, I'll just tell what Columbus did when the King of Spain put that proposition before him. The intrepid Genoese navigator picked up a piece of paper, carelessly crumpled it up in his hand and then tossed it on the table. "That," he said, "is a miniature of the new found island of Jamaica." Columbus' description will give you a pretty good conception of what touring is in the beautiful island.

### Natives Help Her

Jamaica is mountainous from end to end; a land of streams and woods. I could find no bridges. In the five hundred miles of motorcycling I did there I received a good ducking at least forty times—some of the rivers completely covering the carbureter and stopping the motor. But fortunately the sand beds of the streams are quite smooth and with the assistance of a native—which will cost you "tuppence"—you can readily pull through and prepare for another plunge which will come earlier than expected.

Even if there were no streams you'd get soaked, so why worry about duckings? It rains every day; you might be riding below an apparently clear sky, only to get drenched the next minute. Hence the necessity of taking along waterproof clothes.

However, it is not alone necessary to provide for one's personal comfort; you must also take some interest in your two-wheeler by loading up with plenty of extras. There seems to be but one motorcycle shop on the island, and that is the Indian agency at Montigo Bay, which is run by Mr. Gordon Parker. Unless you happen to be near the Indian agency you must therefore be ready to make your own repairs. Fortunately I had become extremely well acquainted with my mount, and carried first class equipment. And, of course, my dog Trouble was of some help: whenever I encountered any mishap he barked just as loud as he could, and some one would come along to give me a hand.

**A native hut in Jamaica which is situated on a 23,000-foot elevation; and (below) another hut at sea level, where Miss Crewe stopped to get a drink of "cocoa-deligua." The palm leaves make a pretty and rain-proof roofing for the latter hut, but space inside is precious.**

### Sixty Miles Per Day

Calling sixty miles per day on an American highway a stiff day's run would be considered a huge joke. But not so in Jamaica. You make sixty miles per diem down there, and you've accomplished something. You'll agree with me when I tell you that the elevations are sometimes 15,000 feet in less than ten miles. Yes, a trip through Jamaica on a motorcycle is like climbing the Alps.

And if you ever go to Jamaica, don't forget to take a horn with you—a bugle of some sort is absolutely compulsory, and you'll learn why after you've been on the island for awhile. The natives have the habit of getting right in your way, and they drive their carts along the roads at such a dead pace that you've just got to warn them when you're a mile off—and warn them loudly—that you're coming down the road. Then perhaps by the time you get near them they will have gotten to one side of the road and given you a fairly decent amount of room to pass. Otherwise you'll increase the mortality of the island by fifty per cent.

Many of the roads are very dangerous, owing to the abrupt and sharp turns. And the highways—even the best of them—are about as narrow as the streets of China. Perhaps narrow roads wouldn't be so bad if it weren't for the fact that the oxen, which are used almost exclusively for pulling carts, have very extended horns, and

Digitized by Google

seldom get out of the beaten path which is usually right in the middle of the highway. And to make matters worse, the drivers are, as a rule, fast asleep on their seats. Hence "safety first" is my advice to anyone motoring in Jamaica.

But in spite of its drawbacks, the "gem of the Caribbean Sea" is a veritable paradise. I have seldom seen so many and varied beauties of nature as can be found in Jamaica. I doubt if there is another spot in the world where one can find such an abundance of natural wonders crowded in every mile of travel. The roads are always ridable, mud, clay and gumbo being unknown in the island. And as you pass along, the fruit, flowers and sugar canes almost envelope you.

Starving to death on the island is, therefore, well nigh impossible, unless a hungry person were too lazy to raise his hand and pluck some of the juicy fruit which grows profusely by the wayside. And as for finding a place to sleep, should you be overtaken by darkness before coming to a house or village, why just move your machine to the roadside and rest your weary limbs in some inviting field.

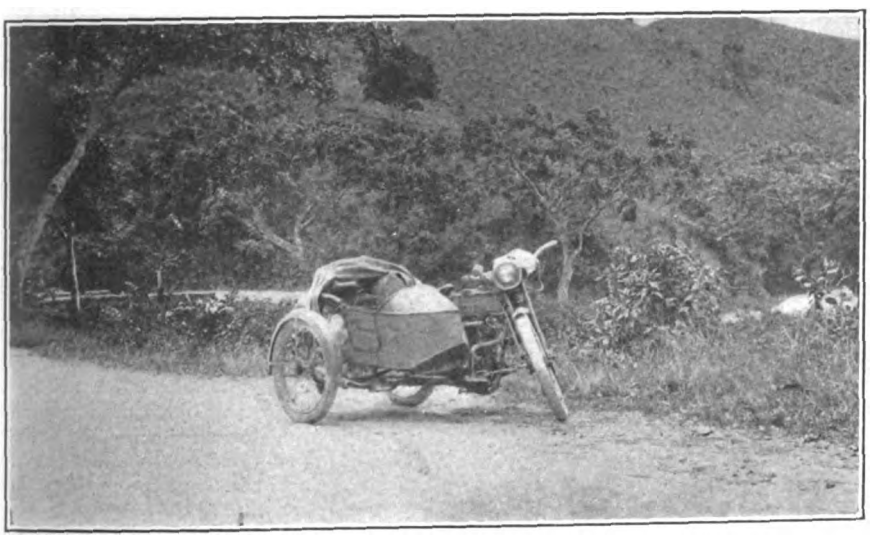
A girl's touring land is what I call Jamaica. Brother Benn doesn't have to be afraid about letting sister go off on a trip down there. In the words of Eugene Field, any motorcycle girl might well say, thinking of Jamaica, at least:

"I ain't afraid of
snakes or toads,
Or bugs, or worms,
Or mice."

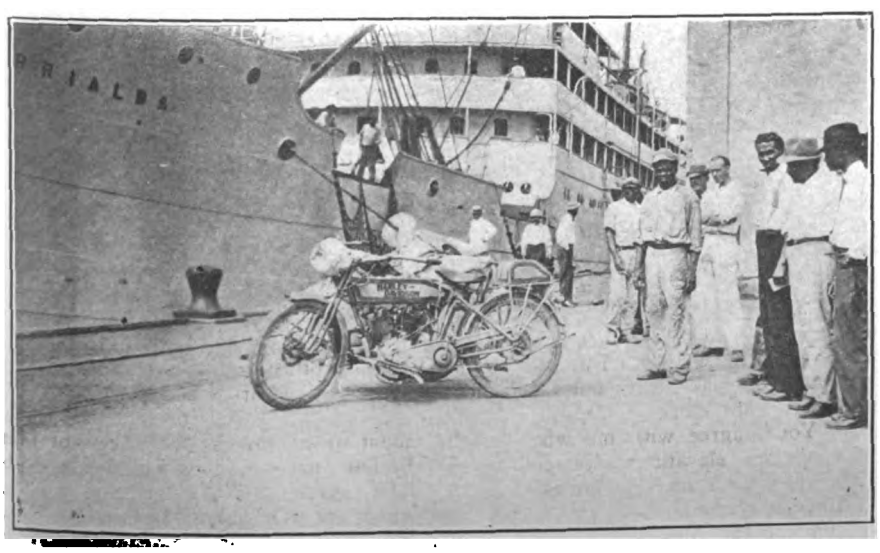
And she might well say it in as boasting a manner possible, without fear of ever being contradicted, for there are no such things in Jamaica. And there are no wild animals prowling about at night, either.

I have found that the English people there are a most charming, home-loving folk. The natives are as harmless as kittens, and numerous as flies. One never need worry of being well cared for in the tropical island. I always found the natives willing to assist, and the country women at all times cordial and hospitable.

Any motorcyclist who has "seen America first" ought to take a trip to Jamaica, if he wants to tour through a country that is out of the ordinary in scenery.



**Miss Della Crewe's outfit snapped at the beginning of a 35,000-foot climb; long climbs are common in Jamaica. Note the narrow and winding road in the background. Below is a picture taken by Miss Crewe at Panama just before she boarded the steamer for Jamaica**



## HOW AUSTRALIA VIEWS THE IMPORT SITUATION

DURING a recent tariff investigation undertaken by the Interstate Commission of Australia, the following facts of interest to American manufacturers were brought out:

The present Australian tariff rates—the general rates compared with those on products from Great Britain—are as follows:

Motorcycles, tricycles and similar vehicles, and frames thereof, whether partly or wholly finished, general tariff, 30 per cent.; from the United Kingdom, 25 per cent.

Cycle tubing and fork sides in the rough; liners, including bent tubing, not brazed or plated, free.

Plated, brazed, enameled or permanently joined cycle parts, general tariff, 15 per cent.; from the United Kingdom, 10 per cent.

Other cycle parts and accessories, general tariff, 5 per cent.; from the United Kingdom, free.

Motorcycle engines, general and United Kingdom rate, 20 per cent.

Magnetos (to be used within the Commonwealth in the manufacture of motorcycles), free from all countries.

### Some of the Evidence

Of special interest to manufacturers is the evidence given by some of those who were heard by the commissioners. For example, Henry Allen, trading under the name of the Nella Electro Plating Enameling & Motor Body Works, petitioned for additional duties on handlebars, seat posts and rims, plated and finished, but not in the rough. He stated: "The Dunlop Company has been making cycle rims, but not motorcycle rims, for some years. A new process has recently been introduced abroad by which the polishing of rims is done automatically. There are many who have started in the cycle industry, but more is done by numerous small shops than by large concerns. The builders chiefly assemble the parts. We are electro-plating and enameling about three thousand bicycles a year for the trade. Most of the parts necessary for the bicycle trade are classified in the Australian tariff at 5 per cent. and free. We have practically ceased building rims for the past three years, on account of the introduction of polishing machines."

### American Machines in Favor

Alfred G. Healing, an importer of motorcycle fittings and a builder of motorcycles, of Melbourne, testified that his business had not been profitable. He stated that he imported all his motorcycle parts, and that there were no motorcycle engines made in Australia on a commercial scale. He further stated: "Motorcycles chiefly come from England, but at the present time they are coming from America. We were quite satisfied with the duty as it was up to the end of last year, but since the American machine came on the market it has upset things. We would have to ask about $65 more for an English machine similar to the American than we now ask." He added that from July to December, 1913, the proportion of American machines that came into Victoria were 9 per cent., the balance being British.

# HOW I BUILT MY PORTABLE GARAGE

## Details of a Thoroughly Practical Motorcycle Housing Which Cost Only $15

By R. A. HIGGS

THIS Fall when I began to think about building a garage for my motorcycle, I was uncertain as to what size and style to make it. There was also the question of portability combined with a rigid structure. I have no doubt that there are plenty of other riders in the same position and I hope that this article will be a help to them in making a decision.

After some little thought I decided upon a house 8 feet long by 4 feet wide. By making a peak roof, the garage or house has a very neat appearance when erected in a small suburban lot, and also allows ample headroom. The height of the sides to the eaves is 6 feet and the peak is 6½ feet. The pitch is ample to throw off rain. The garage can be taken down very easily, a necessary feature when one is renting a house and grounds. The floor is made in one section and the sides and back are built separately and hooked together. The roof is a unit and is hooked to the sides.

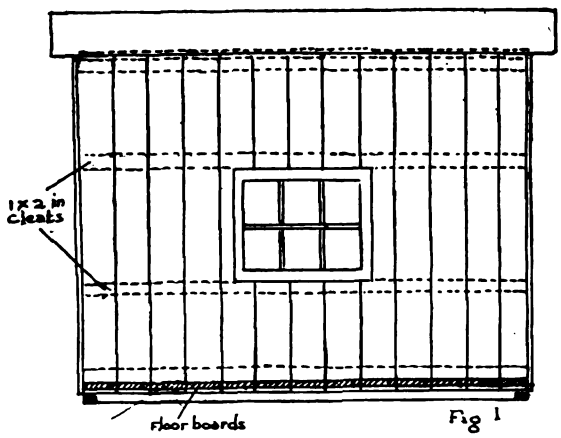

Fig 1

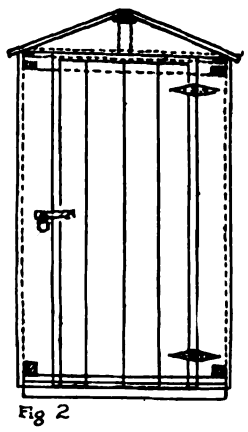

Fig 2

### Floor and Side Details

The frame for the floor is made of two pieces of 2 x 2 inches, 8 feet in length for the sides and 2 x 2 x 4 feet long for the front and back. All framework is of spruce, which is low in cost and answers the purpose very well. The corners should be half-lapped and well nailed. A piece cut a little less than 8 feet long is then nailed lengthwise inside of the frame to strengthen it, as in No. 3.

The flooring, sides and roof boards are of

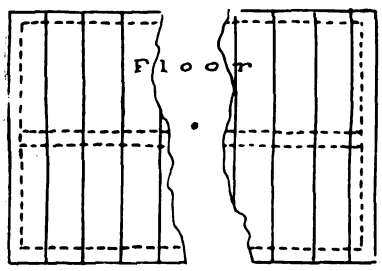

Fig 3

tongued and grooved yellow pine, 1 x 8 inches, and if bought in 12-foot lengths will cut up very nicely without waste. The floor boards are cut in 4-foot lengths and nailed across the frame, as this makes the floor more rigid than if nailed lengthwise; and the 12-foot boards can be cut in three pieces each, without having any ends left over. They should be nailed heavily to the frame and also to the center piece.

### Floor Should Be Raised

The floor should then be raised off the ground about 4 inches by placing building bricks under each corner and also along the middle of the sides and center piece. This will allow air to circulate under the floor and prevent rotting of the wood and keep the floor from sagging.

In building the sides and back, cut four pieces of 2 x 2-inch 8 feet long, which allows two pieces for each side. Then cut two pieces 4 feet long for the back. These pieces are cut out half on each end so that when the sections are hooked together the frame pieces will half-lap over each other and prevent the back and sides from leaning in toward each other. Next cut the number of boards needed for the sides and back into 6-foot lengths, which will make two lengths of each 12-foot board and leave no useless short ends. Allow room in one side for a window 2 feet 5 inches long by 24½ inches high, to be placed in the center as shown in No. 1.

### Erecting the Framing

Nail the boards to the frame pieces, placing the top frame piece about ⅜ of an inch from the top end of the boards, and the bottom piece 1½ inches from the bottom of the boards; nailing the boards running up and down. In placing the top frame piece down ⅜ of an inch from the top room is left for the frame of the roof, so that when the roof boards are nailed on, the roof will set down snug to the sides as shown in No. 2. By bringing the bottom piece up 1½ inches from the bottom edge of the boards, the sides lap down over the ends of the floor boards and a little over the floor frame as the side frame pieces rest on the floor. The reason for doing this is so that when it rains the water will not seep in between the floor boards and the frame they are nailed on, thereby causing them to warp and rot. Construct the back in the same manner.

Then hook the sides and back together, setting the bottom frame pieces on the floor and allowing the boards to lap down over the floor. When these are set up cut a piece of 2 x 2-inch stock 4 feet long for the front. This should be cut half-lapped on the ends so that when hooked to the top frame pieces of the two-sides it will lap over them and hold the sides together on the front. A piece of 1 x 2-inch stripping is then screwed to the front end of the floor and two lengths of board 6 feet high are nailed onto this strip and the top piece just put in, putting one board on both sides of the front, thus forming the doorway. They should be nailed so that the bottom end will come down as far as the sides. Then put screws through where the front and back boards lap over the two sides so as to make the corners good and tight, and not leave open cracks. The door will be about three feet wide, allowing plenty of room to get in and out with the motorcycle.

The roof is built in one section and can be lifted off, as it is built separate and hooked to the sides. The frame for the roof is made of 1 x 2-inch stripping. Cut two pieces 8 feet long to run along the sides, and two 4 feet long for along front and back. The flat (or 2-inch side) of these pieces should rest on the top frame pieces of sides, front and back, and set down inside the top ends of the wall boards all around. The corners of this frame should be half-lapped for rigidness, and the two long 8-foot pieces should be bevelled on the top where they set against the side boards to allow for the pitch of the roof, so it will set flush with the tops of the side boards.

To make the front and back boards which form the peak, cut two lengths of board 4 feet long as shown in No. 4. Draw a line down the center and then at the top measure an oblong 2 inches wide, which will be one inch both ways from the center. Make this ⅞ of an inch down from the top (No. 4). This is to be removed to allow the ridge beam setting in it. Cut the pitch as shown by the dotted lines.

### Ridge Beam and Roofing

For the ridge beam cut a piece of 2 x 2 9 feet long, to allow for a front and back overhand. (The garage is 8 feet long inside.) To this is nailed two strips of

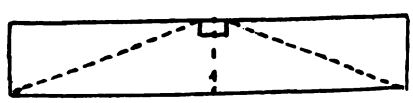

Fig 4

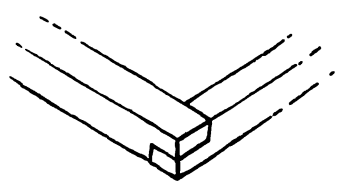

1 x 1-inch stock 8 feet long on each hide flush with the bottom. Before these are nailed on they should be beveled on top to allow for the pitch of the roof boards. The boards are nailed to these strips and come up flush with the top of ridge beam but

Digitized by Google

are not nailed on top of ridge piece (No. 2). On account of overhang, short ends of above stripping will have to be nailed on the ends of the ridge beam.

The roof boards are next cut 27 inches long and nailed to this frame, having a little overhang on both sides. Any good roofing paper is then nailed over this, lengthwise, with a good lap extending over the peak and ridge beam and far down enough on the other side to prevent rain working in. While constructing the roof a short block of 2 x 2-inch stock about 4½ or 4¾ inches long should be nailed on the inside of the front and back peak boards, being nailed to the ridge piece and the roof frame, as shown in the dotted lines in No. 2.

The outside frame of the sash is made from 1 x 2-inch stripping. Cut two pieces of this material 29 inches long for the length and two pieces 24½ inches long for the height. These should be half-lapped on the corners to prevent warping. Then cut off three pieces of ½ x ⅞-inch stripping 2 feet long; these should be nailed lengthwise on the back of the frame with the ⅞-inch side flat to the frame. One piece is put midway between the top and bottom of the sash, nailing at the ends while the other two pieces are to be nailed along the top and bottom, drawing them in toward the middle about ⅜ of an inch from the inside line of the frame. These pieces are to hold the glass.

Next cut another piece about 25 inches long that will fit snugly lengthwise inside of the frame. This piece should be set with the ½-inch edge to the middle piece, allowing a little space both sides of it for the glass to set against. This is to be nailed in by driving nails through the back piece and is used to separate the top and lower glass. Cut four more pieces about 10 inches long to be nailed up and down, placing them 8 inches apart. Brads should be used to fasten these short pieces in. The glass is then set in and held in place by glazier's points, then puttied along the bottom.

By following these instructions, anyone handy with tools should be able to build a good, substantial garage, thereby saving a considerable sum on the cost of a manufactured motorcycle house. I give the bill of materials below; the cost will be around $13 or $14:

30 yellow pine boards, 1 x 8 in., 12 ft. long
8 pieces of spruce, 2 x 2 inches, 16 feet long
4 pieces of spruce, 1 x 2 inches, 16 feet long
2 pieces of stripping, 1 x 1 in., 10 ft. long
1 piece of stripping, ½ x ⅞ in., 16 ft. long
19 feet roofing paper, 3 feet wide
12 hooks and eyes
2 pairs of hinges, hasp and padlock
1 quart of paint
5 pieces of glass, 8 x 10 inches.

# DUTCH ARMY MAKES EXTENSIVE USE OF CYCLES

## Increase in Numbers Follows Expansion of Netherlands' Field Forces

By W. VAN STRAATEN

HOLLAND is living through a period of rapidly-increasing interest and enthusiasm for the sport of motorcycling. To a great extent, this movement has been caused by the present unusual military activity, for the Dutch army is making extensive use of motorcycles and bicycles. Before the war broke out, the army of Holland numbered about 400,000 in all branches, and even during the first year of the struggle, the establishment was unchanged. However, the military authorities have judged it necessary now to extend the national defense, and all young men who have been exempt by having a brother with the colors or who were not drawn by lot have been notified and are being trained in various parts of the country.

By this measure, the active force has been increased from 400,000 to 700,000. The authorities say that this step has been taken to enable the men of the older classes to go home on short leave without weakening the national defense, but pessimistic people see it in an approaching danger of war. Some even hold out that the extension of the Dutch army is due to the pressure of British authorities, who wish to see Holland enter the arena against the Central Powers. In such a case, the 700,000 men would come in handy to sweep back the Germans in Belgium, and at the same time to open a campaign against the Essen district, where the big Krupp guns are manufactured.

### Big Army Is Costly

Apart form the fact that if these suggestions are correct or not, it is a remarkable thing that a nation with six million men is keeping an army of 700,000 in the field, while in America, with one hundred millions, there is only a force of 70,000 to 80,000. I think, however, such a large army is not to be envied, as it costs an enormous amount of money to maintain in good trim, and it certainly puts a heavy burden on the population of the country. I am told that it costs the Netherlands one million a day to maintain its army. But they have to have an army, being in a far more precarious position than the United States is.

Now, this expansion of the army has created many new motorcycle detachments, and has made place for a new staff of despatch riders, all provided with mounts. An important factor in the favorable development and extensive use of both motorcycles and bicycles both by the military and civilians is the excellent condition of the roads all over the country.

Since the European war broke out the Dutch army has been mobilized during the first days of August. In addition, automobile, motorcycling and cycling detachments were formed by volunteers to lighten the task of the military authorities. Most of these volunteer motorcyclists did service as dispatch riders, because much had to be done, and evidently they have been very welcome to the general staff of the army. After the first period of inquietude, caused by the siege and fall of Antwerp, and the possible consequences which might arise, the Holland military authorities favored the motorcycle more and more.

Motorcycle and bicycle manufacturers have received extensive army orders. The bicycles are all made in Holland, but many foreign-built motorcycles are used. For instance, the Indian, Harley-Davidson and Henderson are extremely popular, while the English Douglas and Scott and the Belgian F. N. are liked very well. The F. N. factory is at Liege, and is in the hands of the Germans now.

# MOTORING IN THE REALMS OF THE MIKADO

## By MAJOR GEORGE H. R. GOSMAN—Part 3

*Final Installment of the Story of An Interesting Tour Along Japan's Historic Highway from Tokio to Kyoto, the Ancient Capital*

ON all sides the prospect was superb. Around were the sunny, green-clad mountains, and at your feet lay the lake, the town and a canal that seems to run straight toward you. Close to the Miidera is a small house which shelters a celebrated bell, very prettily situated in a grove. There is a well-known story connected with this bell to the effect that a wonderful retainer of a feudal lord carried it from the top of Hiei mountain to this place, and then amused himself by ringing it all night long, to the great discomfort of the priests. The priests in despair offered to do anything for him if he would only stop ringing the bell and bring it back where it belonged. So this retainer said he would comply with their wishes if they would make him all the bean soup he could eat. It is told that the priests did as he wished. (If you could hear the bell you would not blame them.)

We stayed only long enough to learn the story of the bell. It gave me much satisfaction to have seen the bell because I had read so much of the retainer and his famous exploits and seen him depicted so often in Japanese drama that I was really interested. You may, if you wish, read of him in innumerable tales of Japan.

By this time it was nearly four and we thought we had better turn towards the hotel, so we headed for Zeze once more. Reaching the hotel I bade goodbye to my friend and had supper alone. The next morning I was away at six and after another of those trying street traffic propositions in getting into Kyoto I rolled into the court-yard of the Kyoto hotel, my destination, glad of the prospect of a good European breakfast. The distance from Tokyo to Kyoto is only three hundred and thirty odd miles, but I had gone considerably more than that and the good old machine had behaved like a trump.

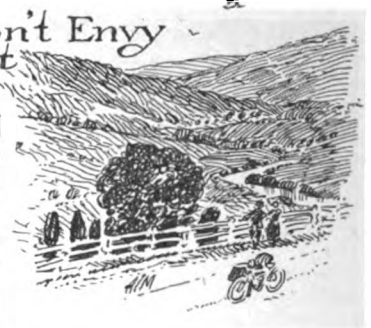
# How My Sidecar Made Me a Booster

## Some of the Reasons Why I Don't Envy the Self-satisfied Automobilist



By John Anderson

BEING the owner of a motorcycle and sidecar—my dearest possessions in the world, excepting my wife of course—I take great pleasure in boosting whenever I get a chance. I have ridden motorcycles for the past four years, and can honestly say that my enthusiasm has grown steadily. I cannot conceive of anything more economical in the way of a conveyance, and as for pleasure and recreation—well, all the boys know as much about those points as I do.

My wife and I are on the go nearly all the time in our combination. During the summer just past we made a trip through the Berkshire Hills, and over into Massachusetts, then down to Little Rhody. It was my wife's first long ride, and she enjoyed every mile of it. We had no trouble at all.

### Meets All Requirements

Lots of times I have been asked why I don't buy a small car, and I always answer that I do not need one. They argue that I could have more comfort with a light automobile, but I don't agree with them. I can't imagine anyone getting more comfort than we derive from our sidecar outfit—and the outlay is so low as to be entirely out of the light motor car class. I average 35 to 40 miles on a gallon of gas, and the tire expense is very small when I consider the amount of riding I do. Whenever I pass an automobile on the road I think just as much of my outfit as the automobilist does of his—and maybe more.

Sometimes one of the critics will argue that I can't get over the ground fast enough with my passenger aboard, but that is just where I fool 'em. Last Labor Day I was going to a town 17 miles from my home, and a friend was making the same trip in a motor car. When we pulled out he remarked that he would wait for me at the journey's end, and I simply smiled. He took a handicap of 10 minutes on me, but I caught him before he reached the destination. A day or two later he met me and admitted that my old chugger could certainly "go some."

### Not Afraid of Rough Roads

Once in a while I find some one saying that I have a hard time of it on rough country roads, but there I fool 'em again. I made a trip from my home town this summer of about 35 miles, and the course was rough and sandy throughout. I had my wife in the sidecar, and completed the trip without trouble.

"Why, it's about all a motor car can do to get over that route," harped the knockers; "you must have had a terrible time."

"Just make it worth my while, and I'll do the stunt again under observation," I replied, and that silenced all hands.

Some of my friends bring up the point that we must have to suffer great discomfort in bad weather, but they are wrong once more. When a storm comes up we make a halt, and I put on a raincoat, rubber hat and long rubber boots, which I carry in the sidecar. My wife uses a storm cover on the sidecar (the cover being marketed by the Rogers Mfg. Co.), and thus she is fully protected. There is a flap where she puts her head through, with snap buttons to make it fit snugly around the neck Thus equipped we have weathered many a storm and been none the worse for the experience.

### Preferable to an Auto

I have heard it argued that a sidecar outfit does not make a very impressive appearance on the road, but people who argue that way are simply talking without knowledge of their subject. As a matter of fact, I would not exchange my sidecar outfit for any of their tin buggies, as my wife and I call their small automobiles. In other words, I prefer a really good motorcycle outfit to a half-rate motor car, and I know that thousands of folks throughout the country agree with me.

"But you can carry only one passenger," say some of the critics.

True enough, but one passenger is all I want to carry. If I wanted to tote a big load over the roads I might have invested in a truck.

Many times remarks have been passed about town concerning how wifie and I enjoy ourselves, and in spite of all the arguments that have been raised the kickers must admit that we do get a lot of real enjoyment out of the combination—and at very small cost. That's a big point that they simply can't get around.

### Getting Maximum Pleasure

During the summer we turn out early every Sunday morning and hit the road. Gee! but it makes a fellow feel like a king to buzz along through pleasant country in his own little outfit. If you don't think so, just try it. When the glorious fall weather comes around we make the most of it; through valleys, over hills—everywhere, and always with the knowledge that we are getting maximum pleasure for *minimum* outlay. Can anybody beat that?

When we finally have to put "old faithful" in the barn for the winter we continue to get pleasure out of looking at the hundreds of photographs we have taken with our camera during the summer. A camera, by the way, ought to be part of the equipment of every motorcyclist—more particularly if he uses a sidecar. We also spend a lot of time in looking over road maps and planning trips for the next summer. Then when spring comes again we bring the outfit out, tune it up and start the fun all over again.

### Delivers the Goods

I advise every rider who can find a congenial passenger to get a sidecar; it certainly adds to the pleasure of roadwork. It stimulates sociability and helps a rider to make friends, and the first cost is quickly forgotten when the pleasure begins. Above all things, boys don't let anyone tell you that a light motor car will give you better service or more recreation. There's nothing to that argument, and I have proved that to my full satisfaction. Stick to your sidecar outfits, and you can continue to enjoy the outdoors just as thoroughly as the most uppish automobilist—and always with the knowledge that you don't have to mortgage your home to do it. I'm a red-hot sidecar booster because my combination has "delivered the goods." Anyone can obtain the same delightful results if he will approach the matter as we do—with the determination to make the most of every hour of sunshine. Try it, fellows, try it; and finally if you wish to come back and contradict me I'll have to back up. But you won't come back to kick. You'll be boosting just as enthusiastically as I am.

# NEW HOME OF WESTING CO. ONE OF THE FINEST IN COUNTRY

INDIANAPOLIS, Ind., December 7.—Announcement has just been made by G. H. Westing, presidentt of the G. H. Westing Co., of Indianapolis, that the firm has closed the lease for the University Square Building located at the corner of Vermont and Pennsylvania streets, where it will open this week one of the finest stores in the United States devoted exclusively to the sale and repair of motorcycles and accessories. The annex now located at 325 N. Delaware street, will be moved to the new location.

The University Square building is one of the finest locations in the city for the motorcycle and bicycle business. It is north of the center of the business district, but still in close touch with the trade. The new store will occupy 20,000 square feet of floor space, and will have almost twice the number of square feet of floor space as the old location. In addition to the sales floor, which will include the wholesale department, a basement running across the entire building will be used by the firm for storage and the rebuilt motorcycle department.

Across the front and down the side of the building, in four foot letters, an electric sign is being installed that will apprise the public of the fact that the Westing Company sells Indian motorcycles and Arrow bicycles. Just over the store windows another electric sign will be installed. These lights will burn each night until eleven thirty. These signs, which are facing University park and Meridian street, the most traveled street in the city, can be read for several squares away.

### Excellent Lighting Provisions

The entire outside of the building is made up of large display windows that extend from the ceiling to the ground. These windows have had hardwood floors, and will be used for the display of the Indian machines and sidecars. Eight windows all told will be decorated and trimmed at all times. Down the side of the building a flower bed has been planted with a walk between it and the windows.

Along the south side of the salesroom show cases and wall cases are being installed, made especially for the cycle trade. Behind these cases the extensive parts department will be placed, while the wholesale department will take up the balance of the south portion of this large floor.

A space taking in some five thousand feet will be used in the front part of the room for the sale of motorcycles alone. This part of the room will be finished with leather settees and rugs of the sort used in automobile sales rooms. A desk for each salesman will be provided. To the rear of the office, which will be located in the north side and towards the rear of the sales floor, will be the repair shop where only customers' work will be done. The rebuilding department will be in the basement of the building, where a large room has been painted and equipped with the latest machinery for putting the machines back in good shape. An enameling oven is being put in place, and in accordance with the rules of the firm every stock machine will be re-painted before sale.

The front part of the basement is already occupied by a stock of bicycles and old motors. An electric elevator gives easy access to this part of the basement and will handle any shipments which the company might receive. As soon as the arrangements in the new store have been completed the company will hold a reception to all the riders.

## LONDON HENDERSON AGENT VISITS FACTORY

DETROIT, Mich., December 4.—J. Robertson Brown, of Robertson's Motors, Ltd., London, Eng., has just completed a visit to the factory of the Henderson Motorcycle Co., of Cass avenue, this city, and has left for the East to take ship home to London. He placed an order for 63 Hendersons during his visit. Fifty-two of this order are two-speed models.

Mr. Brown is the head of Robertson's Motors, Ltd., which firm is Henderson agent in London. He states that the company has had remarkable success with the four-cylinder American-built machine, and his trip had for one of its objects the making of arrangements which will insure a plentiful supply of the new models during the 1916 season. He reports that the demand for four-cylinder models has been such that several English factories are contemplating bringing out such models.

# THE CLUB RIDER'S BUSINESS OPPORTUNITIES

## Advertising Expert Tells Milwaukee M. C. That New Motorcycle Era Is at Hand

By PATHFINDER

THE opportunities held open to the active motorcycle club man by the motorcycle industry and the tremendous possibilities of the industry as a business proposition were set forth last week by Lacy Crolius, advertising manager for the Harley-Davidson factory, in an address before the Milwaukee Motorcycle Club, on "The Motorcycle Industry—Your Opportunity."

"Manufacturers are watching the clubs, and dealers and accessory men are watching the clubs," said the speaker. "They always have and always will keep an eye on club activity. A great majority of the prominent men in the industry have their club activity to thank for their excellent jobs.

"It's the fellow who makes his club life adjust itself to the changing conditions of the motorcycle industry that will profit by the resultant opportunities that are bound to present themselves to him in due course of time. His presence readily is noted as being leader, for instance, in the present reform movement for the uplift of the sport of motorcycling.

### Neat Costumes Desirable

"Clean and presentable riding costumes today are more essential than ever. The rider must also keep his machine attractive. Each one of us must observe more rigidly than ever the ordinances laid down to govern traffic, and must at all times respect the rights of others. We must be careful not only to avoid violations of the speed laws but also must make the closed muffler an important factor in our riding.

"Carelessness and thoughtlessness in any sport invariably brings adverse legislation which curtails indulgence in the sport and narrows the amount of freedom to be used in enjoying it.

"To survive, a motorcycle club must deliver the goods. It must do things. Its efforts along that line depend entirely on the combined efforts of its individual members. Look at our own club. We gained attention principally by the benefits we have been able to obtain for the thousands of riders, not only in this city but throughout the whole State. Despite the fact that we have only 125 members we are a force for good amongst 8,000 riders. We saved $8,000 during the last legislative session by averting an increase in license fees. We staged an exclusive motorcycle show in this city that was the talk of the industry. But these things never would have been accomplished had there not been a bunch of active members in our club.

### Just Getting Started

"Motorcycling as an industry is just getting started. The dealers and manufacturers have only been taking off the cream of the business. They are merely scratching the surface. People that have regarded the motorcycle business as a sport are beginning to have a different viewpoint. The sporting end of the motorcycle trade is destined to be the smallest. It is in the commercial side that its future lies. Public service corporations are just beginning to see the value of the motorcycle.

"The recent ruling of the Postmaster General, in which he recognized the motorcycle and sidevan to be a vehicle on a par with the automobile, is one of the greatest tributes ever paid the motorcycle, considering the comparison of weights and powers between the automobile and the sidevan outfit.

"Let us not use the clubrooms merely as a meeting place. Make it a place for serious organized business. President Coffman, of the F. A. M., frequently makes use of the expression, 'You get out of the club what you put into it,' and that is the principle

S. Lacy Crolius

which should govern club activity. Make the clubhouse the place where plans are laid out for big constructive work.

"I believe implicity in what I call the Big Idea. Whatever we do to boost the sport of motorcycling will bring its returns in the rising standard of the motorcycle industry.

### Position of the Club

"The motorcycle club should be your stepping stone to bigger things. Other men have done it. Why not you? Don't hold an obscure place in club activities and thus bury your identity.

"Fellows, the club is your opportunity. The men who are destined to make successful the coming Milwaukee motorcycle show, the coming dance or theatre party are the men who will demonstrate to the industry at large their aggressiveness, their ability to organize. They will, I believe, be the men who will be reckoned with later on in high places in the industry.

"Whose turn is it next? It will be the rider who is representative of the new era of motorcycling, the clean rider. It's up to you."

---

### KENNET GETS GOLD MEDAL

St. Louis, Mo.—Press G. Kennet has just received his sixth consecutive gold medal, awarded annually to a member of the St. Louis Cross-Country M. C. for the best attendance throughout the year at the Club's Sunday runs. The medal was donated, along with four others, for various purposes, by dealer John Hurck, as has been his custom each season.

---

### BONFIRE RUN A SUCCESS

Newark, N. J., November 29.—The New Jersey M. C. of this city and the Indian M. C. of New Brunswick, held a joint bonfire run to Seidler's Beach yesterday. Fourteen members from the New Jersey and seven from the Indian club participated.

On arriving at the Beach, all hands set to work to gather driftwood and building fires over which potatoes, sausages and steaks were cooked. Thermos bottles full of hot coffee accompanied the repast. After the meal was over a stone-throwing contest was organized, in which Axel Leach proved the best of the party in breaking bottles with the rocks. An impromptu football game was next got up, using four hats strapped together for the ball. The Indian M. C. team won this match, the score being 24 to 12. The feature of the match was De Hart's tackle of Leach in the cold waters of New York bay. Owing to shortness of wind due to violent playing, only one half was played.

The return trip was made via New Brunswick, where the New Jersey riders were the guests of the Indian M. C. Refreshments and talk passed the time until the dusk warned the Newarkers that it was time to ride homeward. The success of this affair was such that a series of joint runs will be held until the roads are covered with snow. A run to Flemington is scheduled for December 5.

---

### THOR CLUB RUN OFF

St. Louis, Mo.—The annual 140-mile endurance run of the Thor M. C. of this city, has been called off because of the failure of dealers to support the affair. Twenty entries had been obtained and the route mapped out embracing the roughest roads between this city and De Soto.

---

### CREAM CITY CLUB DISBANDS

Milwaukee, Wis., Nov. 27.—Lack of interest has caused the Cream City Motorcycle Club to disband. This was a separate organization from the Milwaukee Motorcycle Club, and was composed mostly of riders living on the south side.

---

### E. J. TERHUNE SUCCUMBS

Hackensack, N. J.—E. J. Terhune, brother of J. W. Terhune, Harley-Davidson agent, died on November 4 as the result of injuries incurred in a collision with a moving van which was moving along the road without lights during the night of October 29. He suffered a compound fracture of the skull and had a leg broken in three places. In spite of the best care, Mr. Terhune succumbed to his injuries five days after the accident.

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## SEPTEMBER SHOWS HEAVY EXPORT GAINS

### Fourteen Times as Many Motorcycles Shipped Abroad as in Same Period of 1914

THE number of motorcycles exported from this country during September, 1915, was over fourteen times the number shipped during September of last year. The increased number of bicycles shipped over last year continued to be phenomenal during September of this year. In fact, a gain in every class of shipment, with the exception of shipments to Porto Rico and Hawaii is noted for the month. Imports continued to decrease, the month being lower in valuation than both September of last year and August, 1915.

The increased valuation of bicycles shipped was responsible for bringing the figures for 1915 higher than those of 1914, the first nine months showing 1915 to lead both 1914 and 1913. Shipments of motorcycles during the nine month period show 1915 to lead, both in the number of machines shipped and in their valuation. The month of September, this year, shows a lower valuation for shipments to the Hawaiian Islands than the valuation set in August, 1915, but is in excess of the shipments made during the month of September, 1914. Porto Rico shipments for the month show a gain over both September, 1914, and August, 1915. A loss, however, is noted in the shipments to the Philippine Islands, when compared with September, 1914, and August of this year.

#### Comparative Figures

During September, 1915, motorcycles to the number of 1,683, and valued at $355,811, were exported from this country. During September, 1914, the number totaled but 118 machines, with a valuation of $26,703. The figures for the month of August, 1915, showed 1,744 machines, valued at $398,792. For the first nine months of 1915, ending September 30, show 11,859 motorcycles shipped, valued at $2,261,200. During the period in 1914 a total of 5,820 machines was shipped, with a valuation of $1,131,302, while in the 1913 period 3,459 machines were shipped, valued at $662,042.

Bicycles to the valuation of $79,727 were shipped during September of this year, as compared with a valuation of $19,249 for September, 1914, and $82,454 for August, 1915. The nine months period continues to show 1913 leading, with a valuation of $537,212, but the figures set in September of this year make it possible for 1915 to lead 1914 with a valuation of $443,209, as against $392,129.

#### Imports Show Decrease

Imports reached a valuation of $2,018 during the month. September of last year showed a valuation of $3,644 and August, 1915, a valuation of $2,053. The nine month period shows but $31,131 to be the value of motorcycles and bicycles imported into the country, as against a valuation of $168,701 for 1914, and $134,827 for 1913.

There remained in the warehouse September 30, 1915, motorcycles and bicycles to the value of $1,050, the same valuation shown as of August 31, and July 31. On September 30, 1914, the valuation was $284. Imports received to be shipped to other countries show a valuation of but $10 for September, 1914, as compared with $200 for August, 1915, and $200 for September, 1915. The nine month period shows a valuation of $456 for 1915, and $995 for 1914.

#### Hawaiian Shipments Off

Hawaiian Islands shipments show a loss for September, 1915, when comparing the month with September of last year, but a slight gain when compared with August, 1915. The valuation for the month was $4,451, as compared with $3,593 for August, and $7,738 for September of 1914. The nine month period shows $89,503 for 1913, compared with $51,784 for 1914, and $58,374 for 1915.

A gain is noted in the valuation of shipments of motorcycles and bicycles made to the Philippine Islands during the month of September, 1915, when compared with September of last year and August of this year. September of this year shows a valuation of $6,374, as compared with $4,022 for September, 1914, and $5,622 for August, 1915. With a valuation of $53,511, the first nine months of 1913 lead 1914 and 1915, the figures for the last two being $52,138 and $40,212, respectively.

A loss is noted in the shipments to Porto Rico, the month of September, 1915, falling behind the figures for September, 1914, and August, 1915. The figures were $1,684 for September of this year; $3,086 for September, 1914, and $2,687 for August, 1915. The 1913 nine month period leads with a valuation of $35,547, followed by 1914 with $29,734, and 1915 with a valuation of $16,433.

## GERMAN DEMAND TO BE GREAT AT CLOSE OF WAR

AN important point in connection with prospects for the exportation of American-made machines is brought out by the American Consul at Barmen, Germany, in a letter to **Motor Cycle Illustrated** dated October 19. He writes us as follows: "Owing to the fact that cycles are contraband of war there appears to be no possibility of importing them into Germany as long as the state of war lasts. It is my opinion that owing to the fact that nearly all automobiles and motorcycles have been confiscated by the Imperial Government for use in the war, there will be an unusually large demand for motorcycles *after* the cessation of hostilities. As it is more than probable that the German manufacturers will not be able to supply the entire demand, and as British, French and Italian manufactures will not be bought by the German public, at least for some time after the war is over, it appears that American-made bicycles and motorcycles will find a ready market."

## WEST INDIES REQUIREMENTS

We are informed by Consul H. C. von Struve, Curacao, W. I., that all motor vehicles to be used on the roads of that country must be provided with an accurately working steering gear, at least two strong brakes, working independently of each other, under the control of the operator, and one horn or siren, the sound of which is distinctly audible at a distance of one hundred and ten yards.

## WANTS CATALOGUES AND PRICES

We are informed by American Consul J. S. Armstrong, Jr., stationed at Bristol, England, that the consulate will be pleased to receive catalogs and price lists from American manufacturers of goods of all kinds. Mr. Armstrong states that, owing to the present large demand for American products, a complete file of catalogs would be of considerable advantage to be shown to local dealers desiring to be placed in touch with sources of supply in the United States.

## CRUDE RUBBER IMPORTS

Imports of crude rubber continue to show the bulk of the shipments being received from the East Indies. Out of a total of 19,671,360 pounds received during the month of September, 1915 the East Indies contributed 8,938,271 pounds. The United Kingdom shipped 5,337,322 pounds, and Brazil 4,581,341 pounds. September of last year showed a total of 14,087,980 pounds imported, while during August of this year the shipments totaled 17,060,113 pounds.

During the first nine months of the year, ending September 30, 1915, a total of 160,416,636 pounds was imported.

# Of a Personal Flavor

R. L. HARRIMAN, advertising manager of the Hendee Manufacturing Company, of Springfield, Mass., attended the meeting of the Association of National Advertisers, held at the Hotel Astor, New York, on December 1 and 2.

John J. O'Connor, formerly on the staff of the *Bicycling World*, and more recently identified with the publicity department of the Hendee Manufacturing Company at Springfield, Mass., has left for the West to assume the position of editor of *Pacific Motorcyclist*. **Motor Cycle Illustrated** wishes "Long John" the best of success in his new venture.

C. B. Brooks, of the 20th Century Manufacturing Company, of New York, states that business on the 20th Century lamps is far ahead of this time last season. He adds that foreign orders are particularly gratifying in volume and dimensions.

C. A. Persons, of the Persons Manufacturing Company, Worcester, Mass., paid a visit to New York recently, and from the happy expression he wore it may safely be inferred that the Persons firm is enjoying an excellent saddle business.

Chicago, Ill.—Louis J. Mueller, Indian dealer in Cleveland, with Col. Zimmerman, manager of Luna Park, in Cleveland, and Mrs. Mueller and Mrs. Zimmerman, passed through Chicago on their way home from a trip to the Panama-Pacific Exposition, the return journey being via Vancouver, Seattle and other important Northwest cities.

J. E. Argus is now Pacific Coast district manager for the Goodyear Tire & Rubber Company, of Akron, O., having supervision of all Goodyear business in that section. He was formerly manager of the mechanical rubber goods department of the firm. He succeeds M. E. Morris, who goes to the Akron headquarters in the sales deparment.

W. B. Tully, who was recently appointed Southern traveller for the Schickel Motor Company, of Stamford, Conn., has started off his vigorous campaign by sending in a substantial order for the Schickel Lightweight from the first town he visited.

T. A. Quisenberry, of Richmond, Va., is reporting excellent sales of the Schickel Lightweight in his territory.

E. A. Silvera, Schickel agent for Savannah, Ga., sold two Schickel Lightweights in an hour on the strength of his demonstration of the handy little two-stroker.

Edward A. Cassidy has resigned as manager of the automobile accessory department of the H. W. Johns-Manville Co., of New York, and will take up his duties as president of the Edward A. Cassidy Co. on January 1. This company is a selling organization to market the products of several parts and accessory makers.

Springfield, Mass.—J. L. Seidell, recently transferred from the Kansas territory to New England, as factory salesman for the Indian, has been placed in charge of sales promotion work and is to have general direction of such matters from factory headquarters, covering New England to begin with and added territory later.

Cleveland, Ohio, Dec. 3.—E. P. Dowse has just been made manager of the Cleveland branch of the Federal Rubber Mfg. Co., succeeding H. J. Couturier, who has been transferred to the company's Minneapolis branch.

Charles W. Mack, of Reno, Nev., has been appointed F. A. M. Commissioner for Nevada.

Howard R. Hunter has been appointed local F. A. M. commissioner for Pomona, Cal.

C. A. Shepperd, of San Diego, Cal., has been appointed F. A. M. local commissioner for San Diego County.

## MILLS GOES TO NEW ORLEANS

WASHINGTON, D. C.—The National Capital Motorcycle Club is mourning the loss of one of its most faithful and efficient workers in the person of Fred M. Mills, F. A. M. Commissioner for the District of Columbia and secretary of the National Capital club.

Recently Mr. Mills was offered a lucrative position on the staff of the New Orleans *Picayune*, one of the leading newspapers of New Orleans, La. This offer was so attractive that it overcame his scruples against leaving his Washington sphere of influence and he left for his new position on December 1.

At the last meeting of the National Capital Motorcycle Club it was decided to recommend J. B. Darroch to the officials of the F. A. M. as successor to Mr. Mills in the position of F. A. M. commissioner. Mr. Darroch is an ardent motorcyclist and an active member of the National Capital Motorcycle Club, having often served in the capacity of assistant to Mr. Mills. F. E. Thornhill was elected secretary.

## MORE CLUBS AFFILIATE

Among recent additions to the long list of affiliated clubs, the F. A. M. secretary announces the Albuquerque, the Wichita Falls and the Enid M. C. The first club is at Albuquerque, N. M., and H. S. Wolking is its secretary. The Wichita Falls club it at Wichita Falls, Texas, its secretary being F. W. Hanmer. The secretary of the Enid club is J. A. Olinger, Box 365, Enid, Okla.

## HARLAND SIGNS UP TWELVE

DAYTON, O.—W. A. Harland, traveler for the Davis Sewing Machine Company, reports signing up twelve new agents for the Dayton Motor Bicycle and motorcycle line in Ohio. These are: J. G. Dieffenbacher, Fostoria; S. O. Sprout, Tiffin; F. C. Scott and Kendall & Kayler, Alliance; Barber Cycle Co., Sandusky; Scott's Cycle Store, Marion; Neidhart & O'Brien, Mansfield; P. Slack's Sons, Springfield; L. P. Birckenbach Co., Columbus; W. J. Grube, Delaware; Stanley H. Reed, London; Monnot & Sacher, Canton.

## HAVE KOKOMO IN TACOMA

TACOMA, Wash.—The Kimball Gun quarters, covering New England, to begin cycle tire in addition to selling the Kimball bicycle in this county. The store has been making the Kimball cycle since Tacoma was first started.

## CENTER OF ATTRACTION DURING FAIR WEEK PARADE

# With the Manufacturers

## HAVERFORD BUILDINGS PROVE INDUSTRY'S GROWTH

ONE of the most convincing proofs of the growth of the motorcycle and bicycle industry is to be found in the new five-story buildings of the Haverford Cycle Company, at 503 Market street and 4-6 North Fifth street, Philadelphia, Pa. The structures are located on the Quaker City's main business thoroughfare and are most complete in themselves for the purposes to which they are devoted.

Commencing about 18 years ago in a small store at 827 Arch street, Max M. Sladkin developed the business step by step. In course of time branch houses of the Haverford Cycle Company were established in Washington, Norfolk, Detroit, Buffalo, Cleveland, Newark, Atlantic City and Philadelphia. During the past two years business has increased to such an extent that the two new five-story buildings were necessary in order to adequately house the company and give it the requisite facilities to transact an even larger volume of business.

It has been due to the keen insight of Max Sladkin, president of the firm, and to his honest policy and untiring efforts, that from the small beginning the Haverford Cycle Co., has grown to its present proportions, admittedly one of the largest of its kind in the country. Step by step the various departments have been adjusted to meet the company's requirements, with the result that the keynote of the institution is service. Extensive purchasing has resulted in the Haverford company being ready at all times to offer the trade merchandise of quality, while such has been the system in all departments that these are marketed at an honest price. Formal opening of the new buildings will be held December 15.

Max Sladkin

## CONTROLS REEPS HORN EXPORTS

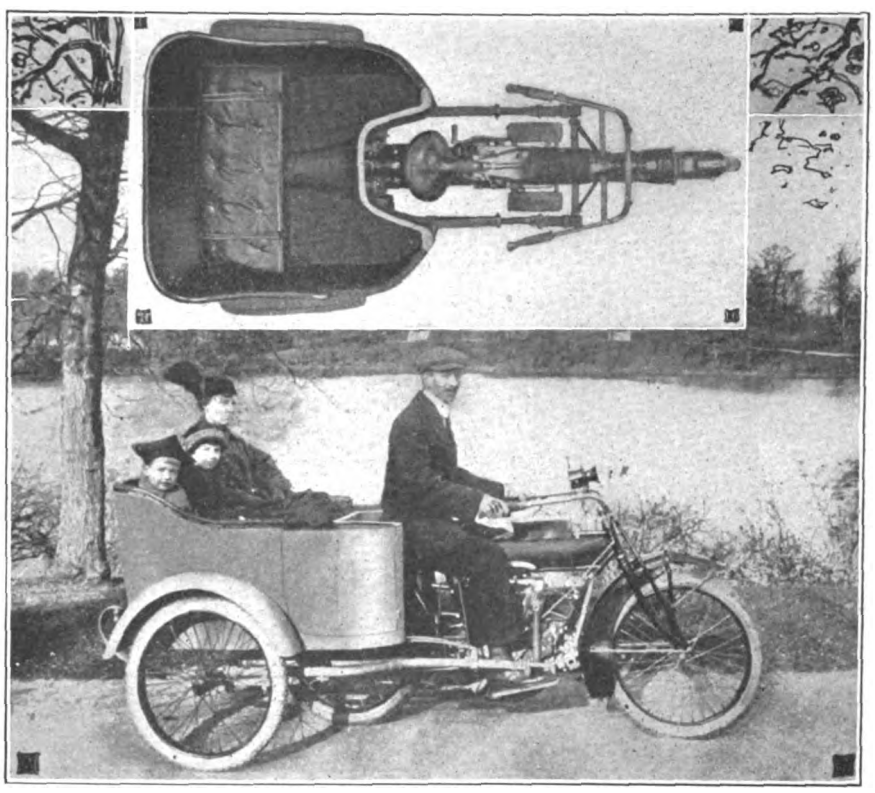
NEW YORK, N. Y., December 6.—The H. F. L. Funke Company, of 116 Broad street, this city, has contracted to take charge of all export business for the Reeps horn, the product of the Reeps Horn Manufacturing Company, 50 Church street, New York.

## PULLMANS GO ABROAD

DETROIT, Mich.—The Harry Svensgaard Sales Corporation, maker of Pullman sidecars and vans, has just shipped eight sidecars to South Africa.

## NOVEL CYGNET REAR CAR

AUTOMOBILE capacity and safety at motorcycle cost of upkeep and maintenance are features which characterize the Cygnet Rear Car, produced by the Cygnet Rear Car Company, of 1200 Niagara street, Buffalo, N. Y. The attachment, as the name implies, is fitted to the rear of the motorcycle and has a seating capacity of three. It is capable of being atttached or detached in 30 seconds, and will fit any standard motorcycle.



**Above, Top View of Rear Car Attached to Motorcycle, Showing Seating Arrangement, General Form of Body and Method of Attachment; Below, the Rear Car in Service**

The Rear Car consists of a metal body with side doors having one long seat. This seat, which is of automobile type, is well upholstered in imitation leather and is very roomy and comfortable. Plenty of leg room is allowed for in the body, but not so much as would create down draughts on the feet of the passengers. The doors are located in the angles of the sides and are ample in size.

The form of the body is such that the forward part accommodates the rear wheel of the motorcycle to which it is attached. The extreme forward section is cut away, while this portion is prolonged to form a channel extending to the front panel of the seat. The mudguards are fitted to the body and move with it. Very flexible steel springs suspend the body on the chassis and the cushion has spiral springs. Ease in riding has been paid particular attention to and the position of the body on the chassis is adjustable in order to obtain the best effect.

The chassis or frame of the Rear Car is of seamless steel tubing, with reinforcements and joints securely brazed. It consists of two longitudinal members or shafts leading forward from the axle and having flat plates at the ends. These plates fit in plates on a front bracket attached to the motorcycle, by means of clamps and screws. The front bracket is attached to the diagonal tube of the motorcycle and can be used as a footrest. It is attachable or detachable in 15 minutes. It can be adjusted at the lower and upper part to regulate the height of the shafts for any machine.

The Rear Car is made adjustable at seven points in all, rendering it adaptable to any motorcycle. The wheels are 28 inches in diameter and are fitted with 2¼-inch tires. Standard finish is dark gray. The price complete is $100, f. o. b. Buffalo.

## BUILD NEW LOADING PLATFORM

LA PORTE, Ind., November 27.—Because of a large increase in its business, the Great Western Mfg. Co. has found its present shipping arrangements inadequate and is now constructing a new loading platform at its plant.

Digitized by Google

### WESTFIELD FACTORY HUMMING

WESTFIELD, Mass., Dec. 6.—The big plant of the Westfield Manufacturing Company is humming these days with orders for bicycles, motorcycles and with the war order that was landed some weeks ago. The extra power needed for this war order work will be installed about the 20th of this month. At a special Town Meeting, held November 30, the voters decided to appropriate $5,000 for the extension of a new electric power line to the factory and the poles are already in place. The company will use at first 250 electric horse power at 2 cents per kilowat hour, which is considered a very low rate. It will enlarge its own facilities for making gas for the tempering ovens. The factory is working overtime until 9 o'clock every night.

### MODEL "45" COIL

FOR ignition at the highest speeds as well as at the lowest, the New York Coil Company, of 338 Pearl street, New York, is producing in Model "45" motorcycle coil, listing at $4.20. It is designed to operate on three dry cells and can be had with three or four leads as desired.

The model "45" coil embodies the best construction and material possible to use for motorcycle ignition coils. The casing is very neat, being of fibre, and enclosing all internal parts. The construction ensures against breakage and shifting of leads or wires by excessive vibration. All connections are made within the coil so that pulling out is impossible. Each lead is fitted with a stout terminal, and ample length of cable for standard requirements is provided.

Model "45" Coil

### GIVES ADVICE ON TIRES

EXCELLENT advice on keeping injured tires in service after they have apparently become useless is given by L. C. Rockhill, manager of the automobile tire department of the Goodyear Tire & Rubber Co., of Akron, O. He suggests that the motorcyclist or automobilist show his tire to a repairman before discarding it, in order that the latter can advise whether additional mileage is obtainable with economy.

A tire that has given good service but has its fabric weakened can be reinforced by applying an inside tire protector, while if the tread is worn down but the tire otherwise in fair condition, additional service can be had by retreading. The Goodyear tire protector is made with four plies of high-grade fabric, steeped to a feather edge, insuring an even surface which precludes all danger of tube pinching.

### GRINNELL GLOVES VALUABLE

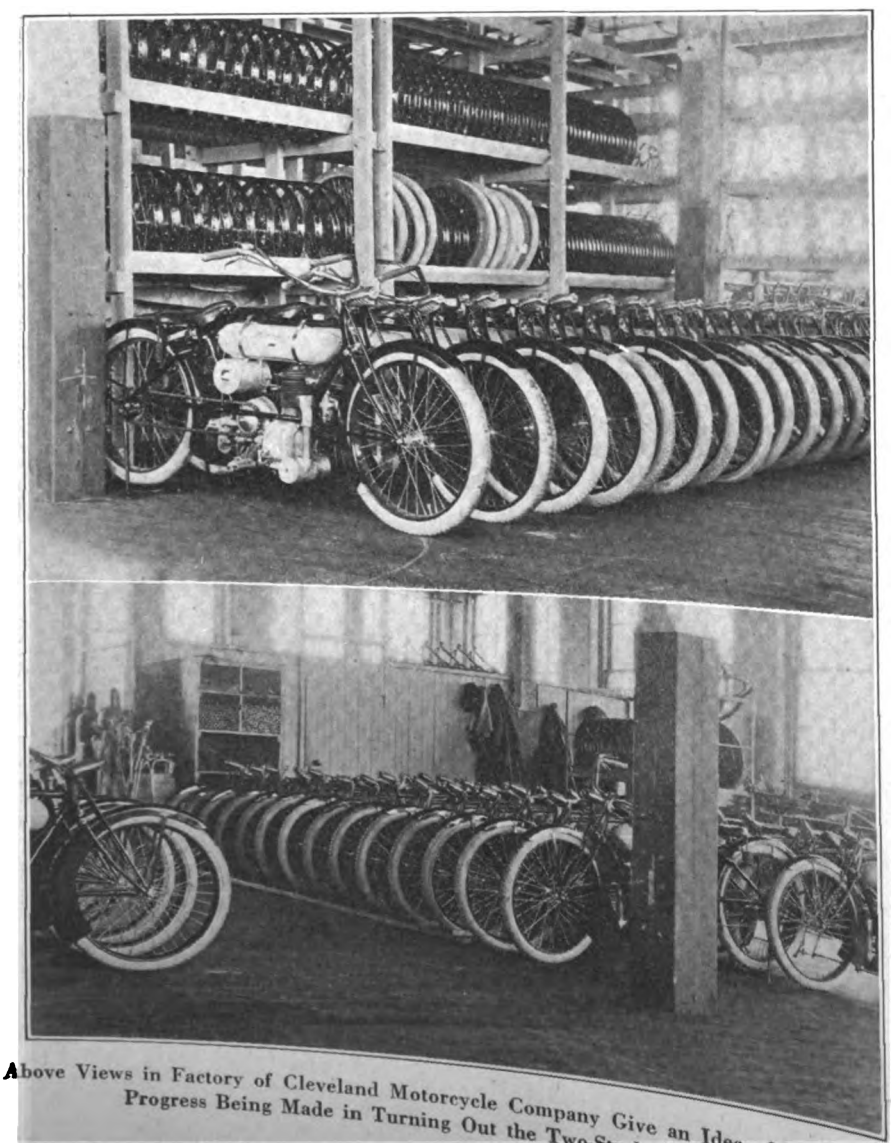
THAT driving gloves, and in particular Grinnell gloves, are among a motor user's most valuable possessions, is demonstrated by the determination of an automobile salesman after having his gauntlets stolen. He left his pair of Grinnell gauntlets in the demonstrator over night, and the next morning found them missing.

Worn gloves are not unusually considered valuable by a thief, but apparently the misappropriator considered these gloves were so. The salesman did, also, and he purchased another pair of the same make and is keeping them locked up securely.

The salesman gave as one reason for missing his gloves badly, was the washable feature, whereby a second pair was not needed when adjustments were to be made on a car. He could remove all traces of dirt or grease with soap and water without injuring the gloves. Another feature was the excellent fit of the fingers and the ventilation which prevented sweating.

The Grinnell gloves are made by the Morrison-Ricker Manufacturing Company, of 74 Broad street, Grinnell, Iowa. They can be had of dealers everywhere.

### TO INSURE DELIVERY TO CLEVELAND DEALERS FAR AND WIDE



Above Views in Factory of Cleveland Motorcycle Company Give an Idea of the Excellent Progress Being Made in Turning Out the Two-Stroke Lightweights

### VISITS WESTFIELD PLANT

WESTFIELD, Mass.—Victor Hurd, president of Hurd & Pohlman, Pope agents in Honolulu, visited the plant of the Westfield Manufacturing Company on December 1, to arrange for the 1916 agency for Rambler bicycles for his firm. He was unable to stop very long, as he had to get to San Francisco by December 7 to take the boat to the Hawaiian Island capital. Hurd & Pohlman will now have Hawaiian Islands representation for the Rambler and other Pope bicycles for 1916.

### O'BRIEN WAS HIGH GUN

SPRINGFIELD, Mass.—In the annual Thanksgiving Day shoot of the Indian Outing Club at Springfield, the highest score was made by Howard O'Brien, manager of the Parts Department, who broke 22 out of a possible 28 clay pigeons. There was hot rivalry between O'Brien and T. L. Loose, superintendent of the factory, who was next highest gun with a score of 21 out of 28. The match took place at Southwick Ponds, where the club has a permanent camp. About 15 members attended.

# WHERE MAKER AND RIDER HINDER THE DEALER

## Relating Some Shortcomings of Both and How They Can Be Eliminated

By SPOKESMAN

I AM a dealer—that necessary man in the trade who is the buffer between the manufacturer and the rider. I am and the rest of my fellow-dealers are always being handed free advice by both the other parties in the motorcycle business on how to sell motorcycles, advice that makes me smile sometimes, while at others, it gets my Angora.

Now, before I begin to roast you, Mr. Manufacturer, let me thank you for your splendid help and extensive advertising which are no mean aids to my selling your products. But, why, on the other hand, do you announce your models so soon and when the demand starts hold me up on deliveries and make me see prospect after prospect leave my place and go to a competitor whose factory *is* meeting the demand promptly? The majority of manufacturers belong to the M. M. A., so why can't you agree on a show at such a period as will enable you all to deliver motorcycles with a reasonable time?

### Waiting for Delivery

You don't realize, perhaps, that the average rider when suffering from an acute case of *riditis* can cause a dealer more worry than his debts. All your arguments for your make of machine are of little avail when once he straddles a new model, especially when he has been in a fever of expectancy for a week or so. It is just that lack of knowledge regarding the rider and his whims, Mr. Manufacturer, that keeps me in hot water for your sins and shortcomings.

If two or three of my riders suggest a change and I write you regarding it, why do you assume an attitude of importance and infer that my place is to sell your machines, not to suggest any change in design that may better it? Who is in touch with the consumer of your product?

### The Prompt Service Station

Then, too, you talk of prompt service as being a factor in retaining your customers. Undoubtedly it is, but can I afford to stock up heavily on parts when you change design from season to season, or what is worse, take the agency away from me without warning? Sometimes the prompt service lags on your end and I have a couple of heated discussions with an owner who is waiting for a replacement and blames me for the delay when it is up to you. Then, several times out of ten, your parts department will get their wires crossed and ship the wrong part, causing more delay, soreness and ill-feeling on the part of the rider.

### Concerning Police Sales

Look at the money you spend on race and runs. It may be one form of advertising, but it always makes me envious and yearn for a little of it in the way of credit when I have five or six deals all coming to a head and money is tight. You may wonder, too, why I never get the police business in my town. Truthfully, I don't want it. Rarely are motorcycles picked because of their merit; it's pull and inside influence that lands the sale. Then, the average police rider is a dub or does not care about his mount, consequently he has all sorts of trouble. Things that are not at all the fault of the motorcycle but that of the rider appear as such to the layman, causing him to steer clear of that make. Last but not least, I have to furnish sidecars when one of the officers has a day off, keep cigars and liquid refreshments for their benefit during the holidays, stand for their monopolizing the telephone, buy tickets for all their affairs and take a page advertisement in their dance program.

Candidly, is the police business worth it? Ponder over these things, Mr. Manufacturer, and be lenient with me when sales are not what they should be. Maybe your models do not hit the popular fancy and instead of blaming me for lack of energy, why not ask my aid in putting a finger on the sore spot. I am in business to make a living as well as the rest of your dealers, and want to cater to public demands.

Now for you, Mr. Rider. You are the lad who has purchased a machine from me and when something goes wrong—maybe a small adjustment will put it right—you come blustering into my place when I am clinching a sale with a prospect. Right then you howl out your opinion of the blankety-dashed machine instead of a few questions on the side. Imagine the effect it must have on a would-be rider. It has lost me several sales, but I cannot tell you what I think of you. You are my customer and courtesy pays.

### Leaving Tools About

Another cute trick of yours is to borrow tools from my repair shop and either make off with them or drop them where you finish them. In the latter case, the tools become lost and I am put to more expense to keep my stock up to date. I do not begrudge you the use of the tools, but wish that you would put them back where you found them. Others may need them after you are through.

Then Mr. Rider, you run up a bill at my place when your funds are low—repairs and accessories are willingly given you and your credit is good with me. Now, why do you ignore me when you are flush and send off to a mail-order house for cut-price accessories? They never offer you accommodations or up-to-the-minute service on holidays and Sundays just when you are about to start with the bunch and find that you need something special. Then, too, do they come across when you need donations of prizes for a run or parade? They do not! but I do. I, the dealer, am the one who helps make the affair a success, not the mail-order man.

### Illegitimate Dealing

Still another of your pleasant little ways. You use my place of business for waylaying my customers and offering them a rare bargain in your used motorcycle or sidecar. Every man who enters my place is a prospect of mine, as I pay the rent and

Digitized by Google

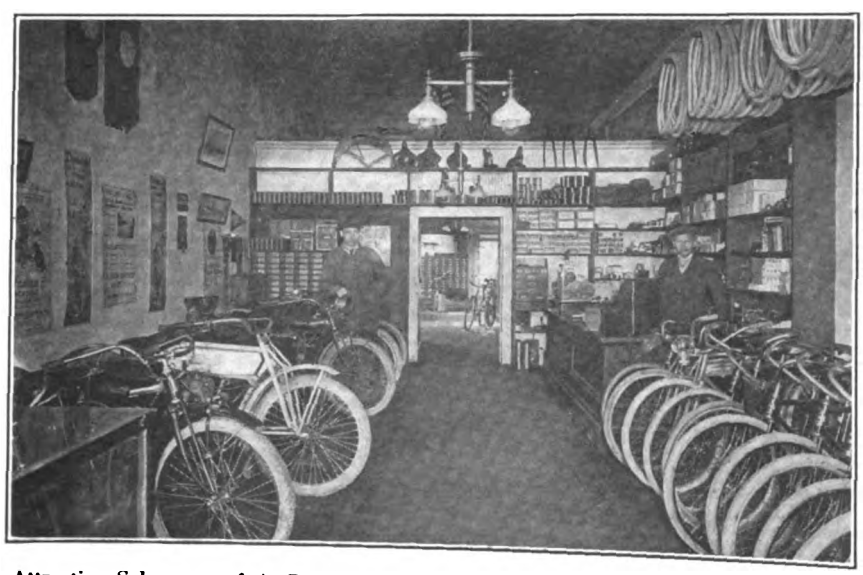
# DEALERS' SECTION

I am entitled to his trade. When you offer him your machine at an attractive figure and he accepts it, you have taken money out of my cash-register. Did you ever stop to think that this sort of dealing is illegitimate and would be stopped quickly in a piano or furniture house? It is a peculiar condition found only in the automobile and motorcycle business and should be stopped by all dealers.

Because your guarantee calls for replacements of broken or imperfect parts don't think that it includes the labor of removing the broken part and replacing it with the new one. And if the part is delayed in reaching you, do not jump on me. The factory may be slow or the express company at fault and I totally innocent of blame; still I am the receiver of your harsh words and black looks.

Some time back I read an article in **Motor Cycle Illustrated** on gasoline sales and the motorcycle dealers. Here is how I stand. I am not as large a purchaser of gasoline as the big garage across the street, consequently, I pay one or two cents more and charge in proportion. The result is, that you riders consider me a robber and buy your gas from the garage. The temptation to charge gas and oil is too great, and I have had to put my foot down so that these commodities sell on cash basis only.

All right, Mr. Rider and you, also, Mr. Manufacturer. Now that I have all those grievances off my chest, I am ready for a new batch of advice, so shoot it in. We will all go along together, hoping for the day when even the baby-carriages have motor attachments.



**Attractive Salesroom of A. Berthelsen, at 2032 San Pablo Street, Berkeley, Cal.—A Model Agency Specializing in Indian Motorcycles and Pope Bicycles**

## NEW READING-STANDARD AGENTS

FONDA, N. Y.—Lou H. Guterman, who is now on a tour of this State for the Reading Standard Company, announces that he has closed with the following dealers: Ralph Mann of Kingston, for Ulster and Greene counties; C. A. Scidmore, of Mechanicsville, for Saratoga and Rensselaer counties; Lewis & Fry, of Schenectady, for Schenectady county, and Cole & Brown, of Johnstown, for Montgomery and Fulton counties.

## UNDECIDED AS TO SHOW

LOUISVILLE, KY.—It has not been decided yet as to whether any of the local motorcycle dealers will exhibit at the annual show of the Louisville Automobile Dealers' Association, during the week of Febrary 21. For several seasons the local dealers exhibited with the automobile people, but last year it was decided to hold an individual show.

## KICHERER ON ROAD

DETROIT, MICH.—E. C. Kicherer, of the Haverford Cycle Co., is now traveling the State signing up dealers for the Smith Motor Wheel. He reports a much different feeling about the little attachment than was the case a year ago. "Then, it was a case of almost begging the dealer to take the agency," said Kicherer. "The Motor Wheel was new and was considered some sort of freak or novelty. But those who took the agency did so well, that dealers are writing to us stating that they want the agency for 1916.

"I look for bicycle business to be better than ever next year. There is a good field for the bicycle and this class of business is very satisfactory. We have already sold a number for Christmas."

## HUB COMPANY EXPANDS

PROVIDENCE, R. I., Dec. 6.—The Hub Motorcycle Co., Inc., of Boston, Mass., has opened an Excelsior service station in Providence at 144 Fountain street. The new establishment is in charge of R. M. Linnell.

The Boston store of the Hub Motorcycle Co. will sell both Indian and Excelsior machines during 1916, the former make being handled in conjunction with George N. Holden, but the Providence branch will be devoted exclusively to the sale and repair of Excelsior machines and the sale of Rogers sidecars, parts and accessories.

## INDIAN IN QUITMAN

QUITMAN, ARK.—The Bearden Fowler Company has been organized in this city and will handle the Indian motorcycle for 1916.

## OAKMAN HAS INDIAN

SAVANNAH, GA.—R. R. Oakman has signed up for the Indian in Savannah for 1916 and has already obtained his first machine, sold it and is awaiting a second.

**Indian Sidecar Combinations Recently Purchased by San Antonio, Texas, Police Department from Guarantee Cycle Co., Local Agent**

# DEALERS' SECTION

### THEY WENT FAST

SAVANNAH, GA.—The Balfour Hardware Co. received its first 1916 Harley-Davidson a few weeks ago but sold it before it was uncrated. The second to arrive came on the last day of November and is gone already. B. X. Balfour, of the firm, is looking forward to one of the largest seasons in the history of Harley-Davidson business in this city.

### WANDERSEE SELLS 26

DETROIT, MICH.—William A. Wandersee, Harley-Davidson distributor, reports the sales of 26 machines of 1916 model and has delivered 14 of them so far. A year ago this time there were but two 1915 Harley-Davidsons on the road at Detroit.

**Peter Beaudoin, Harley-Davidson Agent at Keene, N. Y., on Demonstration**

### CREATED A SENSATION

LOUISVILLE, KY.—Quite a sensation was created in this city on Thanksgiving Day when the Sutcliffe Company made its first demonstration with the Smith Motor Wheel—propelled "automobile." The little roadster was driven over the course of the Y. M. C. A. Marathon and carried two passengers.

### OVER 100 PER CENT. INCREASE

NEW YORK, N. Y.—According to figures given out by Motorcycle Department Manager Webber, of the New York Sporting Goods Company, the retail and wholesale sales of Indian machines and sidecars are more than 100 per cent. greater than those for the corresponding period of 1914. The company expects to place about 1,000 machines in their territory during 1916. Webber says: Accessory sales have likewise reached a higher mark than during the previous season.

### 20-DAY SHOW FOR JACKSONVILLE

JACKSONVILLE, FLA., Dec. 3.—This city will have a motor show lasting twenty days from February 10. The idea is to hold the show in Hemming Park. Motorcycle and bicycle dealers will be represented.

**Where Thors Are Handled Amid Picturesque Surroundings in Nashua, N. H.—Garage of Joseph R. Poulin, at 321 South Main Street**

### COUGHLIN SELLS TWELVE

BRONX, N. Y.—Gene Coughlin, Harley-Davidson representative for this section, has just sold his twelfth 1916 model. "It was a strictly cash proposition," said Coughlin, "and the buyer took it right off the floor. I make it my business to always have one machine, a three-speed twin, ready for the next man to ride it away."

Most of Coughlin's sales from his headquarters at 992 Washington avenue, have been for standard mounts, unequipped, although a few have been electric models. His best record for the new season was four machines within 24 hours, Saturday being the day. Three sidecars of Harley-Davidson make have already been delivered to customers.

### CHALLENGE FOR SKATERS

ST. LOUIS, MO.—The Hurck Cycle & Motor Company, Indian agent in this city, announces that it will back L. P. Stone on a motorcycle against any St. Louis roller skater for a one-mile contest in any roller rink. Albert Cookson, considered the speediest man on skates here is expected to take up the challenge and motorcyclists are looking forward to some excitement.

### HE SPREAD THE NEWS

DETROIT, MICH.—An employee of one of the large Detroit automobile factories purchased an Indian twin some time back from the Metzger tepee and gave it a good try-out. He liked it so well that he spread the news through the plant and no less than 25 other employees of the same factory have called at the Metzger lodge for prices and information.

### SCHICKEL IN ROCHESTER

ROCHESTER, N. Y.—A. M. Zimbric has been appointed agent for the Schickel for this territory. Zimbric has probably the handsomest automobile salesroom in this city, and has efficient means of handling his new line. He will exhibit the Lightweight in the forthcoming Rochester automobile show.

### CHANGES IN AGENCIES

OKLAHOMA CITY, OKLA.—The Oklahoma Arms & Cycle Co., which has heretofore handled the Indian and Excelsior, has given up the Excelsior and will only represent the Hendee product. The Pettee Hardware Company is to handle the Excelsior hereafter.

### PREPARING FOR SPRINGFIELD SHOW

SPRINGFIED, MO., Dec. 3.—While motorcycle men have not expressed themselves as yet it is understood that several of them will be represented in the motor show to be held here during the week of January 1.

### BALMER OPENS SHOP

SAVANNAH, GA.—John S. Balmer, formerly with the Balfour Hardware Co., is now located at 140 Barnard street. He specializes in repairs for Harley-Davidsons and other makes.

**C. C. Hahn, Representing the Dayton Line at Kansas City, Mo.**

# Our Canadian Letter

## CYCLE TRADE PROFITS BY WAR ORDERS IN CANADA

### Arrangements to Spend $50,000,000 for Munitions in the Dominion Results in General Optimism; Many Cycle Men Say Business Never Was Better.

TORONTO, Ontario.—The wheels of the Canadian cycle trades continue to hum merrily and the general situation is becoming more and more satisfactory. Canada's first public war loan was oversubscribed by 150 per cent. and the announcement that $50,000,000 of this money would be spent for the manufacture of munitions in the Dominion has added to the buoyancy of the market. This sum is equivalent to the expenditure of $7 by every man, woman and child in the country and would be equal to a $700,000,000 order in the United States by population comparison.

**Using National Credit**

To add to the general upward trend of affairs is the knowledge that the financiers of the country are arranging to make use of the so-called National credit for the first time and some beneficial changes in the system of National currency are expected. At the same time the Government is seriously considering a reorganization of the banking system in Canada so that great co-operation can be secured between the Government, the banks and the people. The declaration is made by public men that present financial policies in Canada, while sound, have been a handicap and a general reorganization of the money system is anticipated. Without going deeply into the subject, it is within the truth to state that one result of the proposed changes already is an increased optimism.

All industries are feeling the boosting effect of the new situation. It might be imagined that the removal of over 100,000 young men from the country would rob the motorcycle and bicycle dealers of their real red-blooded prospects, but the same dealers freely declare that business at this time of the year has never been so good as it is right now. Another 100,000 soldiers are in training in Canada and will be leaving for the front when they are required—but still motorcycles and bicycles are in demand.

**Showed Increased Volume**

One of the leading distributors of Canada showed proof to the writer of this article that the volume of his business for November, 1915, was 60 per cent. greater than for November, 1914. Another distributor declared he never had so many orders on file for motorcycles for future delivery as he has right now. Still another of the Canadian trade moguls stated that he expected to do 50 per cent. more business right through to next May than he had done in any previous winter season.

The English export trade in motorcycles, bicycles and accessories has been practically wiped out and when the war is concluded the British manufacturers will be compelled to start almost over again in their efforts to garner a share of Canadian business.

All hands in Canada today are insisting on price maintenance. The state of the market is such that no reduction baits are required in order to secure sales. Prices are very firm and advances, rather than reductions, are to be expected. One reason for this tendency is that some raw materials are difficult to obtain. Although war contracts are available, there is little inclination on the part of Canadian manufacture to forego regular products for the sake of war business, for the simple reason that the demand for ordinary goods is strong and the manufacturers realize that staple articles must be produced as well as war supplies.

This article is intended to show, briefly, that the motorcycle and other manufacturers of the United States need not be afraid of the Canadian market. The main difficulty will probably be found in obtaining suitable connections through which to push business. Many of the jobbers, distributors and large retailers in the Dominion already have about all they can handle wisely.

## ABSURD TRAFFIC RULE PROPOSED FOR CYCLISTS

TORONTO, Ont., December 7.—For pure originality and downright absurdity, the latest proposal of the Police Commissioners of Toronto in the shape of a traffic regulation takes the tin trophy. It has been decided by the police authorities here that all motorcyclists and bicyclists, without exception, must dismount and push their machines across what are designated as the busy intersections of the city. This decision will become absolute law if the proposal is accepted by the City Council at its next meeting, which is a likely procedure inasmuch as the council members invariably adopt all measures recommended by the Police Commissioners, one of whom is Mayor Church.

**Created an Uproar**

Needless to say, the proposed regulation has brought a roar of disapproval from the cycling citizens of Toronto. The commissioners have been called a variety of names and the motion has been designated by a great number of appellations. Owing to the disorganized state of the Canada Motorcyclists' Association, the local riders are at a loss to know what steps to take in order to combat the measure. The motorcyclists are practically without a leader, although the dealers are making preparations to war upon the civic officials.

President Grove and Secretary Walter Andrews of the Toronto Bicycle and Motorcycle Dealers' Association are making preparations to call an emergency meeting of the association members when resolutions will be prepared and a delegation will probably be organized to wait upon the City Council to point objections to the measure.

"If the police recommendation is adopted by the council, bicyclists and motorcyclists will practically be driven from the downtown section of the city entirely," declared Walter Andrews, the association's secretary. "Nearly every intersection in the downtown area is continually crowded with both vehicular and pedestrian traffic and the riders would be compelled to dismount at nearly every crossing. The police might as well ask motorists to shove their automobiles across the intersections as call upon motorcyclists to shove a sidecar outfit across. Or they should ask teamsters to get out and lead their horses when they come to intersections."

**LAST RUN OF SEASON**

HAMILTON, Ont., December 7.—The last scheduled run of the Hamilton M. C. was held last Saturday, when thirty of the red-hot enthusiasts braved the prospect of bad roads and engaged in a 20-mile-per-hour dash to Guelph, thence back to Dundas and around by Ancaster, a total ride of 65 miles for the afternoon. The participants needed to be game because occasionally the riders could not even find the bottom of the road, and in no time everybody was "slopped" with slimy mud.

Dan Allen acted as starter for the trip, with H. Sturgess assisting. Nelson Chambers, Indian dealer at Hamilton, looked after the boys at Guelph, while L. Gordon, N. Ferris, Jack Mackay, H. Taylor and N. Benzie also acted as officials. The Canadian Oil Company supplied oil and gasoline.

# GRUELLING PACE IN NEW YORK SIX DAY RACE

## Seventeen Teams Start in Bicycle Classic—Hour Records Being Broken Consistently

NEW YORK, N. Y., December 8.—Early on Wednesday morning thirteen out of seventeen teams which started a few minutes after Sunday midnight in the twenty-third annual New York Six Day Race, now in progress at Madison Square Garden, were still in the lead. The score for the forty-eighth hour, or midnight, was 1,015 miles and 1 lap. The previous record for this time was 1,011 miles and 1 lap, set up by Goullet and Grenda in 1914.

Up to twelve o'clock on Tuesday night the seventeem teams were still intact. The teams of Ruddi-Russe-Vanderstuyft was then four laps behind, as was the Kopsky-Hansen combination, while Suter-Madonna were two laps in the rear and Sullivan-Anderson one lap. These teams had already lost the number of laps mentioned before seven o'clock on Tuesday morning. All attempts to change the relative standing of teams during the evening failed.

The riders kept ahead of the record at the end of every hour on Tuesday night. At five o'clock they were 7 miles and 1 lap to the good, with the Madden-Eaton team leading; at seven o'clock Thomas-Ryan showed the way across the tape with 911 miles and 1 lap, which was 2 miles and 9 laps above the former mark, while at ten o'clock McNamara-Spears led the procession with 971 miles, this being 5 laps ahead of the previous record.

### Monday—the Start

At the crack of the starter's gun, which was fired by Sheriff-elect Alfred E. Smith a few minutes after midnight, seventeen cyclists were pushed off on the twenty-third annual six-day bicycle team race staged in Madison Square Garden. The brass band boomed forth a stirring air and thousands of men and women, an orderly crowd, cheered the riders of all nations as they started out on the 142-hour grind which is to end next Saturday night in a series of one-mile sprints during the final hour.

The riders entered in the long grind were: Alfred Grenda, Tasmania, and Fred Hill, Boston; Reginald McNamara and Robert E. Spears, Australia; Oscar Egg, Switzerland, and Marcel Dupuy, France; Percy Lawrence, San Francisco, and Jacob Magin, Newark; Jimmie Moran, Chelsea, and Bobby Walthour, Atlanta; Ray Eaton and Edward Madden, Newark; Rudolph Ruddi-Russe, Austria, and Leon Vanderstuyft, Belgium; Worth L. Mitten, Davenport, and Norman Hansen, Denmark; Vincenzo Madonna, Italy, and Paul Suter, Switzerland; Charles Piercy and Gordon Walker, Australia; Lloyd Thomas, San Francisco, and Martin Ryan, Newark; Tim Sullivan, New Haven, and N. Anderson, Denmark; Peter Drobach, Boston, and Frank Corry, Australia; Jos. A. Fogler, Brooklyn, and Clarence Carmen, Jamaica; Gus Wohlrab, Jersey City, and Jos. G. Kopsky, New York; George Seres, France, and Victor Linart, Belgium; Willie Hanley, San Francisco, and Al Halstead, London.

Grenda and Hill (in Circle) Who Are Picked for Winners

Before the riders had been on the track for many minutes the crowd begged them to stir things up and "steal a lap." But all of the pluggers were on the alert and no rider could gain any advantage. Mitten was leading after five miles had been covered, his time being 12:15⅘. Shortly after this the jinx got hold of Linart and saw to it that the Belgian broke the chain on his machine. He was immediately relieved by Seres, his teammate. During the first hour the only attempts to steal away from the field were made by Oscar Egg and Vincenzo Madonna, but neither was able to open up a wide gap and they soon fell back into line.

### Battle Between Trailers

Nothing of any importance happened during the morning, for all of the teams appeared to be in fresh condition and the field kept intact at all times. There was a battle royal on among the rear rank riders in the opening hours. Rudolph Ruddi-Russe, the Austrian, and Vincenzo Madonna were waging war to keep from riding in the last position, realizing that the tail ender would be most likely to be lapped in a jam. The Austrian and the Italian elbowed and shoved and cut across each other's bows to the great delight of the crowd, which forgot all about the big teams up in front for the time being.

On their showing in their first ten hours, Frank Kramer, who was reporting the race for a Newark paper, gave it as his opinion that McNamara and Spears appeared to be the strongest team. But Big Steve conceded that Grenda and Hill were of equal strength, and that Egg and Dupuy were a promising pair.

At the twelfth hour all of the seventeen teams were doing well and all had covered

Digitized by Google

the same mileage. The score then was 279 miles and 4 laps, the previous record being 278 miles and 4 laps. The contestants got by the record at nine o'clock in the morning, and for some time thereafter kept ahead of the old figures.

But at 4 o'clock in the afternoon, as a result of slow grinding, they again fell behind the record and it was not until seven oclock in the evening that they were ahead. At that time the cyclists were over the old mark by one lap.

Monday night was filled with excitement. At 8:10 Marcel Dupuy shot out ahead of the field and opened up a gap; Egg picked up his lead and the merry whirl started. McNamara, Grenda and Magin took turns at setting the fast pace, and after more than a mile of rapid pedalling four teams were lapped, these being: Kopsky-Wohlrab, Sullivan-Anderson, Suter-Madonna and Ruddi-Russe-Vanderstuyft. At 9:55 the second sprint started and in this jam Ruddi-Russe-Vanderstuyft and Kopsky-Wohlrab lost two more laps, putting them three laps behind the leaders. Suter-Madonna fell one lap behind in this sprint, which put them two laps behind the leaders.

There was a nasty spill at 9:18 o'clock, Reggie McNamara being the worst hurt. He had a finger on his left hand badly cut and a nail torn off. Peter Drobach and Marcel Dupuy were the first to go down and Al Grenda, Charles Piercey, Martin Ryan, McNamara and Gordon Walker went with them. Walker was hurt in the right leg. It was not until 9:40 o'clock that the race was resumed, all the teams being again represented on the track. Ten o'clock saw the riders complete 493 miles 7 laps, being just one lap ahead of the record.

At twelve o'clock on Monday night, the end of the twenty-fourth hour the score was 535 miles and 9 laps.

**Tuesday Morning and Afternoon**

To inject a little more "pep" into the grind, Jackie Clark, the little Australian, who was among those missing at the start of the present six-day race, offered five dollars as a prize for a five-lap sprint. Immediately the contestants began to limber up and went whirling around the wooden saucer at a hair-raising pace. Kopsky was the lucky rider to cop Clark's five spot at the end of the fifth lap.

The riders took things easier after this sprint, but at four o'clock in the morning the leaders were still nine laps ahead of the world's record. At five, Carmen headed the procession with 724 miles and five laps, these figures being four laps ahead of the record established by Cameron-Kaiser at the recent Chicago grind. During the next hour the riders slowed down to a steady pace and at six o'clock they were three miles and one lap behind the record.

**Ruddi-Russe Starts Sprint**

When the uncertain rays of the rising sun were just beginning to steal into the empty amphitheater, Ruddi-Russe, the Austrian teammate of Leon Vanderstuyft, the Belgian, came out on the track and made a mad attempt to regain one of the three laps which his combination had lost. He sprinted at a lively clip around the track, but soon became fagged, dropping to the rear. With the Austrian again tamed and back in the file of riders, the leader uncorked a thrilling spurt, and whistled round and round the saucer, increasing the speed at each lap. Ruddi-Russe dropped away from the field and finally lost another lap, putting his team four laps behind the high scorers. In this sprint Kopsky-Wohlrab also lost one more lap.

Nothing exciting developed during the forenoon on Tuesday, though the riders put more ginger into the pace and kept on breaking the record every hour. The fact that they were three laps behind at ten o'clock urged the cyclists on, and one hour later they were nine miles and six laps ahead of the former figures. By midday they piled up more miles at a dizzy speed, being 12½ miles over the record when the dinner whistle blew outside of the Garden.

The first hour Tuesday afternoon saw the advantage still greater, the leaders beating the figures set up by Cameron and Kaiser in the recent Chicago event (770.7 miles) by 15 miles and three laps. A few minutes after one o'clock Madonna made several vain attempts to regain a lost lap, but both Eaton and Thomas stuck close at his heels and would not let the Italian break away.

At two o'clock the score was 817 miles, which beats the former cyphers by 16½ miles, and at three o'clock the contestants were still 12 miles and three laps ahead of the record, which was 823 miles and two laps, set up by Lawrence and Magin during the New York race in 1914.

In the middle of the afternoon, Madonna relieved his partner Suter and made another endeavor to win back some of the laps which his team had lost. He launched a brisk sprint and tore away from the field to the extent of a half lap. But the bunch would not permit the Italian to gain any ground, and after a few minutes he was in line again. The spectators could see that Madonna had exhausted his strength in trying to get back a lap. Shortly after, when the spaghetti-eater rounded the Madison avenue turn of the Garden, he fell from his wheel and tumbled down the steep embankment. The attendants carried him from the track in a dazed condition, but it was later reported that Madonna had not been seriously injured.

# BICYCLES FOR CHRISTMAS PRESENTS

## How Advertising Will Put Them on Family Gift List As Most Important Item

By G. D. CRAIN, JR.

OF course, all of the authorities on the subject of Santa Claus agree that the old gentleman gets around in a sleigh equipped with planes or some other device for resisting the force of gravity, and drawn by a team of six reindeer which can run just as well fifty feet from the ground as on top of it.

But this isn't to say that he wouldn't adopt a bicycle if he were properly persuaded. Nor is it to say that he wouldn't make bicycles one of the biggest items on his list of Christmas presents for boys and girls if the parents of the aforesaid boys and girls had their attention attracted to the notion in time.

### Right Now Is the Time

Now, right now, on the eve of the holidays, is the time for the bicycle dealer to advertise bicycles for Christmas presents. You can make this your biggest season if you'll just open up and spend a little money on the proposition. Use enough space in the newspapers to get attention; use enough to show illustrations of your leading models, and to emphasize your prices; and if you do that, you will get customers.

Oh, yes, you are going to sell some bicycles for Christmas this year, even if you don't advertise at all. The fact that boys want them and have probably told their parents so to the extent of a couple of hundred times apiece, will help some, and your window display will bring in a lot of people. But if you want to get the real big business, advertise!

### The Need of Advertising

A good many bicycle dealers have had the idea that their commodity is just about as staple as sugar and salt, and that they have nothing to advertise. Well, as far as that is concerned, thousands and thousands of dollars are being spent every year to persuade you to say "Domino Sugar," and the magazines for the womenfolk are carrying the copy of the people who sell "Shaker Salt." So you see that even those staple commodities have to be advertised if one is to make more than a mediocre success of them.

And while bicycles are fortunately a staple proposition, in that a substantial and permanent demand exists for them, it is not true that they are staple, like coal, in that the market is definitely limited and the demand definitely created. The demand, as far as you are concerned, and the market—that part of it which you are interested in—depend absolutely on what you are going to do about it. If you are content with a moderate, unexciting kind of business, just lean back and wait for those who look in the telephone directory under the head of "Bicycles" to find you; you'll sell some goods, and you'll have time for a nice nap after lunch, so that you'll never have reason to suffer from violent indigestion.

But if you are a real business man and want to see your business grow as fast as it will, it is up to you to stimulate things a little bit, and to put on the pressure. Instead of waiting for people to come to you, you must go to them—through the columns of the newspapers, as well as otherwise—and if you want them to desire bicycles, you must set about creating that desire. Instead of being passive and waiting for business to come, you must be anything but passive—activity must be your key-note—and everything you should do should be with the notion of bringing them in.

Take the daddy who is wondering what to buy that boy of his. The youngster is growing so fast the old man doesn't know what to make of it. He's twelve now, and is up to his shoulder, and played half-back on the neighborhood football team. The boy himself wants a gun, but the father doesn't fancy the idea of having his offspring shot up, or of shooting up any other young hopeful. But just then, as he turns the page of his favorite paper, he sees staring at him from a big space the following:

GET YOUR BOY A BICYCLE FOR CHRISTMAS!

That's the headline; and it's so suggestive and interesting and so nearly in line with what he's been thinking about—along with thousands of other fond fathers—that he immediately goes to reading the whole ad.

### How the Ad Reads

"There's nothing a boy likes as much as a bicycle," he reads. "He gets enjoyment and exercise at the same time. He can ride to school on it and save carfare. He is able to take trips into the country on his holidays. Bicycle clubs are popular, and belonging to one will widen his acquaintance with the right kind of boys."

"By gad, that's so," exclaims the father, slapping his leg. "The youngster has been talking about a bicycle, I remember, and it would just tickle him to death. I remember how I used to ride, back in the old L. A. W. days. That was great sport, only a little expensive. By the way, I hope I can afford to get a wheel for the kid. Let's look at the prices."

### Creating Good Business

Then he turns back to the ad and sees different models and makes illustrated and prices running all the way from $15 for the least expensive up to $50 for the best. Finally, after studying the different ones, he comes to the conclusion that one particular mount, at $35, perhaps, equipped with coaster brake, spring seat, automobile horn and "everything," would just about fill the bill. So he tears out the ad, tucks it carefully away in his pocket-book, and makes a mental note to go into the store and order the bicycle the next day.

That's the way business is created by advertising. That is why no bicycle dealer can afford to tell himself that he can't afford to advertise this Christmas. He may imagine that this is true, but he is not taking into account the additional business he will get if he advertises, business that will be lost if he does not. The chances are that dozens of people are reminded to buy bicycles simply by seeing the newspaper announcements of the dealers, and would never think of doing so if they did not happen to run across these bits of publicity. They buy, instead, something else that they happen to see advertised.

### Working Up Interest

How many Victrolas would be sold without advertising—by the dealers? The Victor Talking Machine Company has spent millions to popularize its product, and undoubtedly reading its general announcements has awakened interest and desire to own in the minds of a great many people. But it takes the ad of the local dealer, saying: "I've got it!" to bring that interest and desire down to a concrete proposition. It remains remote and indefinite until the merchant right on the ground bobs up and says that he can take care of the demand. The local dealer's advertising, for the purpose of cashing in on the manufacturer's advertising is just as important as any other feature of the whole proposition.

And so it is with the bicycle dealer. A good many boys may be wanting bicycles, but unless those who must provide them have their own ideas fastened down in some specific way through the ad of the

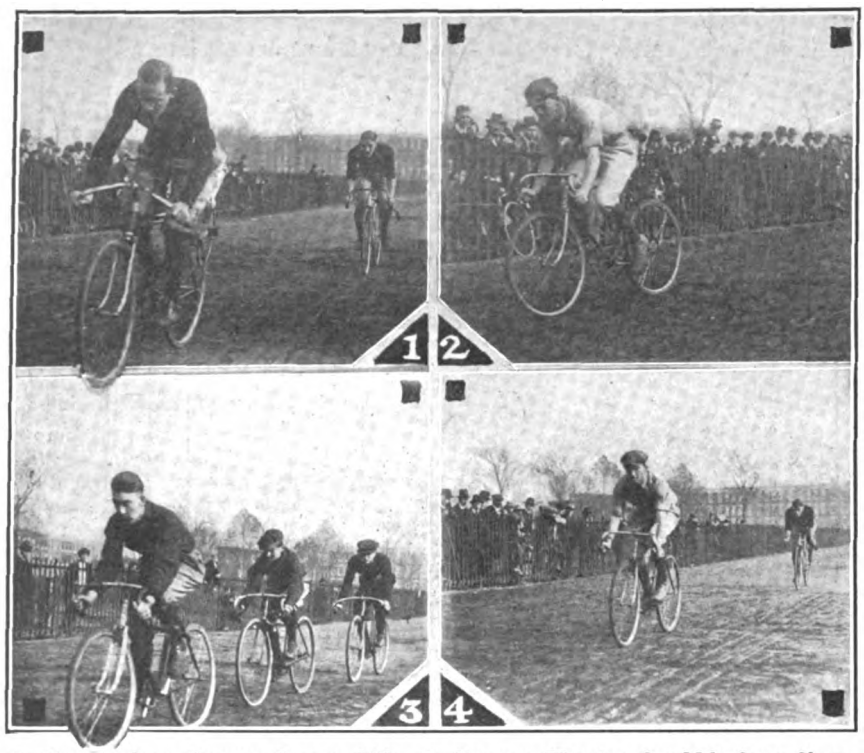
## LIVELY SPRINTS MARK CRESCENT CHAMPION RACES



1—Fred Sanborn Copping Quarter Mile. 2—Sherman Winning One-Mile State Championship. 3—The Team Pursuit Race. 4—One-Mile Club Race

BALTIMORE, Md., December 4.—The one hundred mile road race of the Crescent Bicycle Club, the last of a series of events to determine the club championship, was held last Sunday and was captured by Fred M. Sanborn in easy fashion, demonstrating that he has no peer in the South as a distance performer. His time of six hours and fifteen minutes, while eight minutes behind his own record established last year, was not bad in view of the strong winds and muddy roads and the fact that he was unpaced for nearly fifty miles. Five men faced the starter, but only two finished, John G. Stricker being the sturdy rider to land second position.

A race meet was held on Thanksgiving Day at Patterson Park. Wilbur Wright and Welby Sherman starred in three events ea h. Sherman accounted for the half-mile and one-mile club championship and the mile state championship, while Wright won the half-mile races, classes C and D, and the one-mile novice. The four remaining races were scattered among Fred M. Sanborn, who crossed the tape first in the quarter-mile club championship; William H. McAvoy, who won the two-mile lap event; A. Leimbach, who accounted for the one hundred yard slow race, and H. Nechampkin, who proved the best in the half-mile event for class E riders.

The unlimited Australian pursuit race turned out to be a walkover for the team composed of A. Leimbach, Fred M. Sanborn and William T. Wright.

### INDIAN BICYCLE CATALOG

Attractively gotten up, both as to cover and contents, is the new bicycle catalog of the Hendee Mfg. Company, of Springfield, Mass. The covers are light green with vertical white stripes, with the words "Indian Bicycles—1916" in white. A large Indian head is outlined on a circular background of red on both covers. The text fully described the entire line and the illustrations are of the high class which features Indian catalogs in general.

### U. S. I. SPORT NIGHT

NEW YORK, N. Y., December 7.—Friday evening, Dec. 17, has been set aside by the Unione Sportiva Italiana as its annual "Sport Night," when at the club house, located at 410 Eighth avenue, will be held the indoor championships of the various branches of sport featured by the organization.

The program will consist of a one-mile open match race and a one-mile unpaced race on home trainers, in addition to four boxing and five wrestling matches and gymnastic drills. The following members will ride in the bicycle events: "Jimmy" Papesca, Louis Rabbino, Charles Rabbino, C. Zoccola, Tony Pace, Thos. LaRossa, J. Fargo, A. Ramezzano, A. Ferrero, S. Maccario, Joseph Gavirati, C. Buscaglia and E. Bizzoni.

Dancing will take place after the bill of sports is over. Admission tickets, costing twenty-five cents each, can be secured from Sport Director August Rabbino at the club house.

### WILL DISTRIBUTE PIERCE

SAN FRANCISCO, Cal., December 4.—Charles Baxter, manager of Bean & Son Co., has announced that his firm has taken on the distributing rights for the Pierce bicycle in Central and Northern California. The Bean & Son Co. has one of the largest and best equipped stores in Frisco devoted to the wholesale bicycle and accessories business. It is meeting with fine success in placing agencies.

### HARE AND HOUND CHASE

NEWARK, N. J., November 29.—Eugene O'Mara, of Hilton, won a "hare and hound" chase ridden on bicycles and staged here on Sunday afternoon. Robert Henderson, of the Bay View Wheelmen, finished second; Fred Taylor, a prominent local amateur, was third; Frank Harenberg, of Irvington, fourth; Ray Nestor, of the Arrow Wheelmen, fifth; Jack Utis and Conrad Miller, two local lads, finished sixth and seventh respectively.

There were about twenty-five starters in the chase which began from in front of the Colonial Field Club. The trail was laid out by Edward Ballman and Otto Bender and led through Irvington, Hilton, Springfield, South Orange, Millburn and out through Rahway, returning then to Newark. The distance covered was about forty-six miles.

In 1896 the first "hare and hound" chase was originated by the Bay View Wheelmen and was later taken up by the Associated Cycle clubs of the metropolitan district. It is now an annual event with the Bay View Wheelmen. The first chase was won by Eddie Blauvelt, who at the time was a star at the old quarter-mile track, in Vailsburg. Conrad Miller, who finished seventh yesterday, finished second in the first race. He has competed in every chase since 1896. Eddie Rupprecht came in third.

In 1913 Robert E. Lee introduced the chase in different clubs and it is today becoming a popular sport. A "hare and hound" chase is not a hard race to ride in and it is similar to a cross country race. The chase is as follows:

Ballman and Bender who acted as the "hares," left the clubhouse at 9 o'clock, dropping papers along the course as they rode. These bits of paper are known as the trail. A short time after Ballman and Bender left the clubhouse the field of riders got away. The trail leads through all kinds of roads and at times into ditches. In the course of the trail there are three houses, designated as red, white and blue houses. Within each of these houses is a bundle of paper to correspond with the color of the house. The object of the "chase" is that all the riders follow the course until he comes to one of the houses, which he must enter, find the corresponding paper, and continue until he has completely followed the trail and rounded up the "hares." The first rider to enter the three houses and then find the "hares" is the winner of the "chase."

### BIG BICYCLE INCREASE

LAPORTE, Ind., Dec. 3.—An increase in business of no less than 100 per cent. is reported by the Great Western Mfg. Co., of LaPorte, for the first quarter of the company's fiscal year which started September 1. On the first of December the firm shipped a carload of over 350 bicycles to San Francisco, and another carload of more than 350 bikes to Los Angeles. This remarkable day's business was followed on December 2 by a shipment of a carload of about 350 bicycles to New York.

The Great Western company reports an unusual demand for its Juveniles, and there are indications that more bicycles will be given as Christmas gifts this year than at any time since the old "boom" days.

**1—Riders on Steamer. 2—At the Sonoma Track. 3—Making Repairs. 4—Main Street in Calistoga. 5—Waiting for the "Bunch"**

THE followers of the bicycle in San Francisco keenly appreciate the natural beauties around the Pacific metropolis and find the silent two-wheelers one of the best ways of making an excursion to the wonders of nature which abound in California. I had often longed to make a trip through the beautiful Napa and Sonoma Valleys to see with my own eyes what I had heard so many excursionists and tourists enthuse over. When therefore I read this fall the announcement on the bulletin board of the New Century Wheelman that just such a trip was to be taken by the fellows on a week end, I readily joined the party.

### Nine Riders Started on Run

The club run was scheduled to Calistoga, a small town about one hundred miles from San Francisco, which is noted all over the State for its wonderful geysers and the petrified forest near it. Nine of the wheelmen started out on this two-days' trip early on a Sunday morning. The following were members of the party: Ad. Mooney, George Drury, Arthur Filley, Philip Morgan, Harry De Brie, Leslie Nelson, Walter Hammit, Wallace Rhodes and myself.

Pleasure bent we left on the 9:15 boat, a small excursion steamer called the Napa Valley, which plies between San Francisco and Vallejo. We had about an hour's sail. Of course dancing and singing were in order and the fellows went to it in real old fashioned holiday spirit. The little steamer passed quite close to the shore, affording a fine opportunity to get a good view of the points of interest. From the deck we could see the military prison on Alcatraz Island, the Federal Government's gigantic coaling station at California City, the state prisons at San Quentin and the huge wineries in Calwa..

### Between Vallejo and Napa

Arriving at Vallejo, we got off the boat and made a bee line for the first hotel in sight, and had the chef pack up a very large lunch—one of those lunches for which cyclists are justly famous and which cyclists alone can tuck away in record time. By eleven thirty we were on the scenic highway between Vallejo and Napa, a fine stretch of boulevard that enabled us to go at a very leisurely pace. Now and then the party stopped to pick some fruit in the orchards that adjoined the road or to quench their thirst with cooling draught of clear, sparkling water.

The next point of interest along the route was the Napa State Hospital for the insane. We stopped here and were the guests of the superintendent, who received us cordially and took the party all through the buildings and grounds. The "super" was a fine old man and wanted us to see everything of interest about the place. Some of us had never seen an insane asylum before. It was pathetic to watch the antics that some of the patients would go through; in fact one could hardly realize that human beings could be so affected. In the afternoon the patients played a game of baseball—and it was a pretty good game, at that. While leaving the place, one of the inmates shouted that we ought to be in the place instead of himself. But we didn't agree with him at all, poor fellow, and were off again on our cycling trip.

Passing through Napa Valley the

**Mt. St. Helena in Background, Which the San Francisco Cyclists Saw on Their Trip**

Digitized by Google

boys found it impossible to resist the ice cream stores. At Yountville we came to the Old Soldiers' Home, where we met an old fellow who had about seventy years to his credit and claimed that he was the champion high kicker in the world, in spite of his three score and ten years. He showed us how high he could kick and although he wasn't exactly a "champ" he could certainly kick some. We stayed on the grounds of the home for a while, helping ourselves to cherries, and then bidding farewell to the septuagenarian we were on our way to St. Helena, a small village en route.

Some sort of festival was being celebrated in the village when the nine of us entered. The natives stopped, gave us the once over and were surprised to learn that we had pedalled all the way from San Francisco. After assuring them that it was merely a little jaunt, we continued on to Calistoga. The bunch visited the Petrified Forest, which is about three miles from town, where we found the fallen monarchs of the forests, some of which were 205 feet in length; once living trees of beautiful and symmetrical proportions, they have turned to solid stone. Our visit to the stone forest was certainly the most interesting feature of the trip.

The forest is at the base of Mount St. Helena, one of the coast range mountains. Leaving our bicycles at the edge of the forest, we made the ascent of the mountain in less than one hour. At the top we found an iron box chained to a rock in which was a register book wherein all those who reach that point of the mountain sign their names. Of course we all put in our "John Hancocks." Later on I learned that an old Russian professor had put the iron box there in 1852. The book is renewed when necessary by the county.

### A Freak Geyser

We descended the mountain and then rode back to Calistoga on our bicycles. Arriving at the town we rode to the outskirts and visited the geysers. The largest geyser on the grounds is a freak. It spouts five or six hours every day but Thursday, and then quits.

We cooked our supper in one of the hot water holes; we dropped fresh eggs into the hole and within three minutes we fished out hard boiled eggs! These hot water holes are known as the "devil's kitchen."

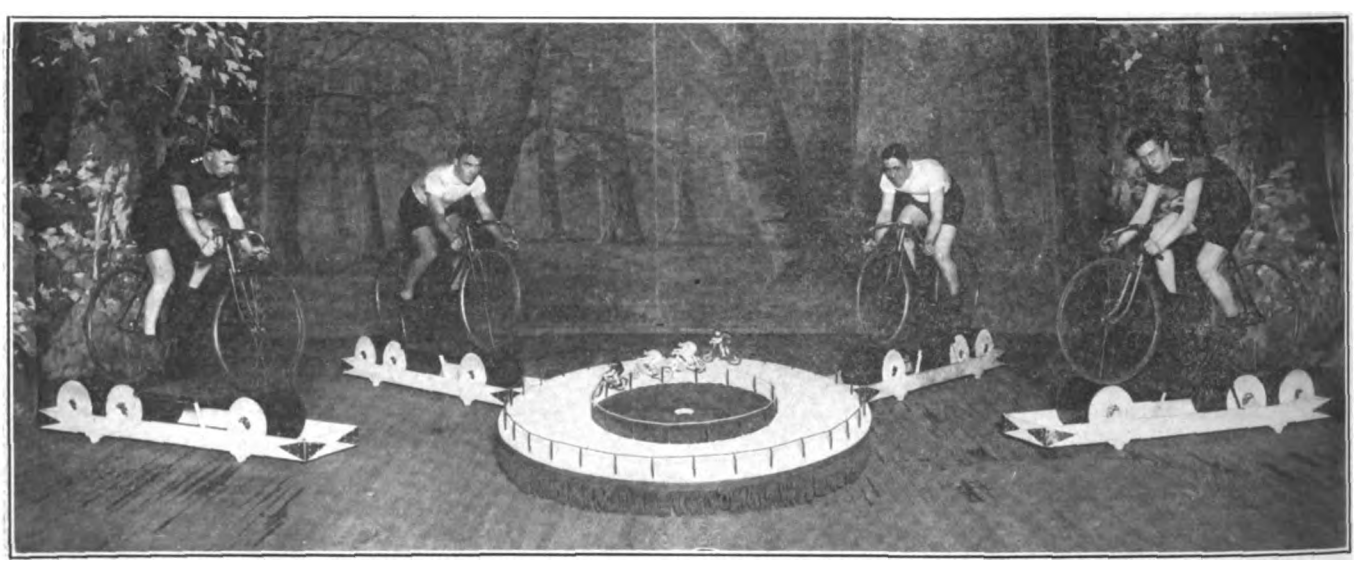
After our outdoor supper, we went back to the town and tried to get sleeping accommodations at the hotels, but found that they were all crowded. So the party of wheelmen assigned to me the job of hunting up the constable and getting his assistance. After walking all over the village with him, he found a place for us—not the village jail, but a comfortable little boarding house.

The next morning we started on the return journey. Near St. Helena we inspected a winery which was one of the largest in California. The cellars are deep into the ground, and some are a mile in length, containing thousands of gallons of wine that are left there to ferment.

Our next stop was at an historical old mission which was built in 1789 by the Spanish Padres and is still used to this day. Sonoma, where the mission is located, is one of the oldest towns in California and was once the capital of the state.

Out from Sonoma, we met the jinx and he made himself at home at once. Ad. Mooney, the life of the party, scored the largest number of punctures, and certainly had to do some pumping. Pete Morgan also had his troubles. He was thrown over the handlebars when his chain jumped. But as Pete says, a club run is not complete without a spill or two. After everything was again put into right shape, we started for the boat at Vallejo, arriving there at 6:45. The fellows were pretty tired out when they got aboard the steamer, and most of them took a little snooze and didn't wake up until we had docked at Frisco.

## TROUPE OF CYCLISTS WHO ARE TO RIDE AT BUFFALO THEATER WILL MAKE CIRCUIT OF COUNTRY



**How This Vaudeville Act Is Being Staged in the Bison City. Note Miniature Track in Middle of Stage**

BUFFALO, N. Y. December 6.—Tommy Wells, the Buffalo F. A. M. referee, will float a vaudeville bicycle act at the Garden Theatre, this city, on December 16. He expects to send his troupe on a tour of the country.

A number of new wrinkles which have been added to this equipment were heretofore unknown. In the past, in stunts of this kind, uaually two cyclists would ride on rollers, but now there will be four; where formerly riders rode on 18 to 24-inch concaved rollers, these riders will use 12-inch straight rollers The space required for this outfit is 24 x 50 feet. The ratio of reduction from the riders to the dummy riders on the miniature track is 90 to 1. The dummy riders make 12 laps to the mile. They also have the same color of sweater as have the riders, which makes a realistic appearance.

The riders who will appear in this act are George Wiley, the American motor-pace champion; Saxon Williams, the holder of the World's five-mile record; J. C. Souter, the French roller rider, who holds the quarter and mile record; and Brownie Carslake, the Australian motorcycle star.

Special music has been written for the act by Jack Yellan and George Cobb. Tommy Wells will manage the troupe and Louis Souter, Jr., will be the official mechanic.

## HARVEY WINS POINT RACE

NEW YORK, N. Y., December 7.—Geo. Harvey was returned the victor in the second of the final three point bicycle races at five miles of the New York Division of the Century Road Club Association at the Pelham Parkway course last Sunday. Louis Zemo came in second, Joseph Caldwell third, George Steppello fourth. Attempts to lower the one-hour unpaced record as newly established on November 30 by Marquart in covering 22 miles 176 yards were frustrated by the gale which blew over the course and which caused Nelson Johnson, Berthold Baker and Fred Sanborn, a visitor from Baltimore, to quit before the half-way mark was reached. The summaries follow:

| Place | Name | Handicap | Time |
|---|---|---|---|
| 1 | George Harvey | 1:30 | 14:16⅘ |
| 2 | Louis Zemo | 1:30 | 14:16⅘ |
| 3 | Joseph Caldwell | 1:30 | 14:17 |
| 4 | George Steppello | 1:30 | 14:17⅕ |
| 5 | Ray Caldwell | :30 | 13.37 |
| 6 | John J. Marquart | :30 | 13:37⅕ |

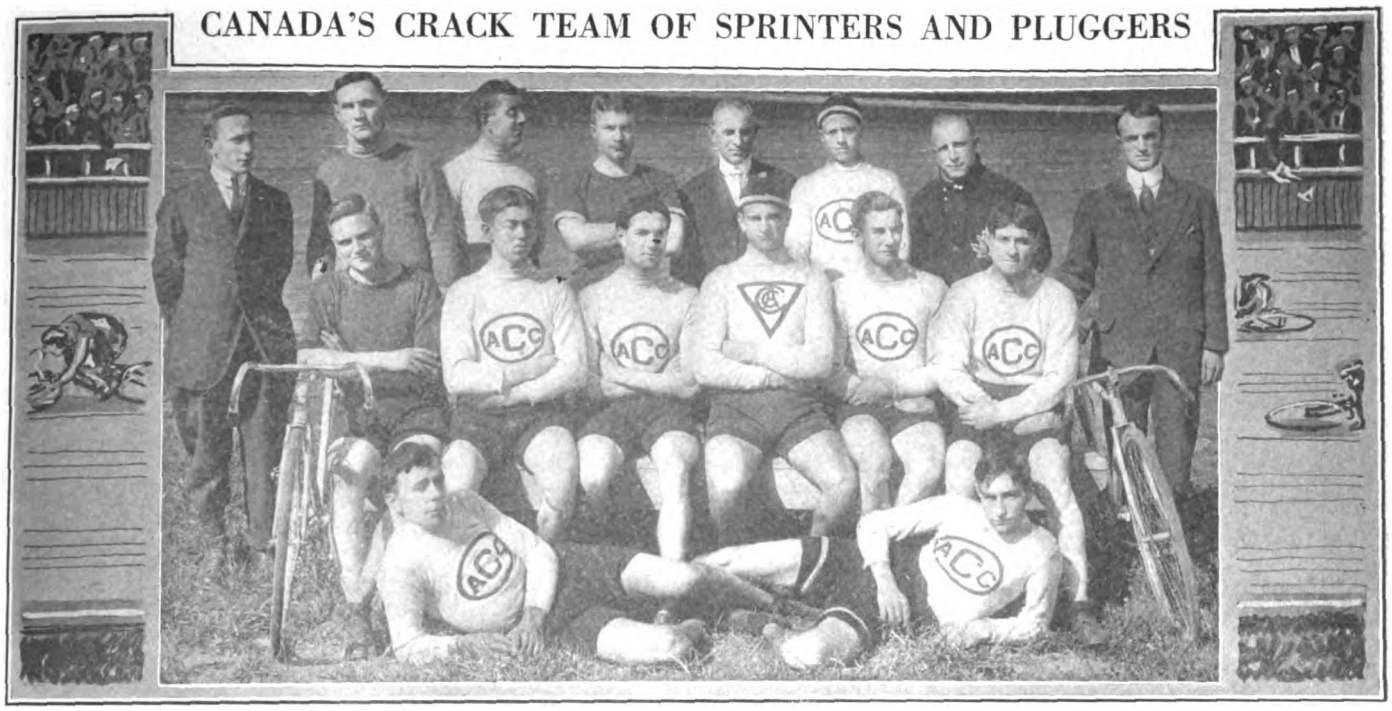
## CANADA'S CRACK TEAM OF SPRINTERS AND PLUGGERS



**The Strong Bicycle Team of the Classic Club of Toronto, Canada, Which Has Won Many Victories This Year**

TORONTO, Ontario, Dec. 7.—What is characterized as one of the strongest and best all-round bicycle teams in existence is the Classic Club's talented aggregation in this city. It outshines any club organization in Canada and the probability is that the Toronto outfit can hold its own with the best club team in the United States. The twelve cyclists of the Classic Club, who have just completed a most successful year on track and road, are shown in the accompanying photograph.

### Art Spencer in Club

The Classic stars include Art Spencer, the Canadian sprint champion, who raced with success at Newark last summer; Norman Webster, a first rate sprinter who finished second to Hans Ohrt in two big Canadian races during 1915 and who took the time prizes in two other important road fixtures; George Wright, the Canadian motor-pace champion and a former English endurance crack; George Watson, one of the two Canadian riders who made a good showing in the 200 mile race at Lake Malar, Sweden, during the 1912 Olympic games; W. Smith, a veteran road plunger, and Tom Ford, the oldest active bicycle racer in Canada. Ford, who is referred to as "the Jay Eaton of Canada," is thirty-six years of age and has been racing in England and Canada for twenty-one years. He has a son who has also entered the bicycle arena.

### Will Meet Any Team

The Classic Club team is out with a challenge to meet any other bona-fide amateur team in the world for a series of mixed events on either board or dirt track and on the road, these events to include sprints, middle and long distance races, pursuits, relay contests and motor-pace competitions.

The riders of the Classic Club shown in the accompanying group are: From left to right, standing—R. Dodds, Tom Ford, Archie Owen, R. Penny and George Watson; seated, from left to right, Bill Spencer, L. H. Bounsall, C. Coleclough, Art Spencer, Norman Webster and Bill Smith; reclining on ground, George Wright and Harry Hitchin. The manager of the team, standing at the left, is William Marr. The club secretary, W. Patrick, is on the extreme right.

### DE LACKSO'S FAST TIME

SAN FRANCISCO, December 6.—Francis DeLackso, the plucky young Frenchman who created a great deal of interest during the past summer by riding a Columbia bicycle, to which he was handcuffed, from New York City to San Francisco, has just made a most remarkable record in his run from this city to Los Angeles. Leaving this city on November 11, he covered the distance of 491 miles between the two cities in 42 hours and 19 minutes.

The time made by the intrepid little rider is the more remarkable when the fact that he was unpaced and had wet, mountainous roads to negotiate, is taken into consideration.

De Lackso's arrival at Los Angeles marked the first stage of his round-the-world trip, which he is undertaking on a Cleveland bicycle, epuipped with Goodrich black safety tread tires. He reports that these tires are holding up nicely and that he has had no trouble with either his bicycle or tires thus far on his journey.

### FRASER BOOKS CARLOAD ORDER

LOS ANGELES, Cal.—"What do you think of Fraser?" asked E. E. Welborn; "he is on his way back from a rush trip to Honolulu, and here is his cabled order for a carload of bicycles, all for one firm, and a separate order for a third of a carload for the same people, to be rushed on an early boat to last until the big shipment reaches them." Fraser is the northern California manager of the Appeal Manufacturing & Jobbing Co., and is known as the "introducer." His specialty is introducing agents to prosperity.

### NOW HEAD OF AUTO ASSOCIATION

LOUISVILLE, Ky.—At a recent meeting of the Louisville Automobile Dealers Association, Prince Wells, the veteran St. Louis bicycle dealer, was elected president of the organization. He only recently entered the automobile business, having been in the bicycle line since the days of the high-wheeler. His main line during the "bicycle boom" was the Rambler, and he is now selling the Jeffery motorcar, the successor of the original Rambler cycle. Wells is now busy arranging the program for the annual show to be held in February.

### 'FRISCO CYCLISTS HAPPY

SAN FRANCISCO, Cal., December 5.—Great was the rejoicing of the New Century Wheelmen when they learned that the Chicago six day grind was won by two Frisco boys, Thomas Hanley and Percy Lawrence. For these two victors are both members of the N. C. W., which has developed more than one speedy cyclist of note. Freddie West, Lloyd Thomas, Fred Diner, Al Halstead, Ernest and Hans Ohrt are among the crack riders who won their initial honors flying the colors of the New Century Wheelmen.

### N. C. W. CHALLENGES CLUBS

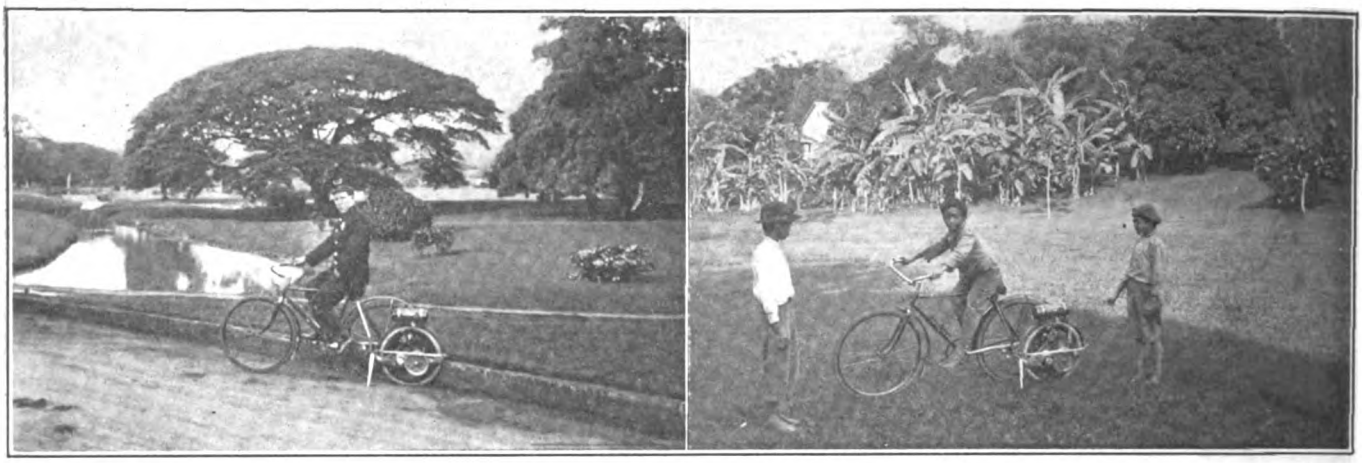
SAN FRANCISCO, Cal., December 5.—The New Century Wheelmen have just issued a challenge to any club on the coast to participate in a ten-man team race on home trainers. The N. C. W. prefer to be pitted against the Garden City Wheelmen, but have not yet heard definitely from these riders. The time as well as the place are to be selected by the team accepting the challenge.

### MORRIS IN LOUISVILLE

LOUISVILLE, Ky.—J. M. Morris, representing Stevens & Co., of New York, was in this city recently, calling on leading dealers handling bicycles.

Digitized by Google

## THE SMITH MOTOR WHEEL MEETS WITH FAVOR IN THE TROPICAL ISLAND OF HONOLULU



**Left—Motor Wheels Are Used by Every Member of the Police Cycle Squad in Honolulu. Right—Native Boy Using Outfit**

### MANY FRIENDS ATTEND THE HENRY-HASSETT WEDDING

BUFFALO, N. Y.—Friends of the bride and bridegroom from far and near attended the wedding of John W. Henry and Miss Mary Cecelia Hassett in this city, on November 24. The latter is the daughter of Mr. and Mrs. John Hassett. The ceremony was performed by the Rev. David J. Mountain, of Belfast. Mr. Henry's best man was Harry O. Waite, and the bride was attended by Miss Helen Ahern, of Buffalo, and Miss Peggy Weaver, of Oil City.

Following the ceremony a wedding breakfast was served in the Gray Room of the Hotel Lenox. The favors were boxes of wedding cake monogrammed in gold with the initials of the bride and bridegroom.

Mr. and Mrs. Henry are now on an extended wedding trip and on their return they will be at home at 187 Richmond avenue.

Mr. Henry, who is president of the Vim Cycle Hardware Co., of Buffalo, was the recipient of many letters and telegrams of congratulation from friends in both trade and social circles.

### MACHINES IN GRIND

NEW YORK, N. Y., December 8.—The riders in the Madison Square Garden race are mounted on foreign bicycles with a few exceptions. European goods are in the majority of cases being used by the riders, while Australian mounts number three. The American bicycles used by the riders include Pierce, Grady, Hudson and McDougall, the latter being made by Donald McDougall, the former American and world's amateur champion. The list is as follows: Grenda, Bastide; Hill, B. S. A.; Corry, Caminade and Janu; Drobach, McDougall; Magin, B. S. A., and McDougall; Lawrence, Ixion and Caminade; Egg, Peugeot; Dupuy, Peugeot; Seres, Caminade; Linart, Caminade and Bastide; Walthour, Caminade; Moran, Bastide; Mitten, Chater-Lea; Hansen, Caminade; Eaton, Caminade; Madden, Caminade; Madonna, Caminade; Suter, Bastide; Sullivan, Itala and Caminade; Anderson, Caminade; Vanderstuyft, Pierce; Rudi-Russe, Caminade; Wohlrab, Pierce and B. S. A.; Kopsky, Hudson; Ryan, Caminade; Thomas, Bastide; Walker, Barb; Piercey, Caminade and Pierce; Hanley, Caminade and Bastide; Halstead, Caminade and Grady; Spears, B. S. A.; McNamara, McDougall; Carman, Bastide; Fogler, Bastide. All of the bicycles are equipped with the Pye-Musselman tires.

### FRENCH CO. HANDLING BICYCLES

WASHINGTON, D. C.—Howard A. French & Company's local branch has received a shipment of the complete line of Indian bicycles. This is a new departure for this branch as, although a full line of bicycles had always been carried by the Baltimore house, no bicycles were carried at the local store. J. Seabrook, manager of the local store, was so impressed by the new Indian line of bicycles that he decided to push them extensively.

The other local Indian agency, conducted by F. L. Leishear, has decided not to take on any bicycles at the present time. Mr. Leishear will, however, stock the new Indian featherweight motorcycle and concentrate his efforts on pushing this machine with the regular motorcycle line. After some little delay in receiving shipments, he is again in receipt of machines from the Hendee factory and is disposing of them as fast as they are received, at the rate of about six or eight a week. Mr. Leishear recently sold a 1916 two-speed Henderson equipped with the new Henderson Electric lighting system, to R. Jenkins of the U. S. Forest Service, Department of Agriculture.

### JAVA'S 1914 BICYCLE IMPORTS

During the year 1914 bicycles were imported into Java, Dutch East Indies, as follows:

From Netherlands, $304,292; Great Britain, $47,725; Germany, $17,663; Italy, $1,235; Straits Settlements, $1,023; all other countries, including the United States, $2,338.

### GOOD ROADS BOOM SALES

Cycle dealers in Coast cities of southern California are likely to reap a fine harvest when road improvements now projected are completed, say those who ought to know. Fred Hoffer, on his return from Ventura, Santa Barbara and towns north to San Luis Obispo, commented on the number of roads that are unimproved or under construction as being the only present obstacles in the way of active cycle sales. Riders from other localities going through this territory frequently speak of this condition. The state and county highway projects give assurance of marked improvements in the reasonably near future, and it is the consensus of opinion that good business will not be far behind the good roads idea.

### BICYCLES FOR CHRISTMAS PRESENTS

(Continued from page 45.)

dealer, the idea is likely to slip away and be lost in the crowding in of numberless other impressions. You must take advantage of what is merely a potential and possible purchase, and convert it into the actual by giving the prospective buyer something definite to hang his attention on. Your ad will do the trick.

Reference was made to the desirability of using large space. This does not mean that you should attempt to emulate the department stores; but it does mean that you should have enough space to give you a chance to say the things that need to be said. Simply, "Bicycles. All Makes and Prices. John Jones, 215 Market street," isn't enough. That would be all right for a standing card, but when you want to make people buy Christmas presents in your shop, you've got to put it up to them with a Christmas touch.

The copy suggested before gives the idea First you must have an attractive, convincing headline—something that will attract the eye of the reader. Then the next paragraph should logically give a reason for the purchase of bicycles at this time—that one would make an appreciated, sensible, useful gift, which would give enjoyment and value at the same time for a long while to come. The illustrations of the various machines and the detailed descriptions would be needed to enable the interested reader to make a mental selection, while the pictures themselves would also serve as attention-getters in the case of casual readers.

Incidentally, the man who reads an ad in the way suggested, and picks out the wheel he wants to get for his boy, is going to come in and hold out his money for you to take. There won't be any argument about it; he's sold. And in the rush of Christmas selling that helps a lot.

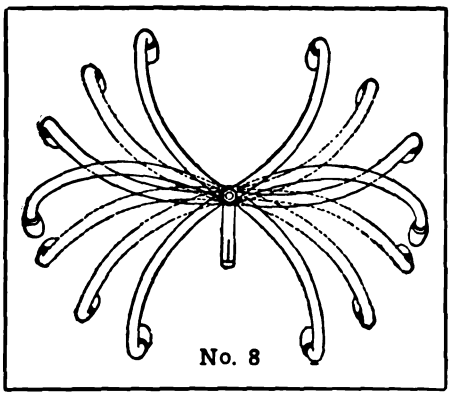
# Kelly Handlebars



No. 8

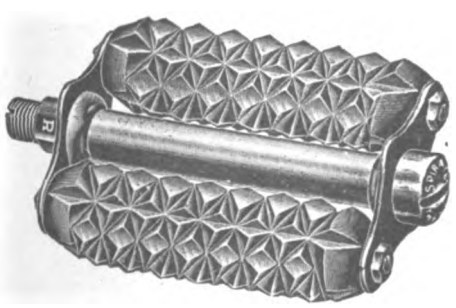
## Jobbers and Manufacturers Who Seek Standardization

should invariably equip with KELLY HANDLEBARS—the standard of the world. No high-grade bicycle is complete without KELLY ADJUSTABLE HANDLEBARS. With these handlebars, 25 different riding positions are possible. No other bar made allows anywhere near this number of different positions. KELLY HANDLEBARS ARE THE STRONGEST SELLING POINT A BICYCLE CAN HAVE.

They are the ideal bars for racing, distance work, boulevard riding, etc. Adjustable to ANY position.

**KELLY HANDLEBAR DEPT.**

**5017 Perkins Ave. Cleveland, Ohio**



No 5 PIRATE PEDAL

## *Two Pedals That Are Immensely Popular*

Their design and construction assure strength and comfort. Especially is this true of the No. 5 PIRATE, whose deep corrugated rubber cushions are not only soft to the feet, but absorb shocks and keep the feet from slipping.

The No. 4 STANDARD is a new addition to our large and comprehensive line of Rat Trap Pedals. It is strongly made, well designed and gives a splendid foot hold.

## *The Standard Co.* *Torrington Connecticut*

*Manufacturers of*

Diamond "E" Spokes and Nipples for bicycles, motorcycles, tricycles, velocipedes, invalid chairs, sulkies, carriages, cyclecars and automobiles. Pedals for bicycles, tricycles, velocipedes and motorcycles. Toe clips for bicycle pedals. Emergency axles for pedals. Screw machine products.

No. 4 STANDARD RAT TRAP PEDAL

# The Bicycle Is Back

——it's here to stay. And at the head and forefront of the return is the Pope-made bicycle - the preference of the Knowing Rider everywhere.

You know what this means in the way of profits for you. In a year that's bound to be *big* in the bicycle world, you're not going to let the other fellow get all the profits. You, too, will carry standard name-plate, Pope-made bicycles such as these -

| | |
|---|---|
| Columbia | Rambler |
| Tribune | Cleveland |
| Crescent | Pope |

When it comes right down to a question of sales in your own store you realize what it means to carry bicycles that have something behind them. In the minds of your customers everyone of these leaders represents quality. They are bicycles known for many years for the superiority of their workmanship, endurance and style.

You don't need to be a prophet to figure the profits that will be yours when you carry lines that are backed by this famous name—

# BOSCH

## MAGNETOS ARE MADE TO FULFILL A SERVICE—NOT TO MEET A PRICE

THAT in a nutshell is the reason for the wonderful success of Bosch Magnetos, the reason why more Bosch Magnetos are used on motorcycles than all other ignition systems combined, the reason you should insist that a Bosch Magneto be on the motorcycle you sell, if an agent, or buy, if a rider.

Not "How Reasonable" nor "How Cheap," but "How Good" is the watchword at the Bosch Factories. It is your guarantee that your Bosch Magneto will serve faithfully and efficiently without asking for a minute of your time for adjustments or replacements.

Look at any Bosch Magneto, inside and out, compare its material and workmanship with any other ignition device you may have considered—the decision as to Bosch Superiority is left with you.

BE SATISFIED **The Motorcycle you buy or sell can be Bosch-Equipt—insist.** SPECIFY BOSCH

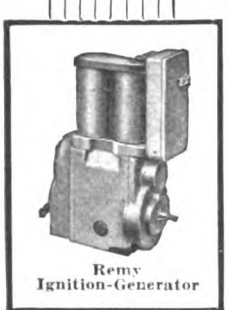
# REMY

## Motorcycle Lighting-Ignition System



Remy
Ignition-Generator

**Each do what they are intended to do**—but the modern invention is such a greater improvement that the old are gradually being discarded for many purposes.

Today electric lights are standard equipment on practically every automobile. People refuse to buy cars otherwise equipped because electric lights are so much better.

You are now offered electric lights for your motorcycle, just as efficient, just as powerful, just as desirable as on a motor car. The Remy system is built by the same company that makes lighting and ignition systems for some of the country's foremost automobiles, by engineers and workmen who know what are the requirements for motorcycles and guaranteed by this company.

No matter how full of ruts and bumps is the road, the lights throw a brilliant path far ahead into the uncertain blackness, disclosing every obstruction and make *night riding absolutely safe.*

High and low powered headlight, rear light, horn, and strong, reliable synchronized ignition. Easier cranking. Protected wiring.

A demonstration on the Harley-Davidson will convince you.

# "We Will Do Another Big Smith Motor Wheel Business Next Year" *Writes an Atlantic Coast Motorcycle Dealer*

EVERY dealer who handles the Smith Motor Wheel will do a big business —because the Smith Motor Wheel with a year's success behind it is established, and sales spread rapidly wherever it is introduced. Also because it is thoroughly practical, efficient and durable, and because of its many refinements and advantages it appeals to such a wide variety of people. Its market is not limited to a few—everybody buys Smith Motor Wheels, both sexes, all ages, boys and girls, men and women, whole families. And they buy bicycles too, the better grades of bicycles, at the same time they buy Motor Wheels, and from the same dealer. Also, special handle bars, saddles, lamps, horns, etc. It is a big business, isn't it? Then come in for the big Motor Wheel boom that is sweeping the country. Write for our 1916 Profit Proposition To Dealers. Tell us the lines you handle and the size of your business.

**Smith MOTOR WHEEL**

Detachable

***"The Bicycle Booster"***

**Attaches to Man's or Woman's Bicycle**
**100 to 125 Miles on a Gallon of Gasoline**
**Speed Up to 25 Miles an Hour**

***List Price $60 f.o.b. Milwaukee***

THE Smith Motor Wheel is the only bicycle motor on the market that is detachable. It is absolutely free from vibration, clean, simple to understand and operate, and requires no repair shop attention—once sold it never comes back.

# ARE YOU WELL FIXED?

Mr. Dealer, have you a line for 1916 that will sell quickly and stay sold?

Is the line of motorcycles you handle complete and comprehensive?

Does it include Light, Medium and Heavy weight models with a range of prices to meet all demands?

The successful dealer in 1916 will be one who has a line of machines all of a single make with established reputation, with sufficient variation in model to meet the requirements of the commercial user, tourist, speed enthusiast and the great growing class of buyers whose prime requirements are Comfort, Safety and Economy.

To carry a heavy machine of one make and a light weight of another necessitates doubled effort and advertising expense and deprives you of the prestige that goes with a single complete line with established reputation.

The EXCELSIOR line comprises the

| | |
|---|---|
| Ultra Power Three Speed Model 16-3 at | $250.00 |
| Model 16-1, identical with 16-3 except with single speed transmission, at | 225.00 |
| Model 7-T. S., medium weight two speed, and Model 7C, the same machine with single speed chain drive at | 200.00 |
| The EXCELSIOR Lightweight, single cylinder, two-stroke, two-speed, at | 135.00 |
| Model 16-S.C., the Ultra Speed Short Coupled Racer that holds World's Records for the majority of distances one to 300 miles, at | 250.00 |

With this line you have a machine for every purse and for every purpose, all backed by a single powerful organization, an absolute guarantee and a reputation

"THAT ALWAYS MAKES GOOD"

We have some open territory.

If you are not in RIGHT for 1916, get busy now.

# What We Have to

## The Intensive Co-operation Factory Organization Means

FIRST of all, we have the goods, a most comprehensive line of motorcycles and sidecars that is breaking all sales records.

### Prompt Deliveries

In keeping with the early show the Harley-Davidson factory organization backed up the early show with early deliveries. The result of this co-operation with our dealers this year is that our 1916 dealers' sales to date are actually double the 1915 sales in the corresponding period a year ago.

### Getting Prospects

To locate prospective motorcycle buyers we are inaugurating the most intense advertising campaign in our history. We are going to get thousands of inquiries from prospective buyers for our dealers to work upon. Not only will inquiries to the factory result from this advertising, but thousands of prospective purchasers will go directly to the dealers' salesrooms as a result of this advertising.

### Helps for Dealers

Catalogs and other strong advertising literature of course will be furnished without cost. Special selling helps will be supplied from time to time, such as window hangers, transfers, fence signs, and lantern slides.

### Harley-Davidson Service

For two years we have maintained an eight-hour spare parts service from the factory and our branches. Many dealers tell us they appreciate this service possibly more than any other one feature of the Harley-Davidson organization.

The Harley-Davidson branch at Atlanta, Georgia, is the only factory branch maintained in the South by any motorcycle manufacturer.

# ...o Offer Dealers

# ...f the Harley-Davidson ...omething to Dealers

## Here's the Result

Dealers are fast coming to realize that the Harley-Davidson organization is the best in the industry for them to tie up to. Early season shipments of Harley-Davidson motorcycles this year are the biggest in our history. We have added more than 100 new dealers to date this season, and more are signing up with us right along.

## Write Today

We have made several important changes in our representation and more changes are being made from day to day. Inactive dealers are being replaced by more active ones. Aside from these changes which will be made we have open a number of good localities where Harley-Davidsons are not as yet represented. If you are interested in our selling proposition write us today. Address Desk E.

# The "CHAIN TREAD" Motorcycle Tire

## Built Strong Enough For Automobile Service

THE "Chain Tread" Motorcycle Tire has the same design, the same heavy service construction, and the same high quality rubber and fabric that has made the "Chain Tread" automobile tire the sensation of the motor car world.

Built with strength enough for automobile service, the "Chain Tread" Motorcycle Tire gives remarkable mileage to motorcyclists.

Many leading makes of motorcycles and automobiles are equipped by their manufacturers with "Chain Tread" Tires. This is because the men who make motorcycles and motor cars know that the "Chain Tread" Tire gives real protection against skidding, and satisfactory mileage.

You can buy "Chain Tread" Tires from good dealers everywhere.

## RISDEN TAKES CLEVELAND FOR 8 WESTERN STATES

**Los Angeles Distributor to Handle New Lightweight in Vast Territory; Retains Indian in Southern California; Freed Will Distribute Indians in Northern California and Nevada.**

**REPLACING SAN FRANCISCO INDIAN BRANCH**

LOS ANGELES, Cal., Dec. 14.—One of the most important motorcycle trade developments of the new season comes in the form of a contract which has just been closed by C. Will Risden for exclusive distribution of Cleveland lightweight machines in eight entire States—California, Oregon, Washington, Nevada, Arizona, New Mexico, Idaho and Utah—Mr. Risden closed the contract by wire yesterday, and is already mapping a sales campaign along broad lines.

This is somewhat in the nature of a sequel to the deal of a few days ago by which A. Freed, of San Francisco, one of the largest jobbers in the State, took over the Indian representation in Nevada and all of California excepting ten southern counties. As is well known, Risden has been the Indian representative in southern California for many years. His territory is not affected by the Freed transaction, and he will continue to handle the Indian in conjunction with the Cleveland.

"My present facilities and my jobbing stock need greater territory in which to show their best results so the Cleveland deal fits into expansion plans which had already been formulated. The Cleveland appeals to a market entirely distinct from the Indian, and the machines are so different that there can be no conflicting demand. However, the same salesmen could not be expected to handle both, so I will build up at once a complete new dealer organization in the eight States allotted to me."

### FREED IS ON THE JOB

SAN FRANCISCO, Dec. 13.—The deal by which the Pacific Motor Supply Co. closed for the Indian was brought to a head by Sales Manager Frank J. Weschler, of the Hendee Company, who was in San Francisco for a week. The Indian factory branch in San Francisco will be closed and the stock of Indian motorcycles and parts will be turned over to the new representatives at once. Owing to the fact that the Freed company will handle the Indian only on a wholesale basis, it was considered advisable to confer with Indian dealers throughout the territory regarding the change, and at a meeting held in Stockton, and later at a conference in San Francisco, the leading Wigwam workers in the northern part of the State expressed themselves as entirely satisfied with the new policy.

Manager Ben Anderson and Cashier Dave Carlson will return to the factory in Springfield, Mass., while some of the other employees of the Indian branch will take up positions with the Pacific Supply Co.

The change is along the Hendee company's policy of closing branch establishments and handling the products through large distributors, and has been mildly hinted at for some time. It does not affect the southern California territory, where C. Will Risden remains the Indian representative, nor does it hit Oregon or Washington.

"My experience of 27 years in the cycle business places me in a position to give Indian as well as Thor dealers a highly efficient service," said President Freed, "and the business principles which have made my house a success will be scrupulously continued in the new territory. We have handled the Thor line for nine years, and our progress with it speaks for itself. There will be no conflict between the Indian and Thor lines; the former will be handled apart from our other lines."

### WESCHLER HEADS HOMEWARD

SAN FRANCISCO, Dec. 13.—Having swung the big Indian deal to a successful conclusion with the calm assurance characteristic of him, Sales Manager F. J. Weschler, of the Hendee Mfg. Co., left California today via Portland for the East.

## FEDERAL CONTROL PASSES TO FISK RUBBER COMPANY

**Merger Greatly Strengthens Fisk Position in the Tire Industry; Extensive Federal Plant to Be Operated as Before; H. T. Dunn Becomes President; B. H. Pratt Is New General Manager**

**FEDERAL WILL CONTINUE AS SEPARATE CO.**

MILWAUKEE, Wis., Dec. 14.—One of the most important changes in the tire industry has just been effected in the sale of the Federal Rubber Company, Cudahy, Wis., interests to the Fisk Rubber Company, Chicopee Falls, Mass. This transaction gives the Fisk people control of the extensive Federal automobile and motorcycle tire plant employing more than 2,000 men, and materially strengthens their position in the tire world.

It is announcd that the Fisk management contemplates no material changes in the present organization of the Federal company which will be continued substantially as it exists at the present time. It will remain and be operated as an independent and separate corporation.

Byron C. Dowse has disposed of his holdings in the company and has resigned from the board of directors, presidency and managership. He is succeeded by H. T. Dunn. The other officers will be: B. H. Pratt, vice-president and general manager; H. A. Githens, assistant general manager; H. G. Fisk, treasurer; R. C. Ward, secretary and assistant treasurer, and E. M. Bogardus, comptroller.

The number of directors is to be increased to nine and the new board will consist of H. T. Dunn and J. E. Kepperley, Toledo, O.; B. H. Pratt, H. A. Gothens and Richard Ward, Milwaukee, and H. G. Fisk, E. H. Broadwell, G. A. Ludington and E. M. Bogardus, Springfield, Mass.

According to Mr. Ward the Cudahy plant will continue to manufacture the Federal brand of tire along the same general policy line as at present.

The Fisk Company devotes its entire energy to the manufacture of tires, while the Federal Company in addition to making automobile and motorcycle tires, also produces general rubber mechanical lines. The Fisk plant in the east is one of the largest in New England.

# SAVANNAH TO SEE CHAMPION EVENT

**Race at Fifty Miles to Decide State Title Will Be Staged by Local Club on New Year's Day; Will Hold Old-Fashioned Christmas Party.**

SAVANNAH, Ga., Dec. 13.—The Championship Race of Georgia at fifty miles, which will see the top-notch riders of the State contesting, will be staged here on New Year's afternoon, according to plans now being completed by the Savannah Motorcycle Club. One hundred dollars in gold will be hung up for the prizes in this half century affair, which will be run off on a half-mile dirt track and open to all but ported machines.

As a preliminary event a ten-mile race is scheduled, the prizes for which will aggregate thirty dollars. Among those who are counted upon to make their appearance in these two races are: L. C. Buckner and John DeMontmollin, of Macon; Harry Glenn and Ed. Wilcox, of Atlanta; Martin Schroeder, Joseph Cafiero and Roscoe Harn, of Savannah.

A Christmas party will be held by the Savannah M. C. during the festive week. Arrangements have already been made for the purchase of a huge Christmas tree, and each of the one hundred active club members will be given a present by "Santa."

An old-fashioned oyster roast will be given by the club on Sunday, December 18, at the German Club. All sorts of games will be played and a corking good time is in store for those who attend. While no date has been set for the annual dance, it will probably be held on next Washington's Birthday. Reports from the Thanksgiving Day road races show that the club has cleared several hundred dollars and is today in better financial condition than it has been for the past seven years.

### ALTOONA'S LEADING BOWLERS

ALTOONA, Pa.—Messrs. Arthur Crum, Joseph Wolf, Dud Rogers, Robert Anslinger and August Butz, representing the Blair County Motorcycle Club, succeeded in hanging up one of the highest scores for the opening of the new bowling alleys here.

### FOUR NEW FIRESTONE BUILDINGS

AKRON, Ohio, Dec. 7.—Permits have been taken out by the Firestone Tire & Rubber Company for four new buildings to enlarge its plant. Two of the buildings will be five stories high, and the third one story. The cost of the structures is estimated at $75,000.

# NINE FINISH IN NOVEL TIME RUN

**Three Winners Awarded Poultry Prizes in Secret Schedule Event of Yonkers M. T. C.; Similar Runs to Be Held During 1916 Season.**

YONKERS, N. Y., Dec. 13.—Nine riders finished the social run of the Yonkers M. T. C. from this city to Peekskill yesterday, while five fell by the wayside out of the original 14 starters. The run was on a secret time schedule, but instead of the time being determined beforehand, slips bearing various times were put in a hat and one drawn at the finish; this slip determined the schedule. As a result, George A. Ellis, State F. A. M. Commissioner and president of the club, was awarded the first prize as having come nearest the time drawn. Ellis received a turkey. "Chick" Lyons, coming next nearest, received a duck, while H. Heldt, took third place and a pair of chickens as the corresponding prize.

The first leg of the run was to Peekskill, the start being made from Yonkers at 1:30 p. m. Arriving time at Sorenson's garage in Peekskill was between 2:30 and 3 p. m. From 4 to 5 was scheduled as the time of finishing at the clubhouse in this city.

Following is the list of entries:

George A. Ellis, Indian; "Chick" Lyons, Thor; H. Heldt, Indian; Charles Penne, Thor; R. Calahan, Thor; Rody Rose, Thor; Harry Williams, Thor; Joe Wasko, Harley-Davidson; Harry Backus, Harley-Davidson; W. Ewald, Thor; Gil. Hynard, Pope.

# SNAPPY RACING FOR BAKERSFIELD

**Spicy Variety of Events Will Be Staged on Mile Track by Fair Association . New Year's Day; Good Purse Offered to Bring Stars.**

BAKERSFIELD, Cal., Dec. 14.—Entries for the big motorcycle and bicycle racemeet, which will be staged by the Kern County Fair Association on its one-mile race track here on January 1, will close on Monday, December 27. In addition to the cycle races there will be a number of events for junior cars, but the two-wheelers will bask in the limelight.

The officials of the fair association have already signified their intention of having the race track in the best possible shape both for speed and safety. Records are expected to go tumbling in a heap, and a number of star riders will be seen.

Communications should be addressed to the Kern County Fair Association, 206 Broker building, Bakersfield, Cal. All checks should be made payable to the association. The events are as follows:

First Event—One-mile bicycle race for Kern County boys under sixteen years of age. Starts at 2 o'clock sharp. Special prizes to be announced at later date. (No fee.)

Second Event—Five-mile race for tourist. Machines must be ridden to Bakersfield, 100 miles, by race rider. Trophy first, also special prizes to be announced later. (No fee.)

Third Event—Five miles for side cars. Special prizes to be announced later. No fee.)

Fourth Event—Ten miles, motorcycles, for San Joaquin Valley riders only. Prizes: first, 30; second, $20; third, $10; fourth, $5. (Fee $1.)

Fifth Event—Twenty-five miles for junior autos. (Fee $1.)

Sixth Event—100 miles free for all. Purse $350, to be divided $150, $75, $50, $25, with extra $10 for leader at 25 miles, $15 for leader at 50 miles, and $25 for leader at 75 miles. (Fee $2.50.)

Extra Events—Trials against time for junior cars and motorcycles for one mile.

# RAPID GOODYEAR INCREASE SHOWN

## Earnings on Common Stock Approximate 5½ Per Cent. for Year Ending October 31; Total Sales Amount to $39,490,652 for the Same Period.

AKRON, Ohio, Dec. 10.—That the impetus received by nearly all branches of trade in this country has not missed the tire field is indicated by the statement of the Goodyear Tire & Rubber Company that its sales for the year ending October 31 amounted to $39,490,652, as against $31,056,128 for the preceding twelve months. The company's net income was $5,137,082.

The statement shows that the earnings of the company for the fiscal year, after all charges were deducted, were approximately 5½ per cent. on the common stock. The current assets of the company are $14,500,000, and its current liabilities $1,944,000.

The balance sheet as of October 31 follows:

ASSETS.

## DIXIE MAGNETOS FOR CONTINENTAL MOTORS

A RECENT equipment contract secured by the Splitdorf Electrical Co., Newark, N. J., was that of the Continental Motors Manufacturing Co., of Detroit, for Dixie 40 magnetos, cables and switches.

Large quantities do not necessarily follow this contract, but, as an example of the giant strides made by the Dixie magneto models in general adoption, the contract is significant.

The closing of the contract means that all Continental motors used for show purposes or submitted to manufacturers as samples will be Dixie equipped and so filled on orders.

## CHANGES MAY BE MADE IN HENDEE BRANCH

TORONTO, Ont.—Rumors to the effect that important changes affecting the Canadian branch factory of the Hendee Manufacturing Company would be made were partially substantiated by a local officer of the company when interiewed by the Canadian representative of **Motor Cycle Illustrated.**

In answer to the question whether the factory was to be removed to another Canadian city, this official declared that he could not make a statement at the present time, but that an official announcement would be issued in about two weeks.

# PORTLANDERS TO RIDE ALL NIGHT

## Annual New Year's Grind Starts at Midnight on December 31 and Finishes Following Afternoon; to Cover 235 Miles in 13½ Hours.

PORTLAND, Ore.—Starting at midnight December 31, Portland M. C. will hold its third annual New Year's endurance run, covering a 12-mile course of 18 laps in the eastern part of Multnomah County and finishing early in the afternoon of January 1. The event will not be as severe as in previous years, but the checking will be attended to more painstakingly, and special attention will be given to riders who check out with broken or missing machine parts.

The running schedule will be reduced to 20 miles an hour, and there will be a time check after each lap of 12 miles. There will be no opportunity for a rider to speed around the course and then make a stop for repairs or adjustments; consistent riding from the start to finish is all that can give a contestant a perfect score. No rider will be permitted to receive outside assistance at any time, except when taking on gas and oil.

One hour will be allowed during the run for lunch, and four minutes on each lap for checking. The total time for the contest will be about 13½ hours, and the distance 235 miles. The entry fee will be $3 up to the night of December 30, and $5 for post entries. Prizes will be gold medals for perfect score winners and merchandise awards for the other finishers.

# QUINLAN TALKS ON DELIVERIES

### Cleveland Demonstrators for Dealers Are Now Being Shipped and General Output Will Be Started January 1 at Rate of Ten a Day.

NEW YORK, Dec. 13.—If the trade holds any "Doubting Thomases" with respect to the future of the lightweight motorcycle, certainly W. S. Quinlan, sales manager and secretary of the Cleveland Motorcycle Manufacturing Company, of that Ohio city, is not among the number. Speaking of the lightweight movement in general and the Cleveland prospects in particular Mr. Quinlan, who has spent the last few days in New York on business, said that his concern was particularly gratified to learn from its dealers who have already received and shown their demonstrators, that the little two-cycle machine interests a large number of people who heretofore could not be induced to look at a two-wheeled motor vehicle.

Following along this line, Mr. Quinlan read a letter from Earl Braunlich, who has taken the distribution of the Cleveland for Wheeling, W. Va., and who has already received the demonstrating mount. Braunlich said in his letter that the machine has attracted considerable attention wherever shown and that he has lined up a great number of prospects from all classes, both young and old, who were heretofore considered outside the pale of motorcycling influence.

From these indications, Mr. Quinlan says, the Cleveland people are led to believe that the call for lightweights during the coming season will be far in excess of what they had first hoped for. In fact, so confident are the Cleveland folks that their lightweight is going to emulate the proverbial "hot cakes" that—having already contracted for the materials which are to enter their estimated output—they are at the present moment bending all efforts to tie up more materials to take care of additional business which is already in plain view.

#### A Remarkable Offer

In this connection Mr. Quinlan mentioned a bid from a foreign concern with which the company was favored. Having demonstrated the little machine to the entire satisfaction of the agent for the foreign company, the Cleveland firm was made an offer for the entire output of the factory during the next year, an offer which, despite its greater yield of revenue to the Cleveland concern, could not be accepted for obvious reasons.

Materials, of the desired Cleveland standard, have been hard to obtain and have somewhat handicapped the company in the matter of deliveries. However, as they have now come to hand Mr. Quinlan states that deliveries are going forward in proper style. During the remainder of the present month the factory will be turning out and shipping dealers' demonstrators only, but beginning January 1 machines to take care of the dealers' demand will be forthcoming at the rate of ten a day. Within sixty days after that the output of the factory will be doubled, so that the machines will be shipped at the rate of twenty a day. On the score of deliveries Mr. Quinlan says there is not a thing for the Cleveland dealer to worry about.

If there is one feature of their machine that the Cleveland folk are more proud of than the perfectly balanced two-stroke motor, that feature is the driving system incorporating a worm-driven countershaft, and pride in this detail was reflected throughout every stage of Mr. Quinlan's talk. Not only is this drive smooth and silent, Mr. Quinlan pointed out, but it is so well designed and lubricated, that the frictional losses between the motor and the rear wheel are reduced to a stage where they are practically negligible and in a lightweight with low-powered motor this is a matter of extreme importance.

### F. A. M. PAYS 27th REWARD

WESTBORO, Mass.—The twenty-seventh reward for the recovery of an F. A. M. member's stolen motorcycle was paid recently to Officer Luther Beauchamp, of the Chicago police. The machine belonged to A. W. Anderson of Chicago, Ill., who joined the Federation on July 8, 1914. It was stolen the next day and recovered July 6, 1915 by Beauchamp and the thief arrested, and sent to prison.

### MANY OFFICIAL COLLECTORS

Secretary-Treasurer G. B. Gibson, of the F. A. M. states that 437 certificates have been issued to official collectors up to the 11th of December. Many applications have been reecived through this scheme of collecting.

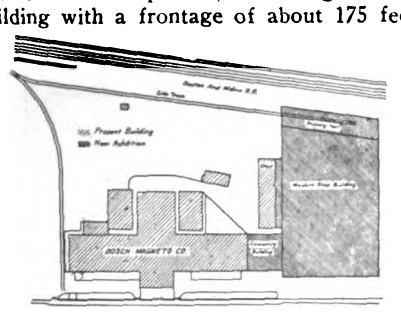
# BIG EXTENSION TO BOSCH PLANT

**Addition to Factory in Springfield, Mass., Now Nearly Complete, Will Afford 60,000 Square Feet and Provide Special Shipping Facilities.**

SPRINGFIELD, Mass.—The already extensive Springfield, Mass., factory of the Bosch Magneto Company, in which all Bosch magnetos sold in the U. S. A. have been manufactured since its complete occupation in 1912, has been further augmented by a large addition providing more than 60,000 additional square feet. The new building which might be termed an annex of the Springfield plant, makes the Bosch factory the largest works in this country for the production of magnetos. It is the expectation of the officials that the greater facilities will make it possible to speed up production to a point where the supply will be more in keeping with the increased demand, which has grown considerably during the past year.

The new addition, which by the way, is well toward completion, is a single story building with a frontage of about 175 feet



**Ground Plan of Bosch Works; Shaded Portion at Right Is the New Addition**

on the main street. In addition to this building there is a connecting building and shipping hall, which also provide considerable new space.

The outside walls of the new building are brick and concrete and are in keeping with the present rich appearance of the main building. The roof is arranged in saw tooth form, providing the maximum of light and ventilation, for the new building will be completely filled with large automatic lathes and machines of similar character, it being the intention of the management to segregate this type of work in a single section if possible.

The shipping hall in itself is rather extensive, since it can accommodate five freight cars at one time; thus the shipping and receiving of the necessarily large quantities of heavy material can be done entirely within the building, thereby greatly facilitating the handling of material. A new side track has been laid to run from the Boston and Maine Railroad into the shipping hall, making two sidings running into the factory directly from the main line.

Practically all the machinery for the new building has been bought and delivered, so it is expected that the advantages of the increased space will immediatcly evidence itself in greater production.

**DEMONSTRATING CAPABILITIES OF SIDECAR AND MOTIVE POWER**

**George M. McCune, of Philadelphia, Pa., Taking a Curve on His Flxible Sidecar Combination; His Machine Is an Emblem Twin Which He Says Unfailingly Delivers the Goods**

## DAYTON PLANT AT CAPACITY

DAYTON, Ohio.—The Davis Sewing Machine Company is working its cycle plant to full capacity to handle the large number of orders that have been received within the last few weeks. There has been no letup by the company during the past year of depression in their camapign for more business on bicycles and motorcycles.

They report that the new Dayton Motor Bicycle has aroused an unexpectedly large demand. More men are added daily to the payroll of the cycle department and the largest year's business of the company's career is predicted for 1916.

## OHIO LICENSE PLATES

COLUMBUS, Ohio.—The distribution of 1916 number plates for motorcycles will start the day following Christmas, under the auspices of the Ohio Automobile Department. Quite a few applications have been received for 1916 registration.

## FARGO ON BUSINESS TOUR

LOS ANGELES, December 13.—Hugh A. Fargo, Pacific Coast representative of the Henderson Motorcycle Co., has just returned from a tour of southern California on which he closed contracts with dealers and found a lively demand for the new Hendersons. In San Diego, C. A. Sheppard & Co. will handle the Henderson.

## DON'T FORGET THE CYCLE PARTS LUNCHEON

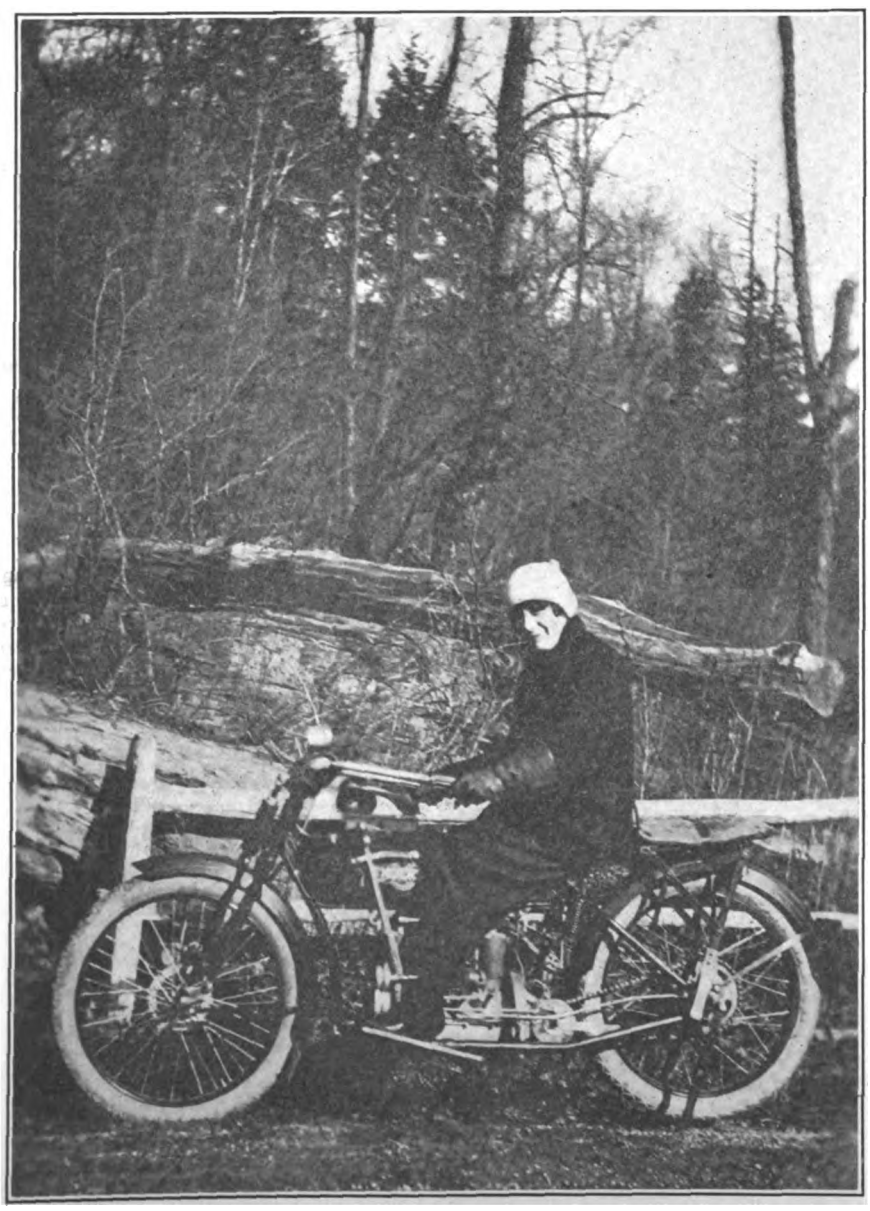
ERIE, Pa., Dec. 7.—Within a few days the Committee of Arrangements having in charge the mid-winter luncheon of the Cycle Parts and Accessories Association, to be held at the Hotel Astor, Thursday, January 6, will send out a letter to the trade calling attention to the fact that general plans have been completed for the event. Those who intend to be present—and who doesn't?—are requested to communicate with the committee at once in order that suitable accommodations can be arranged for. Letters may be addressed to C. E. Morehouse, care of The Standard Company, Torrington, Conn., or to W. J. Surre, care of Continental Rubber Works, Erie, Pa. Tell these gentlemen how many trade enthusiasts they will have to entertain at the luncheon and they guarantee to do the rest.

As has already been explained, the luncheon will be tendered by the Cycle Parts and Accessories Association to the Cycle Jobbers' Association of America and the bicycle manufacturers, and will follow the mid-winter business meetings of these trade bodies, which are to be held at the Hotel Astor on the morning of January 6. As soon as the business sessions are over, the luncheon will be served.

### DESSEZ WAS WINNER

WASHINGTON, D. C., Dec. 14.—Through an error on the part of the official scorer at the Thanksgiving Day race meet held at Laurel, Md., by the National Capital Motorcycle Club, of Washington, and the Maryland Motorcycle Club, of Baltimore, William Denham was credited with having made the fastest time of the day. As now corrected, it appears that the honor belongs to Victor Dessez, who rode the second mile of the five-mile race for racing machines in the fast time of 53 seconds, thus breaking the track record of one minute flat, set by Chic Thomas, of Baltimore, several years ago.

## WHY THE SPORT IS FASCINATING IN ALTOONA, PA.



*A Glimpse of Rugged Pennsylvania Country and a Fair Roadster Whose Confidence in Her Henderson Enables Her to Smile Regardless of Hills. Bruce S. Paul, of Altoona, Who Forwards the Photo, Vouches for the Young Lady's Enthusiasm.*

## BECK HAS DELIVERED 100 ROGERS SIDECARS

NEW YORK, N. Y., Dec. 13.—Irving Beck, factory representative for the Rogers Manufacturing Company, maker of Rogers sidecars, at 326 West Madison street, Chicago, Ill., has sold and delivered 100 Rogers sidecars to date throughout his territory. Of this number 17 went to Philadelphia, 20 to Bridgeport, Conn.; 16 to Newark, N. J.; 16 to Baltimore and Washington; 10 were delivered in New York City, and the remainder went to Schenectady, Little Falls, Albany, Syracuse, Rochester, and other cities in New York state.

"In addition to this 100 which I disposed of, the factory has sent 20 to Boston," said Beck. "This, of course, does not represent all the Rogers sidecars of 1916 brand that have been turned out to date by any means. I expect four carloads in all before the snow is off the ground, and have every reason to be able to dispose of 600 at least for the entire season." While Mr. Beck has his headquarters at 1493 Fifth avenue, he is looking for a warehouse in another part of the city in order to take better care of his shipments.

### CLUB ELECTS OFFICERS

WHEELING, W. Va., Dec. 11.—At the annual meeting of the Wheeling M. C., last Tuesday, the annual election of officers was held with the following results: President, J. Loudon Beir (re-elected); vice-president, Thomas Garden; secretary, Carl Glasser; assistant secretary, Paul Dangli; treasurer, Harry Douglass; captain, J. P. Wasmuth; first lieutenant, D. H. Mickels; second lieutenant, Emory Herrold; directors-at-large, H. A. Brady, C. K. McCluskey; sergeant, Ted. Jones.

It was decided to hold another turkey run on the Sunday following Christmas, and a long distance race in Ohio at a later date.

### A SURPRISE FOR WELLSBURG

WELLSBURG, W. Va.—Fred J. C. Dean, of Pittsburgh, and Miss Mae A. Hoffmaster recently hummed into this city with a motorcycle and sidecar, bound for the marriage license bureau. A short time later they were Mr. and Mrs. and their honeymoon trip was started in the nature of a run by motorcycle back to Pittsburgh. "Folks have come here to be married in almost every kind of a conveyance under the sun," remarked the local J. P., "but this is the first motorcycle romance we have helped to bring to a climax. Aeroplanes next!"

### RUHLE IN LOUISVILLE

LOUISVILLE, Ky.—W. J. Ruhle, traveling for the Harley-Davidson Motor Company, was in Louisville last week calling on Kline Brothers, who represent the concern in Louisville, Jeffersonville and New Albany, Ind.

# BUSY WEEK DUE FOR CYCLE MEN

**Rapid-Fire Schedule of Meetings Is Arranged for January 5-6, During Week of New York Automobile Show; Committeemen Named.**

NEW YORK, Dec. 14.—At the conference to be held in this city on Wednesday afternoon, January 5, concerning the dates for next year's shows in New York and Chicago, the Cycle Jobbers' Association of America will be represented by Fred I. Willis, J. W. Grady and J. F. Beck, Jr., and F. W. Ash, J. P. Fogarty and Keyser Fry will be the spokesmen for the bicycle manufacturers. These six representatives will meet with the committees from the Motorcycle Manufacturers' Association and the Cycle Parts and Accessories Association at 4:30 in the Hotel Astor, at which time all the various angles of the show date problem will be considered.

That there will be no end of activity in cycle trade circles during the week of the New York Automobile Show is indicated by the following schedule of meetings, all of which will be held at the Hotel Astor:

January 5, 10 a. m.—Meeting of directors of the Cycle Jobbers' Association of America.

January 5, 3 p. m.—Meeting of the Standardization Committee of the Allied Cycle Trades.

January 5, 4:30 p. m.—Conference of committees representing the Allied Cycle Trades to decide upon dates for the New York and Chicago cycle shows.

January 6, 10 a. m.—Meeting of the Cycle Jobbers' Association of America.

January 6, 1 p. m.—Luncheon given by the Cycle Parts and Accessories Association to the Cycle Jobbers, Motorcycle Manufacturers and bicycle manufacturers.

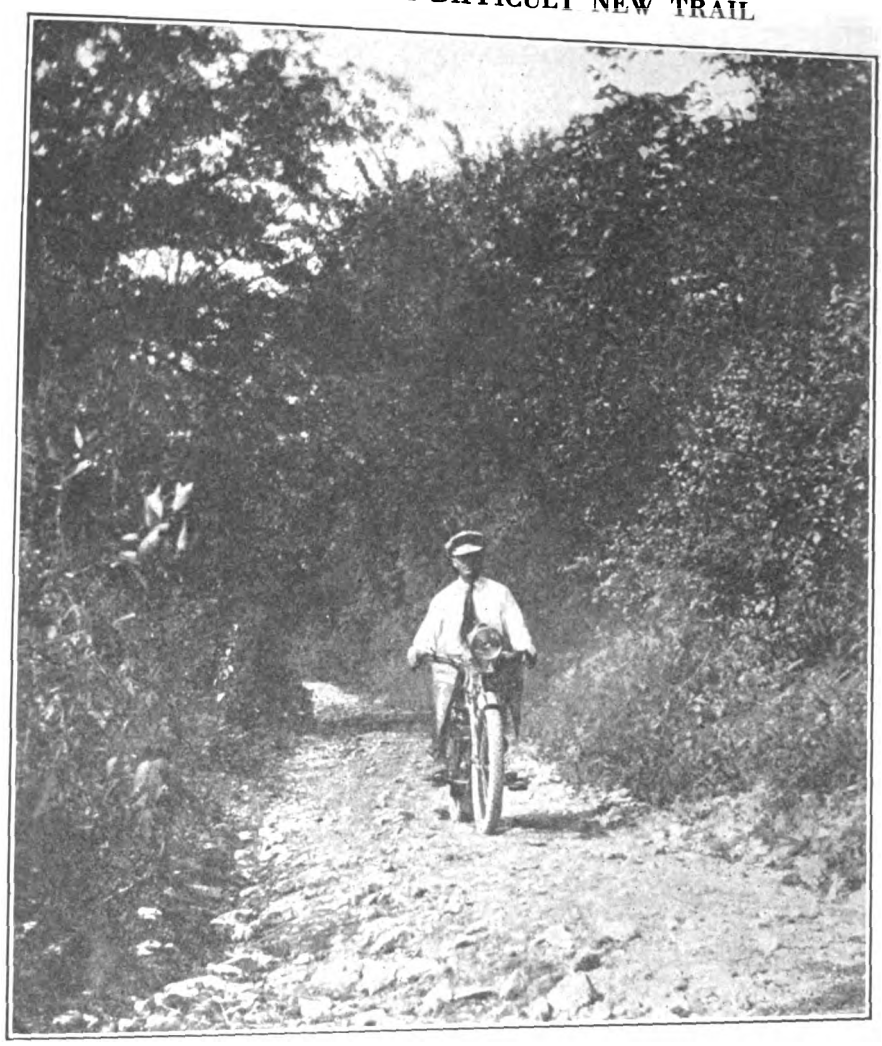
January 6, 3 p. m.—Meeting of bicycle manufacturers to discuss the recommendations made by the Standardization Committee.

## SWENSON DELIVERS SIDEVAN TO PROVIDENCE TRIBUNE

PROVIDENCE, R. I., Dec. 14.—The Providence *Evening Tribune* has just received the first of the three Indian motorcycle delivery vans which were ordered from B. A. Swenson at the recent Providence motor show. These machines will be used to distribute the output of the *Tribune's* presses in the city and suburbs.

As soon as the first machine arrived it replaced four teams. It is expected that the full complement of sidevan combinations will supplant about fifteen teams. The motorcycles are of the Indian Powerplus F-3 type. The order resulted from a demonstration which Swenson gave last July, when a three-day strike of the electric car service crippled the delivery system of the *Evening Tribune*. Using a sidevan the Providence Indian distributor put the papers out at a greater speed than the trolley, and proved that the outfit was most economical and efficient in making not only suburban but also city deliveries.

## EMBLEM BLAZES A DIFFICULT NEW TRAIL



*That This Rocky and Tortuous Hill in the Mountain Country of Northern New York State Would Not Invite the Ordinary Motorcyclist Goes Without Saying, but the Emblem Rider Made the Hazardous Ascent Without a Slip or a Halt.*

## ROYAL EQUIPMENT SUES RICH AUTO SUPPLY

NEW YORK, N. Y., Dec. 10.—The Royal Equipment Co., maker of Raybestos friction fabric, at Bridgeport, Conn., has filed suit against M. Rich, operating as the Rich Auto Supply Co., claiming infringement of the "Raybestos" trademark. The suit has been brought in the U. S. District Court in this city.

The Royal company states that "Raybestos" was registered as a trademark on June 29, 1909, after having been in use for two years, and is covered by certificate No. 74,306. On February 16, 1915, the use of a silver-colored coating on the edge of Raybestos brake and clutch lining was also registered as a trademark, No. 102,640. Infringement of both these trademarks by selling as genuine inferior lining bearing them is claimed against Rich.

## WOODLEY WILL FEATURE THE EXCELSIOR LIGHTWEIGHT

VANCOUVER, B. C., Dec. 14.—The business of the Ross Motor Company has just changed hands, the new owner being W. E. Woodley, lately a demonstrator with Haskins & Elliott, agents for the Smith motor wheel. Mr. Woodley acquired the stock of the Ross Motor Company, and intends to continue the agency for the Excelsior machine, held for a number of years by the old firm. The lightweight Excelsior will also be featured by the new management, which will operate under the name of the Excelsior Cycle Company. The new model "4" or lightweight has already been received and aroused widespread interest.

## "CANNON-BALL" IN HONOLULU

SPRINGFIELD, Mass.—The first bulletin from Erwin G. Baker since he left San Francisco has been received from Honolulu where his steamer, the Sonoma, remained a day before proceeding to Australia. During his stop Baker was entertained by President E. O. White, of E. O. Hall & Son, Ltd., the company which handles the Indian in Honolulu, was given a glimpse of the "Pali," a part of the road over which he expects to make a record in the spring and was also shown about the city by Frank Tavares, who holds the motorcycle record around the island of Oahu.

# On the Pacific Coast

### BUTLER FINDS DEALERS HAPPY

LOS ANGELES, Cal., Dec. 12.—Manager Thomas C. Butler, Jr., of C. Will Risden's establishment, recently fetched out his '16 Powerplus Indian and took a little trip to San Miguel in order to get acquainted with some of the riders and dealers along the coast. Wherever he went his new machine made a hit and he claims that he never learned so many adjectives in his life, as when he listened to the outcroppings of enthusiastic riders who took a sample spin on Butler's machine.

Risden's manager found the dealers' welcoming the Indian Featherweight with open arms, for most of the agents had many prospects to whom the light machine would make a strong appeal.

### FULLER LANDS HENDERSON

TACOMA, Wash., Dec. 11.—H. C. Fuller, the hustling dealer whose store is located at 1014 Tacoma avenue, announces that his place will be headquarters for the four-cylinder Henderson for the '16 season. While the contract which Fuller has signed calls for quite a sizeable bunch of machines, Fuller is very optimistic and modestly promises his friends that he will sell more than the contract quantity before the season is half over. Fuller is considering a change in location for his store, in order to provide better accommodations.

### ELLIS BROTHERS SOLD 16

SEATTLE, Wash.—Ellis Brothers, Smith Motor Wheel agents, have disposed of 16 of these machines since taking the agency. Among the purchasers were two R. F. D. carriers and a clergyman, the Reverend Mr. Train. The latter makes his parochial calls on a bicycle which is Motor Wheel fitted and states that he is able to cover more ground and keep better in touch with his "flock" than heretofore.

### HIGH GAS PRICE IN TACOMA

TACOMA, Wash., Dec. 6.—During the past month the price of gasoline has steadily advanced, making on an average an increase of 1 cent each week, until on December 1 it reached a retail price of 15½ cents, the highest it has been for several years.

### DEALERS TO MEET REGULARLY

SEATTLE, Wash.—Local dealers are endeavoring to get together at least twice a month in the evening to discuss trade subjects for their mutual benefit. Credits seem to be uppermost in the minds of most agents. The next meeting will be held at the store of Piper & Taft, Excelsior agents. It has been decided that no officers will be elected, but that a chairman will be appointed for each meeting.

### 1916 MODELS DRAW CROWDS

PORTLAND, Ore.—Big crowds congregated in front of two agencies in this city during the first week in December to see the new 1916 Indian models. The premises which attracted the gatherings were those of the Jefferson Cycle Co., at 273 Third avenue, and H. Lystul, of 488 Union avenue, both retail dealers. Since the arrivals, the two agents and their helpers have been busy demonstrating.

### BUSINESS AND PLEASURE

SEATTLE, Wash.—Fred Mercer, Indian agent in this city, recently piloted a party to the municipal power plant at Cedar Falls, covering 126 miles in all. The Seattleites were treated to a chicken dinner by the plant employees and just before leaving the works, Mercer got his deposit from M. H. Fogh, of the executive force of the plant. Fred thus combined business with pleasure on the trip.

### RYDMANS CHANGE QUARTERS

PORTLAND, Ore.—Rydman Brothers, one of the oldest motorcycle and bicycle dealers in this city, have moved to 60-62 Broadway from their old place at 309 Oak street. They will continue to handle their old stand-by, the Reading Standard, and will add the Flying Merkel as a retail agency and parts for the States of Oregon and Washington.

### GOOD PAYING INVESTMENT

LOS ANGELES, Cal.—Lester Miles, local Harley-Davidson agent, has just sold Banker & Hoffman, butchers, of Jefferson & Vermont avenues, two 1916 models. The transaction was a cash one, the butchers stating that their 1914 Harley-Davidsons paid for themselves and were written off the books in 21 months. Banker & Hoffman will sell the old machines themselves and whatever they get for them will be clear gain.

This firm has been using motorcycles since 1910 for special work and has employed good boys as drivers, paying them $18 a week. Their business has grown wonderfully as a result.

### SIGN UP SIX NEW ONES

SEATTLE, Wash.—Ballou & Wright, Indian representatives for this State, have signed up six new agents for the Hendee product during the last month. These are: Ellensburg Cycle Co., Ellensburg; A. A. Bailey, Everett; Shuk Bros., North Yakima; Miles & Schofield, Olympia; E. A. Tucker, Anacortes, and Gould Bros., Aberdeen.

### BANKS IN EIGHTH SEASON

EVERETT, Wash.—C. A. Banks has signed up again for the Excelsior, this being his eighth season. In addition to having sold many Big X mounts Banks has several road records to his credit.

### OUT FOR 1916 TAGS

Oregon motorcyclists are now making a bid for low license numbers. The 1916 license tags will be crimson with numbers in white. It is the policy of the motor vehicle department to change the color of the tags each year.

### AT DIXIE HIGHWAY MEETING

CINCINNATI, Ohio.—A large number of local members of the Dixie Highway Association attended a meeting held last week across the river in Covington, Ky., by the Covington Industrial Club, in the interest of the highway. The purpose of the visit was to discuss the steps to be taken in Hamilton county, in which Cincinnati is located, to continue the line of the highway.

## BLOCKING THE ROAD

UNLESS cool heads at Washington succeed in obtaining modifications of President Wilson's plan for financing his National Preparedness policy, motorcyclists, with other motor vehicle users the country over, will have on their hands another fight against class legislation. The proposal to tax all gasoline motors 50 cents a horsepower, and to impose a tax of one cent a gallon on gasoline, as suggested in the President's message to Congress, is openly discriminatory and would assume the proportions of a blow at the motor industries.

The standard twin-cylinder motorcycle, at its nominal rating of seven to eight horsepower, would become subject to a government tax of $3.50 to $4.00, a development which could not fail to inflict hardship upon the trade. Just how the tax would be levied and collected are details not entered into by the President; but the outstanding fact is that the jolt attendant upon a tax of 50 cents per motorcycle horsepower would be felt from factory to rider.

National Preparedness, financed equitably through a reasonable and uniform tax on all branches of industry, is a measure that will have the hearty support of motorcycle men in and out of the trade, but when it becomes a matter of blocking the road of progress with the Big Gun of class taxation the situation sacrifices its best potentialities for the enlivening of national feeling and narrows itself almost to the sordid aspects of a hold-up.

As viewed by Uncle Sam from behind the Big Gun the motorcyclist may not appear to be an imposing figure, but he has his place in the everyday life of the nation, and is filling it with ever-increasing ability and conscientiousness. He is one of the huskiest and most deserving sons in our national family, and is not to be dealt with too high-handedly. England went to bed one fateful night with her nose somewhat in the air as concerned motorcyclists, and awoke to shed thankful tears on their army khaki.

### Meeting with Opposition

At this writng the tax situation has not taken form. It may change along any one of a dozen lines before Congress finally gives it approval, if it ever does. It is already stated that the Congressional Committee on Appropriations is opposed to a government tax on either gasoline motors or gasoline. One of the members of the committee expressed the sentiment that motorists are sufficiently taxed by their various state governments, and that an additional national tax would be both bad business and poor politics.

**Motor Cycle Illustrated** will inform its readers of developments, and will hold itself ready, as usual, to go considerably further if the necessity for a national campaign of protest becomes manifest.

## MORE MOTORCYCLES NEEDED

NEW YORK, Dec. 14.—That the motorcycle as an aid in the regulation of traffic in New York City has fully justified the confidence reposed in it by the police officials is again called to attention by a letter appearing in the New York *Sun*. The writer discusses the traffic problem interestingly, especially as it concerns reckless automobile driving, and argues that the only solution of the trouble at present experienced lies in the purchase of more motorcycles by the Police Department.

It is pointed out that a reckless autoist pays little or no attention to the foot policemen, and that even a horse-mounted bluecoat is looked upon with something approaching disdain. But the motorcycle officer commands instant respect, simply because he is in a position to beat the speeder at his own game. The writer refers to the fact that the New York squad of motorcycle officers has been augmented rapidly during the last year, but argues that the rate of increase has not kept pace with the growing lawlessness of a certain class of automobile drivers.

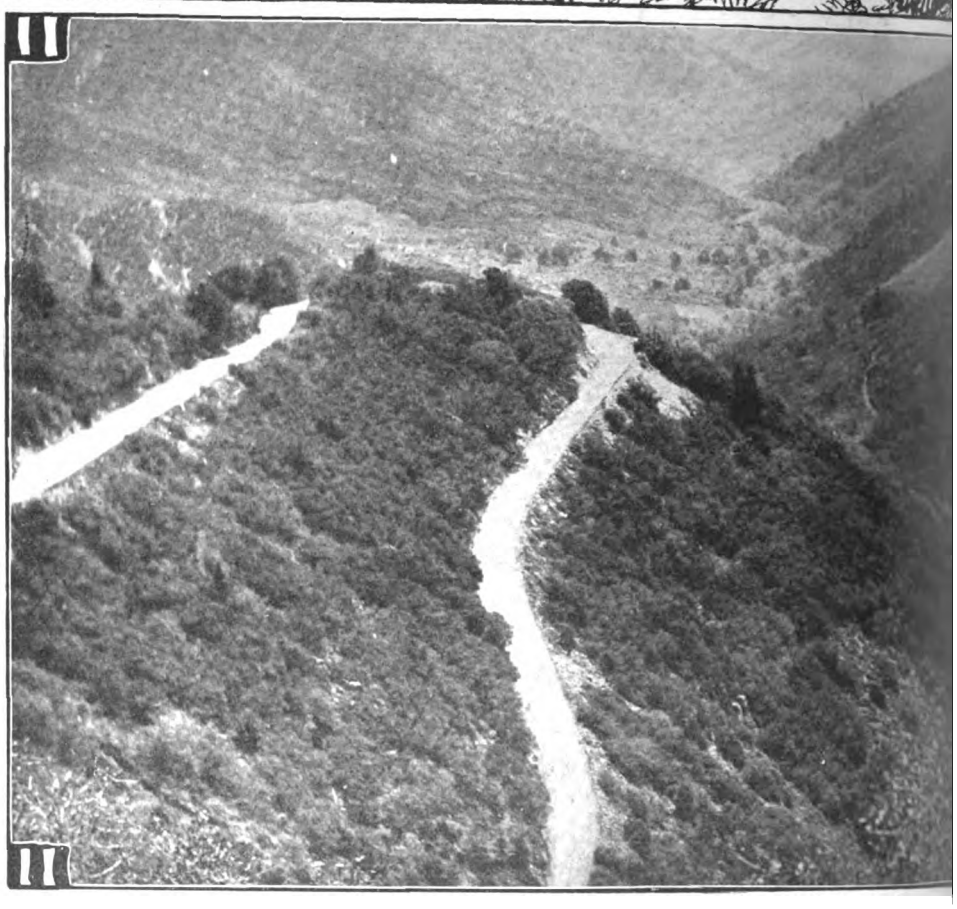
# It's a Long, Long Way to Bear Valley

By George Marion Fuller

MY wanderings about my home town, Long Beach, Cal., convinced me that there was no excitement in the air on the day I have in mind, and I was pretty well disgusted with the idea of sitting around without anything in the nature of a thrill. In fact the general atmosphere of the town that day was only fit for an undertaker. And being a motorcycle man I naturally had to be up and doing something. I was thinking over how I had best spend the day, when into Fuller Brothers' shop came a young friend of mine, Rex Tanberg, who proposed that we take a ride to Bear Valley. So Bear Valley it was.

### 125-Mile Journey

The distance is about one hundred and twenty-five miles, but ninety-one miles of this is over well-paved macadam roads. We took along with us two extra ten-tooth sprockets, in expectation of doing some lively hill climbing before the journey was over.



Part of the Winding Road Leading from Arrow Head Hot Springs to Switch Backs, Nineteen Miles. Tanberg Found Good Use for Their Ten-Tooth Sprockets in Negotiating

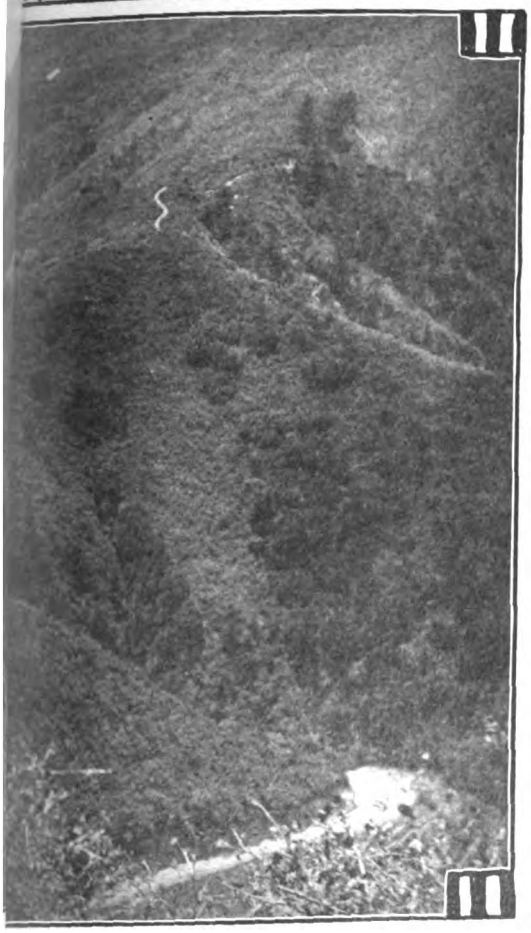
First we tackled the foot hill boulevard by way of Pasadena to San Bernardino. This is an excellent route, affording the easiest kind of going imaginable. In fact, we were having a regular joy ride, until we struck the Arrow Head Hot Springs when the hills began to get quite steep. Here our good foresight in providing ourselves with extra ten-tooth sprockets for the motor shaft certainly justified itself.

From Arrow Head out began about nineteen miles of stiff up hill work, which an automobile could only have done on low gear. But we had no trouble of any kind for the roads were all made up of fine dirt

Hard Going Near Little Bear Lake—Both Fuller and His Riding Mate Had to Push Through This Snow Drift High Up in the Mountains

Trout Fishing at Little Bear Lake

Digitized by Google



y Climb Amid Luxuriant Foliage. Fuller and Tan- an] Steep Stretch

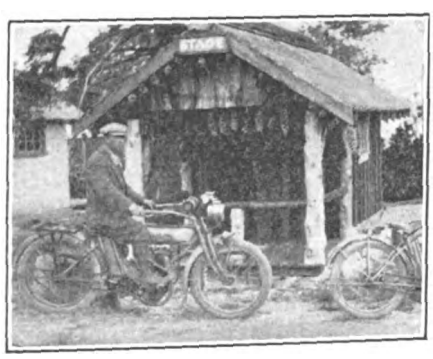
and there were no loose rocks to bother us. Soon we came to a level stretch again, called Switch Backs, and we stopped to let the motors cool and view the scenery.

It was almost dark before we reached a place known as Pine Crest, where we had planned to spend the night. Pulling up at the hotel, we hopped out of the saddle and, shoving the machines into a log cabin garage, we made inquiries concerning accommodations. Well, the hotel folks had something for us to eat, all right, but when they showed us to our rooms Rex Tanberg almost fainted. Of course, I don't do such things—I took the situation in a philosophical way. For after all there are worst things in this world than log beds with mighty little on 'em to afford a soft rest for weary bones. Rex got into bed with a groan—he was used to feathers. But we sank into slumberland in a jiffy, for the long ride and the cool, brisk mountain air made us comfortably sleepy.

We slept much better in our log beds than we thought we would. Early the next morning Rex and I were thoroughly refreshed, though to be sure our bones did ache just a little. Though we were about eighteen miles out from Little Bear, we arrived there in time to see over a thousand early risers fishing in the lake. For a while we stopped and watched them pull up one fine trout after another.

**Route to Big Bear Closed**

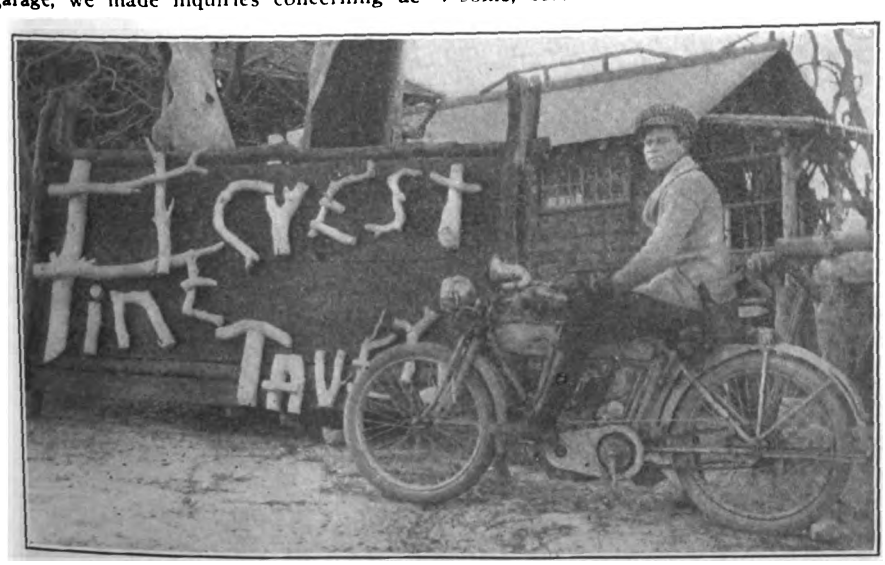
At length growing weary of watching the fishermen we struck out for Big Bear Lake, high up in the mountains. We had ridden but a few miles when we encountered a bit of snow, and as we ascended higher up we reached a drift that caught the machines like a vise and held them tight. We had to get out of the saddle and push some, before the snow drift would loosen its strong hold. Hardly had we gone much further when we came upon a sign that read: "Road washed out to Big Bear." That, of course, meant "Home, James!" And back to Long Beach we rode.



Stage Office at Pine Crest

The Crest Route branched off from the point where we had paused to read the sign, and we followed that course back. Going down the slope we were able to cut out our sparks and made good use of our brakes. Almost all the way down we ran against compression. We entered Long Beach about three o'clock in the afternoon, tired out, but still able to sing a parody which we had composed on the way home, which started with the lines:

"It's a long, long way to Bear Valley, It's a long way to go, etc."



Rex Tanberg, Who Rode with Fuller on Bear Valley Trip, in Front of Pine Crest Tavern, Where Night Stop Was Made—Note Unique Sign

## CONTRACTOR RECOGNIZES VALUE OF HIS MOTORCYCLE

SEYMOUR, Tenn.—R. E. Cresswell, a road contractor of this city, is one of the many business men who recognize the real worth of the motorcycle as an investment proposition. In speaking of the service he gets from his machine, he says:

"I would not part with the machine at all if I could not get another. The time saved in keeping track of my road work in various localities and the ease with which I can jump on the motorcycle and be in Knoxville in less than an hour, from the middle of Sevier county, certainly makes my mount a paying investment, in addition to the pleasure which I get from its use. By riding it, I can personally attend to getting supplies, thereby saving a good amount which would be lost by using the telephone.

"Although I use my machine on the grade work and travel some of the worst roads in the state, I have never had any trouble with it." Mr. Cresswell's machine is giving this service for little more than one cent per mile, an additional reason for its employment from the business man's viewpoint.

## ADVOCATES SPECIAL TAXES

COLUMBUS, Ohio.—Encouraged by the successes that attended the efforts to secure special tax levies for road improvements in a dozen counties this year at the elections, the Ohio Good Roads Federation has announced a more ambitious program for next year. It expects to encourage the submission of special levies next year in 30 counties. The conditions have been found to be ripe for the movement. Heretofore these levies have been carried by the city voters, but in the present election the country districts went for the levies.

## SPEEDING ON COUNTY ROADS

SALEM, Ore.—Miles of highways in Polk county have commenced their service as Winter speedways. The hard gravel surface on the road between Dallas and Salem had made fast travel possible and motorcyclists have taken due advantage of the splendid road. It is estimated that 100 miles will be in shape for winter travel this year.

# FROM BELT-SINGLE TO BIG-VALVE RACER

## Hard Work and a Dependable Mount Essential to the Development of a First-Class Speedster

By CARL GOUDY

IT was out at the track in Fairbury, Ill., in 1911 that I first got the speed bug planted in my system. I was only a "rail-bird" at the time, and the pace the local speed merchants were setting certainly looked mighty fast to me, but after seeing several events, I figured that I could go as good as they on a machine and maybe a little bit better. So I hunted around for a fellow who would listen to my idea, and presently found one—also a man with a stop-watch.

I got aboard the Excelsior belonging to this fellow and started around the track. It did not take long for me to decide on being a motorcycle racer, after I got a squint at the stop-watch that afternoon. I figured that I had the stuff for the game in me, and I have never felt that I was wrong about it.

### Started With Belt-Drive

Later in the same season I got a belt-drive Excelsior—a regular stock mount—and tuned it up. It was the best I could afford, and it was up to me to win with it, for I was not long on cash. I went into Northern Illinois with the old stock "X"—high bars, road tires and all—and copped off enough in two meets to buy me a pair of dropped racing bars and some track tires. The old boat was not speeding the way she ought to have a few meets later, so I traded her in for a 6 horse belt machine. Then this one got too slow, even for 1911 speeds, and I got a chain model in exchange for the belt machine. It has been a case of getting 'em bigger and more powerful, right through from the 7 horse, the factory stock twins, the ported motors, and now it's the ones with the big valves, the fastest of the lot.

Racing is all right in its way, but there are other things to be thought about. In 1912, an Excelsior agency looked good to me, and I got the representation for Fairbury, my home town, taking my brother Bill in as partner. Things boomed for us, but the speed bug was still there, getting stronger with each month's absence from the track as a constant. Finally, I went over to Joliet to see a meet, in May, 1913, and there I met Bob Perry. We took to each other at first sight and determined to team up.

### Teaming With Perry

In August of that year both Bob Perry and I were slated to ride at Rockford in several pro. events, and after riding in three events, we were hailed by big Charley Wanberg, of the Excelsior factory assembling department. He got our names and addresses and some more information. We heard about this series of questions later, much to our delight. We kept on riding that year and winning too, but it was not until 1913 that we started to clean up everything we entered.

At Elgin, Ill., I had the jinx on hand with a vengeance. I dislocated my wrist before the event, but went in it, although it gave me plenty of pain. The excitement of the contest kept me up, but I could only get seventh place at the best. When you can't keep a steady hold on the grip, you have your troubles, all right.

In October, 1913, I rode at Birmingham, Ala., and covered the five miles in 4:00, also the ten miles in 8.14, setting new records for dirt tracks. It was no belt drive plugger that carried me at that speed, I can tell you, but a husky Excelsior twin with plenty of pep in her. On Thanksgiving Day in 1913, at Savannah, I had another big visit from the jinx. Before going more than 90 miles my tank was punctured, but not before I had covered one lap (1¼ miles) in 9:16. This turned out to be the fastest lap of the day. However, Bob Perry covered the 300 miles of the race faster than anyone else, which gave the victory to the Excelsior anyway.

Then there was a rest from big game until the Dodge City inaugural race in 1914. This big contest, for there were 30 starters, gave me second place, also the hundred mile prize. I had five valve changes to make during the event, and although I had plenty of practice before on other people's machines, I got quite expert after the third change and could fix things up in my sleep.

*Carl Goudy at the Close of the 300-Mile Chicago Speedway Race, Which He Won on His Excelsior on September 12 Last, Cracking Records All Along the Line. At the Right Is President Ignaz Schwinn, of the Excelsior Motor Mfg. & Supply Co. He Made the Excelsior and the "Ex" Made Goudy.*

### The Jinx Butts In

Well, that year, things sort of moved along on wings and pretty soon it was September, and the Sioux City race came off. Fifth place for mine in that 300 mile grind. The second Savannah race, on Thanksgiving Day, 1914, saw the jinx right alongside of me from the start to the 146th mile. I worked hard, but he got me on tires, six miles away from the pits and I had to cut the casings off and come in on the rim. The riding on the clinches did the trick, putting me out of the running.

The next big speed carnival was at Dodge City last July 5. The hundred mile record went to me on that date. They clocked me at 74 minutes for the distance. I had motor trouble and several tire changes, losing sixteen minutes in all, but got in third. The relay race at Readville, Mass., was the next big fellow, and here both Bob Perry and I had the first big valve motors. We won, all right.

### Some Recent Winnings

In August of the present year, I went out to Galesburg, Ill., and came off with the ten mile event, but Bob and I were again together at Columbus, O., in the relay race for 200 miles, and came off with the bacon. The Chicago race on September 12 was a nice one—good, fast riding and new records from 164 to 300 miles as desert. The hour race at Providence, R. I., was another of my winnings, as I covered 71¼ miles in that period of time.

In all my winnings I must give credit to the Good Old X first. I don't claim that I was a born speedster, but I worked up from the belt single to the whirring big-valver with its lightning speed by degrees. There are two things that every track rider ought to look to, if he wants to be a success: his own condition and the condition of his machine. I have always taken the best of care of myself, and this has helped me to win. In fact, after the Chicago race, I felt perfectly capable of going through another just as gruelling, as I was in the pink of condition.

About the machine. I examine it closely before every race. I don't take anyone's word about the tightness of nuts or screws. I look at them myself. I care for my mounts as I do for my own health, and believe me, it pays and pays well all the time.

## TIPS FOR RIDING IN RAIN OR SNOW

### Inexpensive Protection for Plug Terminals and Two Useful Articles of Clothing

By COURIER

WITH the coming of snow and thaws in those parts of the country which are not favored by mild winter, the exposed high-tension terminals attaching the cables to the spark plugs will demand their share of attention. There are plenty of muddy roads in the U. S. A., and it is advisable to guard the terminals from splashes which often mean short circuits and corresponding irregularity of firing. The rubber spark plug hoods so essential in motor boat work are the best form of protection from splashing or the dripping of water from the frame to the plugs, but these hoods are comparatively expensive, and are rather difficult to remove should a plug become foul.

Quite as good as the hood is the rubber nipple widely employed on babies' bottles. A slit should be cut in the "business end," this slit being long enough to allow of the terminal to enter when the nipple is in place on the plug end. It is better to cut the slit down one side than on the top, as with the opening above, water from the frame may get inside. The terminal must be removed to put on the nipple, of course, and the shoulder on the latter is to be drawn down as far over the hexagon part of the plug as is possible.

**Proven Its Worth**

The arrangement will leave part of the terminal exposed, but if the slit is cut right nothing but a flood of water will cause a short circuit. I have used this guard in several endurance runs and found that even with regular cloud-bursts there is never a stutter in the ignition. The nipples cost five cents each around these parts, but can undoubtedly be had cheaper in different sections of the country.

The chill winds and drenching rain to which all-weather riders are exposed these days often mean knees and legs soaked to the skin. It is far from pleasant to ride with sopping clothes below the thighs, especially while the mercury is gently retiring into the bulb, besides not being at all healthy. The lower legs can be protected, and usually are, by long leggings, but above the knees the ordinary riding breeches often fall short of keeping the rider warm. I have used a pair of chamois-skin "knickers" under the regular riding breeches each winter, and found that they kept me both warm and dry, even during a heavy thaw.

**Chamois Breeches**

Chamois breeches are sort of expensive, and in some places have to be cut to order. You can of course use any soft leather or hide instead, seeing that the leather is thin but free from holes or cracks. Don't perforate the legs of the breeches with the idea of getting ventilation, the holes will let the water in quite as readily as the air out. I am having a pair of knicks cut from an old mackintosh for the warmer winter days, but whether I shall wear them outside or under the regular breeches I haven't yet decided.

The beauty about leather breeches is that you can wring them out when wetted, but it has been my experience that it will have to be some wetting to penetrate chamois skin. By using the chamois knicks under the regular trousers, you can keep neat as well as warm, provided of course that the service garment is not filthy enough to stand alone when removed. We see too many of the stiff and many-colored oily breeches on riders these days.

**The Useful Poncho**

The poncho is *some* garment, that is, if you can call a rubber blanket with a slit in the center a garment. It fulfills the place of the laprobe of the automobilist in keeping heat in the motor during a zero-weather stop for one thing and will enable a rider to make tire repairs in something like comfort during the rains. The long front part of the poncho can be draped over the mudguard when fixing a puncture, and under its protection a patch can be applied and allowed to set without interference by water. With a sidecar rig I use a metal tool box about 8 inches long, and this forms a nice seat when working on the tires at any time.

I must criticize the attitude of many motorcyclists toward the bicyclist on the road, at least in the different parts of the country I have been travelling this season. There has been too much disregard for the fellow who is using his leg-muscles for a motor, not only as to his rights on the highway but in places where hills abound. I get out pretty early in the morning when the weather is not rainy, and often meet cyclists going to work. There are plenty of hills and I never hesitate in giving the push-biker a tow up, in order to help him on the way.

**Aiding the Cyclist**

Most of the bikers are tickled to get the lift up the hills and are sociable people, but of course there are exceptions. If anyone wants to tow a bicyclist, he should remember that above 20 miles per hour the average biker cannot be towed with any great degree of safety. About 14-16 up a hill is the limit unless the pavement is first class. To whirl a cyclist over cobbles may be to wreck him, although it will have no effect on the motorcycle. The rider of the bicycle can take hold of the luggage carrier at one side during the towing operation; this will bring him clear of the motorcycle should he have to let go and at the same time not interfere with the operation of the motor machine.

### NEAT NEW YORK RIDER

Irving Barnard, of New York Sporting Goods Co., Ready for Week-End-Run

## A SUGGESTION FOR THOSE WHO USE GAS LAMPS

IF a motorcycle is equipped with gas head and tail light, the riders should keep a careful watch of the rubber tubing to see that a leak doesn't develop. This is especially true if a long section of rubber tubing runs from the Presto tank on the handlebars to the tail light. It is much more satisfactory and economical in the long run to use copper tubing for this, with short lengths of rubber tubing for connections. These can be replaced whenever necessary.

If the Presto gauge shows a good pressure and it is difficult to get a decent flame at the headlight burner, the gas is undoubtedly escaping through a leak somewhere. Turning on more gas can only give a slightly higher flame, but

Digitized by Google

the waste is increased tremendously. If the leak is in the tubing to the rear light, the headlight is practically useless until the waste of gas is checked. The leak can usually be located by smelling or exploring with a lighted match, though the latter method has obvious dangers. Tire tape or surgeon's plaster will make a temporary repair, provided no extra rubber tubing is available.

The difficulty and bother of such a situation can largely be avoided by fitting a gas tubing cock. This cock can be turned so that all the gas flows to the front light, cutting off all waste through a leak in the tail lamp tubing, should there be a leak. If the tail light is removed from the machine for any reason, or should it be lost, it is not necessary to tie up the end of the tubing to prevent waste. Such a tubing cock can be bought for a few cents, and much more than its value in gas might be saved in a short time.

## SOME INSIDE FACTS CONCERNING RUST

### Its Nature and the Conditions Under Which It Forms

WHILE everybody knows considerable about rust, few know enough for practical purposes, and some of the facts which have been observed in connection with the formation of rust under unusual circumstances are still only partly explained by science, says a writer in *The Automobile*. To enable owners of automobiles to protect their vehicles against the inroads of rust with a better understanding of the task than that usually possessed outside of the chemical profession, Dr. P. Martell gives in *Auto-Technik* a line of information on this subject which covers the ground in a practical manner and which is reproduced in part in the following:

#### Nature of Rust

Chemically, rust is a combination of metallic iron with oxygen and water. In 100 grams of dried iron rust the proportion is about 52.3 grams of iron, 22 grams of oxygen and 25.7 grams of water. The water is chemically combined, not free. It is permissible to conclude from this composition of rust that it can only be formed when iron comes in contact with both oxygen and water. And practice confirms this conclusion, showing that, if either oxygen or water is absent, no rust is formed. Iron remains free from rust, for example, in water which contains no oxygen. Also, steel and iron can be protected almost completely if there is placed in the room where the metal is kept a quantity of chloride of calcium, which draws all water out of the air in the room.

Oxygen alone, as said, does not attack iron at ordinary temperatures. Fine steel instruments can be easily protected by taking advantage of this fact. To this end a layer of dry chloride of calcium is placed in the bottom of a glass vessel which can be closed by an airtight cover and the instruments are placed upon, or suspended from, an intermediate and perforated wood or cardboard cover plate secured in the vessel, after first dipping the instruments in alcohol to remove traces of water. Ordinary atmospheric air, containing free oxygen and usually a considerable admixture of water vapors, is of course strongly rust-forming, and the same applies to all organic and inorganic acids, even the weakest, to all chlorides of metals and alkalies and to all salts which are hygroscopic or rich in water. Spring, well and rain water cause rust quickly, but if it is boiled first, so as to drive out the oxygen it contains, iron immersed in it will not begin to rust until the water gets a chance to absorb oxygen from the atmosphere again.

#### Action of Water

Cold water causes rust more easily than hot, because it contains more oxygen. Rain water is particularly injurious because it has absorbed a great deal of oxygen while passing through the atmosphere. The active agent in rust formation may be said to be a solution of oxygen in water. But carbonic acid also plays a certain part, being constantly produced as the rusting process continues.

## THE LIGHTWEIGHT IN RACING CIRCLES

### How Shall the "Little Fellow" Be Classified for Competition Work?

By TRADESMAN

ONE of the matters that is due to force itself upon the attention of the F. A. M. Competition Committee, and the trade and riders in general, in the very near future is the regulation of speed contests in which the new crop of lightweights will figure. Undoubtedly the entrance of the lightweight motorcycle into racing circles will necessitate some alterations or additions to the F. A. M. rules. It would be hardly fair to expect the "little fellows" to compete against the heavier and higher-powered machines, and the latter are the only ones now covered in the Federation rules. Something must be done to give the lightweight mount the chance to which it is entitled, on the track as well as in general service, and now is the period to consider the situation.

At the recent picnic of the Los Angeles Dealers' Association, several contests for lightweights were on the program, and while there are no details at hand as to how the "little fellows" behaved under pressure it is safe to say that they acquitted themselves with as much credit as could be expected. This angle of the racing game is a new one, and when matters have settled themselves a bit the lightweights will doubtless afford some good sport. To the Los Angeles folks, by the way, goes the credit for holding the first speed contests for lightweights in this country, and they may be counted upon to follow up their own lead in due time.

That there will be no shortage of lightweights to figure in competition is evident from the fact that seven motorcycle factories are now producing such models. Of the seven, five are producing lightweights of the two-stroke type.

That the present crop of lightweights does not represent perfection even their designers will perhaps be willing to admit, (although the little chuggers are a mighty capable looking lot), and it may be that a season of properly-regulated racing is just what is needed to emphasize any weaknesses in construction that may exist. Many a manufacturer has learned on the track what he could never have discovered in the general service of his machine, and the builders of the new lightweights will no doubt be as willing to profit by experience as they have in the past with the heavier machines.

But it is only fair to say that F. A. M. racing revisions must come before the lightweight can show its calibre. Let us have an open discussion of the various aspects of the situation in order that the light machine can be properly provided; and let us get an early start so that the horizon will be cleared before the boys are ready to get out and make things hum with their lightweights in the spring.

#### May Revise Old Sport

It may be that the arrival of the lightweights will revive a sport that has been on the wane for several years past, and with the pleasing prospect of such a revival before us it would seem to be well worth while to tackle the lightweight competition problem in a businesslike manner. It would be well if those interested in the lightweight would step to the front and give their views, so that the F. A. M. Competition Committee will have some guidance in framing the racing revisions. If we all pull together, the lightweight will slip into its proper place in the American racing field without difficulty,—but if forced to flounder along under the present racing regulations it is certain to have a hard time of it. Now that we have the lightweights, after quite a period of expectancy, let us play fair with them and so classify them that they will be able to show their merits.

#### Opinions Are Wanted

Now's the time; how does the lightweight stand as a racing proposition? What new rules are needed? At what distances shall the "little fellows" be raced?

## NOVEL FEATURES IN ROGERS R.F.D. VAN

### Has Special Body Fittings and Springs

ANNOUNCEMENT is made by the Rogers Manufacturing Company, of 326 West Madison street, Chicago, Ill., of a new commercial van designed to meet all the requirements of the Rural Free Delivery Service as outlined by Postmaster General Burleson. Although the specifications of this van are based on the needs of such service, they are of equal value to anyone employing a van for parcel delivery and especially where the goods are of a perishable nature. Hence, the new Rogers van is applicable to the requirements of all light delivery service.

The chassis is made with extra heavy tubing of seamless steel with nickel steel drop-forged fittings. All joints are electrivally welded, following the process used in Rogers sidecar construction. The design and bracing of the frame is such that a high factor of safety is obtained. In a test, three men weighing 400 pounds total stood on the outside forward corner of the frame, and the weakest point, with no appreciable deflection of the frame at any point and no effect upon either sidecar or motorcycle except a flattening of the tires.

#### Novel Spring Arrangement

The springs have three leaves and are specialy designed for the work. They are secured to the frame by double clamps and are put on with the coils forward instead of toward the rear as in the regular sidecar. The arrangement allows the body to extend further to the rear than does the passenger body and conforms with the load requirements. The chassis is made with a straight-line axle, giving a ground clearance of 13¼ inches. The wheel spindle is 1¼ inches in diameter and telescopes in a 1½-inch axle tube, giving an extension tread.

The range of extension is from 56 inches to 42 inches. The narrow 42 inch tread is particularly desirable on country roads, as it permits the motorcycle to be driven with its wheels in the left wheel-rut while the van wheel will run in the right horse track. The range of from 56 to 42 inches is exclusive to the Rogers van.

#### Readily-Adjustable Axle

The axle is set in position by a clamping collar and a set-screw with cup point. Any intermediate tread within the range can be had at the will of the rider. The hub is extra large and heavy and has adjustable ball-bearing of the Rogers Company's manufacture. The quick-detachable fender, No-Strain ball-and-socket joints and square tube construction of the Rogers pleasure chassis are all embodied in the commercial van chassis.

The body construction has been worked out with great care, and conforms to Post Office requirements as to size, waterproof qualities, etc. It measures 42 inches in length, 24 inches in width and 18 inches in height at the sides. It is made from heavy sheet steel formed on a light but sturdy hardwood frame with reinforcing corner irons.

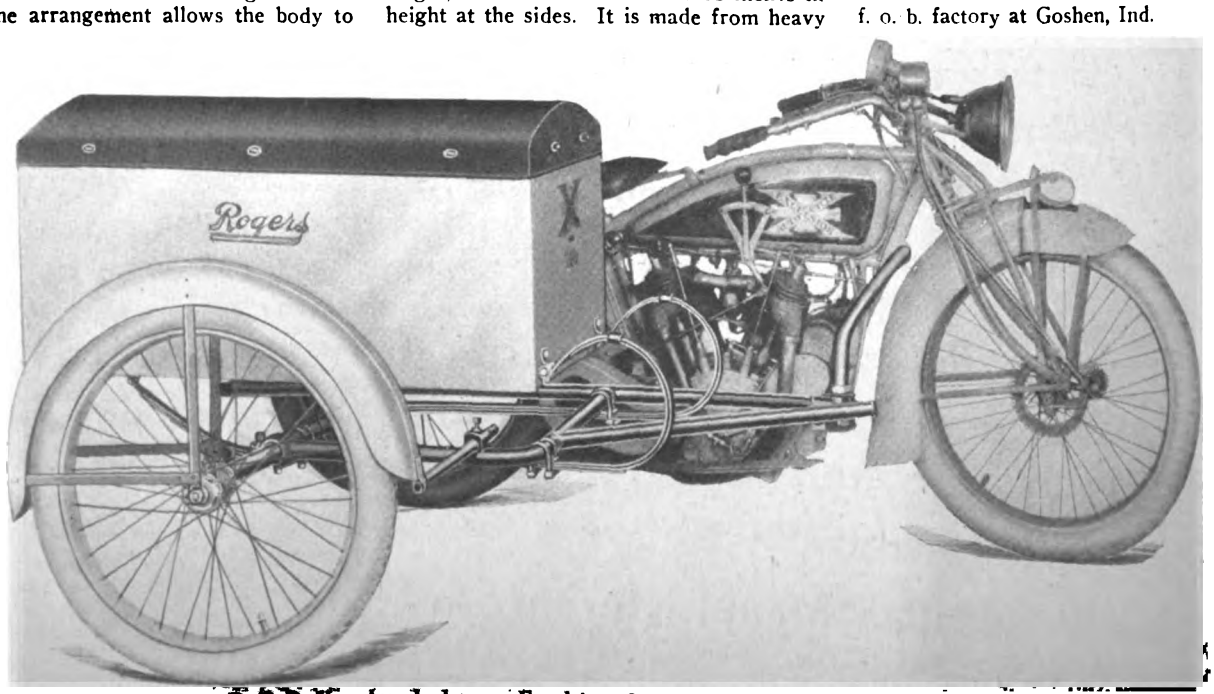
#### Curved Body Surfaces

A unique feature of the construction of the body is the forming of every surface with a slight curve. This is done to eliminate the rattle normally present in metal boxes. The body is covered with a substantial waterproofed canvas cover which may be easily detached in pleasant weather. It allows perfect access to the body when in place in stormy weather without exposing the contents of the body.

Quite original in design and brought out with direct relation of the R. F. D. employment of the van is the series of wall-pockets so constructed that mail may be arranged for distribution at the office and placed in the several compartments of the pocket, after which the whole pocket is rolled up and tied. It is suspended upon hooks provided for it in the van body during the run. By using duplicate sets of these pockets, one may be left at the post office and mail distributed therein ready for the next trip of the carrier, who will then leave his empty set to be filled. In fact, this is but one of a number of suggestions made to Mr. Rogers by various officials of the Post Office Department.

#### Finish and Equipment

The van is finished in the regular black enamel for the chassis and in enamel to match all standard makes of motorcycle for body and fender. The tire equipment is a 28 x 3-inch studded tread. Price is $75 f. o. b. factory at Goshen, Ind.



New Rogers R. F. D. Van Attached to an Excelsior; It Is Perfectly Adaptable to Other Standard Makes

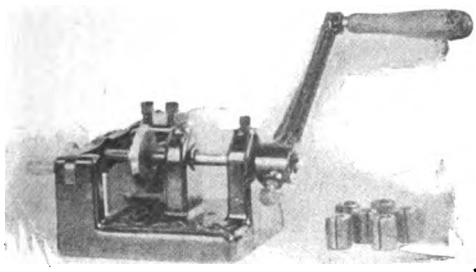
## AMERICAN VALVE FACING AND SEATING TOOLS

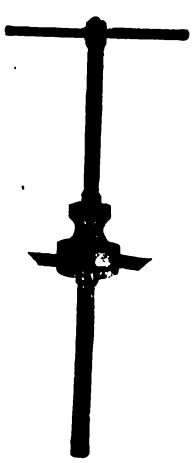
FOR truing valve faces and their seats, the American Valve Tool Co., Inc., of 589 Hudson street, New York, is producing two tools, the first an adjustable valve seater, and the other a valve facing tool, both bearing the name "American."



Valve Facing Tool

The size of the valve seating tool for motorcycle service is the No. 1, listing at $6. The valve facing tool is priced at $6 also.

The seating tool consists of shaft carrying a cutter-holder with suitable cutters. Below this holder is screwed a pilot stem designed to fit into the guide for the valve, the stem being removable. Several sizes of stems are furnished with each tool. At the top of the shaft is fitted a cross-bar or handle, held in position by a screw; this handle being for operating the tool. The cutters are so fitted as to cover any diameter up to 1¼ inches, and can be had to cut a seat of 30, 35, 45, 60 or 90 degrees as desired.



Seating Tool

The facing tool consists of a frame for carrying the valve to be faced with a crank handle for turning the same. Cutters to correspond with those furnished with the seating tool accompany this apparatus, as well as an extension or sleeve into which a short-stemmed motorcycle valve can be fastened for facing. Bushing to take any size of motorcycle valve are also furnished. The efficiency of this and the other tool is guaranteed.

The American Valve Tool Co., Inc., offers both tools in a set at $10.

## ELKHART MAGNETO OUTPUT BOOKED A YEAR AHEAD

MONROE, Mich.—The Elkhart Mfg. Co., producers of alternating current magnetos of both high and low tension for stationary, marine and motorcycle engines, report that they have closed contracts for enough business to keep them running at full capacity for at least a year. This remarkable demand for Elkhart products came very suddenly, after a strenuous sales campaign, and the company has found it necessary to recall its entire sales force from the road.

E. M. Ford, sales manager of the corporation, states that the greater part of this business is for magnetos to be used on motors of the mtorcycle type, although a considerable portion of it involves stationary and marine engines.

The Elkhart company devotes its well-organized factory exclusively to the manufacture of magnetos, and this fact, combined with the recognized policy of the firm to use only high-grade material and employ only skilled workers, accounts for the extraordinary success of the sales campaign.

## HAWTHORNE CO. ADDS 15,000 SQUARE FEET

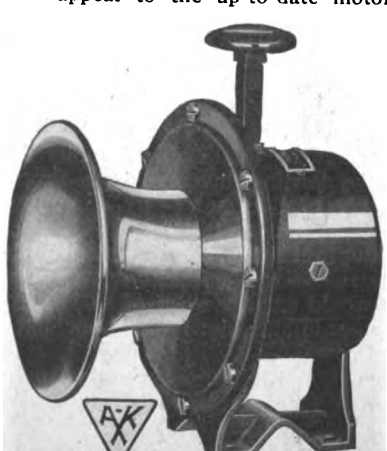
BRIDGEPORT, Conn.—In order to increase its facilities, the Hawthorne Mfg. Co., of 35 Spruce street, this city, has leased a large building in the rear of the present plant, thus adding a total area of 15,000 square feet. The business of the company is at high pressure, not only in the motorcycle and bicycle lines, but also in general industrial work. It is interesting to know that owing to the scarcity of wood for the cabinets of talking-machine outfits, all-metal construction is being used and the Hawthone company is producing practically all cabinets of this sort on the market.

## GUTERMAN TO COVER SOUTH IN R-S INTERESTS

NEW YORK, N. Y., Dec. 13.—Lou Guterman, traveller for the Reading Standard Company, of Reading, Pa., has covered the New York and New Jersey portion of his territory so far, and will soon go South to cover Florida and the Gulf States. "While placing agencies for the R-S is naturally the main thing, tarpon and game fishing and hunting are sports that I am looking forward to in Florida," says Guterman.

## NEW ANGSTEN-KOCH HORN AND SPRING TANDEM

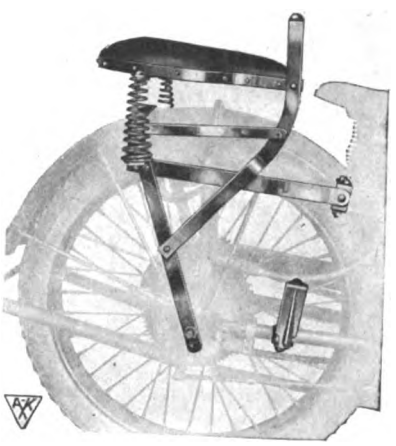
OF the many specialties produced by the Angsten-Koch Company, of 215-217 Englewood avenue, Chicago, Ill., two in particular appeal to the up-to-date motorcyclist. The first of these is the new A-K standard horn, a warning-signal of the mechanical type which lists at $3.50. It may be had in all black or black and nickel, as desired.



A-K Standard Horn

The mechanism of this horn is such that when the operating handle is pressed downward the effect is similar to that of a motor-driven horn, as the balance wheel continues to rotate. The result is a variable tone which effectively warns pedestrians and other road users. The horn has a projector 2 inches in length, while its over-all length is 6 inches. The diaphragm is 4⅝ inches in diameter and the hardened screw can be readily adjusted. All working parts are heat-treated and carbonized, and the horn should give indefinite and unfailing service. The bracket supplied is universal, being adaptable to any part of the frame of the motorcycle.

The second specialty is the A-K spring tandem No. 3000, designed to meet the demand for a popular-priced tandem attachment. It lists at $7.50. The cushion is mounted on two large compression springs which afford unusual comfort. The handlebar is fitted conveniently to the rider and will not tire anyone for long distance work. The footrests are separate from the tandem proper, which allows them to be placed in any position desired.



A-K Tandem No. 3000

The tandem illustrated is adapted to the spring-frame Indian motorcycle. It has been thoroughly tested and proven satisfactory. It does not interfere with the spring tension of the cradle frame of the machine. The No. 3000 tandem comes in a corrugated box, partially assembled and can be readily fitted to the motorcycle.

### FIND BUSINESS IS GOOD

CHICAGO, Ill., Dec. 4.—Felix Van Cleef, of Van Cleef Brothers, who has recently returned from a trip through the East, and Maxime Van Cleef, who has come back from a Canadian tour, both report business as good. In fact, Felix Van Cleef states that business is decidedly fine and the outlook is very encouraging. The Van Cleef Brothers manufacture Dutch Brand cements and other cycle products.

### HARDEN SCOUTS IN B. C.

VANCOUVER, B. C., Dec. 12.—Mr. Harden, sales manager of the Pope Manufacturing Company, was looking over the city recently, to see what the prospects for business are for the coming season. There are quite a number of Popes running on the streets of Vancouver, but at the present time the company is not represented by a local agency.

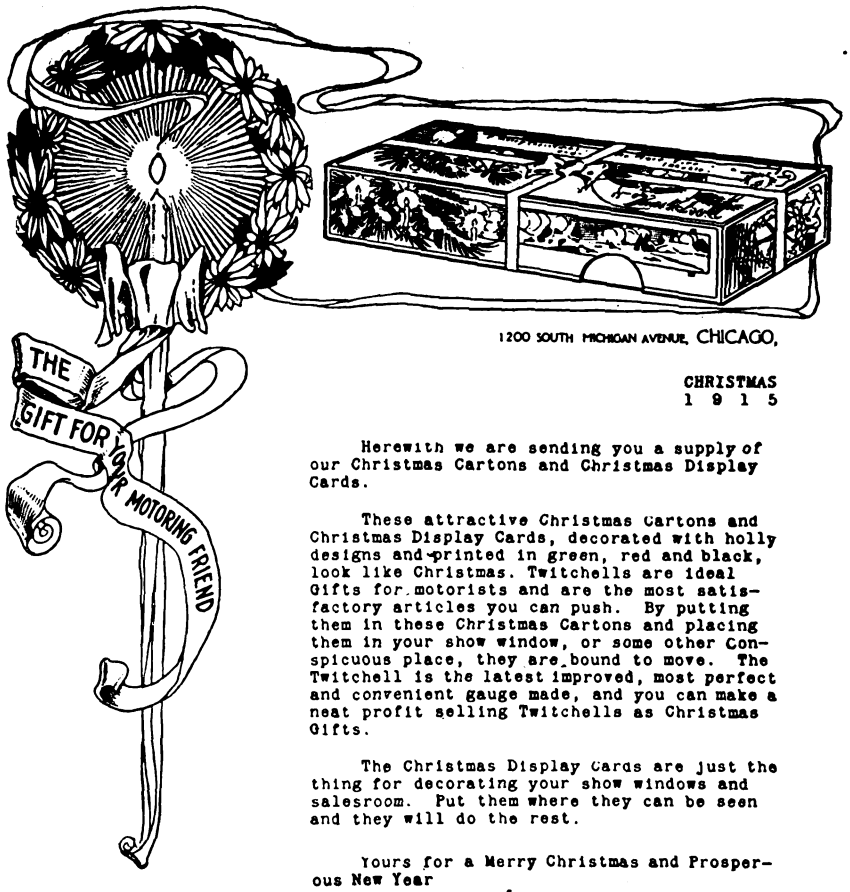
**AIDING THE DEALER TO PROCURE HOLIDAY CUSTOM**



1200 SOUTH MICHIGAN AVENUE, CHICAGO,

CHRISTMAS
1 9 1 5

Herewith we are sending you a supply of our Christmas Cartons and Christmas Display Cards.

These attractive Christmas Cartons and Christmas Display Cards, decorated with holly designs and printed in green, red and black, look like Christmas. Twitchells are ideal Gifts for motorists and are the most satisfactory articles you can push. By putting them in these Christmas Cartons and placing them in your show window, or some other conspicuous place, they are bound to move. The Twitchell is the latest improved, most perfect and convenient gauge made, and you can make a neat profit selling Twitchells as Christmas Gifts.

The Christmas Display Cards are just the thing for decorating your show windows and salesroom. Put them where they can be seen and they will do the rest.

Yours for a Merry Christmas and Prosperous New Year

THE TWITCHELL CAUGE CO.

MDB-G
Enclosure. Max D. Bendel. Mgr.

P. S.

The enclosed Christmas box-covers are to be folded the same as the covers on the original boxes in your stock. When exchanging the original covers for the enclosed Christmas covers, it will be advisable to save the former, as you may want to re-use some of them after Christmas

*Letter Sent to Agents by Twitchell Gauge Co., of 1200 South Michigan Avenue, Chicago, Ill., Accompanying Big Shipment of Cartons and Christmas Cards. The Box Covers at Top Are Printed in Green and Red and Are Facsimiles of Those Sent Out*

# BERLINGS MAKE GOOD IN THE CLOUDS

## Latest Achievement Calls Attention to Their Remarkable Dependability

THE fact that a good many discoveries of motorcycle engineers have been adopted into other fields of motor-driven vehicles was brought out again in the recent test of the Curtiss Aeroplane Company, in which their aviator, Victor Carlstrom, flew from Toronto, Ont., to New York City. He made only one stop, and that was due to the shortcomings of the human engine rather than to the steel-cylindered motor which drove the big 90-foot-wide man-made bird on its 600-mile flight.

Glen Curtiss himself, a master of the flying wizards, was originally in the motorcycle business, and got many of his ideas of speed and compactness of engine from the two-wheeled flyer. It was natural that when he began to supply his aeroplanes for heavy service he looked to the motorcycle field when he went up against the question of ignition. That was the big problem the Curtiss engineers faced—the job of flying sparks delivered to a motor whirling at the rate of 4,000 revolutions per minute, and have those sparks delivered with a certainty and regularity sufficient to insure going, because often a stop would mean death.

Meanwhile, in the motorcycle field, a new magneto was making good. This was the Berling, invented by a Swedish engineer of that name—by a man who had spent the best years of his life in working out the design of this magneto. Here at last was a spark-giving machine that would stand a whirl of 4,000 revolutions per minute, not for an hour, but for many hours.

Ten thousand motorcycles had proved the fact that the Berling would give a good spark, no matter how slow or how fast the magneto was driven. The finest motor-boat engines, namely, the Sterling and Van Blerk, had confirmed the truth.

After having proved out the Berling on many Curtiss aeroplanes, Aviator Morris took a military tractor above the clouds, and broke all American records for altitude. He gave thanks to the dependability of the two Berling magnetos which gave him his ignition.

Here was where Glen Curtiss' masterful engineering practicality came in. He figured that two magnetos would not only give him double spark, but would give him double probability of safety.

So, when Victor Carlstrom started off from Toronto in his 160 h. p. military tractor, he had his engine fitted with two Berling magnetos. He left Toronto at 9:46 one morning, and against a heavy gale beat it for the center of New York State. When near Binghamton he became ill. He was 10,000 feet in the air. He got dizzy. Cramps seized him. But with iron nerve he slid to the ground and at 2 o'clock on the afternoon of the same day that he started he landed in a town six miles west of Binghamton. In an hour or so he resumed his flight. His machine was loaded down with special weights, because he was driving alone—whereas this tractor was supposed to carry at least one extra passenger. He had with him 125 gallons of gasoline and 30 gallons of oil.

That same night he arrived at New York City after a 600-mile flight. He circled the Bay twice, and landed at Governor's Island.

His flight from Binghamton to New York along the Erie Railroad, totaling more than 200 miles against a terrific head-wind, was made in four hours. Carlstrom had this to say about the engine and the two big Berling magnetos with which it was equipped:

"This engine could run another twenty hours. I never sat behind an engine that worked more perfectly. It just sung all the way from Toronto to this town. It never missed an explosion at the varying speeds I had to use nor in the quick changes of atmospheric pressure and temperatures."

### KRACKOWIZER JOINS CLEVELAND

CLEVELAND, Ohio.—As another evidence of the broadening out of their organization, the Cleveland Motorcycle Manufacturing Company, of Cleveland, Ohio, manufacturers of the Cleveland lightweight, announce that H. J. Krackowizer has recently joined their production staff. Mr. Krackowizer has had a broad and valuable experience in the motorcycle field, both in this country and abroad. Starting several years ago with the Puch Motorcycle Company, of Graz, Styria, Austria, one of the largest German manufacturers, Mr. Krackowizer later was with the American branch of the N. S. U. For the last two and one-half years he was in charge of the experimental department of the Pope Manufacturing Company.

### NEW AUSTRALIAN ROAD RECORD

SPRINGFIELD, Mass.—The Hendee Mfg. Co. has just received word from Manager Theodore Hastings, of the Australian Branch, at Melbourne, that Jack Booth, the Australian racing star, had lowered the road record for the half mile in Australia to 20 1-5 seconds on an Indian.

# PUTTING A PUNCH INTO PUBLICITY

## Methods by Which Motorcycle Prospects Can Be Lined Up With Small Outlay

By GEORGE M. JOHNSON

THE business man who does not advertise is doomed to failure, whether he sells dry goods or motorcycles. And yet what a tremendous lot of perfectly good money is wasted—utterly thrown away—in America every year through ill-advised advertising.

In the case of motorcycles much good publicity can be obtained with no considerable financial outlay. The following is a description of a stunt worked by one dealer. It would be equally successful in any town where there is a large manufacturing plant employing a good-sized force of men—and these chaps are just the sort to appreciate a quick and easy method of reaching the shop where they work. The dealer was Shelton Sturges, Indian representative in New Haven, Conn. He had printed a batch of circulars like the one given below, which were thereupon very generally distributed among the employes of the Winchester Repeating Arms Co. It is probably unnecessary to add that this plant is one of the largest and most important in all New England.

TEN DOLLARS IN GOLD

We will give a TEN-DOLLAR GOLD PIECE to the Winchester employee who gives us the best reasons:

Why he should buy a motorcycle.

Why it should be an INDIAN MOTORCYCLE.

CONDITIONS.

Answers must not exceed 50 words for each question.

Competition closes Dec. 15th.

The following points will be considered in awarding the prize: Are the reasons practical and well expressed? Do they show originality?

Write your answers on one side of paper.

Fill out this blank and pin it to the sheet and mail or hand it to Shelton Sturges, 108 Court St.

Name .....

Address .....

(Winchester No. )

There is more value in this sort of advertising than might appear on the surface. In the first place it is inexpensive; the cost of printing the circulars is hardly worth considering, and besides that there is only the ten-dollar prize. Each person who submits an answer is a possible prospect; if he were not somewhat interested in motorcycles he would probably not bother to enter the contest. The very process of thinking up good reasons as to why he *should* invest in a motorcycle is likely to make him consider the proposition seriously. All names obtained in this way should therefore be filed away for future reference in the catalog of prospective customers.

### Some Answers Helpful

The dealer will probably not get any very gorgeous selling arguments out of his batch of answers. As a class, many of the men who may enter the contest have not had the advantages of an education, and will, in the main, give obvious and commonplace answers. Of course, there ought to be some exceptions to this.

### HAS ECONOMICAL MOUNT

**Peter M. Samoiloff, Pope Rider of New Haven, Conn., Who Averaged 75 Miles Per Gallon for 10,000 Miles Riding**

The matter might be carried further than in the circular already quoted. For example, the five sets of answers in order of merit after the prize winner could each be awarded an honorable mention certificate which would be worth ten dollars if applied on the purchase of a new motorcycle, provided the machine were actually purchased by the winner for his own use.

### Big Variety Possible

A wide range of contests in general similar to the above offer themselves as publicity opportunities to the enterprising dealer. It might be a contest open to all riders in his section, giving hundred word answers to such questions or on such topics as: What one feature about the 1916 ——— motorcycle impresses you as being particularly desirable? Why I could not get along without my motorcycle; how my motorcycle helps me save money, etc., etc.

Such contests should be open to riders of all makes of motorcycles, and by no means should the slightest bit of favoritism in awarding prizes be shown to actual customers of the dealer himself. As a matter of fact, from the advertising aspect it would probably be of more actual value to the dealer to have a rider of an outside machine carry away the bacon. That would show that other riders were at least favorably impressed by certain features about his machine.

### Accessories for Prizes

The prizes offered could be accessories such as all riders appreciate—gloves, a horn, a lamp, etc., or a definite sum of money in trade, the winner selecting the article or articles that he wanted from the dealer's stock.

Perhaps the chief publicity value of one of these contests would really come after it was all over. If the dealer advertises to any extent in the local papers—as of course he should—an occasional mention of the contest could undoubtedly be worked in somewhere, perhaps on the sporting page or in the section devoted to automobiles. Then it should require no great labor on the dealer's part to get some of the better answers published from time to time.

**Widely Admired in Recent Parade: Excelsior Twins Hitched Side by Side Forming Exhibit of Albright's Motorcycle Exchange, 223 Fallowfield Avenue, Charleroi, Pa.**

## KICHERER TO SELL HENDERSONS IN DETROIT

DETROIT, Mich., Dec. 13.—Manager E. C. Kicherer of the Haverford Cycle Co., with a big store at 289 Woodward avenue, this city, is sending out invitations to riders and riders-to-be, to come in and view the 1916 four-cylinder Henderson.

For he has completed negotiations making him Henderson dealer in this city for 1916. A Henderson of latest vintage is on display in the big show window on Detroit's "Motorcycle Row."

Kicherer is one of the real veterans of the business, having been connected with motorcycle sales since the industry was in short dresses. Back in 1910 he introduced the N. S. U., a foreign machine which met with fair success under his hands in spite of its high price.

Later he became identified with the Haverford retail store at Detroit, where he has been instrumental in building up a very substantial business. In addition to motorcycle sales he has acted as distributor for Smith Motor Wheels, disposing of a large number in this section of the country.

Mr. Kicherer views the outlook for Henderson sales in Detroit very optimistically, as he has met a strong demand already in the few days since he became Henderson dealer here. He predicts that he will sell at least 250 machines in the city before the end of the 1916 season.

### CONTINUE "EX" AND POPE

PUEBLO, Colo.—For the third year Johnson Brothers, of this city, have signed up to represent the Pope line of motorcycles. They have also renewed their contract for the Excelsior, entering on the second season as representatives for this make. The Johnsons lost their demonstrator a short time ago, through letting a stranger ride it to try it out. The stranger rode away and has not been seen since, so the firm is out one 1916 twin.

### ELLIS HAS H-D AGENCY

NORTH ST. LOUIS, Mo.—John S. Ellis has obtained the Harley-Davidson agency for this city. He has just received four of the 1916 three-speed models.

### TAKES DAYTON LIGHTWEIGHT

YOUNGSTOWN, O.—The Motorcycle Exchange, of which W. B. Comerford is manager, will handle the Dayton Motor Bicycle in Mahoning County in 1916.

### SYKES SELLS 18

TRENTON, N. J.—John Sykes, Jr., proprietor of the Trenton tepee, has sold 18 Indians of 1916 models to date. He considers the present season the best he has ever experienced since his advent in the motorcycle game.

### ALL ARE LIVE ONES

SEATTLE, Wash.—Piper & Taft have a number of live sub-agents in the various outlying towns. Among these are Doescher & Moore, North Yakima, and Hubbell & Mumma, Ellensburg. Both are veteran Excelsior agents. Piper & Taft have been distributing Excelsior motorcycles and bicycles for the past eight years. Their territory is the State of Washington west of the Columbia river.

### FINDS ADVERTISING PAYS

FORT WORTH, Tex., Dec. 6.—A splendid example of what consistent newspaper advertising supplemented with a clean store and demonstrator will do for a dealer is evidenced by the amount and character of Motor Wheel business the Burton Supply Company is doing:

"Today we sold a Smith Motor Wheel to a middle-aged preacher who will travel on it from here to Weatherford, Mineral Wells, Jacksboro and Seymour, Texas," said Manager Massie. "The assistant cashier of the Farmer and Mechanics' Bank here has a Smith Motor Wheel and is a most enthusiastic booster. The other day an elderly gentleman came all the way from Meckel, Texas, a distance of 160 miles, to buy a Smith Motor Wheel and bicycle. He saw our 'ad' in the Forth Worth newspaper.

"The Western Union, the Postal Telegraph, practically all the messenger services and a large number of drug stores use them daily," continued Mr. Massie "Also practically every class and age have bought Motor Wheels from us. We attribute all this to our local newspaper advertising, our brightly kept store and our spick and span demonstrator. We aim to appeal to the elite—and get the others as well. We aim high; we hitch our sales desire to a star."

### SPRINGER RENEWS CONTRACT

PUEBLO, Colo.—Vernon Springer has taken the agency for the Indian for the new season in this territory. This is his third year as Wigwam representative, he having bought the agency from Frank Herman in 1913. He has been demonstrating with the 1916 twin received two weeks ago and is lining up prospects as a result.

### COMPLETING KANSAS CITY TRACK

KANSAS CITY, Kan., Dec. 13.—The motorcycle dealers in Kansas City are all delighted, to put it mildly, because of the work so far accomplished by Jack Prince to place a track of his motorcycle racing circuit in Kansas City. The business is sure to boom, the dealers believe. Prince has been visiting Kansas City almost as often as once a week, and reports excellent results so far.

### NEWBY'S HENDERSON RUSH

KANSAS CITY, Kan., Dec. 13.—The Newby Brothers, agents for the Thor, Merkel and Henderson at Kansas City, have scored big since the new 1916 Henderson came into the Kansas City market. Three new machines have already been sold. The riders at Newby Brothers have all been anxious to try out the new machine and the brothers have been busy giving demonstrations.

### DAYTON FOR CROUCH BROS.

BLOOMINGTON, Ill.—The Dayton Motor Bicycle will be handled in this city by Crouch Brothers for 1916.

## MANY SIGN FOR MOTOR WHEEL IN ONTARIO

MONTREAL, Que., Dec. 13.—Fred St. Onge, traveler for A. E. Bregent, Smith Motor Wheel distributor for Eastern Canada, announces the following agents for the little motor booster in the Province of Ontario:

Charles A. Klaricka, Burlington; F. Hathaway, Chatham; Paul de Vigau & Son, Sandwich; S. D. Simpson, Sarnia; L. F. Thompson, St. Thomas; Kenneth McColl, Forest and Park Hill; J. F. Daley, Seaforth; J. H. Papman, Clinton; Butler Bicycle Co., Waterloo; Tweed Hardware Co., Tweed; Dietrich Bros., Perth; Ketchum Sporting Goods Co., Ottawa.

The following dealers have renewed for the 1916 season: Dixon Sporting Goods Co., Hamilton; J. C. Farrel, Grimsby; Gilmore & Co., St. Catharine's; Carter Electric Co., Niagara Falls; Geo. E. Bentley, Jillsonburg; F. J. Kerr, London; Roy Martin, Woodstock; W. E. McCarthy, Stratford; L. H. Buttrey, Guelph; W. M. Hunter; Galt; Doeringer Electric & Repair Co., Brantford; C. R. Banks, Peterboro; B. A. Woods, Lindsay.

## A LIVE WIRE FOR CLEVELAND

INDIANAPOLIS, Ind.—C. E. Hauk has organized the Cleveland Motorcycle Sales Company, with headquarters at Indianapolis, to distribute the Cleveland two-stroke, two-speed light motorcycle in Indiana, Illinois and Wisconsin. Mr. Hauk has built up a strong organization to handle the Cleveland in anticipation of a large and permanent volume of business in these states. Before joining the Cleveland Motorcycle Manufacturing Company, Mr. Hauk was associated with the National Acme Manufacturing Company of Cleveland, manufacturers of automobile and motorcycle parts.

## COUTY TAKES A PARTNER

OWENSBORO, Ky.—W. E. Couty, Excelsior agent in this city, has formed a new partnership. He recently married an Owensboro girl, and is just back from a honeymoon trip to New Orleans. Mr. Couty has signed a new Excelsior contract for 1916.

## COULDN'T THROW THE BULL

LOGANSPORT, Ind.—Edward W. Arnold, head of the Arnold Motor Company, Excelsior representative, is back on the job again after being laid up for some time as a result of a young bull calf scampering in front of his motorcycle on one of the country roads.

## MADE RECORD IN MOVING

KANSAS CITY, Kan., Dec. 14.—The Western Motorcycle Company, agents for the Harley-Davidson at Kansas City, accomplished a record feat in moving its shop from Fifteenth street and Grand avenue to 914 East Fifteenth street. The move was accomplished within a few hours and was made in the evening. Everything was in its place for the opening at the new address on December 1, as scheduled.

## TO HANDLE ALL DAYTON LINES

COVINGTON, Ky.—The Dayton Store, at 15 Pike street, this city, has taken the exclusive agency for the Dayton line of motorcycles (including the Motor Bicycle) and bicycles for this part of the State.

## INDIAN DEALER'S SMOKER

GLOVERSVILLE, N. Y.—The annual smoker given by William H. Loft, the local motorcycle and bicycle agent, was attended by over fifty riders at the Indian tepee. A business meeting was held which resulted in the organization of the Indian M. C. The officers: Paul Sturm, president; M. K. Lawrence, vice-president; Eugene Torrey, secretary; William Fox, treasurer.

## DAYTON IN JACKSONVILLE

JACKSONVILLE, Fla.—John A. Cunningham, bicycle and sporting goods dealer, at Broad & Forsythe streets, has taken the agency for the Dayton Motor Bicycle.

## CLARKSON IS COMING BACK

NEW YORK, Dec. 14.—J. B. Clarkson, managing director of Messrs. J. B. Clarkson & Co., Ltd., Wellington, N. Z., one of the largest firms in the automobile and cycle business, will arrive in New York about December 22 to attend the National Motor Show. Mr. Clarkson visited this country about a year ago in connection with cycle business. His address while in New York will be the Hotel Belmont, 42nd street and Park avenue.

## COLUMBUS "X" AGENT

COLUMBUS, Ohio, Dec. 7.—The Franklin Cycle & Supply Company has taken the central Ohio agency for the Excelsior for the coming year.

## SOLD 30 DURING 1915

PUEBLO, Colo.—The Pueblo Motor Company, of which R. L. Fleming is proprietor, is handling the Harley-Davidson for 1916, for the sixth consecutive year. His sales for the 1915 season totalled 30, of which all were twins and most of them three-speed models. He has delivered a 1916 twin, electrically-equipped, to the police department for rounding up violators of the motor vehicle laws. This machine is now in use by officer Tom Johnson.

## MILWAUKEE M. C. ELECTS AT BUSY MEETING

MILWAUKEE, Wis., Dec. 14.—In the annual meeting of the Milwaukee Motorcycle Club the following officers were elected: President, Charles D. Grier; vice-president, Arthur Eckes; secretary, Hugh Sharp; treasurer, C. T. Martin; assistant treasurer, Elmer Owen; sergeant-at-arms, Alexander Landry; directors, Albert E. Becker, Paul Bruess, Kurt Hantszch, George Melcher and E. Geiger.

"At the beginning of the year we adopted as the club slogan 'Something doing all the time,' said Secretary Sharp in submitting his annual report, "and a glance through the club's records is ample evidence that the principle of the slogan has been carried out well."

President Grier signalized his entry into the president's chair for another year by announcing that if $50 in dues was collected before January 15 he would be host to the club at a stag party in the clubrooms as soon after that date as was practicable. Which means that about Jan. 16 or thereabouts Prexy Charles Dennis will have to dig down in his jeans for the price of a half barrel of our city's famed product, together with enough wieners to make a fair-sized lunch.

Milwaukee will have its first motorcycle hare-and-hounds run in the near future if the weather man smiles a little longer. The start will be from the clubhouse, giving the hares a getaway of about twenty minutes. So that the game will not wind up in some other state, territory has been laid out for the hares in which they must confine their confetti distributing act.

### DOINGS IN NEWARK

NEWARK, N. J.—The first joint run of the New Jersey and Indian Motorcycle Clubs to Seidler's Beach recently was so much of a success that the clubs are planning another and larger event for December 19. Dancing, football, running races, etc., will be enjoyed.

Plans for a theatre party and midnight supper the last Thursday in January have been completed and a large turn out of motorcyclists is expected.

This week and next the club will be busy with its annual election of officers. Bert Lincoln Holland, Jr., who has served as president for one term, and E. B. Holton, recording secretary, who has served for two years, modestly refused to run for office again.

On looking the calendar over the club has found that a two-day run is impossible over Decoration Day, in 1916, so talk of a 400-mile, 24-hour contest has been started. As an all New Jersey run is under discussion, the routing of the contest will be an easy matter. A non-stop section for sidecars—especially for the pro. class—is one of the latest innovations devised to keep the riders unhappy and medal awards low.

### PACKARD USING HENDERSONS

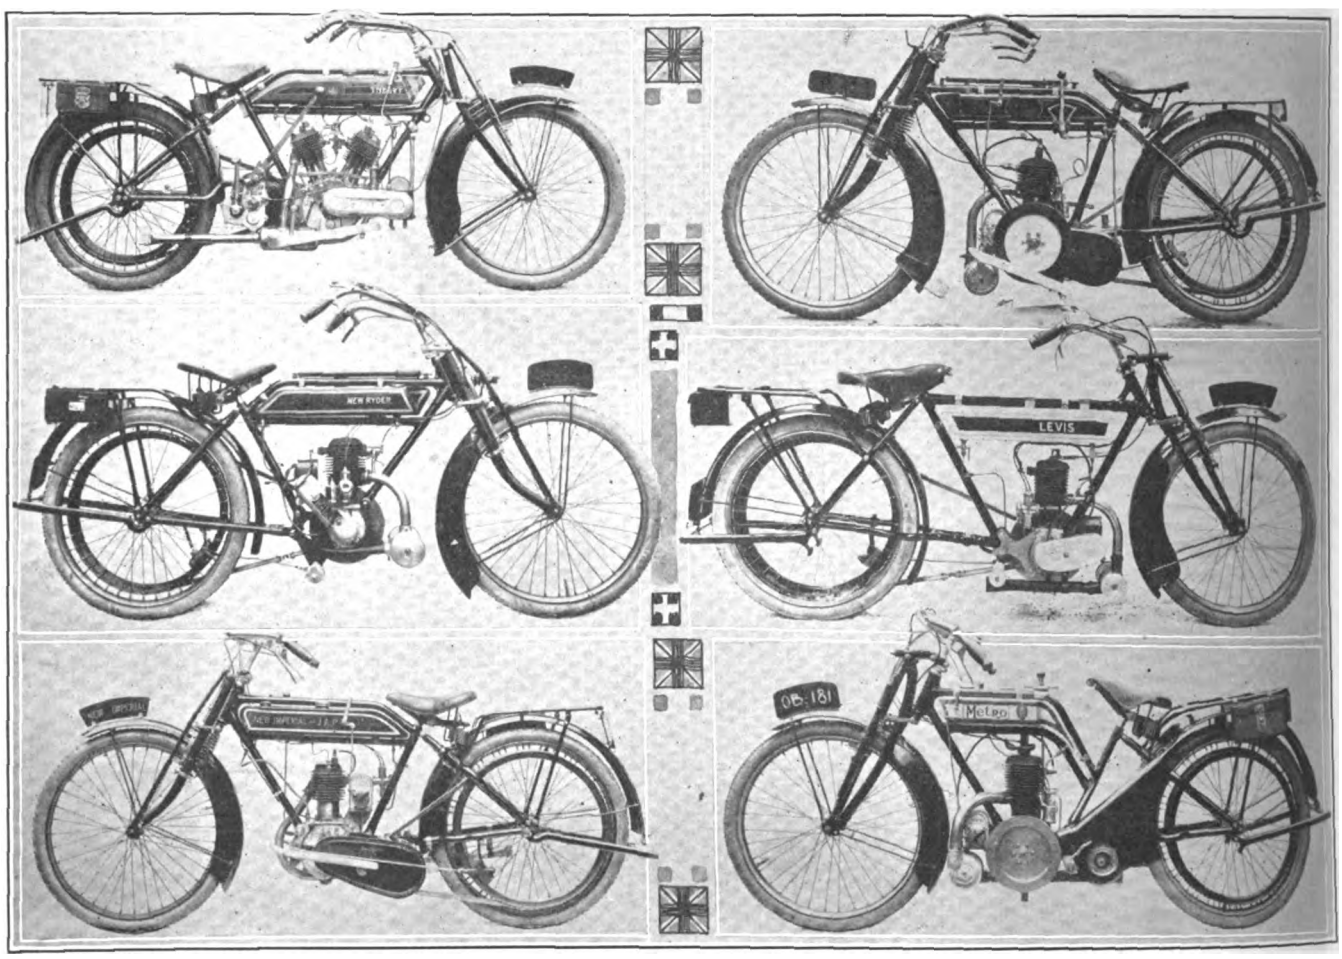
DETROIT, Mich., Dec. 10.—Henderson motorcycles are playing an important part in maintaining the efficiency of the service station of the city sales room of the Packard motor car people. The four-cylinder motorcycles were put in service a short time ago and have surprised the automobile men by the company in time and expense that they effected.

When "the man who owns one" finds himself in urgent need and far from any point where he can obtain the necessary supplies, all he needs do is 'phone the Packard service station. In a few minutes the man on the Henderson motorcycle has hurried to the rescue.

### PENNSYLVANIA LICENSE TAGS

HARRISBURG, Pa.—The state of Pennsylvania will have this makeup for its license tags for next year: Black letters with orange blackground. This is a striking change over this year's colors—white letters and light blue background. There will be no change in the price of motorcycle tags, which has been three dollars.

## TYPIFYING 1916 TENDENCIES IN BRITISH CONSTRUCTION



**Upper Left, 4-5 Horsepower Twin Ivy, with Combination Drive and Three Speeds; Upper Right, 2½ Horsepower Two-Stroke Stern, with Chain-Cum-Belt Transmission; Center Left, New Ryder Two-Stroke, Single-Geared, with Belt Drive; Center Right, Levis "Popular," of 2¼ Horsepower; Lower Left, New Imperial, 2½ Horsepower; Lower Right, Ladies' Model Metro, with Novel Frame**

# GRENDA AND HILL WIN THE NEW YORK SIX DAY RACE

**McNamara-Spears Forfeit First Place for Fouling—Old Record Beaten by 11 Miles and 6 Laps**

NEW YORK, N. Y., Dec. 20.—After 16 thrilling sprints that marked the final hour of the twenty-third annual New York Six-Day Race at Madison Square Garden, Alfred Grenda, of Australia, and Freddie Hill, of Boston, were officially declared the winners last Saturday night with a score of 39 points. Hoots and catcalls greeted the victors as they circled the track, for the ten thousand fans that packed the big arena knew that Reggie McNamara and Robert Spears, of Australia, had really captured the grind by superior sprinting, but the referee had penalized Spears 11 points for foul riding with the result that his team stacked up a score of 44 points and was put in second place. The teams of Magin-Lawrence and Thomas-Ryan were tie for third place and divided third and fourth money.

### Eleven Teams in Finish

The total mileage for the one hundred and forty-two hours of the race was 2,770 miles and 8 laps, which is 11 miles and 6 laps ahead of the previous record made by Goullet and Grenda in 1914. The European, sometimes called the Berlin, system of finish was employed: at nine o'clock on Saturday night the eleven teams in the lead remained on the track to contest the victory in a series of sixteen one-mile sprints during the final hour of the grind. The man finishing for his team who won a sprint was credited with one point, the second man with two points and the last man with eleven points. Hitherto it has been customary to award the winner of each sprint with the highest number of points.

There were sprints galore to thrill even the most blase New Yorker during the last hour, and there were spills, too, that brought the fans up on their feet and had them howling with delight.

*The teams of Spears-McNamara and Drobach-Corry were each penalized eleven points for foul riding, Spears for pushing Egg in third sprint, and Drobach and Corry for an illegal pickup.

The greater part of the sprinting was done by Grenda, McNamara, Spears and Egg. "Mac" played a wise game during the last hour. He invariably let Grenda set the pace up to the very last lap of each mile, and then nipped the lanky Australian at the tape by inches. Spears proved his mettle in more than one sprint, but he displeased the referee when he interferred with Egg, the team-mate of Dupuy, and was therefore penalized eleven points. Egg had been the populor idol of the crowd throughout the week for his terrific sprinting, but he did not figure as strongly as was expected in the last hour.

Bobby Walthour and "Piggy" Moran, the old veterans of the game received a great ovation from the spectators, when Bobby uncorked a sprint almost at the end of the fatal hour and gained a half lap on the field; Moran relieved him and gobbled up the other half so that his team was one lap ahead of the bunch. But according to the Berlin finish a stolen lap does not count in the scoring; nevertheless Walthour and Moran are credited with holding the new six-day bicycle record. The fans realized that this was perhaps the last big feat which these grand old men of the bicycle game would accomplish and they cheered Bobby and "Piggy" to an echo.

Corry and Drobach were penalized 11 points for a bad pickup, but this penalty did not affect their standing in the finish, for they would have come into the ninth position even if they had not been penalized.

There was the usual talk among the spectators about combinations being formed

Alfred Grenda — Freddie Hill — Reggie McNamara — Bob Spears

Digitized by Google

among some of the teams in the finish, and rumors were thick that the scores had been bolstered up to stimulate box office receipts, but "wiseacres" gave no credence to the gossip on faking records.

**Madonna Regains a Lap**

Early on Wednesday morning the riders were more than five miles ahead of the previous record. They were still going at a pretty good clip in spite of the fact that sprint after sprint was uncorked in rapid succession during Tuesday night. Near 2 o'clock Madonna, the Italian, who was teamed with Suter, jumped the bunch and after six laps of terrific sprinting he managed to bring his team one lap nearer the leaders. Suter and Madonna were then two laps behind the front-rankers.

The spectators, who were still lounging around the Garden with the expectation of seeing some more sprints during the early hours of the morning, observed that Kopsky, who was paired with Wohlrab, was apparently losing ambition and lagging behind the field. Finally at 4:50 he withdrew from the race, suffering badly from saddle-soreness and boils. There was no partner available for his teammate Wohlrab after four hours.

Instead of slowing their pace during the morning hours and resting up the cash-chasers did not relax their efforts one whit, but continued speedily grinding out the miles. The score for seven o'clock was 1,155 miles and 7 laps, which is 12 miles and 3 laps ahead of the old figure. Nine o'clock saw the riders 17 miles and 9 laps in advance of the previous record.

Rudi-Russe, the teammate of Vanderstuyf, who was making desperate efforts to win back some of the laps which his team had lost, opened a wide gap, the bunch showing no inclination to sprint after him. Finally he succeded in regaining one of the four laps which his team had lost.

**Sullivan Crashes Into Rail**

Just after 12 o'clock Sullivan crashed into one of the guard rails when his tire blew out. Moran and Seres, riding in back of him, went down in a heap, but were not seriously injured. At one o'clock the riders were 18 miles and one lap ahead of the former record, Halstead, teamed with Hanley being in the lead.

To liven the proceedings a bit in the afternoon several box-holders came forward with primes and a number of good sprints resulted. Anderson and McNamara were the lucky riders to pocket the money. Six o'clock in the evening the contestants had crimped the former figures to the tune of 12 miles and 7 laps. Just as the evening crowd was beginning to fill the huge arena the referee brought a yelp out of the crowd when he announced that Suter and Madonna had been penalized one lap because the team had no member on the track for nineteen consecutive laps.

Egg, whose sprinting made him the most popular rider with the crowd, started a jam shortly after nine o'clock. The lead was taken up by his teammate Dupuy, and by Hill, Corry, Hanley, Spears and Eaton. The strain of this terrific sprint told immediately on Piercey, who toppled over on one of the high turns of the track and was badly hurt. He was carried off the saucer and after being examined by a physician was declared in no condition to resume the grind. His teammate, Walker, was given the customary four hours to find a new partner, but at the end of that time all of the teams were intact.

In an effort to prevent further spills the judges announced later in the evening that all riders who were one lap or more behind the field had to ride down on the flat part of the track when a sprint started, so as to reduce jams to a minimum.

**Egg Thrown from Machine**

One of the most gruelling sprints of the evening was brought to a sudden halt when Egg, trying to cut across one of the contestants, was thrown from his machine. He escaped with a few scratches on his leit leg and arm, but he soon had these patched up and reappeared on the track, receiving a great ovation from the crowd.

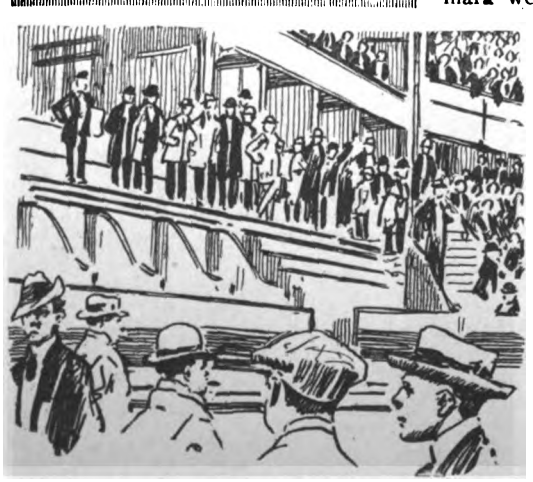
SCORE FOR 72ND HOUR

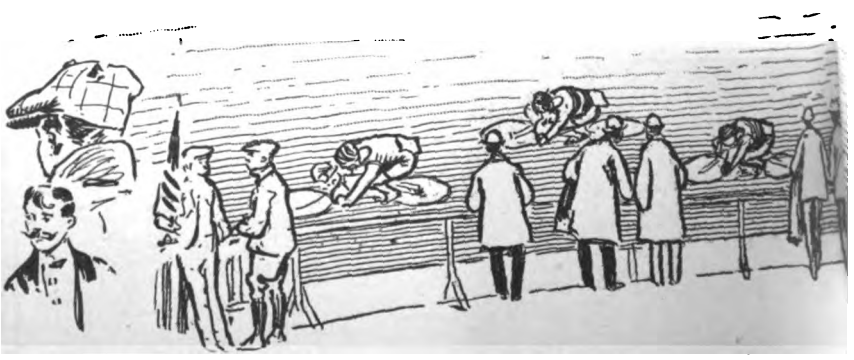
| | M. | L. |
|---|---|---|
| Grenda and Hill | 1,487 | 5 |
| McNamara and Spears | 1,487 | 5 |
| Fogler and Carmen | 1,487 | 5 |
| Lawrence and Magin | 1,487 | 5 |
| Egg and Dupuy | 1,487 | 5 |
| Drobach and Corry | 1,487 | 5 |
| Ryan and Thomas | 1,487 | 5 |
| Mitten and Hansen | 1,487 | 5 |
| Moran and Walthour | 1,487 | 5 |
| Eaton and Madden | 1,487 | 5 |
| Seres and Linart | 1,487 | 5 |
| Hanley and Halstead | 1,487 | 5 |
| Sullivan and Anderson | 1,487 | 4 |
| Suter and Madonna | 1,487 | 2 |
| Rudi Russe and Vanderstuyft | 1,487 | 3 |

Egg leading. Previous record 1,468—5, made by Goullet-Grenda in 1914.

In a sprint started early Thursday morning, the fourth day of the race, by Bobby Walthour, the gray-haired veteran, three teams were lapped: Sullivan-Anderson, Rudi Russe-Vanderstuyft and Suter-Madonna.

Thursday morning again witnessed some heavy record tumbling. At two o'clock the leaders were seven miles and three laps ahead of the old figures, and this advantage was gradually increased hour after hour until at nine o'clock the score board showed that the pluggers were 28 miles to the good. This was the greatest wallop





Digitized by Google

that was administered to any of the records throughout the entire race.

Walthour, who was putting up a good fight and stuck to the grind with grim tenacity, was overcome by the "sand man" early in the afternoon and slumbered peacefully on his machine while riding around the saucer. And he didn't wake up until he bumped into a guard rail, and carried down Linart and Dupuy. Bobby sustained a few scratches.

A sprint was started soon after this mishap by McNamara, who got away with a twenty yard lead and held that distance for five laps, when he dropped back among the bunch.

The leaders were twenty miles and nine laps ahead of the previous record by five o'clock on Thursday evening.

### Vandersuyft Cops a Lap

More sprints, stimulated by primes, were on tap throughout the evening. Two ten dollar prizes for five lap sprints were captured by Egg, while another ten spot found its way into Eaton's pocket. Much amusement was caused by the mad attempts which the tail-enders made to regain their lost laps. Vanderstuyft started the ball rolling. He shot out like a cannon ball ahead of the field and managed to gain a half lap lead, when his partner, Rudi Russe, relieved him and finished the job, bringing his combination one lap nearer the front rank.

Not to be outdone by Rudi's performance, Madonna got busy and made things hum for a while. He received no assistance from his teammate Suter, and kept whirling around at a pace that had the fans on their feet shouting wildly. Bedlam broke loose in the Garden and the crowd yelled itself hoarse encouraging the Italian. After persistent riding for over one mile, the plucky son of Italy regained a lap.

The hard ride took all the aggressiveness out of Madonna and Suter, also, was tired. As he pedalled slowly along at the top of the track, another sprint was started and the Swiss, before he realized what was going on, was lapped by the field. The team made a protest when the hard earned lap was taken from them, but the referee refused to sustain their protest.

After nine o'clock three more primes were offered, all of which were captured by Peter Drobach of South Boston. Egg was in for more mischief about eleven o'clock when he started another of his cyclonic sprints which had already proved the undoing of more than one team. He was rapidly picked up by his teammate Dupuy, and the three trailers were again lapped.

Before midnight Eaton and Madden were penalized by the judges for a false pick up. This put the Newark youngsters, who are hardly out of their teens, one lap behind the leaders.

SCORE FOR 96TH HOUR

| | M. | L. |
|---|---|---|
| Grenda and Hill | 1,926 | 8 |
| Fogler and Carmen | 1,926 | 8 |
| Lawrence and Magin | 1,926 | 8 |
| Egg and Dupuy | 1,926 | 8 |
| Drobach and Corry | 1,926 | 8 |
| Ryan and Thomas | 1,926 | 8 |
| Mitten and Hansen | 1,926 | 8 |
| Moran and Walthour | 1,926 | 8 |
| Seres and Linart | 1,926 | 8 |
| Hanley and Halstead | 1,926 | 8 |
| Eaton and Madden | 1,926 | 7 |
| Sullivan and Anderson | 1,926 | 5 |
| Suter and Madonna | 1,926 | 4 |
| Rudi Russe and Vanderstuyft | 1,926 | 3 |

The previous record was 1,904—9, made by Cameron-Kaiser in 1914.

The teams of Suter-Madonna and Rudi Russe-Vanderstuyft were officially declared out of the race shortly after midnight. They were so far behind that there was no possibility of either team catching up with the leaders. Later it was announced by the management that these two combinations had not entered the grind as contestants but only as pacemakers, which accounts for the whirlwind sprinting which Madonna and Rudi Russe did at frequent intervals, when they might better have stored up their energy.

The first mishap occurred on Friday morning when "Grassy" Ryan started a sprint in which McNamara and Corry crashed in front of the press stand. Anderson and Sullivan were lapped in this sprint.

At three o'clock the riders were twelve miles and four laps ahead of the record. A sprint started by Thomas was brought to an abrupt end when Spears, Drobach and Moran went down in a heap. None of them were badly hurt and were soon able to resume the grind. No sooner had the fallen cyclists picked up their machines when Ryan uncorked another spurt of speed, in which the Sullivan-Anderson combination lost two laps.

### Eaton-Madden Up with Leaders

Eaton and Madden, the Newark "kids," who had been penalized one lap the previous day, started a sprint about five o'clock and regained their lost lap. This put them back among the leaders. Several more exciting sprints enlivened the morning hours. At six o'clock the leaders were eighteen miles and seven laps ahead of the record.

When the dinner hour was approaching Fogler and Carmen were officially declared out of the race. Fogler was exhausted after the gruelling sprints of the morning and suffered from stomach trouble. Carmen waited to team up with Moran, thinking that Walthour, who was

**CAN'T GET THIS OLD MAN'S GOAT—HE USES A MOTOR WHEEL**

**Ft. Worth, Tex., Boasts This 74-Year-Old Motor Wheelist, Who Handles the Outfit with Ease. The Goat Belongs to Mr. Massey, Burton Supply Co.**

showing signs of weakening, would drop out of the race before the four hour limit. But Bobby proved to be a sticker.

Friday afternoon found the riders still far ahead of the old figures. A spectator who was getting tired of the weary grind, got up and offered twenty dollars for four five lap sprints. That put a little "pep" into the merry-go-round, Anderson and Egg doing most of the sprinting and spliting up the prizes between them. Toward evening, Bobby Walthour was in better condition.

The first big sprint of the evening was started by Percy Lawrence, who broke loose and gained half a lap. Magin, his teammate, held this lead for five laps, when Lawrence resumed the grind, and after a half mile chase was overtaken by Egg and the riders were bunched once more. At the 118th hour, or ten o'clock, the leaders had covered 2,318 miles and 0 laps, which is 13 miles and 1 lap ahead of the record. Anderson copped the majority of the primes which were offered before midnight, while Hill tucked away a ten spot for a ten lap sprint.

SCORE FOR 120TH HOUR

| | M. | L. |
|---|---|---|
| Grenda and Hill | 2,360 | 2 |
| McNamara and Spears | 2,360 | 2 |
| Lawrence and Magin | 2,360 | 2 |
| Egg and Dupuy | 2,360 | 2 |
| Drobach and Corry | 2,360 | 2 |
| Ryan and Thomas | 2,360 | 2 |
| Milton and Hansen | 2,360 | 2 |
| Moran and Walthour | 2,360 | 2 |
| Eaton and Madden | 2,360 | 2 |
| Seres and Linart | 2,360 | 2 |
| Hanley and Halstead | 2,360 | 2 |
| Sullivan and Anderson | 2,359 | 6 |

McNamara leading. The previous record was 2,349 miles and 2 laps, made by Moran-McNamara in 1914.

Saturday, the last day of the grind, was naturally "slow" and uninteresting; the riders were saving themselves for the final hour sprints which would use up all their available energy. More than once during the day they came perilously near falling behind the record. At six in the morning their lead over the record had diminished to one mile and six laps.

Sullivan and Anderson were declared out of the grind on Saturday morning. At that time they were more than a half mile behind the leaders.

Throughout the afternoon and early evening, the leaders just kept on plugging at a dead pace, until when the hour for the sprints approached a number of vain attempts were made to lap some of the weaker riders.

## SIDELIGHTS ON THE NEW YORK SIX-DAY RACE

**By WALTER BARDGETT, Assistant Scorer**

ONE incident that stood out against all others in connection with the twenty-third annual six-day race, just finished at Madison Square Garden, was the fact that eleven teams weathered the grind and were tied at the finish. The fields' being evenly matched, may account for the remarkable showing; and the fact that the riders never rode on the flat of the track, something which they are in the habit of doing, accounts for the record-smashing feats of the week.

The passing of Joe Fogler, the Brooklynite, as a six-day rider, may well be said to be another big incident of the Garden grind. Joe, who has been on the winning team in five races held in the famous arena, finally went to the tape once too often, and when Joe retired Friday morning he was a very tired boy. The strenuous sport loses one of its most remarkable performers in the belligerent Brooklyn cyclist.

The victors will endeavor to "elevate" the stage in a vaudeville house in New York. Grenda and Hill will be seen in a home trainer act, and Joe Fogler will be the man behind the guns with the act. Bobby Walthour will also appear in a theatrical sketch with his wife at New Haven.

"Grassy" Ryan, the Newarker, made a most remarkable showing in the last hour of sprinting. When Thomas fell in the third sprint Ryan was forced to take to the track and ride in four sprints in succession. And Ryan finished fifth, third, fifth and fourth, respectively, in the four dashes. The Newarker was in great fettle and rode a remarkable race, being one of the riders that kept action in the event.

On Tuesday morning the winners in the six-day race received their slices of the melon which was cut over at Vailsburg. All of the teams that participated in the grind received bonus money, which ranged from fifty dollars to one hundred and fifty per day, according to the individual merits of the rider. The place takers were given the following prizes: Grenda-Hill, $1,500; McNamara-Spears, $1,000; Magin-Lawrence, and Thomas-Ryan (tied for third place), $675 for each team; Egg-Dupuy, $500; Eaton-Madden, $450; Moran-Walthour, $350; Hanley-Halstead, $200. In addition to these plums there were, of course, the special primes hung up by spectators during the race, which amounted to several hundreds of dollars.

Taking individual riders as to their ability to aid in making the race a success, the names of Rudi-Russe, Madonna, McNamara and Ryan come ahead of the others. Rudi-Russe and Madonna, for their pacing, deserve a great deal of credit, while as "jammers" Ryan and McNamara also are worthy of praise.

One bad feature of the last day was the open team work of a number of the star riders in the race. Though they signed a contract to the effect that they would refrain from any team work and would not enter in any combination, it was apparent to the majority of those at the finish that team work was being indulged in. Grenda and Hill, Spears and McNamara, Drobach and Corry and Lawrence and Magin looked to have an understanding to aid each other in the latter stages of the annual grind.

Hardly had the race finished before a promoter from Chicago wanted to stage another grind in the Coliseum in February. The promoter came with a letter of introduction to the Garden promoters, but as the Chicago Velodrome Company own the outdoor franchise of the National Cycling Association and the Cycle Racing Association the indoor franchise for that city, the road of the promoters is very likely going to be a hard one. If the race is run, and there is doubt that it will be run, the event would have to be an outlaw one. Under present conditions it is hardly likely that the racing cyclists would entertain any scheme that has not the stamp of approval of the controlling body.

Alfred Coullet, one of the winners of last year, was not a competitor in the race. He acted as a scribe, like his great rival, Frank Kramer, and wrote a story on the race for the Sunday *Call* of Newark.

During the race the offering of primes, or special prizes, caused no end of excitement and amusement. Early on Friday morning "Tad" and "Hype" Igoe, two cartoonists of New York City, pooled their interests and offered a 10 prize. Just at that time Jimmy Johnston, connected with the management of the race, gave a like amount for a sprint. The two ink slingers, in an effort to rescue their money, shouted "Save our dough."

## NEW DEPARTURE BOOSTS CHRISTMAS TRADE

BRISTOL, Conn., Dec. 14.—The Christmas circular, which is reproduced below, is a concrete instance of what the New Departure Manufacturing Co. is doing to help dealers boost their holiday business and start the ball rolling toward the one-million mark. In addition to the folder illustrated this concern is also furnishing the dealer

New Departure Circular

with one or more large posters which are a duplicate of the circular cover.

These posters are intended to be hung in the dealer's window or in some conspicuous place in the salesroom, while the folders are furnished in sufficient numbers for the dealers to mail to all of their prospects.

Three colors—red, green and black—give this boosting material a very attractive appearance. A pleasing road scene, showing a lot of youngsters merrily wheeling along and apparently having the time of their lives, surrounds the advertising copy on the inside of the circular. The copy tells in terse and convincing sentences why every boy and girl should have a bicycle: "There is nothing better for a Christmas gift. It's a daily joy the whole year round because of the exhilarating sport of cycling swiftly through pleasant places to the home of a friend, to the woods, to the fishing brook, . . . to school—everywhere. . . . It keeps the doctor away, because it combines healthful exercise with fun. . . . The modern bicycle is the safest vehicle on the public street. . . . It is better today than it ever was and can be bought for a fraction of its former price."

### HAVE BICYCLE SIDECAR

SEATTLE, Wash.—Ballou & Wright are now distributing a bicycle sidecar made by the Bicycle Sidecar Co., of Los Angeles, Cal. The Emblem line of bicycles is handled by the firm.

### HOLIDAY CATALOG OUT

LOUISVILLE, Ky.—The Sutcliffe Company, jobber and retailer of bicycles and sundries, as well as Smith Motor Wheel distributor, has just got out its attractive Christmas catalog. Quite a number of pages are given over to the firm's line of cycles. The cover shows Santa Claus with his pack surrounded with a border of holly.

### HANDLING BIKES ON CLUB PLAN

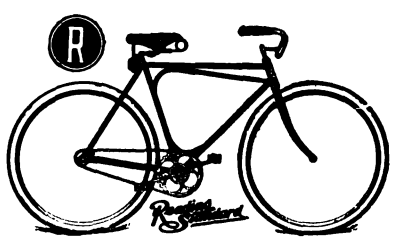
EVANSVILLE, Ind.—The Ashley-Sergeant Company, successors to the Household Outfitting Company of this city, is building up a big bicycle business, and reports that it is selling about 600 bicycles a year. The company handles bicycles on the club plan, which has proven very successful in the city. The concern has just closed a deal whereby it takes on the Excelsior bicycle.

## R-S "WHITE FLYER" MAKES DEBUT AT $40

READING, Pa., Dec. 14.—The Reading Cycle Manufacturing Company has added a new model to its complete line of machines, which will be known as the Reading Standard White Flyer, and will list at $40.

The new model has the characteristic Reading Standard construction. The entire machine is white enameled, but the head is of a handsome green and bears the company's attractive Gothic name plate. Some of the heads are done in red, this color being optional. The guards and the rims are all centered with the color corresponding to the head, and the frame is beautifully embellished with decalcomania of an attractive design.

Liberal options are given on this model besides the regular equipment, which is



New R-S Bicycle

all of a very high class and harmonizes well with the attractive frame. Already the Reading cycle company reports that dealers are placing liberal sample orders for the new model, which will be specially featured in a new 1916 catalog soon to be issued. This catalog will be one of the most attractive which the Reading concern has ever gotten out.

## "ONE MILLION" CAMPAIGN IS MOVING RAPIDLY

AKRON, O., Dec. 12.—In furtherance of its campaign for "One Million Bicycles in 1916," the Goodyear Tire & Rubber Co. has sent out a second letter to manufacturers in which it asks for comment, suggestions and co-operation. The Goodyear company hopes to secure the support of all cycle and parts makers, and believes firmly that by centralized and consistent effort it will be possible to bring the 1916 bicycle output near the million mark.

In the second letter sent out, extracts are made from several replies already received from manufacturers:

"We are glad to note your spirit and effort along lines similar to our own, and in saying that we wish you every possible success we will not stop there, but shall do all we can to promote the good work."—Persons Mfg. Co., Worcester, Mass.

"We certainly wish you every success in your endeavors to increase the sale of bicycles, and incidently of bicycle tires. I believe you already have done good work along that line."—Westfield Mfg. Co., Westfield, Mass.

"The only suggestion that we have to make is that if everyone would spend money in national publicity, forcing bicycles forward, the results would be greater than what they anticipate."—Iver Johnson Arms & Cycle Works.

"The bicycle manufacturer should lay especial stress on his name plate lines on which depend his profits; and the re-sale figures should be so set that a certain amount could be laid aside for some high grade advertising, and as well as publicity through other channels."—Hendee Manufacturing Co., Springfield, Mass.

### GENDRON DISTRIBUTORS

SEATTLE, Wash.—Spegler & Hurlburt are distributing bicycles made by the Gendron Wheel Company in this city. They cater chiefly to the juvenile trade. The pair had been out of the bicycle business for the past seven years, but 1916 prospects looked so big that they entered the bicycle field once more.

### DEMONSTRATES CYCLEMOTOR

BALTIMORE, Md., Dec. 14.—Joe Nechamkin, of the Maryland Cycle Company, which handles the Cyclemotor, the new bicycle motor attachment, can be seen almost every day demonstrating the outfit, shown in the accompanying illustration, on the streets of Baltimore. In order to prove to prospective purchasers of the Cyclemotor that there is no vibra-

Nechamkin's "Stunt"

tion when it is running, Nechamkin easily rides his wheel with his hands off the bars, and keeps it up for a considerable distance on a straight stretch.

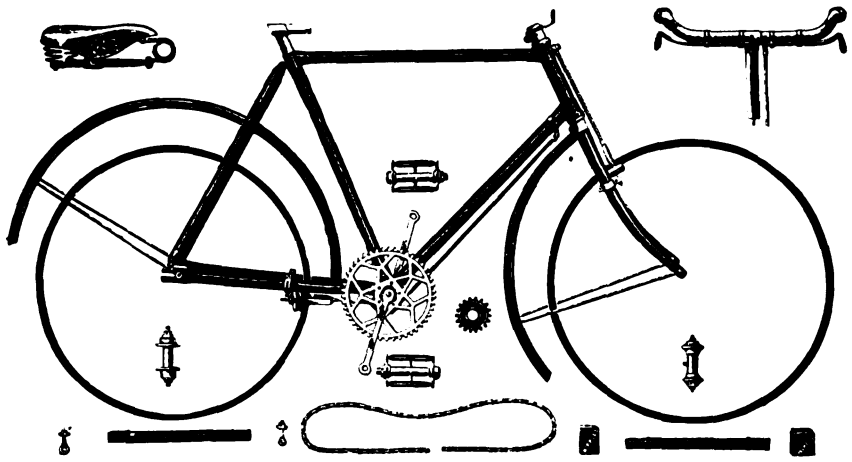
# THE BICYCLE THAT WILL CAPTURE THE FOREIGN MARKET

## Full Details on the Type of Machine Great Britain Exports Given Out by Overseas Trade Expert

NEW YORK, Dec. 13.—Being himself fully convinced that if American bicycle manufacturers exert a little of their characteristic "hustle" in the right direction they are bound to capture the foreign market, and having interested at least a few of these manufacturers in his scheme, Mr. O. Ling, who is the export manager for the Herbert F. L. Funke Company, Inc., of 116 Broad street, New York, today announced fuller details of the machine which Great Britain turns out for export. These standards every American export wheel, in his opinion, must measure well up to in quality, design and price if Great Britain, Germany and Italy are to be properly met as competitors in the world's cycle markets.

The accompanying illustration of the bicycle unassembled, which is being used by courtesy of Mr. Ling, represents a typical British export bicycle. For shipment these bicycles are packed six in a crate of very limited proportions, measuring only 45 x 28 x 30 inches and which, by the way, is lined with a pitch paper to guard against air, light, moisture, etc. From the drawing it will be seen that the bicycle is complete with the exception of tires.



Illustrating a Typical English Export Bicycle Unassembled

### Frame and Fork Construction

The frame, which is built of high carbon weldless steel tubing, with cranked and bridged seat stays and chain stays, is made in 22, 24 and 26-inch sizes for 28-inch wheels. It is enameled in finest black and stripped in two colors. The fork is provided with a sloping nickel plated fork crown, and incorporated in the steering head is a novelty with which the American bicycle is not graced—a steering lock. This device serves to lock the fork against turning when the wheel is being carried or set on the stand.

### Rims and Other Fitments

The rims are steel, highly nickel plated, 28 x 1½ inches, and drilled 32 front and 40 rear. High grade plated or rustless spokes, nipples, and washers are provided. The regulation three-piece British crank hanger with flanged 48 or 52 tooth sprocket, arranged for the customary British five-pin fastening are provided. In place of the usual American coaster brake, a ball-bearing free wheel rear sprocket is fitted, while braking is effected by means of a two roller tire brake, operated by a grip lever and bearing on the front tire, supplemented by a rim brake acting on the rear wheel and also operated through the intermediary of a grip lever. The handle bar is short and not offset and attaches to the slotted end of the fork stem by means of a contracting ring clamp which takes the place of the usual American expander and provides amply for the adjustment of the bar.

Either divided rubber or rat trap type pedals can be had at the option of the purchaser. Beaded edged mud guards with front extension and rustless stays enameled in two colors to match the frame, eyelet bolt type chain adjusters; a roller chain and the necessary mud guard attachment screws complete the outfit.

Needless to state all of the screw threads on this machine are B. S. A. standard and for the most part the bicycle fittings are interchangeable with fittings of other British manufacturers.

## PUTS SALE ACROSS

CHICAGO, Ill., Dec. 14.—Writing to Jones & Noyes, makers of commercial bicycles, one of their salesmen, while at Terre Haute, Ind., tells of an interesting experience he had in winning over a skeptical prospect, who was the owner of a large grocery store. The grocer did not believe that the machine was strong enough, and told the salesman that if he could successfully deliver an order for him with the Jones & Noyes outfit, he would buy a machine.

"I told him to 'load her up,'" writes the salesman. "First he put a 24-pound sack of flour in the basket, a 25-pound sack of sugar, a half dozen cans of tomatoes, and then two heads of cabbage, some loose bars of soap and a few other things; then on top of the basket cover we placed a 50-pound tub of lard and a bushel bag of potatoes. It was all we could do to lift the rear wheel off the ground. I had him get on another bicycle, and then pedalled the load for nine blocks, running the machine right up to the house where the $12-order was to be delivered. That sure was some demonstration, and the old commercial certainly made good. The grocer asked me to hustle along a Jones & Noyes outfit, so that he would get it in time for the Christmas rush, which would put a strain on his delivery system."

## HAULS PASSENGER

MICHIGAN CITY, Ind., Dec. 4.—Sam Ball, Smith Motor Wheel dealer, La Porte, Ind., performed the unique stunt of riding from his town to Michigan City and back with a Smith Motor Wheel attached to a Great Western bicycle, hauling a passenger on a rubber tire racing cart. The total distance was 32 miles. He left La Porte at 1:15 a. m. and arrived in Michigan City at 2:30 p. m.

## CONCENTRATING ON BICYCLES

PADUCAH, Ky.—The Mitchell Machine Company, of this city, which has been handling bicycles, motorcycles, electrical goods, etc., has discontinued its motorcycle business.

## CRITICISM RIFE AT BUSY C. M. A. MEETING

TORONTO, Ont.—A real crisis in the affairs of the Canada Motorcyclists' Association was reached at a meeting of the Toronto Motorcycle Club, held on Wednesday evening, December 8. Specific charges of neglect and mismanagement were hurled at all of the directors of the Canadian body by J. P. Downey of the club, and these accusations were answered at length by President J. M. Scott, Competition Chairman Walter Stoner, F. A. O. Johnston and W. H. Cooke, secretary, but one feature of the situation was that several club members also defended the actions of the C. M. A.

The fight was short and sweet—it was put down as quickly as the latest Chinese revolution. Downey, leader of the "rebels," laid down his charges, which included statements that the C. M. A. had done nothing whatsoever to justify the support of any club or rider; that no efforts had been made to increase memberships; that no attempt had been made to encourage sporting activity in the motorcycle field; that the officers had failed to answer correspondence and that the directors had allowed the reciprocal agreement with the F. A. M. to lapse. Downey urged that the Canadian riders invite the F. A. M. to assume control, once more, of the sport in the Dominion.

"The Toronto club has done nothing to merit the protection of the C. M. A. The association should have had the backing of the local club first of all," declared President Scott in reply to the accusations. "The Toronto club has not paid its membership fees in the C. M. A., in the first place, although its representatives have been voting at the association meetings. The club has broken faith with the C. M. A., and I see no reason why the club organization should have any criticism to make regarding C. M. A. matters. If we had had the support of the Toronto club we could have gone forth into other parts of the country, but you, yourselves, have been a handicap to the association."

President Scott explained that the association had given free sanctions to help the club in the holding of race meets at Tottenham and Uxbridge last fall, and the club was otherwise indebted to the C. M. A. F. A. O. Johnston declared that the Toronto board track had been practically the sole source of revenue to the C. M. A. during the year. Further, the only other live clubs in the province, Hamilton and London, had refused to come into the C. M. A. fold.

A real outcry occurred when Downey urged that the riders turn to the F. A. M. for a solution of the unfortunate situation. "I believe in a 'Made-in-Canada' policy, and I do not think we should allow ourselves to be controlled by a foreign organization," declared Walter Stoner of the C. M. A., who was also backed up by F. W. Straw of the club and others. This argument was greeted with applause.

Regarding the working agreement with the F. A. M., the officers of the Canadian association declared that the "treaty" would remain in force until a sixty-day notice was delivered by either side. No such termination notice had been received from the F. A. M., and the C. M. A. had not moved to call off the arrangement. Until relations were thus terminated the F. A. M. had no right to invade Canadian territory.

President J. G. Jones of the Toronto club made the statement that the club would pay its 1915 dues to the C. M. A. forthwith or he would resign from his position. Provisional delegates to the C. M. A. were then nominated to represent the club at the coming annual meeting.

## COFFMAN CONFERS WITH C. M. A. ON CO-OPERATION

TORONTO, Ont.—President A. B. Coffman of the Federation of American Motorcyclists had occasion, recenly, to visit this city, when he conferred with local C. M. A. officers on matters of state importance. He promised that he would make arrangements to attend the annual meeting of the Canada Motorcyclists' Association, which is to be held in the Queen's Hotel, Toronto, on Monday night, January 24. It is understood that he will then announce a program of activity for both the C. M. A. and F. A. M. The program will be, it is declared, a campaign in which the two associations will co-operate.

The annual meeting of the Toronto Motorcycle Club will be held on Wednesday night, January 12, 1916, and the installation of officers will be held on January 26. Nominations for the club offices will close at the meeting to be held on December 22.

Walter Stoner, one of the prominent members of the Canadian motorcycling fraternity, left this week for San Francisco, where he will enter the automobile business conducted by his brother.

### LONDON M. C. TO ELECT

LONDON, Ont.—The annual meeting and election of officers of the London Motorcycle Club will be held on Friday night, December 17. During the past six months an average of five new members has been secured at each monthly business session, and the whole club is in good shape. There will be no more club runs until New Year's Day, when the members will take in a ride to St. Thomas under the direction of Captain W. England. Ross Weir, the local speedster, who was dangerously hurt last June during a race, has almost recovered.

## BAND IS ORGANIZED BY CYCLIST CORPS

TORONTO, Ont.—The first band organization of a permanent nature ever formed for cyclists is the band of seventeen pieces which has been authorized for the Divisional Cyclist Corps, which is in training here for service in Europe. The instruments have already been donated by Mrs. H. B. Patton of Toronto. Preparations are being made for the first public appearance of the musical unit.

The cycle corps of the 109th Regiment, commanded by Lieut. G. L. MacKay, formerly Racing Board Chairman of the Canadian Wheelmen's Association, has received its issue of uniforms, which consist of hat, tunic, riding breeches and khaki bicycle stockings, and great coat. There are twenty-five members in the corps.

The Canadian Wheelmen's Association has sent forward big Christmas hampers to those members of the organization whose proper mailing addresses at the front could be secured. About thirty of the local racing cyclists have enlisted, but only ten of them have reached the firing line so far.

Newspapers throughout the Dominion published more details about the progress of the six-day bicycle race in Madison Square Garden this month than in any previous year. Practically every sporting page in the country contained bulletins of the race.

Word has been received that Gordon McMillan of the 2nd Canadian Pioneer Battalion has received his first stripes, and is now Corporal McMillan. He was one of Toronto's veteran bicycle racing cracks.

### DAYTON DOINGS IN CANADA

TORONTO, ONT., CANADA, Nov. 30.—F. H. Norris, the Canadian representative of the Davis Sewing Machine Company, of Dayton, Ohio, says that he was wonderfully pleased with the Dayton Motor Bicycle which he saw on a recent trip to the factory. During the past two weeks he has closed with eight prominent Canadian concerns to handle this additional member of the Dayton family.

The Arlington Bicycle Co., of Montreal, will distribute the motor bicycles throughout that vicinity. In Toronto the H. M. Kipp Co., Ltd., has control of Toronto and York counties. At Brantford, E. T. McCubbin; at Ottawa, Herbert Byshe & Co., and at Petersborough, H. T. Millard will be the agents. Lewis & Hobson will handle the line at Belleville, Ont., and the Wm. Gurd Company at London, Ont. Ernest C. Brisco has taken the agency for Lambton, Kent and Essex counties.

The list price of the motor bicycle in Canada is $135.

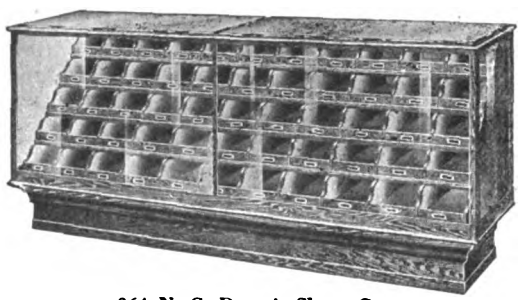
## USEFUL DETROIT SHOW CASE FOR CYCLE DEALERS

DISPLAY cases which enable the dealer to give the actual goods seen to the customer are made by the Detroit Show Case Company, of Detroit, Mich. The No. 364 N. C. case is especially adapted for motorcycle and bicycle accessories and may be had in sizes from 25 to 70 drawers



364 N. C. Detroit Show Case

capacity, the drawers being arranged in a series and each row being staggered with respect to the adjoining one.

The display case consists of a show case of golden oak or birch glazed with a bevel plate glass top in two pieces, and double-strength glass ends and front. The dimensions are 25 inches wide and 42 inches high with lengths varying from 4 to 10 feet. The drawers are open at the front end, being rabetted to give a pleasing appearance. The front end of each drawer has a slight ledge with label holder for prices, etc. The rear end has a bronze pull. Each drawer removes independently. It will be gathered from this that should a customer desire any article in the case, the drawer containing it can be removed and the article itself quickly submitted for his inspection and purchase.

## HANSEN MFG. CO. OFFERS NOVEL AIR CHUCKS

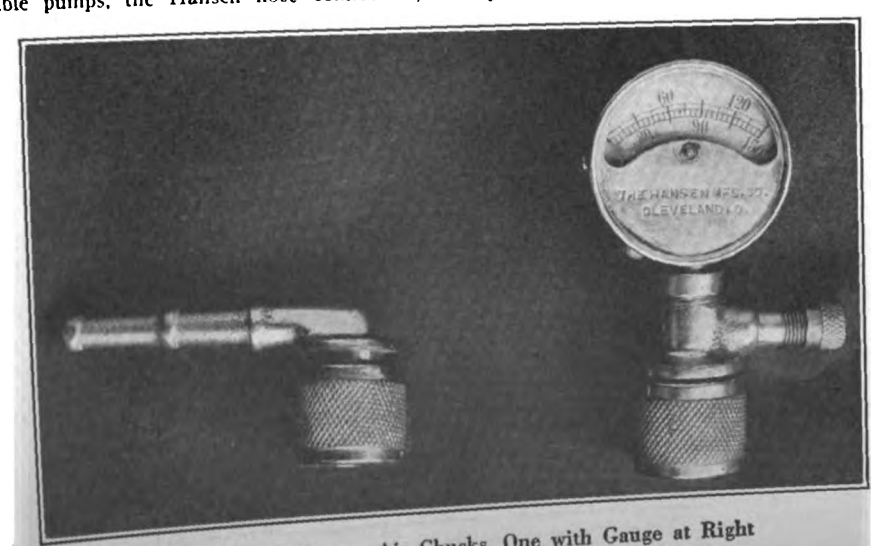
CLEVELAND, O., Dec. 10.—The Hansen Manufacturing Co., with offices at 1223 Illuminating Building, this city, has placed on the market a line of air chucks and hose connections, for both garage and owner's use, that is replete with novel features.

For smaller garages and for use on portable pumps, the Hansen hose connection, shown in one of the accompanying illustrations, has many virtues. It is so designed that it grips the tire valve stem tightly and cannot blow off or leak. The gripping process is effected by means of a soft rubber sleeve which normally, with the chuck open, is of such diameter that the valve stem will pass readily through it without undue friction. This soft rubber cylinder is held between a flange on the lower end of the knurled outer casing and a similar flange on the lower end of the connection itself, to which the outer casing screws. A quarter of a turn of the knurled sleeve compresses the rubber cylinder between the two flanges, with the result that it bulges inwardly and grips the valve stem firmly, preventing blowing off and leakage. The little device sells complete for 80 cents. It also is finished in high polished nickel.

A connection of the same sort, but which is embellished with a pressure gauge is also included in the Hansen line. The gauge is mounted directly above the hose connection. It is possible by depressing the gauge to determine the exact pressure in the tire at any time, and this act shuts off the incoming air and gives a steady reading. The Hansen tire gauge, which is of the flattened expanding brass ring type, is said to be the most reliable gauge on the market. Complete with the chuck and finished in nickel, it sells retail at $2.

While not quite ready to market the production, it is stated that the Hansen people are on the point of manufacturing a heavy armored hose connection, which will be eminently adapted for garage and service station use.

The complete Hansen line is handled to the eastern trade and for export by the Herbert F. L. Funke Co., 116 Broad street, New York City.



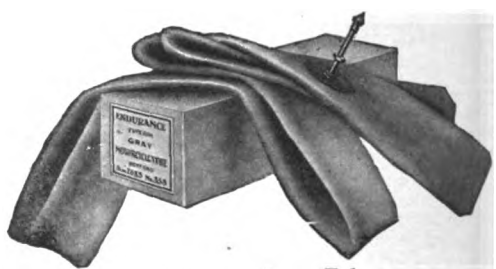
Two Styles of Hansen Air Chucks, One with Gauge at Right

## ENDURANCE INNER TUBES LIVE UP TO NAME

RED and gray motorcycle inner tubes bearing the Endurance brand are produced by the Endurance Tire & Rubber Company, of 1789 Broadway, New York. They are constructed to give long life under hard service, and to that end nothing but the finest Para rubber stock is used, and special care is taken in mixing and other processes to which these tubes are subjected in the course of manufacture. The tubes can be had in butt-end or endless styles as desired, the price being the same for both.

The Endurance tubes are made with the smooth side out, of over-thick and overy-heavy construction. This gives an ample factor of safety against failures of any sort. The tubes will not stretch, crease or pinch with fair treatment, but will expand or contract as the load requires. They are made in one piece, with reinforced valve base and splice. They are high-pressure air containers, in other words, which are free from leakage, and extremely sturdy.

The process by which Endurance motorcycle tubes are produced gives better vulcanization and the tubes are easily and quickly patched when punctures occur. The butt-end tubes are made with ends double thick. The gray tubes are made of full-floating rubber stock and their service and other desirable qualities are on a par with those of the red tubes. Like the red tubes, the gray ones do not require as careful handling as most others, owing to the superior elasticity of the rubber entering into their construction. Both colors perfectly fit the shoe corresponding to the size for which they are made.



Endurance Inner Tube

## NEW MACHINE NEEDED TO CUT "EBONY TREAD" DESIGN

THAT the new "Ebony Tread" tire was thoroughly satisfactory as regards non-skidding and other desirable qualities is proved by the fact that the makers, the Federal Rubber Manufacturing Company, of Milwaukee, Wis., had an entirely new machine designed and built in order to cut the new design. When the tread was proposed some months ago it was thought that it would not be difficult to develop it on the regular milling machines, but in actual operation it was found next to impossible mathematically to figure all the necessary curves required in the motion of the mold while the design was being cut.

Although success was achieved finally, the operation was so long and so costly that the Federal engineers decided upon developing a new machine, and succeeded in constructing one that was especially adapted to the work of the character of that required in cutting the design.

### FAFNIR CHICAGO BRANCH

CHICAGO, Ill.—The Fafnir Bearing Company, makers of Fafnir ball-bearings, at Bristol, Conn., has opened a new branch office in this city at 39 South Clinton street. D. Davis is the manager.

No. 3 MOTORCYCLE PEDAL

# No. 3 STANDARD MOTORCYCLE PEDALS

Our products comprise:

Diamond "E" trade mark brand Spokes and Nipples for Bicycles, Motorcycles, Tricycles, Velocipedes, Invalid Chairs, Sulkies, Carriages, Cyclecars and Automobiles. Pedals for Bicycles, Tricycles, Velocipedes and Motorcycles. Toe Clips for Bicycle Pedals. Emergency Axles for Pedals. Screw Machine Products.

When you buy a motorcycle, make sure that it is equipped with STANDARD PEDALS.

Most manufacturers have reasoned out that "STANDARD" EQUIPMENT means increased value on the machine.

STANDARD PEDALS are big, roomy, soft and minimize the shocks. Deeply corrugated to insure positive foot grip. Insist upon STANDARD EQUIPMENT.

# SKF Ball Bearings Reduce Friction

In reducing friction SKF Ball Bearings *increase power*—for the smooth, silent, velvety working of SKF Balls makes for an easier, hence, more *effective* flow of power.

Consider the fact that SKF Ball Bearings are made of the highest grade of Swedish Crucible Steel—that the self-aligning feature takes care of any shaft deflection — consider also that five of the leading motorcycle manufacturers are using SKF and will continue to use them. This is overwhelming evidence of the superiority of the SKF principle.

Then write us for further details.

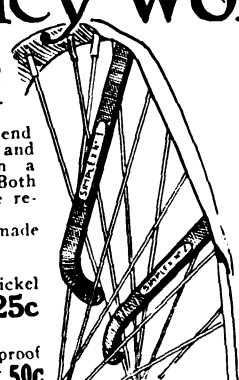
# How They Work



It is a simple matter to remove the heaviest motorcycle tire with a set of **Simplex Tire Tools.**

Just insert the straight end under the bead, pry up and hook the curved end on a spoke. That's the trick. Both hands free to complete the removal of the casing.

**Simplex Tire Tools** are made in two sizes:

**No. 1 Set**

Made of pressed steel, nickel finish, suitable for tires 2x2½". **Price**..... **25c**

**No. 2 Set**

Solid drop forgings, rust proof sherardized finish, will handle the heaviest tires. **Price** **50c**

## A New Tool for the Shop

"Jimmy" is a big husky fellow, just right for the job where a little persuasion is needed. Nothing better for putting on new, stiff tires or getting old ones off in a hurry. You'll find a hundred other uses for him around frames and motors. Made of spring steel, 1¼-in. x 5/16-in. x 16½-in. long. Better order a couple at once. **Price, each**..... **25c**

Dealers—if your stock of Stevens necessities is not complete, get in touch with your jobber at once. No goods sold direct.

# What About The Ignition?

THE ignition question is a serious one, especially now that a desire may exist to skimp here and there to obtain a low selling price.

Ignition should not be grouped with the good enough class, too much depends upon it. Cheap construction or poor design is sure to cause inefficiency and breakdowns, and a forceful advertisement to hurt the future success of the motorcycle maker and the agent.

The Bosch Magneto is famous because of its high quality. It is built to uphold a reputation, to measure up to a standard, and in consequence it costs just a trifle more than other ignition systems—but considering its ability to serve long and well, to satisfy thoroughly, it is comparatively the cheapest ignition system made.

# Mr. Dealer, your future hangs on the Lightweight

WHEN the vital subject of increasing your sales comes up, your thoughts naturally will turn to the Lightweight Motorcycle—its ability to appeal to a field far more extensive than your present one, is obvious.

The Lightweight Motorcycle is more simple, it is more docile in the hands of the beginner, it is more readily understood than the heavy weight, and most important, it can be sold at a price more in keeping with the average income. A good Lightweght Motorcycle is bound to be a big success.

That is plain logic, and likewise is the following: to be thoroughly simple, to be docile, smooth running, clean and quiet, a good Lightweight Motorcycle must have belt transmission—belt drive, because that method of drive carries to the back wheel all the power that is required by that type of vehicle and transmits the power in a manner peculiarly adaptable to the conditions.

Mr. Dealer, your intelligence already has told you that the Lightweight is the coming motorcycle—you also must know that to be a factor, the Lightweights you sell must be good, they must be simple, clean and able, they must be belt driven by none other than by

# Stop Figuring Losses—Ring Up Profits This Letter Service Brings the Business

## Do you get this Extra Profit?

Are your men idle part of the time? Are they bringing you a big profit or do you just break even?

You can sell more bicycles. You can sell more motorcycles. You can sell more tires. You can do more overhauling. You can do more tire repairing. You can make collections easier. You can get all this extra business by the simple Goodyear Letter Service.

## What this Service Is

Goodyear prepares a series of letters for you to fit your own special conditions. These letters have a 'punch,' a pulling power, that has already been proven by hundreds of dealers the country over.

These letters go to you complete, ready to sign and mail to your customers. There is no bother on your part. The service includes letterheads and envelopes in colors, with your name on them, also stamps and stamping, filling in your customers' names, addressing; absolutely complete service in every detail.

## Every Penny Back

For all this work the cost to you is only just a trifle. But remember this—*if these letters fail to pay you back their cost in increased business, we return to you the full purchase price, making the Service free.*

GOODYEAR
AKRON
**Blue Streak Bicycle Tires**

## Why we make this Offer

This offer is simply a part of the Goodyear Selling policy. Dealers are buying Goodyear Bicycle and Motorcycle Tires and Goodyear Tire Accessories. But we consider our duty only half done when we sell you Goodyear products.

We help you sell the consumer too. That's to our mutual advantage. You haven't time to study selling problems as carefully as we do. So we lend you our merchandizing and advertising experts thru these letters. They can do for you what they have done for us.

These men are helping dealers fight their selling battles and win against rising costs—unfair competition—smaller margins. Over 400,000 of these sales making letters have already been sent out by dealers.

We gladly send you these vital facts—with figures and letters from other winning dealers. Simply tear off coupon and mail to us today.

Vol. 10 Thursday, December 23, 1915 No. 51

## CHAPPLE PLANS TO RIDE 1,000 MILES IN 1,000 MINUTES ON SPEEDWAY

NEW YORK, Dec. 21.—Arthur Chapple, who has been whooping things up in behalf of the Miami Cycle & Mfg. Co. in the South and Southwest for some time past, blew into town a day or two ago looking like ready money and with an interesting idea or two up his sleeve as usual. "Chap" reports that the Miami Power Bicycle has been a ready seller in the territory he has covered and that the general outlook has never been more satisfactory.

"I had no trouble in lining the boys up for the lightweight machine," remarked "Chap" in the sepulchral voice for which he is justly famous, "and it is really surprising how the Power Bicycle delivered the goods when we put it to the test over all kinds of Southwestern roads. I found the Texas dealers especially favorable to the little fellow, in spite of the fact that some of the Texas roads are pretty rough stuff."

Chapple's latest scheme for hurting the feelings of old Dad Time involves the riding of 1,000 miles in 1,000 consecutive minutes on the new Sheepshead Speedway. He has been given permission by the Speedway management to make the trial and if a few details now pending are worked out to "Chap's" satisfaction he will make the ride in the not far distant future. He has not decided what make of motorcycle he will use, but states that any one of half a dozen makes would enable him to make good in the attempt.

While the undertaking looks pretty formidable, Chapple has figured it out to the point where he feels confident that nothing but serious physical injury could prevent him from making his 1,000 miles in 1,000 minutes—with something to spare.

### TWO-FLAG RUN SLATED FOR WORCESTER CLUB

WORCESTER, Mass., Dec. 20.—With the idea of putting across something out of the ordinary in the way of an endurance run, the Worcester M. C. announces that its next annual affair, for which a date has not yet been selected, will carry the riders to the Canadian border and return. It will be known as the Two-Flag Run and will call for 24 hours of consistent plugging. It is estimated that the mileage along the route tentatively outlined by the club will be in the neighborhood of 500.

Secretary E. W. Davis has been instructed to look up data on the route and lay out a preliminary running schedule.

The runs of the Worcester club have been somewhat out of the ordinary for several seasons past. One year the riders followed a route through the White Mountains and last season the itinerary covered six states.

### INCREASED TIRE PRICES MAY COME SOON

NEW YORK, N. Y., Dec. 20.—Trade men hereabouts are nerving themselves to receive news of an advance in tire prices about the first of the year, and in some quarters it is believed that the increase may be as much as 20 per cent. Manufacturers of tires are saying very little about the situation, but it is understood that they are almost of one mind as to the justification for a price advance. Considering the higher cost of rubber and other materials, it is argued that the 20 per cent. increase above referred to would be within reason, but it is still hoped that the requirements of the market can be met without such a pronounced boost in the schedule.

Attention is called to the fact that the great proportion of cost in a tire lies in the material, only about 15 per cent. being represented by labor, overhead and similar expenses.

Oxide of zinc, which is used extensively in the manufacture of white rubber, has advanced about 65 per cent., while cotton fabric costs almost 40 per cent. more than it did last year. Rubber has gone up steadily during the past month, the increase being about 20 per cent., with indications that it will continue to advance for some time to come.

That there will be a shortening of promises as to future prices by all of the companies is now practically certain.

## CONGRESS ASKED TO PROVIDE 100 MOTORCYCLES FOR ARMY

WASHINGTON, D. C., Dec. 20.—That army men have at last been awakened to full appreciation of the motorcycle as an adjunct to the military is indicated by the announcement that Congress has been asked to provide 100 motorcycles for the use of the Army Signal Corps. Developments on the European battlefronts have convinced the military experts here that modern conditions of warfare make the motorcycle well-nigh indispensable.

General Scriven, chief of the signal corps, in his annual report states that his own experience, wherever considerable bodies of troops have been consolidated and in service along the Mexican border, has proved the great value of the motorcycle. The general proposes the organization of motorcycle sections of the signal corps, and is of the opinion that when it is once given full opportunity to demonstrate its economy, speed and general effectiveness the motorcycle will become one of the most respected units in the fighting machine of the nation.

### JUST A REMINDER

### NO KICK COMING, SAYS BERGH

HAGERSTOWN, Md.—Activity at the factory of the Hagerstown Shoe & Legging Company has been increased of late by several contributions in the way of fat orders from C. A. Bergh, of Los Angeles, Cal., who is now the Western representative of the Hagerstown company. "Can't kick about the present business," says Bergh, and unless all signs go wrong things are going to be still better before we're much older."

Digitized by Google

# READING STANDARDS GOING TO FRANCE FOR WAR SERVICE

READING, Pa., Dec. 20.—Reading Standard motorcycles will soon be playing their part in the European war, arrangements having been made by which a considerable number of these machines will be placed in service by the French government as soon as they can be hurried across the Big Pond. The Reading Standard Company is justifiably proud of the fact that its motorcycle has met the stringent requirements of the French war office, especially in view of the fact that the order for the R. S. machines was not placed until they had demonstrated their sturdiness and all-round efficiency under many tests imposed by foreign engineering and military experts.

The Reading Standard Company is now hustling the first batch of machines to completion for the French government, and it is expected that a shipment will be on its way to France in a week or two. The fact that the R-S company was able to accept this special contract at a time when the factory is breaking all its past records for domestic business is indicative of the first-class organization now behind the Reading Standard line.

During the past week or ten days the Reading Standard Company has started to ship machines on a fat order from a foreign importing firm, these motorcycles being intended for England and Denmark. It is understood that the whole order calls for 500 machines, and that the advance payment on the contract was $6,000.

## HENDRICK TO MANAGE FISK PUBLICITY DEPARTMENT

CHICOPEE FALLS, Mass.—George B. Hendrick, of Winthrop, Mass., has been appointed manager of the newly-created publicity department of the Fisk Rubber Company, of this city. Mr. Hendrick is well known among newspaper and advertising men in the East, having been successively advertising manager for the Boston *Traveller* and the Pittsburgh *Post* and *Sun*, as well as sales manager for the A. Mugford Corporation, of Hartford, Conn., and the George H. Ellis Co., of Boston. He goes to the Fisk firm from the last concern.

In addition to publicity matters he will have charge of the printing, and will edit the company's house organ. The new department is distinct from the advertising department, the management of which is unchanged.

## TWO NEW VICE-PRESIDENTS FOR GOODYEAR

AKRON, O.—The Goodyear Tire & Rubber Company, of this city, elected G. M. Stadelman and P. W. Litchfield to be vice-presidents at its last annual meeting. Mr. Stadelman was secretary of the company and was also sales manager for a number of years. Mr. Litchfield was a factory manager. The Goodyear company now has three vice-presidents, C. W. Sieberling, former vice-president, having been re-elected. A. F. Osterloh, formerly assistant secretary, was elected secretary and also assistant sales manager. Following is a list of other executives for 1916:

F. A. Sieberling, president; F. H. Adams, treasurer; W. E. Palmer, assistant secretary and assistant treasurer; H. J. Blackburn, second assistant treasurer.

## INCREASED DEMAND IN INDIA FOR HENDERSONS

DETROIT, Mich., Dec. 17.—One feature which has been prominent in the business of the Henderson export department during the past fortnight is the increase in demand from India. A rather unusual number of propositions were closed in a group, whereas very little had been heard from India for several months.

Climatic considerations are to a certain extent responsible for this, as the warm season in India corresponds to the winter in this country, and riders in Hindustan wish their mounts when American motorcyclists are waiting for better weather and road conditions.

The Henderson dealer in Bombay ordered six new models for immediate shipment and from Allahabad came a cablegram on the following day for a stock of new Hendersons. Madras and Calcutta agents also applied for more machines.

McCormick Handling Excelsiors at Colorado Springs, Col., with His Children**

# *TEN EXHIBITORS TO SHOW CYCLE PRODUCTS IN MONTREAL SHOW*

MONTREAL, Que.—The Montreal Motor Show, to be held January 22 to 29, has already attracted ten manufacturers and jobbers who will be exhibiting motorcycle and bicycle tires and accessories. Those who have already signed for space include: Goodyear Tire & Rubber Co., Limited; Dunlop Tire & Rubber Co., Limited; Canadian Consolidated Co.; Higgins & Lee (Firestone tires); Kelly Tire Co. (Standard Welding Co. products); S. F. Bowser, Inc.; Canadian Fairbanks-Morse Co. (Bosch magnetos and accessories); Dominion Chain Co., Limited (Weed chains), and John Millen & Son, accessories. This list will be increased largely in the near future.

According to reports from dealers, there has not been such a demand for motorcycles and bicycles in the Province of Quebec in any year such as being felt now. Not since 1902 has there been such a call for bicycles and the tradesmen expect a banner year in 1916. The good roads movement is held partly responsible for the "revival."

The war does not seem to have had any effect on the wheel business in the Maritime Provinces either, according to the statements of local travelers.

## "JAEGER'S NITROS" MOVE TO LARGER QUARTERS

HOBOKEN, N. J.—The H. J. Jaeger Company, maker of "Jaeger's Nitros," nitrogen-filled electric lamps, in this city, has moved into its new and modern plant, in order to care for the steadily increasing demand for its product. The output of the new factory is about ten times that of the former plant. It is three stories in height, 200 feet long and 60 feet wide. The capacity is 20,000 lamps per day, and deliveries can be made within 24 hours.

A new type of filament has been developed to meet the objection raise against the nitrogen-filled lamp that it was not focusable. This type of filament permits a perfect focus to be obtained. The lamps so fitted will be made in candlepowers from 15 to 50, and with a voltage range of from 6 to 21.

The Jaeger's Nitros consumed ½ a watt per candlepower; or, in other words, a 32 candlepower nitro filled lamps will consume the same current as a 16 candlepower tungsten bulb. The quality of the light is extremely white and penetrating, and its low current consumption, coupled with this, makes it an ideal lamp for motorists. They are adaptable to any motorcycle lighting system on the market.

## CHAMPION SALESMEN TO HAVE ANNUAL SESSION

TOLEDO, Ohio.—The annual convention of salesmen affiliated with the Champion Spark Plug Company will be held in Toledo on December 27, 28, 29 and 30. Every year the Champion company invites its salesmen in from all parts of the country to attend the four-day meeting. This year's gathering promises to be the largest in its history. The main purpose of the meeting is to bring the selling staff together so that they can go over the advertising and selling plans for the coming year. Last year the Champion company made and sold 6,000,000 spark plugs, while the plans for the coming year call for a production of 12,000,000.

## ROGERS' FIRST CARLOAD

CHICAGO, Ill., Dec. 22.—President F. F. Rogers, of the Rogers Mfg. Co., has just written to Irving Beck, the Eastern representative in New York, that the first carload of sidecars would be shipped to the Metropolis on January 1. Young Beck is a hustler from the ground up and is keeping the Chicago factory working at top speed. Every effort is being made by Mr. Rogers to supply early the big demand of the Eastern dealers, whose sidecar orders indicate rosy prospects for 1916. Beck's first carload will contain 58 sidecars and he expects to get three more carloads pretty soon.

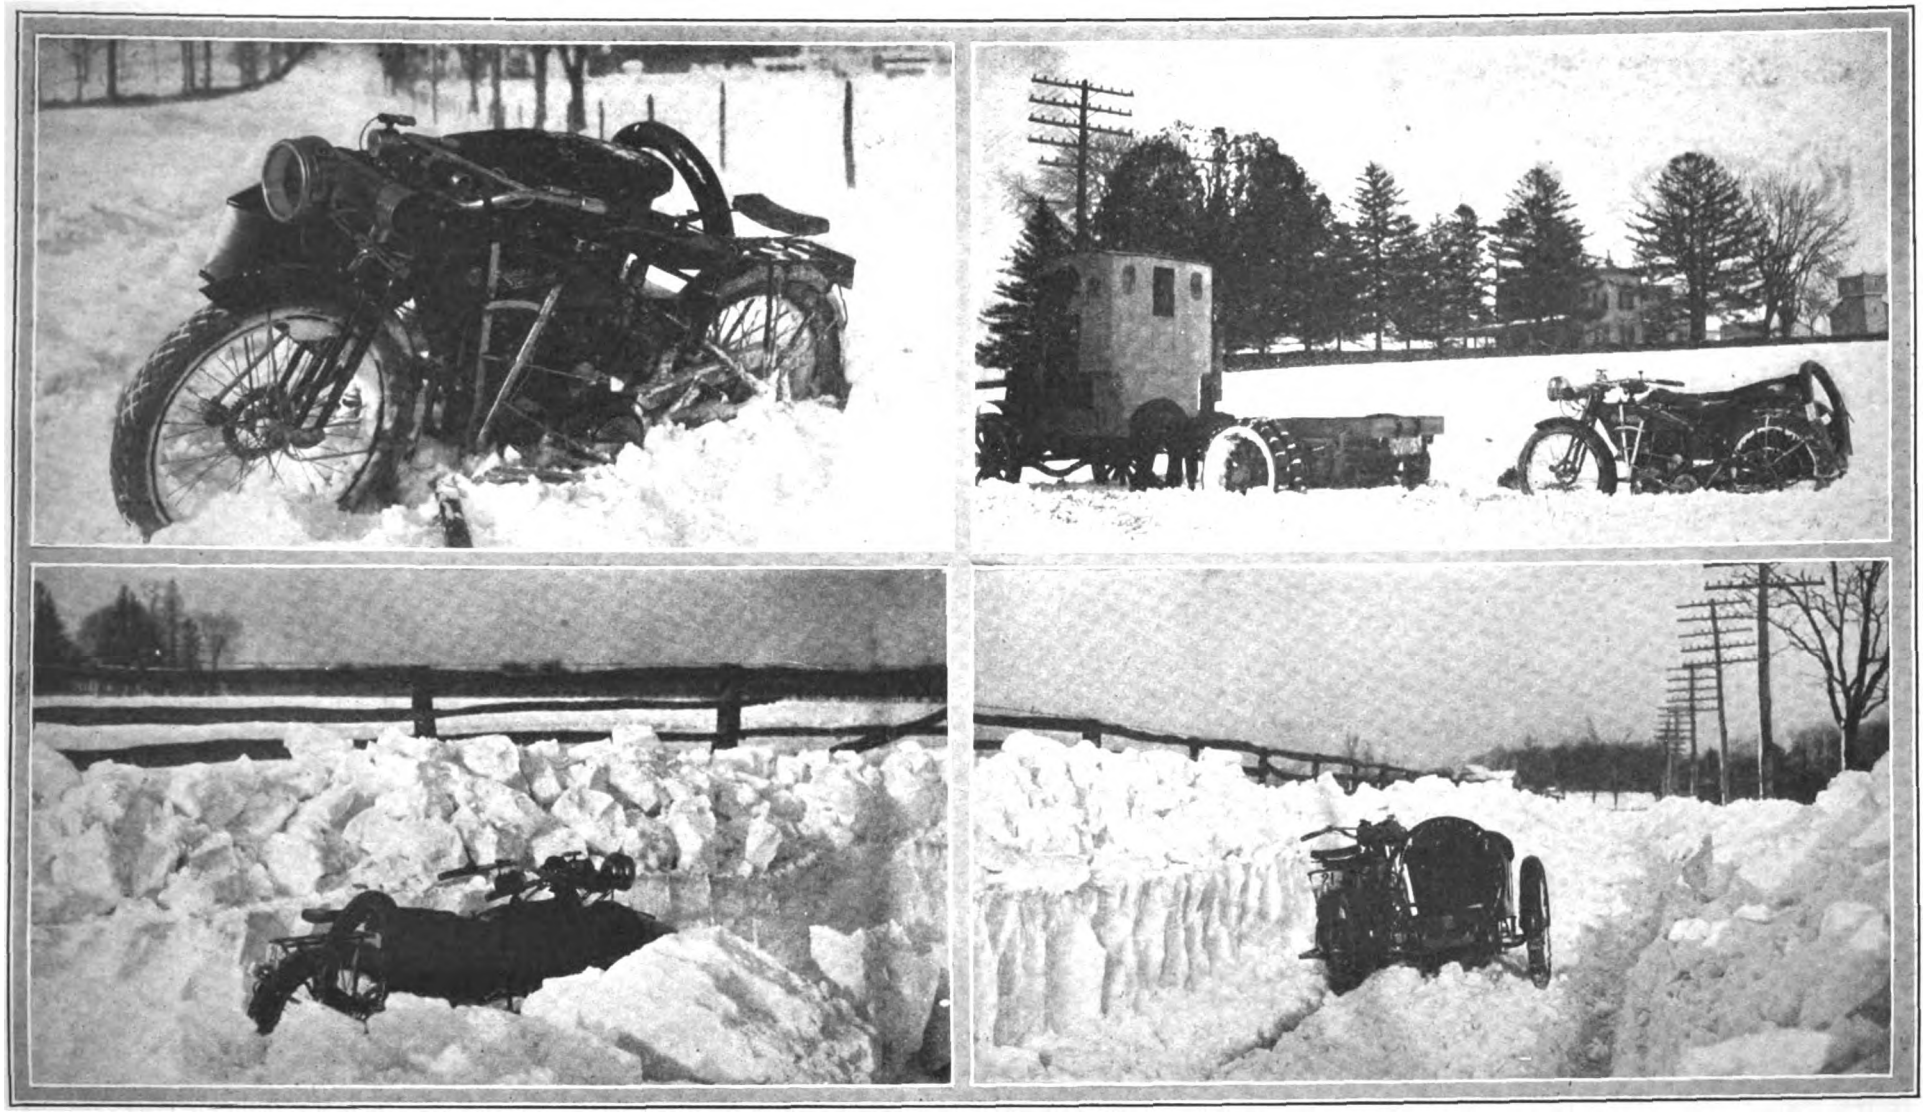
# GUTERMAN AND HIS R-S CONQUER FIRST HEAVY SNOW



TRENTON, N. J.—What Lou Guterman, the Reading Standard traveller, considers the hardest winter ride he has ever been in was during his run from the factory in Reading to Philadelphia and over to this city, December 14, 15 and 16.

In spite of warning of deep drifts through southeastern Pennsylvania, Guterman started from Reading on Tuesday, December 14, toward the Quaker City, a distance of 68 miles. He was not long on the road before he stalled in a deep drift, and this performance was repeated seven times during the journey. It was necessary each time for the R-S traveller to dismount and shovel the snow away from the rear wheel with his hands to get traction.

On Thursday, December 16, Guterman was told that the roads were open to New York, and so started off. More snow drifts impeded his progress, and it took him six hours to get to Trenton, 35 miles out of Philadelphia. It was necessary to take to the fields in many cases.

During the trip on both Tuesday and Thursday, he used intermediate and low speeds for all but a few miles, staying on the high gear being next to impossible. "The Reading Standard motor kept on plugging and was only stalled when the drifts and packed snow actually held the sidecar body. I frequently rode with the snow coming in streams over the front of the footboards. The motor never overheated, no matter whether in low or intermediate gear for mile after mile," said Guterman.

# HARDEN HAD "SOME" HAIR-RAISING RIDE OUT IN BUTTE

SAN FRANCISCO, Dec. 20.—L. D. Harden, manager of sales of the Westfield Manufacturing Company, Westfield, Mass., arrived in this city on Dec. 12, en route on a swing around the circle in the interests of his company.

Mr. Harden is enthusiastic over business prospects for his company next year. In every city east of the Rockies which he visited he said that general business conditions were good and steadily growing better, and that motorcycle and bicycle dealers were of the firm belief that they were going to have a brisk year in 1916.

The prosperity wave is headed this way, Mr. Harden declared, and already he perceived evidences of its approach in the growing optimism of business men, in and out of the motorcycle and bicycle trade. Business in all lines is booming in Butte, Mont., he said, and notwithstanding the lack of good level highways for motorcycling and bicycling, the people of that thriving mining center are enthusiastic devotees of the two-wheelers

While in Butte one of the dealers insisted on showing Mr. Harden some of the surrounding country, and despite his every effort to side-step the invitation, he was hustled astride a tandem and whisked away over the steep mountain roads for a ride that made his hair stand on end. As bad as the grade-climbing was, the descents were even more harrowing, and the daring of the Pope pilot in making hairpin turns and the terrific clip with which he descended steep mountain grades, almost turned the Eastern "tenderfoot's" hair white. "Never again," says Harden, with both hands elevated, whenever he discusses the experience.

"Some riders, those Butte boys," commented the genial Westfield manager, laughingly. "It looks as though I was jobbed, for the bunch laughed their heads off when they found out how scared I was on the trip. Talk about your bucking bronchos and the capers they cut up, why they are not one, two, three to what that fellow did on his Pope, with me up behind. Say, we rode so fast that I couldn't catch my breath in the thin air of that high altitude, and as I couldn't make even an outcry to beg the daredevil pilot to slow up, and couldn't slam him in the ribs to attract his attention, for fear I'd lose my grip on the tandem, I had to sit there and hang on for my life until we got back to earth. It was some experience, believe me, and also, believe me, it'll never happen again, not for me."

### LIVE CLEVELAND DISTRIBUTO

C. E. Hauk, of Cleveland Motorcycle Sales Co., Indianapolis, Ind.

### NEW FIRM IN ZANESVILLE

ZANESVILLE, Ohio.—The Mercer Garage and Electric Company is a new tire and accessory concern in the business here. The company was incorporated recently with a capital stock of $10,000, by Joseph K. Mercer and others.

### FIRESTONE CONVENTION

DETROIT, Mich.—Firestone tire dealers from Michigan met in this city during the week of December 6. The meeting was a business convention and officials of the Firestone Tire & Rubber Co. were present. At the banquet given the dealers, Secretary S. G. Corkhuss announced that a new and larger branch was to be built here.

### OFFERS IMPORTED SIDECAR HUBS

Michaelson & Sternberg, No. 116 Broad street, New York, inform us that they would like to get in touch with any jobbers who might be interested in purchasing a quantity of imported sidecar hubs.

# MOTORCYCLES AND BICYCLES LEAD FOR MOUNTED POLICE USE

INTERESTING facts concerning the use of motorcycles and bicycles by mounted police in the American municipalities of over 30,000 population are shown in a report which was made public recently by the Census Bureau. The report shows that in the cities mentioned there are 708 policemen mounted on motorcycles and 514 on bicycles.

In New York City there are 135 police mounted on bicycles, and Washington, D. C., has 61 bicycle policemen in addition to probably half that number of park police who are mounted on bicycles, and to about 20 police mounted on motorcycles. When it is considered that the number of motorcycle police in the country districts far outnumber those in the city it will be readily seen what a large part the two-wheeler plays in enforcing the country's laws. And each season finds more cities following the good example set.

# 400 BRANCH MANAGERS AND SALESMEN AT U. S. TIRE CONFERENCE

DETROIT, Mich., Dec. 18.—About 400 branch managers and salesmen of the United States Tire Co. participated in a four-day conference at the Morgan & Wright plant in this city during the last week. The meeting was one of the most enthusiastic and productive of the kind ever held. The staff men were greeted by officers and department heads of the company from the home offices in New York, and the program moved with a jump from the start.

While the company has made no formal announcement, it is stated that a good part of the time was devoted to acquainting the branch managers and salesmen with the details of new and broad-gauge tire marketing plans which will be fully divulged about the first of the year. The meetings were held on Tuesday, Wednesday, Thursday and Friday, December 14 to 17, inclusive, and a more spirited crew of sales boosters has never been seen here.

Tuesday was devoted mainly to getting acquainted. James Newton Gunn, recently chosen president of the company, met and greeted his entire organization for the first time.

The opening sessions were held in building "K" of the plant, and Joseph C. Weston, general sales manager, presided. The principal paper was by C. B. Whittlesey, vice-president of the Hartford Rubber Works Co., who spoke on "The History of Rubber." The absence of a number of New Yorkers, who were still bucking snowdrifts, disrupted the afternoon program, and the time after lunch was spent in talks, salesman to salesman.

The Eastern men arrived in time for dinner, which was served in the Hotel Statler. Dr. W. S. Sadler, of Chicago, spoke on "Physical Efficiency." It was deeply interesting to all.

Wednesday, at the business meeting, McMahan, factory manager of Morgan & Wright, told how tires are made, describing and demonstrating factory processes. George B. Van Cleve, of New York, spoke on the advertising of United States tires, and Ralph W. Ashcroft, advertising manager of the Canadian Consolidated Rubber Co., also spoke. There were a number of sales talks, including some on the co-operation of the sales and advertising departments, and sales demonstrations.

At the business dinner, Wednesday evening, in the Pontchartrain, Professor Paul H. Nystrom and Thornton Newsum gave addresses.

Among the speakers Thursday were Dr. Meyer, chief chemist of the general laboratories of the company and George E. Sieberling, factory superintendent of the Morgan & Wright plant.

Bicycle and motorcycle tires and their selling were discussed by Messrs. Stokes, Harding and Culp. The distribution of the products throughout the world was told of by Mr. Huxley, president of the United States Rubber Export Co.

A conference of managers was held Thursday afternoon, O. S. Tweedy in charge, and the salesmen were shown through the factory. The evening dinner was followed by an address by Hugh Chalmers on "Salesmanship."

G. F. Fisher, of the general laboratories of the United States Rubber Co., spoke Friday, and F. I. Reynolds talked on sales. Mr. Drake discussed service, Mr. Waite the manufacture, and Mr. Welch the selling of solid tires.

The convention ended Friday evening with a banquet at the Hotel Pontchartrain.

## MORE DATES ANNOUNCED FOR MOTOR SHOWS

HARTFORD, Conn.—The First Regiment Armory will be the scene of the ninth annual motor show to be held under the auspices of the Hartford Automobile Dealers' Association. The show will run a week, beginning February 12. It is understood that two or three motorcycle dealers will be represented by displays, and a number of the accessory exhibits will embody motorcycle products as usual.

COLUMBUS, Ohio.—This city may have two motor shows in January. The Columbus Auto Show Company announced some time ago that it would hold a show at Memorial Hall for the week of January 29, and later the Columbus Automobile Club and the Columbus Auto Trades Association announced a show to be held at the same place, January 12-16, inclusive. Efforts are being made to bring the various bodies together with the view of consolidating their endeavors in one big show.

MASON CITY, Iowa.—The second annual auto show will be held here March 9 to 11, inclusive. L. W. McAuley and J. B. Snyder are on the committee in charge.

## SPLITDORF STAFF CHANGES

BOSTON, Mass.—H. R. Curtis, who has been manager of the Boston branch of the Splitdorf Electrical Co., for some time past has resigned to assume the managership of the Excelsior Supply Co., of Chicago. R. M. Ellis, manager of the Sumpter magneto department, New York, has been selected to fill the vacancy in Boston, and R. J. Carroll, manager of the Newark branch, has been promoted to the New York managership. Thomas F. Burpee, assistant manager in Philadelphia, has been transferred to Newark, and G. H. Lincoln, of the New York branch, has been made assistant manager at Philadelphia.

## HOW A VISITOR MADE A SERIOUS MIS-"QUEUE"

THAT time-worn query "What's in a name?" has taken on a new significance for C. W. Waughop, of the Cleveland staff, who hangs his hat in the Export Department of the H. F. L. Funke Company, Inc., 116 Broad street, New York; none the less so for O. Ling, who is the head of that particular branch of the Funke business.

Waughop, or "Wop," as the motorcyclists call him, has always been among the first to spring a new pun concerning his own peculiar appellation, but a little Scotchman, McKay by name, dropped into the export office last week and startled the pair with a new one which, while it was given in all seriousness and innocence, caused no little consternation and quite some merriment. The man McKay was bent on business. He wanted the concern to handle a large export order to China. When apprised of the fact that China was one of the very few foreign lands in which the Funke company had no direct agents, he evidenced great surprise, and said that when he saw the "Chinese names" on the door, he had taken it for granted that he was dropping in on a house that could take care of all his needs in this line.

**Waughop's Name Fools 'Em, But He Gets the Business Just the Same**

Forthwith, both members of the Funke export staff, went outside and gave the "O. Ling and C. W. Waughop" lettering the "once-over" and decided on the spot that the man was right—the combination did have a "Chinese flavor."

And after the laughter which resulted had subsided, they went back to sell the said McKay a Cleveland lightweight, and at last reports, the deal was on the point of consummation.

## CORTLAND CLUB ELECTS

CORTLAND, N. Y.—At the regular meeting of the Cortland M. C., of this city, on December 14, Fred Jeffrey was elected president, and L. J. Howard vice-president. The ballots cast showed that C. A. Winchell was elected to fill the offices of secretary and treasurer. Other officials elected during the meeting were E. C. Meda, road captain; Ray Tanner, first lieutenant, and Ward Burr, second lieutenant. Paul Parsons and Arthur Buggs were elected directors at large.

Following the meeting a banquet was partaken of at the Dexter House. Among the guests present were C. H. Gardner, F. A. M. attorney for this section, and Chief of Police Fred Bowker, of Cortland.

OUT in Detroit where the Harry Svensgaard Sales Corp. is producing Pullman sidecars as fast as a well-organized factory can put the finishing touches on them, it is quite the customary thing to roll out and defy the weather man whenever the opportunity offers—just to show that it can be done. In the striking photographs on this page a party of Detroit sidecarists are caught in the act of proving that Jack Frost is a mere piker.

Curled up in the roomy and well-sprung Pullmans, and with a sturdy two-wheeler purring beside them, the roadsters felt no discomfort. In fact, they enjoyed themselves immensely. By way of showing that they are strong for neutrality they made up the party with an Excelsior, an Indian and a Harley-Davidson, and the husky trio of motors just snickered at hills and frosty weather.

# On the Pacific Coast

## SIDECAR GOLD MINE FOR CALIFORNIA DEALERS

LOS ANGELES, Cal., Dec. 18.—That the dealers in California had a splendid chance to sell many more sidecars than they do, was the opinion expressed by Arthur Davidson, the sales manager of the Harley-Davidson Motor Company, when interviewed by a **Motor Cycle Illustrated** correspondent. Mr. Davidson had just come in from a trip through the San Joaquin Valley with Vice-President R. W. Sayre, of the Appeals Mfg. & Jobbing Co., and was speaking about coast conditions with E. E. Welborn, and Stewart Slauson, of the Firestone Tire Co., when he greeted the local staff representative.

"There is a rattling good chance for dealers, if they would only come to see it," said Mr. Davidson, "and get sidecars moving about the streets. A good many dealers worry because some of the people to whom they have sold several machines over a period of years have taken to the four-wheeler. Now, they should not become discouraged because of that fact. If we lose our dealer in a town, we don't move out of that town. We get another dealer. And the live dealer who loses a prospect can always find two to take the strayed one's place, provided the agent will get out and start things going.

"The first thing the dealer ought to do," continued the Harley-Davidson sales manager," when he finds that a man is getting a desire for a vehicle with a back seat, is to talk sidecars and show him that the two-wheeler can be made a family vehicle with the sidecar. And he can also show him that the three-wheeled combination will be less expensive, not only as regards the initial outlay but also with reference to maintenance and upkeep."

Mr. Slauson and Mr. Davidson then had an interesting conversation on conditions in England, and both agreed that the neatness of the English riders has been largely responsible for the fact that sidecars are so popular among the ladies in Johnny Bull's country. Neat appearance is a feature that distinguishes the English riders on the road and helps to bring many new recruits into the ranks of motorcyclists. The young fellows in England, said Mr. Davidson, hop on their machines and ride out to country hotels, and are received cordially in the best hostleries and country clubs because they dress well and look like gentlemen.

## SOME DEMONSTRATOR IS THAT BOY RUBSCH

LOS ANGELES, Cal.—Edward Lebell, manager of the Pacific Motor Supply Co. in Los Angeles, has been building up his system for distribution of the Thor in the 1916 season to meet the increased demand in all the southern part of the state. Following the scouting trip of George Rubsch and Ted Plank on the latest models, the Pasadena agency has been placed with H. A. Gould; a new agent has been appointed at Pomona; the Riverside contract was awarded to Hanson & Nelligan; a new agent was appointed at Redlands, where the machine was not represented last year, and a live agent was signed up at Anaheim; he took on the machine as the result of the power it showed in a hill demonstration by Rubsch. At Riverside Rubsch went up 22 steps of the Y. M. C. A. building, and at Uplands up two flights of stairs of a flat building. At San Diego the Thor will be handled by the Anakin Bike Shop.

## VARIETY TO SPARE ON THIS SUNDAY TOUR

SAN BERNARDINO, Cal.—L. E. Reed and a couple of friends went out for a look at the desert beyond San Bernardino last Sunday, leaving at 8:15 a. m., and covering about 300 miles before they got home at 6:20 p. m. Their route was over the boulevards direct to Riverside, then to Crestmore, Colton and San Bernardino, where they laid off for two hours; thence over to Redlands, through Sunset Drive and Smiley Heights into the canyon beyond Redlands, then over to Beaumont and Banning and Banning Heights, and from there into the mountains, where they hit cold winds near the snow. Roads were very muddy and badly washed out, so they turned back via Pigeon Pass and over the Box Springs grade into Riverside again. On this end of the route they struck the new desert road from Beaumont to Coachella Valley, which they say is as smooth as glass. "It was the finest Sunday ride I ever took," said Reed, "on account of the varied scenery; jumping from orange groves into snow, and from the desert into rose gardens."

### BIG MOTOR WHEEL MILEAGE

LOS ANGELES, Cal.—Riding the same Smith Motor Wheel, J. A. Benson is now making his second trip over the enormous territory of Southern California. Since joining the organization of the Appeal Mfg. & Jobbing Co., he made one trip covering Southern California thoroughly, handling outside sales of the Smith Motor Wheel, and appointing agents in practically every town of importance. Now he is out again, going over the territory, handling the Appeal company's general line of sundries, bicycles and the matter of agency co-operation on the Smith Motor Wheel. His territory is from San Luis Obispo to San Diego and he has covered 3,500 miles of all kinds of roads since October 15, and has only worn out one tire.

### FAVORS TIME PAYMENT PLAN

LOS ANGELES, Cal.—E. E. Welborn is one of the local hustlers who believes that a good deal of the success of selling motorcycles these days depends upon "wising up" the boys to the fact that they can buy their machines on reasonably easy payments. He points out that the remarkable success of the sales campaign for Ford automobiles is due largely to the fact that Ford dealers freely advertise their willingness to sell on time. Welborn figures that about nine tenths of the dealers are willing to sell on installments, but that not more than 2 per cent. of the public is aware of the fact.

"Instead of devoting a lot of advertising space to discussing technical featurees of their machines," says Welborn, "the dealers should use liberal newspaper space in talking up the time payment plan. It's a business-getter. The dealer who goes in for installment sales must watch his P's and Q's of course, but that's part of the business. Lots of dealers are doing well with the installment idea and if handled in a business-like manner it can be made a great spur to sales."

### NOTHING COULD BE SIMPLER

LOS ANGELES, Cal.—When the big fellers drop in and extend the glad it "jes' nacherally" makes folks perk up—and business follows suit. At least, that's the way George L. Snider, Harley-Davidson dealer in Bakersfield, feels about it. Sales Manager Arthur Davidson, of the Harley-Davidson Motor Company, visited Snider's place a few days ago, chaperoned by Bob Sayre, of the Appeal Company, and 15 minutes after the genial Arthur and the equally jovial Bob left the store, Snider just reached out kind of careless like and sold a Model 16-F.

### TO TIA JUANA ON DAYTON

SAN FRANCISCO, Dec. 20.—Roy Gustafson, shop clerk for W. E. & W. H. Jackson, Dayton distributors for the Coast, recently completed a flying round trip on his Dayton motorcycle between San Francisco and Tia Juana, Lower California. He went down over the Coast route, which was in very bad condition, making the run in three days. Returning, he followed the valley route, which was in good condition, except for a stretch north of Bakersfield, where the highway was cut up by highway construction. It took him four days to complete the homeward bound trip, being delayed through fighting a brush fire.

### 'FRISCO CLUB NOMINATES

SAN FRANCISCO, Cal., Dec. 22.—Nominations for officers were made at the last meeting of the San Francisco Motorcycle Club, with the following results: President, Charles Meyer and W. Coughlin; vice-president, E. Hawkins and M. Moore; recording secretary, Rae Powell; treasurer, G. W. Payton; financial secretary, A. W. Green; and directors, W. Hunt and C. Tracy.

A committee was appointed to formulate plans for an endurance run which will be held in the near future. The grand masked ball of the club was a distinct success and would probably have won even greater applause but for the fact that the Panama-Pacific International Exposition closed the same evening.

## HOLIDAY GREETINGS

AMERICA, MOST FORTUNATE AMONG NATIONS, IS DOUBLY BLEST THIS CHRISTMASTIDE. WE ARE AT PEACE, AND WITH PEACE HAS COME EXTRAORDINARY PROSPERITY. UNDER THESE PROMISING CIRCUMSTANCES, MOTOR CYCLE ILLUSTRATED FEELS THAT THE CYCLE TRADES WILL BE FAVORED WITH A GENEROUS SHARE OF THE NATION'S HAPPINESS AND GOOD FORTUNE.

MAY THE JOYS OF THE FORTHCOMING HOLIDAYS BE FOLLOWED BY THE MOST EVENTFUL YEAR IN THE HISTORY OF THE ALLIED INDUSTRIES, AND IN THE LIVES OF ALL CYCLE TRADESMEN. SUCH IS OUR CHRISTMAS WISH AND NEW YEAR'S PROPHECY.

## HUGO TO TRY FOR RECIPROCAL SYSTEM WITH ONTARIO

TORONTO, Ont.—Francis M. Hugo, of Albany, N. Y., Secretary of State for New York, has notified the local authorities that he intends to come to Toronto on January 18, for the purpose of urging the drawing up a reciprocal arrangement between New York and Ontario with regard to motorcycle and automobile licenses. He advises that the New York State officials are heartily in favor of the interchange arrangement, knowing, as they do, all of the benefits that will accrue. New York State has already passed such legislation as will make license reciprocity possible.

There are probably 20,000 motorcyclists within a radius of 100 miles of the Niagara River boundary line who are heartily in favor of any arrangement that will permit free and unrestricted crossing of the line.

Upon the strong representation in the press and otherwise by the motorcyclists and bicyclists of Toronto that the proposed by-law which would compel all riders to dismount and push their mounts across downtown intersections was worse than ridiculous, the Committee on Works decided, on December 17, that the measure, which had been recommended by the Police Commissioners, had a number of objectionable features. The bill will come before the City Council, in the near future, for final rejection or adoption, however.

### NEW JERSEY CLUB ELECTS

NEWARK, N. J., Dec. 17.—The New Jersey M. C., of this city, has elected officers for the 1916 season at the annual meeting for this purpose on December 14. The list is headed by Wilbur M. Walden, president, with Walter D. Ker, vice-president; Elliot B. Holton, recording secretary, and J. Elmer Allen, financial secretary. Henry Seib is treasurer and Messrs. Holton, Walden and Howard Misner are road officers.

The election was followed by a social gathering, with the usual refreshments. A sociability run is to be held on New Year's Day to Greenwood Lake and return, a general invitation to all riders being extended. Local hotels will be open and Walter Goerke, local Indian distributor, will use his bungalow at the Lake for headquarters and commissary. There will be a nice souvenir presented to each rider attending, these being presented by one of the leading accessory men in the trade.

### HOLD "SPEED LIMIT" RUN

WHEELING, W. Va., Dec. 18.—To get the riders of the club into the habit of keeping within the speed limit, which is fifteen miles an hour, the Wheeling Motorcycle Club staged a run recently in which none of the contestants were permitted to go faster than the speed allowed by the law makers. Twenty members participated in the event, traveling from this city over the old National Road to West Alexander and return. There were five checking stations and four secret controls. D. H. Nikels, of Martins Ferry, O., astride an Excelsior motorcycle, scored highest—995¾ points—and won two turkeys which had been hung up as prizes. Emery Herrold, Indian, was second.

A product can not be greater than the thought behind it.

It can be good only when *thoughts* make it good. It can be inspired only when inspired thoughts pour into it. It can progress only by reason of thoughts that originate and advance.

Can you imagine the clumsy operation of the motorcycle today if Indian had not created the double grip control? Every motorcycle has benefitted by the "twist-of-the-wrist" idea—although Indian showed how to do it first.

Do you remember 1905 when Indian developed the twin cylinder machine? Do you remember the slogan that swept the country from that time on—"The Twin's the Thing?" It was Indian.

And then the Cradle Spring Frame! No one questions that thousands of men would never have become motorcycle enthusiasts if Cradle Spring comfort had not been made possible.

Chain transmission—Cradle Spring fork—mechanical valves—mechanical oiling—foot-boards—chrome vanadium construction—practically the whole story of *all motorcycle advancement* has its source in Indian.

And still Indian creative thought goes on and on. For 1916 it rests in Powerplus—the new Indian motor—now giving the most conclusive, extraordinary performances all over the country. Powerplus is an acknowledged masterpiece.

What does all the foregoing mean? This—

*Indian lavs before the motorcycle purchaser a machine that is a created whole.*

*It allows him to choose a product that is courageously and soundly originated.*

THE DEALER AND RIDER ALIKE ARE SERVED BY INDIAN CREATIVE THOUGHT. THERE IS NO MOTORCYCLE THINKING IN THE WORLD SO FAR REACHING IN ITS EFFECT AS INDIAN.

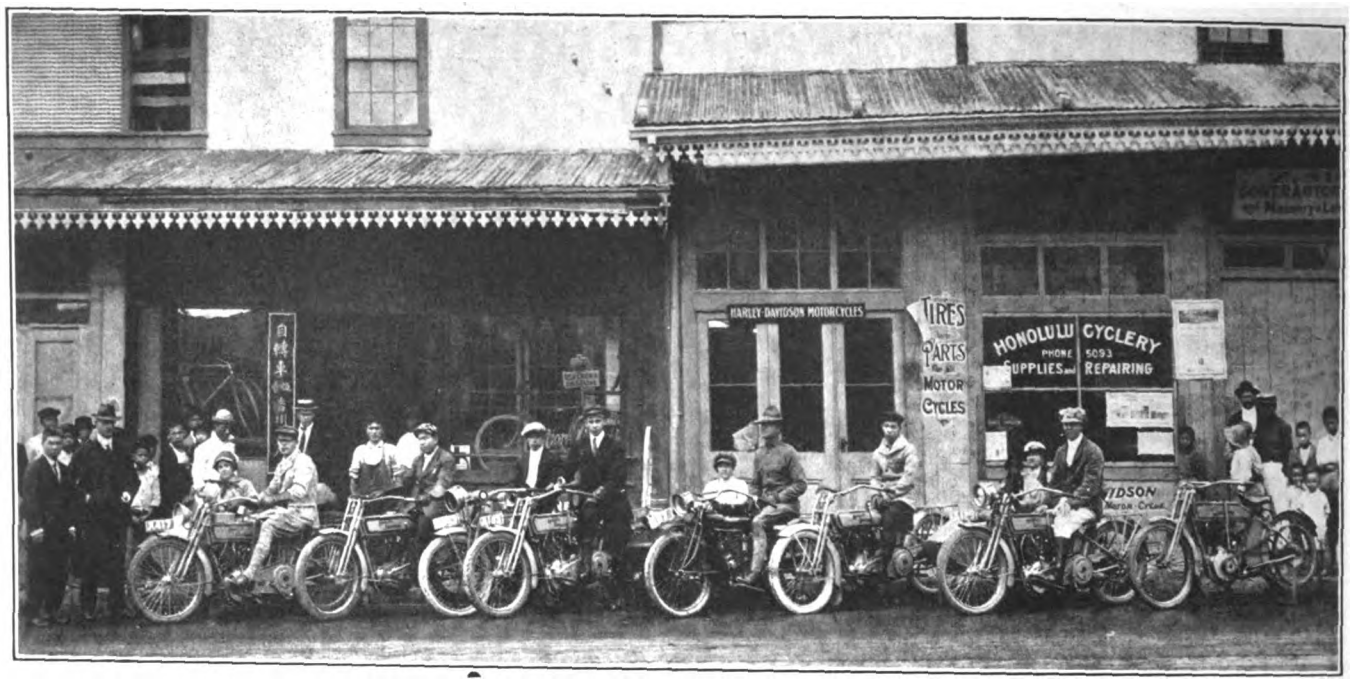
# FRASER FOUND SOME HUSTLERS IN HONOLULU



## San Francisco Trade Explorer Who Dropped in Just to See That the Hawaiian Islands Were Not Going Short on Motorcycles Says the Outlook is Good; He Had the Above Photo Taken in Honolulu to Prove it

ALL Hawaiians do not devote their time to waving palm leaves and lounging about in light opera attitudes, and anyone who persists in believing that they do will have several large and helpful chunks of assorted information slipped to them the first time they meet J. D. Fraser, manager of the San Francisco branch of the Appeal Mfg. & Jobbing Co. J. D. has just been over paying a neighborly call on some of the folks in the Islands, and he is back home again now with a well-defined hunch that the Hawaiian who makes up his mind to get some business can be depended upon to land it.

In the accompanying photograph Mr. Fraser is seen standing at the left, wearing a soft felt hat and a satisfied expression. The store is the headquarters in Honolulu of D. C. Mitchell, who sells Harley-Davidson motorcycles and says it's easy. Mitchell has two other stores in Honolulu and a busy branch in Waialua. What's more, he is about to establish branches in two other islands, Kauai and Maui. If business at these points is as favorable as it is in Honolulu and Waialua he intends to go on down the list of islands until he finishes the alphabet.

In order to give proper service to the Japanese in the Islands Mr. Mitchell has made Y. Yoshikawa, manager of sales for the little folks of the Rising Sun. There are about 6,000 whites in the Islands and something like 75,000 Orientals, so it goes without saying that the Japanese market is worth cultivating.

The riders appearing in the photo were lined up in front of the Mitchell establishment ready for a Sunday morning run. It will be noted that both riders and motorcycles are neat, and Mr. Fraser states in commenting on this condition that he was continually impressed by the desire of the Hawaiian enthusiasts to keep their machines spick and span and their riding togs clean. They are all good boosters, and a club is now in process of formation which promises to increase interest still further in the two-wheeler.

### NOVICE'S LONG JAUNT

CYRIL, Okla.—M. J. Bennett, of this city, has just returned from a 7,500-mile trip through the Rocky Mountain and Pacific Coast states on his 1915 Indian two-speed model. He was a novice rider, having never been on a machine until two weeks before his start, but nevertheless, he completed the trip without mishap.

During his ride to San Francisco, Bennett had a companion in John Lokey, of Walters, Okla. The route was across Texas to Raton, N. M., thence to Cheyenne, Wyo., and across to 'Frisco via Salt Lake City and Reno. Lokey was injured in a spill going north to Portland, and Bennett was obliged to leave him and ride alone. He returned through Oregon, Idaho, Montana and Colorado.

### A VISITOR FROM CUBA

L. J. Michaelson, a partner in the firm of Schumann & Co., which handles the Indian in Santiago, Cuba, was a recent visitor at the Indian factory in Springfield. He reports that business in the island is good and the prospects excellent for increasing the number of riders next year.

### TAKE ON HENDERSON

CONCORD, N. H.—Dame Brothers, of 174 North Main street, this city, have taken the distribution agency for the Henderson for Concord and vicinity. Although having had the agency for a week or two, the firm has orders for seven on the books and the men are kept busy demonstrating to prospects. Both members of the firm look toward an unusually heavy season for 1916.

# REFINANCING PLAN FOR STANDARD ROLLER BEARING CO. SUBMITTED

PHILADELPHIA, Pa.—Details of a plan for refinancing the business of the Standard Roller Bearing Company, of this city, have been submitted to the stockholders and creditors of the company and a satisfactory adjustment is looked for. The plan calls for raising cash to the amount of $730,713 by assessment, and reducing the present debt and capital account from $5,799,835 to $3,891,758. It is stated that holders of notes and of accounts payable are to be offered the alternative of 60 per cent. of their claims in cash as full payment, or 80 per cent. in the form of 20-year redeemable income certificates.

Holders of first preferred stock are to be assessed $15 a share, and in return will get new 7 per cent. preferred for the amount of the assessment paid, and 50 per cent. of their present holdings in the form of new common stock. Holders of second preferred stock will be assessed $7.50 per share, and will get new preferred for the amount paid, and 25 per cent. of their holdings in new common stock. Common stockholders will be assessed the same amount per share, and will get new preferred for the amount, and in addition 20 per cent. of their holdings in common stock.

## CYCLE PRODUCTS EXHIBITORS AT N. Y. AUTO SHOW

FOLLOWING is a complete list of exhibitors at the New York Automobile Show, who will have motorcycle products, as well as those for the motorcar:

Apple Electric Company, Dayton, O.; Automobile Supply Mfg. Co., Brooklyn, N. Y.; American Ever-Ready Works, New York; B. & L. Auto Lamp Co., New York; Benford Mfg. Co., Mt. Vernon, N. Y.; Bosch Magneto Co., New York, N. Y.; Champion Ignition Co., Flint, Mich.; Joseph Dixon Crucible Co., Jersey City, N. J.; Double Fabric Tire Co., Auburn, Ind.; Eclipse Machine Co, Elmira, N. Y.; Electric Storage Battery Co., Philadelphia, Pa.; A. R. Mosler & Co., Mt. Vernon, N. Y.; Newmastic Co., New York; New York Coil Co., New York; Nonpareil Horn Mfg. Co., New York; Philadelphia Storage Battery Co., Philadelphia, Pa.; G. Piel Co., Inc., Long Island City, N. Y.; Rutherford Rubber Co., Rutherford, N. J.; Rose Mfg. Co., Philadelphia, Pa.; Royal Equipment Co., Bridgeport, Conn.; Remy Electric Co., Anderson, Ind.; The Silvex Co., New York; Spitler Puncture Plug Co., Inc., New York; Standard Woven Fabric Co., Framingham, Mass.; Stevens & Co., New York; A. Schrader's Son, Inc., Brooklyn, N. Y.; C. A. Shaler Co., Waupun, Wis.; Splitdorf Electrical Co., Newark, N. J.; Standard Thermometer Co., Boston, Mass.; C. O. Tingley & Co., Rahway, N. J.; Stewart-Warner Speedometer Corporation, Chicago, Ill.; Victor Auto Parts Co., Cincinnati, O.; Vacuum Oil Co., Rochester, N. Y.; Victor Lamp Co., Cincinnati, O.; Veeder Mfg. Co., Hartford, Conn.; Van Sicklen Co., Elgin, Ill.; Vesta Accumulator Co., Chicago, Ill.; Voorhees Rubber Mfg. Co., Jersey City, N. J.; Wheeler & Schebler, Indianapolis, Ind.; Willard Storage Battery Co., Cleveland, O.; Corbin Screw Corporation, New Britain, Conn.; N. Y. & N. J. Lubricants Co., New York; Platt & Washburn Refining Co., New York; Prest-O-Lite Co., Indianapolis, Ind.; Seiss Mfg. Co., Toledo, O.; Edison Storage Battery Co., Orange, N. J.; General Electric Co., Schenectady, N. Y.; Lowe Motor Supplies Co., New York.

### HOPKINSON NOW VICE-PRESIDENT

NEW YORK, N. Y., Dec. 22.—Ernest Hopkinson has just been made vice-president of the United States Tire Company. He has been in charge of the patent matters of that concern for the past fifteen years and is recognized as a world authority on tire patents. Hopkinson's legal researches in the field of tire manufacture and tire patents has given him a wide knowledge and experience that the United States Tire Company felt could best be utilized by elevating him to the vice-presidency of the big tire concern.

### NEW INCORPORATION

JAMESTOWN, N. Y.—The Salisbury Ball Bearing Corporation has been formed in this city to manufacture ball bearings, bicycles, motorcycles, steel novelties, etc. Capital is $300,000. Incorporators are John W. Eckman, C. W. Salisbury and Thure Linderholm, all of this city.

### SHIPPING EXCELSIOR LIGHTWEIGHTS

CHICAGO, Ill. — Excelsior dealers throughout the country will rejoice over the announcement that the company has started to ship its new light-weight demonstrators. The demand for this new and promising member of the "X" family has kept the dealers busy writing and wiring to the Excelsior factory for weeks past, and the question "When are they coming?" has been fired at the Excelsior organization from all points of the compass. Now the question is being answered as far as the demonstrators are concerned, and shipments in bulk will follow so soon that dealers need not worry about trouble in making deliveries, say the factory folks.

## THE SIDECARS PUT "PEP" IN DIXIE RUN

ROANOKE, Va., Dec. 18.—The last run of the Dixie M. C. for the old year was made Dec. 5. The riders left Roanoke at 8:30, two minutes apart, their destination being Blacksburg, Va., a distance of fifty miles. Blacksburg is noted for being the home of the Virginia Polytechnic Institute, a well known college of this state.

This was quite an epoch-making run in the annals of the Dixie M. C., for it is the first event of the kind in which sidecars took an important part—in fact, without the sidecars, of which there were six, it would hardly have been called a run.

Heretofore, sidecars were very few and far between, there being only one or two in a radius of forty miles. However, during the last few months, the sidecar business of the Roanoke Cycle Company, Indian agents here, has shown an appreciable increase. Motorcyclists of this city have fought shy of the sidecars on account of the hilly nature of the country and not until the Hendee factory man, Mr. H. Glenn, came through Roanoke on a 1916 Power Plus Indian and sidecar, was there much interest taken in the three-wheeled vehicle.

Glenn thoroughly demonstrated the fact that a sidecar could eat up the steepest hills (or mountains) when the machine was equipped with the three-speed gear-set and, since his visit, quite a few riders have sold their older models and purchased multi-speed machines equipped with sidecars. A very agreeable surprise was experienced when it was found that numbers of popular young ladies took a great fancy to the sidecars, who never before took any interest in motorcycling.

The run was enjoyed by all, and the credit for the success of the event was largely due to the presence of the occupants of the sidecars shown in the illustrations.

### ATTENDED KENTUCKY GOVERNOR'S INAUGURATION

FRANKFORT, Ky.—Motorcycle riders from all over Kentucky and from several adjoining states were in the city last week to attend the inauguration of Gov. A. O. Stanley, the new Democratic governor, from Henderson, Ky. Cleve T. Ray, the Henderson dealer, of Louisville; William Young, Excelsior dealer, of Lexington; W. J. Schreck, of Louisville, and George L. Evans, Excelsior representative, attended.

## SAVANNAH CLUB SCHEDULES CHRISTMAS RACES

SAVANNAH, Ga., Dec. 21.—The Savannah Motorcycle Club has decided to hold races on Christmas afternoon as well as on New Year's Day. Four events, a novelty race, a match race and two contests at five and ten miles will be run, for members of the club only. As already stated in **Motor Cycle Illustrated,** the New Year's program will be featured by a race at 25 miles; this was cut from 50 miles. There will be several other contests, and all will be open to any Georgia rider. Purses amounting to $125 will be awarded.

L. G. Buckner and John DeMontmollin have advised the committee that they will enter the 25-mile championship event on New Year's Day. Ed. Wilcox and Harry Glenn are also expected, and with Cañero, Schroeder and Harn, from Savannah, there ought to be doings aplenty.

### TO HOLD SERIES OF DANCES

WASHINGTON, D. C., Dec. 18.—In pursuance of its policy of "something doing all the time," the National Capital Motorcycle Club will hold a series of fortnightly dances at the Eagles Hall, commencing Friday night, December 17.

There will also be held on Sunday, December 18, weather conditions permitting, another informal race meet such as was held on Thanksgiving Day. No admission fee will be charged. The races will be followed by an oyster roast, for which the participants will be charged only enough to defray the expenses.

### BROWN CO. IN NEW QUARTERS

CHICAGO, Ill.—The Brown Music Co., Inc., Excelsior and Indian agent, has moved into its new building at 3018 East 91st street and will shortly hold a house-warming to celebrate the occasion. In addition to the motorcycle line, the company also handles bicycles. The two-wheelers are handled from the sporting goods department of the firm, of which R. B. Cunliffe has charge.

**Scenes Along the Route of Recent Dixie M. C. Run, Showing Sidecar Combinations Which Took an Important Part. Item Above**

## JOINTED FRAME MEMBER

FRANK A. ETWELL, of Toronto, Ontario, has been granted a patent on a motorcycle frame whereby the cylinders of the motor can be removed without taking the motor out of the frame. To this end, the inventor has the lower horizontal or brace tube arranged with removable joints at the ends. The tank is secured to the removable brace tube by clips. When a cylinder is to be removed, the joints at the ends are disconnected, and the tank and brace tube are removed bodily, giving access to the cylinder, and enabling it to be removed without disturbing the motor. The patent is No. 1,162,993.

## BICYCLE TRUSS FORK

PATENT No. 1,159,596 has been issued to Julian E. McCartha, of Gilbert, S. C., for a truss attachment for bicycles. This attachment is to be constructed separate from the bicycle and applied to any bicycle. It consists of a forked structure having a loop at its top to encircle the movable part of the steering head of the machine, and is bent for the insertion of a separate brace, the latter fitting over the fork above the crown. The forked ends of the truss member attach to the ends of the wheel axle.

## QUICK DETACHABLE TANDEM

A tandem seat which is quickly attached to or detached from the motorcycle is the subject of Patent No. 1,164,207, issued to Ewald F. Pawsat, of Sheboygan, Wis., and assigned by him to the Wald Manufacturing Company, of that city. There is a base frame having a novel means that permits the same to be readily attached to or removed from a supporting frame. The latter is tubular and of general U-form. The seat frame or base frame is of flat stock, being held by flat pieces with upturned ends to the supporting frame. The usual rear springing which characterizes the Wald tandem is employed, as well as the pivot arrangement at the front.

## NOVEL SPARK PLUG

THEODORE LATCH, of Galeton, Colo., has invented a spark plug with novel electrodes designed to prevent the accumulation of oil, soot or other foreign matter. At the end of the center electrode is a copper or platinum point, inserted in a pointed portion with concave faces. Opposite to it and below is a similar point inserted in a yoke piece formed integral with the shell of the plug, the distance between the two points being that required for the spark to pass. The yoke piece is flat to prevent interference with the flow of gas to the electrodes. The patent is No. 1,160,911.

## COMPOUND BUFFER TUBE

A buffer tube to be used in connection with leaf-spring forks having scroll ends has been patented by George E. Myers, of Camden, N. J. This buffer tube is to be fitted to the cross-bar above the spring, and is made up of alternate discs of rubber and leather mounted on a sleeve. The discs are held tightly together to ensure solidity. The tube is rotatable to present different portions of its surface to the impact of the spring, and thus lengthen its life. The patent is No. 1,163,103.

# HOW MOTORCYCLES MAY SAVE WISCONSIN $2,000 A MONTH

MADISON, Wis., Dec. 22.—That the use of motorcycles would effect a saving of $2,000 per month in the work of the wardens of the conservation commission of the state of Wisconsin is the opinion of Secretary Scheibel of the commission.

According to Mr. Scheibel's suggestion the installation of a fleet of 50 motorcycles to be used by his wardens, aside from the saving of $24,000 every year, would greatly increase the efficiency of the department and make a saving in time of fully 25 per cent.

Among the most important items of expense on account of the conservation wardens are livery hire, railroad fare and hotel bills. The monthly approximate average of these is:

| | |
|---|---|
| Livery hire | $800 |
| Railroad fare | 600 |
| Hotel bills | 2,000 |
| Total | $3,400 |

In discussing the matter with various members of the commission **Motor Cycle Illustrated's** correspondent found that with the use of motorcycles the item of livery hire and railroad fare could be almost wholly eliminated and that for hotel bills reduced more than a third, thus accomplishing the saving of $2,000 per month, a sum which in a few months would pay for the entire motor equipment.

Regarding improved efficiency, members of the commission point out that with the motorcycles the state conservation wardens can go wherever and whenever they are needed immediately without having to wait upon the peculiarities of railroad time tables. They could scoot across country any time of the day or night, dodge into the byways away from the main line of travel and every day cover more territory and do more effective conservation work than by the present system of travel by railroad or livery hire.

With the good roads now general throughout the northern part of the state and the comparative lack of railroad service it is believed that the motorcycles are imperative as it is that section of the state which has its greatest need for conservation work.

## ANOTHER MEET FOR PHOENIX

PHOENIX, Ariz.—Another motorcycle race meet is to be held at the Arizona fair grounds track on February 22, 1916, under the auspices of the local Moose lodge. It will have for its object a demonstration of the advantages of this lodge as a location for the proposed tubercular sanitarium of the L. O. M. Dr. Lorenzo Boido will be in charge of the affair. The program includes five; ten and 25-mile free-for-all, a mile time trial and a 15-mile Arizona championship event.

## TURKEY SUPPER FOR READINGITES

READING, Pa., Dec. 22.—On New Year's Day the Reading Motorcycle Club will hold a run to Ronbesonia, where a turkey supper will be served, at the Mansion House. At a meeting attended by 75 members the following officers were elected for a year: President, Frank Neidig; vice-president, Guy Lyle; recording secretary, Harry Hart; financial secretary, Webster Schlott; treasurer, James Dunkle; first lieutenant, Raymond Reinert; second lieutenant, Paul Maurer; trustee, John G. Nuebling. Three new members were elected—Walter Fegley, Wellington Schupp and David Wenrich.

## BALL BEARING IMPORTS

NEW YORK, Dec. 21.—Shipments of antifriction balls and bearing to this country were about normal during the month of September, 1915, the figures showing a valuation of $96,263, as compared with $96,008 for August of this year, and $155,132 for September, 1914. The value of shipments to be reshipped to other countries reached but $459 during the month. The first nine months of the year, ending September 30, 1915, showed a valuation of $1,073,875, compared with $1,988,226 for the same period in 1913 and $1,276,446 for the 1914 period.

There remained in the warehouses as of September 30, 1915, balls and bearings valued at $302,047, compared with $503,557 as of September 30, 1914.

## JAPAN'S CYCLE IMPORTS DROP

Imports of bicycles, motorcycles and parts into Japan showed a big drop in 1914 as compared with 1913. The figures were as follows: Bicycles, motorcycles, etc., in 1913, $415,854; 1914, $194,474; cycle parts and accessories in 1913, $647,018; in 1914, $321,002.

Automobile imports showed a proportionate falling off.

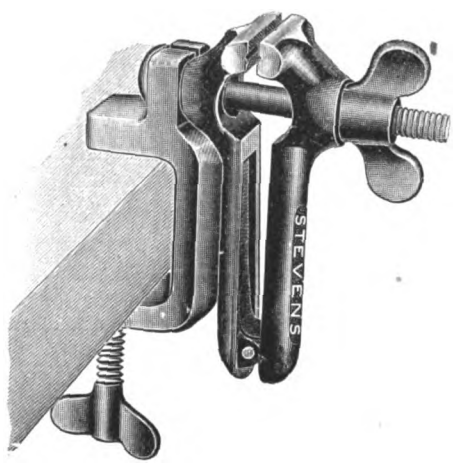
## COMBINING BUSINESS AND PLEASURE

MITCHELL, S. D.—Not only does R. W. Jamison get full value from his Model R-15 Pope by using it in soliciting work and taking his wife out for sidecar jaunts, but being a well driller by trade, he draws with him from job to job, the house marked with a cross on the photograph. When the picture was taken Jamison and his wife were just starting from their home in Mitchell with a three-passenger boat they intended to launch in the James River.

**The Jamisons in Their Pope Twin Sidecar Combination Hauling the Three-Passenger Boat to the James River; They Find Varied Uses for the Rig. Item Above**

## IMPROVED CLAMP FOR THE STEVENS HAND VISE

IN order to render the Stevens hand vise adaptable to bench work, as well as to its regular functions, Stevens & Company, of 375 Broadway, New York, have brought out an improved clamp adapted to fit this useful little article. The clamp is C-shaped, and has a screw with wing-head to affix it to the bench, motorcycle frame member,



**Hand Vise and Clamp**

etc. It is adaptable to any Stevens hand vise now in existence. The retail price is 25 cents.

On the part opposite the screw is formed a lug adapted to take the screw head on the hand vise by a special joint. The vise then lays with one jaw on the body of the clamp, giving a firm support to it. The vise opening is horizontal when the clamp is set on a horizontal piece or frame member. The clamp and all parts are made of first class material, and will stand hard service. With the vise listing at 75 cents, and the clamp at 25 cents, the purchaser has a device which can be used in the hand or at the bench for one dollar. Those who have experienced the desirability of some form of rest or means of attaching the hand vise will welcome this clamp.

## "THE COVENTRY" CHAINS

"THE COVENTRY" chains for motorcycles and bicycles are well illustrated and described in the latest catalogue of the Coventry Chain Co., Ltd., Spon End, Coventry, England. The motorcycle drive chains ranging from the various ½-inch pitches up to and through the ⅝-inch sizes are listed in a prominent place in the book, as well as the N. L. type of noiseless chain, recently adapted for the primary drive on a number of British motorcycles. The extensive list of chains includes magneto drive in both roller and noiseless types, the Elite, O. A. and Three Spires qualities for bicycles, as well as a series of chain parts and tools. A novelty in the Coventry line is a small chain of block type, ⅛ inch pitch, for operating variable-gear hubs.

A list of Coventry chain sizes suitable for various makes of motorcycle is appended in the catalogue. The Coventry chains are handled in this country by the Herbert F. L. Funke Company, Inc., of 116 Broad street, New York.

## BRAZIL FALLING IN LINE

RIO DE JANEIRO.—Dr. Camillo Soares, postmaster general of Brazil, is working out a new system of mail collection in the vicinity of Rio de Janeiro by the use of the Indian motorcycle with sidecar in place of the antiquated horse-drawn vehicle. At a recent test, Postmaster General Soares and his secretary, Dr. Henrique Aderne, sub-director of the traffic department, the provisional head of the Botafogo post office and other post office officials and prominent persons were present. Collections were made in two distant districts which ordinarily require the services of two men, one with a horse and the other using the street cars, for at least one hour and thirty minutes and which was done in the test by one man Raoul Soares de Souza, in less than 40 minutes. Mr. de Souza, who is a mechanic employed by Paul J. Christoph Co., Indian dealers at Rio de Janeiro, had one of the post office collectors ride with him on the machine.

## IRELAND'S MOTORCYCLE IMPORTS

The imports of motorcycles into Ireland have averaged in value approximately $300,000 during the past two or three years. Most of the motorcycles imported into Ireland come from England.

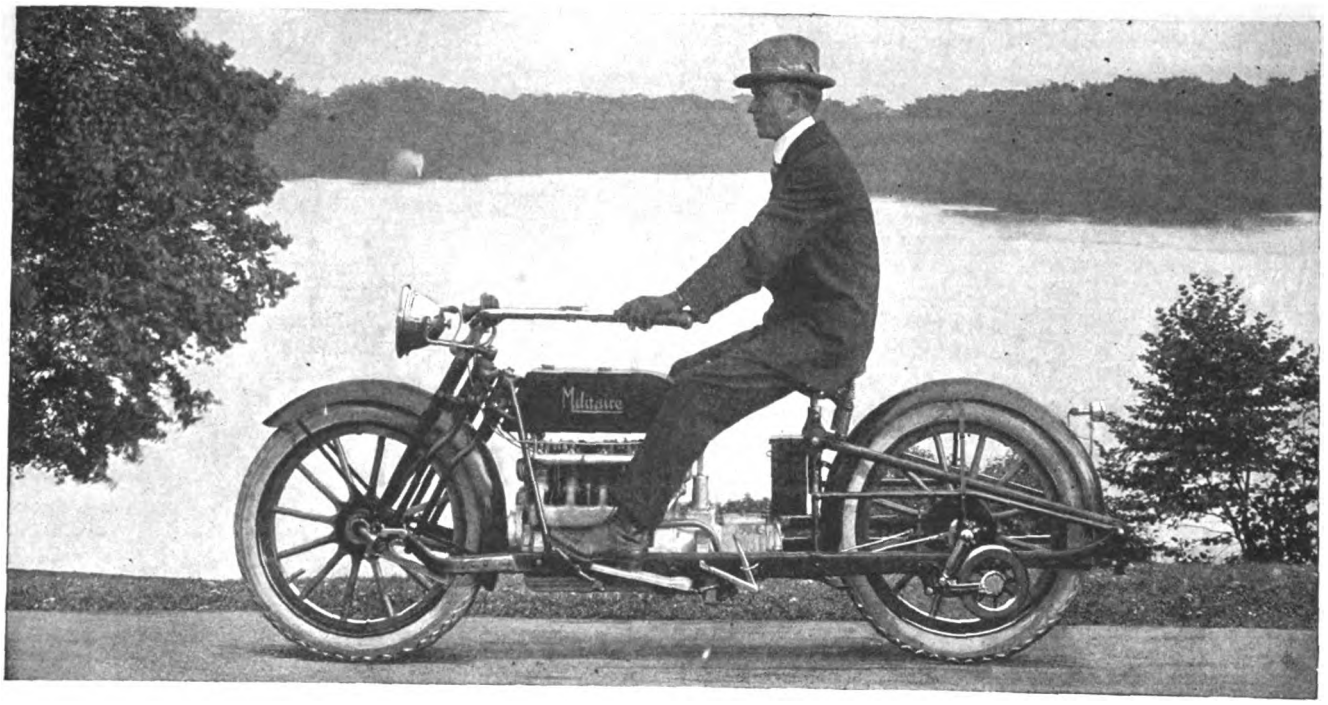
# MILITAIRE WILL BE AT NEW YORK AUTO SHOW

## Ingenious Autocycle Has Pressed Steel Frame, Wood Wheels, Pivoted Axle and Unit Power Plant



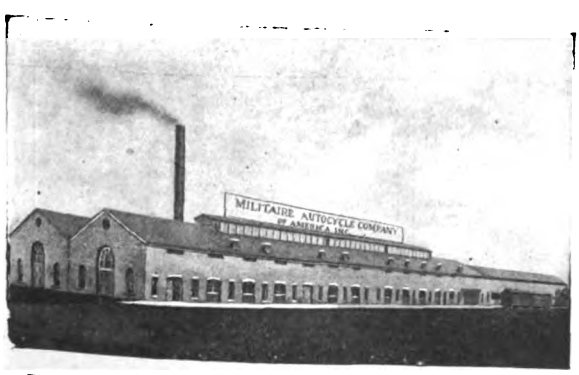
**Left Side of Militaire Autocycle, Showing Novel Fork Construction, Patented Frame and Artillery Type Wheels. Note Idlers and Spring Seat, as Well as Tank Arrangement and Control Devices**

BUFFALO, N. Y.—At the plant, on Kensington avenue, of the Militaire Autocycle Company, a goodly force of men is now actively engaged in turning out considerable quantities of the vastly-improved Militaire Autocycle, which attracted so much attention at the New York and Chicago Shows.

President N. R. Sinclair has interested in the new company, which is capitalized at $250,000, a number of the leading business men of Buffalo and Toronto, as follows:

George C. Miller, vice-president, also vice-president of the Fidelity Trust Co.; E. M. Mills, treasurer of the Militaire firm, as well as a director of the Buffalo Copper & Brass Rolling Mills and the Houk Wire Wheel Co.; W. A. Morgan, director, and president of the Buffalo Copper & Brass Rolling Mills; Gideon Grant, director, also the attorney for the Royal Bank of Canada.

Harry T. Ramsdell, president of the Manufacturers & Traders National Bank of Buffalo; R. W. Pomeroy, director of the Erie Railroad; Carlton W. Smith, vice-president of the People's Bank of Buffalo; W. F. Goforth, president of Ladies Wear, Ltd., of Toronto. W. F. Miller, formerly with the Maxwell Motor Car Co., of Detroit, Mich., is superintendent for the Militaire firm, and C. T. Schaefer, formerly with the St. Louis Car Co., is chief engineer. A. N. McLean, formerly with the Bank of Nova Scotia, in Toronto, is Secretary of the Militaire Autocycle Co.



**Factory of Militaire Autocycle Co., at Buffalo, N. Y.**

### Unit Power Plant

The Militaire Autocycle, which will be the only two-wheeled motor machine at the forthcoming New York Automobile Show, December 31-January 8, 1916, is fitted with a four-cylinder powerplant, whose S. A. E. rating is 11½ horsepower. The bore is 2 11/16 inches and the stroke is 3 inches. The piston displacement is 68 cubic inches. The cylinders are of the L-head type with inlet valve over exhaust. Pistons are of special soft gray iron ground accurately to size and each is fitted with three cast iron rings. The connecting rods are drop-forgings of special selected steel, heat treated to obtain the best effect. The crankshaft is a drop-forging of special steel and has all bearings ground in. There are three main bearings, all bronze backed and lined with nickel-babbitt.

The cam shaft is a one-piece drop-forging, hardened and accurately ground. It runs in bronze bearings. The valves are nickel steel, with a clear diameter of 1¼ inch. Lubrication is by a constant recirculating system, utilizing a gear-driven pump located at the front end of the motor. The oil is carried in the reservoir of the lower section of the crankcase and is thoroughly strained before it is distributed to the various troughs in which the big-ends dip. The carbureter is a Schebler. Ignition is by Bosch high-tension magneto.

### Three Speeds and Reverse

The transmission is of the selective sliding gear type, giving three speeds forward and a reverse. The gears and shafts are carried in an oil-tight casing which forms a rigid unit with the motor. The clutch is of the dry-plate type with four engaging faces of 5⅞ inches diameter. Four springs of the coil type are used in this clutch. Operation is by pedal on the right side. The final drive is by propellor shaft, universally-jointed at both ends. The shaft is of drop-forged alloy steel, heat treated.

A patented starter is contained within the clutch compartment. This starter is positive in operation and automatically releases in case of a back-fire. Wheels are of the wooden artillery type, of second-growth straight-grain hickory. The spokes are interlocked. The wheels run on annular ball-bearings. The brake equipment includes an external contracting and an internal expanding brake. Tires are 28 x 3 inches.

### Novel Frame and Forks

The frame is one of the Militaire's special features. It is of pressed steel 2½ inches deep. It is underslung to get an even distribution of weight and low center of gravity. The springs are of the cantilever type, of alloy spring steel. The front axle is pivoted, and is made from one solid bar, eliminating breakage and insuring an upright position for the rider at all times. The cantilever seat springing is adjustable by removing the pin and adjusting from the rear, moving the springs nearer to or farther away from the center.

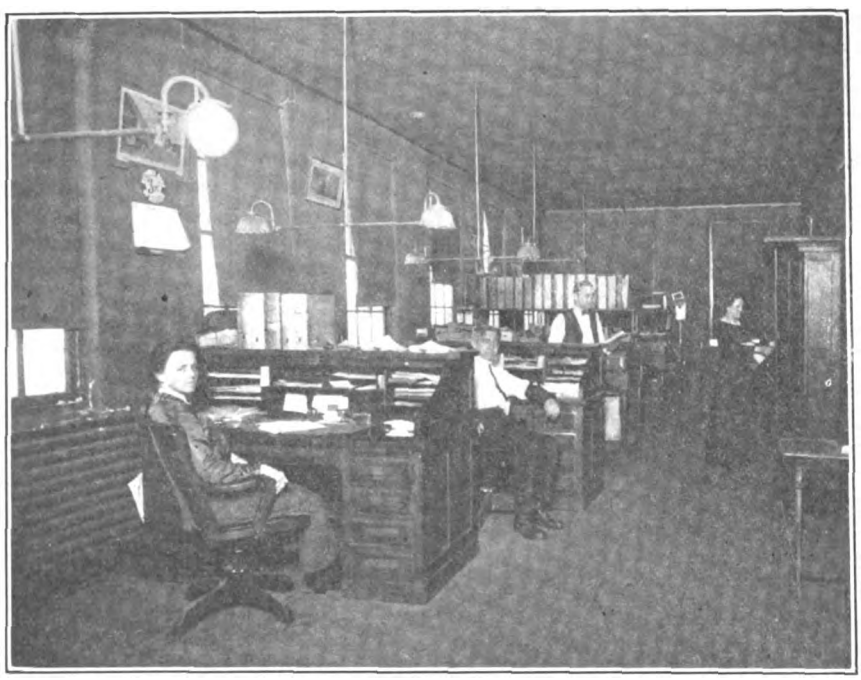
The Militaire is fitted with idler wheels,

Digitized by Google

making it possible to start, stop, back up or ride very slowly without leaving the seat or removing the feet from the rests. A lever device is fitted for raising and lowering these idlers, one of which is fitted to each side. The tank capacity is 3 gallons of gasoline and 5 quarts of oil, the latter being contained in the lower section of the crankcase. The wheelbase is 65 inches and the weight is 385 pounds. The electric equipment consists of horn, headlight, tail lamp, storage battery and speedometer. The price is $335, f. o. b. Buffalo.

President N. R. Sinclair states that deliveries on the Militaire will be made by the last of January. There are over 300 applications from high-class dealers on file at present, these including some of the new blood of the trade. Material and parts for over 2,000 machines have been ordered, and President Sinclair states that while there is a standing order from England, less than 500 of the 2,000 machines will leave this country. It is the firm's desire to take care of home trade first, hence its decision to this effect.

## WHERE EMBLEM BUSINESS IS CAPABLY CONDUCTED



**Main Offices of Emblem Manufacturing Company at Angola, N. Y. These Are on the Fourth Floor and Are Particularly Well Lighted and Comfortable**

## ECLIPSE BRINGS OUT AUTOMOBILE STEERING GEAR

ELMIRA, N. Y.—In addition to its extensive line of motorcycle and bicycle specialties, such as the Eclipse clutches, two-speed gears and coaster brakes, the Eclipse Machine Company, of this city, is manufacturing a steering gear of an exceedingly promising type of steering gear for motor cars. This gear is of the right-and-left screw-and-nut type, in which the opposite movements of two nuts attached to the steering arm and moving upon screws on the steering post moves the front wheels of the car by suitable linkage connection.

## SCHRADER MARKETS ANOTHER TROUBLE-SAVER

BROOKLYN, N. Y.—To obviate the necessity of detaching a pump from a tire when it is desired to test the air pressure, A. Schrader's Son, Inc., 783-791 Atlantic avenue, is introducing a novel and inexpensive device which may be attached to any pump and which permits of ascertaining the air pressure without removing the pump connection. The Schrader device screws on the end of the rubber tubing of the pump and connects to the tire valve by means of a swivel nut. A deflecting pin directly over the vertical arm of the appliance permits of taking the gauge pressure in the tire while the pump is still attached to the tire and in operation. The device, which is exceedingly simple and compact, sells for 35 cents.

### FORWARD, THE R-S BRIGADE!

READING, Pa.—Things have been on the hop in Reading Standard circles of late, both at the factory and in the sales organization, and as an indication that the selling end is going to keep up with the speedy pace set by the factory, the following list of new R-S agents is announced:

Miner & Houseknecht, Batavia, N. Y.; Jno. Kimpson, Rochester, N. Y.; Little Falls Motorcycle Co., Little Falls, N. Y.; F. W. Armstrong, Patterson, N. J.; F. W. Anderson, Albany, N. Y.; Alert Repair Co., Guttenberg, N. J.; Baltimore Cycle Co., Baltimore, Md.; Frank Bruno, New Rochelle, N. Y.; Clausen Bros., Chicago, Ill.; Cole & Brown, Johnstown, N. Y.; Chas. E. Denton, Ossining, N. Y.; Frank T. Fries, Kitanning, Pa.; Howard Geary, New Castle, Pa.; Lawrence Eller, Dayton, O.; J. Janoschek, Bronx, N. Y. City; Loudenclos & Angwin, San Francisco, Cal.; Lewis & Fry, Schenectady, N. Y.

### MAKES HIS JOB EASIER

**G. W. Phillips, Veteran Rider and Painter of North Benton, O., and Indian Used for Business and Pleasure**

## V-RAY PLUGS WEAR NEW CHECKERED SUITS

MARSHALLTOWN, Iowa. — V-Ray spark plugs are real perky these days owing to the fact that they are all dolled up in new clothes. The V-Ray Company, manufacturers of the well-known line of plugs, has adopted a new black and white checkered design which will be made representative of everything the company puts out from now on. The checkered design will be applied to containers, cartons, advertising matter and in fact everything that carriers the V-Ray brand.

Plans have been laid to feature, in a widespread sales campaign, the company's new "Petrifint" core and the "Violet-Ray" electrodes which are now found in all V-Ray spark plugs. The Violet-Ray electrodes are of secret composition and are guaranteed not to fuse or burn off. Aside from these two distinctive points the V-Ray line will not be radically changed. "We don't need changes in our line to boom business," remarked an official of the company a few days ago, "because we are working to capacity at present."

# EXTRA-STRONG CONSTRUCTION IN FIRESTONE TIRES

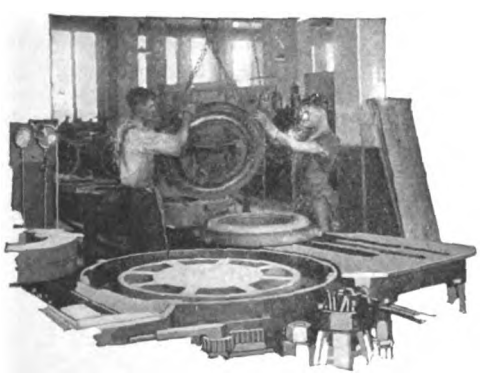
## Selected Materials and Careful Workmanship and Inspection Produce a Superior Motorcycle Tire

FEW people realize the great and rapid growth of the pneumatic rubber tire industry and the enormous field covered by it. To the average person, a motorcycle tire is simply a rubber tire built to hold air and carry the rider safely and comfortably. Only a vague notion is held by the average person as to the extent of the industry.

As a graphic example, crude rubber to the extent of millions of dollars' worth is imported into this country each year, and ninety per cent. of this goes into the manufacture of rubber tires. Before being molded into forms and answering its several purposes in the manufacture of motorcycle tires, this rubber is compounded and prepared as carefully as is a prescription in a first-class drug store. The same amount of thought, planning and painstaking care is used in the specification and manufacture of a rubber tire as in the planning and erection of the most important and valuable building.

### Early Motorcycle Tires

Only a few years ago, the motorcycle manufacturers were producing a light motorcycle of single cylinder type with belt drive. The tire companies were called upon to build a tire for this machine. The motorcycle in construction being nothing more than a bicycle with a gasoline power-plant incorporated, it was considered as such and a tire was built to meet the conditions which might be expected with a bicycle.

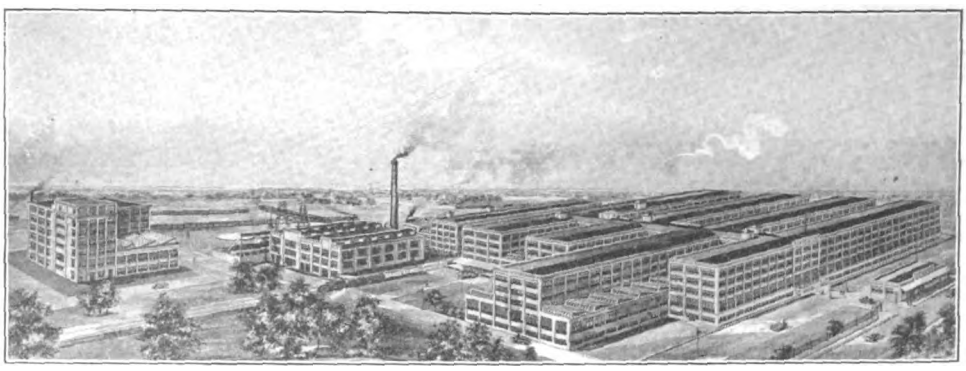


One of the Special Machines

Today, we have a different situation. Motorcycles made with three-speeds, more power, almost twice the weight and chain drive have necessarily made the tire problem a serious one. The rider has to resort to the use of an automobile tire to get proper mileage and satisfaction.

### Of Automobile Construction

The Firestone motorcycle tire is an automobile tire in every sense of the word. It is a tire constructed throughout on automobile lines. The 28 x 3-inch motorcycle tire consists of four plies of fabric, exactly the same number and grade as used in the Firestone 28 x 3 automobile tire. Tests have shown that the average motorcycle rider will clip off from 30 to 50 miles an hour, making it necessary that the tread should not be too heavy, since at such speeds it would be likely to become burned.



The Extensive Plant of the Firestone Tire & Rubber Co., at Akron, O.

In this day of great demand for American made goods it might be imagined that carefulness in manufacture would be forgotten in the haste to supply the increasing demand. This is not true in regard to Firestone motorcycle tires. The fabric, made of the highest grade Sea Island cotton, in large 500-pound rolls, is carefully inspected for defects by being passed through an electric lighted machine. It is next taken to the calender room where the moisture accumulated during manufacture, is dried out. A thin layer of rubber is then placed on each side of the fabric.

### Firestone Construction

The rubber is subjected to an equally rigid examination, and is given just as skillful treatment as the fabric. The cross-section herewith shows the construction of a Firestone motorcycle tire.

In the tread is a breaker strip, shown at 1, this being made of open-weave fabric filled with fine quality rubber. The tread itself, as at 2 in the figure, is made extra-thick of specially-treated rubber. The bead 3, is of special construction to prevent rim-cutting and clings closely to the rim. The fabric, 4, is of four plies. It is filled with selected rubber and applied by skilled workmen. The fabric is given a double inspection before the tire is treaded.

There is an extra layer of pure gum between the four plies of fabric in this tire. The rubber used to fill the weave in the breaker strip is live rubber on a foundation of fine cushion stock. The side walls are of strong, thick rubber. Firestone motorcycle tires are one of the favorite racing tires. One of the latest victories was that at Tacoma (Wash.) Speedway on August 15, when in the 300-mile race the record was smashed three times. All machines that finished were equipped with Firestone tires on the rear wheel.

Firestone tires are made in two popular styles: Non-Skid tread and Corrugated tread. The first is the same as that used on the Firestone automobile tires. They are sold in Europe in Christiania, Norway; Stockholm, Sweden; The Hague, Holland; Hamburg, Germany, and Barcelona, Spain.

### BECK WITH KEYSER FRY

READING, Pa.—After a continuous service of 25 years with the Supplee Hardware Co.'s interests of Philadelphia, Joseph F. Beck, manager of the sporting goods department, has joined forces with the popular cycle and auto jobbing house of Keyser Fry, 616-622 North Eighth street, Reading. This progressive house has lately purchased the Reading Cycle Manufacturing Co., manufacturers of the Reading Standard bicycles, which will put them in a better position to serve their many friends in the trade.

Mr. Beck will be glad to greet manufacturing friends, as well as old customers, at the above address, and will welcome correspondence with those interested in automobile and bicycle accessories, garage supplies and sporting goods.

Digitized by Google

# EXPORT NEWS GATHERED FROM MANY SOURCES AND BOILED DOWN TO FACTS FOR THE BENEFIT OF BUSY MANUFACTURERS

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## EXPORTERS MUST STUDY TRADE CUSTOMS OF FOREIGN COUNTRIES

AS a result of interviews with business men of Pernambuco, Brazil, relative to American exports, Consul A. T. Haeberle, who is stationed in that city, is enabled to point out specific instances where American exporters have not given satisfaction, or where misunderstandings of an unfortunate nature have come up. Many exporters, Mr. Haeberle says, do not pay sufficient attention to details, to studying the market, the tariff, style of correspondence, or other matters which often cause dissatisfaction and annoyance. Trivial mistakes in the United States, he points out, often become the source of delays, fines and great inconveniences in Brazil.

"There are many concerns in this city that are trying to establish business relations with American firms, but have had some erroneous opinions about our export trade. A well-known merchant remarked: 'I have seen a great many letters from American firms that wanted to do business with merchants of this city, but I never considered them.' When asked why, he said: 'Because your good firms have enough business to attend to at home. Only those that can't sell their products at home want to find foreign markets.'

"If our exporters learn what is required, it will help to eliminate useless correspondence of firms that do not wish to, or feel they dare not, meet the conditions of the export trade.

"The same principle applies to credit terms. If our exporters are once convinced that the merchants of Pernambuco will not, because they cannot, agree to cash against documents in the United States before the delivery of goods, or even cash against documents in Pernambuco, it will mean the elimination of correspondence that leads to nothing. Would it not be possible for manufacturers who are not willing to give credit, but who demand cash and thus lose the trade, to make arrangements with some experienced commission house, or export house, and inform the foreign customer that such an arrangement has been made for him? That would constitute a basis for further negotiations."

On the credit situation Mr. Haeberle quotes the views of the Pernambuco importers in this way:

"If we have to pay cash we will buy only what we have to, and hope to do business with Europe again after the close of the war. We have a good reason for this. We must do business on credit. Here in Pernambuco most of our business is with the interior and we have to sell to our customers on credit. Another reason is the excessive customs charges that would surprise some of the American manufacturers. Then comes the value of the stock itself, so that to pay cash really means working with three capitals—one for the customers, one for the custom house, and one for the American exporter. One of the principal exporting firms of New York, one that does give long credits, lost the insignificant sum of about £25, which was gladly overlooked in view of the large business done."

Carelessness in the use of the cable, causing expense that should be unnecessary, misunderstandings due to wrong translations of orders, sending three invoices in one envelope, sending as advertising matter duplicates of packages in which the goods are put up, and the shipping of styles of hardware that are not wanted by the people are among the other things credited by the merchants, according to Mr. Haeberle, as interfering with the growth of trade with the United States.

### WAR TAX ON MAIL

The New Zealand Government has imposed a war tax of one-half penny (1 cent) additional on every piece of mail (except newspapers) posted in that country, save in case of mail under the Postal Union rate now paying five cents. Ordinary letters to the United States must pay three cents per ounce under the new rate, as compared with the former rate of two cents an ounce.

### OPENING IN SANTO DOMINGO

According to the American Consul at Santo Domingo, there seems to be an increasing demand for motorcycles. He advises us that he feels "safe in saying that much business will result" from proper effort on the part of American manufacturers.

### CHINA A PROMISING FIELD

According to American Consul Fred Fisher at Tientsin, China, "practically the entire supply of bicycles is imported from Great Britain. Previous to the outbreak of the war, German-made bicycles were imported in large quantities, but since that source of supply has been cut off on account of the war, opportunities for American manufacturers should be favorable. The average cost of a bicycle in the local retail stores is about $55 local currency (about $22 in gold). There are about thirty motorcycles in use in Tientsin and about five in Peking, of which nearly all are American-made machines. Owing to the lack of good roads and the present unfavorable rate of exchange for silver, no rapid increase in the number of motorcycles in this part of the world is to be expected."

### NEW EXPORT REGULATIONS

WASHINGTON, D. C.—The announcement that new United States regulations relative to export procedure will become effective January 1, 1916, has created such intense interest among manufacturers and shippers that the Bureau of Foreign and Domestic Commerce, Department of Commerce, has found it necessary to reprint the new order with explanatory text. That pamphlet is just off the press and is being supplied free of charge to those interested, upon application to the above-mentioned office. All shipments for export to foreign countries or to Alaska, Hawaii and Porto Rico will be affected by the new regulations.

Accuracy of statement and completeness of description in export statistics are the primary objects of the new procedure. Heretofore the data received by the Bureau of Foreign and Domestic Commerce have frequently been lacking in these respects, largely by reason of the fact that interior shippers consign to their agents at the seaboard for export goods unaccompanied by adequate descriptions for use in making export declarations. The new regulations seek to remedy this defect.

### ARGENTINA A GOOD MARKET

According to John H. Allen, manager of the Buenos Aires branch of the National City Bank, conditions in Argentina are unusually prosperous, and American exporters have an exceptional opportunity there. Mr. Allen says that Argentina's net gain in export trade will approximate $450,000,000.

"There is nothing in the Argentina business situation," he maintains, "that makes it necessary for the United States exporter to be any more cautious in extending credits than heretofore. Most U. S. exporters are making a great mistake in refusing to extend credits where credits are warranted. If Uncle Sam's merchants can be induced to come a little way down the road to meet these people, it will be to their own advantage."

### KOREA BICYCLE IMPORTS

During the year 1914 bicycles were imported into Chosen Korea as follows: From Japan, $76,045; from China, $89; from United States, $13,722; from Great Britain, $53,504; from other countries, $2,941.

# LOOKING THE CREDIT PROBLEM IN THE EYE

## Some Advice From the Inside for the Dealer Who Wishes to Keep His Rating O. K.

By PATHFINDER

***"A merchant's capital is the sum of his net available resources plus his credit."***

A MOTORCYCLE dealer would not think of taking a $2 bill and sticking it on a spike on the wall, now, would he?"

This was the first question fired at us by W. D. Isham, credit man at the Harley-Davidson factory, when we finally were able to pin him down long enough to get what might be called an interview.

Isham (make it a long I if you would still be friends with this busy gentleman as that's a sore spot), we were told, could give us some opinions, well founded, on why some motorcycle dealers do not succeed in business. But the $2 bill question struck us as being a funny simile and we put on our best pooh-pooh smile. "Who ever heard of such a thing?" we asked.

"Well, may be you never heard of such a thing, but there are hundreds of motorcycle dealers that are doing it over and over again in the way they handle their credits," was Mr. Isham's reply. "If my friend the dealer hangs a credit slip of one of his riders on the hook it's just the same as a $2 bill. The trouble is he doesn't realize it: To him it is nothing more than a slip of paper, and he treats it with the utmost unconcern. He does not appreciate its importance as a factor toward keeping his credit rating A1.

### Fear of Offending Patrons

Failure to keep the proper records has been the ruination of more than one dealer. Of course, I don't refer to all dealers by any means. I could point to hundreds of our dealers who are models in respect to the methods employed in keeping the office records by the latest systems. Invariably the credit of such dealers ranks high. They know their financial condition almost to the dollar day by day.

"This little credit slip that the dealer hangs so carelessly away instead of treasuring it as a most valuable asset is an item that he owes himself. There are a great many dealers who put friendship in the way of good business. A rider will come into the store and get a bill of some $10 worth of material. He will ask that the dealer "carry" him for a while as he is short of money. Rather than offend this rider the dealer makes out another little credit slip.

"Now, he would never think of lending that rider $10. Yet he does the very same thing in a roundabout way. The fear of offending riders has been a kick-back for many a dealer in the way of outstanding credits that finally have forced him to the wall. I am speaking only of poor credits. The fear that the rider will get sore and go somewhere else ought not bother the dealer who is looking for his own interests. The rider may go somewhere else and pay cash for what he buys and do it without a murmur.

"All this leads up to the maintenance of proper credit rating with the firms the

W. D. Isham

dealer buys from. If a dealer has $1,000 and is able to get credit extension for another $1,000 he really is doing business on a $2,000 basis. Say that in three years he has increased his business to where he carries a stock of $5,000 valuation. If he has been careful with his credit rating he probably can get credit for $12,000 or $15,000 then.

### Meeting the Credit Manager Halfway

"A little thing like answering correspondence has gotten more than one dealer in bad with the firms he does business with. Credit men are not hard, grasping misers. They are willing to lend every bit of assistance necessary to help the dealer's business grow. But the dealer must co-operate. I have helped many a fellow out of a tight hole just because he wrote and explained fully the circumstances that had been preventing payment of an overdue account.

"The best criterion of a dealer's ability to do business and be entitled to a fair credit extension is the way he handles his accounts with the people he buys from. Taking unfair discounts, making continuous and unnecessary complaints and refusing to answer letters from the credit manager has caused many a merchant to see his credit suddenly cut off and his name transferred to the C. O. D. list.

"There are other considerations besides the cold figures given by Dun and Bradstreet that influence the credit manager's opinions. Dun and Bradstreet don't know the merchant's ability. They merely are concerned with the figures that picture his value in dollars and cents. That doesn't tell the credit man enough. So he must write to other concerns with which the merchant deals.

"The credit man must *know*. If he makes a guess he usually gets the worst of it. So he has stopped guessing.

"The honest man never objects to the most searching investigation of his financial affairs. When a merchant resents the efforts of the credit man to get a line of his financial conditions and ability to pay he is only creating an unfavorable impression against himself.

### How a Good Rating Pays

"The dealer who not only establishes but continues to maintain a high credit standing ofttimes finds it profitable. Frequently the people with whom he does business have job lots that they are willing to sacrifice to make room for new material. The man in charge of the sale of the job lot goes to the credit man to see who to make the offer to first. The dealer may not be in a position to finance the purchase right then, but his credit is good and there are no questions asked if he requests thirty or sixty days future dating on the bill.

"The dealer that continually lives within his discount terms and answers his correspondence, who never lets his amount receivable overbalance outstanding debts, is laying a foundation on which to build a successful business. He is protecting himself from the proverbial wolf outside the door and the sheriff never will see the inside of his place."

# DEALERS' SECTION

**Unusual Load for a Harley-Davidson Sidecar. James McQueen, Agent in Schenectady, N. Y., Bagged These Bucks in Adirondacks and Brought Them Home As You See Them**

### SURPRISE PARTY FOR HANSON

KANSAS CITY, Mo., Dec. 20.—Ross Landes, salesman for Charles Hanson, Indian agent at Kansas City, rounded up a merry bunch of Indian riders Wednesday evening, December 15, and they all rode to the home of Mr. Hanson. The party was a surprise affair, the occasion being Hanson's birthday anniversary—just how old he was Hanson wouldn't say. Mrs. Hanson had the house all arranged to accommodate the large number of motorcycle enthusiasts, and more than forty attended the surprise party.

### NEW AGENCY INCORPORATED

BRONX, N. Y., Dec. 22.—Henri St. Ives, the crack Indian rider, has just incorporated the St. Ives Motorcycle Corporation with a capital of $6,000, and will enter the retail motorcycle and bicycle field in the borough of the Bronx. The other persons interested in the new concern are R. E. Leclercq and Paul J. Miller, of Berkenfield, N. J. St. Ives' address is 69 East 176th street, Bronx. It has not yet been announced what agency the St. Yves corporation will have.

### BUSINESS WAS SATISFACTORY

PATERSON, N. J.—The W. Ed. MacDougall Co., Harley-Davidson distributor, closed its first year's business recently, with more prospects than ever. Manager Elmer G. Havenstrite expressed himself as well satisfied the way things are running, but thinks that his headquarters are a trifle small. This he intends to remedy in the near future. To date he has disposed of 21 mounts of 1916 model, ten being fitted with sidecars. This approximately equals the number sold to April 15, 1915.

### KENTUCKY OUTLOOK IS PROMISING

LOUISVILLE, Ky.—Louisville motorcycle dealers report that a good indication of improved business is the fact that second-hand machines are beginning to get scarcer; there are not so many people now out of work and anxious to sell as there were early in the summer. Factories are operating full time in Louisville.

### POST OFFICE ORDERS AN "X"

PROVIDENCE, R. I., Dec. 17.—R. M. Linnell, the treasurer of the Hub Motorcycle Company of Boston, who is in charge of the agency here, has just secured an order for a two-cylinder 3-speed Excelsior for use in the special delivery mail service recently inaugurated here by Postmaster Kilton. The machine will be delivered shortly before Christmas. Mr. Linnell is also considering other deals for equipping this branch of the post office service here.

### ADDS MOTOR BICYCLE

ADRIAN, Mich.—The William F. Schramm Company has added the Dayton Motor Bicycle to its line of Dayton bicycles for 1916.

### TUEBNER SELLS ON TIME BASIS

DAYTON, Ohio.—W. J. Tuebner, local Indian dealer, has come to the front as one of the progressives who believe in affording to the deserving would-be rider a chance to get a machine, even if he can't pay for it in a lump. He featured the time payment idea in a page of advertising run recently by a Dayton paper.

### HARMON GETS QUICK ACTION

LONG BEACH, Cal.—L. O. Harmon, 610 East Fourth street, closed an agency contract for the Excelsior with Girton-Hoffer Co., distributors, and within seven days had sold his first machine, a 1916 three-speed.

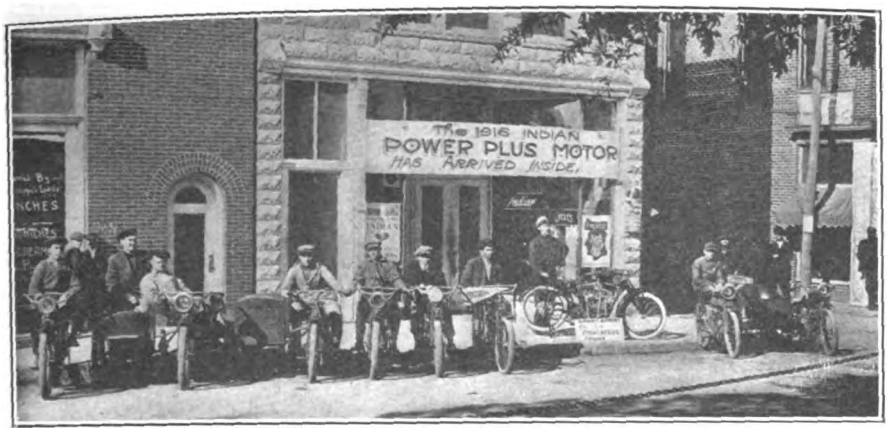
### WHY WOLF IS SMILING

ALTOONA, Pa.—Joseph Wolf, local agent for the Harley-Davidson, is demonstrating the 1916 models. Mr. Wolf is wearing broad smiles, over the fact that his orders for early season deliveries were beyond his expectations.

**Indian Float of Griffin & Edwards, Local Wigwam Agents, in Recent Fox Hunters of America Parade at Columbia, Tenn. Edwards Is Driving the Rig**

Digitized by Google

# DEALERS' SECTION



**Ready to Parade with New Powerplus Indians From Tepee of F. G. Schmitz, at Fitzgerald, Ga. New Models are Given a Rousing Welcome in This City**

### EXCELSIOR AGENTS MAKING GOOD

SANTA ANA, Cal.—Buck & Buck, Excelsior and Harley-Davidson agents at Santa Ana, are already reporting sales of the 1916 machines to the Girton-Hoffer Co., southern California Excelsior distributors. Following the demonstration tour of Fred Hoffer up north, Childers & Hampton, the San Luis Obispo agents, found it easy to locate prospects and have reported their first sale, with others expected in the near future. A carload of Excelsiors is expected by the distributors to arrive December 21, and this shipment will include some lightweights. The Los Angeles city retail business of Girton-Hoffer Co. is looking up, as they have sold a machine a day for the last ten days.

### PLUG CONTEST END NEAR

PATERSON, N. J.—Fred L. Joffee, local Excelsior dealer, is getting ready for the grand drawing for the prize in the Rex spark plug contest which he started some time back. The drawing will take place on December 24, in the evening, and the sheriff-elect of Passaic County will pull the winning number.

### SEARS ENTERS COMBINATION

PADUCAH, Ky.—E. J. Sears, who for several seasons has handled the Excelsior in Paducah, has combined his business with that of Pulman & Company, the Ford automobile distributors. Mr. Sears will be in charge of the motorcycle and tire departments of the concern.

### LEHMAN SIGNS AGAIN

DECATUR, Ill.—Dayton motorcycles will be handled by A. C. Lehman for 1916. He signed up again for this line recently.

### THREE GO TO WARDENS

PATERSON, N. J.—John Steele, local Indian agent, has just delivered three electrically-equipped Indian sidecar combinations to game wardens in this part of the state. The wardens, William Klein, Passaic County; J. Ervington, Ocean County; Fred Hall, Monmouth County, are now using the rigs through their territories. Warden Klein recently returned from the upper part of the state with a prisoner as passenger.

### MONTGOMERY WANTS A RECORD

LOS ANGELES, Cal.—Frank Montgomery, the Excelsior speedster, is working in the Girton-Hoffer shop on his machine, getting it in shape to take advantage of the Bakersfield track, which has a reputation as a record-breaker.

### WILL HOLD MOTORCYCLE SHOW

WASHINGTON, Pa., Dec. 18.—The cycle dealers in this city will hold a motorcycle show next week. Nearly all of the local dealers will participate in the affair.

### BUYS OUT CONSOLIDATED STOCK

TOLEDO, Ohio, Dec. 22.—H. D. Capron has purchased the tire, bicycle and motorcycle stock of the Consolidated Manufacturing Company, of Toledo, Ohio, and will install a complete stock of supplies. He will make a number of changes and improvements in the place.

### McALESTER INDIAN AGENT

McALESTER, Okla., Dec. 13.—A new bicycle and motorcycle establishment has been opened in this city under the name of Lamm and Fisher. This firm will handle the Indian cycles. Mr. Lamm has for some time been in the repair business.

### TO HANDLE INDIAN

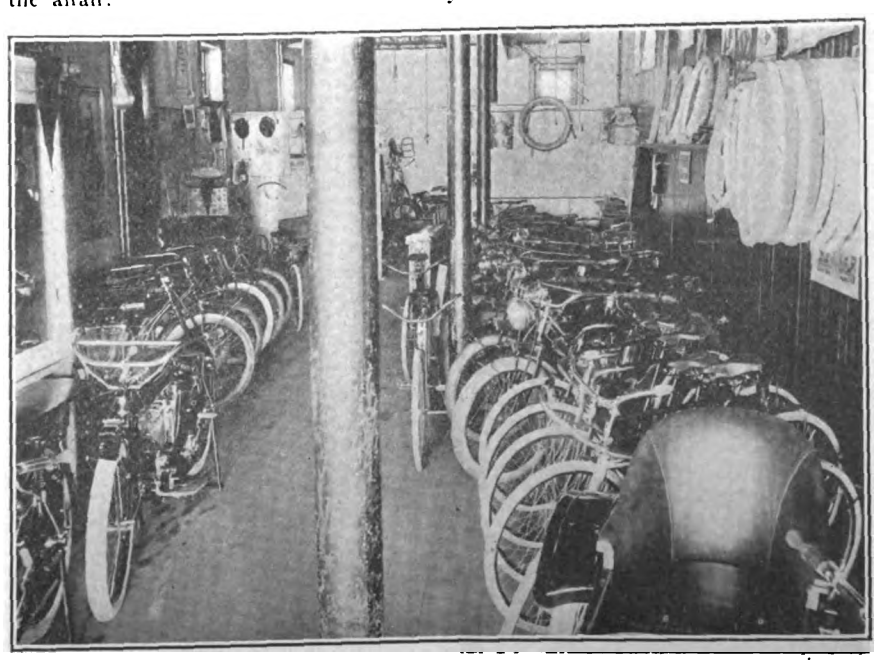
DALLAS, Tex.—M. J. Farmer, of Sweetwater, has opened a handsome motorcycle establishment which is in keeping with the progressive ideals of that prosperous city of the stock section. The Indian will be handled.

### EXCLUSIVE EXCELSIOR SHOP

LEXINGTON, Ky.—The Adams & Young Company, who have been handling the Excelsior motorcycle for the past year or two, have now taken on the Excelsior bicycle also, and are conducting an exclusive Excelsior shop.

### TIRE DEALERS INCORPORATE

STEUBENVILLE, Ohio, Dec. 22.—The Steuben Auto Tire Co. has been incorporated with a capital of $10,000 to deal in automobile and motorcycle tires. The incorporators are John D. Gardner, Jas. K. Biddle, Wm. K. Kincaid, Thos. S. Jones and Victor Biddle.



**Stocked Up for the Rush. Interior of Indian Agency of William H. Loft, at Gloversville, N. Y. Bicycles and Tires are Other Live Lines in This Store**

# Our Canadian Letter

## CANADIAN RIDERS ENLIST FOR ARMY

TORONTO, Ont., Dec. 22.—The Toronto Motorcycle Club situation, at this writing, is puzzling. At a recent meeting, no less than fifty-five names were offered as nominations for the various offices for 1916, but practically every member has requested that he be permitted to withdraw from the coming elections. The cheapest thing in local motorcycle circles at the present time apparently is a club office for the coming year. The positions are going a-begging. A suggestion has been made, however, that a number of men who were prominent in the motorcycle ring three or four years back be asked to take hold of the club once more. It is possible that some of these men may be returned to office.

A recruiting call in Toronto for men for the Mechanical Transport branch of the Imperial Army Service Corps (British Service) has resulted in the enlistment of a dozen more local motorcycle and bicycle riders of note. Corporal H. F. McCrossen, of the Ninety-second Highlanders, a prominent rider, has been transferred to this branch of the service, while a well-known club rider, Fred Phillips, has also joined. Joe Harris, a bicycle racer, is among those who have come forward.

The receiver of the Toronto Motordrome Company has six motorcycle racing machines and four Indian pacing motorcycles on his hands which he has not yet sold. Outside of the lumber in the track, these form the main assets of the defunct company.

Pte. A. T. Walker, formerly engaged as a despatch rider for the Toronto Recruiting Depot, and who was employed in recruiting work in Toronto, has been transferred to the Ninety-fifth Battalion, C. E. F., with which he will be detailed as a battalion despatch carrier. He rides an Excelsior.

The motorcycle and bicycle dealers of Toronto have paid more attention to the Christmas trade than ever before, with the result that they have shared in the annual business rush to a considerable extent. The B. F. Goodrich Company's branch, the Planet Bicycle Company, and many other large and small concerns, have been doing a bit of special advertising and extra circularizing with excellent results. Many of the cycle dealers' windows were arranged according to Christmas designs, and these have attracted special comment.

The first of the 1916 light-weights was uncovered to Toronto atmosphere on December 18, when Percy A. McBride uncrated one of the new Excelsior light-weight models.

The Canada Cycle & Motor Company, Limited, has made arrangements for the occupation of two additional factory buildings, it is reported. These are located in the central portion of the city. No definite arrangements have been made, however, for the removal of the main plant in accordance with the terms of sale to the Willys-Overland Company, it is understood. It is considered probable that the removal of the works will not be made until late in 1916.

### NOTES FROM MORDEN

MORDEN, Man.—Manager Kendall, of the moving picture theatre at Morden, Man., has employed an Indian twin motorcycle to haul a small trailer around town upon which to display posters of coming pictures.

At the last meeting of the Morden Motorcycle Club, the secretary, H. H. Janzen, was presented with a pair of gold cuff links which had been offered as a prize by President Clubine to the member who secured the greatest number of new memberships during the 1915 season.

### WANTS TO RIDE ON SIDEWALK

SARNIA, Ont., Dec. 22.—R. J. Lewis, of this city, is heading an agitation for permission from the local officials to be allowed to ride a bicycle on the sidewalks. He, along with others, believe that workingmen and tradesmen using wheels for business purposes should enjoy the privilege of using the sidewalks for cycling because of the rough condition of the unpaved streets. He suggests that licenses be issued for this purpose and that those who will use the walks be required to carry a light and bell on their wheels.

### CANADIAN REGULATIONS

SHERBROOKE, Que.—John J. Fitzgerald, secretary of the Sherbrooke board of trade, is sending out a brief circular letter, calling attention to the recent decision of the Customs Department of Canada by which motorists from the States are permitted to travel in the Dominion for 10 days without supplying a bond. All that is necessary to obtain the permit is to sign a certificate in duplicate, giving a description of the motor vehicle and the owner's address in the United States. When the rider leaves the Dominion he surrenders both the permit and the certificate describing the machine.

### EXCELSIOR INSTALLED BY YEAST CO.

VANCOUVER, B. C., Dec. 18.—The local branch of the Fleischmann Yeast Company has just started a motorcycle delivery to care for its business in the Vancouver district. Deliveries are made daily, the product of the firm being such as to necessitate frequent covering of the same ground. It is believed by the local manager, Mr. Thornton, that the new style of delivery will solve the problem of quick and satisfactory service. The machine used is the '16 model Excelsior, with a sidevan specially adapted for the needs of the trade.

Mr. Haynes, a representative of the Excelsior factory, was a recent visitor to the Terminal City.

### TO USE A GAS TURBINE

GLOBE, Ariz., Dec. 22.—Charles W. Shepard and Harry W. Payne, local mining men, have patented a turbine operated by the exhaust of a gasoline engine. The turbine drives a generator which charges storage batteries for automobile and motorcycle lighting. It is a simple, inexpensive instrument, made of aluminum and weighing only eight pounds. The inventors claim that it will take the place of the muffler. For a number of years the company for which Shepard and Payne work have used exhaust steam for the generation of electricity, and Shepard adapted the idea to the gas engine.

### WATCH THAT GAS PUMP!

CLEVELAND, Ohio, Dec. 22.—Cleveland motorcyclists who have complained of short measure from gasoline dealers are as much at fault as the dealers, in the opinion of Fred C. Albrecht, Ohio sealer of weights and measures, who made a personal investigation among dealers of the Sixth City. He said: "Automobilists and motorcyclists undoubtedly have been given short measure by some dealers, but the fault is much theirs. We found some pumps giving more than the measure showed. Consumers should watch the pump. If they have been cheated it is because some unscrupulous dealer has not given the full stroke of the pump. If the consumer will watch the plunger go up he will get full measure."

### NATIONAL CAPITAL DANCE

WASHINGTON, D. C.—The National Capital M. C. of this city held the first if a series of bi-weekly dances at Eagles Hall, on Friday, December 17. Music was furnished by a section of the U. S. Marine Band. The dance was in charge of a committee including the following: J. E. Darroch, chairman; E. M. Dodson, floor committee; W. F. Throop, music and refreshments.

## KEEPING THE WINTER RIDER COMFORTABLE

### Inexpensive Means for Barring Out Cold and Wet During the Chilly Season

By GOSLIN

NOW that cold weather has shown itself, the annual dry-docking of mounts for the winter has begun, and it will probably continue for the reason that lots of lads think they can't stand the cold. Well, there are some who can't, but most of the thinkers have too vivid an imagination or don't know what to put on to keep warm when riding.

There are too many riders who let Jack Frost feaze them into quitting till spring comes again. Then there are others who ride, but don't enjoy it because they bundle up so that they can't move comfortably. Some of the lads down my way add one garment for each degree that the temperature drops until they have more clothes on than an onion has skins. They measure the same across as they do up and down.

Warmth without weight is the slogan for winter riding. Did you ever hear that common, ordinary newspaper was one of the best little ideas for keeping the cold out and the warmth in? Well, it's so. Better still, buy a paper vest in some drug-store—all up-to-date ones carry them, and they don't cost more than half a dollar. Put the paper vest next to your shirt, then on with your coat and mackinaw, and there will be no bone-shaking shivers traveling up and down your spine any more.

Oilskins or a rubber coat are other good cold-repellers, with a qualification. If you get the cold under them, you will think you've hit the polar regions for fair. A long rubber coat with no air-space at the neck and the tails formed into riding breeches will prevent the cold getting inside pretty effectually.

Now comes the question of cold feet, still keeping the warmth without weight idea. Get cashmere woolen socks, and for the outside a pair of good Arctics that fit loose enough to work your feet in. The socks cost 35 cents a pair, and the Arctics $2.25, totalling $2.60, not a big hole in your wallet and mighty little in view of the added comfort.

All along I have figured that you have a good woolen cap and fleece-lined one-finger mitts with handlebar gauntlets. If you haven't, now is the time to invest in them, for the sake of your ears and hands.

Next comes mudshields. These are unknown here, but the dispatch riders in France and Belgium use them to good effect. Roads over there are frightful, owing to there having been no repairs for over a year, and having to bear 40-ton guns on traveling carriages, as well as getting punctured by howitzer shells. Mudguards were found to be a nuisance, and were scrapped accordingly, and mudshields came to the front. Now, we don't need to chuck away our mudguards, but we can rig up a piece of canvas or light metal from each footboard to the top of the tank on either side. These strips need not be more than 6 inches wide, enough to protect the legs and knees from the keen winter blasts. The shields will help, too, in keeping the mud and slush down and protecting the legs from these nuisances.

Well, Brother Stay-at-Home, what do you say? Will you go shopping for these articles Saturday night so as to be able to join us on Sunday for a nice run?

## SOME MORE DOPE ON THE SIDECAR QUESTION

By COURIER

NOT so many days after the publication of the "dope" on various lightweights, I received a letter from a prospective rider which interested me muchly. First, the letter reminded me of a rigorous cross-examination for a military chauffeur's diploma and secondly, the writer stated that he weighed 103 pounds.

The main thing in the letter was, Could a lightweight carry a sidecar along? The 103-pound inquirer thought it could and he is right, with qualifications. In the first place, any 2½ horsepower motor can pull a sidecar on the level and perhaps up slight hills, but when it comes to cross-country work, or even State roads in the East, for example, Mr. Lightweight will find the task somewhat a hefty one. He lacks the power to toddle the heavy car along, except on the lowest of low ratios.

### A Lightweight Sidecar

Putting this thing right from the shoulder, the lightweight can nicely carry a *lightweight* side car, something that scales between 44 and 56 pounds, for example. Now get out your sidecars and weigh them, and you will find that they are a bit heavier. So evidently, they will not do, and this is the answer to our inquirer, unless he can get or have built a real light sidecar for the express purpose of passenger carrying via his lightweight.

Over in England with its fine roads (and its rotten ones, too) they are using lightweights with lightweight sidecars: spidery frames and aluminum bodies. The passenger has a chance to gaze at the clouds most of the time in some of them, for the "seat" is cocked so that he practically lays on his shoulders. But there is another type which has the goods as far as carrying the passenger is concerned, although its looks are against it. It consists merely of a frame with a spring seat-post on it and a saddle on the seat-post. The handlebars are fitted to the seat-post (on the rigid portion) and the passenger has a foot-board to rest his feet on. The rig weighs about 46 pounds. I have been working out a few details on this jigamaree and expect to shoot them in to this paper in a short time.

### Only Way Available

There is no other way to carry a passenger on a lightweight but by means of some sort of a sidecar, so if the passenger is to be transported, some such rig as that referred to will have to be constructed. I warn you that it won't look classy, and it will be chilly riding in winter and not near as comfortable as a tandem seat. But it will be the only thing possible. Personally, I can't recommend anyone fitting a sidecar to a lightweight, for the latter is purely a solo machine.

## WHY GEARING-DOWN IS DESIRABLE

**Typical Winter Road Conditions Which Call Particularly for a Reduced Ratio**

## YORKVILLE CLUB HAS BANQUET

NEW YORK, N. Y., Dec. 22.—The Yorkville Motorcycle Club held its first annual banquet last week at the Mozart Hall, many members and their friends being present. Quite a number of the fair sex graced the occasion, and it was voted a huge success by all who attended. The club has its headquarters at 345 East 82nd street, New York, which is the location of the Yorkville Motorcycle Repair Co. There are now 40 members in the organization.

With the near approach of the holidays let us pause for a space—forget the cold, hard realism of business for a moment—and exchange a warm handclasp of goodwill with our fellow men.

To the cycle trade as a whole we extend our warmest Yuletide greetings and wishes for a bright and exceedingly prosperous New Year.

To those loyal dealers who have stood by the R-S banner through storm and sunshine we have only to say—

Prosperity and happiness are our heartfelt wishes for you—they are your due—and just as surely as the sun rises and sets—Prosperity and Happiness will be your portion for the coming year.

# THE SHORTER ROAD TO PROFITS

## Feature the Better Grade Bicycle—Prove Its Greater Economy

By G. D. CRAIN, JR.

**THAT there is a market for the inexpensive bicycle no one will deny. If a customer really demands a low-priced machine, the dealer must be in a position to satisfy him.**

**But many a chance to sell a prospect a high-grade bicycle is overlooked. When some dealers sell low-grade machines, they are simply following the line of least resistance.**

**How to get the bicycle prospect interested in better machines; how to show the real economy of purchasing better bicycles—these are the big points discussed in this article. Read it!**

THE shorter road to profits is the one which involves a minimum number of sales and a minimum amount of effort.

### Same Results—Less Effort

In other words, the man who is selling high-priced instead of low-priced merchandise will get the same results in the form of net profits that are won with much more effort and expenditure of every kind by the dealer who is featuring low-priced stuff.

Applying this cardinal principle of merchandising to the bicycle business, it is clear that the dealer who sells a $15 wheel when he might just as well have sold one for $30 is not making progress. He has not learned that it is much easier to get volume by doubling the price of the item sold to the individual purchaser than by doubling the number of individual sales. The latter in most cases is next to impossible; the former is so easy that it's a wonder it is so often overlooked.

Just remember that if your average bicycle sale is $30 instead of $15, you will have the same volume of business with half the number of sales, or double the volume with the same number of sales. If you are a good merchant, your profit will be just as great on this business as it would have been with the bulk of the sales of the cheaper grade. In fact, inasmuch as there is always room at the top, and the fiercest competition comes in the popular-priced lines of every kind, the dealer who has learned how to guide his trade intelligently in the direction of the better kind of bicycles should make more money, in proportion to sales, than others in the business, who are elbowing the crowd at the lower level.

### How to Sell Better Bicycles

Assuming, then, that it is good business always to sell the better bicycle, the question that arises is how to do it.

"When a man or a boy comes in here and says he wants to buy a wheel and pay $15 for it," a dealer may say, "how in the name of commonsense am I going to double the figures on him—and get away with it?"

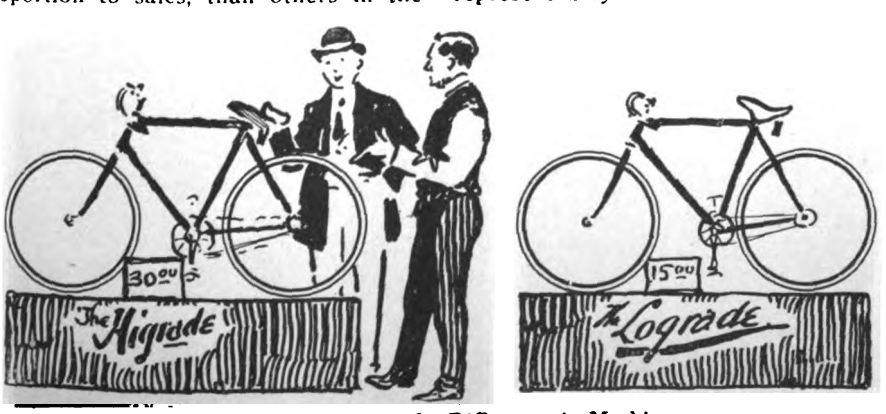
To begin with, you have got to be able to demonstrate quality when you are selling goods that carry a quality price-tag. This is a feature that is partly intangible, but more often can be shown by analysis of the proposition. While a good deal of the difference in price is represented by labor and better materials, both of which may be hidden under the enamel, there are other points which are readily capable of being demonstrated as proofs of quality justifying the higher price.

The accessories on the high-grade mount are all in keeping. The saddle is a high-priced piece of goods, with well-made springs. It cost two or three times as much as a cheap saddle may have been obtained for. The handlebars are probably adjustable—a patented feature that even a novice can appreciate the advantage of. The pedals, instead of being of the rat-trap type, may be of rubber, or made of heavier and more substantial metal than the cheaper variety. The tires, it can be pointed out, cost $10 or so a pair, while poorer tires might have been obtained at half that amount or less.

### Hammer at Accessories

Calling attention to all these items, if it is necessary to analyze the make-up of the wheel in order to prove to the prospective buyer that the value indicated in the price is there, not only interests the customer in these high-grade features, and thus in the wheel as a whole, but it likewise suggests, by association of ideas, that the other elements, the ones that are not subject to demonstration, must be good.

It is human nature to take a good deal for granted; and if the dealer goes as far as it is physically possible to go with his ocular demonstration, by showing that every accessory is of the highest



**Show Your Prospects the Difference in Machines**

Digitized by Google

type, the average person will be ready to admit, without totaling up the items to see how much difference they represent, that the bicycle being offered is a quality machine, and therefore should command a better price than the other.

**No Comebacks—This Dealer Sells the Better Machines and Gets the Profits**

"When you pay $30 and up for a bicycle," the wise dealer suggests, "you are getting the painstaking care given by skilled mechanics, and the best of materials, from the tool steel used in the bearings to the enamel of the frame. You know you are getting something that will stand up and give service, and also a bicycle that you will be proud to ride and proud to show. You ought not to be content with anything but the best, because real economy is to be gained by buying it."

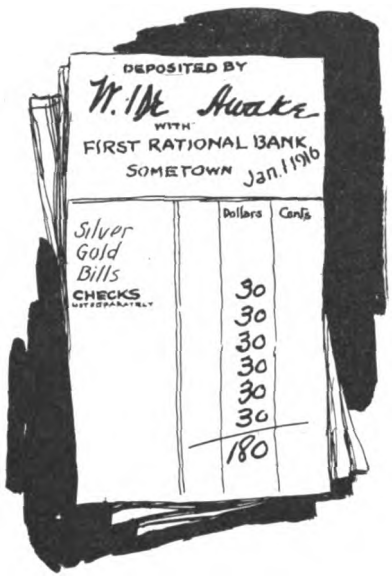
The latter is a feature which is well worth emphasis. The universal experience is that money paid for quality is well spent, in view of the greater comfort, satisfaction and freedom from trouble that are experienced by the owner. This is especially true of mechanical products, and it is nowhere truer than in the bicycle field that "the memory of quality remains long after the price is forgotten."

### Show Better Grades First

A good deal of argument will be saved, however, by showing the better grades first. Of course, if, as in the case suggested, the customer calls for a wheel at a given price, below the level that the dealer thinks is desirable, it may be necessary to show it first, and then make the analytical comparison described for the purpose of creating a demand for the better-made bicycle. But ordinarily this is not the case. The prospect is looking over the field. He wants a bicycle; and he is planning to pick out one that he can afford to own, but likewise one that will look well and will promise long-continued service. Hence the direction of the display of the goods is largely in the hands of the dealer or his salesmen.

### Flatters the Customer

And it is good policy, from any standpoint, to show the best first. There is a subtle flattery about it that the average customer likes. There is no way to offend the prospective purchaser more surely than by showing that he has been rated below his actual standing in offering him a low-grade piece of merchandise. You yourself, if you went into a clothing stare expecting to pay $25 for a suit, and were led confidently to the $15 section, would



**The Bank Account Tells a Story**

feel that you had been put in the wrong class, and would have been rubbed the wrong way. The chances are that that store would find it hard to sell you.

On the other hand, the customer who is not planning to spend a great deal likes to see the best that the dealer has in stock; and, getting back to bicycles, making it a "first principle" of the store or department to show no cheap machines unless the customer insists on looking at

**Comebacks Galore—This Dealer Makes No Attempt to Sell Better Bikes**

something at that price will insure getting the high-priced business with the smallest possible effort. As suggested above, quality usually sticks out all over goods of the first class, and in most cases merely exhibiting the $30, $35 or $40 wheel is all that is needed to get the customer to the buying point. But if a point-by-point comparison has to be made, it will prove a convincing exposition of the reasons in favor of the purchase of the better grade mount.

### The Good Word Spreads

Aside from the point of making money out of the business, though that is the big thing to be considered, a dealer should always bear in mind that there is no better way to create good-will and prestige than by selling good stuff. If you are constantly pushing indifferent quality, whether in the form of bicycles or something else, you are going to have come-backs, and come-backs are always hurtful. They make for irritation and dissatisfaction and lost time and lost patience, and don't do anybody any good, no mattter whether an adjustment is made that suits the customer or not.

Besides, when a low-grade bicycle goes out, and the purchaser is later asked by his friends, "Where did you get it?"

# 5,000 BICYCLES SOLD LAST SEASON IN WASHINGTON

## And the Hustling Dealers Are All on the Job to Break Sales Records for 1916

WASHINGTON, D. C., Dec. 21.—A careful survey of the bicycle business of the District of Columbia discloses the fact that there have been sold in this city nearly five thousand bicycles during the 1915 season, of which fully half were high-grade machines selling at $30 to $50 each. Nothing is too good for the Washington bicycling public, and nothing but reliable goods are wanted. This city is probably the poorest field of any city of its size for the price-cutter, the mail order house, or the fly-by-night retailer. Most of the Washington cycle dealers are old-established concerns which have been in the business for a number of years and enjoy the full confidence of the rider.

### Demand for Better Grade

E. P. Hazelton has been handling bicycles at the same location, 429-431 Tenth street N. W., for nearly a generation. He handles National, Racycle, Pierce and other high-grade bicycles. In a recent interview with a **Motor Cycle Illustrated** correspondent he said: "During the year, from October 1, 1914, to October 1, 1915, I sold 1,378 wheels, of which number a little over 700 have been wheels that bring more than $35 retail. The instalment plan predominates, although there has been a fair percentage of cash sales during the last year. Our repair business is on the increase. I keep four men at work the year around."

The Haverford Cycle Co.'s local branch is located at a fine new store, 521-523 Tenth street N. W., which is a model establishment and will not suffer by comparison with any of the metropolitan stores. Under the management of Charles H. Cross, a very successful season has been enjoyed the past year. In addition to the many Excelsior motorcycles which the firm has sold, it has disposed of nearly fifty Smith Motor Wheels and about 300 high-grade Dayton bicycles in addition to several hundred of lower price. Cross reports an exceptionally good Christmas trade in bicycles, the demand being for the better grade of machines.

### Racing Models Popular

Harry F. Seamark, at the corner of Sixth and G streets N. W., in a large double store occupying three buildings, handles Emblem bicycles and motorcycles, Flying Merkel bicycles and motorcycles and Miami Motor Bikes. He reports the sale of over 300 bicycles in addition to about twenty-five Miami Motor Bikes. He states that practically all of his bicycle sales are of bicycles selling for $30 or more, and since the recent local reviving of bicycle racing has sold a number of racing models. Owing to his excellent location he is enjoying a good Christmas business. Seamark has been identified with the bicycle business almost since its beginning, and although still a young man, can discourse entertainingly of the days of the old high wheeler before the pneumatic tire was in use. T. N. Mudd, Jr., manager of his establishment, is also a pioneer bicycle racer and thorough booster.

### Makes Specialty of Police Trade

P. M. Corr, at 818 Ninth street N. W., is another pioneer bicycle dealer of the city. He has been engaged in the bicycle business in Washington over twenty years, practically all of the time in the neighborhood of his present location. He handles a line of Corr special bicycles, manufactured for him by leading makers. These bicycles are all high-grade and sell at about $40 with standard equipment. Corr makes a specialty of supplying the bicycle policemen of the city, of whom there are quite a number, with their bicycles. Needless to say, these bicycles must stand rigid inspection, but have no difficulty in passing any test.

**WHY THE WASHINGTON TRADE IS MAKING MONEY**

1—Demand Is Largely for Higher Grade of Machines
2—Pioneer Dealers Have Stuck to Bicycle Business
3—Races Are Creating Demand for Racing Machines
4—There Are Thirteen Agents in the Capital City
5—Four of the Dealers Have Branch Stores
6—They Sell Both on Cash and Installment Basis

H. W. Higham, Jr., is located at the corner of First and B streets S. E., just outside the grounds of the United States Capitol and immediately across the street from the Library of Congress. Higham has been in this location for over thirty years and has built up a fine trade in the high-grade bicycles which he handles, carrying the full Pope line of bicycles in the high-grade models only. Mr. Higham owns the corner and several adjoining buildings near his store and is rated among Washington's well-to-do merchants. He has built up from a modest beginning as a bicycle dealer, despite the fact that in recent years he has been handicapped by physical infirmity. He reports business prospects very good for the 1916 season, as a long session is expected, which will bring considerable money into his neighborhood.

### Same Location for 40 Years

The Acme Bicycle and Repair Co., of which J. B. Shaw is president, is located at 1927 Pennsylvania avenue N. W., in which location it has been for the past forty years. This firm handles a full line of Iver-Johnson and Cornell bicycles and has built up a very large repair business. Shaw is in the neighborhood of seventy years of age but is still spry as ever and is on the job every day. He is now doing a brisk Christmas business and says the outlook for the 1916 season is very rosy, and he is willing to fight any of the younger fellows for a share of the 1916 business on a basis of quality and service.

### Racing Brings Business

Frank Hazelton, whose establishment is located at the corner of Ninth and I streets N. W., is the son of E. F. Hazelton, the pioneer bicycle dealer. As would be expected, Frank caters mostly to the younger class of riders and specializes in racing bicycles of various makes. His store is the headquarters of the National Cycle Club, which recently promoted a number of amateur bicycle races, and of which he is the president. Hazelton handles the Westminster and National lines of bicycles in his new and finely equipped store in the heart of Washington's bicycle and motorcycle row, and although he has been in business but six months, has succeeded in disposing of about 200 new bicycles in addition to a number of Smith Motor Wheels, for which he has a sub-agency. Young Hazelton reports business prospects very good for the 1916 season and expects considerably increased business from the revival of amateur bicycle racing.

The Vim Cycle Co., of Chicago, has a branch at 1324 G street N. W. This concern started in business here a little more than a year ago with one branch located at 427 Tenth street N. W. and another branch located at the G street address. A few months ago the Tenth street store was closed. This concern deals in bicycles and automobile supplies on a strictly cash basis and does big business in low-priced bicycles.

### Maintains Two Stores

Ray Cogswell has two stores, one located at 824 Ninth street N. W. and the other located at 3019 M street N. W. He has associated with him his two brothers, Frank and George, who with him formerly made up the well-known vaudeville team of "The Three Cycling Cogswells." Cogswell has the agency for the Crescent line of bicycles and also the agency for the Miami Motor Bicycle. He makes a specialty of buying and selling second-hand bicycles and disposes of several hundred in the course of a year. Ray Cogswell claims the District of Columbia championship at any distance from one to ten miles having won the last professional bicycle race held in Washington under L. A. W. sanction in 1904, and is ready to uphold the title against all comers and for any desired side bet.

The Columbia Auto and Cycle Co., located at the corner of Fourteenth and Irving streets N. W., has R. L. Sonn in charge of the bicycle department. The

## WITH THE BRITISH FORCES IN FRANCE

**Non-Coms. of Cycle Battalion Halting at Cross Roads to Consult Road Map in Order to Locate Position**

bicycle department is a comparatively new line for this firm, which is located in a very fine residential and business section, and Westminster and Reading-Standard wheels of the highest grade are carried.

L. W. Sakers, a pioneer bicycle dealer of Washington, D. C., is now located at 1220 New York avenue N. W., where he carries a full line of Aviator bicycles and sundries. Sakers removed recently to his new location and reports business there increasingly good with every day's stay in his new location.

**Motorcycle Dealer Adds Bicycles**

Howard A. French & Co., located branch under the direction of J. Seabrook, a well-known Washington boy, has recently added the full line of Indian bicycles to their stock. Prior to this time no bicycles were carried, the firm concentrating its attention on Indian motorcycles. With their modern and up-to-date store room located at 424 Ninth street N. W., in the heart of the city's retail district, the success of the bicycle business seems assured. Mr. Seabrook states that business conditions have improved very much for the better during the last few months and that the 1916 season promises to be a record breaker in all lines.

The Sport-Mart, Inc., is another new concern located in the best shopping district at 905 F street N. W. This concern features the Harvard line of bicycles, doing business on a cash basis.

## WRIGHT HEADS CRESCENT LIST

BALTIMORE, Md., Dec. 22.—The report of the century mileage contest of the Crescent Bicycle Club up to the end of November shows that Wm. T. Wright is still in the lead, with Jno. G. Stricker, winner of last year's contest, second, and Fred M. Sanborn, third. Welby Sherman, Langdon M. Sanborn, Lester Nickles, Walter Doersch, J. E. Nitz, Walter Iglehart, and Wm. H. McAvoy, in the order named, complete the list of the first ten men. Comparatively little bad weather has been experienced this month, and as December, being the last month of the year, is always the biggest month when the weather is good, it is expected that it will again prove to be the banner period.

Wm. T. Wright, leader of the Crescent contest, and Fred M. Sanborn, leader of the C. R. C. Ass'n competition, each put in a double century on Sunday last in an effort to clinch their respective positions. Both finished well inside the limit of the twenty-four hours allowed for the two hundred miles, Wright riding his in twenty-one and a half hours, and Sanborn in twenty and a half hours. Wright started at 1 p. m. Saturday and finished at 10:30 a. m. Sunday morning, and Sanborn started at 6:25 p. m. Saturday, completing the distance at 2:50 p. m. Sunday.

Total mileage for the club for the year is 42,672; and the total centuries for the club for the year is 95.

## DESIMONE AND LAROSSA WIN U. S. I. ROLLER RACE

NEW YORK, N. Y., Dec. 22.—"Jinx night" might have been a better name for the first indoor championship meet of the Unione Sportiva Italiana than "Sport Night." Two of the riders had been disabled earlier in the week and were unable to appear, while another duet of pedal-pushers could not fetch their machines along to compete in the events, which were staged on the evening of December 17, because of the severe snowstorm.

But in spite of these obstacles a corking good program was topped with a one-mile match-style home-trainer race, which was run off in 4 heats, 2 semi-finals and a final. Anthony Desimone, the 1915 Inter-Club amateur home-trainer champ, accounted for this affair after some spirited racing with Thomas La Rossa, in the fast time of 1 minute, 13⅘ seconds. Following are the results of the bicycle races:

HEATS AT ONE MILE EACH.

| No. | Winners. | Time. |
|---|---|---|
| 1 | —James Alfonso-Joseph Gavirati | 1:17⅗ |
| 2 | —A. Ferrero-Chas. Rabbino | 1:16⅘ |
| 3 | —Thos. La Rossa-A. Ramezzano | 1:17⅗ |
| 4 | —A. Desimone-C. Zoccola | 1:13⅘ |

SEMI-FINAL HEATS AT ½ MILE.

| | | |
|---|---|---|
| 1 | —A. Desimone-Thos. Alfonso | :36⅕ |
| 2 | —Thos. La Rossa-A. Ferrero | :38⅘ |

FINAL HEAT AT ONE MILE.

| | |
|---|---|
| Anthony Desimone-Thos. La Rossa | 1:13⅘ |

Cycling being but one of the sports which are featured by the Unione Sportiva Italiana, some interesting boxing and wrestling matches furnished exciting entertainment for the many spectators who attended the affair. Similar sport nights will be held from time to time during the indoor season.

## "IT'S ALL PLAIN SAILING"

WAYCROSS, Ga., Dec. 19.—Jordan, the bicycle man, wanted to get more business, and using his noodle he came to the conclusion that sitting in the store and reading the newspaper wouldn't get him anywhere. So Jordan started to think up schemes that would bring more people to his store.

He remembered reading about a parade which was going to be pulled off in town.

"How about making one great big splash for Jordan, the bicycle man, in that parade?" he mused. And thinking some more he got up the float shown in the illustration which appears on the "Bicycling World" cover. It is a very simple piece of work, consisting of a wooden frame built along the general lines of a boat, which was attached to a Harley-Davidson motorcycle and covered with cloth. That float made a hit with the crowd, and Jordan ran it on the streets of Waycross several times after the parade.

### GT. WESTERN DISTRIBUTORS

LA PORTE, Ind., Dec. 20.—Announcement is made by the Great Western Mfg. Co. that it has completed arrangements with L. J. Mueller, Cleveland, O., to act as distributor for the Crown and Adlake bicycles in Northern Ohio. The America line of bicycles made by the Great Western Mfg. Co. will be distributed in the same territory by the Buckeye Motor & Cycle Company, of Akron, O.

### NORTHWEST BIKE JOTTINGS

TACOMA, Wash., Dec. 22.—C. O. Cook, for many years in the bicycle business in the Northwest, is now in charge of the new Portland headquarters of the Washington Cycle & Supply Company, of Tacoma.

F. M. Bailey, Pierce bicycle dealer of Tacoma, is now boosting for the bicycle road race over the new paved roadway to American Lake, a distance of 24 miles round trip, which will make an ideal course, and fast time should be made.

### GUS HEIM IS A HUSTLER

REDLANDS, Cal.—August Heim, of Redlands, is said by Sales Manager E. E. Welborn, of the Smith Motor Wheel distributing agency for the southern part of California, to be one of their most active and enthusiastic agents. He has already sold five machines and ordered three more since the Appeal company took the distributing agency.

### DEMANDS ARE GREAT

SEATTLE, Wash.—Archie Taft, of Piper & Taft, announces that demands have been great so far for Excelsior and Iver-Johnson bicycles, which his firm stocks. "It was a fine season for both lines last year," said Taft, "and 1916 looks even better."

### KEEPS 'EM STEPPING SOME

KANSAS CITY, Mo., Dec. 20.—The bicycle business that is now being done in the downtown districts is tremendous and this season promises to be one of the best ever in this section for bicycles. The Schmelzer Arms Company, the Rich-Con Hardware Company, R. S. Elliott Arms Company and Charles Hanson, the Indian dealer have certainly been sending the wheels out for the holiday trade. The Sellers Cycle Company and Carl Hahn have been doing well in the residence districts of the city.

## DIRECTS CYCLEMOTOR PUBLICITY

*E. R. Perrin, Cyclemotor Publicity Manager*

**E. R. PERRIN is the new publicity manager of the Cyclemotor Corporation, of Buffalo, N. Y., manufacturers of the Cyclemotor, a bicycle motor attachment which is being introduced this season for the first time in the American market.**

**Mr. Perrin has had an extensive experience along publicity lines, having supervised big advertising campaigns for a number of prominent concerns. He is particularly well fitted for his present position, for he devoted several years to training in technical subjects, including gas engines.**

**It has been announced by the Cyclemotor Corporation that Mr. Perrin has a very comprehensive campaign in preparation, employing the use of trade journals, local papers, dealer's helps, exhibits and other efficient media. Mr. Perrin's plans will be outlined and started into motion at a sales conference that will be called in Buffalo during Christmas week.**

### HIDLEY OPENS IN LOS ANGELES

LOS ANGELES, Cal., Dec. 22.—J. H. Hidley, who has been in the bike business for twenty-two years, has just opened "The Hidley Bike House," in the flatiron strip near the junction of Spring and Main streets, Los Angeles. He has his store laid out for a stock of Great Western machine sundries, tires, and full repair equipment. J. H. Hidley says he is opening this store merely as its promoter, and early in the spring he is going up North and will turn the store over to his brother, William Hidley, who is at present operating at East Seventh street.

### ELDREDGE BI-CLUB ELECTS

N. TONAWANDA, N. Y., Dec. 22.—The Eldredge Bicycle Club of this city held its annual meeting recently, at which time the nomination and election of officers for the ensuing year took place.

The following officers were elected: President, Harry F. Korff; first vice-president, Louis Ernst; second vice-president, Albert Klatt; third vice-president, Albert Reu; treasurer, Frank Rehberg; secretary, George Edwards; director, Harry Wythe. A new club house will be constructed in the near future.

### BICYCLE DEALERS INCORPORATE

ALBANY, N. Y., Dec. 22.—The Bronx Rubber Company has been incorporated in the Bronx, N. Y., for the purpose of dealing in bicycles. The capital stock is $6,000 and the parties interested are W. J. Gannon, I. Teitelbaum and J. K. Halikman, of 1209 Bedford avenue, Brooklyn, N. Y.

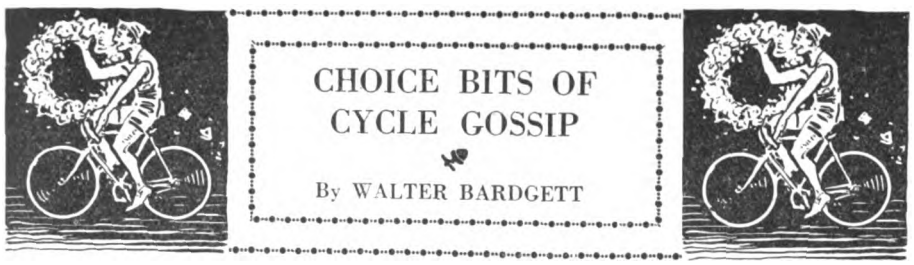
### ADVERTISING BICYCLES

FORT WORTH, Tex.—Gaines Brothers, agents for Miami and Pope bicycles, at 406 Main street, this city, are conducting a special advertising campaign in the local papers featuring girls' bicycles. The campaign is decidedly a success.

### A LIGHTWEIGHT MACHINE THE FAIR SEX ENJOY

**The Dayton Motor Bicycle Is Bringing a Splendid Lot of Riders Into the Ranks, and the Ladies Are Well Represented**

Digitized by Google



THAT the proposed six-day race which promoters are trying to run in Chicago some time next February will not materialize is indicated by the refusal of the officials of the Cycle Racing Association, which controls the Windy City indoor franchise, to consider the proposition. A representatives of the promoters, Thomas P. Convey, was over at Newark, N. J., last week to discuss the situation with Frank Mihlon and Johnny Chapman, of the C. R. A., but neither of these officials extended any encouragement to the Chicago man.

The board of control of the National Cycling Association, which has the power to grant sanctions for such events, declined to take any definite action in the matter and referred Convey to the Newark cycle moguls. Convey then went to the riders and found them in a receptive mood, after listening to glowing inducements which the Chicagoans held out.

**Oscar Egg**

But upon learning that the N. C. A. had not sanctioned the grind, the riders became "scarce." Just what the outcome of this situation will be none of the cycle wiseacres at Newark could say, but from present indications it would seem that the chances for a six-day feature in Chicago next spring are doubtful.

---

John M. Chapman is now in the South trying to get a bicycle track started in Jacksonville. Chapman is scouting around for a location and if he can make arrangements the track will be opened around January 15. The new track which will be erected in Philadelphia next season will be located at Tenth and Erie streets, and the new site is very convenient. Jimmy Moran, who announced his retirement from racing at the conclusion of the last New York race, will be associated with the Cycle Racing Association in the new track.

---

Oscar Egg, the Swiss unpaced champion, Marcel Dupuy, the French sprinter, and George Seres, the French paced champion, competitors in the last six-day race, sailed for Bordeaux, France, Saturday last on the French liner Espagne. Whether they will return to this country is problematical. Egg was desirous of signing for the Cycle Racing Association, but Manager Chapman stated that he would let him know later. Dupuy is returning to his native land for examination by the military authorities. Both Seres and Dupuy were declared exempt from war duty, but they are probably hard pressed for men in France, and Dupuy, with his half a foot, and Seres, as bald as a billiard ball, may fit in some place.

---

Although Jimmy Moran and Bobby Walthour failed to win the last six-day race in Madison Square Garden, they will always be known as the record holders for the race. Moran and Walthour won the last sprint in the Berlin finish and were ahead when the 142 hours were finished.

---

Norman Hansen, the little Danish cyclist, will follow in the footsteps of Alfred Grenda, the tall Australian, and pay a visit to the marriage license clerk in Newark this week. Grenda was married to Miss Isabel Crawford, of Harrison, on Tuesday, December 21, while Hansen will be married the day after Christmas, the-bride-to-be being Miss Preus, a Newark lady. Hansen plans to take a trip to Denmark for a honeymoon voyage.

# HOW BROWN BECAME A SALES MANAGER

## Sticking Qualities Have Brought Success to Pierce Booster

**By GEORGE W. GRUPP**

BUFFALO, N. Y., Dec. 22.—It was back in 1887 that Fred L. Brown, general sales manager of the Pierce Cycle Company, bought and rode his first bicycle, which was a 36-inch high wheel with steel tires. In 1888 he bought a 48-inch Columbia, high weel. When the safety wheels first came into use he was one of the riders who looked down on those who preferred the lower type of wheel. However, in 1902 he became converted to the safety bicycle when he bought a 54-pound light roadster.

### Starts as Store Clerk

All the riding and purchasing of bicycles up this time had been for pleasure. But just at this time it seems Brown's father, who was in the dry goods business in a small Colorado town, needed some additional help and thereupon engaged him as a clerk in his store. Young Brown was not content with that kind of work, so finally he persuaded his father to give him a small space in the rear of the store to start a bicycle department, which was to be his own. It was not long after this that he opened an agency for the Keating bicycle, which then sold for $125. He only sold a few Keatings. After giving up this agency, he took on the Rambler, only to be lost shortly after because he would not buy enough bicycles for stock to satisfy the factory. The losing of this dealership made him all the more determined to succeed in the bicycle business, so in 1905 he took up the agency for the Pierce bicycle.

### Does Well with Pierce

He did so well with this new line that Tom Botterill, then manager of the Denver branch of the George N. Pierce Company, offered him the assistant managership of the branch, which position he held until the fall of 1907, when he was appointed manager of the Pacific Coast branch with headquarters at Oakland, Cal. From this point he covered and distributed Pierce bicycles and motorcycles over the seven adjacent states and the Hawaiian Islands.

When the Pierce factory was closed and the Pacific Coast branch was sold to the John T. Bill & Company, of Los Angeles, he went with the Bean Son Company, of San Francisco, as their sales manager.

### Becomes Sales Manager

Six months after the closing of the Pacific Coast branch, the Pierce Cycle Company was reorganized with Percy P. Pierce as president. Immediately Mr. Pierce got in touch with Brown and persuaded him to come to Buffalo and take charge of the factory sales department. The proposition was so good that Brown took up his new duties in Buffalo April 15, 1913. And on the first day of January, 1914, he was elected to the board of directors of the Pierce Cycle Company.

Since then he has taken charge of the

**Fred L. Brown**

Digitized by Google

entire selling end of the company. He does a great deal of traveling, making four or five trips a year to New York, Boston, Philadelphia, Baltimore and Washington, in addition to the scores of trips to St. Louis and Chicago. Each fall he makes a trip West, going via Chicago, Minneapolis, Spokane, Seattle, Portland, San Francisco, and Los Angeles, and returning via Salt Lake City, Denver, Kansas City, Dallas and St. Louis.

## DE LACKSO IN THE BIKE GAME TO STAY

LOS ANGELES, Cal., Dec. 20.—After riding a bicycle 162,000 miles and making the trip four times around the world, Francis De Lackso announced during his stay in Southern California that he was in the bicycle game to stay. The plucky little rider, who in spite of his average height is so solid and muscular that he weighs 182 pounds, was enthusiastic about the behavior of his machine in the long, steep, winding canyons where one rides between a towering cliff and a yawning chasm at places on the trip down from San Francisco to San Diego, and on side trips into the mountain canyons.

De Lackso put on an Atherton coaster brake before making the trip and is mighty glad he did so. He says he tried it out thoroughly in San Francisco coming down the famous Fillmore street hill. "Any bike that will take that hill will take anything in the world," said De Lackso, "and I feel that I am not running any risk." De Lackso is now on his way across the country to New York by way of Phoenix, El Paso, New Orleans, Montgomery, Atlanta, Savannah, Richmond, Washington, Baltimore, Philadelphia. He expects to get to New York in March.

## BAKER, THE BOSTON CYCLIST, ARRIVES IN 'FRISCO

SAN FRANCISCO, Dec. 20.—Harold Baker, of the Boston Y. M. C. A., arrived in this city recently, having pedalled his way across the continent on a Dayton bicycle. He carried a message from the mayor of Boston to the president of the Panama-Pacific International Exposition.

### Leisurely Ride Across Country

Baker made no effort at record-braking, traveling in a leisurely manner. He experienced some trying ordeals, as for instance, he found it impossible to ride his wheel through parts of the Nevada desert, on account of the deep sand, and for two days was compelled to push his bicycle and carry his suit case. He spent two nights on the desert and slept but little owing to the presence of coyotes and wild cats, who made the nights hideous with their howls. He traveled for two days with only a loaf of bread and a quart of water to sustain him. His machine was equipped with Vitalic tires and he had but two punctures during the entire trip.

Baker intends to return to his home in Boston this winter, making the return journey by wheel over the Southern route.

## The First Complete Story of Champion Frank Kramer's Career

**BEGINNING with next week the Bicycling World will run the first installment of FRANK KRAMER'S life story. This will be the first time that any newspaper or trade journal in America has attempted to present a complete narrative of this marvelous athlete's achievements.**

**THIS big story will open with the days when KRAMER, the boy, given up by his family as a hopeless invalid, sought in the bicycle a means of regaining his health. It will portray a vivid picture of his first fruitless struggles on the road and track.**

**GRIPPINGLY it will tell of his climb up the ladder of bicycle fame and how he won his two amateur championships. And then the story will take the reader through the most thrilling episodes of the great bicycle rider's professional career, when victory after victory crowned his unmatched riding both in America and in foreign lands.**

***FRANK KRAMER himself is furnishing all the data and the photographs are from his personal collection.***

## GREEN SPRING VALLEY RUN

BALTIMORE, Md., Dec. 18.—An interesting run was held by the Crescent Bicycle Club on Sunday last to the old St. Thomas Church in the Green Spring Valley. This church is one of the landmarks of the country surrounding Baltimore, having been built early in the eighteenth century and containing in its graveyard many old tombstones dated before the Revolutionary War.

A hill-climbing contest was held on the steep grade leading up to the church, which resulted in a victory for Welby Sherman, Captain Langdon M. Sanborn finishing second, August Leimbach third, Rudolph Leimbach fourth, and Lester Nickles fifth.

Two half-mile sprint races were also held during the progress of the run, the first one being won by Langdon Sanborn, with August Leimbach second, Rudolph Leimbach third, Walter Doersch fourth, and Lester Nickles fifth. The second race also went to Langdon Sanborn, August Leimbach again getting second place, Lester Nickles finishing third, Walter Doersch fourth, and Rudolph Leimbach fifth.

## NEW CENTURY ELECTS

SAN FRANCISCO, Cal., Dec. 17.—The New Century Wheelmen held their annual election of officers last week for the year 1915-1916. The following men were chosen: President, R. A. Greeninger; vice-president, J. Couglan; second vice-president, A. Sangalli; financial secretary, P. Morgan; recording secretary, C. Sayre; treasurer, L. Drury; sergeant-at-arms, H. De Brie; captain, W. Hammit; first lieutenant, G. Drury; second lieutenant, L. Drury.

The Western cycling championship race has been postponed indefinitely on account of the uncertain weather.

### A NOVEL SELLING PLAN

DE KALB, Ill., Dec. 7.—Letting the town demonstrate the Smith motor wheel at a profit to the dealers, and realizing quite a number of sales as a result, this is the latest contribution to live-wire merchandising ideas which was made by Severson Brothers, the local agents. Both brothers were too busy with work about the shop to demonstrate the motor attachments themselves, so for a time the motor wheel remained idle in front of the sales room.

Then one of the Seversons, realizing that he would reap just what he sowed, got out a paint pot and brush and made the following sign which was hung outside of the store:

"Bicycle with motor wheel attached to rent, 25 cents per hour."

Immediately the outfit was in great demand. It was spurting around the streets of De Kalb almost every hour of the day. The Severson Brothers have already cleaned up the cost of their demonstrator and are now making money on the rental system. But an even more important feature of their plan was this: People noticed different persons riding the motor wheel equipped machine and naturally concluded that a bunch of cyclists were purchasing the bicycle booster. "Gosh, Severson," was the remark made to the brothers more than once, "you are certainly selling a lot of those Smith motor wheels."

### WASHINGTON CYCLEMOTOR AGENT

WASHINGTON, D. C., Dec. 21.—J. E. Shaw, proprietor of the Acme Repair and Bicycle Co., which has one of the oldest established bicycle stores in this city, has taken on the local agency for the Cyclemotor, the two-wheeler motor attachment made by the Cyclemotor Corporation of Rochester, N. Y. Shaw is very enthusiastic over his new agency.

In a letter to the Cyclemotor Corporation he writes, after receiving his demonstrator: "I have delayed a few days in writing to see how the boys would like the new motor. It is spoken of in the highest terms. Expect to sell a good many during the coming season. It is a dandy."

An interior view of Shaw's establishment is shown on this page. The photograph reveals only a small portion of the machines usually kept in stock by the Acme company. It is interesting to note that during the 1915 season Shaw sold more ladies' bicycles than in any other year. He believes that the two-wheeler is becoming more popular with the Washington fair sex than ever before and looks forward to a big volume of business in ladies' models in 1916.

**Interior View of Acme Repair & Bicycle Co., Washington Cyclemotor Agency. Mr. Shaw, the Proprietor, Has Been in the Bicycle Business for 40 Years**

### THE SHORTER ROAD TO PROFIT

*(Continued from page 44)*

the reply, including your name, is not going to reflect much credit upon your concern. But if the wheel is a top-notcher, the sort that everybody or man who rides a "bike" would like to own, announcing the name of the store that sold it is the best kind of advertising, and starts the suggestion in the mind of others to do their bicycle buying at that particular store.

"We have found," said one of the shrewdest and most successful dealers in the business, who has made a lot of money selling bicycles, and is really in the "merchant" class, "that we don't need to have the bulk of our business on cheap bicycles unless we want to. And of course we don't want to, because we can make the most money with the least effort by selling good stuff. All we have to do is to consistently show the better-grade bicycles. If we do that, our customers will appreciate the fact that the difference in the price is represented by the difference in the quality.

"The average person who can afford it is willing to pay something for the satisfaction of owning the best, whether it is a suit of clothes, an automobile or a bicycle. After we got hold of the big principle to push the better grades of goods, whether in bicycles or any other kind of merchandise, we found that we had taken the short road to profit."

Men's Chainless Model

# Easy to Ride—Easy to Sell

Into your store comes a customer in search of a bicycle. He's familiar with the high qualities of Pope-made bicycles. He's seen them on the road and in the windows of the best dealers. He's read about them in his favorite magazines.

He has his own ideas about bicycles and he's willing to pay for a bicycle that will embody them. He wants a bicycle with graceful lines. He wants a bicycle that can easily be kept clean. Above all, he wants a bicycle that can be driven farthest and fastest with the least effort on his part.

That's why its easy to sell him one of the famous

# Pope Chainless Bicycles

Wideawake dealers will be quick to take advantage of the Return to the Wheel that is sweeping over the country. Coupled with the Return to Prosperity this means that high-grade Chainless bicycles will be more popular than ever this coming year.

Write today for our interesting dealers' proposition. It means profits for you.

# What Does It Mean to a

It means above all else to have public opinion on your side.

It means a disposition to buy before you have even broached the subject of a sale.

It means a nation-wide state of mind that is friendly and favorable to Goodyear.

It means a national faith and confidence in the integrity of Goodyear manufacturing methods.

It means pulling with the stream, instead of pulling against it.

It means, in short, that swifter and easier selling which is the shortest and surest road to permanent profit.

It means a faithful and not a fickle following—a business which will be yours as long as you continue to make known the goodness that is inherent in Goodyear Blue Streak Tires.

You may read Goodyear's future by the present and the past.

There is not even a doubt as to national motorcycle tire leadership.

# Confidence

**THE constantly increasing Harley-Davidson business would not be possible without the confidence of Harley-Davidson owners and dealers, for no one will continue to do business with any manufacturer unless he has confidence in the firm or in the goods it produces, or both.**

The Harley-Davidson business has shown a steady expansion. The products have made good year after year, and have been backed up by a strong progressive organization.

Dealers are glad to continue to sell Harley-Davidson products year after year because they know that the organization at all times has the interests of its dealers and owners at heart, and that the confidence they have placed in this organization and its products has been respected.

Harley-Davidson owners purchase Harley-Davidson products year after year for the same reasons.

The Harley-Davidson Motor Company enjoys the confidence of countless thousands because it has taken pride in doing what it has said it would do, and because it has maintained for fourteen years the high Harley-Davidson standard in its products and throughout the organization.

# Pope Preparedness

Preparedness isn't solely a question of armies and navies. Every motorcycle manufacturer is up against the toughest sort of preparedness problem of his own.

Here's the situation. Owing to general prosperity in all lines of manufacture and agriculture, the demand for quality motorcycles in 1916 will be greater than ever. All authorities agree on this.

But just as this demand grows larger, up goes the demand from all quarters for materials that go into the manufacturing of motorcycles. Bearings, aluminum, magnetos, and, most especially, tubing will be scarcer and dearer than ever to those manufacturers who had not the foresight to place their orders before the big demand was created.

Do you realize what this means to you, Mr. Dealer? It means that you will not be able to turn the 1916 demand for motorcycles into profit for yourself unless you handle a line of motorcycles made by an organization ready to make delivery when you need it.

Such an organization manufactures the famous

## INDIAN SALES SINCE SEPTEMBER 1 SHOW 80 PER CENT. INCREASE

SPRINGFIELD, Mass., Dec. 28.—Sales Manager F. J. Weschler, of the Hendee Mfg. Co., is back in his office at the factory after his successful trip to the Pacific Coast and is complaining of the fact that a few more hours cannot be crowded into a working day. These are busy times at Hendeeville, and Mr. Weschler is setting a new record for activity in clearing up the matters demanding his attention that accumulated during his absence.

The fiscal year of the Hendee company closed on September 1 and the records show that Indian business for the first four months of the current fiscal year is 80 per cent. higher than the volume of sales for the corresponding period in the preceding year, and the outlook is exceedingly bright.

### WELLS MAKES ANNUAL VISIT TO HENDEEVILLE

SPRINGFIELD, Mass., Dec. 28.—W. H. Wells, manager of the Hendee Manufacturing Company's branch in London, is paying his annual visit at the factory, having arrived in this country a few days ago. As has been his custom for years past, Mr. Wells will remain in Springfield for a week or ten days conferring with Hendee officials concerning 1916 sales and shipments, renewing acquaintance with department heads and making his usual tour through the big plant.

### CYGNET REAR CAR OFFICIAL NOT SERIOUSLY INJURED

BUFFALO, N. Y., Dec. 27.—Among those who were injured in the collision between the two sections of a train on the Lackawanna R. R. near State Ford, Pa., on December 24, was L. Ogden, of the Cygnet Rear Car Company, of this city. The collision occurred during the night, just at the cut-off, and resulted in two passengers being killed and five injured. The sleeping car in which the injured were was the rear one on the second section. The car was torn from its trucks and thrown across the tracks by the impact of the locomotive belonging to the third section.

In reply to a telegraphic inquiry made by **Motor Cycle Illustrated,** the Cygnet Rear Car Company stated that Mr. Ogden was not seriously injured in the wreck. It was stated in the account of the wreck that Mr. Ogden was bruised about the body.

### SPECIAL FITTINGS FOR INDIAN ON ROGERS CAR

CHICAGO, Ill.—Widespread interest is being taken in the announcement that the Rogers Manufacturing Company, of this city, is bringing out a sidecar with special frame fittings to attach to the Indian cradle spring frame models of 1916 and previous seasons. The new fittings make it possible to attach and detach the sidecar without trouble in a remarkably short period of time.

This applies in particular to the electrically-equipped models, in which the battery casing interfered with the attachment of previous Rogers cars.

## LAST CALL FOR THE CYCLE PARTS MID-WINTER LUNCHEON

NEW YORK, Dec. 28.—The last call is now being sounded for trade boosters who wish to be "among those present" at the mid-winter luncheon of the Cycle Parts and Accessories Association in the Hotel Astor, New York City, January 6. Messrs Surre and Morehouse, in whose capable hands the arrangements for the affair were placed some time ago, report that the plans have received the finishing touches and that it only remains for the trade representatives to speak up. Practically all of them have made reservations, but the committeemen fear that a few late arrivals will file their applications after the list has been made up and thus complicate matters for the committee in charge.

The program of the trade men for January 6 is an ideal combination of business and social features. In the morning of that day the Cycle Parts and Accessories Association will hold its mid-winter meeting and the Cycle Jobbers will also have a business session. Immediately following these meetings will come the luncheon, which is scheduled for 1 P. M. The meetings as well as the luncheon will be held at the Hotel Astor.

Those who have not yet formally announced their desire to participate in the luncheon program are requested to take the matter up with either C. E. Morehouse, of the Standard Company, Torrington, Conn., or W. J. Surre, of the Continental Rubber Works, Erie, Pa., instanter.

**Big Cycle Affair**

"From a trade angle this luncheon is one of the biggest affairs of the year," says Mr. Surre, "and we are straining every effort to guard against disappointing anyone through failing to provide accommodations at the eleventh hour. In order to insure all-around satisfaction we must now have quick action from those who have not yet made reservations. We ought to know at the earliest possible moment just how many representatives will be on hand from each company. When we have that information we'll be prepared to do the rest, and do it in a way characteristic of the association."

# NEW YORK SPORTING GOODS CO. DISTRIBUTES CYGNET REAR CARS

BUFFALO, N. Y., Dec. 27.—Announcement is made by the Cygnet Rear Car Company, of Buffalo, through Mr. Ogden, that the Buffalo concern has just closed a contract with the New York Sporting Goods Company, New York, for distribution of the Cygnet Rear Car in Greater New York and vicinity. The New York Sporting Goods Company is putting four men out on the road to wage an aggressive campaign on both the pleasure and commercial types. Mr. Ogden states that the Sporting Goods staff is enthusiastic in its endorsement of the new vehicle, having already closed more than twenty-five sales, one of them with a local business house for five commercial cars. As proof of their confidence in the "Cygnet," the New York Sporting Goods Company will use some of them in their own Delivery Department.

In this connection, an organization is now being perfected for maintaining, in three centers in New York City, Rear Car garages and service stations. It is anticipated that the car will be adopted by some of the big department stores, the Purchasing Departments of Gimbel's, Macy's and Wanamaker's being very much impressed with the outfit.

### GOODRICH BRANCH IN KANSAS CITY

KANSAS CITY, Mo.—The B. F. Goodrich Rubber Company has leased a five-story and basement building at Broadway and 24th street, this city, and has commenced alterations upon the same. The building will be used as a warehouse and headquarters for the entire Western Central business of the firm, and will be one of the three new auxiliaries to the main plant in Akron, O. The sales headquarters will be in charge of F. A. Oberhue.

### FISK AGENT IN ROCKFORD

ROCKFORD, Ill.—The Double Tread Tire Company, of 319 Cedar street, has taken the agency for Fisk tires for this city and vicinity.

### POPE ORDER FROM DUTCH FIRM

WESTFIELD, Mass., Dec. 28.—A. Va. Velzen, manager of the motorcycle department of R. S. Stokvis & Zonen, of Rotterdam, Holland, one of the largest motorcycle and accessories houses in Europe, has recently paid a visit to the plant of the Westfield Mfg. Co. While there he placed a large order for Pope motorcycles, which will be delivered immediately. Practically all of the machines ordered are of the popular model T-10 3-speed type. Van Velzen has given several orders for Pope motorcycles during the past six months. He spent two days in inspecting the entire Westfield plant, and will remain in America for a number of months. The house of Stokvis & Zonen has branches in Paris, in the Dutch East Indies and several other important European cities.

# RECORD-BREAKING VARIETY IN THIS YEAR'S NEW YORK MOTOR SHOW

NEW YORK, Dec. 28.—Motorcyclists will find in the accessory section of the sixteenth annual automobile show, which opens in the Grand Central Palace on Friday afternoon of this week, quite a few products intended for use on the powered two-wheeler. These offerings will be shown by leading manufacturers in connection with the main displays of automobile goods and will, in at least half a dozen cases, embody innovations over the lines introduced at the recent independent motorcycle and bicycle show.

The only two-wheeler that will be displayed at the show is the Militaire Autocycle, manufactured by the Militaire Autocycle Company, of Buffalo, N. Y.

Opening on Friday afternoon, December 31, the show will run until Saturday night, January 8, excepting Sunday, January 2. A record-breaking attendance is looked for on New Year's Day. The doors will be thrown open at 10 a. m. daily and closed at 10:30 p. m.

Three hundred models of motor cars will be shown, 87 manufacturers of automobiles being listed. In addition, there will be no less than 307 accessory exhibits.

The Show Committee is headed by Col. George Pope, and S. A. Miles is manager of the show itself.

### THREE ENJOYING THEIR MOUNTS, AND AN AGENCY IN NEW ZEALAND

# RAOUL'S RUN TO INDIAN FACTORY WAS MOSTLY TRAIL-BREAKING

**Raoul and His Passenger Ready to Hit the Snowy Trail**

SPRINGFIELD, Mass., Dec. 24.—Another path breaking feat for the 1916 Powerplus Indian was made by H. Raoul, Indian dealer at 4192 Broadway, New York, when he and a friend, John Lever, drove with a sidecar combination to this city. The road was covered with snow from the worst storm that has visited New England since 1888 and in some places it was so deeply drifted that the driver could not keep his feet on the footboards. The pair took several tumbles and in one place, Meriden, had to traverse 20 inches of snow for several miles.

The run from New York to New Haven was made in three hours, the roads having been pretty well traveled in this section. However, it took Raoul and Lever 2¼ hours to get to Hartford and another 2¼ hours from Hartford to Springfield. It was mostly breaking trail from New Haven on. Raoul said that they did not touch a tool during the trip. The pair leave tomorrow for New York.

### YONKERS M. T. C. ELECTS

YONKERS, N. Y., Dec. 28.—The annual meeting of the Yonkers M. T. C. of this city was held last night at the Hollywood Inn. The following officers were elected for the 1916 season:

Carl Currie, president; John Barmore, vice-president; Eugene Brusie, treasurer; Herman Romaine, secretary; William Holt, road captain; William Ewald, Ralph Cabot and Joseph Wasko, lieutenants; Harry S. Bracken, press agent, and William Holt, sergeant-at-arms.

Following the election, a vote of thanks was tendered to Past-President George A. Ellis for his good work during the 1915 season and a committee was appointed to arrange for a dinner in his honor, following the next meeting on January 11.

Following its program of previous seasons, the Yonkers M. T. C. is planning to hold a series of runs during the 1916 season. An endurance run will probably be a feature.

### OUR FRONT COVER

This week's cover illustration shows an old knight of the boulevard, in the person of a traffic officer, greeting his up-to-the-minute successor—the motorcyclist. While the horse-mounted minion of the law is still a sufficiently common sight to be reckoned with, there is no denying that he is fast giving way to the speedier and therefore more efficient motorcycle officer, and the illustration is significant.

The rider on the Cleveland lightweight is George Squier, of the Cleveland Motorcycle Company's staff, and at his right are Messrs. Ball and Hauk, who are also on the Cleveland list of boosters. The photo was taken recently in Cleveland while Squier was putting one of the new lightweights through its paces.

### DR. BOIDO BOOSTING MEET

PHOENIX, Ariz.—If the plans of Dr. Boido, of Phoenix, father of Lorenzo Boido, the well-known desert race winner, and the best friend of motorcycling sport in Arizona, come out on schedule there will be a classy meet at Phoenix on February 22. Dr. Boido met Fred Hoffer, the Excelsior booster, when the latter was here last week, and got Fred to promise to boost for the meet.

### BRANCH LICENSE OFFICE OPENED

LOUISVILLE, Ky., Dec. 27.—In order to supply the Louisville motorcyclists and automobilists with their 1916 license tags, a branch office has been located temporarily at 515 South Third street by H. L. Ramsay, assistant state commissioner of motor vehicles. Over 700 plates were issued during the first week.

### REPLACES DOGS ON SLEDGES

JUNEAU, Alaska.—The latest use to which the Motor Wheel is put is drawing sledges, the bicycle booster replacing the "huskie" teams. George E. Nelson, local Motor Wheel dealer, states that the device is perfectly practical for this purpose, while Thomas Keel, representative in Fairbanks, says that he is going after the Esquimaux on this proposition.

# NEW THOR BRANCH WILL CARE FOR ENTIRE PACIFIC COAST TRADE

CHICAGO, Ill.—The Aurora Automatic Machinery Company, makers of Thor motorcycles, announces that it will establish a branch in San Francisco after January 25, 1916. From this branch direct distribution to dealers in California, Oregon, Washington, British Columbia, Arizona and the Hawaiian Islands will be made. The headquarters of the new branch will be at 61 Fremont street, and will be in charge of Z. Barton, who has been associated with the Pacific Motor Supply Company for the last seven years.

The company has notified the Pacific Motor Supply Company, of which A. Freed is president, that its contract will terminate on January 25, according to the 30-day notice in the agreement. The Pacific company has had the wholesale and retail Thor distribution in Coast territory for some years.

Manager Barton is now at the Thor factory completing preparations for the establishment of the new branch. Prompt and up-to-date service to Thor dealers and riders on the West Coast will be the aim throughout. On his return to San Francisco, Manager Barton will commence to cover his field and organize a crackerjack Thor service through his entire territory. Old dealers as well as new ones will be included in this service program.

### NEW CYCLE AND MOTOR WHEEL TIRES FROM FIRESTONE

AKRON, O.—Made from 14¼ ounces of pure cotton fabric, identical with that employed in the Firestone motorcycle tire, is the new black tread, red wall bicycle tire made by the Firestone Tire & Rubber Company, of this city. It has a non-skid tread and contains the same compound as the firm's motorcycle racing tire.

This new tire, which is constructed especially for bicycles adapted to use with Smith Motor Wheels, is of better quality than the red tread recently announced. It is also much heavier. The red tread tire has been discontinued, but the blue tread bicycle tire is still continued. The Firestone factory has also produced a 20 x 2-inch tire for the Smith Motor Wheel, containing the same compound as that used in the Firestone corrugated motorcycle casing.

## BIG SHORTAGE PREDICTED IN 1916 GAS SUPPLY

NEW YORK, N. Y., Dec. 24.—Through Kris Kringle is supposed to leave nothing but happiness in his wake, it seems as if the gasoline man were trying to butt in on New Year's joys by announcing that the price of gas is going up, up, up! Just how high the price would eventually soar no one can vouchsafe, but officials connected with the big oil corporations predict a shortage of millions of barrels.

It is estimated by the oil men that the demand for gasoline next year will exceed 30,000,000 barrels. In 1914 only 18,000,000 barrels were produced. And the production for 1916 will not be nearly as large as the demand. Hence the advance in the price of gasoline. Speaking of this, one of the largest gasoline producers said:

"Unless relief can be had, either through the discovery of new oil fields or still other processes, to increase the gasoline yield of petroleum, or through some other development that cannot be foreseen now, the indications are that the price of gasoline will go much higher during the coming year."

## GAVE ITS CARS FREE

LOUISVILLE, Ky.—The Quick Tire Service Co., local agent for United States tires, placed its entire fleet of delivery cars at the disposal of those who wished to aid the needy on and before Christmas. The firm issued a long list of commodities which its vehicles were capable of handling, and among these were cook stoves, a ton of coal, and a trained nurse.

## RUSH FOR 1916 TAGS

NEWARK, N. J., Dec. 27.—Motorcyclists and automobilists in this city have been laying siege to the agency controlling the 1916 license tags for New Jersey. The rush has kept all motor vehicle inspectors busy and a large force of extra helpers has been taken on.

The reason for this rush is that the usual 30 days of grace for new tags has been abolished and all 1915 tags must be replaced by 1916 tags on January 1. The new tags will be larger than the 1915 models and will have white embossed letters and numerals on a brown background.

## THE ELECTRIC HORN QUESTION

NEW YORK, December 20.—An agitation aimed at having the Board of Aldermen of New York City take up the question of barring electric horns on motor vehicles is understood to have petered out for lack of reasonable evidence on which to base the objections. Where the movement started is not known, but it appears to have been shown that electric warning signals could hardly be dispensed with, and the matter is not likely to be heard from again.

## MOTOR WHEEL EXPORTS GROWING

MILWAUKEE, Wis.—The Smith Motor Wheel export business continues to grow. The most recent shipment has been to South Africa, ten being the quantity sent, while an order for 25 has been dispatched to the Schuman Carriage Co., at Honolulu, T. H.

## MONOGRAM OIL MAKERS WIN SUIT FOR DAMAGES

SYRACUSE, N. Y.—The New York Lubricating Oil Co., makers of Monogram oils, at 116 Broad street, New York, has had pronounced in its favor a verdict for money damages against the C. E. Mills Oil Co., of this city, and Henry E. Mills, the president of the latter firm. The Mills Company and its president were charged with conspiracy to defraud the New York concern, and damages to the amount of $10,000 were asked.

It was brought out in evidence that Monogram oil, the product on which the New York company has a registered trademark, was bought by the Mills Company from brokers ostensibly for South American trade. The addresses on the containers were painted over and sent to this city for distribution. The oil was declared to have been sold at a lower price than that made by Jacob A. Seitz, local agent for Monogram products. The result of the action against the Mills firm will pave the way for Seitz to sue for damages from loss of business in his territory which includes Central and Northern New York and the Province of Ontario, Canada.

## ELISCO PROCESS USED AT NEW ELYRIA PLANT

CLEVELAND, O.—The new "Elisco" process of manufacturing welded steel tubing is being used at the local plant of The Elyria Iron & Steel Co., recently put into operation. This process is strictly automatic, for from the time that the coil of cold rolled steel enters one end of the machine until it emerges as a finished tube at the opposite end, it is untouched by human hands.

In a single machine, the tubing is formed, welded, burred, rounded, straightened, smoothed and cut to length. The entire tube manufacturing department of the company has been removed from Elyria, O., to the new plant in which there are 20 machines. The total capacity of these is 20,000,000 feet of tubing per year of standard and special gauges.

## SVENSGAARD BUYS STOCK OF WIMMER SUPPLY CO.

DETROIT, Mich., Dec. 24.—Records filed recently in this city show that the Harry Svensgaard Sales Corporation, of 471 Woodward avenue, has purchased the entire stock of the J. H. Wimmer Supply Company, at the receiver's sale. The Wimmer merchandise, which is valued at $23,000, consists of high-grade bicycle and motorcycle sundries. On inquiry at the offices of the Svensgaard Corporation, it was learned that no decision had yet been reached as regards the continuance of the Wimmer business.

### FITZSIMMONS WILL BUILD

MILWAUKEE, Wis., Dec. 28.—The Fitzsimmons Steel Products Company, a branch of the Fitzsimmons Steel & Iron Company, Chicago, contemplates the erection of a steel finishing mill and power plant at Fifth and Park avenues, this city, where a tract of land, 200 by 275 feet and extending to the river for dock facilities, has been purchased. The plant will employ about fifty men at the start and the number will gradually be increased as the business warrants. The building will be of brick construction, one story, 100 by 200 feet, and will cost about $60,000.

### TO HANDLE LONG HORN SALES

NEW YORK, N. Y.—Sales of Long horns will be turned over on January 1 to the Edward A. Cassidy Company, of this city, by the G. Piel Co., makers, at Long Island City, N. Y. The horns will be sold only to jobbers and manufacturers.

### McLEAN TIRE INCORPORATES

CLEVELAND, O.—The McLean Tire & Rubber Co., has been incorporated in this city to manufacture motorcycle tires. Capital is $300,000. Incorporators are Sterling Newell, G. W. Greene, H. F. Reid, L. S. Buchan and M. J. O'Connor.

## CONSOLIDATED CLUB HAS MANY MEMBERS

INDIANAPOLIS, Ind.—The Consolidated M. C. has increased in membership so rapidly in the past few weeks that it has been forced to seek larger quarters. A committee has been appointed to look for a building to house the club.

The club is one of the largest among motorcycle organizations. It is no unusual thing to have between 60 and 70 members at the meetings, while good showings are made every night in the week at headquarters. As soon as the election of new officers for the ensuing six months has been made the officers will commence another campaign for members, and will have an added inducement in the shape of a new club house, for it is expected that the new home will be obtained by January 6.

A tandem donated by the G. H. Westing Company, is being raffled off to pay the money still owing on the pool table. A turkey raffle held before Christmas netted the organization $28.40. Further money will be obtained by disposing of a racing motorcycle in a similar manner, the machine having been donated by F. A. M. Commissioner Jack Carr.

### DETROIT CLUB ACTIVE

DETROIT, Mich., Dec. 27.—The Harley-Davidson Motorcycle Club continues to hold regular meetings at the club rooms of the W. E. Wandersee store, 129 Gratiot avenue, and already there have been several good runs this fall. Weather permitting there will be runs throughout the winter. But nevertheless meetings will be held regularly in order to keep up the interest and be prepared for a good season in the spring.

### POLYTECHNIC STUDENTS INSPECT INDIAN FACTORIES

SPRINGFIELD, Mass.—Eighteen members of the Junior class of Worcester Polytechnic Institute, Worcester, Mass., visited the Hendeeville and main plants of the Hendee Mfg. Co., on December 21. The students, who are all taking mechanical engineering in the Institute, were in charge of John Jernberg, instructor in heat-treating and forging of steel. They were conducted round the shops by the various Hendee foremen, and expressed themselves well pleased over the manner in which work was carried on for turning out Indians.

### MORE SPEED COPS NEEDED

MILWAUKEE, Wis., Dec. 28.—On the strength of the record made by his motorcycle deputy squad, Sheriff Melms, of Milwaukee county, will ask for five additional machines next spring. During the past summer the speed cops arrested 528 automobile and motorcycle owners who differed with the county's idea of the proper mileage per hour to pursue in travel roundabouts. In nearly every instance a fine of $25 for automobiles and $15 for motorcycles was imposed, an aggregate of fines that will more than pay for the five new motorcycles needed for better efficiency in the sheriff's speed regulation department.

### BAY STATE CLUB DANCE

BOSTON, Mass. Dec. 20.—The Bay State Motorcycle Club gave its third annual dance at Paine Memorial Hall on December 10, more than 150 attending. George J. Downs was chief marshal; George F. Cassell, floor director, and E. R. Johnson, chief aid. The officers are: George J. Downs, president; Joseph V. Fandry, vice-president; John H. Wing, treasurer, and Calvin W. Stanley, clerk.

### HELD ENTHUSIASTIC MEETING

WHEELING, W. Va.—The final meeting in 1915 of the Wheeling M. C. was an enthusiastic one. Nine members were initiated and five new ones voted favorably upon. The house committee has purchased a pool table, and tournaments will be featured during the winter months.

## A COMMENDABLE WAY TO START

GOOD resolutions are in the air. Everybody is resolving to do a few constructive things in 1916, and to throw overboard a few habits of the other kind. For motorcyclists a considerable list of items for improvement might be suggested by the professional grumbler, but **Motor Cycle Illustrated** is convinced that attention to only a few outstanding features of deportment will work wonders. The average rider of motorcycles desires to play fair, to create a good impression—and he is steadily progressing towards those desirable attributes.

But he sometimes uses his muffler cut-out where it causes annoyance; from time to time he grows negligent of speed regulations—and he is not always careful of his personal appearance on the road. If he will remember to incorporate those three failings in his resolutions for improvement in 1916 he will make the year an epochal one for motorcycle advancement. Approached in the proper spirit, the task will not be an onerous one, and the end certainly justifies the effort. Let's jot those three items down now.

## FIFTH AVENUE IS BEST TRAVEL ARTERY IN NEW YORK

EDITOR, **Motor Cycle Illustrated.**—As a resident of New York City, I am naturally much interested in the recommendation of Police Commissioner Woods regarding the keeping off of motorcycles from Fifth avenue. I agree with you that there is need of strong and immediate protest, not only from our own riders, but from all who regularly visit New York as, outside of Broadway, there is no other really decent north and south artery of travel from the upper part of the city to the business district. In fact, between Sixtieth street and Fourth street, there is only one other good highway running the length of Manhattan Island—Eighth avenue.

Now, Eighth avenue usually has heavy traffic, particularly from Twenty-third to Fifty-seventh streets, and is only slightly behind Fifth avenue in this direction in the crowded section (Thirtieth to Fiftieth streets). However, to cross from Eighth avenue to the east side of the island means traversing Fifty-seventh street, Thirty-fourth street or perhaps two or three others out of some fifty-four, these being the only decently-ridable cross-streets in the lot. With Fifth avenue in use, the cyclist can cross at Fifty-ninth street or go through Central Park to reach the west side, all on good roads.

I think that if business traffic, especially that drawn by horses, was ruled off Fifth avenue during the rush hours, the problem of congestion would be solved without prohibiting the avenue to cyclists. The following table shows the condition of thoroughfares parallel to Fifth avenue in and above the sections mentioned.

Madison avenue—Asphalt with rough cobbles near 42d street; good rest of way.
Fourth avenue—Rough cobbles to end; hard riding.
Park avenue—Starts at 45th street, fine asphalt as far as it goes.
Lexington avenue—Some asphalt to 34th street, rough cobbles and planking to end.
Third avenue—Cobbles, car tracks and elevated pillars, very rough.
Second avenue—Asphalt to 59th street; cobbles to end.
First avenue—Rough cobbles; hard riding.
Sixth avenue—Asphalt and cobbles, elevated pilars and car tracks.
Seventh avenue—Much planking over new subway; some asphalt; 4th to 59th street.
Eighth avenue—Good asphalt, but has much heavy traffic.
Ninth avenue—Rough cobbles, elevated pillars and car tracks.
Tenth avenue—Rough cobbles and damaged macadam; hard riding.
Eleventh avenue—Rough cobbles, steam railroad; dangerous.

It will be seen that there is not much choice in either direction from Fifth avenue. Broadway, with planking, cobble patches and asphalt in poor condition, has heavy traffic, and this is not recommended. In many sections, riding it is a matter of extreme discomfort even on the best-sprung machines.

As a matter of fact, very few bicyclists use Fifth avenue as a means of travel north and south, owing to the risks run in the heavy traffic. With motorcyclists it is otherwise, as the mobility of the motorcycle on the sidecar combination is equal to or even superior to that of the automobile. Hence any regulation which points at these vehicles as delayers or obstructers of traffic is an unjust one and implies unfair discrimination.

NEW YORK, N. Y. "MANHATTAN."

# On the Pacific Coast

## VETERAN SIDECAR TOURISTS

LOS ANGELES, Cal.—A. F. Van Order, salesman with Passmore & Sayre, Los Angeles Harley-Davidson retail dealers, is the owner of a sidecar which is now attached to its third machine. This is its third year, and it is practically as spick and span and as serviceable as when new. This sidecar has run over 5,000 miles, carrying Mrs. Van Order and the two children. The photograph shows the tourists in front of the College of the Immaculate Heart, Hollywood, California, near the entrance of Griffith Park.

After being photographed here by the correspondent of **Motor Cycle Illustrated** the party made the climb over Mount Hollywood on the Griffith Park automobile road which carries by a series of switchbacks up to an elevation of 1,400 feet, and then descends to the Los Angeles River on the San Fernando Valley side. The view of the city and the local scenery, Van Order says, makes this one of the finest drives.

## CARL GOUDY LIKES FLYING

CORONADO, Cal.—It seems funny to think of anyone having the nerve to give a dare to Carl Goudy. However, that is what happened here the other day when somebody tried to stump Carl to go up in an aeroplane with one of the San Diego aviators. Carl didn't take it as a dare at all, but as long as he had the chance, thought he would like to go up anyway, and was taken up for a flight some 1,500 feet in the air and a few dips and slides. Goudy says it is good sport and he likes it, almost as well as hitting into a sharp turn ahead of the bunch in the motorcycle speed game.

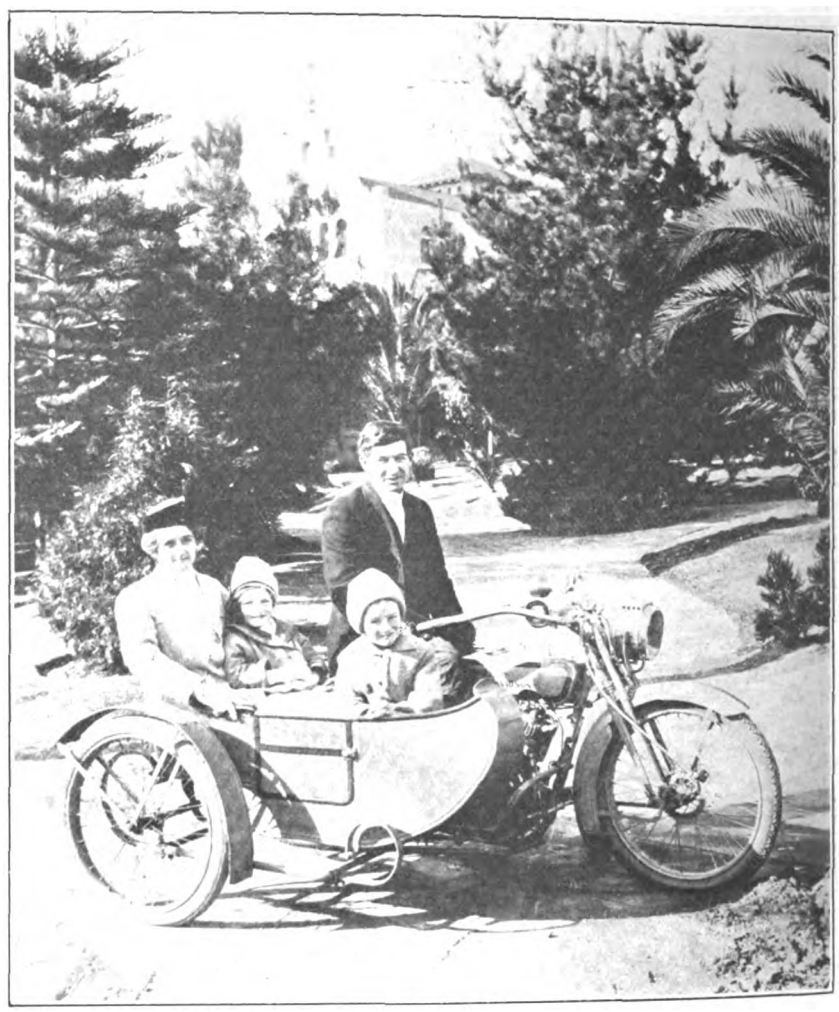
## THOR DEALER PROMOTES RACE

LOS ANGELES, Cal.—Riders under eighteen years of age will be eligible on a free-for-all basis and those over eighteen years of age on a handicap basis (professionals barred), to the race from Los Angeles to Venice and return, which is being promoted by E. Lebell, manager of the Pacific Motor Supply Co., Los Angeles. The race will take place soon after the first of the year, and will be open to all Southern California amateurs. A good list of bicycle and accessory prizes will be offered.

## ACTIVITY IN 'FRISCO

SAN FRANCISCO, Dec. 20.—The new 1916 Harley-Davidson line is meeting with an excellent demand in this city. Maggini & Perkins, local dealers, report the delivery of fifteen of the 1916 models thus far this winter. Included in these sales were a 3-speed and van outfit to the San Francisco postal authorities; 3-speed special police models, to officers James Logan and George Lowans, of the San Mateo county traffic squad.

In addition to the above, Maggini & Perkins have delivered six Harley-Davidson side vans out of their first shipment of the 1916 models. They report an excellent demand for the 3-speed Harley, declaring that it is destined to meet the competition of the light weights made by other companies.



**A. F. Van Order, With His Wife and Youngsters, and the Sidecar Which Has Covered Five Thousand Miles; Note Item at the Left**

## JOHN T. BILL "CLEANS OUT"

LOS ANGELES, Cal.—Following out some of the suggestions in **Motor Cycle Illustrated,** and featured by leading manufacturers, John T. Bill has been so successful in his holiday business that on December 22 he reported to the correspondent of **Motor Cycle Illustrated** that he was practically cleaned out of juvenile bicycles. He used newspaper space in moderation, part of the time using copy from the New Departure advertising matter, and found it was very effective. He expected that the carload he received from the Emblem factory, which was heavy in juvenile models, would fill the requirements of his trade, but he cleaned up on it and could have sold more. He considers that he got fine returns on the money spent for advertising. A feature which backed up his newspaper advertising was a particularly effective window with a home trainer at work.

## REED A PIONEER MOTORIST

LOS ANGELES, Cal.—F. B. Reed, of Ray, Arizona, has just placed his first order and agency contract for the Harley-Davidson machine with the Appeal Manufacturing & Jobbing Co., southwestern distributors. Reed writes to Sales Manager Welborn that he is in the midst of a mountainous mining country which has not been worked for motorcycles, but as he weighs 180 pounds he expects to give convincing demonstrations on the 1916 three speed.

## HOFFER SEES BOOM IN ARIZONA

LOS ANGELES, Cal.—With more people employed in Bisbee, Douglas, Globe, and other smelting and mining centers of Arizona, than at any time in several years past, and greater interest in good roads than ever before, Fred Hoffer on his return from a trip in the eastern part of the distributing territory of the Girtoh-Hoffer Co., is looking for a big increase in trade. Conditions are becoming a lot more encouraging for dealers. Hoffer went as far east as El Paso, Texas, and Albuquerque, New Mexico.

Digitized by Google

In the border towns people believed that as soon as Mexican conditions become a little more settled business developments in mining and cattle raising will supply a good field for motorcycles.

Hoffer appointed Tebbetts & Co., of Phoenix, Arizona, State distributors for the Excelsior. Road conditions were this year better than last, and there is a Good Roads boom under way. The State has made a good-sized appropriation and has men already at work; this will be backed by some of the more prosperous counties.

### BENSON HAS A STEADY HAND

LOS ANGELES, Cal.—J. A. Benson, field man for the Appeal Mfg. & Jobbing Co., Southern California Smith Motor Wheel distributors, has been riding his machine through good going and bad, in all his recent travels over the southern half of the state. Going from San Luis Obispo to Santa Maria a few days ago, he found the Santa Ynez River flooded, with the bridge washed out. He cajoled a watchman of a factory to lend him a plank a foot wide, and with this rigged an improvised trestle over the gap in the highway bridge and had the nerve to cross it on his machine. He surprised the dealer at Santa Maria by making the trip between 3:30 p. m. and dark, when all communication for travelers was supposed to be interrupted.

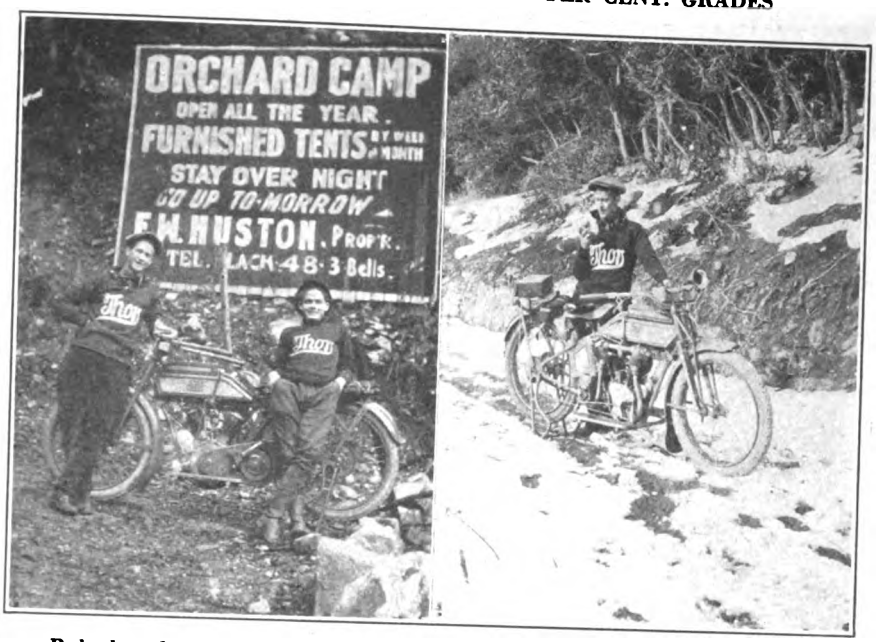
### NEW LOS ANGELES OFFICERS

LOS ANGELES, Cal., Dec. 24.—Abe Longley was elected president of the Los Angeles Motorcycle Club, at the election for the coming year, with the following officers: J. H. Block, vice-president; George W. Martin, recording secretary; O. B. Bray, financial secretary; W. J. Archer, treasurer; Charles Wride, captain; Jimmy Leonette, sergeant-at-arms.

### IMPROVE ASCOT TRACK

LOS ANGELES, Cal., Dec. 24.—Winter motorcycle racing in Los Angeles and the early spring meets will get the benefit of the improvements which are to be made right away on the old Ascot Park track. There was some talk a few months ago about a big speedway to rival those of Chicago and Indianapolis, but the fellows in the automobile and motorcycle trades found that too much money was needed, and the promoters went away disappointed. However, there is plenty of speed spirit in the community, and the outcome has been the improvements to old Ascot, in the shape of new macadam and oil surface and banked turns, which will make the track not only much faster but safer. Paul J. C. Derkum is in charge of the construction.

### HAD NO TROUBLE IN CLIMBING 30 PER CENT. GRADES



George Rubsch and George Malone at Half-Way Camp on Their Climb Up the Mt. Wilson Burro Trail with 1916 Thor; Rubsch at the Snow-Line

### CLUB TO DEDICATE NEW ROUTE

LOS ANGELES, Cal.—On their way to Bakersfield for the New Year's Day races, the Los Angeles Motorcycle Club members will carry a big banner to be used in ceremonies dedicating the new scenic highway known as the Ridge Route, between Los Angeles and Bakersfield. This is considered a remarkably fine piece of construction by the State Highway Commission.

An innovation in club activities has been the amount of publicity gained for club doings recently. The club realizing that this benefits the sport, has arranged to give a membership free to a member who does publicity work as his regular business, on condition of his writing up club doings and supplying them to the different papers.

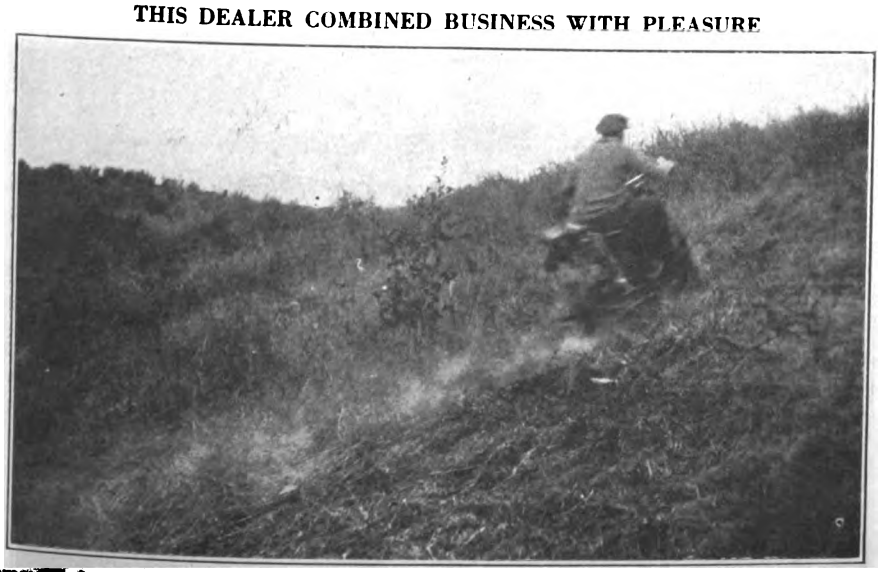
### HIGH-PRESSURE DEMONSTRATING

LOS ANGELES, Cal.—The interest the public is showing in lightweights in Los Angeles has caused the big distributors to get back to first principles and boost machines by personal demonstration.

C. Will Risden may be seen riding a lightweight on the street near his store every day. The first Excelsior machine arrived the week before Christmas and the way it drew crowds around the Girton-Hoffer establishment surprised even the enthusiastic distributors.

Now these distributors and T. E. Berry, who has the Miami Power Bicycle, are figuring on an all-around demonstration in which all three dealers will themselves ride machines and the advertising the event is getting will pull a crowd of prospects that is likely to swamp the highways leading to the demonstrating hill.

### THIS DEALER COMBINED BUSINESS WITH PLEASURE



James Shybaugh, Harley-Davidson Agent at Santa Barbara, Cal., Giving a Climbing Demonstration at His Recent Picnic to Riders

### BIG BIKE RACE IN FEBRUARY

LOS ANGELES, Cal.—Planning for a meet which will be the biggest bicycle road program ever held in Southern California, with the largest entry list, John T. Bill is arranging to get from the county authorities the necessary permit for a bicycle race February 22, from Los Angeles to Venice, the beach resort, 16 miles out from the city. Details are in charge of Max A. Flueckiger, with John T. Bill & Co., who states that he expects not less than 125 entries. Prizes will be a Pierce racer and bicycles from other dealers, and there will be at least 30 awards. Several of the leading dealers are expected to cooperate in promoting the race.

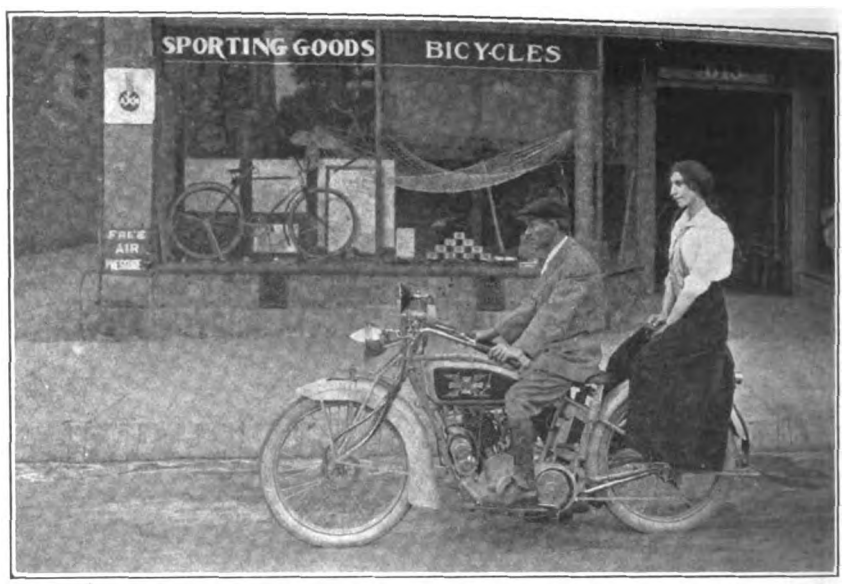
# NEW EXCELSIOR PENNANT AND THE MACHINE THAT STANDS BEHIND IT



**The Pennant, Which Is Decidedly Striking in Makeup, Calls Attention to Some of the Outstanding Achievements of the Excelsior in 1915 and Is Now Ready for Distribution; On the Machine Appears J. H. Terry, of Monravia, Cal., Who Handles the "Ex" and Features Neatness in His Demonstrating Work**

## ROGERS SIDECARS FOR R-S MODELS IN DEMAND

NEW YORK, N. Y., Dec. 29.—Irving Beck, Eastern manager for the Rogers Manufacturing Company, of Chicago, Ill., reports a nice demand for Rogers sidecars to fit the Reading Standard 1916 models. Several of these cars will be in the first carload, which is on the way East at the present writing.

Special care has been taken with the R-S Rogers cars, the color and excellent finish which characterizes the R-S product being duplicated on the sidecar body. A neat Reading Standard transfer will be put on each door. "The demand for the Rogers to attach to Reading Standard machines is by no means local," says Beck. "It comes from all over my territory."

### BUTLER GETS ORDER FOR 22

LOS ANGELES, Cal.—"Tommie" Butler, of C. Will Risden's sales force, reports an order of 22 Indians for immediate delivery on December 16 as a total of two days' business. The fourth carload of Indians arrived a few days ago, and those machines not already reserved beforehand are being sold off as rapidly as they can be uncrated.

### TO RIDE TO DENVER

SAN FRANCISCO, Cal.—W. H. Jackson, of the Dayton agency, will start for a tour to Denver, on January 1, riding a Dayton twin. He will stop at Los Angeles, Salt Lake City and Denver en route.

### INDIAN MOTORCYCLE SAVES TIME

TORONTO, Ont.—The claims of dogs to consideration when injured in the streets in any manner have been recognized by the Toronto Humane Society which has provided an Indian motorcycle and sidevan to rush them to the relief station. The society has a number of distinguished persons in its membership, including as chief patrons their Royal Highnesses the Duke and Duchess of Connaught.

### TWO NEW GOODYEAR BRANCHES

AKRON, O.—The Goodyear Tire & Rubber Company, of this city, will shortly establish branches at Cedar Rapids, Iowa, and at Salina, Kas. C. A. Kramer, of the Goodyear forces at Des Moines, will be in charge at Cedar Rapids, while R. S. Herman, who has represented the firm at Salina will manage that branch.

### SLOSSON ON ROAD

LOS ANGELES, Cal.—Stewart Slosson, of the local branch of the Firestone Tire & Rubber Company, is on his way to San Francisco, on the first leg of a 3,000-mile business trip. Slosson will ride all the way on his Harley-Davidson sidecar rig and will return to Los Angeles after covering 'Frisco.

### BOOSTING ROAD RACE

TACOMA, Wash.—Bailey, who handles the Pierce bicycle in this city, is rooting for a bicycle road race from Tacoma to American Lake and return over the new paved roads. The distance is 24 miles

## VAN OUTFIT USED BY HUMANE SOCIETY IN TORONTO

**The Officials of the Society Report that Much Time Is Saved and Confusion Avoided Through the Employment of This Economical Combination**

Digitized by Google

# SAVING MONEY FOR THE R. F. D. CARRIERS

ACTING in the belief that the R. F. D. field is one of the most important and promising in which the motorcycle has demonstrated its value, the Harley-Davidson Motor Co. is launching an energetic campaign with the aim of convincing rural mail carriers that no other vehicle can do their work so economically. The latest piece of literature along this line to come from the big Milwaukee plant is a booklet entitled "How Bill Won Out." It is to be followed by other booklets of a similar trend, all instructive and attractively illustrated.

The story of "How Bill Won Out" deals with an R. F. D. carrier who had faith in the motorcycle, and who demonstrated to the ultimate satisfaction of his postmaster that not even an automobile could give the high-class service afforded by the two-wheeler and side-van. While the story is not intended as a statement of actual occurrences, it sets forth conditions that might easily develop in any R. F. D. district, and the moral is an obvious one.

Interesting sketches brighten the narrative and all in all the booklet is one that every dealer who receives it is likely to read from cover to cover.

The photograph reproduced herewith has no direct connection with the story of "How Bill Won Out," but is being used by the Harley-Davidson Motor Co. as a cover illustration on another piece of R. F. D. literature which is now about ready for distribution. This booklet is aimed straight at the R. F. D. carriers themselves, and is loaded with facts pertinent to the opportunities open to a carrier who uses a motorcycle combination. As will be inferred from the illustration, the booklet shows how the time and energy saved through the use of the motorcycle can be turned into a bank account.

**How the Savings Account Idea Is Attractively Presented to R. F. D. Carriers by the Cover of a New Harley-Davidson Booklet**

### INCREASED ORDERS ARE EVIDENT

SAN FRANCISCO, Cal.—Heavy ordering by jobbers has been the rule since the Continental-Erie Rubber Works, of Erie, Pa., has opened its branch in this city. The quicker service the jobbers receive is responsible for much of the increase.

W. B. Tullis, the Continental-Erie traveler, will soon leave on a Northern tour, covering Washington, Montana and southern Utah as far as Salt Lake City.

### FIRST LOT FOR BENTE

SAN FRANCISCO, Cal.—Fred H. Bente has his first squadron of Excelsiors of 1916 model and has delivered a number already. The speed machine from the Chicago works has been tried out and is a great favorite with the road burners. Bente has a big group of live prospects and is busy getting them in line.

### ORWIG OPENS UP

SAN FRANCISCO, Cal.—Lee H. Orwig has opened a service station at Van Ness & Hayes avenues, and will specialize on Indian repair work. He was formerly with the local Indian branch. Orwig is a first class repairman and his trade is giving ample proof of the same already.

## FRIEND DEALER: BRING THESE POINTS HOME TO THE R. F. D. CARRIERS IN YOUR DISTRICT

BEGINNING January 1, the order of the Postmaster General permitting the use of motorcycle side-vans for R. F. D. deliveries becomes effective, and many carriers who have been restrained by the previous declaration of the postal head will now be in line for motorcycle outfits.

It costs $250 to $300 less to run a motorcycle and side-van combination a year than to operate a light automobile for the same period. These figures are based on careful experiments.

And a saving of approximately $300 a year means nearly another dollar a day for the R. F. D. carrier's pocket. That's plain enough. If he uses a motor car instead of a motorcycle outfit, he short-changes himself a dollar a day—maybe more.

Many a road that will send a motor car to the repair shop in jig-time can be covered indefinitely by a motorcycle combination. They're doing it.

When the R. F. D. route has been covered, the van can be detached and the motorcycle used for a quick run to town or elsewhere at an expense of a few cents. A motor car has to tote its four wheels and its bulk around day in and day out—and the expense goes with it.

Horses are too slow, too uncertain and in the end too expensive. The demands of R. F. D. service have grown beyond horseflesh.

The R. F. D. carrier who depends upon a horse won't have time left for any other income-bringing work. He's handicapped to a fare-you-well before he starts.

A motorcycle and side-van will save him time, money, worry and energy. Show him that it will. Give him a demonstration and if he has an eye in his head or a drop of red blood in his veins he won't let you get away without taking his money for an early delivery.

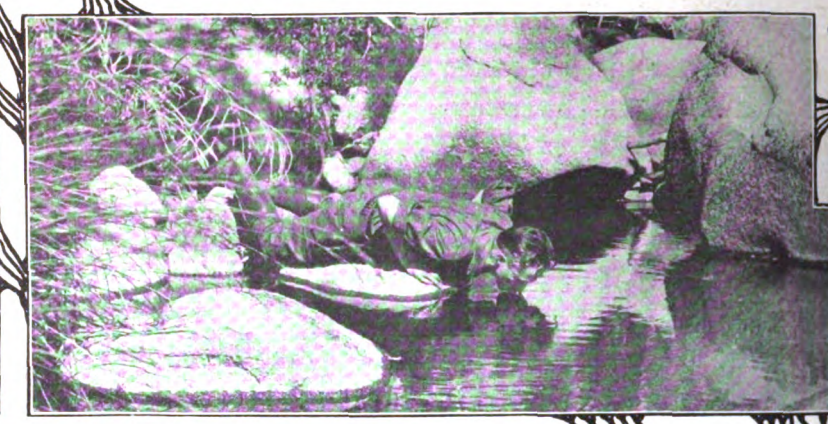
# 100 Miles on the

## A Motorcycle Tour that

## Unsurpassed Scenery

By Joh



IT was ten o'clock when the full moon broke through a high fog and we slid out from Los Angeles for the Rim of the World.

We rattled up Hill street, through the tunnel, over the hill, out North Broadway, and were then on the Mission Road to Pasadena.

We toured right along, making the ten miles from Los Angeles to Pasadena in just twenty minutes, but slowed our schedule down a bit when on going through Pasadena we encountered several miles of glistening black asphalt on which the street department with a dozen big rain wagons was working. It seems that wet asphalt has a peculiar affinity for a motorcyclist's hip-pockets, and we did several beautiful corkscrew glides before we traversed the length of Colorado avenue out of Pasadena and onto the Foothill boulevard.

Once on this road, with our spotlight illuminating the course, fully a thousand feet ahead, we settled down to a "gentle" touring gait of 50 miles per hour and, in the dim light of the moon, diffused through a clouded sky an ever-changing panorama of ranches with the tall Sierra Madre Mountains in the background, marched by Monrovia, Duarte, Azusa, Glendora, San Dimas, Upland, Cucamonga, Rialto and other towns flitted by much as if we had been reading slowly up the column of a railroad timetable, and just as the big clock in the tower of the San Bernardino County Courthouse tolled the hour of midnight we rolled up in front of the Sunset Hotel and were soon located for the remainder of the night.

### Some Spectacular Climbing

Six o'clock in the morning we were astir again, lost little time stocking up on ham and eggs, gasoline and oil, inquired the road to Arrowhead Mountain and were off.

Knowing that we would have some terrible grades once we reached the mountains, we had swung the exhaust pipes out of the muffler to conserve every atom of power and keep the motor as cool as possible.

At Left—A Down-Grade of 42 Miles in Santa Ana Canyon. Above—A Drink at an Ice-Cold Mountain Pool. At Right—Along the Perilous Precipices Where a Slip Would Mean Death.

We were no sooner out of the city of San Bernardino than we found ourselves on a road leading up a long, steady pull toward the mountains, and in a few more miles we started into the mountains in dead earnest. We rounded the base of Arrowhead Mountain, a great peak with an enormous rock, hundreds of feet across and shaped exactly like an Indian arrowhead, reared against the mountainside, and followed a canyon for miles up hair-raising grades and around curves that were so sharp that on a number of them we had to nearly turn around in the length of the machine. It was a case of intermediate gear work most of the way and low-gear on the turns, while to look off at the side of the road would positively make one's toes ache.

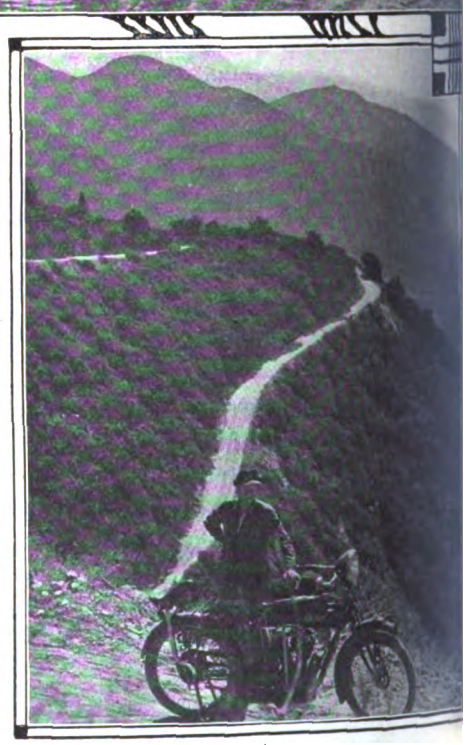
### Looking Down on the Clouds

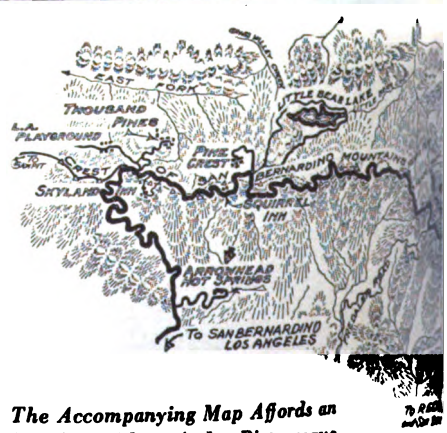
We passed several automobiles growling up-grade with motors smoking and radiators boiling.

We had reached a point where we were able to look down on the big fleecy clouds that drifted over the valley when we got onto grades that were so steep and curves that were so sharp that we decided to let our stand drop for the sake of safety.

It was well that we took this precaution, for we didn't go half a mile after dropping the stand before our drive chain let go—right in the middle of a hairpin curve with a drop off to the side that would have meant fully a thousand feet to the first stop. Of course, with the stand dragging, it stuck in the ground the instant we began to back up. We only backed a few inches and came to a stop.

Repairing the chain was but a matter of a few minutes, and another half hour's





*The Accompanying Map Affords an Excellent Idea of the Picturesque and Rugged Country Traversed by the Rim of the World Route*

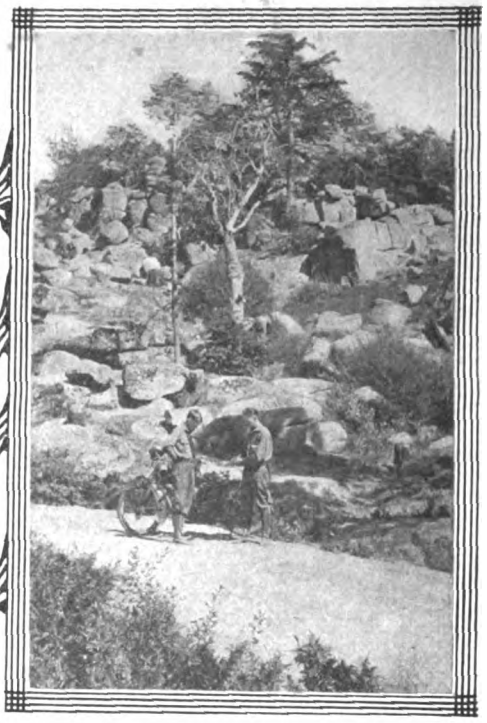
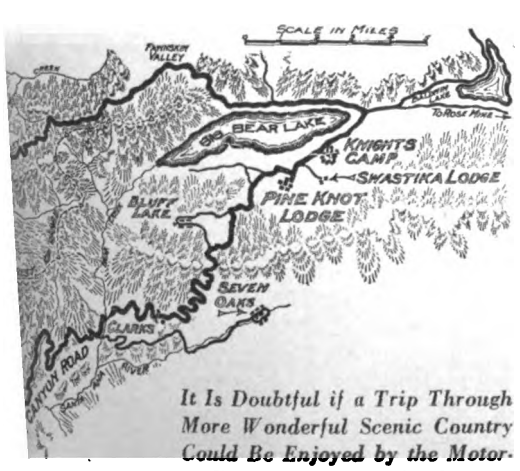
# Rim of the World

## Combined Hard Riding — and a Thrill a Minute.

By Hogg



At Left—A Skid in the Sand on Heap's Peak. Above—In a Section That Had Been Recently Burned. At Right—The Rocks on Which the Hermit Appeared and Played His Tin Pipe



*It Is Doubtful if a Trip Through More Wonderful Scenic Country Could Be Enjoyed by the Motorcyclist Anywhere in the Country*

grind brought us to the Thousand Pines Inn at the crest of the mountain range. The view from Thousand Pines is beautiful beyond description. It is appropriately named, for by reason of the climatic difference due to the altitude, the familiar vegetation of the valley has given way to vast forests of gigantic pines.

On one side of the mountain range one looks off for scores of miles over the fertile San Bernardino valley, while on the other side as far as the eye can reach is the Mojave desert—simply a vast waste of barren rocks and sand.

As one turns on his heel surveying the desert and the valley at a glance he readily realizes the full purport of the road's name—"The Rim of the World." The Rim of the World it is!

We lingered at Thousand Pines only long enough to admire the scenery a bit. We were just starting off again when up flew a robin—a real, honest-to-goodness robin red-breast—the first one that either of us had ever seen in California. The robin perched in a nearby pine tree and tuned up with his cheery carol, while we stood below for a full five minutes listening, and Albea, in his soft Southern dialect, declared that the "buh-d took him right back to Geo-gia."

### Plenty of Ups and Downs

This mountaineering by motorcycle, and carrying tandem, makes one's motor thirsty. We looked into the gasoline tank just before leaving Thousand Pines and found it advisable to take on fuel.

From Thousand Pines to Squirrel Inn we clocked the distance as 22 miles, but as the crow flies it is only about five miles. Our road wound about through dense forests of pines, up grades that made us lean forward over the machine as we growled up in the low, and down other grades that made us lean backwards as we coasted down in low-gear, using the motor as a drag to check our speed, and which turned over at such a frightful speed that it actually sang, while we wondered how the flywheels could stand the strain.

It was noon when we reached Squirrel Inn, where we stopped alongside of a huge spring that bubbled out of the solid rock. The water was as fine as any imaginable.

We hunted up the landlord of the inn, and soon had our feet under a table, with everything from soup to nuts. It was a splendid meal, and we were equipped with appetites that would have done justice to a couple of bears just out of a winter's hibernation.

### Some Coasting!

Leaving the inn we were informed that it was over 45 miles of rugged mountain road to the next civilization, and the next few miles brought home to us the real truth of what the innkeeper had told us. The road led up one peak and down another, across canyons, and up watercourses with an apparently utter disregard for the topography of the mountain range. At one point we traveled for more than a mile along the edge of a perpendicular wall, where the road was only wide enough for an automobile to hug the wall and have a scant 6 inches left on the edge of a sheer drop of, half a mile.

Coming to the end of this stretch our road angled off down the wall of a Canyon by a grade that must have been fully 35 per cent. Albea was driving, and as we came to the declivity he stopped, with an exclamation of: "Oh, man alive, look at this! Our brakes will never do it." At this, I climbed off the tandem, dropped the stand, stood on it with both feet and, holding to the tandem, said: "All right, Al, let her slide." And slide we did, down the grade at nearly 25 miles an hour, with me and the rear wheel dragging, followed by an avalanche of dirt, gravel, rocks and a cloud of dust.

Digitized by Google

We were within 20 feet of the bottom when we went over a big boulder and I took the balance of the distance on the seat of my trousers. Albea and the machine shot ahead and finished in a clump of tamaracks at the bottom.

Our road now angled back along the bottom of the Canyon and after following it a couple of hundred yards we came to a fine spring, where we stopped for a refreshing drink.

**Discovering a Hermit**

"Great balls of fire!" exclaimed Albea, as he gazed back at the road. "Did we come down that?" We sure had done it, but to look back at the road anyone would have sworn that nothing on wheels could ever come down it without being let down with a block and tackle. We were still gazing back at the canyon wall when suddenly our attention was attracted back into the forest by strains of music that floated up from a point most startlingly near. It was a clear musical whistle, quite like a flute or flagolette. Instantly we looked about to see where it came from.

Perched high up on a rock beneath an enormous pine sat an old man—shriveled and dried up like a winter apple, clothes hanging in rags and gray hair down to his shoulders. He had Rip Van Winkle backed off the boards. At first glance we thought he was drinking out of a funnel, but almost simultaneously became aware that it was from the funnel-like thing that the music was issuing.

Without sound or motion we listened until the old man had finished the verse of some jaunty Scotch music that he was playing, and as the last note died out Albea shouted "Fine work, grand-dad; let's have the next verse!"

Instantly the old man sprang off the rock, whined like a frightened dog and was off hot foot into the forest. "Now wouldn't that crystallize your vanadium?" exclaimed Albea, as he pulled his pistol out of his belt and twirled it on his forefinger. "I sure must have hurt the old bird's feelings!"

We had only two theories regarding the old man—either he was an insane wanderer of the mountains or a hermit.

**Little Bear Lake a Beauty Spot**

For the next twenty miles our road wound about through the mountains sometimes at such altitudes that it made our hearts flutter, but more often on the edges of precipices that made our toes ache as we looked off at the side. We took turns at the handlebars, and in this way managed to relieve each other considerably from the nerve-racking strain of driving for hours at a time where the least mismove spelled instant destruction.

At last we rattled down a mountainside to find ourselves face to face with Little Bear Lake, a beautiful body of clear fresh water nearly two miles in length, half a mile wide and surrounded with a forest of Virgin pine.

Little Bear Lake is 6,500 feet above sea level, and the blue of the summer sky and the green of the surrounding forest is reflected into its clear waters, giving it a vivid emerald hue.

We were just starting up into the mountains again from the Little Bear valley when two deer, a fine five-point buck and a doe, sprang out of the underbrush right alongside of us and went tearing off into the forest, thirty feet at a jump.

The deer were scarcely out of sight when two golden eagles went screaming and wheeling scarcely a hundred feet overhead, and set the hills echoing with their shrill "Ah-kee-ee-ee-ee—"

The Little Bear country offers some of the finest hunting and fishing to be obtained on the Pacific Coast.

It was but a few miles beyond the Little Bear valley that we encountered burned over forest country where the entire area had been denuded by comparatively recent forest fires. For miles we toured along amongst country which had once been covered by millions of dollars worth of fine lumber, but which is now reduced to a waste of barren rocks and charred stumps.

**Those Who Are Interested in Any Announcement Made Under This Heading Are Invited to Communicate with Motor Cycle Illustrated; Additional Details For the Guidance of the Exporter Sometimes Come to Hand After the Original Item Has Appeared in Print**

## "SANITY AND BUSINESSLIKE METHODS" ARE ESSENTIAL IN EXPORT SALES POLICY

"LET me urge first and at all times that we be businesslike in our methods of getting foreign trade. Let me urge that we use the same sane, commonsense business methods which have been so successful in domestic trade." This was the keynote of the address on "The Making of an Export Policy," by Dr. Edward Ewing Pratt, Chief of the Bureau of Foreign and Domestic Commerce, delivered recently before the International Trade Conference held in New York under the auspices of the National Association of Manufacturers. He repeatedly urged sanity and businesslike methods in developing export trade.

If it is decided to embark in the export business, a decision must be made as to the executive direction of the export department of the business and as to the selection of possible markets. The speaker urged that no less an officer than the vice-president should be put in charge of the export department, or if the business was too small for a separate department, the executive head of the firm should give his personal attention to the foreign business. The selection of markets is also of primary importance. "If you can make that decision without personal investigation, well and good; if you cannot, then go and see for yourself."

The subject of selling policies was dealt with at length by Dr. Pratt, who took up one after another the many technical questions with which the exporters and manufacturers are confronted when they come to decide just what methods they want to adopt in selling to foreign markets. The advantages and disadvantages of selling direct, selling through a manufacturer's agent, and dealing through an export commission house were taken up in turn.

A word of warning was extended to manufacturers who may be planning to dump goods in foreign markets at prices lower than charged in the domestic market. "If you have decided to dump a surplus product in foreign markets at prices lower than those which you charge in domestic markets, have you fully taken into consideration the fact that you have made the definite decision that you are not going into foreign trade?" asked the speaker.

Dr. Pratt maintained that if the manufacturer intended to do business direct he must be prepared to finance his shipments at 90 days' sight or longer. "If you want your money in advance or in cash, you must do business through a middleman," he explained. If the manufacturer intends to deal direct and extend the usual credits, he must also collect some of this information at first hand. And he must be prepared to run the usual credit risks.

### STEAMSHIP SERVICE

We are just in receipt, from the Department of Commerce, of a table showing the steamship companies in service between the United States and South America, Denmark, Netherlands, Norway, Sweden and Vladivostok. This table give the various lines, ports of sailing, ports of destination, average sailing time, approximate tonnage and the number of sailings. We shall be pleased to furnish a copy of this table to any manufacturer desiring the same.

### COSTA RICA CUSTOM DUTY

American Consul Samuel T. Lee, stationed at San Jose, Costa Rica, Central America, calls attention to an important point in packing goods for importation into that country. He explains that in Costa Rica all custom duties are very high and are charged by gross weight, the cases paying the same duties as the goods enclosed, so that the packing must be made as light as possible in order to avoid overcharges in duties and freights. If these instructions are followed, the cost of the goods at place of destination will be reduced in considerable proportion. He cites an instance of a leading American manufacturer who shipped an electrical compensator and switch to a prominent dealer in San Jose. The contents weighed one hundred and thirty pounds, but the gross weight of the case was two hundred and fifty pounds and the volume of the package was three times greater than was necessary. He cites another instance where the extra payment, on account of unnecessary weight of a case, was $18 (gold) on a shipment worth $85.

### WINNER OF HAVANA RACE

**Ralph de Zaldo, Son of Havana Indian Dealer, Who Came First in Recent Cuban 68-Mile Classic**

### HOW TO QUOTE PRICES

A most important feature of export business which American firms often neglect is the quotation of prices c. i. f. European ports. This form of quotation is made by all foreign firms and it should not be difficult for American firms to adopt the same system. Foreign manufacturers ask for c. i. f. quotations in order not only to make comparisons with the prices established by competitors, but also to form an estimate as to the possibilities of handling the goods locally with profit. Quotations f. o. b. cars from some inland city of the United States are useless, as small importers cannot determine American railroad freights, cartage, dock expenses, insurance, and so forth, and thus arrive at the landed cost of the merchandise; nor are they inclined to go to this trouble when they easily can obtain the c. i. f. quotations they desire from any European manufacturer.

### MOTORCYCLES POPULAR IN DURBAN

According to Consul William M. Masterson, of Durban, Natal, Union of South Africa, the motorcycle is the most popular vehicle in that city.

Consul Masterson is certain that an excellent opportunity is offered for American manufacturers of motorcycles to establish agencies in Natal. One American firm has succeeded in establishing a remarkably successful trade, one hundred machines having been delivered and one hundred and twenty more being expected by the agent, and this success is attributed largely to newspaper advertising.

### SHIPBUILDING INCREASE

Cycle manufacturers will be interested to know that a table made public recently by the Secretary of Commerce shows that there has been a large increase in American shipbuilding. On July 1, 1915, there were building or under contract forty-six vessels of three thousand tons or more, with a gross tonnage of 282,718. Contracted for between July 1 and December 1 were fifty-two vessels of this class, with a total tonnage of 323,602, making a total of ninety-eight vessels with a total tonnage of 606,320 tons.

# Of a Personal Flavor

C. E. Brelsford is now the Detroit branch manager for the Thermoid Rubber Co., of Trenton, N. J., makers of brake linings. He was formerly Splitdorf manager at Detroit.

E. F. Daly is now with the Bearings Company of Pennsylvania, a concern in Philadelphia composed of ball-bearing experts, and manufacturing such bearings. Daly for many years was identified with Barthel & Daly, importers of Schafer ball-bearings, but disposed of his interests in that firm some time ago.

G. A. Spohr will manage the Des Moines, Ia., branch of the Firestone Tire & Rubber Co., of Akron, O., for the 1916 season, taking charge on January 1. He succeeds E. B. De Saw, who has been called to the home office to act as district manager.

H. P. D. Cowee is manager of the Atlanta, Ga., branch of the Fisk Rubber Co., of Chicopee Falls, Mass. He was connected with this branch for several seasons.

Melvin J. Adams has joined the forces of Frank Seaman, Inc., advertising agent, and will make his headquarters in the Kresge Building in Detroit, Mich. He was formerly with the Carl M. Green Co. of that city.

Charles Johnson has been made factory equipment manager for the Lovell-McConnell Manufacturing Company, of Newark, N. J. He was formerly special representative for the firm in Detroit, Mich. All factory equipment business will be transacted through the Detroit branch of the firm.

L. K. Rittenhouse has resigned his position as manager for the St. Louis, Mo., branch of the B. F. Goodrich Co., Akron, O., his resignation to take effect on December 31. He was formerly manager of various branches of the Goodrich and Diamond companies.

Frank G. Schenuit, of Baltimore, Md., one of the best-known motorcycle riders and racers in the state and junior member of the firm of Schenuit Bros., 1200 Mt. Royal avenue, local distributors of the Pennsylvania Vacuum Cup tires, has just attained his majority and is receiving congratulations from his business and social friends. Schenuit has a large number of silver cups and other trophies captured at various motorcycle meets.

## MOTORCYCLE THIEF IS CAUGHT

NEW YORK, N. Y., Dec. 26.—The sprinting ability of Policeman Patrick Walsh, plus a great deal of slush on Columbus avenue, this city, resulted in the capture of George De Boise, a motorcycle thief, in spite of his efforts to get away. The machine was standing on the corner, unattended, when De Boise jumped on it and started to pedal away. Some schoolgirls coming from class saw the act and gave the alarm. Their cries attracted the notice of Walsh, half a block away, and in short order he was on the thief, being helped somewhat by the fact that the sloppy snow prevented the machine from gathering headway. He was joined by the owner of the machine, David McCoss, and both motorcycle and thief were secured. De Boise was remanded for sentence in the district court in the afternoon.

## UNUSUAL FEATURES IN LATEST "HONEST INJUN"

NO matter what the taste of the reader of "Honest Injun," there will be much of interest for him in the November-December issue of this excellent house organ of the Hendee Manufacturing Company, of Springfield, Mass. The first article in the issue is one by Factory Superintendent T. L. Loose, and treats of the manufacture of Indian motorcycles. The variety of operations which the component part of the Indian must undergo before entering into the composition of the finished machine are briefly described and will astonish many who are not familiar with production of a high class. The article demonstrates as well the thoroughness throughout the factory.

Novel uses of Indians throughout the world occupy many pages of the issue and each is accompanied by a timely illustration. The center pages are taken up with a clever cartoon and there is a prose ballad on the cradle spring-frame in addition. An interesting feature is the record of the first Powerplus motor from August 26 to November 9, the total mileage on the latter date being 15,747, and the motor is still running.

## RIDERS OF BOTH SEXES ENJOY THE PASTIME IN EAST AND WEST

# "BICYCLE DAY" TO MAKE SALES RECORD

## Dealers, Jobbers and Manufacturers Will be Asked to Cooperate in Boosting Bicycles Sales for "Bicycle Day," Set for Feb. 29; New Departure Mfg. Co. Proposes Plan

NEW YORK, N. Y., Dec. 29.—Bicycle sales history will be made on Tuesday, February 29, which has been set aside as "BICYCLE DAY." On that day bicycle dealers, jobbers and manufacturers will be asked to co-operate in rolling up a sales mark that will smash all other figures to smithereens.

### Full Details Later

This is the plan just announced by the New Departure Mfg. Co., of Bristol, Conn., makers of the New Departure Coaster Brake. Full details, outlining various methods whereby dealers can boost their trade, will be given out later.

All sorts of live wire selling methods and advertising copy with real punch in it is now in the course of preparation, and all dealers and jobbers will be invited to make use of this boosting material. The New Departure Mfg. Co. firmly believes that it can secure the assistance of all other manufacturers in furthering the interests of "Bicycle Day" and has already secured assurances from some of the most prominent concerns in the cycle trade that they will do all in their power to make "BICYCLE DAY" a huge success for all concerned.

### All to Pull Together

Much will of course depend on the dealers and the jobbers, who will be asked to lend every effort in co-operating with the manufacturers. The jobbers can urge their dealers to get into line heart and soul and work hard and consistently toward bringing up the sales mark to "one million bicycles in 1916." The dealers by making use of the material which the manufacturers are now whipping into shape for "BICYCLE DAY"—advertising their machines, getting up striking window displays, keeping after their prospects with sales compelling letters, posters and booklets, making their stores look neat and attractive—will be the biggest factors in crowning "BICYCLE DAY" as the greatest sales day that the cycle trade has ever witnessed.

As an instance of what live, progressive salesmanship will do for every bicycle dealer a recent experience of Mr. J. W. Grady, of the J. W. Grady & Co., bicycle manufacturers of Worcester, Mass., reveals some very interesting results. Mr. Grady went into the store of a retailer to get his order, and the proprietor wanted to give him the usual order of fifteen machines. The store is splendidly located, and Mr. Grady realized that the dealer was making no effort to get an increased bicycle trade, but was simply getting the business which happened to come his way.

Mr. Grady wanted to show the dealer how he could greatly increase his sales. He, therefore, asked the dealer to let him take charge of bicycle advertising. Mr. Grady said that he would send down a hundred machines from his factory and promised to sell everyone of them right from the dealer's store. The only condition he imposed was that the dealer would not interfere with his plans.

### Gets Bicycle Publicity

The dealer agreed and the bicycles were shipped down a few days later. The first thing Mr. Grady asked for was the use of the whole of the dealer's large show window. This appeared to be a preposterous

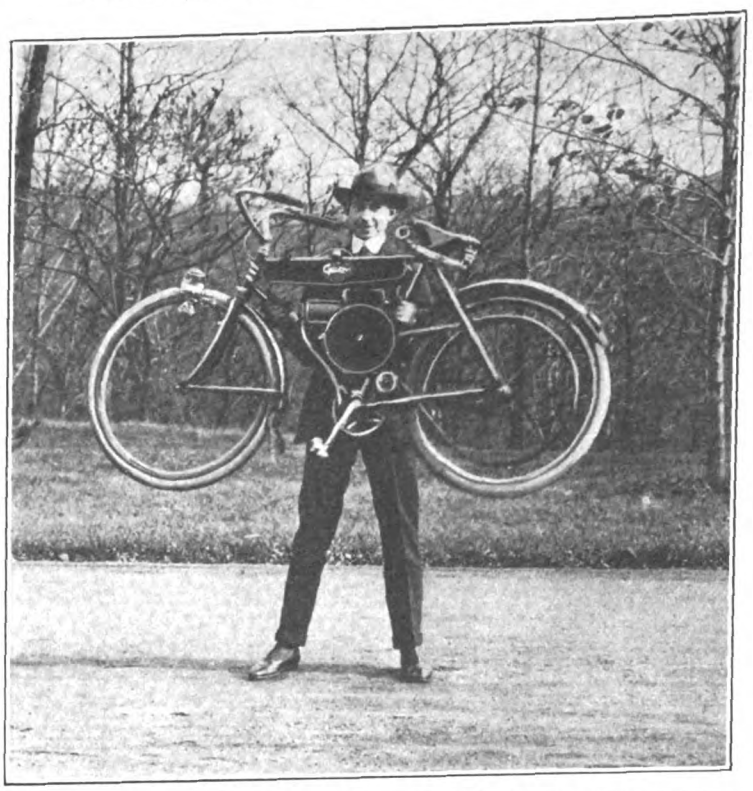
DEMONSTRATING THE CYCLEMOTOR'S LIGHTNESS



Pub. Mgr. Perrin, of the Cyclemotor Corp., of Rochester, N. Y., Holding Up a Cyclemotor-Equipped Machine with Little Effort

## CYCLISTS HOLD XMAS PARTY AND PLAN RACE

NEW YORK, N. Y., Dec. 28.—A Christmas Tree Party was held for the benefit of members of the New York Division of the Century Road Club Association at its clubhouse at 307 West 54th street on Friday evening. About fifty members gathered for the festivities. There was a Christmas tree in the center of the room which reached to the ceiling, lit with tiny candles and decorated with candied apples, canes and sweetmeats as well as some small Santa Clauses.

**Prizes for First Century**

To the first member of the Century Road Club Association reporting the first hundred miles, otherwise known as a Century, starting the New Year, will be awarded a trophy donated by the National Treasurer John M. Mitchell, of Greenwich, Conn. To the second and third members of the New York Division of the Century Road Club Association reporting the first and second Centuries of the New Year will be awarded a club sweater.

New Year's morning at ten o'clock at 162nd street and Jerome avenue, in Bronx Borough, is the starting time and place of the annual New Year's Day race of the C. R. C. A. for the possession of the two-year trophy. The course lies over the Concourse to Fordham Road and to the Junction of Pelham Road and Eastern Boulevard at Pelham Bay Park and return, an approximate distance of 18 miles. So far, Arthur Morgan and Anthony Desimone have won the trophy once each, and if either of the above two are successful this time, the trophy will permanently become his.

The final weekly point race of the New York Division of the Century Road Club Association, which resulted in a win for George Harvey, placed Harvey on an equal footing with Raymond Caldwell, both thus having 13 points. A match race to break the tie resulted in Caldwell coming in first, giving him 15 points.

## NO BIKE TRACK FOR JACKSONVILLE

NEWARK, N. J., Dec. 28.—There is small chance of there being any racing at Jacksonville this winter. John M. Chapman, the Newark promoter, journeyed to the Southern city for a chance to locate a Sunday track, but Sunday laws do not allow of sports on that day so the project will probably be dropped. The mayor of the city and the Commercial Club were with Chapman, but that others were against Sunday racing. Chapman will now rest on his Georgia farm for the winter, and the bicycle riders, unless the proposed Chicago six-day race is staged, can engage in hard and honest toil until the Velodrome opens at Vailsburg.

## HAMMITT WINS FIRST N. C. W. ROLLER RACE

SAN FRANCISCO, Cal., Dec. 25.—Walter Hammitt proved to be the fastest man in a series of races held last Saturday evening on home trainers at the headquarters of the New Century Wheelmen. Hammitt's time for the two miles was 2.33. There were fourteen entries and an unusually large crowd attended.

The summaries of the heats are as follows:

| | | Time. |
|---|---|---|
| 1. | Walter Hammitt | 2:33 flat |
| 2. | A. Sangalli | 2:45⅗ |
| 3. | C. Laye | 2:46 |
| 4. | L. Drury | 2:46⅖ |
| 5. | M. Castillo | 2:46⅘ |
| 6. | P. Morgan | 2:48⅗ |
| 7. | J. Coughlan | 2:50⅘ |
| 8. | H. Spence | 2:51⅗ |
| 9. | R. Welch | 2:52⅕ |
| 10. | W. Rhodes | 2:52⅘ |
| 11. | G. Graner | 2:53 |
| 12. | V. Spence | 3:02⅗ |
| 13. | W. Penaluna | 3:03⅗ |
| 14. | H. De Brie | 3:05⅕ |

This being the initial home trainer race of the indoor season, the California boys consider the time quite fast. There were gold and silver bars up for the first eight riders.

## WANTS CYCLE CHAMPIONSHIPS

KINGSTON, Ont.—A campaign has already been started by local bicycle enthusiasts for bringing to Kingston the 1916 National championships of the Canadian Wheelmen's Association. An application has been sent to the C. W. A. officials at Toronto.

Norman Knight, formerly a crack Toronto bicycle racer, has donned the uniform as a member of the 34th Battery, C. F. A., now in training here for overseas service. He is the twenty-seventh Canadian racing cyclist to join the colors for foreign duty.

Charlie Hewlett, of the 59th Battalion, C. E. F., left for the front three weeks ago. He was formerly a prominent member of the Toronto Bicycle Club.

## SPECIAL PRICES FOR XMAS

CLARKSVILLE, Tenn.,—The A. C. O. Drug Company, of this city, made a special reduction on its Crescent bicycle during the holidays. The $35 wheel bearing the firm's nameplate, was also sold for $30. In spite of the fact that it is unusual for a drug firm to handle bicycles, the A. C. O. Company has made a big success with its lines.

## FINE CHRISTMAS OUTPUT

LOUISVILLE, Ky.—Christmas business with the Al. Ray Company, of 110 West Market street, has been better this season than ever before in the history of the bicycle and supply house. The company is a firm believer in local advertising and uses a good deal of space in all the daily papers.

## ANOTHER BUTLER COUNTY DANCE

HAMILTON, Ohio.—The Butler County Cycle Club is planning to give another dance in the near future. The latest event of this sort proved popular. The activity of the club on the social side during the winter season has resulted lately in the addition of a number of new members.

# FRANK KRAMER'S LIFE STORY

## Initial Installment of the First Authorized Story on the Great American Champion's Career

### Kramer's Early Days As An Amateur Cyclist—How "Big Steve" Got Into the Limelight

By HARRY MENDELL

SEVENTEEN years a champion, that is the record of Frank Louis Kramer, the greatest cyclist in the world and one of the most wonderful athletes the world of sport has ever seen. It was back in 1880 that Kramer first saw the light of day, being born in Evansville, a little town in Indiana, on the twenty-first day of November. Kramer is now just a wee bit over thirty-five years old. He is truly a marvel of the athletic kingdom, having been in the public's eye and played a conspicuous part in the cycling of the world for the last nineteen years.

**In Class By Himself**

There have been other athletes who competed in sport for as long a time as this wizard of the wheel, but none have ever approached his record of seventeen consecutive championships. Kramer has been the amateur champion of America for two years; he has won the professional championship for fifteen years in succession and in 1912 he won the cycling championship of the world.

"Big Steve," as he was nick-named by the late Floyd McFarland, is a clean liver and a model for the younger element of the country in all branches of sport. In his home town he is known and looked up to by every one of the 40,000 inhabitants. Kramer has the following to say to the youngsters who have hopes of some day becoming great bicycle riders:

"Early to bed is the secret of success. Get into the hay by 9:30 o'clock every night and have eight or nine hours' sleep. Do not touch tobacco, and above all, let intoxicating liquors alone. Always be ready to take advice and a great deal can be learned by watching the other fellow ride. As soon as I finished a heat or a race in my early days I would immediately take up a point of vantage somewhere on the side of the track and see what I could gather by watching the stars circle the track."

Kramer's rise in the bicycle world was very rapid. It was in 1897 that Frank won his novice. The following year, in 1898, he was crowned the amateur champion of the United States. In 1899 he easily repeated the trick. Kramer was just eighteen years old when he annexed the amateur championship, which at the present time is held by Hans Ohrt.

At twenty Kramer entered the professional ranks and was runner up to the sensational colored rider, Major Taylor, for the national championship. He put up a hard battle with the colored demon, but was beaten. The next year, which was in 1901, Kramer, after another stiff fight, won the professional championship of the country which he has held for fifteen years, right up to the present time. Though he is conceded to be the best rider in the world, "Big Steve" has only captured the world's cycling championship once. This was in 1912 when it was contested in this country. In 1905 Kramer visited Europe and succeeded in defeating practically all of the stars on the other side of the Atlantic. Once again in 1912 the American marvel visited foreign shores and made another clean up, winning the majority of his races and trimming all of the foreign cracks.

**This Is the First Photo of Kramer, Taken at the Age of 17, After He Had Been Riding for Two Years**

During the past year the American champion rode as strong and as fast as ever. He was in rare form and after a hard season won the national honors from Alfred Goullet, the popular cyclist from Australia. Kramer also won a set of races staged as the world's championships. They were run as such, because of the war now raging in Europe, which prevented bicycle races. The world's series of races this year were contended among the best riders in America and Europe. Kramer easily proved to be the superior cyclist of the big field of premier riders.

**Came East Because of Health**

When the Kramers were living out in Evansville, Ind., Frank's health was in a very precarious condition. He was a delicate child and no one thought that he would ever become the strong and robust man that he is today. It was primarily on the advice of a physician that the Kramer family moved east in 1893, and soon after they took up residence in Newark, N. J., Frank learned to ride a bicycle for the sake of exercising out in the open air.

Kramer points proudly to the first day that he rode a bicycle. It was back in 1895 when his uncle, August Eickhoff, then a bicycle manufacturer in New York, presented the future champion with a brand new wheel.

"I was never taught how to ride," he once told his friends, speaking of his early days in cycling, "nor did I have any one to help me mount my first machine. I just got on the two-wheeler, and managing the 'steed' seemed to come to me naturally. I liked riding so much the first day, that though members of my family were scouting about Newark to get me home for supper the lure of the wheel was too great. I kept right on riding until pretty late that night, and when I finally got back to the house, the folks were certainly astonished to find that a delicate child should become so fond of wheeling. Every clear day thereafter found me on the road."

Digitized by Google

Kramer was content with spinning around the city streets until in 1896 when he essayed a century run. It was held by the Kings County Wheelmen and started from in front of their club house, in Brooklyn. The run was out to Patchogue, Long Island, and back. There was no competition to the run but a good stiff clip was hit up all the way. There was a big field out and the riders were divided into a fast group and then a slower one. Kramer rode along with the faster members of the club. Each contestant who finished received a medal and Kramer is proud to show this today as the first medal he ever was awarded.

**Showing Off His Medals**

While riding in road races from 1895 to 1897 Kramer attended the South Eighth street school in Newark. Some of Newark's most wealthy and influential business men remember attending classes with Frank and looking with envy on the medals he carted to school to show the boys who gathered around him.

Kramer did not start on his racing career like a great many other knights of the wheel who enter in a blaze of glory. He rode in two novice races before he won his novice. This big day came in 1897 at a meet of the Union Cycle Club held at the old Clifton track, at Clifton, N. J. Frank rode to Clifton to enter this race and pedalled back home again with his medal for winning the novice race tucked safely away in his pocket.

Frank came into national prominence in 1898 as a result of a big meet that was held at White Plains, N. Y. It was one of those gatherings at which fat juicy prizes are hung up. Considerable prominence was given to the meet because of the fact that it was on the Fourth of July.

Kramer celebrated the Fourth in good old American style and made a great clean up in the amateur ranks. M. T. Dove, the colored rider, who hailed from Bloomfield, N. J., and who is remembered well as being one of the top notch amateurs at that time, was Kramer's strongest rival. The East Orange rider has today two cups and six medals which he won at that meet in the different events.

**Was Crack Amateur**

Frank showed his merits and speed as an amateur in Newark at the meets conducted by the old Atlanta Wheelmen, and he has medals and other prizes still in his possession which he won in these races. It was in 1898 that Kramer made his bid for the amateur championship. He had gone through two seasons of preparation and he found that he could show his rear wheel to the boys riding against him. From the time Kramer mounted a bike until he took down the amateur championship there were not any youngsters who stood any chance at all with him in a sprint race. With the determination that has characterized his riding in late years he went out after the title hung up by the League of American Wheelmen. Kramer captured the championship in a walk and repeated again in 1899. In 1898 Kramer was riding an Eclipse wheel when he won the title. Earl Peabody finished in second place and Charley Ertz was third.

**Wins Amateur Championship**

A two-day meet was run on September 9 and 10 at Berkely Oval, in New York, in 1899 for the amateur championship. Kramer won the quarter-mile, one-mile and five-mile race while he finished second in the half-mile event and was not a starter in the two-mile race. George H. Collett was the runner up to Kramer in 1899.

When Kramer won his second title he rode the Pierce bicycle and continued to ride this wheel until 1910 when he switched off to the foreign bikes. At the start of the 1915 season Kramer once more took to a special model of the Pierce made to his design.

*(To be continued)*

## "BICYCLE DAY" WILL MAKE SALES RECORD

*(Continued from page 31)*

request. But the Worcester manufacturer finally won out and got up a crackerjack window display. Then he advertised in the local papers and used other well known means of obtaining publicity for the bicycle and boosting sales.

The result was that the dealer sold more machines during the one week of this sales campaign than he had sold during the entire previous year. And the net results of this campaign showed that the dealer had sold in all four times as many machines as he did the year before.

**Increase of Worcester Sales**

Sales boosting work of this sort, according to Mr. Grady, has been done by a number of bicycle dealers in Worcester; and the sales of bicycle in that city for 1915 increased from 200 to 800.

What has been done in Worcester can, the New Departure Manufacturing Company believes, be accomplished in nearly every other city of the United States. And "BICYCLE DAY" will be the first move in boosting sales the country over.

# BICYCLE DAY, FEBRUARY 29th, 1916

**MOTOR CYCLE ILLUSTRATED, incorporating the Bicycling World & Motorcycle Review, is heartily in sympathy with the plan announced elsewhere in this issue by one of the brake manufacturers to take advantage of the odd day in the leap year by making it a national bicycle day. The idea is as ingenious as it is practical, and the publishers of this journal propose to do all in their power to help make it a success.**

**In order to insure the desired consummation, the most energetic co-operation of cycle dealers in all parts of the country is absolutely necessary. We shall do all we can to enlist the moral support and the practical assistance of the thousands of cycle dealers in the United States. Beginning early in January, a special campaign will be inaugurated, concluding on Thursday, February 24th, with a big, vital and important**

## BICYCLE NUMBER OF MOTOR CYCLE ILLUSTRATED

**Bicycle Day is a big idea, replete with splendid possibilities, and we feel safe in prophesying that the proposition will have the unanimous support of the entire cycle trades. We hasten to assure the cycle manufacturers that MOTOR CYCLE ILLUSTRATED may be counted upon to do its share toward making Bicycle Day an epochal event in the history of the industry. It is a constructive plan, and only the right sort of co-operation all along the line is needed to make it a record-breaker.**

**NATIONAL BICYCLE DAY,**

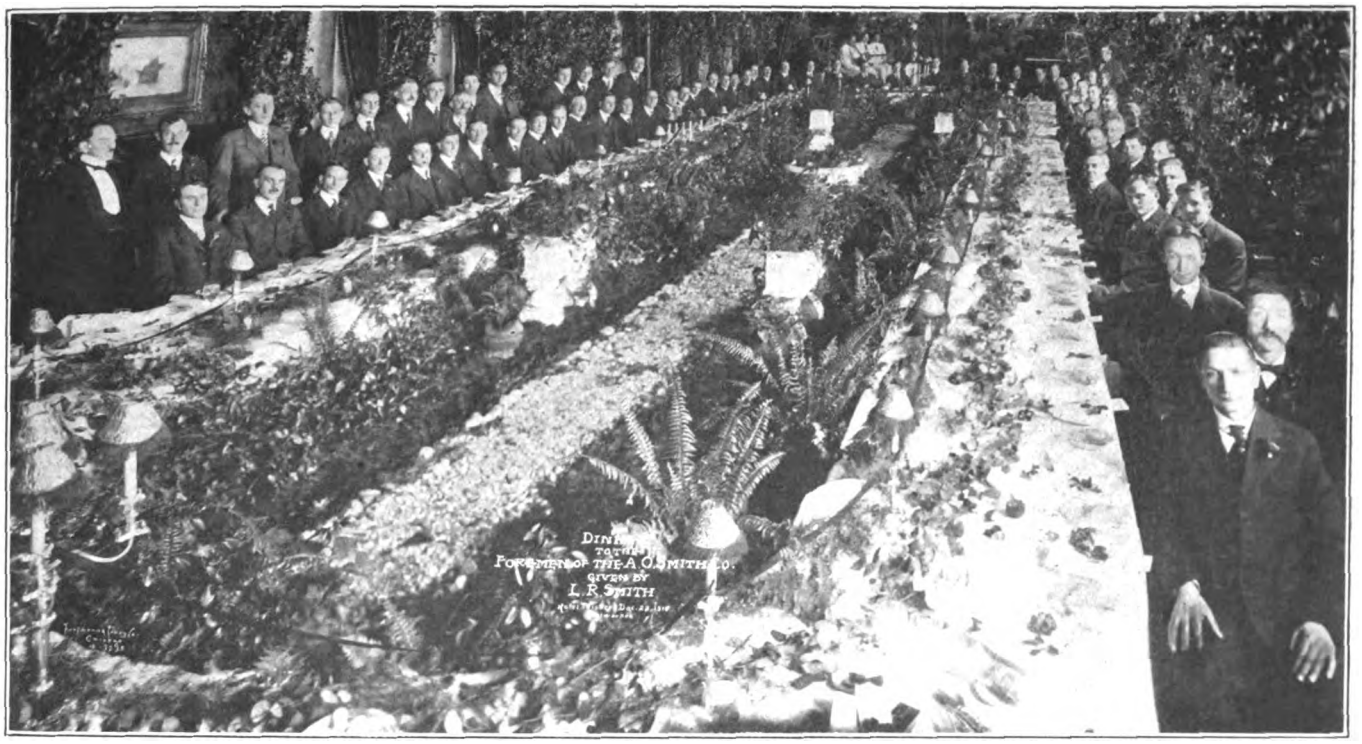
# PRESIDENT SMITH TENDERS BANQUET TO FOREMEN



**Just Before the Elaborate Banquet Given to the A. O. Smith Co. Foremen, at Hotel Pfister, Milwaukee, on December 22**

MILWAUKEE, Wis., Dec. 27.—L. R. Smith, president of the A. O. Smith Company, manufacturer of the Smith Motor Wheel, tendered his foremen a banquet in the Red Room of the Hotel Pfister, Wednesday night, December 22. Seventy-five guests sat down to one of the most elaborate dinners ever served in this hotel, Milwaukee's foremost and most exclusive hostelry. In addition to the twelve course dinner served there was a large program of instrumental music, vocal solos and duets, recitations and monologues rendered during the dinner.

### Room Beautifully Decorated

The banquet room was a veritable garden beneath a bower. The ceiling and walls of the room were thickly covered with smilax and blossoms. Protruding through were pretty yellow electric lights. Down the middle of the table, which was oval shaped, was a gravel path with beds of flowers on both sides, and in the center of this gravel path was a pond with a fountain merrily at play.

Following the dinner, speeches were made by superintendents of the factory and company officials.

The banquet was a testimonial of President L. R. Smith's gratitude towards his factory men for the loyal co-operation that is being extended to him while the plant is going at high speed, the A. O. Smith Company now employing close to 1800 men running day and night shifts and producing three times as much today as a year ago.

"This has been a year which has gone beyond any since the company was organized twelve years ago," said President L. R. Smith in an interview before the banquet. "We are employing 1800 men today, about 600 more than normal conditions require.

"Our business reflects the prosperity of the country—it is a good barometer of business conditions. Where we in normal times use 18,000 tons of steel, we used 40,000 tons this year, an average of approximately 4,000 tons a month; and we shall average close on to 5,000 tons before the new year is far gone.

### Keeping Abreast of Demand

"Much of this is for our Motor Wheel, which department of course shares largely in our general business increase and although the steel mills have sufficient orders to tie them up beyond June of next year, our contract with them guarantees us a continuous supply of steel. Therefore, the manufacture of the Smith Motor Wheel is keeping abreast with the increasing demand and our large production facilities, together with our proposition with the steel mills, insures our dealers plenty of machines and prompt deliveries.

"1916 is going to be an immense surprise. The most optimistic dealer cannot imagine the great prosperity that will shower down upon us in 1916."

An elaborate place card was given to each of the diners. On this appeared the menu, pictures of the A. O. Smith plant, and the entire factory force, a number of happy "Smith" songs written for popular tunes, and a list of all the guests who were present in full number at the monster banquet.

## MAKES MOTOR WHEEL LEADER

LOS ANGELES,, Cal., Dec. 27.—J. A. Benson, who handles the Smith Motor Wheel in Southern California for the Appeal Manufacturing & Jobbing Co., is back from a trip in the territory between Los Angeles and the Mexican line, enthusiastic over the activity of agents and the success they are winning. George Post, of Santa Ana, has been particularly successful as a result of his advertising, window display, and demonstrating. He pushed an automobile with two wheels hooked up behind the machine from Santa Ana to Orange and back, and the public is so interested and sales are coming in so fast that he figures 1916 will bring him at least 50 to 75 orders. Post, when approached by Benson last summer, would not even come out to look at the Smith Motor Wheel, nor listen to Benson when he tried to talk about it. Now actual results have caused him to feature it as a leader.

## BOOSTED CYCLES AS GIFTS

LOUISVILLE, Ky.—Coleman B. Long, Louisville agent for the Flying Merkel, took part in a full page co-operative advertisement in one of the local papers shortly before Christmas. Under the head of "Christmas Suggestions," Long's advertisement boosted Flying Merkels and Cleveland bicycles as gifts for Christmas.

## DADDY ISN'T ALWAYS RIGHT

WAVERLY, Mass., Dec. 27.—"For a strong, fast, easy-riding, reliable wheel, I advise the Columbia," says Arthur Jorgenson, of Waverly, Mass. This, after his father, an expert mechanic, told him that the Columbia racer he had was too light to be practical. He has now ridden it on the road for more than two years, under all sorts of conditions.

Jorgenson tells that on July 4 and 5 last, he rode from Boston to Albany, pedalling for 9¾ hours on the first day, and 10½ hours on the second. He rode up every hill, got lost twice, was caught in a rainstorm in the Berkshires, but still averaged ten miles an hour for the trip.

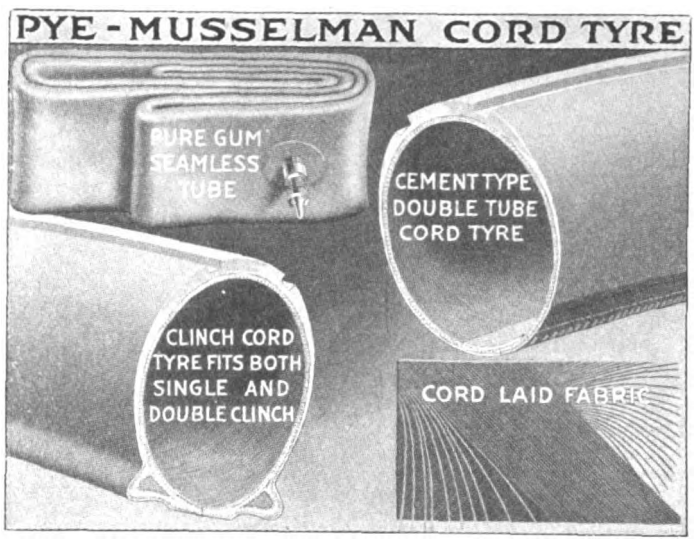
# TIRES THAT HAVE SMASHED RECORDS

CHICAGO, Ill., Dec. 27.—A tire that has broken seventeen world's records, which almost every champion of America and Europe uses, which has won all three of the six-day races this year and helped to break the previous records for long grinds—these are the achievements of the "Pye Musselman Cord Tyres." When riders the country over first heard that these tires had performed so well, they kept on sending inquiries to the factory only to learn that the output was all being used up by racers and a small number of lucky amateurs. But owing to the constant demand of the cycling public for the Pye-Musselman tire, the factory of the Cycle Mfg. & Supply Co., Chicago, has increased its facilities and is now in a position to supply riders, dealers and manufacturers with their tires in any quantities.

Perhaps one of the most interesting facts that the visitor to the plant of the Cycle Mfg. & Supply Co. would learn is that the Pye Musselman tires are all subjected to an air pressure of 150 pounds. As a result of being able to withstand this high pressure, these tires have performed so remarkably both on track and road.



**Showing the Construction of the Pye-Musselman Tires**

### Cords Not Woven

Sea Island cotton cords are used for the body of the tires, and are closely twisted before being used to insure their having greater strength and resiliency. The fabric which furnishes the foundation for these tires is not woven, but is made by laying the cords side by side on the outer circumference of a drum. After the cords are laid diagonally on the drum, they are covered with rubber gum which hold them together. Having dried sufficiently, this is taken off the drum, and the sheet then is folded doubly, giving a fabric in which the cords are criss-cross.

Using this sheet as the foundation, the outer covering of rubber is put on. In the clincher type of tire the beads are made part of the outer covering, while in the cement type the edges are laced together. Para rubber is employed for manufacturing the inner tubes, which are strong enough to endure the big pressure referred to above, and yet so thin that they can be stretched so that one may see objects through them.

### New Road Tires

After increasing its factory facilities, the Cycle Mfg. & Supply Co. decided to cater to road riders as well as to racing men. Following out its new policy, this Chicago company has now put on the market two types of road tires. "The Clincher Road Tyre" and the "Cement Road Tyre." But the construction of these road tires does not differ from the racing types fundamentally, but only in the fact that they have the usual road tread.

The road tires are, of course, much heavier than the racing types. Among the latter is the "Silk Sprint Tyre," the fabric of which is made of silk cords instead of cotton. This style of tire has been used very successfully in a number of important events. Champion Frank Kramer uses "Silk Sprint Tyres" in all of the larger races in which he enters. Though the weight of these tires per pair is but 6¼ ounces, Kramer puts a 150-pound pressure in them.

The other Pye-Musselman racing tires are the "Regular Track Tyres," the "Six-Day Tyres" and the "Track Sprint Tyres." The sprint tires weigh 12 ounces per pair, the track tires 1 pound, and the six-day tires 1 pound and 3 ounces.

## TRENTON'S BABY CYCLISTS

TRENTON, N. J., Dec. 24.—Though they are only five years old, the two baby cyclists shown in the accompanying illustration, handle their mounts almost as skillfully as an older rider. More than one country trip at ten to fifteen miles have these youngsters taken. Both Peter Rebeca and Octavio Agabite (these are the real and not stage names of the babies) ride at the racemeets attired in the conventional costume and are always showered with hearty applause by the spectators.

**Two New Jersey "Comers," Who Appear on Road and Track**

## OUTLOOK FOR ROLLFASTS IS FINE, SAYS HARRIS

NEW YORK, N. Y., Dec. 24.—Just back from his annual trip to the Pacific Coast, President D. P. Harris, of the D. P. Harris Hardware Co., of this city, reports a fine outlook and an unusually attractive lineup of business in "Rollfast" tires. "Never saw the trade in general in a more optimistic mood," said the traveler smilingly as he checked out on time at the home offices. "Big business is looking up everywhere and the various trade branches are following suit. I am convinced that the 1916 season will be the best Rollfast tires have had in years—and that's going some."

During his trip Mr. Harris appointed the following jobbers to sell the Rollfast line, in addition to a strong lineup of dealers:

Hub Cycle Co., Boston, Mass.; J. W. Grady & Co., Worcester, Mass.; New York Sporting Goods Co., New York City; City Supply Co., New York City; Keyser Fry, Reading, Pa.; Geo. W. Robb, Philadelphia, Pa.; Miller Company, Philadelphia, Pa.; Henry Keidel & Co., Baltimore, Md.; Walthour & Hood, Atlanta, Ga.; McGraw Bros., Jacksonville, Fla.; Johnson & Mayer Co., Memphis, Tenn.; Geo. H. Westing Co., Indianapolis, Ind.; Towley Metal Hdw. Co., St. Louis, Mo.; Lee, Coit, Andreesen Hdw. Co., Omaha, Neb.; M. L. Foss, Denver, Colo.; Appeal Mfg. & Jobbing Co., Los Angeles and San Francisco; Washington Cycle Supply Co., Tacoma, Wash.; Hall Williams Co., Minneapolis, Minn.; Detroit Cycle Supply Co., Detroit, Mich.; Sportsmen Supply Co., Pittsburgh, Pa.; W. H. & L. C. Wolfe, Altoona, Pa.; Stambaugh, Thompson Co., Youngstown, Pa.

Stanley Wilson, who has just returned from a Southern trip in the interest of Rollfast tires, states that Mr. Harris' comment on trade conditions goes double.

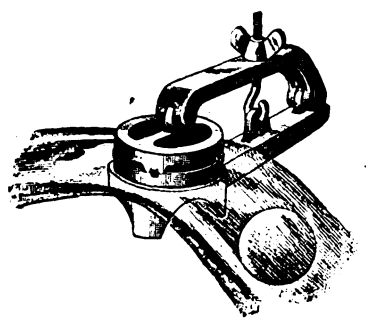
# With the Manufacturers

## NEW MARVEL VULCANIZER IS LIGHT AND EFFECTIVE

CLEVELAND, O.—The Marvel Accessories Mfg. Co., of West Sixth street and Lakeside avenue, this city, is producing the Marvel Junior vulcanizer, which is particularly adapted for motorcycle use. It is small enough to fit the pocket and at the same time amply large to quickly and permanently vulcanize any puncture, either on the road or in the garage. Its weight is but 12 ounces and its price is $1.

The Marvel Junior vulcanizer consists of a pair of cylindrical pieces, the lower one of which forms a clamp or rest and has



**Marvel Junior Vulcanizer**

feet to keep it in a level position. This piece has an arm to which is hinged a second arm carrying the upper piece, which acts as the heating member of the apparatus. The correct tension on the tube being treated is maintained by a screw and wing-nut device.

With this vulcanizer there is no flame to burn the tube and no gasoline or alcohol used. The vulcanizer is very economical, there being enough material with each outfit to more than pay for itself. The vulcanizer will not blow out in the wind. Experience is unnecessary with the outfit, and the maker states that anyone than can light a match can operate the Marvel Junior vulcanizer.

## RETIREMENT AND INSURANCE PLANS FOR GOODYEAR

AKRON, O.—In a Christmas statement to employees, the Goodyear Tire & Rubber Company announces the establishment of a plan of retirement awards, and also a group insurance plan for Goodyear workers of both sexes. The firm has in operation already, a plan whereby members of the office, sales and factory divisions who show conspicuous ability are made "young partners" by acquiring common stock in the company. A home-building plan has also been worked out with success.

The retirement awards make provision for stated monthly payments for life to men who have reached the age of 70 and to women who have reached 65 years. There is also a condition by which old Goodyear employees may retire, with awards, under the age limits given. Under the insurance plan, all employees of the company are eligible.

In brief, Goodyear will give any employee upon the payroll an insurance policy for $1,000, free of cost, provided the employee is or becomes a member of the Goodyear Relief Association. This association provides sick and disability insurance. It is of long standing in the Goodyear organization.

"The officers and directors," says the statement, "appreciating the spirit of foresight manifested by certain men associated with the organization, and believing that life insurance is one of the best means of providing for the future, herewith presents a life insurance plan."

"The directors also feel that persons who have spent continuously all or many of the most useful years of their lives in giving their energy and efforts to the common good of the organization are worthy of consideration from the company after their useful years are past and their ability to earn sufficient money is gone."

## WINS COVENTRY CHAIN PRIZE

NEW YORK, N. Y.—The national sales competition in the Coventry chains for the $100 prize offered by the H. F. L. Funke Co., of 116 Broad street, this city, has resulted in the awarding of the money to H. W. Smith, of Los Angeles, Cal. Mr. Smith sold 2,000 feet of this product during the contest, which was open to all salesmen connected with jobbing houses from October, 1914, to October, 1915.

The outcome is decidedly to Mr. Smith's credit, as he was pitted against the entire country, much of which has considerably more populous territory than his section of California.

## INSTRUCTIVE FIRESTONE BOOKLET

AKRON, Ohio.—One of the finest advertising booklets ever issued by a concern in the rubber trade is being prepared by a Hamilton printing house for the Firestone Tire & Rubber Company. The booklet will describe fully the process of manufacturing tires in every stage, and a large edition will be prepared for distribution to the trade and to tire users in general.

## DIXIE HIGHWAY TIRE CO. FORMED

ATHENS, Tenn., Dec. 24.—Wallace Duff, a former citizen of this city, who for several years has been in the West, has returned, and organized a new tire manufacturing concern to be known as the Dixie Highway Tire Co. The organization has a capital stock of $25,000 and will erect a plant in Athens to manufacture automobile as well as motorcycle tires.

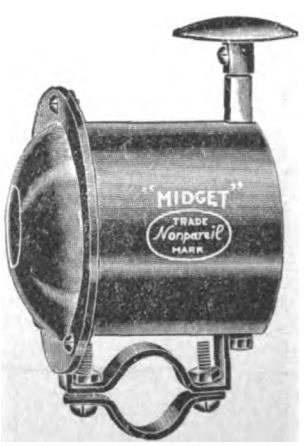
## THE WHEELER & SCHEBLER EXPORT POLICY

FROM Wheeler & Schebler, of Indianapolis, Indiana, manufacturers of the well-known line of Wheeler & Schebler carbureters, comes the statement that the firm has no special export proposition to make, and that the business in each country is handled in keeping with whatever the local trade conditions happen to be. Supplementing this policy, however, are the company's export branches in London and in South America. The company explains that it is glad to co-operate with any foreign representatives who are seeking American goods, and to deal with them directly in order to build up a sound and permanent export trade. George T. Briggs is sales manager of the company.

## NEW MIDGET HAND HORN FOR BICYCLES AT $1.50

NEW YORK, N. Y.—The Nonpareil Horn Manufacturing Company, of 73 Wooster street, this city, is bringing out a hand-operated mechanical horn for bicycles, known as the "Midget" hand horn. This horn is a lilliputian reproduction of an automobile horn of the mechanical type and weighs but 14½ ounces. It is priced at $1.50.

The horn has a cylindrical body with forward enlarged section to carry the diaphragm and novel sound-intensifying means. It measures 3 inches over all. The diameter of the enlarged section or face is 3¼ inches. The plunger is fitted with a large button or handle, giving a good, firm grip to the hand. The plunger works downward to give the volume of sound which characterizes this horn. The bracket



**Midget Hand Horn**

is attached at two points on the body of the horn and is of the full clamp type, ensuring a firm grip on whatever member of the bicycle frame it is attached. The horn is finished in black enamel. A substantial guarantee goes with each horn.

# FIRESTONE IS GIVEN INJUNCTION AGAINST RAINCOAT COMPANY ON USE OF NAME

CLEVELAND, O.—The Firestone Tire & Rubber Company, of Akron, O., has been granted a perpetual injunction restraining a raincoat company from using the name "Firestone." This raincoat company was operating stores in Cleveland, Indianapolis and Detroit under the title of the "Firestone Raincoat Company." Decision was made by Justice Vickery in the Court of Common Pleas of Cuyahoga County, sitting at Cleveland.

The injunction reads as follows:

"It is ordered that the plaintiff have permanent injunction, as prayed in its petition, and the defendants and each of them, their agents, servants and employees, are permanently restrained and enjoyed from in any form or manner using or employing the name "Firestone" in connection with the business now or hereafter conducted by them, and from in any form or manner advertising, offering for sale, selling, manufacturing or dealing in, under the name "Firestone" any rubber goods, raincoats, or any other article purporting to be made wholly or in part of rubber. And it is considered that the plaintiff recover of said defendants its costs therein. Judgment is rendered against the defendants for plaintiff's costs herein."

### DIRECT CLEVELAND SHIPMENTS

NEW YORK, Dec. 27.—Herbert F. L. Funke, Eastern distributor for the Cleveland lightweight, advises that all orders for his territory are being filled direct from his stockrooms at 112 Broad street, New York City. This arrangement immensely facilitates deliveries in the states for which the Funke company is distributor.

### FISK BRANCH FOR RAPID CITY

RAPID CITY, S. D.—The Fisk Rubber Company, of Chicopee Falls, Mass., has leased offices in the Elks Building in this city as headquarters for a branch, beginning on January 1. From these offices a force of travellers will work this State and those adjoining. Delivery of small lots of tubes, tires and accessories within the office's district will be made by parcel post.

### NO TROUBLE WITH FIRESTONES

PHILADELPHIA, Pa.—The Excelsior motorcycles which finished in first, second, third and fifth places in the 75-mile race staged at the Belmont track, Philadelphia, recently were Firestone-shod. Despite the severe grind the tires gave no trouble.

### GREATER THAN EXPECTED

NEW YORK, N. Y.—The Reeps Manufacturing Company, of 50 Church street, this city, reports that the sale of its new bicycle horn has greatly exceeded anticipations. It was feared that delays in delivery would be inevitable, by reason of the scarcity of metal at present, but arrangements have now been made which will provide a good supply of raw material.

### CANADA'S GASOLINE IMPORTS

TORONTO, Ont.—In parts of Canada, Ontario, for instance, price of gasoline per gallon since August has increased 47 per cent. This is attributed to numerous causes. Canada imports all of her gasoline from the United States. So keen is the competition of Kingston that gasoline is retailed as low as anywhere in the Province of Ontario. In various parts of the Province there is an appreciable disparity in prices, up to 40 per cent. or more. In the Canadian Northwest, the prices are exceedingly high. In Winnipeg, for example, gasoline retails at thirty cents per gallon. Owing to the Dominion Government regulations, the quality of gasoline in Canada is better than in other countries.

The importations of gasoline into Canada from the United States have been: In 1910, 2,185,341 gallons; 1911, 2,600,099 gallons; 1912, 2,310,400 gallons; 1913, 4,091,000 gallons; 1914, 5,139,000 gallons.

# TO DOUBLE CHAMPION SPARK PLUG OUTPUT IN COMING YEAR

**Upper Left, Assembling Spark Plugs in Champion Factory; Right, Bank of Automatics Turning Out Shells and Bushings; Below, Factory Building**

AT the present time the Champion Spark Plug Co., of Toledo, Ohio, is averaging close to 36,000 complete Champion plugs per day, and the company's record production for one day was in excess of 56,000 plugs. During the last year the total number of spark plugs manufactured by the company was about 6,500,000, and plans have been perfected for increasing the output to 12,000,000 to 15,000,000 Champion spark plugs for the coming year. In addition to its extensive business in the United States, the company ships abroad 50,000 to 60,000 spark plugs monthly.

During the process of manufacture of a Champion spark plug the product has to undergo fourteen inspections before it is finally shipped out to be used. All of the blank porcelains are tested before assembling, and all the bushings and shells are tested by a micrometer gauge before they are used in the complete Champion spark plug.

The final and most vigorous test of all takes place after the spark plugs are finished and ready for shipment. A batch of plugs are taken at random from each order and put through an electrical dynamometer test which is far more severe than any subsequent test to which they may be subjected in the ordinary running of a motor.

# THAT PERSONAL TOUCH—ITS REAL VALUE

## What it Means to the Dealer to Have Every Rider a Friend and a Booster.

By JOHN R. HUSTON

**TO what extent does friendship help the dealer to get business? Is it worth while to cultivate "the personal touch" in his relations with riders?**

**Just how is the rider affected?**

**In the story on this page a motorcycle rider tells what part "the personal touch" played in his dealings with motorcycle agents. It'll be well worth your time to read what this rider has to say on the subject.**

OF all possible forms of motorcycle publicity and advertising, the cheapest, and undoubtedly the most valuable to the dealer in the long run, is the cultivation of the personal touch between himself and his riders, or for that matter between himself and all riders. This includes more than merely giving everybody scrupulously fair treatment; more than service, though of course all these things go together more or less. It means that he seeks to be an actual friend to as many riders as possible, and the word friend takes in a pretty big contract.

In many kinds of business the man with the longest list of friends is the man who is most successful. And to a very large extent this is equally true of selling motorcycles. The dealer should make himself so well liked that his friends will work for him and boost his business through thick and thin, so that one of his friends would sooner go without a motorcycle than buy one of a rival dealer, even though for some reason he might prefer to ride the rival make. Then it follows, as plain as a spike in a tire, that the dealer with the biggest list of genuine friends will sell the most motorcycles.

### No Short Road to Friendship

IT is an old saying that the man who would have friends must show himself friendly, but there is no short route to gaining the true friendship of others. It is a slow process, yet the results will more than justify the time expended, from the double standpoint of pleasure in life and financial profit.

This is far from hinting that the dealer would do well to welcome every Tom, Dick and Harry with open arms. A man is known by the company he keeps, and if the dealer's personal friends are the loud-mouthed, profane, boozing variety, that will be the class of people to whom he must look, in the main, for his trade. And since that variety is fortunately far less common than the decent, self-respecting fellows, he will be missing a big opportunity for business. The common pest, who delights to hang around the shop, exuding cheap cigarette smoke and vile conversation, should be encouraged to make himself scarce. He will do this as soon as he definitely sees that he is just about as welcome as a dose of ptomaine poisoning. At the same time the other sort of chaps should be made to feel that they are always welcome at the shop, even though the dealer may be too busy to do more than greet them.

It pays the dealer to make every person who buys a machine a booster for him. If a fellow has bad luck, treat him so well that he cannot help thinking you are the finest fellow on earth, though he may have a doubt about your machine. Then when he is ready to buy a second motorcycle—and this is what the majority of the riders do—he will be ashamed to purchase of another dealer after the splendid treatment he has received at your hands.

### Cites His Own Experience

AS an illustration of this let me cite my own case. I started in as a motorcyclist a number of years ago, and when I bought my first "boat" I knew absolutely nothing about the machines, except that I wanted one. If I remember correctly, I made the plunge the first year magnetos came out, and to save my life I couldn't have told the difference between a mag and a spark plug. I looked around at the various machines and finally selected one that looked, to my uneducated gaze, the best. Unfortunately it was not the best when it came down to the cold delivery of the goods: though I didn't know it at the time, I was most horribly stuck with that first machine of mine. I quickly developed a tremendous amount of leg muscle, pushing it up the steep hills and helping it, by working hard at the pedals, up all the moderate grades.

The dealer, however, treated me in such a way that the failings of his machine seemed less serious; furthermore, I didn't know anything about the game, and took my troubles as a matter of course, thinking that all motorcyclists experienced them, whatever their make of machine. That accounts in part for my buying a second machine from the same dealer. Even then it was against my better judgment, for by that time I was beginning to realize that the mount I rode was pretty generally regarded by all experienced men as a first-class lemon. But I stuck to

# DEALERS' SECTION

## NEW R-S STORE IN WASHINGTON, D. C.

WASHINGTON, D. C.—The Columbia Auto & Supply Co., of Washington, has opened a new store at the corner of Thirteenth and H. streets, N. W., for the purpose of extending its sales of Reading-Standard motorcycles in Washington and vicinity. The new store is located in a fine building in the heart of the city's business section, close to the Treasury Department and White House. Coincident with the opening of the new store, the company is running page ads. in the leading newspapers of the city.

Orders have been booked for practically their entire contract with the factory. The headquarters of the company is in a large double store building located at 3035-3037 Fourteenth street, N. W., where a full line of R-S motorcycles, Westminster bicycles and automobile supplies are carried. R. L. Sonne, the manager of the company, states that prospects for the coming year are very bright. He expects the largest business ever done in the history of the company.

## QUICK MOVE BY WESTING

INDIANAPOLIS, Ind.—Probably one of the quickest moves on record in the motorcycle business was made during the week ending Christmas Day, when the G. H. Westing Company, local Indian dealers, transferred the stock from 325 North Delaware street, to its new quarters on the corner of Pennsylvania and Vermont streets. The move was made was made between the hours of 6 p. m. and midnight.

All the 27 employees of the Westing firm lent a hand and together with the carts hired for the moving, they were able to get the retail stock to the new store and put it in the same positions which it occupied before the change. The next morning everything was ready to conduct business as usual. The entire stock of the wholesale department and the office were not moved until several days later. The Westing show-windows have been provided with a host of bicycles for the holiday display, in addition to the motorcycle and accessory settings.

## TWO NICE COMBINATIONS

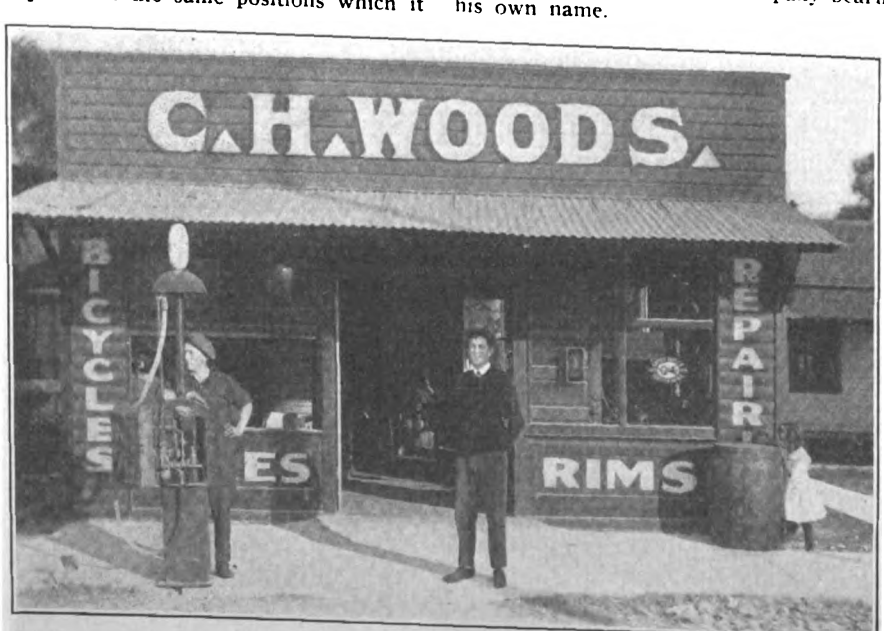
NEWARK, N. J., Dec. 24.—Walter Goerke Wigwam distributor, has sold an Indian with Pullman sidecar attached to one of the local policemen. The owner is anxious to become a member of the local club as a result. Goerke has another combination with Rogers sidecar ready for a purchaser, and this rig is attracting much favorable comment on all sides.

## EVANS RETURNS FROM HUNTING TRIP

LOUISVILLE, Ky., Dec. 26.—George L. Evans, of Kokomo, Ind., who represents the Excelsior factory in Kentucky, Indiana, Ohio and West Virginia, was in Louisville last week calling on the dealers. Evans stated that he recently returned from a hunting trip into Crawford County, Ind., where many of the inhabitants had never before seen a motorcycle. This part of the county has very poor roads, and the riders are prone to avoid it. However, a full sidecar of game was obtained.

## BUYS OUT PARTNERS

BRONX, N. Y.—Dec. 27.—Gene Coughlin, of 922 Washington avenue, this city, has bought out the interests of G. E. Wood and W. A. Ford in the establishment known as the Harley-Davidson Sales Co., Bronx Branch, at that address. He will hereafter conduct the business as a company bearing his own name.



**Where Weather and Prospects Are Always Good; in Miami, Fla., in Front of the Repair Shop of C. H. Woods. The Proprietor Is in Front of Entrance**

## KITCHERER WILL PUSH HENDERSON

DETROIT, Mich., Dec. 27.—E. E. Kitcherer, of the Haverford Cycle Company, feels highly elated over having secured the local agency for Henderson motorcycles which are made in Detroit. He expects to push them very strong next year and to make them very popular "at home." The Detroit police department recently placed an order for 20 more Henderson machines, while the special delivery boys at the postoffice have also placed orders for Hendersons during the last few weeks. Mr. Kitcherer will have 1916 models of the Dayton motorcycle by January 10.

As for Smith Motor Wheels on which he has the Michigan agency, he reports that he will have 100 per cent more dealers in 1916 than 1915, and that already he has taken orders for nearly double the number placed a year ago.

## LOW SADDLE DID IT

NEWARK, N. J., Dec. 24.—Watson Kluczek, Reading Standard agent, is busy demonstrating the 1916 product from Reading, Pa., and has closed six deals for these mounts already. He says that these have on the 1916 models.

## NEW SHOP OPENED IN BUFFALO

BUFFALO, N. Y., Dec. 27.—A new motorcycle and bicycle repair shop has been incorporated in this city under the name of John C. Boyle, Inc. The capital of the company is $500. The incorporators are John C. Boyle and Gertrude C. Boyle, both of 24 E. Ferry street, and Frank S. Anderson, 543 Ellicott Square.

## EXTEND "X" DEALER'S TERRITORY

LOUISVILLE, Ky., Dec. 27.—Norbert Sandmann, the local Excelsior dealer, has closed a contract with the Excelsior factory whereby he secures a larger territory than formerly. In 1916 Sandmann will handle New Albany and Jeffersonville, Ind., Louisville, and a number of counties south of Louisville.

## WAITING RESULT OF SUIT

LOUISVILLE, Ky.—C. U. Barle, repairman for the Century Cycle Co., Indian dealer, is awaiting the outcome of a suit against the Auto Parcel Delivery Company, for injuries sustained on August 29. The delivery company's machine cut off Barle at Greene and Fourth streets after the latter had been signalled to cross by the traffic policeman.

## PAYNE OPENS SHOP

KNOXVILLE, Tenn.—E. F. Payne, formerly of the Knoxville Auto & Garage Co., has opened his own shop at 408 North Central avenue. He will specialize in repairs for motorcycles and automobiles.

Digitized by Google

# DEALERS' SECTION

## METZGER CLOSED FINE YEAR

DETROIT, Mich., Dec. 27.—"We closed the best year in our history," said Joe Adcock of the W. E. Metzger Co., 501 Woodward avenue, Indian dealers. "Not only was our motorcycle business ahead of any other year, but our bicycle business was also much better. In our talking machine department we enjoyed a fine business, while the work in our repair department was more than we could handle. Because of our splendid facilities our repair department is showing immense gains in business and we are increasing our repair staff right along. All we ask is that 1916 be as good as 1915—we won't complain. The new Indian can't help but make a big hit. Already it has caused more talk than any previous model or any other machine we ever handled."

## BUSH IS ALL SMILES

NEWARK, N. J., Dec. 24.—Carl W. Bush, the Harley-Davidson agent, is handing out cigars with both hands and wears the smile that stays put, these days. The cause is a new arrival in the Bush family, a sidecar passenger, not a motorcyclist, unless the girls will be riding in 1935.

## PHOENIX DEALER INJURED

PHOENIX, Ariz., Dec. 27.—Letis R. Templin, proprietor of the Capitol City Cycle Co., 25 East Adams street, was painfully injured when his motorcycle was run down by an automobile driven by John Terry, who was intoxicated. Templin's left shoulder was bruised, one ankle was sprained and the other lacerated. The auto driver was convicted in the city police court of driving an automobile while in a drunken condition and fined $100.

## BUNKIN BACK ON JOB

NEWARK, N. J., Dec. 24.—M. Bunkin, the Newark manager for the Haverford Cycle Co., Excelsior agent, has just returned from a trip to the Big X factory in Chicago. He is up to his neck in Christmas trade work since his return.

## BOLYEA ENTERS DETROIT FIELD

DETROIT, Mich., Dec. 27.—The business of the Auto-Cycle Supply Co., 68 Grand River avenue, has been purchased by Arthur W. Bolyea. He will continue the business of retailing auto and cycle supplies and doing repair work.

## NEW EXCELSIOR AGENCY

PHOENIX, Ariz.—The Phoenix and Maricopa County agency for the Excelsior has been transferred from the Pioneer Cycle Co. to the Capitol Auto Supply Co., 517 North Central avenue. It is understood that the Pioneer shop will handle some other standard motorcycle. At present only Excelsior, Harley-Davidson and Indian machines are represented here.

**Ready to Demonstrate 1916 Model to Prospects; Harley-Davidson Dealer J. R. Seifert, in Front of His Agency at Cumberland, Md., a Favorite Resort of Local Riders**

## TIED UP IN FREIGHT HOUSE

NEWARK, N. J., Dec. 24.—Bert Coryell, manager for the F. C. Cornish Estate, Henderson agent, has six of the four-cylinder mounts on the road and tied up in the freight-house congestion. He hopes to be able to get them loose in short time, and then will await the next shipment, for these six are all asked for.

## SLAYBAUGH MAKES A GOOD START

SANTA BARBARA, Cal.—Claiming that Santa Barbara's motorcycle education had never been properly attended to, James A. Slaybaugh started out with a rapid-fire sales campaign not long ago and now has a start of five Harleys for the season. He has delivered two machines. Slaybaugh counts on selling twenty machines for the season, and places emphasis on the wisdom of letting the prospects know that motorcycles are now purchaseable on a time payment basis.

## HENDERSON IN TACOMA

TACOMA, Wash., Dec. 24.—H. C. Fuller, well-known Tacoma motorcycle dealer, has recently made a change in the firm name, and hereafter his motorcycle headquarters will be known as the Fuller Cycle Supply Company.

For 1916 he has signed to distribute the Henderson motorcycles in Tacoma and Pierce County and the Dayton motorcycles and bicycles in Tacoma. Anticipating a good season on bicycles, he has put in a large order for the lightweights.

## BORROWMAN IMPROVES STORE

VINCENNES, Ind., Dec. 26.—Frank Borrowman, the Excelsior and Indian agent, has made a number of improvements in his store, including a new store front and large plate glass windows. Borrowman is also handling the Iver Johnston bicycle.

## HENDERSON AGENTS HUSTLING

LOS ANGELES, Cal.—C. A. Sheppard, of San Diego, in a letter to Coast Manager Hugh A. Fargo, asking him to send the fourth machine the week after he took the Henderson agency, said he had given 60 demonstrations and found conditions favorable for very satisfactory business.

A. H. Small, of Santa Ana, also took his second machine about a week after accepting the agency. Fargo is very well satisfied with the Southern California Henderson business through the holiday season.

## ENJOYED HIS COAST TRIP

SAN FRANCISCO, Cal.—Roy Gustafson, of W. E. and W. H. Jackson, Dayton distributors, is back from a trip down the Pacific Coast, on his Dayton twin model. He touched Los Angeles, San Diego and Tia Juana, Mex., on the outward trip, returning by the Valley Route. The road conditions were first class, he says, except in a few places, and Gustafson enjoyed himself thoroughly.

## ASK FOR R-S WITH SIDECARS

NEW YORK, N. Y.—Gus Rotholz, Reading Standard distributor for this city and surrounding territory, reports a demand for 1916 R-S models accompanied by sidecars, as well as for solo riding. "One of the things that the boys appreciate about these brown twins is the low saddle position, which makes it possible for anyone to plant his feet when in the saddle. The side-by-side valve motor is a big selling point, too."

Rotholz has sold a number of second-hand R-S and Excelsior models as a sort of marking-time until his next lot comes over from Reading, Pa. His store is headquarters for the Harlem M. C., the pioneer riders' organization in the metropolis.

# Our Canadian Letter

## PRESENT AMERICAN BICYCLE TYPES ARE SATISFACTORY TO CANADA

TORONTO, Ont.—With regard to the discussion in **Motor Cycle Illustrated** in reference to the best type of American bicycle for the export market, a number of Canadian distributors and jobbers have pointed out to your resident representative that the American bicycle in its usual make-up and design is perfectly applicable to Canadian tastes and requirements. Canada is a part of the foreign field, and a large portion, to the American producers of wheels, but there is practically no difference between the American bicycles and those made in Canada so far as "styles" are concerned.

Canadian dealers have been securing "export models" of British bicycles which are very similar to either Canadian or American designs, but the English supply has been tapering off, as the procedure of the war has been increasing its pressure on English factories. One result has been that more American bicycles were imported into Canada during 1915 than for many years past. Some of the British export models were very cheap in price, but their presence in Canada had little, if any, effect upon the price of Canadian-made wheels. If a cyclist wanted a cheap wheel, he had several British and other models from which to choose. If he wanted to pay a good price for a wheel, as many frequently do, there was also the range of values.

One feature of the Canadian bicycle trade is that a fair number of the veteran professional racing men in the United States regularly send to local manufacturers and distributors for bicycle parts of both British and Canadian manufacture. Several of the Australian stars, in particular, and a number of the riders who have raced in Canada during the past two or three years secure crank-hangers, rims, chains, saddles and frame parts from local tradesmen at intervals. Undoubtedly there is a point to this feature which American bicycle producers would do well to study.

### Competition Is Keen

The competition between the various makes of bicycles has become more keen than it was two years ago. Partly because of this fact, there is a wider variety of prices than formerly. More American lines are being sold in Canada with the result that the rivalry between American and Canadian makes is increasing, it is apparent.

A number of crossed-truss frame and other unusual designs of British bicycles are seen on Canadian streets, but, for the most part, these models have been brought out to the Dominion by "settlers" from the Old Country. The next wheels which these people buy are invariably those which are of common construction.

As previously noted in **Motor Cycle Illustrated,** Canadian manufacturers and dealers are making preparations for much greater business in bicycles during 1916 and the American producers are sharing in the activity. At first sight it looks as if the makers intended to force more bicycles upon the people, but a real study of the situation results in a decision that a peak-load consumption is due.

## REVIVE C. M. A. TO FIGHT THREATENED MOTOR LEGISLATION IN ONTARIO

TORONTO, Ont.—Just at the time when the light of existence in the Canada Motorcyclists' Association was apparently flickering and the riders were beginning to talk of the passing of the organization, the "swan song" was hushed through the rude interference of legislative proposals. The latest is that the motorcyclists of Ontario may be called upon by the Provincial Government to pay higher in 1916 for the privilege of using the motor two-wheelers than they have previously been assessed. A number of radical changes are to be proposed, it is understood, and the riders will probably find it necessary to protect their interests through organized efforts.

One of the changes at least is widely welcomed, however. This particular move is the decision to transfer the Provincial Motor License Branch from the Provincial Secretary's Department to the Highways Section of the Public Works Department. As a result of this transfer, the large revenue from the motor road-users will probably be devoted to highway constructional work and an official statement to this effect is awaited. All of the motorcyclists are heartily in favor of this move because they will realize that their money will be put to a purpose which will bring direct benefit.

A rumor that the license fee for motorcycles is to be raised is somewhat disconcerting, on the other hand. The Highways Commission for Ontario has already turned in a recommendation that the motorcycle fee be $4 per year instead of $3. The lowest license fee for automobiles is to be $10 per year, however, and it is not thought improbable that the legislators will attempt to make the difference in fees for the two classes of vehicles even less than $6.

There is also some talk that riders of motorcycles will be required to pass examinations before permits will be issued because there is a severe test for drivers of automobiles.

On the other hand, prominent bicycle officials want a small license fee authorized for cyclists to discourage bicycle thieving and to help regulate traffic.

## ALL IN READINESS FOR NEW YEAR'S EVE RUN OF TORONTO M. C.

TORONTO, Ont.—Final preparations have been made for the annual New Year's Eve run from Toronto to Hamilton, a distance of 45 miles, on the night of December 31 under the auspices of the Toronto Motorcycle Club. Prizes have been donated by a dozen local dealers, and it is expected that the entries will exceed twenty. The schedule for the sidecarists calls for a speed of 18 miles per hour, while the solo riders will travel 20 miles per hour. The first man will leave the headquarters of the club at 8 p. m. and the others will depart at one-minute intervals. The tourists will return to Toronto on New Year's Day and will have lunches and hot coffee served to them at the local club. As usual a dinner will be held in Hamilton about midnight, or after the contestants arrive on the scene.

The Toronto club "rollickers" had their first spin on the ice of Grenadier Pond on Sunday, December 26, in anticipation of ice races which will be staged this winter. A number of motor bob-sleighs are being built by motorcyclists for a series of sled races on Toronto bay.

### MUCH CREDIT FOR WALLACEBURG

WALLACEBURG, Ont., Dec. 27.—Ten local motorcyclists have enlisted for foreign service and expect to be used as despatch riders or military motorists: Randall Purser, Cecil Reynolds, Allan Brander, John Gordon, Dudley Gordon, Jack Bachus, Owen Zavitz, Frank Nightingale, Lawrence Martin and James Wade.

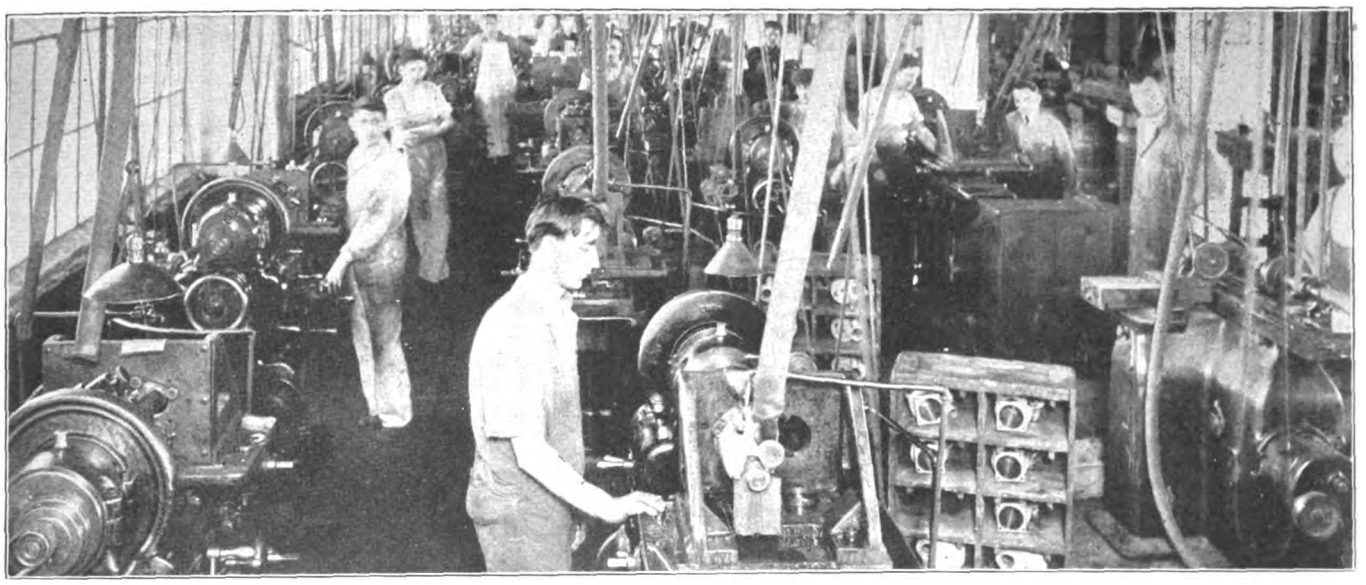
# EXCELSIOR ASSEMBLY AND INSPECTION

## Only Experienced Men Thoroughly Familiar with Every Detail of the Excelsior Machines Employed in These Departments. The Final Inspector's O. K. Signifies a Perfect Machine



Final testing section of assembling department

NO matter how scientifically designed, how perfectly made, or the quality of the material, the element of perfection in a motorcycle is largely dependent on the exactness of its assembly and the final inspection and test before it leaves the factory.

In the Excelsior plant each element such as motors, transmission gears, brakes, frame, wheels, tanks, etc., are carefully tested and approved by the heads of the several departments before they reach the assembling room.

While in the manufacture of the various details of the machine, the workmen are often familiar only with their own particular element, the men of the assembling department are largely men who have passed through other departments or at least in some way have become thoroughly familiar with every detail of the several models. The relation of their work to the finished product closely resembles that of the man who finally times and regulates an accurate timepiece or the man of perfect ear who gives the final tone to a magnificent piano. They know the proper relation of every part and how its operation must harmonize with that of other elements to produce perfect results.

Even skillful men cannot produce satisfactory results without proper equipment. To insure such efficiency, the assembling room of the Excelsior factory has been developed to its present efficiency, not by one man, but through the joint ideas of the workmen who know what they are required to accomplish and are often better able than anyone else to specify what tools and equipment they need. Taking advantage of the almost entirely glass sides of the building, the assembling department runs along the east front for a distance of over 200 feet, each operator being provided with a specially designed bench and a complete set of special tools, wrenches, spanners, etc. Borrowing from neighboring workmen is absolutely prohibited and each assembler is required to keep all his appurtenances in perfect condition. Wrenches must perfectly fit the parts for which they are designed, bruising and damage to the nuts and bolts being thereby avoided. Pliers for holding control rods, tubes and similar nickel parts are leather faced to protect the finish, and when the machine is fully assembled and ready for the final inspection, it must be perfect both in operation, adjustment and finish.

By employing a large force of workmen, and perfect equipment, the assembling of individual machines need not be rushed and every care can be given to even the smallest details, yet on account of the number employed and the capacity of the department, 300 machines per day can be passed to the shipping room for crating and delivery.

It is by such thorough methods and equipment throughout the plant that the mechanical perfection of the Excelsior Autocycle has been attained and when the dealer or ultimate user uncrates an Excelsior Autocycle, he knows it is right and ready for immediate use. —Adv.

# NEWS AND VIEWS OF F. A. M. DOINGS

By GOSLIN

I DON'T know whether you fellows remember it or not, but last July at Sacramento, Cal., Mr. Ignaz Schwinn, who makes those fast Excelsiors in Chicago, Ill., offered the F. A. M. $500 if it would get a membership of 20,000 riders. Now, 20,000 looks big, doesn't it? Well, it isn't!

We are up to 8,500 now, and something past that number, and if you and me and the other fellow will all go after one unaffiliated motorcyclist and *land* him, he will be 17,000 strong—within striking distance of Mr. Schwinn's five hundred good, round iron men. F. A. M. riders, get strong and each get his man for sure, and then another one.

### Helping the Touring Bureau

The Federation conducts a touring bureau that is free to all members. Some people act as if they didn't know that. If you want information in touring, write A. B. Coffman, 414 Ohio Building, Toledo, O., when you are going to make a trip and get the "dope" on mileage and routes. Maybe some of that information is a little antique—new roads and routes may be better—and that's what we are getting at. Have you ever, Mr. Rider, sent in a tour or corrected the route the F. A. M. has or in any way helped the Federation?

This is one way every rider could be of assistance to the F. A. M. He can keep it up to date in road information for other riders who pass that way.

### Passing the Word Along

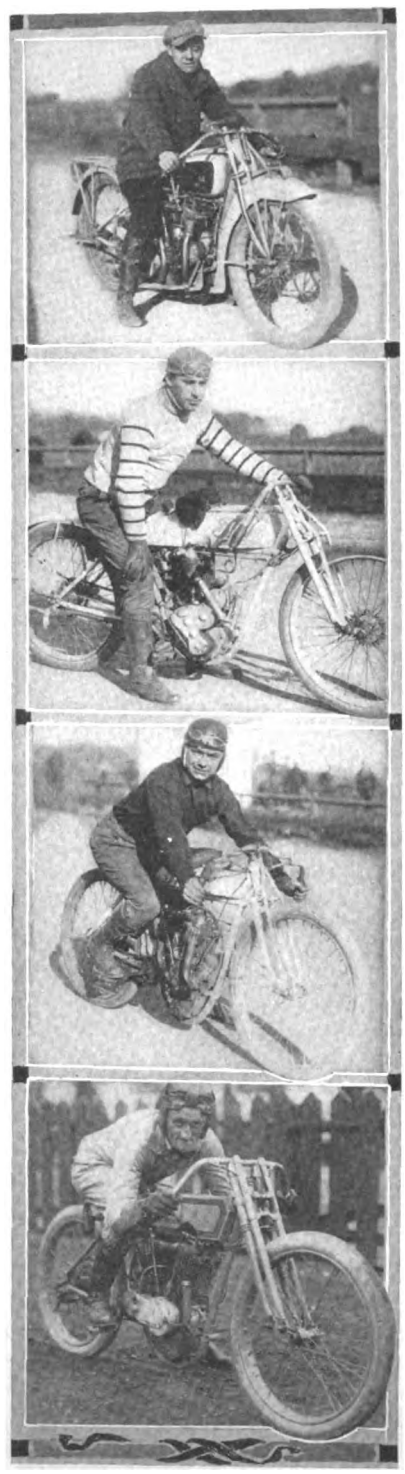
When you go into a hotel, restaurant or garage and the service is courteous and charges reasonable, whether you are a motorcyclist or not you feel well toward the proprietors and want to pass the word along. It goes double, though, when you are imposed upon and overcharged and your resentment flames high. Some way of letting other riders who would come along know just how they will be treated and charged should be devised and be handy for F. A. M. members. These remarks come from one who has traveled and struck good and bad places and who seeks to go where he is welcome. There are many motorcyclists in a like frame of mind. Some day, when the F. A. M. is all that it could be, we may be able to have such information on tap—but this, like all other ideas, depends largely upon the individual rider—the one who has frequently lain down on his end for the greater part.

### The Chronic Kicker

There is a certain breed of man who is always against everything. You will have him in politics, in sport and, of course, in motorcycling. He is the rider who does not belong to the Federation, yet criticises it from top to bottom. If you belong to the F. A. M. you have some grounds to kick when things don't go just to suit you, but where does this chronic kicker, who is an unaffiliated rider, get off? It is none of his business what goes on in the Federation.

Again, if you do belong and have a license to kick against this or that thing, why not quit kicking for a while and try to think up some plan for upbuilding for a change? It would put you in a much better frame of mind, for one thing. Besides, you may have some good ideas in your noodle, if you could get the vinegar out of your system and give them a square chance. The United States is no more than what you and I and the rest of us make it, and this also applies to the F. A. M. Hock your hammer and purchase a sugar-cured ham!

### TRENTON, N. J., SPEEDSTERS



**Top, Earl Banks, Excelsior; Second, E. G. Applegate, Secretary of Trenton M. C., and His Thor; Third Man, Fred Banks, Indian; Bottom, Ray Forst, Harley-Davidson**

### Line Up the Riders

Just about now, Mr. Dealer, is when you should get busy lining your riders up for organization and affiliation with the F. A. M. All over the U. S. A. legislators are doping out how they can get in solid with their people and be re-elected next Election Day. They undoubtedly will pick on those "golderned motorsickels" as good easy marks, and bing! Before you or I know it, we will awaken to learn that on and after such a date the license fees will be doubled or sidecars taxed with motortrucks. Then what will you do if you lack organization?

You know that old one—"United we stand; divided we fall"; well, that will sink into your cranium deep, then. Why not avoid it by lining up with the F. A. M. and having all the riders in your vicinity do the same. All politicians are selfish and if they feel adverse criticism centering about them, they will soon desert the cause and hop aboard the right band wagon. You must have seen some result of F. A. M. work in a Southern State within the past few months. You may be next, Mr. Dealer, so get into the F. A. M. fold.

If the worst should come and Congress should consider the President's suggestion of 50 cents per horsepower tax and one cent per gallon tax on gasoline, who will bear the brunt of the fight for the motorcyclists? It will be the F. A. M. of course —8,000 riders doing the battling for over 180,000 motorcyclists. This would be a matter of much concern, Mr. Rider, to your purse and to your bread and butter, Mr. Dealer, so line up with the Federation. We need you and you need us.

## ANOTHER OYSTER ROAST

SAVANNAH, Ga., Dec. 20.—Fifty neatly attired riders of the Savannah M. C. met at the club rooms yesterday afternoon with their machines and journeyed out to the German Club, a distance of about 10 miles, where an oyster roast awaited them. After the roast came a six-inning game of indoor baseball, which the single-cylinders captured from the twins. Fine day; fine roast; fine exercise; everybody happy.

## FULTON CLUB FORMED

WHEELING, W. Va.—Riders in Fulton, a suburb of this city, have organized a club to be known as the Fulton M. C. The first meeting was given over to the election of officers, and the following were appointed for 1916. Albert Vierheller, president; William Forshey, vice-president; Bud Berisford, secretary and treasurer.

While the club is for Fulton riders only, it may combine with the Wheeling M. C. at a later date.

## MANITOBA HAS 890 MOTORS

WINNIPEG, Man.—According to statistics just issued, the number of motorcycles in use in the Province of Manitoba during 1915 was 890.

### SERVES AS PATROL WAGON

WHEELING, W. Va.—A motorcycle sidecar is helping to relieve the rush on the police patrol wagon here. The motorcycle officer now drives a combination and often hurries additional policemen to a scene of trouble which formerly necessitated calling out the patrol wagon.

### SPEEDWAY IS PROGRESSING

LOUISVILLE, Ky.—George L. Martin, of this city, who is behind the movement for erecting a two-mile wooden speedway south of the city limits, states that things are shaping up nicely and that the Louisville Speedway Company will soon file its articles of incorporation. The track will be commenced in the spring.

### MOTOR-BOBS ARE READY

LOUISVILLE, Ky., Dec. 20.—Louisville riders who were caught napping last year during the snow flurries, and who were unable to get their motor bobs completed in time to have much sport, were prepared this year, and last week a number of motor sleds appeared on the streets. Norbert Sandmann, with his Excelsior "Wildcat" attracted a good deal of attention. The snow only lasted about two days, although there was a three-inch downfall.

### MORE SHOPS REGISTER

Among recent additions to the huge list of repair shops registered with the F. A. M. are the folowing: Excelsior Cycle Company, 625 Ohio avenue, Wichita Falls, Tex.; Berges Motor Supply Company, 1826 Twenty-sixth street, Bakersfield, Cal., and the Peerless Motor Works, 1895 Washington avenue, Bronx, N. Y.

### A VETERAN WINS SUCCESS

PETERBORO, Ont.—One of the oldest bicycle dealers in Canada is C. R. Banks, a progressive Peterboro tradesman, who has been selling wheels since 1896 and is still going strong. He has a bright store with a 47-foot frontage and his entire repair department is located in the basement so that the whole of the ground floor can be kept in business-like order. He is a firm believer in clean windows, frequent change of window trims, up-to-date signs, good light and the latest equipment for the repair department.

# THE PERSONAL TOUCH—ITS VALUE

*(Continued from page 39.)*

FINALLY, however, I had to leave him, though it was with sincere regret. I went to him and apologized for going elsewhere to buy a motorcycle, almost hating myself for the act of desertion. But the desertion was certainly excusable, for the machine was utterly impossible; in fact, it is no longer on the market, having passed into the great beyond.

**Influence of First Deal**

Now I have bought several machines from the second dealer, whom I did not know at all before our first business deal. During the years since then we have become firm friends. Perhaps his treatment of me has been more generous than in the case of all his customers; that I cannot say. But I, for one, certainly have no cause for complaint. This dealer and myself often take fairly long trips together, getting along famously, since our interests, our likes, and our dislikes are quite similar.

Occasionally I feel a tiny hankering to try out a certain make of machine. I am very well satisfied with the machine my friend sells, but still would like a crack at this other one, largely from a matter of curiosity; I want to satisfy myself whether certain things that have been said regarding the respective merits of the two makes are correct. But I never can do it, at least not while I live in this town. The dealer has made me a friend of his, he has treated me magnificently, his machine is a winner—certainly there are none better, though others may be as good—and I can't buy from anyone else, because he has anchored me to him by cords that I do not care to cut, the cords of friendship.

By all means, Mr. Dealer, cultivate the personal touch.

### TELLS OF SERVICE AT FRONT

QUEBEC, Que., Dec. 24.—Among the Canadian soldiers who have returned from the front is Cyclist A. E. Bramwell, formerly of the Divisional Cyclists and a resident of Dunnville, Ont. He was returned because of the loss of two fingers on his left hand from a rifle bullet. His hand is almost useless now, but he expects that he will soon be able to use it again.

"Despatch riders have a dangerous task," declared Cyclist Bramwell as he was being registered by government officials here after coming from the boat. He told of one incident which he would never forget. "A motorcyclist was speeding along one of the roads in Flanders when suddenly a big shell exploded directly in front of him. It was awful. We rushed to the scene as soon as we could, but not a particle of the rider could be found. He had disappeared as if by magic."

### DWYER TOURING DOMINION

OTTAWA, Ont.—Lieut. Dwyer, an officer of the Canadian Expeditionary Forces, who has been supervising the exhibition of a number of moving pictures of the Canadian army under Government auspices, was formerly the Yale representative at Victoria, B. C. He is now touring from coast to coast with the views.

### ICE OFFERS NO HINDRANCE TO THE SIDECARIST

**Frozen Lakes and Rivers Are Readily Traversed by the Three-Wheeler, and the Harley-Davidson Combination Is Demonstrating This to Good Effect Near Milwaukee, Wis.**

### MAKES TRIAL TRIP ON MOTOR-SLED

ALTOONA, Pa., Dec. 28.—Earnest Albright, of this city, has the honor of being the first to make his appearance on the city streets with a motor-bob this winter. His sled is unique in every particular, having been constructed according to his own plan. At a recent test the sled developed a speed of thirty-five miles an hour.

### LIKE AN OLD FRIEND

In a letter from a former employee, now at the front in France, the Goodyear Tire & Rubber Co., of Akron, O., has received an interesting bit of news. The man writes: "I had an unusual experience in the trenches. I was out one night trying to locate a sniper who was thought to be operating in rear of our lines. Coming to a path behind a ledge about 600 yards in rear of the front line of trenches, I passed my hand lightly over it in search of fresh tracks—and found the well-defined imprint of a Goodyear All-Weather tread tire. We have seen many Goodyear tires here, but lying out in the mud on an inky-black night, fingering the trail of a Goodyear seemed to us like meeting an old friend."

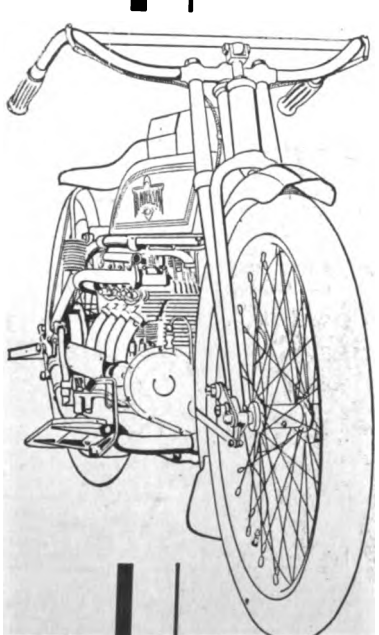
Makers of Corbin-Brown Speedometers and Automatic Screw Machine Parts

## No Dull Season for Henderson Dealers

RIDERS don't "wait until spring" to buy when the live dealer offers them this machine—they want it right away. They know that if they wait until the spring rush of business they may not be able to get prompt delivery. So they're buying now—in record numbers.



Getting YOUR share of this big winter business?

**Henderson Motorcycle Co.**

# What "REMY" Means to the Motorcyclist

See the man in the picture.

It is growing dark. "Never mind," he is saying. "Don't worry about the darkness. We have perpetual daylight right here—see?" And he points to the

## REMY

**Motorcycle Lighting-Ignition System**

"We can stay out till it gets pitch dark and ride in perfect safety and comfort. The light never fails." Satisfaction? Surest thing you know. That's what the REMY system was made for—to throw daylight into hidden shadows. Wonderful ignition, too. Strong, reliable, synchronized ignition. Protection and service! That describes the REMY system. Popular? Thousands in use.

See the REMY system demonstrated on a Harley-Davidson. Service stations nearly everywhere.

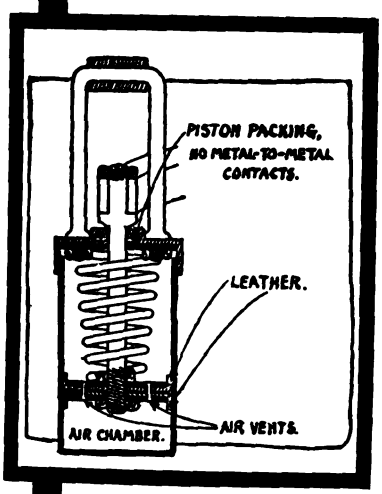
# The Only Fully Guaranteed Saddle On the Market

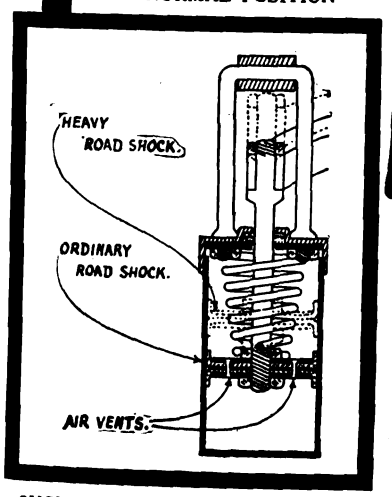
We show our supreme faith in the MESINGER SADDLE in no uncertain way. We GUARANTEE that the MESINGER gives the lowest saddle position. WE GUARANTEE that you get the greatest riding ease you ever experienced, in the

# MESINGER

## Air Cushion---Centre Compression



NORMAL POSITION



SHOWING ACTION WHEN IN USE

Real automobile shock-absorber springs, working on a cushion of air, smooth out the roughest roads. The centre compression feature means an end to all shifting and side-sway in the MESINGER.

Note the detailed diagrams. They tell the story of Mesinger efficiency.

Daily we receive letters from satisfied users testifying to the superior brand of comfort possible with the MESINGER SADDLE.

YOU should specify the MESINGER. It means a better riding season.

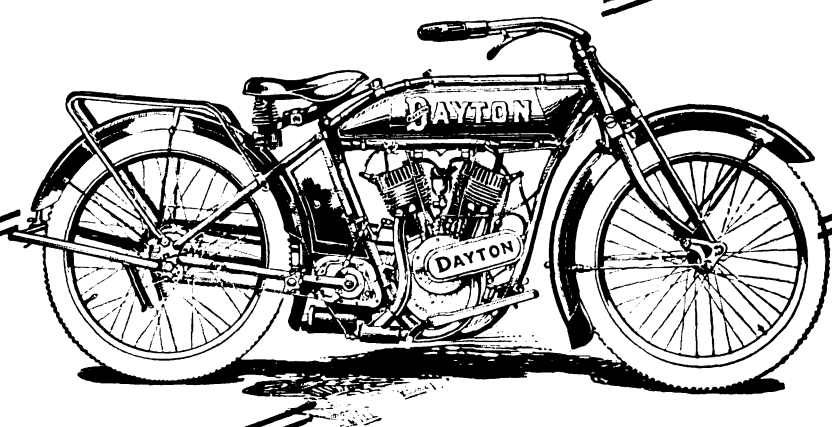
# DAYTON OWNERS

are assured of the best motorcycle in its field. The big red husky machine is made as carefully and scientifically in every detail as is possible. It develops speed up to its rating, which is not true of all motorcycles—it rides comfortably and easily, due to the Dayton Rocker Spring Fork and the Dayton Spring seat post—and it operates dependably, with just the right economy, just the right mechanical balance, just the right *everything*—



# DAYTON DEALERS

represent the best motorcycle in its field, therefore they sell a machine that always makes good, one that does not have costly kicks and come-backs from dissatisfied purchasers—one, in fact, that makes more sales and an increasing business simply because of its "make good" performance in the hands of every owner.

Territory for the Dayton is limited. Much of it has been, and is being, apportioned every day. If there is some territory in which you are interested, you will do well to wire or write for it at once. Our motorcycle is the best—our factory the largest—our policy the broadest. Investigate!

# Prest-O-Lite
## For Motorcycles

## Standard Equipment with Experienced Riders

Prest-O-Lite gives you a splendid road light, ideal convenience for small expense, and requires practically *no attention*. Because Prest-O-Lite has proved its superiority in the hands of users everywhere, more riders use it than all other systems combined.

### Reliable—Convenient—Economical

Prest-O-Lite is not affected by road shocks and vibration. It is reliable under all conditions, never fails you in an emergency.

Because of its freedom from troubles and attention, Prest-O-Lite is the most convenient lighting system.

Of all systems of brilliant lighting, Prest-O-Lite costs the least to buy and the least to use.

### *In Any Equipment Combinations Specify PREST-O-LITE*

No matter what motorcycle you wish to buy, no matter what other equipment you want, specify Prest-O-Lite and you'll get it.

Any dealer can make you up a complete combination consisting of speedometer, head lamp, Prest-O-Lite, etc., at an attractive price.

### A Prest-O-Lite Has Many Uses

Prest-O-Lite Dissolved Acetylene (ready-made carbide gas) has hundreds of important uses. Acetylene soldering and brazing outfits are being widely used commercially. A special stem-and-burner attachment provides an inexpensive light for indoor and outdoor lighting. For stereopticons it furnishes ideal light. Detailed information on acetylene installations for all purposes furnished on request.

**The Prest-O-Lite Co., Inc.** 246 Speedway Indianapolis, Ind.

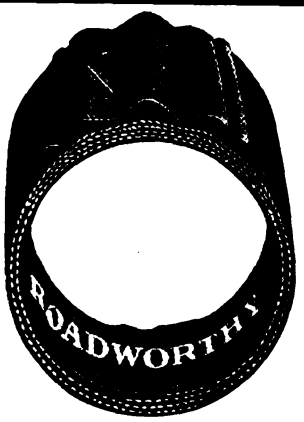
# Act Quickly and Make a Good Profit



**The Dealer who can see an opportunity, and grab it, gathers in the coin while his competitors are just waking up.**

Sales should take a jump next week—No dealer can afford to fail to get our special offers at this time.

For the Bicycle Dealer we have over 45,000 pairs of Diamond-Goodrich Bicycle Tires—14 different brands, strictly first quality, at prices you will scarcely believe—*prices we dare not* print. Never before have we ever offered anything like this and we cannot say that we will ever again be in a position to offer such real, undeniable values.

If you are a legitimate Dealer, write us this minute on your letter-head for our TIRE SPECIAL—Get our prices and then use your own good judgment. Get them now.

# The MILLER TRIPLEX SIDE SEAT

offers you one of those opportunities that come your way only once in a very long while. Look at it. Have you ever seen anything that looked better to you—anything that should appeal more strongly to the rider or serve you better in demonstrating your 1915 machine?

There's something entirely different about the TRIPLEX—something that attracts every Motorcycle rider. It is this "something different" that makes it such an exceptional seller. If you are not thoroughly convinced that you are losing money in not having the TRIPLEX in stock, you may rest assured that you are not thoroughly acquainted with its wonderful possibilities.

# STANWELD Frame Parts

STANWELD Frame Parts are used exclusively by the manufacturers of every high-grade machine in the United States. They are made from carefully selected stock which has been tested and analyzed. Stanweld Cold Drawn Seamless Steel Tubing is known throughout the world for its extreme lightness, great strength, and beautiful finish. When you buy a new machine or parts, be sure to specify Stanweld.

If you own a machine built of Stanweld Frame Parts you can be sure of its strength and safety. Stanweld Rims, Tubular Parts, and Mud-Guards have no equal. You get them when you buy a Harley-Davidson, Indian, Dayton, Flying-Merkel, Reading-Standard, Pope, Emblem, Henderson or Excelsior Motorcycle. We are prepared to render every assistance to prospective builders of bicycles or motorcycles.

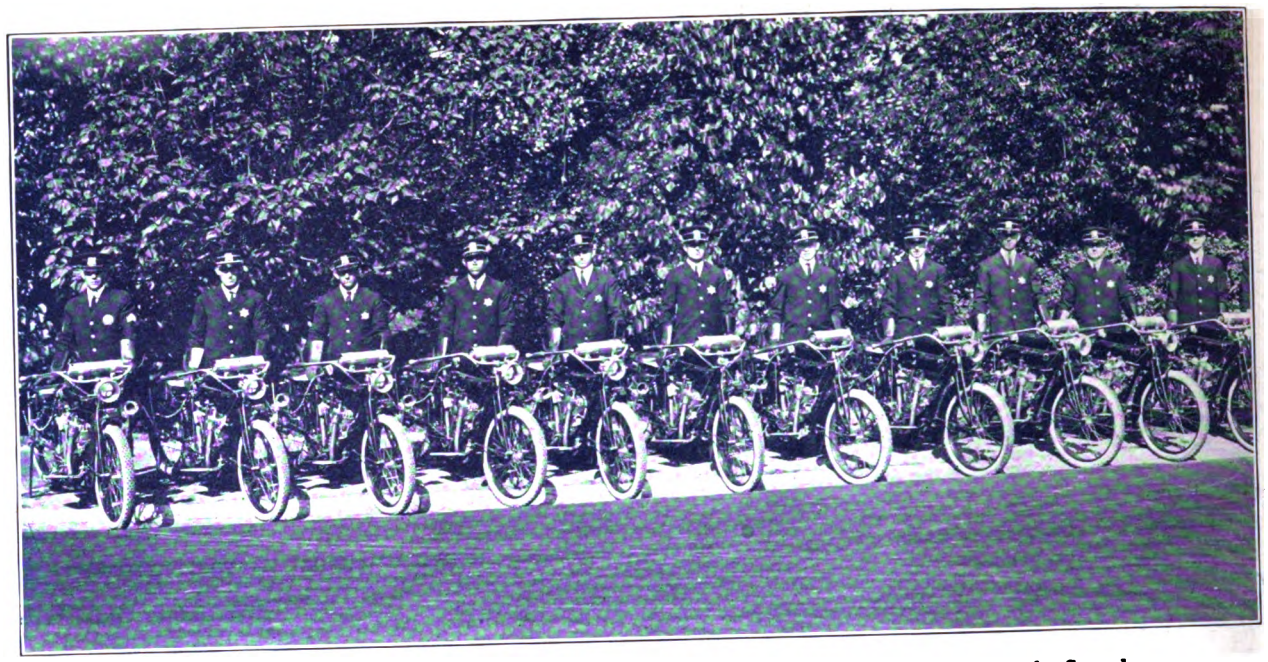
GENE COUGHLIN, OF NEWARK, WITH SIDECAR COMBINATION AT POCANTICO HILLS, N. Y.

Digitized by Google



Kansas City, Mo., Motorcycle Police, on part of the Prest-O-Lite Equipped Motorcycle Squadron

# The police force purchased all told 20 extra Indian Motorcycles, all to be equipped with

# PREST-O-LITE

These men take no chance. They **know** night riding. They know what their lighting systems must endure. They demand brilliant, dependable light at any cost. They get this light at small expense by choosing Prest-O-Lite.

## Never needs attention that you yourself cannot give easily and quickly

Prest-O-Lite is thoroughly simple—has nothing to fail in emergencies.

Costs little to buy and little to use. Just one spill or tip over, due to poor light is liable to cost more than years of Prest-O-Lite Service.

To any dealer or rider we will be glad to send full details of motorcycle lighting, and particulars of a special equipment combination offer including Prest-O-Lite, that nearly all dealers are now making. Write.

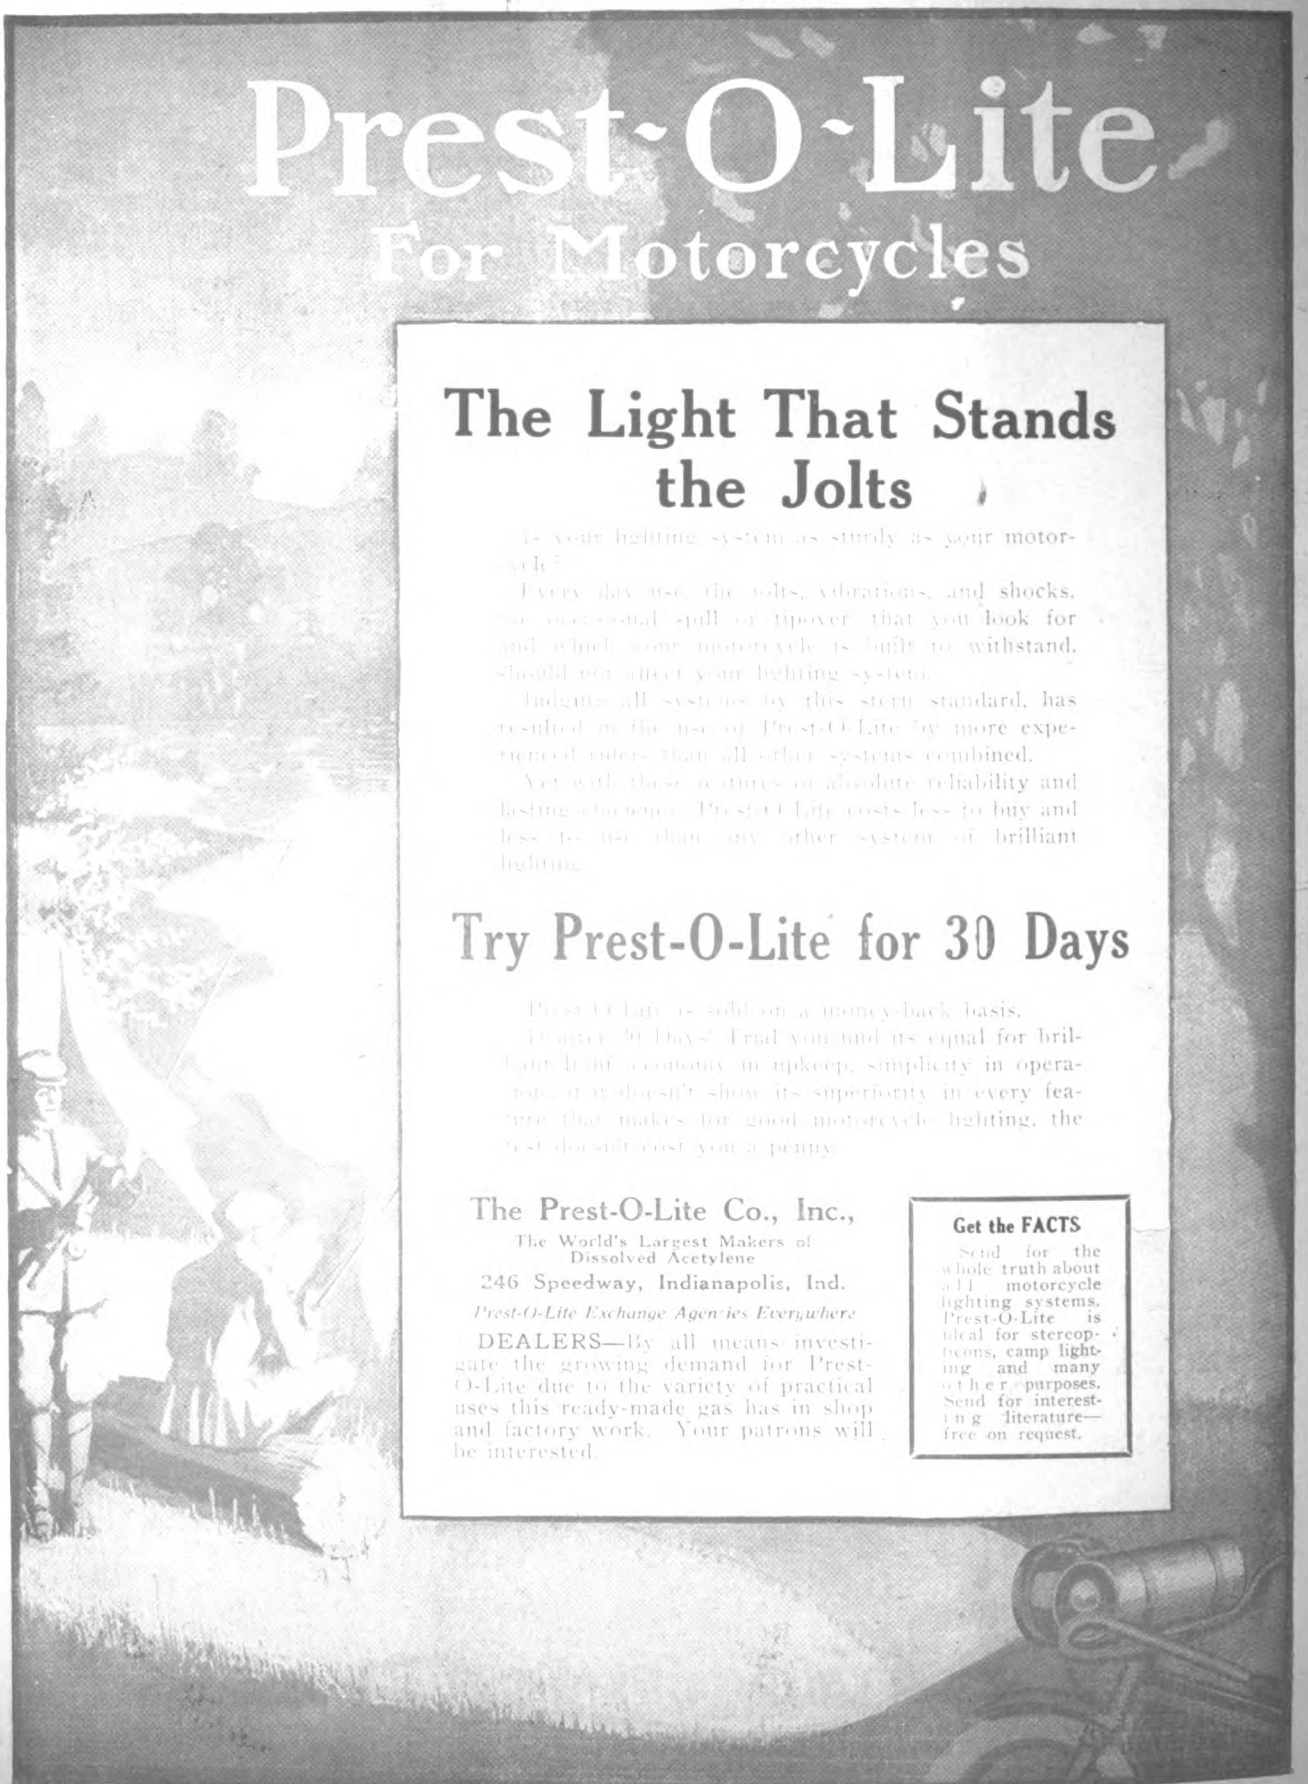
# Prest-O-Lite
## For Motorcycles



## The Light That Stands the Jolts

Is your lighting system as sturdy as your motorcycle?

Every day use, the jolts, vibrations, and shocks, the occasional spill or tipover that you look for and which your motorcycle is built to withstand, should not affect your lighting system.

Judging all systems by this stern standard, has resulted in the use of Prest-O-Lite by more experienced riders than all other systems combined.

Yet with these features of absolute reliability and lasting efficiency, Prest-O-Lite costs less to buy and less to use than any other system of brilliant lighting.

## Try Prest-O-Lite for 30 Days

Prest-O-Lite is sold on a money-back basis.

Try it for 30 Days' Trial you find its equal for brilliant light, economy in upkeep, simplicity in operation, or it doesn't show its superiority in every feature that makes for good motorcycle lighting, the test shall cost you a penny.

# Rogers SIDECARS

ROGERS MANUFACTURING COMPANY CHICAGO

Tried by the high court of discriminating buyers and found supreme.

At the Chicago Motorcycle Show practically every sidecar on the market was submitted to the inspection of the highly discriminating motorcycle manufacturers; men with a high opinion of their own machines and coldly critical of anything that might mar the lustre of their reputation.

Several of these after careful inspection selected side cars as standard equipment of their 1916 line.

Their judgment is that of the highest court to whom the sidecar manufacturer submits his product.

The following placed the seal of their approval on the ROGERS SIDECAR by selecting and announcing it as standard equipment:

**DAYTON HENDERSON POPE THOR**

**YALE READING STANDARD**

We have always claimed ROGERS SIDECARS were the best in the world and are proud of such confirmation of our opinion.

Wise buyers whether dealers or motorcycle owners will appreciate the significance of such a mark of approval.

We are prepared to make immediate delivery on the latest model ROGERS SIDECARS for all standard makes of motorcycles.

Live dealers write for terms and territory.

Prest-O-Lite gives the rider the most for his money in brilliancy, reliability and economy.

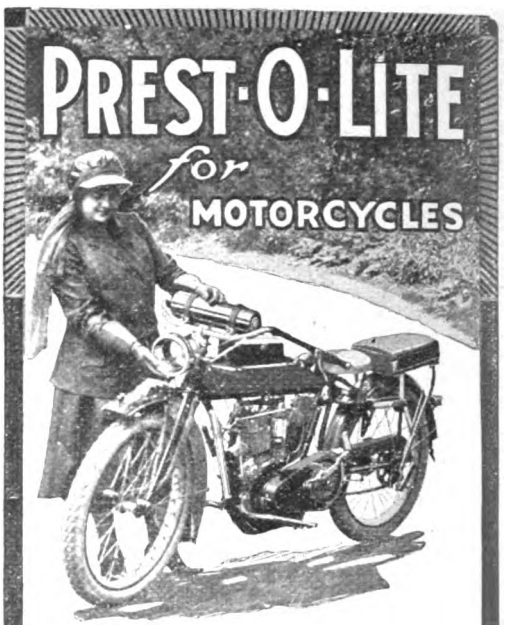
Experienced riders know this. Prospective motorcyclists are being told by the Prest-O-Lite advertising.

You have a better opportunity to "cash in" on Prest-O-Lite advertising this season than ever before.

## The new light-weight low-priced motorcycles mean more sales with "complete equipment"

Millions of motorcycle prospects were made by the announcement of the lower priced motorcycles by several leading manufacturers. And every time you sell a low-priced motorcycle without "complete equipment" you are passing up a chance to make a on each machine sold.

"Prest-O-Lite, a lamp, and a good mechanical horn." Costs the rider less to buy and less to use than any other system of brilliant lighting. Are you offering your rider-patrons this big extra value?



### Economical Efficient and Brilliant Light

Prest-O-Lite gives perfect riding light—is as sturdy as your motorcycle itself. It stands the jolts, needs no attention you yourself cannot give. Practical, simple, and trouble-proof.

Considering its simplicity and freedom from trouble, it is at once the most convenient and the most economical lighting system for motorcycles.

### Complete Equipment for Regular Service

Nearly all dealers make this typical equipment combination: "Prest-O-Lite, a lamp, and a mechanical horn." Costs less to buy and less to use.

Your name and address on the margin of this page will bring complete information on motorcycle lighting. Get our valuable free book. Write today.

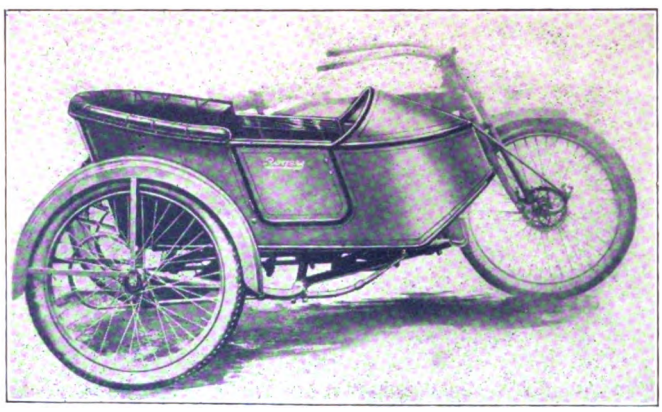
Rogers

ROGERS MANUFACTURING CO.

# The One Really Perfect Sidecar

Rogers service covers all conditions of usage. A sidecar used in the city gets much less abuse than one in which long road tours are made. A touring sidecar must necessarily be stronger and heavier than a "town car." In the ROGERS we have incorporated the best qualities of both town and touring car. The ROGERS is strong, yet lighter than any other car made.



## Some Other Interesting Features

A Ford-size hub, for 15/16" spindle, three times as strong as necessary. Deep, upholstered cushions, genuine hair padding. Squared support tube, eliminating all side strain on motorcycle frame. Body 61 inches long, plenty of leg room. Ball and socket joint, giving safe and certain attachment to any motorcycle in five minutes. Steel, automobile type door, non-rattling lock, pocket on inside of door, mahogany strips on door. Chassis of heavy gauge drop forged construction.

There are other important details which we give in our pamphlet, which will be sent upon request. Ask your dealer for a demonstration.

**ROGERS MANUFACTURING CO.**

**328 West Madison St., Chicago, Ill.**

# More Than Six Thousand

**Leading Exporters, Importers and Foreign Cycle Jobbers and Dealers in all parts of the world will read what you have to say in**

# The Export Number

## of Motor Cycle Illustrated, November 1, 1915

**(In Five Languages)**

Never before have there existed such opportunities for establishing high-class foreign connections. At both the New York and Chicago Shows scores of foreign representatives have arranged to do business with American manufacturers. But they constitute only a small percentage of those who WANT to do business.

After a year's work we have obtained the names of more than 6,000 foreign motorcycle and bicycle dealers. Every centre of population on earth is represented on our list. A great percentage of these dealers are anxious to do business with this country.

## Introduce Yourself to Them by the Use of Space

in our Export Number. Advertising will be limited to thirty pages, of which seventeen have already been reserved. Copy must be in our hands not later than October 27th.

## For Motorcycles

Prest-O-Lite gives perfect riding light, and is as sturdy as your motorcycle itself.

It stands the jolts, road shocks and vibration. Is practical, simple and trouble proof. Prest-O-Lite needs no attention you yourself cannot give easily and quickly.

Considering its simplicity and freedom from trouble, Prest-O-Lite is at once the most convenient and most economical of all systems for motorcycle lighting.

## The New Models Mean More "Complete Equipment" Sales

On any size machine, Prest-O-Lite gives maximum service at minimum cost. It is the *one* practical lighting system for all motorcycles.

The live dealer will "cash in" on the new models, by including in the sale, "Prest-O-Lite, a lamp and a mechanical horn."

## Give the Rider the Most for His Money—It Means More to You

Every time you sell a complete equipment combination including Prest-O-Lite you make a friend.

The buyer gets full value, saves money when he buys, and more money every time he uses it.

If you are not cashing in on this proposition now, send for details.

MOTORCYCLE SQUAD OF THE PHILADELPHIA POLICE FORCE EQUIPPED WITH PREST-O-LITE

JAMES ROBINSON
SUPERINTENDENT
WALTER GILBERT
CHIEF CLERK

DEPARTMENT OF PUBLIC SAFETY
BUREAU OF POLICE
PHILADELPHIA

Motor DISTRICT

November 16th 1915.

The Prest-O-Lite Company, Inc.,
1418 Race Street,
Phila., Pa.

Gentlemen:-

After investigating the subject of proper light for our motorcycles, we decided that the Prest-O-Lite System was the most practical, and consequently installed thirty-three (33) of your outfits on our machines.

The simplicity of Pret-O-Lite, its economy and freedom from complications were the three points that really decided the matter in favor of your lighting system. In our work we need a lighting system that will withstand all sorts of hard usage, and one that will enable our officers to ride with safety and confidence.

Eventually we intend to equip all of our motorcycles with Prest-O-Lite.

Very truly yours,

George W. Fritz
Lieut Motor Cycle.

# You can rely on their judgment

Prest-O-Lite is chosen by the most experienced riders who insist on brilliant, dependable light for all emergencies. You can therefore be sure that it is the best light for every rider's use.

To those riders who want complete equipment, we recommend Prest-O-Lite, a lamp and a mechanical horn, which you can get from your dealer. This combination stands the jolts and vibration. Costs little to buy and little to use. Write for complete information.

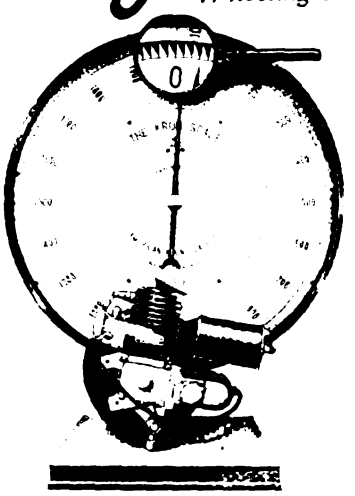
*"Wheeling without work"*



## 15 POUNDS of POWER

*Cyclemotor engine (including magneto, muffler and carburetor) registering 15 pounds on a government tested and sealed Kron springless scale.*

The mechanical perfection and superior construction of the Cyclemotor engine, which enables it to develop sufficient power to propel a bicycle and rider, is expressed to a superlative degree in its light weight as in its every other unique feature.

That is why entire satisfaction follows every Cyclemotor sale and why such high praise and enthusiasm is being expressed by the wide awake dealers who have secured agencies. A few choice sections are still open and interested dealers will benefit by asking for our proposition and Booklet C at once.

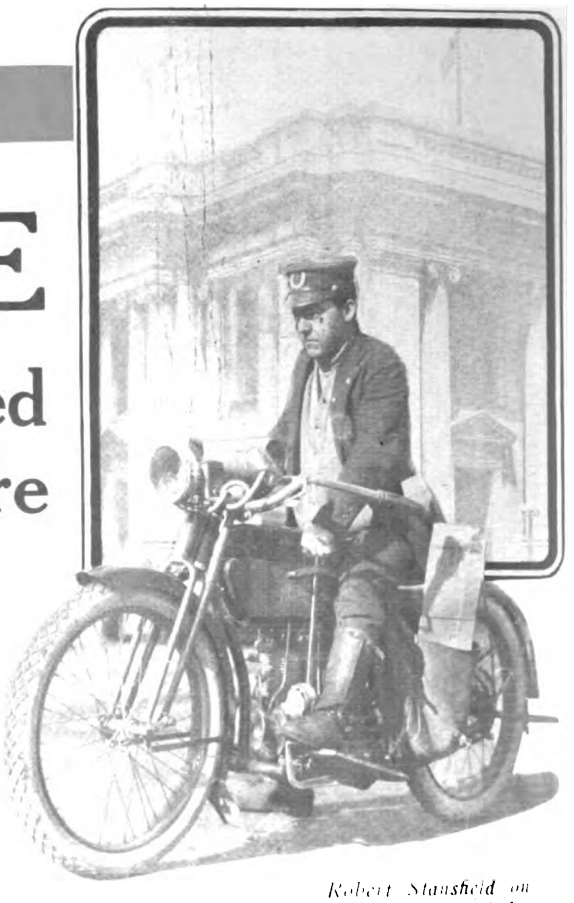
# PREST-O-LITE

## The Choice of Experienced Motorcyclists Everywhere



*Robert Stansfield on Henderson 4 cylinder*

You may not ride as much at night as this man, but when it is necessary, you must have efficient and brilliant light.

Prest-O-Lite is as sturdy as your motorcycle itself. It stands the jolts, needs no attention you cannot give. Prest-O-Lite is practical, it is simple, it is trouble-proof.

Considering its simplicity and freedom from trouble, it is at once the most convenient and most economical lighting system for motorcycles.

### The Live Dealer Sells What the Live Rider Demands

# PREST-O-LITE
## For Motorcycles

## The Light That Stands the Jolts

A STRONG, steady light is especially important when the road is full of ruts, bumps and gravel, with unexpected turns.

The most severe jolts and bumps do not affect your Prest-O-Lite—it throws a brilliant, unflickering light far ahead, illuminating every obstacle. It gives you confidence and enables you to "throw her open" on any road because of its steady brilliance.

## Prest-O-Lite is as Sturdy as Your Motorcycle

Still Prest-O-Lite costs less to buy and less to use than any other brilliant light. It is the choice of experienced riders, everywhere. You yourself can give it any attention it may need.

We have a valuable proposition for dealers—write today

## To Our Many Friends in the Cycle Trade

# A Prosperous New Year

## Is Our Wish

AND we are confident that our wish will come true.

The Dayton Post Office has broken all its records for number of Christmas packages handled.

Dayton retail stores have done the biggest Christmas business in their history.

Dayton savings associations report greatly increased deposits over similar periods in previous years.

Dayton is a typical American city of 125,000 population. What has been true here was no doubt true elsewhere. Good times are here!

But what is more to the point, the Christmas orders for Dayton Bicycles, particularly the ladies' models, poured in on us by telegraph, telephone and special delivery as never before.

The fact that ladies' bicycles are so much in demand indicates that the Bicycle is Back to stay.

While we realize that we are one of a very few who can truthfully say that their Motorcycle business was bigger in 1915 than in 1914, we look for a much greater increase in 1916.

The Dayton is gaining on every lap. We want you to work with us and share with us the prosperity that is coming with the New Year. We have the most complete cycle line marketed by any single factory—Dayton Motorcycles, Bicycles and Motor Bicycles.

If you are handling one of these why not see us about the others? We will work with you to make your store popular as The Dayton Store. Write us fully today.

## The Davis Sewing Machine Company
